

# HERITAGE®

U.S. COIN AUCTION

JUNE 14-15 & 17, 2018 | LONG BEACH

3768

# U.S. Coins

Featuring: An Important New York Collection • The Bob Williams Collection  
The Reilly Cody Collection • The Tuxedo Park Collection • Sawyer's Native American Portrait Galvanos  
The Terry Brand Estate, Part IX • The Emily A. Blake Collection • The Collection of William Rau, Part II

June 14-15 & 17, 2018 | Long Beach

## FLOOR Signature® Sessions 1-4

(Floor, Telephone, HERITAGELive!, Internet, Fax, and Mail)

Long Beach Convention Center, Room 103A  
300 E. Ocean Avenue • Long Beach, CA 90802

Session 1

Thursday, June 14 • 12:00 PM PT • Lots 3001–3763

Session 2 - PREMIER

Thursday, June 14 • 5:00 PM PT • Lots 3764–4330

Session 3

Friday, June 15 • 1:00 PM PT • Lots 4331–4959

Session 4

Friday, June 15 • 6:00 PM PT • Lots 4960–5627

## INTERNET Signature® Session 5

(HERITAGELive!, Internet, Fax, & Mail only Session)

Session 5

Sunday, June 17 • 10:00 AM CT • Lots 7001–9277

## LOT SETTLEMENT AND PICK-UP

Friday, June 15 • 10:00 AM – 1:00 PM PT

Saturday, June 16 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

### Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

## BIDDING METHODS

### HERITAGE Live!® Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at HA.com/Live

### Live Floor Bidding

Bid in person during the floor sessions.

### Live Telephone Bidding (Floor Sessions Only)

Phone bidding must be arranged 24 hours before your session begins. Client Service: 866-835-3243

### Internet Absentee Bidding

Proxy bidding ends ten minutes prior to the session start time. Live Proxy bidding continues through the session.  
HA.com/1276

### Fax Bidding

Fax bids must be received 24 hours before your session begins. Fax: 214-409-1425

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Fax: 214-409-1425

Direct Client Service Line: 866-835-3243

Dear Bidder,

This summer the Long Beach Expo is headlined by one of the most famous coins Heritage has ever had the privilege to offer in our long history as Official Auctioneer of the Expo – an historic 1804 dollar, the King of American Coins.

The Mickley Specimen – later held in the collections of Reed Hawn, David Queller, and our present consignor — is one of eight known Class I original Diplomatic Presentation Strikings.

Yet as impressive as the 1804 dollar is, it is accompanied by a number of additional coins and other Featured Collections that collectively promise to propel this Long Beach Signature auction to record results.

#### AN IMPORTANT NEW YORK COLLECTION

This collection easily rates as one of the highest-value gatherings of U.S. type we can remember in any recent Long Beach event. Of course, the 1804 dollar is an absolute show-stopper by itself. Yet there are 21 more lots in our Premier Session from An Important New York Collection that would rate highly in any public auction, regardless of venue. Among them are these outstanding rarities:

- 1793 With Periods Chain cent, MS65 Brown PCGS. CAC. Ex: Cleneay-Atwater-Eliasberg. Still housed in an old green label holder.
- 1776 EG FECIT Pewter Continental dollar, Newman 3-D, astonishing MS67 NGC. Ex: Brand-Boyd-Ford.
- 1794 Flowing Hair silver dollar, B-1, BB-11, XF40 PCGS. CAC. Sharp strike, full date, and sharp stars.
- 1805/4 Draped Bust half dollar, O-101, T-4, MS65 NGC. CAC. Ex: "Col." E.H.R. Green-Eric P. Newman-Oliver Jung, arguably the finest 1805 half dollar of any variety.
- 1804 Draped Bust quarter, Browning-1, MS65 NGC. CAC. The finest certified by NGC or PCGS. Ex: "Col." E.H.R. Green, Jerome Kern.
- 1796 No Stars quarter eagle, BD-2, MS61 PCGS. Historic first-year condition rarity and an important one-year type.
- 1840-C five dollar gold, MS64+ PCGS Secure. CAC. None finer at either service, finest at PCGS.
- 1870 Liberty Head twenty dollar, PR65 Ultra Cameo NGC. CAC. Second-finest known, just five or six survivors in collectors' hands.

A link to An Important New York Collection appears with each individual lot in the collection, as well as on the auction home page by using the Featured Collection drop-down menu. We urge every collector and numismatist to view the lots of this remarkable collection – either in-person or online – and for specialists to recognize the extraordinary quality on display.

## THE BOB WILLIAMS COLLECTION

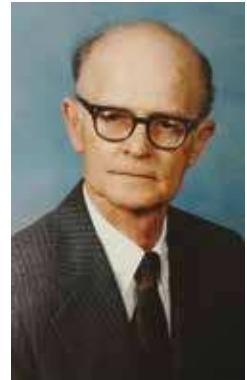

Bob Williams was always a collector at heart. As a young boy, he collected baseball cards, bottle caps and bottles, comic books, and just about anything else. Later, with his young sons, he scoured coins set aside from their grandad's door-to-door Watkins medical and household products route, filling the old blue Whitman's coin books. Bob became serious about coin collecting after his wife, Lane, passed away in the early 1980s — coin collecting helped to fill the void in his life. Most of the collection was purchased during the 1980s and 1990s, prior to complications from glaucoma that impaired his vision to the point he could no longer examine the details that collecting demanded.

Bob carefully assembled his collection and took great pride in it. He treasured the friendships he formed over the years, working with different sellers and other enthusiasts, some of whom still stay in contact with the family today. Bob was a collector, not an investor — he sold only one coin during his lifetime, at the urging of his sons, just to "test the market." It was his desire for his children and grandchildren to keep only a few favorite coins as mementos, and sell the collection so others could appreciate the pieces he painstakingly assembled.

The 150+ lots in The Bob Williams Collection are prominent in the Premier Session as well as other floor sessions, and make up an important part of the online Signature® Internet session. Bob collected copper, silver, and gold coins, searching out fine examples in About Uncirculated and full Mint State grades, including a notably original 1892-CC double eagle graded MS63 NGC with CAC endorsement — conditionally rare, with just one piece certified finer at either service.

## THE REILLY CODY COLLECTION

Our consignor penned these thoughts to describe his longtime interest in coins:

"I started collecting coins when I was about 9 years old. My grandmother bought me one of the Whitman blue Lincoln cent coin folders. I took to it immediately, going to the bank on Saturday and buying rolls of cents — bringing them home to search and fill the book. I eventually did, minus the obvious impossibilities (1909-S VDB, 1914-D, and 1931-S). That led me into other series such as Mercury dimes, Jefferson nickels, and Washington quarters. I couldn't get enough of it. For a while, life got in the way (college, career, marriage, kids), but I always came back to the coins.

"I've had two careers. The first was as a CPA. I worked for 46 years at a national public accounting firm, starting as a junior accountant to eventually becoming one of the firm's managing partners. During my final years with the firm, I transitioned to my dream second career, becoming a college professor at my alma mater, Rutgers University, where I now work as an accounting professor. My career enabled me to expand my collecting horizons. I always believed in the theory "buy the book before the coins," so my numismatic library expanded greatly over the years. I loved receiving the Heritage catalogs in the mail, poring through them, and circling the items of interest. I eventually narrowed my main interest to the Liberty Seated series, concentrating on dimes and half dimes. Proofs were another true love, especially those pre-1860. And I loved technology. I no longer had to travel as much to acquire my "treasures." I could do it from the comfort of my kitchen table by following the HERITAGE Live® auctions, bidding and buying by a simple touch on the key pad. What convenience!

"Now, it is time to let other collectors enjoy the coins. I will never stop reading or being a coin collector. I'll just start something new. My memories of certain acquisitions will stay with me forever (especially how I came to owning my favorite coin, the 1795 five dollar S/D variety in AU55). I have lived in New Jersey my whole life. I currently reside in North Jersey with my wife Patrice. We have 6 grown children and 5 grandchildren."

The Reilly Cody Collection does indeed shine with many exceptional proofs and a clear preference for Seated half dimes and dimes in both proof and circulation-strike formats. Proof cents, nickels, and other silver denominations add variety, with a few supporting patterns. Somehow, a couple of gold coins snuck in, including a beautiful gold dollar in PR67 Cameo NGC.

## THE TUXEDO PARK COLLECTION

We have observed tremendous interest and bidding activity for coins in their original old holders, a tendency that bodes well for The Tuxedo Park Collection. The entire collection is housed in either first-generation PCGS "rattler" holders (more than 50% of the consignment), or old PCGS green label holders. Focused on better-date copper, silver, and gold type, nearly every piece grades MS65 or finer, including some exceptional proofs and patterns. It goes without saying that many of the coins are poised for upgrade, but the temptation is strong to leave them just as they are (in the old holders). It will pay dividends to look for The Tuxedo Park Collection pedigree throughout all of our sessions, including several lots in the online Signature® Internet session.

## SAWYER'S NATIVE AMERICAN PORTRAIT GALVANOS

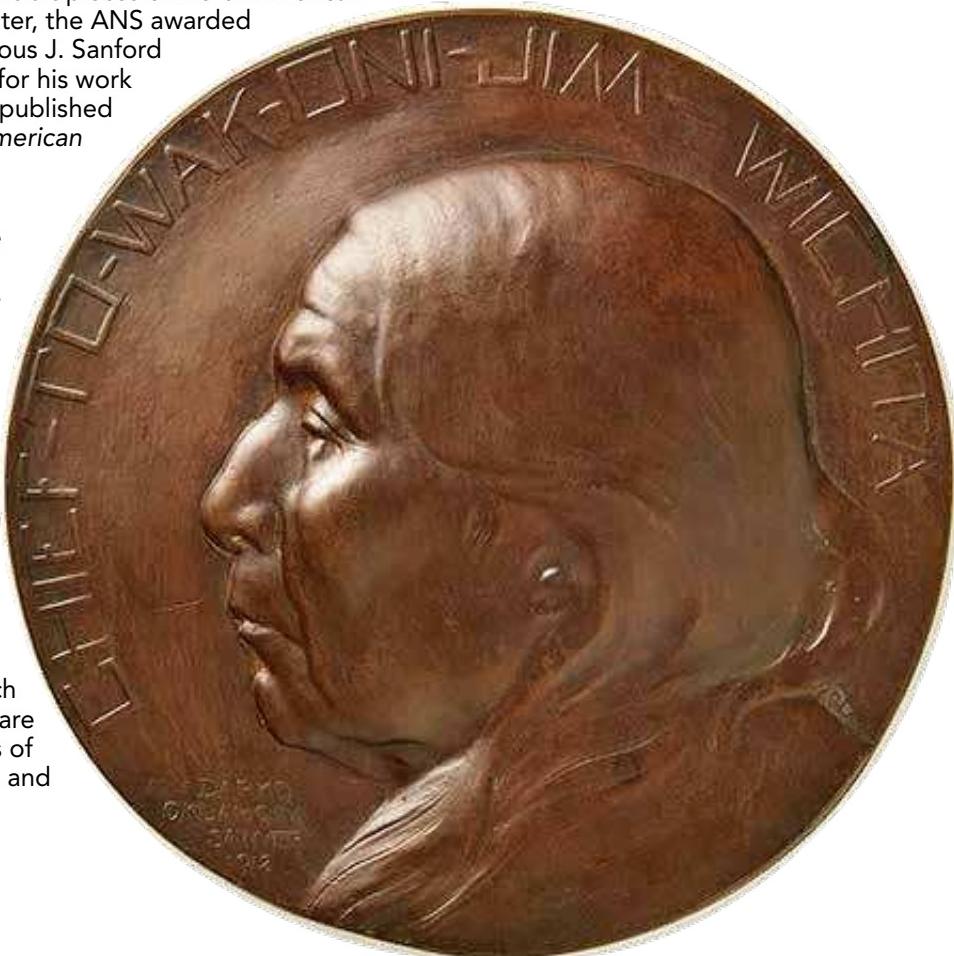

Edward Warren Sawyer was born on March 17, 1876 into a prominent Chicago family. As a young man, Sawyer trained at the Art Institute of Chicago under the tutelage of Hermon Atkins MacNeil, the famed designer of the Standing Liberty quarter. Near the close of the 19th century, Sawyer traveled to France where he studied at the Académie des Beaux Arts. He received a bronze medal at the 1904 Louisiana Purchase Exposition in St. Louis for his statue of a charging buffalo, and later that year traveled to Fort Yuma, California with his second cousin, the painter Elbridge Ayer Burbank – the first of several excursions West to live among various tribes between 1904 and 1912.

Early on, the numismatic community took note of Sawyer's work, and in 1914 the American Numismatic Society published information about his work, noting: "The most important event in the field of medallic art in our country for 1913 was the advent of Mr. Sawyer's portrait pieces of North American Indians." Later, the ANS awarded the prestigious J. Sanford

Saltus medal to Edward Warren Sawyer for his work with Native Americans. In 1914, Sawyer published "My Work Among the Indians" in the *American Journal of Numismatics*.

Working with Sawyer's models, the Medallic Art Company produced bronze galvanos of his portraits. These uniface galvanos were made in two sizes – 2-3/4 inch diameter and 5-inch – with 38 different subjects and 41 varieties known today. The majority of these galvanos are found only in museums, including the American Numismatic Society, the Smithsonian Institution, the Massachusetts Historical Society, the Musee d'Orsay in Paris, and a few others. Examples in private hands are rare, particularly the 5-inch diameter pieces.

We are proud to offer 18 of the 23 known 5-inch galvanos in this Long Beach auction as individual lots, an extremely rare and important opportunity for collectors of Native American art, sculpture, artifacts, and medals.

## THE TERRY BRAND ESTATE, PART IX

An incredible accumulation continues to flow from the 1794 half dollar collection assembled by Terry Brand. Our Premier Session includes 11 more examples of 1794 halves, ranging in grade from Good to Very Fine, with Choice examples that are particularly well-defined for the first-year issue. Seven additional selections appear in Floor Session Three. Early half dollar specialists continue to benefit from the temporary increase in availability of this key issue, and collectors will do well to remember that the total number of surviving examples has not changed, other than the ownership of those pieces.

## THE EMILY A. BLAKE COLLECTION

Colonials, nickels, and a few error coins make up most of this high-quality consignment, including many interesting varieties. A nice run of Shield nickels includes a low-mintage Gem 1879 example in an old green label PCGS holder, and a pleasing 1877 PR64 PCGS nickel from the proof-only mintage. A 1910 Liberty nickel is double struck in collar, with rotation. A "1776" Machin's Mills halfpenny grades VF25 PCGS – Vlack 6-76A, W-7790, R.4.

## THE COLLECTION OF WILLIAM RAU, PART II

William Rau's pattern collection created quite a stir at the recent Central States event, and several remaining selections are offered here in Long Beach. Among them is an 1882 Liberty Head five cent pattern in PR62 PCGS, the scarce Judd-1690, Pollock-1892, a precursor to the adopted Liberty nickel design, but with the stars in a different arrangement. A rare circa 1859 Dickeson half eagle pattern, struck in copper, is Judd-C1805-3, Pollock-6130, MS62 Brown PCGS Secure, rated High R.7. It is a strange concoction, probably trimmed by hand, the die made famous by Dr. Montrovile Dickeson.

We are expecting an epic Long Beach Expo, so be sure to join us either in person or online. Bidding is simple, before the auction and instantaneous during the sale, wherever you are in the world. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® (our proprietary, award-winning online platform). If you are attending Long Beach in person we encourage you to stop by our booth on the bourse, view the lots on-site, and enjoy participating "live" from the auction floor.

As always, we wish you good luck and great success with your bids!

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

# SESSION ONE

## COLONIALS

1662 Oak Tree Twopence, VF25  
Noe-31.5, W-240

3001 1662 Oak Tree Twopence, Small 2, VF25 PCGS Secure. Noe-31.5, W-240, R.7. Small 2. In this state of the dies, which were used to manufacture all 1662 Oak Tree twopence, the second 6 is nearly indistinguishable, almost resembling a contorted 7, and a fully formed die break occurs above the 2. The well-defined obverse is misaligned toward 5:30, while the reverse is nicely centered but with somewhat mushier legends. The surfaces are evenly toned in gunmetal blue patina. A rare variety for the specialist. Listed on page 50 of the 2019 Guide Book.

3002 1652 Pine Tree Threepence, Pellets at Trunk — Damaged — NGC Details. VF. Noe-34, W-630, Salmon 1-A, R.4. 15.9 grains. Portions of the obverse border are flattened, at 7 o'clock and 8:30. Small oval punches southwest of the 1 in the date impact the lower-right branch of the pine tree. The date and denomination are sharp, and a majority of the peripheral legends are clear. Listed on page 51 of the 2019 Guide Book.

3003 (circa 1828) American Plantations 1/24 Part Real, Restrike, AU58 PCGS. Newman 4-E, W-1155, R.5. Seven harp strings. According to the Whitman Colonial Encyclopedia, “although originals are believed to have been made ... most if not all of the [W-1155] examples in the marketplace are restrikes.” This nicely struck example has little if any wear, but the evenly granular surfaces have oxidized to deep steel-gray. Unabraded save for a narrow horizontal mark through the left border of the upper shield. Listed on page 53 of the 2019 Guide Book. NGC ID# AUB5, PCGS# 52

(1694) London Elephant Token, AU58  
Thick Planchet, Hodder 2-B

3004 (1694) London Elephant Token, Thick Planchet, AU58 PCGS. Hodder 2-B, W-12040, R.2. A choice Elephant token with smooth, glossy fields and a bold strike. The elephant is well-defined and impressive. A few scattered marks, toned over long ago, are noted, but none of them are distracting. The reverse features the arms of the City of London: This variety incorporates a plain reverse cross with the dagger in the first quadrant (as it should be). Struck on a thick planchet, as are most of this variety. Listed on page 58 of the 2019 Guide Book. NGC ID# 2U3A, PCGS# 55

(1694) London Elephant Token, MS63 Brown  
Thick Planchet, Hodder 2-B

3005 (1694) London Elephant Token, Thick Planchet, MS63 Brown PCGS. Hodder 2-B, W-12040, R.2. Uniform chocolate-brown patina with hints of red provides good eye appeal to this Select Uncirculated example from this enigmatic series. There are several varieties of these tokens, with this one featuring a plain cross with the dagger in the first quadrant. This piece has minor surface abrasions, none of them notable, and a few planchet striations on the obverse. This would be a welcome addition to most Colonial type sets. Listed on page 58 of the 2019 Guide Book.

3006 1773 Virginia Halfpenny, Period, MS64 Red and Brown NGC. N. 20-X, W-1670, R.3. Both dies exhibit substantial peach-red color, though the open areas and high points are toned brown. A nicely struck, problem-free, and highly pleasing near-Gem of this Colonial issue, coined at the Tower of London by the Royal Mint. Listed on page 57 of the 2019 Guide Book. NGC ID# 2ATK, PCGS# 241

3007 1787 Massachusetts Cent, Arrows in Left Talon AU50 NGC. Ryder 3-G, W-6090, R.3. A briefly circulated, medium brown example that retains ample luster within the legends and motifs. We note a few hair-thin marks on the eagle's shield, along with a trio of recessions on the vertical stripes. Listed on page 71 of the 2019 Guide Book. NGC ID# 2B25, PCGS# 302

3008 1787 Connecticut Copper, Muttonhead, VF30 NGC. M. 1.2-C, W-2720, R.3. The crude “Muttonhead” variety is an contemporary counterfeit and a popular Guide Book type. On this later die state example, the legends are fragmented due to lapping of dies by the unknown maker. The golden-brown surfaces are smooth save for a minor scuff on the obverse cheek. Wear is less substantial than is suggested by the third-party grade. Listed on page 73 of the 2019 Guide Book. NGC ID# 2B2M, PCGS# 343

3009 1787 Connecticut Copper, Horned Bust, AU53 NGC. M. 4-L, W-2810, R.1. An early-to-intermediate die state with a narrow “horn” break on the field beneath the chin. The “horn” is not affixed to the bust. Among the most available Connecticut varieties, but always in demand as a Guide Book type. A richly detailed and unabraded example. The ebony-brown surfaces are evenly microgranular. Listed on page 73 of the 2019 Guide Book. NGC ID# 2B2T, PCGS# 364

3010 ‘1776’ Machin’s Mills Halfpenny VF25 PCGS. Vlack 6-76A, W-7790, R.4. A walnut-brown example with only minor marks and a moderately granular appearance. The central reverse is softly brought up, partly because of the relatively high relief bust. Likely struck a decade or so later than its 1776 date. Listed on page 79 of the 2019 Guide Book. Population: 7 in 25, 10 finer (4/18). Ex: Long Beach Signature (Heritage, 5/2008), lot 1949, which realized \$977.50.

*From The Emily A. Blake Collection.* NGC ID# 2B43, PCGS# 460

- 3011** 1785 Vermont Copper, VERMONT, VF35 NGC. RR-2, Bressett 1-A, W-2005, R.2. An early die state without any indication of the eventual heavy break through the plow. An attractive chocolate-brown example of the popular and distinctive Landscape type. The surfaces are problem-free, but the coin is several degrees off-center toward 10:30. Listed on page 84 of the 2019 Guide Book. NGC ID# 2B55, PCGS# 539
- 3012** 1786 Vermont Copper, VERMONTENSIMUM, VF25 NGC. RR-8, Bressett 6-E, W-2030, R.4. VERMONT, VERMONTIS, and VERMONTENSIMUM on Landscape coppers were all attempts to translate Vermont into Latin. On subsequent designs, the state name was instead designated as VERMON. Ryder-8 is the rarest among the three 1786 Landscape marriages. This tan-brown piece has a somewhat uneven strike, perhaps because the reverse is moderately off-center toward 4:30. No marks or flan flaws are consequential. Listed on page 84 of the 2019 Guide Book. NGC ID# 2B57, PCGS# 545
- 3013** 1787 Auctori Plebis Token AU55 PCGS. Breen-1147, W-8770, R.3. A smooth tan-gray example. The strike is typical for the issue, as intended by the maker to imply acceptance in circulation. The usual die state with a prominent, curved die crack in front of the face of the seated figure. Moderately off center toward 2 o'clock. The Auctori Plebis token has an English origin, but is popular with Colonial specialists due to its uncanny obverse similarity with the contemporary Connecticut coppers. Listed on page 86 of the 2019 Guide Book. Population: 7 in 55, 2 finer (5/18). NGC ID# 26XG, PCGS# 601
- 3014** 1783 Nova Constellation Copper, Pointed Rays, Small US, AU53 PCGS. Crosby 2-B, W-1865, R.2. A lightly circulated and problem-free chocolate-brown example of this popular Early American type. The central reverse retains the dappled texture of the planchet prior to the strike. Listed on page 66 of the 2019 Guide Book. NGC ID# 2AYX, PCGS# 801
- 3015** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU55 NGC. N. 12-X, W-6820, R.3. Better-grade Fugio cents are likely to be struck from Newman's 'X' reverse die, identified by a slender vertical break at 6 o'clock and minor die lumps within the 12 o'clock ring. A satiny and unabraded example with ample hints of faded red within the legends. Scattered unimportant flan striations are as expected for the Fugio series. Listed on page 99 of the 2019 Guide Book. NGC ID# AX5E, PCGS# 883
- 3016** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU58 PCGS. N. 8-X, W-6750, R.3. The late die state with a dramatic break over the IN in BUSINESS. An evenly struck and pleasing near-Mint Fugio type coin. Mostly medium brown, though a glimpse of mint red lingers near 9 o'clock on the reverse. Listed on page 99 of the 2019 Guide Book. NGC ID# AX5E, PCGS# 883
- 3017** 1787 Fugio Cent, UNITED STATES, 4 Cinquefoils, MS61 Brown NGC. N. 8-B, W-6740, R.3. The N in MIND is over the left upright of the U in BUSINESS, and the R in ARE is close above the N below. The reverse is heavily clashed, while glossy surfaces on both sides feature rich mahogany-brown color. Well-struck and well-centered on the planchet. Listed on page 99 of the 2019 Guide Book. NGC ID# 2B8F, PCGS# 889
- 3018** 1789 Mott Token, Thin Planchet, Plain Edge AU55 PCGS. CAC. Breen-1021, Rulau-E-NY-611. A very early die state with a sharp eagle, bold legends, and no indication of the eventually huge break from the clock. The clock face shows wear, but the chocolate-brown surfaces are pleasing save for a flan void near the S in WARES. Likely struck decades later than its 1789 date, which represents the year the Mott firm was founded. Listed on page 86 of the 2019 Guide Book. NGC ID# 2B5L, PCGS# 604
- 3019** (1792-94) Kentucky Token, LANCASTER Edge, MS65 Brown NGC. Breen-1156, W-8810, R.5. Much scarcer than the W-8800 Plain Edge variety, though W-8810 trades for only a modest premium due to demand from Early American type collectors. A lovely Gem with vibrant luster and undisturbed sea-green surfaces. The left obverse border exhibits minor flan striations, as made. Listed on page 87 of the 2019 Guide Book. NGC ID# AUBN, PCGS# 623
- 3020** 1795 Talbot, Allum & Lee Cent PR64 Brown NGC. Ful-1, W-8620, R.6 as a Proof. An intricately struck and undisturbed chestnut-brown near-Gem. The maker of the Talbot, Allum & Lee tokens was Peter Kempson & Co. Some 1795 tokens were struck as proofs and apparently retained as demonstration pieces for prospective clients. The fields exhibit faint concentric circles from the planchet preparation, as made. Listed on page 88 of the 2019 Guide Book. NGC ID# 2B65, PCGS# 90640
- 3021** 1796 Castorland Medal, Copper, Original Dies, MS63 Brown PCGS Secure. W-9110, R.7. An early restrike from the original Paris Mint dies. The reverse shows minor die crumbling near the right handle of the vessel, as usually encountered. No die breaks are apparent near the S in PARENTS. The borders are strike doubled, but the central designs are sharply struck. The chocolate-brown surfaces are unabraded and attractive. Listed on page 89 of the 2019 Guide Book. Population: 4 in 63 Brown, 7 finer (4/18). NGC ID# CR8Z, PCGS# 657
- 
- 1783 Washington & Independence Cent, XF45  
Uncentered Broadstrike, Draped Bust, No Button  
Baker-2, Vlack 13-J, Musante GW-106**
- 
- 3022** 1783 Washington & Independence Cent, Draped Bust, No Button — Uncentered Broadstrike — XF45 PCGS. Baker-2, Vlack 13-J, W-10300, Musante GW-106, R.1. A chocolate-brown uncentered broadstrike example struck toward 8 o'clock on the obverse and 9 o'clock on the reverse. Partial dentilation appears below the date. The impression is crisp, softened slightly by brief circulation. The unstruck crescents on each side are smooth. These tokens were produced in Birmingham, England about 1820. Listed on page 92 of the 2019 Guide Book.
- 3023** 1783 RES Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Plain Edge PR66 Brown Cameo NGC. Baker-3C, Vlack 14-J, W-10310, Musante GW-106B, Low R.7. The rare and well-made proof plain edge, copper restrike of the 1783 Draped Bust cent was struck circa-1858 in England. This fully struck specimen exhibits vertical die polish lines across unblemished mirrored fields. The powder-blue patina is attractive. Listed on page 92 of the 2019 Guide Book. NGC ID# 2B6T, PCGS# 682
- 3024** 1791 Washington Large Eagle Cent AU58 NGC. Baker-15, W-10610, Musante GW-15, R.2. Glimpses of faded mint red linger in design crevices of this momentarily circulated walnut-brown Large Eagle cent. A lens reveals only incidental contact. A well-made variety struck in England with the intent of securing a Federal coinage contract. Listed on page 93 of the 2019 Guide Book. NGC ID# 2B6Z, PCGS# 702
- 3025** 1791 Washington Small Eagle Cent AU58 NGC. Baker-16, W-10630, Musante GW-17, R.3. Luster shimmers within the design elements of this briefly circulated Small Eagle Washington cent. A tiny tick or two can be seen on the cheek, but the chocolate-brown surfaces are minimally abraded overall. Listed on page 93 of the 2019 Guide Book. Census: 15 in 58, 23 finer (4/18). NGC ID# 2B73, PCGS# 705
- 3026** 1791 Washington Small Eagle Cent AU58 PCGS. Baker-16, W-10630, Musante GW-17, R.3. A richly detailed mahogany-brown near-Mint representative. Smooth except for an unobtrusive mark beneath the left (facing) wing. Struck in England in an attempt to secure a private coinage contract with the United States. Certified in a green label holder. Listed on page 93 of the 2019 Guide Book. NGC ID# 2B73, PCGS# 705

- 3027** 1820 North West Company Token — Environmental Damage — NGC Details. VF. Breen-1083, W-9250, R.4. Holed as issued. The motifs and legends are clear on this deep brown representative. The surfaces are evenly granular from long-term exposure to the elements, the usual condition for survivors. High-grade pieces are virtually unobtainable; the three finest at NGC are XF40, XF45, and MS61. Listed on page 90 of the 2019 Guide Book.

## HALF CENTS

**1793 Half Cent, VF30 Details  
C-3, B-3, First and Single-Year Type**

- 3028** 1793 C-3, B-3, R.3 — Scratched — ANACS. VF30 Details. Mahogany-brown surfaces are only minutely porous, and although a few light, thin marks are detected, only a diagonal pinscratch through HALF CENT is worthy of mention. Evenly struck with bold legends and suitably detailed motifs. Housed in a small-sized holder. Our EAC grade VG8.

*Ex: Denver Signature (Heritage, 8/2006), lot 101.*

**1794 C-9, B-9 Half Cent, VF30  
High Relief Head**

- 3029** 1794 High Relief Head, C-9, B-9, R.2, VF30 PCGS Secure. Manley Die State 2.0 or 3.0 — a holder tab prevents examination of the dentils to the left of the fraction, where a rim cud develops in Die State 3.0. This lightly circulated C-9 half cent displays mostly smooth walnut-brown surfaces, although some pits are present along the right-hand reverse border and some Mint-made planchet roughness is visible along the upper obverse. A singular mark appears behind Liberty's eye. Our EAC grade Fine 12. NGC ID# 2223, PCGS# 35063 Base PCGS# 35054

- 3030** 1802/0 Reverse of 1802, C-2, B-2, R.3, VG8 ANACS. The key issue to a date set of Draped Bust half cents, the 1802/0 is normally found with dark and corroded surfaces. The present example, showing typical weakness in the center of the reverse, exhibits olive and steel-brown surfaces with minor corrosion on each side. Our EAC grade AG3.

*From The Reilly Cody Collection.* NGC ID# 222D, PCGS# 35125 Base PCGS# 1057

- 3031** 1803 C-1, B-1, R.1, AU55 PCGS. CAC. Manley Die State 1.0. C-1 is easily attributed by the extension of the fraction bar to the right ribbon. A lovely olive-brown Draped Bust type coin. The E in CENT is lightly brought up, but the surfaces are smooth save for a small tick on Liberty's forehead. Our EAC grade VF35. NGC ID# 222E, PCGS# 35128 Base PCGS# 1060

**1804 C-13, B-10 Half Cent, MS63 Red and Brown  
Conditionally Elusive**

- 3032** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS63 Red and Brown PCGS Secure. The 1804 Plain 4, No Stems half cent ranks among the most plentiful of all Draped Bust half cent varieties when the entire range of grades is considered. However, the variety is conditionally elusive with few top-quality examples known. The finest known, based on EAC grading, is just MS64. Although exhibiting a few marks and trivial spots, this bluish-brown example has considerable original mint red and approaches the finest known ranking. Our EAC grade MS63. NGC ID# 222F, PCGS# 35177 Base PCGS# 1064

- 3033** 1806 Large 6, Stems, C-4, B-4, R.1, AU58 NGC. Technically Manley Die State 1.0, but clashed above the F in HALF and beneath Liberty's chin, and unlisted as such. A medium to deep brown representative that approaches Mint State. The strike is good except opposite Liberty's shoulder. Marks are confined to a line on the bust tip. Our EAC grade AU50.  
*From The Reilly Cody Collection.* NGC ID# 222J, PCGS# 35200 Base PCGS# 1099

- 3034** 1807 C-1, B-1, R.1, AU58 NGC. The only known dies for this date. The base of the 7 in the date is repunched. A nicely detailed half cent that has clear legends and rich mahogany-brown patina. The obverse has a tiny area of verdigris at 5 o'clock. Our EAC grade VF35.

*From The Reilly Cody Collection.* NGC ID# 222K, PCGS# 35203 Base PCGS# 1104

**1811 C-2, B-2 Half Cent, XF40  
Close Date**

- 3035** 1811 Close Date, C-2, B-2, Low R.3, XF40 PCGS. This intermediate die state, Manley State 2.0, has light clash marks behind the head and elsewhere. Chocolate-brown surfaces exhibit orange-tan patina on this smooth and pleasing half cent key. Both sides exhibit unidentified residue within various design elements, including the stars and letters. Our EAC Grade VF20. NGC ID# 222S, PCGS# 35242 Base PCGS# 1135

- 3036** 1828 12 Stars, C-2, B-3, R.2, MS63 Brown PCGS. An attractive chocolate-brown example, this piece has splashes of steel toning and traces of mint color hidden in the protected areas of the reverse. A few trivial marks are evident on both sides. Our EAC grade MS60. NGC ID# 222W, PCGS# 35264 Base PCGS# 1150

3037 1851 C-1, B-1, R.1, MS63 Red PCGS. Both sides exhibit extensive peach-red, though carbon is noted near the chin, denomination, and star 12. Lustrous and free from contact. The strike is generally good, though incomplete on lower obverse dentils and on the wreath opposite the high-relief shoulder tip. Our EAC grade MS63. PCGS# 35326 Base PCGS# 1226

3038 1855 C-1, B-1, R.1, MS64 Red PCGS. A lustrous Choice half cent type coin. The unabraded fire-red surfaces have mellowed only slightly over the past 163 years. Flecks are noted above the T in CENT and the O in OF. The centers are well-struck while the dentils are softly defined. Our EAC grade MS64. NGC ID# 26YZ, PCGS# 35335 Base PCGS# 1235

## LARGE CENTS

### 1793 AMERICA Chain Cent S-2, Good Details

3039 1793 Chain, AMERICA, S-2, B-2, High R.4 — Rim Damage — PCGS Genuine. Good Details. Each side has a few slight to moderate rim bumps, most apparent on the reverse at 3 o'clock and 5:30. The walnut-brown surfaces are minimally marked and lightly granular. ONE CENT and the fraction are clear. The date is worn smooth but much of LIBERTY and UNITED STATES OF AMERICA are readable. Our EAC grade Fair 2.

### 1793 Chain AMERICA Cent, AG3 Sheldon-4, Periods

3040 1793 Chain, AMERICA, Periods, S-4, B-5, R.3, AG3 PCGS Secure. The letters of LIBERTY are closely spaced and periods appear after the Y and the date. The surfaces are only faintly granular and show generally smooth walnut-brown color. Wear is even but extensive. On the obverse, the date is worn away and only a ghost of the portrait of Liberty remains, although LIBERTY is mostly readable, including the period. The reverse shows most of the border legend worn away, but the chain, denomination, and fraction are all clear. No rim bumps are apparent. Our EAC grade AG3. NGC ID# 223F, PCGS# 35444 Base PCGS# 91341

3041 1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4 — Excessive Corrosion — PCGS Genuine. Fine Details. All legends are bold on this better variety Wreath cent. Tan-brown high points contrast with granular gunmetal-gray fields. The reverse is misaligned toward 3 o'clock, as made. Nicely defined and free from any distracting abrasions. Our EAC grade AG3.

3042 1794 Head of 1794, S-65, B-51, R.1, VF25 PCGS. CAC. Breen Die State V. The "Shielded Hair" variety. The obverse die was misaligned toward 1:30, protecting Liberty's lower curls and the date at the expense of greater wear on LIBERTY. On the present cent, ONE CENT and the ICA in AMERICA are fully readable, though the fraction denominator and the ICA in AMERICA are faint. A thin mark is noted through the R in AMERICA. Housed in a green-label holder. Our EAC grade Fine 15.

Ex: Long Beach Signature (Heritage, 5/2008), lot 1777, which realized \$3,220. NGC ID# 223P, PCGS# 35654 Base PCGS# 901374

3043 1794 Head of 1795, S-72, B-65, R.2, VF20 PCGS. Breen Die State IV, clashed near the forehead and left wreath stem. A moderately granular steel-gray example without mentionable marks save for a small rim knock above the R in LIBERTY and a couple of dull vertical lines on the left obverse field. Our EAC grade VG10. NGC ID# 223R, PCGS# 35699 Base PCGS# 1365

3044 1795 Plain Edge, S-78, B-8, R.1 — Whizzed — NGC Details. XF. Breen Die State II. This Liberty Cap type coin is richly detailed. The glossy deep brown surfaces show few marks, though a thin line passes through the E in AMERICA, and an obverse rim flaw is noted near 3 o'clock. The N in UNITED is weakly brought up as it is opposite the cap. Our EAC grade VG10.

3045 1796 Liberty Cap, S-85, B-6, Low R.5, Fine 12 NGC. A better Liberty Cap variety identified by its right-leaning T in CENT. No marks are consequential across appealing tan-brown surfaces. The reverse die is misaligned toward 1 o'clock, with broad dentils and sharp detail throughout UNITED while ES OF is faint due to a lack of protective dentils. Our EAC grade VG8. NGC ID# 223V, PCGS# 35762 Base PCGS# 1392

3046 1797 Reverse of 1797, Stems, S-126, B-16, R.3, VF30 NGC. Breen Die State VI. The biplanar radial obverse die crack at 4 o'clock provides immediate attribution as Sheldon-126. This tan-brown example is nicely defined and displays no marks worthy of comment. The surfaces exhibit an occasional hint of granularity. Our EAC grade Fine 15. NGC ID# 2242, PCGS# 35918 Base PCGS# 1422

3047 1799 S-189, B-3, R.2, AG3 ANACS. Nearly all of the date is clear, though LIBERTY is absent. TES OF AMERIC is fairly strong though the rest of the reverse legends are faint. Both sides exhibit a couple of minor rim knocks, and a tick is noted on the hair near the ribbon, but the medium brown surfaces show only trivial granularity. The rarest large cent date. Our EAC grade Fair 2. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

3048 1799 S-189, B-3, R.2 — Corroded — ANACS. VG8 Details. An evenly granular tan-brown representative of the rarest large cent date. STATES OF is faint, but the remaining legends are clear, including the date. The sole reportable mark is a hair-thin line between the AM in AMERICA. Our EAC grade AG3.

3049 1802 S-232, B-12, R.1, AU55 NGC. Breen Die State VI with a large cud above the AT in STATES. The T in LIBERTY is cut over a Y. A deep mahogany-brown cent with smooth surfaces aside from narrow obverse border marks at 4 and 8 o'clock. Housed in a circa-2000 holder. Our EAC grade Our EAC grade VF35. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470

3050 1803 Small Date, Small Fraction, S-251, B-8, R.2, XF45 NGC. Breen Die State VI, "very rare." The repunched second S in STATES is characteristic of Sheldon-251, and the many advanced die cracks on the reverse confirm the elusive terminal die state. A lovely example with pleasing sharpness and uncommonly problem-free surfaces. Both sides are golden-brown and gunmetal-gray, though the reverse toning is moderately deeper. Our EAC grade VF30. NGC ID# 224G, PCGS# 36368 Base PCGS# 1482

**3051** 1804 S-266c, B-1, R.2 — Graffiti — PCGS Genuine. Fine Details. Struck from an advanced die stage (Breen Die State IV) with rim cuds above RTY of LIBERTY and MERIC of AMERICA. The date and legends are sharp with some porosity evident throughout the walnut-brown surfaces. Old, toned-over pinscratches in the right obverse field account for the lack of a numeric grade by PCGS. Our EAC grade Good 4.

**3052** 1806 S-270, B-1, R.1, XF40 PCGS Secure. Breen Die State III-IV. Sheldon-270 is the only die pairing of 1806 cents, and most survivors are in well-circulated grades. This XF example displays dappled tan-brown and gunmetal-gray toning. The well-defined surfaces show surprisingly few marks, though we note a field tick below the second S in STATES. Our EAC grade VF25. NGC ID# 224L, PCGS# 36436 Base PCGS# 1513

**1811 S-287 Cent, XF45  
Middle Die State**

**3053** 1811 S-287, B-1, R.2, XF45 NGC. Breen Die State III. An evenly struck piece with smooth walnut-brown surfaces and light wear. There are a few faint rim bumps on each side, most visible near the final S in STATES and the first A in AMERICA. All of Liberty's major hair curls are intact. A pleasing Classic Head type coin or date representative. Our EAC grade VF30. NGC ID# 224U, PCGS# 36496 Base PCGS# 1555

**3054** 1814 Plain 4, S-295, B-2, R.1, XF45 PCGS. The obverse is tinted gunmetal-gray while the reverse has a mahogany-brown center and lavender-brown periphery. A sharp Choice XF example. A few small scattered ticks are of little consequence. Certified in a green label holder. Our EAC grade XF40.  
Ex: FUN Signature (Heritage, 1/2014), lot 3359. NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576

**3055** 1820 Large Date, N-13, R.1, MS65 Brown PCGS. CAC. The usual die state with heavy die cracks throughout the obverse periphery. This splendid Matron Head type coin exhibits vibrant luster and only trivial indications of carbon or contact. The obverse is principally olive-brown, while the reverse shows equal measures of brick-red and sea-green. Our EAC grade MS62. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

**3056** 1820 Large Date, N-13, R.1, MS64 Red and Brown PCGS Secure. CAC. Mint Red outlines the stars, letters, and motifs of this sharply struck Matron Head type coin. The portrait high points and open fields are medium brown. Essentially devoid of abrasion, though close evaluation of the reverse shows a few small spots. Our EAC grade MS63. NGC ID# 2256, PCGS# 36674 Base PCGS# 1616

**1821 N-2 Cent, AU58  
Low-Mintage Semiky**

**3057** 1821 N-2, R.1, AU58 PCGS Secure. CAC. The obverse shows a die scratch between the date and star 1, and the second S in STATES is away from the wreath leaf. From a low mintage of 389,000 coins, none of which turned up in the Randall Hoard, the 1821 is a challenging semiky in high grades. This nearly Mint State representative maintains smooth reddish-brown surfaces with steel-blue accents over the devices. An incomplete strike rather than circulation is responsible for softness on the portrait, upper stars, and the left side of the denomination. Our EAC grade XF40. NGC ID# 2258, PCGS# 36709 Base PCGS# 1621

**1828 N-6 Cent, MS64 Brown  
Repunched Date**

**3058** 1828 Large Narrow Date, N-6, R.1, MS64 Brown PCGS. CAC. This sharply defined cent has distinctive olive-brown patina on its satiny surfaces and exhibits full cartwheel luster. An intermediate die state, this specimen has considerable obverse die rust with a heavy die crack from the 28 to stars 13 and 12. This piece is a twin to the Dan Holmes coin that was graded MS62 and tied for 10th finest known. Our EAC grade MS62. NGC ID# 225J, PCGS# 36889 Base PCGS# 1654

**1843 N-8 Cent, MS65+ Brown  
Early Die State**

**3059** 1843 Petite Head, Small Letters, N-8, R.2, MS65+ Brown PCGS. CAC. All of the lines and points described in the Grellman reference are clearly visible on this early die state cent. This satiny golden-brown Gem exhibits considerable original red mint color on the reverse. Trivial marks include a small nick by the lower lip that is the only mark of note on this Condition Census cent that is finer than the Dan Holmes coin that was called sixth finest known. Our EAC grade MS63. PCGS# 405852 Base PCGS# 1844

**3060** 1847 N-1, R.2, MS66 Brown NGC. Grellman Die State c. A distinctive die marriage with blatant repunching at the bases of all four date digits. The reverse border exhibits numerous die cracks. A lustrous and lovely chocolate-brown cent. The strike is generally sharp, and marks are absent except for a concealed line on Liberty's forehead curls. Our EAC grade MS60. PCGS# 37268 Base PCGS# 1877

**3061** 1850 N-7, R.2, MS66 Red and Brown NGC. The small die lump below the jaw is characteristic of Newcomb-7. Both sides display copious orange-red color, although steel-gray shades on the portrait and nearby field preclude a full Red designation. This lustrous high-grade Mature cent type coin exhibits well-struck centers, though the dentils are softly impressed. Unabraded, and carbon is limited to a few flecks beneath star 1. Our EAC grade MS63. NGC ID# 226G, PCGS# 405881 Base PCGS# 1890

**3062** 1851 N-2, R.1, MS65 Red and Brown PCGS. Grellman Die State b. The clashmark northwest of the O in ONE is the best identifier for Newcomb-2. The orange-gold reverse is full Red, though the portrait and obverse field have moderately mellowed toward Brown. Smooth save for ticks near stars 1 and 11. Liberty's neck has a granular appearance, as made and strictly due to the advanced die state. Our EAC grade MS64. NGC ID# 226H, PCGS# 406651 Base PCGS# 1893

**3063** 1852 N-3, R.1, MS66+ Brown NGC. CAC. Grellman Die State b. On its own, the reverse qualifies as Red and Brown, with orange-red prevalent throughout the legends. The obverse is mostly medium brown though mint red fills the date and outlines the stars. Marks are limited to incidental contact on Liberty's profile. The dies are rotated about 45 degrees counterclockwise, usual for N-3. Our EAC grade MS63. PCGS# 147235 Base PCGS# 1898

**3064** 1854 N-14, R.2, MS65 Red and Brown PCGS. Grellman Die State b. A vertical die line down from the ear lobe helps attribute the Newcomb marriage. The peach-gold reverse is close to full Red. The portrait is toned brown, but the obverse field shows substantial mint red. This unabraded Gem has a good strike, and carbon is limited to trivial reverse peripheral flecks. One tick noted on the obverse rim at 7 o'clock. Our EAC grade MS64. PCGS# 406101 Base PCGS# 1905

## FLYING EAGLE CENTS

**3065** 1857 MS64 PCGS Secure. Satiny surfaces offer tan-gold luster and show no obtrusive abrasions. As typically seen on the Flying Eagle type, this 1857 cent displays strike weakness on the tailfeathers and corresponding portion of the wreath, but the eye appeal is excellent for the grade. NGC ID# 226P, PCGS# 2016

**3066** 1857 MS64 NGC. Full strikes are elusive on Flying Eagle cents, but the present lustrous near-Gem shows every cotton leaf and tail feather in proper detail. The well-preserved wheat-gold surfaces display a couple of faint obverse chestnut streaks. The reverse has a matte appearance, as made. NGC ID# 226P, PCGS# 2016

**3067** 1857 MS64 PCGS. A satiny and nicely struck olive-gold Choice cent. Carbon and contact are minimal, and the planchet was well-prepared. The Flying Eagle design was coined for commerce for just two years, and nice Mint State examples are scarce. NGC ID# 226P, PCGS# 2016

**3068** 1857 MS64 PCGS. This orange-gold and apple-green near-Gem exhibits blazing luster and an intricate strike. A lens confirms minor marks are confined to the upper-obverse field. A strike-through affects the lower two-thirds of the 7 in the date, as issued. **From The Reilly Cody Collection.** NGC ID# 226P, PCGS# 2016

**3069** 1857 MS64 PCGS Secure. A sharply struck Choice near-Gem. Marks are essentially absent, and carbon is limited to a few flecks near the T in CENT. Toned medium olive-brown with glimpses of lighter straw-gold in the design recesses. NGC ID# 226P, PCGS# 2016

**3070** 1857 MS64 PCGS. A pleasing Choice Mint State Flying Eagle cent, this piece represents the first affordable Flying Eagle cent for most collectors, due to the rarity of the 1856. This piece has light tan surfaces and sharp design details with a few streaks of darker toning. NGC ID# 226P, PCGS# 2016

**3071** 1857 MS64 NGC. CAC. The open fields are steel-blue, while the initial orange-gold color remains in the recesses of the design. A mark-free near-Gem without obverse carbon. The tip of the tail and the upper right wreath show softness, but the remainder of the strike is sharp. NGC ID# 226P, PCGS# 2016

**3072** 1857 MS64 PCGS Secure. CAC. A satiny and practically unabraded chestnut-brown near-Gem. Ideal aside from a small spot on the wreath near 1:30. A good strike despite blending on the right-side cotton leaves. The Flying Eagle type was struck for commerce only two years. NGC ID# 226P, PCGS# 2016

### 1857 Flying Eagle Cent, MS65 Snow-9, Obverse Clashed With Seated Half

**3073** 1857 Obverse Die Clash With Seated Half, Snow-9, FS-402, MS65 PCGS Secure. This is a famous clashed die variety, showing the partial silhouette of a Seated half dollar obverse around the eagle. In *The Flying Eagle & Indian Cent Attribution Guide*, Rick Snow writes: "During the course of changing the dies from one denomination to another, the collar would have to be removed as well as the two dies. This would allow the press to actually cycle with two denomination dies." If the pressman misjudged the die spacing when seating a new die of a different denomination in the press, the result would be a clashing between two dies of different denominations, as seen on Snow-9.

This Gem example of the clashed Flying Eagle cent shows luminous tan-gold luster and well-preserved surfaces. The usual strike weakness occurs on the eagle's talons and tailfeathers, and on the reverse weakness is seen on both sides of the wreath, near the top of the branches. An appealing example of this important variety. NGC ID# 2276, PCGS# 37375 Base PCGS# 2016

**3074** 1858 Large Letters MS64 NGC. Low Leaves Reverse. Open E in ONE. A chestnut-gold example with an above-average strike on the tail and upper-right wreath. The eagle's head is slightly softly defined. The coruscating surfaces are die clashed but free from relevant marks or carbon.

Ex: Long Beach Signature (Heritage, 2/2005), lot 5180, which realized \$1,092.50. NGC ID# 2277, PCGS# 2019

**3075** 1858 Large Letters, Low Leaves, FS-901, MS64 PCGS Secure. CAC. Close E in ONE. Most Large Letters cents have a High Leaves reverse. This is a delightful near-Gem that boasts dynamic luster, a sharp strike, and only trivial indications of contact. A blush of russet patina accompanies portions of ONE CENT. **From The Bob Williams Collection.** PCGS# 569232 Base PCGS# 2019

**3076** 1858 Small Letters MS64 PCGS Secure. Hints of lilac, peach, and mint-green accent the coppery-orange surfaces of this satiny near-Gem type coin. No distracting abrasions are apparent and eye appeal is good. Both sides are well-struck, but trivial incompleteness is visible on the eagle's head when viewed with 10x magnification. The wreath bow is sharp. NGC ID# 2279, PCGS# 2020

**3077** 1858 Small Letters MS64 PCGS. Low Leaves, Open E in ONE. An intricate strike and unabraded, spot-free surfaces confirm the quality of this lustrous tan-brown near-Gem. A cluster of faint horizontal roller marks, as made, cross the upper obverse. Outstanding from a technical perspective. NGC ID# 2279, PCGS# 2020

**3078** 1858 Small Letters, High Leaves, FS-1901, MS64 PCGS. High Leaves Reverse. Closed E in ONE. A scarce subtype combination. The lustrous caramel-gold surfaces display moderate carbon and are virtually mark-free. A good strike despite blending on the wreath opposite the tail. Ex: Dallas Signature (Heritage, 12/2004), lot 5067; New York Signature (Heritage, 7/2004), lot 5115; Long Beach Signature (Heritage, 1/2004), lot 5071, which realized \$1,500. NGC ID# 2279, PCGS# 569235 Base PCGS# 2020

## INDIAN CENTS

**3079** 1859 MS65 PCGS. A sharply struck and lustrous chestnut-gold Gem. Carbon is confined to a solitary fleck near the M in AMERICA. A narrow, slender retained lamination crosses the C in CENT. A single-year, first-year design type, since the laurel wreath was replaced in 1860. Housed in a first-generation "rattler" holder. *From The Tuxedo Park Collection.* NGC ID# 227E, PCGS# 2052

**3080** 1860 MS65 PCGS. Rounded Bust. One small mark on Liberty's cheek is all that keeps this Gem 1860 Indian Head cent from an even finer grade. Strike weakness is only visible on the tips of the upper three headdress feathers, and both sides display lovely tan-gold satin luster. Some faint metal flowlines around the borders attest to worn dies. Housed in a first generation holder. *From The Tuxedo Park Collection.* NGC ID# 227F, PCGS# 2058

**3081** 1860 MS65 PCGS Secure. CAC. Round Bust. First year of the newly adopted Indian cent with the oak leaf reverse. The surfaces on this piece are remarkably preserved, retaining much of their "whiteness" seen when the coin was mint-fresh. The high nickel alloy caused copper-nickel cents to take on their distinctive light surfaces. Sharply struck throughout. NGC ID# 227F, PCGS# 2058

**3082** 1861 MS65 PCGS Secure. Outstanding from the technical perspective, this peach-gold Gem is well-struck and shows only trivial post-strike imperfections. A retained lamination (as coined) crosses the N in CENT, the E in ONE, and the upper-right portion of the wreath. NGC ID# 227G, PCGS# 2061

**3083** 1861 MS66 PCGS Secure. CAC. Normal coin-turn alignment. The 1861 Indian cent is considered the rarest date in the short-lived copper-nickel series that was issued from 1860 through 1864. This example has a bold strike and brilliant gold luster. CAC: 25 in 66, 3 finer (5/18). NGC ID# 227G, PCGS# 2061

**3084** 1861 MS66 PCGS Secure. CAC. With the reverse inverted, this Premium Gem exhibits medal-turn alignment, rather than the usual coin-turn alignment. A strike variant that will interest the advanced Indian cent specialist. This lovely cent has satiny tan surfaces and bold design motifs. CAC: 25 in 66, 3 finer (5/18). NGC ID# 227G, PCGS# 2061

**1863 Indian Cent, MS66+**  
**None Finer at PCGS**

**3085** 1863 MS66+ PCGS Secure. This Plus-graded Premium Gem representative is among the finest-certified survivors at PCGS. The well-detailed design elements exhibit a touch of the often-seen softness on the feather tips and the impeccably preserved surfaces show attractive copper-red patina, with a few subtle hints of crimson. Population: 76 in 66 (20 in 66+), 0 finer (4/18). NGC ID# 229D, PCGS# 2067

## 1863 Cent, Sharp MS66 A High-End Copper-Nickel Type Coin

**3086** 1863 MS66 PCGS Secure. CAC. The 1863 is the most plentiful copper-nickel Indian cent, although the issue is most often seen in MS65 or lower grades. Premium Gems are scarce and none are finer at PCGS. This CAC-approved coin displays razor-sharp detail and satiny tan-gold luster. There are no abrasions of note. The die state appears early in terms of peripheral erosion, but two reverse die cracks are noted — one connecting the left wreath branch to the rim left of the shield, and the other connecting the wreath to the rim about 4 o'clock. Population: 76 in 66 (20 in 66+), 0 finer. CAC: 32 in 66, 0 finer (5/18). NGC ID# 229D, PCGS# 2067

**3087** 1864 L On Ribbon MS65 Brown PCGS Secure. CAC. Vibrant original luster complements a bold strike and carbon-free surfaces on this Gem Brown L On Ribbon cent. Both dies show extensive erosion, although surface abrasions are almost entirely absent. Tinges of golden luster emerge from beneath the burgundy-brown toning. NGC ID# 227M, PCGS# 2079

**3088** 1866 MS66 Brown PCGS. Steel-blue, burgundy, and copper-orange hues adorn this satiny Premium Gem Brown Indian cent. The strike is razor-sharp, and neither side exhibits a single notable distraction. Rarely offered this fine. Population: 2 in 66 Brown, 0 finer; 6 in 66 Red and Brown, 0 finer; 8 in 66 Red, 0 finer (5/18). NGC ID# 227P, PCGS# 2085

**3089** 1866 MS65 Red and Brown NGC. This Gem Red and Brown example is sharp throughout, struck from lightly clashed dies. The obverse shows small rust lumps on Liberty's portrait, but the fields are satiny. Orange-brown toning appears on each side, forming a woodgrain pattern on the obverse. Golden luster shines through. No distracting abrasions are present. NGC ID# 227P, PCGS# 2086

**3090** 1869 MS65 Brown PCGS Secure. CAC. A sharp example with satiny mint luster and original chestnut-brown toning. Hints of copper-orange luster shine through in the fields, heightening the eye appeal of this Brown Gem. A cartwheel effect is easily produced on both sides, and no bothersome carbon spotting is seen. NGC ID# 227T, PCGS# 2094

- 3091** 1869 MS65 Red and Brown NGC. Peach-gold is prevalent across the reverse border, though apple-green and lilac-red shades visit the centers. A well-struck and essentially unabraded better-date Gem. One small spot is noted near the left foot of the first A in AMERICA.  
Ex: FUN Signature (Heritage, 1/2004), lot 4257, which realized \$863.65. NGC ID# 227T, PCGS# 2095
- 3092** 1870 Doubled Die Obverse, Snow-33, FS-101, MS64 Red and Brown PCGS Secure. CAC. The TY in LIBERTY are widely die doubled. The obverse was paired with several reverses to create six different Snow varieties. S-33 is identified by a die chip on the N in CENT, along with specific die doubling on the central letters in ONE CENT. No variety is indicated on the PCGS insert. This lustrous Choice cent has a good strike and appears mark-free. The butter-gold and olive-green surfaces show minimal carbon.  
*From The Bob Williams Collection.* PCGS# 37481 Base PCGS# 2098
- 3093** 1871 MS64 Red and Brown PCGS Secure. The intricate details of this near-Gem are sharply struck, and satiny luster shows only the faintest traces of chestnut-brown tinting that earn this coin a Red and Brown designation. Some light flecks appear along the right obverse border. NGC ID# 227V, PCGS# 2101
- 3094** 1871 MS64 Red and Brown PCGS Secure. CAC. Bold N in ONE. Primarily orange-gold, with a blush of jade-green on the cheek. Much closer to Red than Brown. Unabraded, though a small strike-through is within the M in AMERICA. Exemplary for the grade despite one small spot below the bust tip. The 1871 ranks among the rarest dates of the series.  
*From The Bob Williams Collection.* NGC ID# 227V, PCGS# 2101
- 3095** 1871 MS65 Red and Brown PCGS. Bold N in ONE. The low-mintage 1871 is a semikey within the Indian cent series. This sharply struck Gem has matte surfaces due to late-in-life dies. Both sides display orange-gold, though the reverse is partly olive-green, and the obverse exhibits gunmetal shades. One small spot is present near the first S in STATES. Bold die cracks through AMERICA and the left side of the wreath may be of interest to the specialist.  
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5207, which realized \$1,552.50. NGC ID# 227V, PCGS# 2101
- 3096** 1872 MS63 Red and Brown PCGS Secure. A sharp, frosty example with significant copper-orange luster and no major distractions. Dappled chestnut-brown toning on each side just barely keeps this piece from a full Red designation. The 1872 is a popular issue with original luster. NGC ID# 227W, PCGS# 2104
- 3097** 1872 MS64 Red and Brown PCGS. Bold N in ONE. Mint red lingers in the protected regions, though the high points and open fields are olive-brown. A well-struck near-Gem of this scarce low-mintage issue. Smooth aside from a single hair-thin line on the lower reverse. NGC ID# 227W, PCGS# 2104
- 3098** 1873 Open 3 MS65 Red and Brown PCGS Secure. CAC. This attractive Gem Indian cent was struck after the changeover to the Open 3 design. The design elements are sharply rendered and the well-preserved surfaces show a mix of original red and light brown patina. Vibrant mint luster adds to the outstanding eye appeal. Population: 82 in 65 Red and Brown, 7 finer. CAC: 19 in 65, 3 finer (5/18). NGC ID# 227Y, PCGS# 2107
- 3099** 1873 Open 3 MS64 Red PCGS Secure. The Open 3 variety is slightly more plentiful overall than the Closed 3 Indian cent of 1873. This near-Gem Red Open 3 coin displays sharp motifs and frosty copper-orange luster. A couple of small specks are hidden within the wreath. Population: 57 in 64 (2 in 64+) Red, 30 finer (5/18).  
*From The Bob Williams Collection.* NGC ID# 227Y, PCGS# 2108
- 3100** 1873 Closed 3 MS64 Red and Brown PCGS Secure. CAC. Olive-brown and burgundy toning covers much of each side in a woodgrain pattern, although glimpses of copper-orange and red shine through. This Choice Closed 3 1873 Indian cent displays a sharp strike and well-preserved surfaces with minimal carbon. NGC ID# 227X, PCGS# 2110

- 3101** 1877 Indian Cent, Sharp AU55  

- 3102** 1877 AU55 PCGS Secure. CAC. The demand for new minor coinage was limited in 1877. Only 852,000 Indian Head cents were struck, making this the unchallenged regular-issue date in the series. Only the 1888/7 is rarer. The strike is bold on this Choice AU example. Friction is minimal for the grade, in part contributing to the CAC approval sticker. The obverse shows deep brown color, while the reverse exhibits a slightly lighter woodgrain pattern. Bluish overtones are common to both sides. Minor ticks appear near the denomination.  
*From The Bob Williams Collection.* NGC ID# 2284, PCGS# 2127
- 3103** 1877 — Rim Damage — PCGS Secure Genuine. Unc Details. The noted flaw is minor in nature, confined to an uneven area on the rim at 6:30 on the reverse. Each side showcases light golden-brown coloration and a subtle woodgrain pattern. The feathertips and shield are bold and the diamonds clear. Liberty's cheek has a couple of noticeable marks, but the surfaces are smooth overall. The average awarded grade for the 1877 cent is VF20.  
*From The Bob Williams Collection.*
- 3104** 1882 MS65+ Red PCGS Secure. The 1882 Indian Head cent becomes conditionally rare at the Premium Gem level with Red surfaces despite a substantial mintage of 38.5 million coins, making this Plus-graded Gem a good balance of quality and value. The design elements are well-detailed and the lustrous red surfaces are virtually flawless. Population: 81 in 65 (3 in 65+) Red, 29 finer (4/18). NGC ID# 2289, PCGS# 2144
- 3105** 1887 MS65 Red PCGS. A nicely struck brick-red Gem with a mark-free appearance and minor mellowing on Liberty's cheek and in the obverse field. Lustrous surfaces reveal a few tiny flecks, especially on the lower-left obverse. Housed in an old green label holder. Population: 62 in 65 Red, 28 finer (5/18).  
Ex: FUN Signature (Heritage, 1/2005), lot 5100, which realized \$747.50. NGC ID# 228F, PCGS# 2159

- 3106 1889 MS65 Red PCGS Secure.** Scarce in this grade, the 1889 Indian cent is decidedly rare any finer. The present coin is well-preserved with rich copper-orange and reddish hues. The upper headdress feathers show minor strike softness as normal. Population: 53 in 65 (2 in 65+) Red, 13 finer (5/18). NGC ID# 2732, PCGS# 2174

1892 Cent, MS66 Red  
Beautifully Preserved

- 3107 1892 MS66 Red PCGS Secure.** In most grades, the 1892 Indian Head cent poses little trouble for collectors, but it is rare in MS66 Red condition despite its mintage in excess of 37.6 million coins. This is a strongly impressed Premium Gem with vibrant copper-orange color and accents of rose, mint-green, and lavender. Beautifully preserved with extraordinary eye appeal. Population: 19 in 66 (1 in 66+) Red, 1 finer (5/18). NGC ID# 228L, PCGS# 2183

- 3108 1899 MS66 Red PCGS Secure.** A vibrantly lustrous Premium Gem, showing bright copper-orange luster with a few pale gold and lilac hues. The coin is well-struck and unabraded. Under a loupe, only a few microscopic pepper specks are visible. PCGS lists 28 finer Red 1899 Indian cents (5/18). NGC ID# 228U, PCGS# 2204

- 3109 1899 MS66 Red PCGS Secure. CAC.** Snow-2a. Rick Snow writes “the repunching [within the 8 and second 9] is quite wide and dramatic.” Nonetheless, this repunched date variety is presently unlisted in *Cherrypickers’*. The Snow Census (2014) is topped by a 65 Red, which suggests the present piece is finest known for its die variety. A lustrous butter-gold Premium Gem with minor carbon and minute rose-red freckles along the obverse border. For all 1899 cents, CAC: 25 in 66, 10 finer (5/18). NGC ID# 228U, PCGS# 2204

- 3110 1906 MS66 Red PCGS Secure.** Frosty, original copper-orange luster is seemingly flawless on this Premium Gem Red 1906 Indian cent, save for a few microscopic pepper specks that are visible with a loupe. Both sides have light clash marks, and the reverse displays a network of heavy die cracks in the wreath, with some connecting to the rim. Population: 39 in 66 (2 in 66+) Red, 3 finer (4/18). NGC ID# 2293, PCGS# 2225

- 3111 1906 MS66 Red PCGS Secure.** This is a delightful Premium Gem Indian cent with well-detailed design elements and attractive original red surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is terrific. Population: 39 in 66 (2 in 66+) Red, 3 finer (4/18). NGC ID# 2293, PCGS# 2225

- 3112 1908-S MS65 Brown PCGS Secure. CAC.** Although the 1908-S is plentiful in Gem condition, most such coins are in the Red and Brown or Red color categories. This CAC-approved Gem is among the finest Brown coins at PCGS (4/18). Collectors who appreciate old-time toning on high-grade bronze pieces will enjoy the luminous burgundy-brown, olive, and amber-gold surfaces of this coin, which is also sharply struck and devoid of abrasions or spots. NGC ID# 2296, PCGS# 2232

- 3113 1908-S MS65 Red PCGS Secure.** An attractive Gem representative from late in the Indian cent series, this coin offers well-detailed design elements that show some softness on the feathertips and ribbon, as always. The well-preserved original red surfaces radiate vibrant mint luster. NGC ID# 2296, PCGS# 2234

- 3114 1909-S MS63 Red and Brown NGC CAC.** A nicely struck and coruscating example of the 1909-S Indian cent, the lowest mintage date of the series. The woodgrain surfaces display blended apricot-gold and chestnut-brown shades. Devoid of visible detractions, and ideal for the discerning specialist. NGC ID# 2298, PCGS# 2239

- 3115 1909-S MS64 Red and Brown PCGS.** Lovely chestnut-brown toning allows modest copper-orange luster to emerge from the protected areas on this near-Gem 1909-S Indian cent. The top three headdress feathers are a trifle weak as usual, but the coin is otherwise well-struck. A few tiny marks on the Liberty's portrait and some minor reverse flecks limit the grade. Ex: FUN Signature (Heritage, 1/2005), lot 5162, which realized \$1,035. NGC ID# 2298, PCGS# 2239

- 3116 1909-S MS64 Red PCGS Secure.** This Choice 1909-S Indian cent may have received a finer grade were it not for a lone tick on Liberty's cheek, which is unnoticed by the naked eye. The coin is satiny and bright copper-gold in color with a few wisps of deeper patina. The strike is typical for the issue, being a trifle weak on the top three headdress feathers. NGC ID# 2298, PCGS# 2240

1909-S Indian Cent, MS65 Red  
Luminous Original Surfaces

- 3117 1909-S MS65 Red PCGS.** This final-year key date is elusive finer than MS65 Red. The present Gem displays shimmering copper-orange luster and unabraded surfaces. The upper headdress feathers have the strike softness often associated with this San Francisco issue, but eye appeal is nonetheless pleasing. NGC ID# 2298, PCGS# 2240

## PROOF INDIAN CENTS

- 3118 1859 PR64 PCGS Secure.** Only 800 proof Indian cents were struck in 1859, the first year of the design and the only date with the laurel wreath on the reverse. This sharply detailed Choice example is lightly marked, with slightly reflective fields. NGC ID# 2299, PCGS# 2247

1859 Cent, Gem Proof  
Scarce One-Year Subtype

- 3119 1859 PR65 PCGS.** Business strikes of the single-year Laurel Wreath reverse are plentiful, even in Mint State. But proofs are undeniably scarce, since only 800 specimens were struck, and about half that number have survived. This is a sharply struck Gem with glassy and unabraded apricot-gold fields. We note only a pair of reverse flecks, at 9 and 12 o'clock. NGC ID# 2299, PCGS# 2247

**3120** 1862 PR65 PCGS Secure. A sharp Gem proof with glimmering fields and frosty devices. Tan-gold color shows little contrast but is yet appealing. A few small flecks appear around the date, seen only with a loupe. The proof 1862 Indian cent is seldom offered finer. NGC ID# 229C, PCGS# 2259

**3121** 1862 PR65 PCGS Secure. CAC. A sharply detailed Gem proof, from a mintage of 550 pieces, this coin exhibits well-preserved copper-red surfaces, with a few hints of crimson and hazily reflective fields. Population: 87 in 65, 29 finer. CAC: 15 in 65, 13 finer (5/18). NGC ID# 229C, PCGS# 2259

**3122** 1864 Copper Nickel PR64 Cameo NGC. This near-Gem Cameo proof is razor-sharp and deeply mirrored. Tan-gold coloration covers much of each side, but tinges of lilac and mint-green appear in the fields when tilted beneath a light. A few small specks appear under a loupe but are not distracting. Census: 9 in 64 Cameo, 20 finer; 1 in 64 Ultra Cameo, 4 finer (4/18). NGC ID# 229E, PCGS# 82265

**3123** 1864 Copper Nickel PR64 Cameo NGC. CAC. Attractive tan-gold surfaces reveal bold field-motif contrast throughout this Choice Cameo proof. A few light lines limit the grade, but the eye appeal remains simply outstanding, as affirmed by the CAC approval sticker. Under a loupe, some Mint-made planchet roughness is visible in the left obverse field near Liberty's neck. Census: 9 in 64 Cameo, 20 finer; 1 in 64 Ultra Cameo, 4 finer. CAC: 7 in 64, 10 finer (4/18).

Ex: Long Beach Signature (Heritage, 2/2016), lot 3565, which realized \$1,292.50.

From The Reilly Cody Collection. NGC ID# 229E, PCGS# 82265

**3124** 1867 PR64 Red NGC. High-end Red proofs of this date are scarce. This near-Gem is sharp and deeply reflective. A dusting of amber hues and a few minor flecks appear on both sides of otherwise copper-red surfaces. Census: 11 in 64 Red, 17 finer; 1 in 64 Red Cameo, 5 finer (5/18). NGC ID# 229K, PCGS# 2290

**3125** 1872 PR65 Red and Brown PCGS. An important entry in the small cent series, this Red and Brown Gem proof exhibits strong design elements with bright, pale orange mint color. Small splashes of dark toning are evident on each side. NGC ID# 229R, PCGS# 2304

#### 1872 Cent, PR65 Red and Brown Exceptional Quality, Colorful Accents

**3126** 1872 PR65 Red and Brown NGC. CAC. Bold N in ONE. An estimated 950+ proof cents were struck in 1872. Known examples tend to be well made, even for a proof issue, with full strikes and glassy fields. This Gem Red and Brown specimen is such a coin. Pale golden-brown surfaces reveal gorgeous blue, cherry-red, and lemon-yellow accents when turned under a lamp. This provides top-quality visual appeal and undoubtedly explains the CAC approval sticker.

From The Reilly Cody Collection. NGC ID# 229R, PCGS# 2304

#### 1872 Indian Head Cent, PR65 Red Seldom Offered This Fine

**3127** 1872 PR65 Red PCGS Secure. The proof 1872 Indian cent is scarce in full Red condition, and Gems are rare. This piece is razor-sharp and has a hint of cameo contrast on each side. A lone speck appears above the 7 in the date. The depth of mirroring in the fields is especially pleasing. Population: 13 in 65 Red, 6 finer; 1 in 65 Red Cameo, 1 finer (5/18). NGC ID# 229R, PCGS# 2305

#### 1875 Cent, PR65 Red Modest Obverse Contrast

**3128** 1875 PR65 Red PCGS Secure. A fully Red proof Indian cent but one that showcases an array of "red" hues. Chiefly, the margins have vivid tangerine-orange color and the interiors display brighter golden color. Both sides are needle-sharp, and the obverse has the bonus of appreciable cameo contrast. No significant carbon spots are seen, but some thin threadlike strike-throughs are apparent below Liberty's ear. Population: 16 in 65 Red, 2 finer; 4 in 65 Red Cameo, 1 finer (5/18). NGC ID# 229U, PCGS# 2314

#### 1877 Indian Head Cent, PR64 Brown Glossy With Vibrant Toning

**3129** 1877 PR64 Brown NGC. This glossy proof is wonderfully toned in electric-blue, rose-violet, and golden-orange hues with deep brown color overall. Every design feature presents needle-sharp definition, as expected. The Mint manufactured a famously low number of circulation strikes in 1877. It also produced 900 proofs for collectors. NGC ID# 229W, PCGS# 2318

**1877 Cent, PR64 Red and Brown  
Clean and Glossy**

**3130 1877 PR64 Red and Brown PCGS.** No other issue in the series holds a candle to the 1877 Indian Head cent. High-grade circulation strikes are often out of reach, so collectors frequently opt for an attractive proof instead. This is a perfect example for such purposes. The obverse exhibits golden-brown color with speckled red hues. The patina is slightly deeper on the other side. Clean and glossy. Housed in an old green label holder. NGC ID# 229W, PCGS# 2319

**1877 Indian Cent, PR62 Red  
Glimmering Fields**

**3131 1877 PR62 Red PCGS Secure.** The bold N in ONE confirms this piece as a proof, and the fields glimmer when tilted beneath a light. The strike is sharp and both sides display rich copper-orange color. Modest contrast is apparent on the obverse. Under a loupe, several field lines and a few carbon spots account for the grade. One prominent spot is on the C in CENT and another is on the final 7 in the date. NGC ID# 229W, PCGS# 2320

**1877 Cent, PR64 Red  
Reverse Cameo Contrast**

**3132 1877 PR64 Red PCGS.** This razor-sharp near-Gem proof displays mirrored fields with subtle cameo contrast on the reverse. The obverse has some milky patination that prevents a Cameo designation, although both sides of the coin are almost entirely copper-orange in color. A few carbon flecks are visible beneath a lens. NGC ID# 229W, PCGS# 2320

**3133 1880 PR66 Red and Brown PCGS Secure.** An impressive Premium Gem proof, this Red and Brown example is essentially full red with slight mellowing at the peripheries. Population: 45 in 66 (8 in 66+) Red and Brown, 8 finer (5/18). NGC ID# 229Z, PCGS# 2328

**3134 1883 PR67 Brown NGC.** Glimmering fields and satiny design elements complement rich burgundy, plum, golden-red, and electric-blue toning on this Superb Gem Brown proof. The preservation appears flawless. Census: 19 in 67 (1 in 67+ Brown, 1 in 67★), 0 finer (5/18). NGC ID# 842U, PCGS# 2336

**1886 Type One Cent, PR67 Red and Brown  
Few Proofs Known This Fine**

**3135 1886 Type One PR67 Red and Brown PCGS Secure. CAC.** The lowest headdress feather points between the I and C in AMERICA on the Type One hub type. This Superb Gem proof displays sharp motifs and glimmering fields. Both sides have balanced copper-orange, violet, and olive coloration that earns this problem-free coin a Red and Brown designation. Eye appeal is outstanding. Population: 4 in 67 Red and Brown, 0 finer. CAC: 5 in 67, 0 finer (4/18). NGC ID# 22A7, PCGS# 2346

**1887 Cent, PR67 Brown  
Among the Finest Brown Proofs**

**3136 1887 PR67 Brown PCGS.** This is a sharp proof with beautifully preserved surfaces and glimmering fields. Designated Brown by PCGS, this Superb Gem more accurately displays a blend of plum and blue toning and has no surface distractions. Subtle cameo contrast is apparent even through the patina. Population: 8 in 67 Brown, 0 finer; 2 in 67 Red and Brown, 0 finer (5/18). NGC ID# 22A9, PCGS# 2348

**3137 1892 PR66 Red PCGS Secure.** A sharp fiery-orange proof with original color and deeply mirrored fields. Subtle cameo contrast on each side is not quite pronounced enough for a Cameo designation from PCGS, although the effect can be produced fairly well at certain angles. A few tiny pepper specks are only visible with a loupe. NGC ID# 22AE, PCGS# 2365

**3138 1896 PR65 Red PCGS. Snow-PR1,** with a “small diagonal die line in the upper loop of the 6.” A fully struck and lustrous specimen without any evidence of contact. The fields are predominantly peach-gold with hints of ruby-red near the rims. The portrait high points display mauve shades. NGC ID# 22AJ, PCGS# 2377

**3139 1897 PR66 Red and Brown NGC. CAC.** An orange-red Premium Gem with color that approaches a full Red designation. The strike is intricate, and a lens reveals only trivial imperfections. Certified in a circa-2000 holder. CAC: 4 in 66 Red and Brown, 1 finer as Red and Brown (4/18).

*Ex: FUN Signature (Heritage, 1/2002), lot 5642, which realized \$402.50.*

*From The Reilly Cody Collection.* NGC ID# 22AK, PCGS# 2379

- 3140** 1903 PR66 Red and Brown NGC. Sun-orange color appears over much of this Premium Gem proof, although tinges of violet and steel-blue on the obverse earn it a Red and Brown color designation despite being mostly Red. The strike is sharp and the fields are deeply reflective. Elusive in finer condition.  
Ex: Long Beach Bullet Sale (Heritage, 5/2003), lot 149, which realized \$1,092.50.  
**From The Reilly Cody Collection.** NGC ID# 22AS, PCGS# 2397

- 3141** 1903 PR66 Red and Brown PCGS. CAC. Some wisps of cherry red across each side of this Premium Gem appear to earn it a Red and Brown designation, as the remainder of the mirrored fields and satiny devices are uniformly copper-orange. This is a sharp Premium Gem proof with only a few minute flecks on each side.  
NGC ID# 22AS, PCGS# 2397

## LINCOLN CENTS

- 3142** 1909 VDB MS67 Red PCGS Secure. CAC. This fiery-orange, luminous Superb Gem displays a full strike and matte-like luster, although the surfaces are significantly more vibrant than a true proof would show. No carbon spotting is seen. This is among the finest Red coins endorsed by CAC, and PCGS lists only a single higher-grade example (5/18). NGC ID# 22AZ, PCGS# 2425

- 3143** 1909 VDB MS67 Red PCGS Secure. CAC. An extraordinary Superb Gem, exceeded in numerical grade by a solitary PCGS example (5/18). This piece has frosty mint luster with brilliant orange surfaces and bold design definition. NGC ID# 22AZ, PCGS# 2425

### 1909 VDB Cent, MS67+ Red Bright, Matte-Like Surfaces

- 3144** 1909 VDB MS67+ Red PCGS Secure. CAC. Years ago, 1909 VDB rolls were widely available and it took time to move them out of dealer's inventory. However, it would have required searching through many of those rolls to locate such a coin as this one. The surfaces are bright, even red with absolutely no mellowing. The strike is strong throughout and there are no distracting abrasions or spots of carbon. Each side has a granular, matte-like texture with satiny mint frost. NGC ID# 22AZ, PCGS# 2425

- 3145** 1909 VDB Doubled Die Obverse, FS-1101, MS65 Red PCGS. The first three date digits are nicely doubled, as is the RTY in LIBERTY. A sharply struck and lustrous first-year orange-red Gem. Occasional pinpoint flecks preclude perfection. Population: 69 in 65 (3 in 65+) Red, 28 finer (4/18). NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425

- 3146** 1909-S VDB MS64 Brown PCGS. Glimpses of the initial orange-red color accompany protected regions, though most of this key-date cent exhibits blended sea-green and walnut-brown toning. Unabraded and virtually carbon-free. Encapsulated in an old green label holder. NGC ID# BYKW, PCGS# 2426

- 3147** 1909-S VDB MS64 Brown PCGS. CAC. This first-year key-date Lincoln cent is razor-sharp, struck from fresh dies that still show fine texturing in the fields. Were the rims squared, this San Francisco coin would be visually akin to a Philadelphia proof. Luminous chestnut-brown surfaces reveal small hints of copper-orange luster and are free of distracting abrasions. A couple of tiny pepper specks can be located with a loupe but do not distract from the eye appeal. NGC ID# BYKW, PCGS# 2426

### 1909-S VDB Cent, MS65+ Brown Luminous, High-End Surfaces

- 3148** 1909-S VDB MS65+ Brown PCGS. CAC. Traces of mint red linger inside the rims of this satiny, rich-brown example. The glossy surfaces are razor-sharp throughout both sides, most notably on Lincoln's portrait from hairline to shoulder, and the fully struck VDB initials underscore the sharp reverse motifs. CAC endorsed, this high-end Gem S-VDB has only a few wispy, microscopic marks that cannot restrain the exceptional eye appeal. Population: 3 in 65+ Brown, 13 finer. CAC: 35 in 65, 4 finer (5/18). NGC ID# BYKW, PCGS# 2426

- 3149** 1909-S VDB MS64 Red and Brown PCGS Secure. Vivid tangerine-orange borders transition to more traditional golden interiors on this near-Gem coin, although one would be hard-pressed to find any truly discernible brown toning that earns this coin a Red and Brown designation. The strike is sharp and the luster is satiny. A carbon spot on Lincoln's shoulder is the only distraction. NGC ID# 22B2, PCGS# 2427

- 3150** 1909-S VDB MS64 Red and Brown PCGS Secure. Satiny luster on this near-Gem Red and Brown coin displays a mildly matelike texture and no major abrasions. The strike is sharp throughout. Copper-orange luster displays intermingled overtones of lilac, forest-green, and amber, earning the Red and Brown designation.  
**From The Bob Williams Collection.** NGC ID# 22B2, PCGS# 2427

- 3151** 1909-S VDB MS64 Red and Brown PCGS. CAC. This is arguably the most popular and best known of all 20th century coinage issues with demand from collectors and non-collectors alike. Bluish-brown patina accompanies rich deep orange mint luster and bold design motifs. NGC ID# 22B2, PCGS# 2427

- 3152** 1909-S VDB MS65 Red and Brown NGC. The 1909-S VDB is enormously popular, due to its low mintage, first-year status and the story behind the removal of the VDB initials. It is, perhaps, the best-known collector coin in the 20th century. This specimen is worthy of any high-grade collection, being well struck, devoid of significant contact marks, and displaying lovely coppery-gold color that is just beginning to tone to a light tan. The obverse is occupied by numerous toning freckles. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red and Brown  
Sharply Struck and Attractive**

**3153 1909-S VDB MS65 Red and Brown PCGS.** CAC. Subtle intermingled shades of wheat-gold, green, red, and plum along with brightly lustrous surfaces provide this Gem with wonderful eye appeal. The piece is well-struck, including the designer's initials, adding to the attractiveness. Only 69 examples have been awarded higher numeric grades by PCGS (4/18).  
*Ex: New York Signature (Heritage, 11/2013), lot 3082, where it realized \$2,467.50. NGC ID# 22B2, PCGS# 2427*

**3154 1909-S VDB MS64 Red PCGS.** Glints of green and yellow at the margins frame cherry-red and flame-orange hues on the obverse, while the reverse displays pale-orange shades with faint yellow highlights. Marks are few and minor throughout this near-Gem example. A few microscopic carbon spots and traces of an old fingerprint are discernible on the reverse but do not interfere with the gleaming mint luster and Choice eye appeal. The all-important V.D.B. initials are razor-sharp. NGC ID# 22B2, PCGS# 2428

**3155 1909-S MS65 Red PCGS Secure.** This is a well-struck Gem 1909-S Lincoln cent without Victor D. Brenner's initials on the lower reverse. Examples of this issue are elusive in finer grades. The surfaces are remarkably luminous, frosty, and rich in copper-red color — straying from the yellow-gold hue of many other first-year Lincoln cents. A few scattered flecks are an amber hue and blend into the surfaces. NGC ID# 22B4, PCGS# 2434

**3156 1909-S MS65 Red PCGS Secure. CAC.** This CAC-approved Gem 1909-S Lincoln cent has the traditional yellow-gold luster and frosty, unabraded surfaces. The design elements are well-struck. This issue is available in MS65 Red but elusive finer. CAC-approved pieces are even scarcer. CAC: 59 in 65, 44 finer (4/18). NGC ID# 22B4, PCGS# 2434

**3157 1909-S/S S Over Horizontal S, FS-1502, MS66 Red PCGS Secure.** The S Over Horizontal S is the best-known variety of the low-mintage 1909-S. Vibrant cartwheel sheen sweeps the smooth butter-gold surfaces of this well-struck, first-year, branch-mint cent. Imperfections are limited to minor carbon near TRUST. NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

**3158 1910-S MS66 Red PCGS.** The virtually flawless original red surfaces of this delightful Premium Gem show a few microscopic specks of carbon on the reverse, with sharply detailed design elements and vibrant mint luster throughout. PCGS has graded six numerically finer Red examples (5/18). NGC ID# 22B6, PCGS# 2440

**3159 1912-D MS65 Red PCGS Secure.** This is a boldly struck Gem Red coin with original copper-red surfaces and exceptional preservation. No carbon spotting is immediately obvious. Both sides show extensive die erosion, blurring the definition of minor details, especially around the periphery. The die state also gives this coin a ghostly glow that is rarely seen on early Lincoln cents. PCGS lists 31 finer Red coins (4/18). NGC ID# 22BB, PCGS# 2455

**3160 1912-D MS65 Red PCGS.** A lovely orange-gold Gem that boasts a sharp strike and lustrous mark-free surfaces. An outstanding example of this early and lower-mintage branch issue. Certified in a green label holder. NGC ID# 22BB, PCGS# 2455

**1912-D Lincoln Cent, MS66 Red  
Sharply Detailed and Well-Preserved**

**3161 1912-D MS66 Red PCGS.** This early series Lincoln cent displays razor-sharp definition on all design elements, and the lustrous original surfaces show mellow red patina without mentionable distractions. Overall eye appeal is outstanding. This coin should find a home in the finest collection or Registry Set. Population: 31 in 66 (3 in 66+) Red, 0 finer (4/18). NGC ID# 22BB, PCGS# 2455

**1912-D Cent, MS66 Red  
Registry-Grade, Top-End Example**

**3162 1912-D MS66 Red PCGS Secure.** The 1912-D Lincoln cent has a low survivorship in high grades with original red luster. This Premium Gem Red coin displays a sharp strike and satiny copper-orange surfaces with only a few faint pepper specks. Examples are rare in this grade and unknown finer with the Red designation. Population: 31 in 66 (3 in 66+) Red, 0 finer (4/18). NGC ID# 22BB, PCGS# 2455

**1912-S Cent, MS65+ Red  
Rare CAC-Endorsed Gem**

**3163 1912-S MS65+ Red PCGS Secure. CAC.** Red examples of this early San Francisco cent are scarce in MS65 and rare finer. This CAC-approved Gem is one of only a dozen such pieces in this and higher grades. Satiny copper-orange luster illuminates well-struck devices and unmarked surfaces. A few truly faint flecks do not detract. Population: 86 in 65 (7 in 65+) Red, 6 finer. CAC: 11 in 65, 1 finer (5/18). NGC ID# 22BC, PCGS# 2458

**3164 1913-D MS65 Red PCGS.** A satiny Gem from an early die state, showing no bothersome carbon spotting. The unabraded surfaces are uniformly copper-red, producing a luminous cartwheel effect in-hand. The 1913-D cent is elusive in this grade, and PCGS lists only 24 finer Red examples (5/18).  
*From The Bob Williams Collection.* NGC ID# 22BE, PCGS# 2464

**3165** 1913-D MS65+ Red PCGS Secure. CAC. An extraordinary Gem, this 1913-D Lincoln cent features a bold strike and pristine surfaces. Trivial spots and marks are only visible with magnification. CAC: 15 in 65, 6 finer (5/18). NGC ID# 22BE, PCGS# 2464

**3166** 1913-S MS65 Red and Brown NGC. Whether Brown, Red and Brown, or Red, the 1913-S Lincoln cent is elusive in Gem condition. This piece shows original copper-gold surfaces accented by delicate chestnut-brown and lilac overtones. Luster is satiny, and there are no mentionable carbon spots. Census: 42 in 65 Red and Brown, 3 finer; 15 in 65 Red, 0 finer (5/18). NGC ID# 22BF, PCGS# 2466

**3167** 1914 MS66 Red PCGS Secure. A sharply struck example, this 1914 Lincoln cent exhibits brilliant orange mint color on its frosty surfaces. Traces of dark patina are evident with a loupe. Population: 86 in 66 (10 in 66+) Red, 6 finer (5/18). NGC ID# 22BG, PCGS# 2470

**3168** 1914-D MS63 Brown PCGS Secure. This Select 1914-D cent is remarkably appealing for the grade, showing sharp detail and satiny chestnut-brown surfaces with no major abrasions. The 1914-D is a key date with a mintage of less than 1.2 million coins, which is a trivial production figure for the Lincoln cent series. NGC ID# 84BX, PCGS# 2471

#### 1914-D Cent, MS64 Brown Always in Demand

**3169** 1914-D MS64 Brown PCGS. Full cartwheel luster appears on the chocolate-brown surfaces of this Choice Mint State 1914-D cent, complementing a bold strike on both sides. Hints of deeply faded mint red appear on the reverse. This key Denver issue is elusive, enjoying strong demand in all grades. NGC ID# 84BX, PCGS# 2471

#### 1914-D Cent, MS64 Red First Generation Holder

**3170** 1914-D MS64 Red PCGS. Satiny luster and original copper-red color characterize each side of this near-Gem Red 1914-D Lincoln cent. The coin is sharp and unabraded, with only a few minute flecks visible beneath a loupe. Finer examples of this key Denver issue are elusive. Housed in a first generation holder. NGC ID# 22BH, PCGS# 2473

**3171** 1914-S MS64 Red and Brown PCGS. A satiny near-Gem from an early die state. This 1914-S Lincoln cent shows strike weakness on the O in ONE but is otherwise well-defined and problem-free. The luster is mainly copper-orange, although tiny hints of grayish toning earn the coin a Red and Brown designation from PCGS. *From The Bob Williams Collection.* NGC ID# 22BJ, PCGS# 2475

**3172** 1914-S MS64 Red PCGS. A lovely orange-gold representative of an early and conditionally rare branch mint issue. A lens reveals a few minuscule obverse flecks. The strike is good save for blending near the top of the O in ONE. Encapsulated in a first-generation "rattler" holder. NGC ID# 22BJ, PCGS# 2476

#### 1917 Lincoln Cent, MS67 Red Superb Original Surfaces

**3173** 1917 MS67 Red PCGS. Satiny mint luster is deeply luminous on this Superb Gem Registry coin, which is conditionally scarce in this grade. Original copper-orange interiors cede to deeper reddish and amber borders, and a loupe fails to reveal a single mentionable surface flaw. Outstanding in every respect. Population: 19 in 67 (2 in 67+) Red, 2 finer (4/18). NGC ID# 22BS, PCGS# 2497

**3174** 1917 Doubled Die Obverse, FS-101, AU50 ANACS. Also designated as Breen-2081 on the small-sized ANACS holder. The date and GOD WE TRUST are die doubled. The Guide Book states this variety is "arguably the most sought after of all the early Lincoln cent varieties" per *Cherrypickers*. Lincoln's jaw exhibits light wear, but the golden-brown surfaces are spot-free and smooth aside from a minor field tick near the profile. NGC ID# 22BS, PCGS# 37673 Base PCGS# 92495

**3175** 1917-D MS65 Red PCGS. A remarkable orange-red Gem. The color is undiminished, the strike is sharp, and the lustrous surfaces show only incidental carbon. Like most Denver-mint issues from the teens, the 1917-D is available in circulated grades but highly elusive in full Red. Population: 51 in 65 (2 in 65+) Red, 6 finer (4/18). NGC ID# 22BT, PCGS# 2500

**3176** 1918-S MS64 Red PCGS. The 1918-S is a key date in Choice Uncirculated or finer grades with original Red surfaces, which tend toward peach-pink to pale reddish-tan patina rather than vibrant orange or red hues. This is such a coin, with strong mint luster but a less-than-stellar strike (another characteristic of the 1918-S), with tiny planchet marks that were not entirely eliminated during the minting process. Worn dies add a grainy texture, and scattered pinpoint flecks are visible under a loupe. Still, few coins are finer in grade or eye appeal, and fewer still can match the original Red color. Population: 77 in 64 (2 in 64+) Red, 19 finer (4/18). NGC ID# 22BX, PCGS# 2512

**3177** 1918-S MS64 Red PCGS. Bright tan-gold surfaces on this near-Gem are satiny and without distractions. Some die wear is visible in the margins, but the central definition is pleasing. Finer Red 1918-S cents are rarely encountered. Population: 77 in 64 (2 in 64+) Red, 19 finer (5/18).

*From The Bob Williams Collection.* NGC ID# 22BX, PCGS# 2512

**3178** 1920-D MS65 Red PCGS Secure. This Gem Red example is remarkably sharp throughout, showing satiny luster and original coppery-pink luster. The color deepens slightly toward portions of the peripheries. The 1920-D cent is scarce in this grade, and PCGS lists only seven finer Red examples (4/18). NGC ID# 22C4, PCGS# 2527

**3179** 1920-D MS65 Red PCGS. This satiny Gem displays original copper-orange luster with hints of deeper reddish color in the margins. The strike is sharp and only a few carbon flecks are visible, none distracting. The 1920-D is scarce in Gem Red condition and rarer finer, with only seven coins so graded at PCGS (4/18). NGC ID# 22C4, PCGS# 2527

**1920-D Cent, MS65+ Red**

Rare in Better Grades

- 3180** 1920-D MS65+ Red PCGS Secure. The Plus designation sets this Gem 1920-D cent apart from most of its peers, and only a few finer coins are known in the Red color category. Significant die erosion on each side softens the finer details but aids in producing a distinctive shimmer to the satiny surfaces that is visually pleasing. Color ranges from gold to copper-orange. Population: 20 in 65+ Red, 7 finer (5/18). NGC ID# 22C4, PCGS# 2527

- 3181** 1921 MS66 Red PCGS Secure. CAC. The 1921 Lincoln cent is scarce in this condition and rare with the CAC green label. Finer pieces are seldom available. This coin displays a sharp strike and satiny fire-orange luster, with no discernible carbon spots. Population: 82 in 66 (10 in 66+) Red, 14 finer. CAC: 10 in 66, 1 finer (4/18). NGC ID# 22C6, PCGS# 2533

- 3182** 1922 No D, Strong Reverse, FS-401, XF40 PCGS. Die Pair 2. The Philadelphia Mint was too busy striking Peace dollars in 1922 to produce Lincoln cents. FS-401 is a Denver Mint product with the mintmark completely lapped from a worn obverse die. A lovely mahogany-brown example of this key *Guide Book* variety. The wheat ears are sharp, as is TRUST and the final 2 in the date, all diagnostic of the coveted Die Pair 2. Void of noticeable carbon or contact. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

- 3183** 1922 No D, Strong Reverse, FS-401, XF45 PCGS. Die Pair 2. Sea-green and chocolate-brown blend throughout this problem-free and pleasing key-date cent. All diagnostics are present, such as sharp definition on TRUST, the wheat ears, and the final-date digit. Certified in an old green label holder. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

- 3184** 1922 No D, Strong Reverse, FS-401 — Improperly Cleaned — NGC Details. AU. Die Pair 2. The second 2 in the date is sharp on this variety, and the reverse is bold. FS-401 is the most sought-after of all No D die combinations. This AU-level coin is well-struck and shows little wear with satiny surfaces. Bronze-gold, olive, and lilac hues decorate each side after a light cleaning. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

- 3185** 1924 MS66 Red PCGS. The original red surfaces of this spectacular Premium Gem are impeccably preserved and the design elements are sharply detailed throughout. Vibrant mint luster adds to the terrific visual appeal. Population: 94 in 66 (14 in 66+) Red, 11 finer (4/18). NGC ID# 22CC, PCGS# 2551

- 3186** 1924-D MS64 Red and Brown PCGS. This Red and Brown near-Gem has uniform chestnut-brown color with luminous reddish undertones. The strike is sharp, and neither side shows a noteworthy abrasion or carbon spot. The 1924-D is elusive in finer grades. *From The Bob Williams Collection.* NGC ID# 22CD, PCGS# 2553

- 3187** 1924-D MS64 Red and Brown PCGS Secure. CAC. This near-Gem displays more copper-gold color than brown toning, being almost entirely Red on the obverse; the reverse has burgundy and olive-brown color around the borders. ONE is weakly struck, but the obverse shows better definition. No major abrasions are seen. NGC ID# 22CD, PCGS# 2553

- 3188** 1924-D MS65 Red and Brown PCGS Secure. The well-preserved original red surfaces of this delightful Gem have mellowed to light brown in some areas, with sharply detailed design elements and vibrant mint luster throughout. Population: 43 in 65 Red and Brown, 1 finer (5/18). NGC ID# 22CD, PCGS# 2553

- 3189** 1924-D MS65 Red and Brown PCGS Secure. Violet patina accompanies the subdued orange mint luster of this extremely important condition rarity. Few examples survive with the brilliant orange luster that is required for a Red designation. Population: 43 in 65 Red and Brown, 2 numerically finer (5/18). NGC ID# 22CD, PCGS# 2553

- 3190** 1924-D MS64 Red PCGS. This near-Gem Red coin displays bright copper-gold luster and satin surfaces. Die erosion forms flowlines near the rims, and some of the finer central details are also blurred. No carbon spotting is seen, and only a few marks in the right obverse field limit the grade. Finer Red 1924-D cents are infrequently available. NGC ID# 22CD, PCGS# 2554

- 3191** 1924-D MS64 Red PCGS. A lustrous orange-gold near-Gem. The reverse displays a whisper of gunmetal toning. The surfaces are void of contact, and the strike is generally sharp, though the upper peripheral legends are slightly blurry. Scarce in full Red, as is the case for other Denver Mint issues from the 1920s. NGC ID# 22CD, PCGS# 2554

- 3192** 1924-D MS64+ Red PCGS Secure. The sharp peripheral legends indicate a bold strike, although die wear on this piece produces indistinct definition on Lincoln's portrait and the wheat ears. Softly frosted copper-orange luster is free of carbon spotting and shows no major abrasions. Eye appeal is generous for the grade. NGC ID# 22CD, PCGS# 2554

- 3193** 1924-D MS64 Red NGC. CAC. A near-Gem example of this conditionally challenging Denver issue. Lustrous and unabraded with predominant orange-gold color and a few pinpoint flecks in the right obverse field. The strike is bold except on the F and first A in OF AMERICA. Certified in a former generation holder. Census: 27 in 64 Red, 18 finer. CAC: 7 in 64, 5 finer (4/18).

*From The Bob Williams Collection.* NGC ID# 22CD, PCGS# 2554

- 3194** 1924-S MS64 Red PCGS. The 1924-S ranks among the most difficult issues to acquire in Gem Red. The present cent does not quite attain that level, but the fire-red surfaces are essentially unabraded. Only a fleck or two on each side precludes a higher grade. Certified in a green-label holder. Population: 87 in 64 (2 in 64+) Red, 10 finer (5/18).

*From The Bob Williams Collection.* NGC ID# 22CE, PCGS# 2557

**1925 Cent, MS67+ Red  
Registry-Grade Example**

- 3195** 1925 MS67+ Red PCGS Secure. CAC. Frosty, unabraded surfaces are carbon-free and radiantly lustrous on this high-end, CAC-approved Superb Gem. Some die wear is evident, but the strike is nonetheless sharp. Distinctive color includes shades of yellow-gold, lilac, and copper-orange. A Registry Set essential. Population: 79 in 67 (7 in 67+) Red, 1 finer. CAC: 14 in 67, 0 finer (5/18). NGC ID# 22CF, PCGS# 2560

- 3196** 1926 MS67+ Red PCGS Secure. CAC. This blazing Superb Gem displays vivid yellow-gold luster with hints of pistachio-green throughout. No carbon spotting is visible and the strike is sharp. A beautiful Registry Set candidate with unique color. Population: 16 in 67+ Red, 0 finer. CAC: 34 in 67, 0 finer (4/18). NGC ID# 22CJ, PCGS# 2569
- 3197** 1926-D MS65 Red PCGS. Full Red Gems of the 1926-D are seldom encountered, but the present well-struck example displays exceptionally uniform peach-red color. One small spot is seen beneath Lincoln's jaw. Certified in a first-generation "rattler" holder. Population: 58 in 65 (2 in 65+) Red, 5 finer (4/18). NGC ID# 22CK, PCGS# 2572
- 3198** 1926-D MS65 Red NGC. A lovely Gem example of this scarcer Denver issue. The strike is close to full, and the fields are slightly reflective. Bright, original apricot-gold luster dominates both sides. Housed in a former generation holder. Census: 4 in 65 Red, 1 finer (4/18).  
*Ex: Richard Weiss Collection / Central States Signature (Heritage, 4/2001), lot 5926, which realized \$1,840.* NGC ID# 22CK, PCGS# 2572
- 3199** 1927 MS67 Red PCGS Secure. CAC. Beautiful copper-orange interiors cede to brighter gold borders on this carbon-free Superb Gem, complementing sharp devices and luminous satin luster. The 1927 cent is scarce in this grade and unknown numerically finer for Registry Set collectors. CAC-approved coins are in the minority. Population: 60 in 67 (7 in 67+) Red, 0 finer. CAC: 25 in 67, 0 finer (4/18). NGC ID# 22CM, PCGS# 2578
- 3202** 1928-S MS65 Red and Brown PCGS. Small S. The orange-gold surfaces approach full Red, though the portrait has mellowed in lilac shades, and a few thin diagonal streaks of steel-gray cross the stem of the right-side wheat ear. Lustrous and well-struck with a small number of distributed tiny obverse ticks.  
*From The Bob Williams Collection.* NGC ID# 22CT, PCGS# 2592
- 3203** 1929-D MS66 Red PCGS. This Premium Gem 1929-D cent is among the finest Red coins certified and is scarce as such, being of high importance to Registry Set collectors. The strike is sharp and each side displays original orange-gold luster. A few tiny pepper specks are seen on the reverse under a loupe. Population: 34 in 66 (2 in 66+) Red, 0 finer (4/18). NGC ID# 22CV, PCGS# 2599
- 3204** 1929-S MS66 Red PCGS. The 1929-S Lincoln cent is an available date in lower grades, but it is conditionally rare at the MS66 level and with the Red designation. This amazing Premium Gem offers well-detailed design elements and blazing original orange-red surfaces with a few hints of lilac. Population: 49 in 66 (2 in 66+) Red, 0 finer (4/18). NGC ID# 22CW, PCGS# 2602
- 3205** 1930 MS67+ Red PCGS Secure. CAC. The 1930 Lincoln cent is only marginally scarce in MS67 Red, but CAC-approved pieces are rare, and PCGS lists only a single MS68 Red coin finer. This Registry coin is carbon-free and virtually flawless, showing sharp motifs and frosty copper-red and orange mint luster. Population: 13 in 67+ Red, 1 finer. CAC: 44 in 67, 0 finer (5/18). NGC ID# 22CX, PCGS# 2605

**1927 Lincoln Cent, MS67 Red  
Sharply Struck, Impeccably Preserved**

- 3200** 1927 MS67 Red PCGS Secure. CAC. The 1927 Lincoln cent is an elusive issue in MS67 condition, with original Red surfaces, and neither PCGS nor NGC has certified any examples in higher numeric grades (5/18). This delightful Superb Gem exhibits sharply detailed design elements and impeccably preserved surfaces with blazing copper-red luster. Population: 60 in 67 (7 in 67+) Red, 0 finer. CAC: 25 in 67, 0 finer (4/18). NGC ID# 22CM, PCGS# 2578

**1927-S Cent, MS64+ Red  
Rarely Offered Finer**

- 3201** 1927-S MS64+ Red PCGS Secure. CAC. A well-struck example with satiny copper-orange luster and no distracting abrasions. Minor die wear on each side softens some of the finer details, but the overall definition is good. The 1927-S Lincoln cent is rarely offered finer in Red condition, and CAC-approved coins in this and higher grades are rarer still. CAC: 13 in 64, 2 finer (4/18). NGC ID# 22CP, PCGS# 2584

- 3202** 1928-S MS65 Red and Brown PCGS. Small S. The orange-gold surfaces approach full Red, though the portrait has mellowed in lilac shades, and a few thin diagonal streaks of steel-gray cross the stem of the right-side wheat ear. Lustrous and well-struck with a small number of distributed tiny obverse ticks.  
*From The Bob Williams Collection.* NGC ID# 22CT, PCGS# 2592

- 3203** 1929-D MS66 Red PCGS. This Premium Gem 1929-D cent is among the finest Red coins certified and is scarce as such, being of high importance to Registry Set collectors. The strike is sharp and each side displays original orange-gold luster. A few tiny pepper specks are seen on the reverse under a loupe. Population: 34 in 66 (2 in 66+) Red, 0 finer (4/18). NGC ID# 22CV, PCGS# 2599

- 3204** 1929-S MS66 Red PCGS. The 1929-S Lincoln cent is an available date in lower grades, but it is conditionally rare at the MS66 level and with the Red designation. This amazing Premium Gem offers well-detailed design elements and blazing original orange-red surfaces with a few hints of lilac. Population: 49 in 66 (2 in 66+) Red, 0 finer (4/18). NGC ID# 22CW, PCGS# 2602

- 3205** 1930 MS67+ Red PCGS Secure. CAC. The 1930 Lincoln cent is only marginally scarce in MS67 Red, but CAC-approved pieces are rare, and PCGS lists only a single MS68 Red coin finer. This Registry coin is carbon-free and virtually flawless, showing sharp motifs and frosty copper-red and orange mint luster. Population: 13 in 67+ Red, 1 finer. CAC: 44 in 67, 0 finer (5/18). NGC ID# 22CX, PCGS# 2605

**1931-D Cent, MS66 Red  
Seldom Found This Fine**

- 3206** 1931-D MS66 Red PCGS. A vibrant Premium Gem Red cent, this 1931-D boasts impressive luster and vivid fire-red coloration over both sides. Surface marks are virtually nonexistent, and flyspecks are minimal. This Denver Mint issue is scarce in the current grade and nearly uncollectible finer with full mint red. Population: 47 in 66 (2 in 66+) Red, 1 finer (4/18).  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 504.* NGC ID# 22D3, PCGS# 2617

**1931-D Lincoln Cent, MS66 Red  
Rich Original Mint Luster**

- 3207** 1931-D MS66 Red PCGS Secure. A conditionally scarce Red example of this Denver issue, showing frosty copper-orange surfaces that are undeniably original. Sharp design elements and minimal evidence of carbon deliver strong eye appeal. The 1931-D is almost uncollectible in finer condition. Population: 47 in 66 (2 in 66+) Red, 1 finer (5/18). NGC ID# 22D3, PCGS# 2617

- 3208** 1931-S MS66 Red PCGS Secure. CAC. Although the 1931-S cent is often available in MS66 Red, no Superb Gem Red coins are certified (4/18), making this example important for Registry Sets. One of only a 16 CAC-approved coins in this grade, it shows shimmering copper-gold luster and well-struck design elements. The carbon-free surfaces exhibit only a few unobtrusive grazes. NGC ID# 22D4, PCGS# 2620
- 3209** 1932 MS67 Red PCGS. Tangerine-orange luster glows on pristine surfaces on this Registry-grade 1932 Red Lincoln cent. Sharp design elements complement a lack of carbon spotting, and the eye appeal is outstanding. The 1932 is scarce in this grade and unknown in MS68 Red. Population: 40 in 67 (2 in 67+) Red, 0 finer (4/18). NGC ID# 85ZB, PCGS# 2623
- 
- 1933 Lincoln Cent, MS67+ Red Registry Grade Example**
- 

- 3210** 1933 MS67+ Red PCGS Secure. The 1933 Lincoln cent is a scarce issue in MS67 condition, with the Red designation. This Plus-graded Superb Gem exhibits sharply detailed design elements and impeccably preserved original red surfaces that radiate vibrant mint luster throughout. Overall eye appeal is terrific. Population: 77 in 67 (10 in 67+) Red, 0 finer (4/18). NGC ID# 22D7, PCGS# 2629
- 3211** 1934-D/D FS-504 MS67 Red PCGS Secure. As of (4/18), the present lot is the single finest PCGS-certified FS-504 cent, and thus an important opportunity for the advanced Registry collector. FS-504 is an impressive repunched mintmark variety, since it shows the secondary D above, within, and west of the primary D. This lustrous Superb Gem is primarily peach-gold though the borders exhibit variegated apple-green. NGC ID# 22DA, PCGS# 37738 Base PCGS# 2638
- 3212** 1936-D MS67+ Red PCGS. CAC. Little searching is required for those looking to obtain a nice MS67 Red example of the 1936-D. Such coins are scarce but fairly accessible. Plus-designated Superb Gems are a different matter, and represent the top-graded coins at PCGS. This well-struck copper-orange Denver cent displays lavender hues near the rims and exceptionally clean surfaces. One of only 23 MS67+ Red coins at PCGS with none finer (5/18). CAC: 40 in 67, 0 finer (5/18). NGC ID# 22DF, PCGS# 2653
- 3213** 1940-D MS67+ Red PCGS Secure. CAC. Satiny orange-gold luster illuminates unabraded, carbon-free surfaces on this high-end Superb Gem. The strike is sharp, and the CAC green label confirms the outstanding quality. CAC-approved coins in this condition are rare and in demand for Registry Sets. Population: 7 in 67+ Red, 1 finer. CAC: 19 in 67, 0 finer (4/18). NGC ID# 22DU, PCGS# 2689
- 3214** 1943-S MS68 NGC. The steel cents struck in 1943 at San Francisco are generally available, but MS68 coins are conditionally scarce and sought-after by Registry Set collectors. This top-grade coin displays a bold strike and satiny zinc-silver luster, complemented by semiprooflike fields on both sides. Eye appeal is outstanding. Census: 28 in 68, 0 finer (4/18). NGC ID# 22E8, PCGS# 2717
- 3215** 1948 MS67 Red NGC. The 1948 cent is scarce in MS67 Red and unknown numerically finer. This Registry-grade coin displays copper-orange surfaces and luminous satin luster. Bold design elements show no abrasions, and there is no distracting carbon spotting. Census: 65 in 67 (1 in 67+) Red, 0 finer (4/18). NGC ID# 22ES, PCGS# 2761
- 3216** 1955 Doubled Die Obverse, FS-101, AU55 PCGS Secure. A lovely Choice AU chocolate-brown example of the landmark FS-101 variety. Marks are essentially absent, though the obverse field displays carbon near LIBERTY and the nose. Knowledge of die preparation was highly concentrated within the hobby in 1955, and the significance of the extraordinary obverse die doubling was downplayed for several years. Today, examples are prized. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3217** 1955 Doubled Die Obverse, FS-101, AU58 PCGS Secure. Although not the rarest die error of the series, the 1955 Doubled Die Obverse is certainly the most famous and easily one of the most dramatic. The strong obverse doubling throughout the date and legends exists on this near-Mint example. Faint hints of Mint red accent the glossy, medium-brown surfaces. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3218** 1955 Doubled Die Obverse, FS-101, MS62 Brown NGC. Spectacular die doubling throughout the obverse legends is the hallmark of the 1955 FS-101, perhaps the best-known variety of the Lincoln cent series. This lustrous representative displays blended steel-gray and tan-brown toning. No marks are noticeable, though minor carbon is present on the lower reverse and right obverse periphery. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3219** 1955 Doubled Die Obverse, FS-101, MS63 Brown NGC. A well-struck and coruscating representative. Rich sea-green toning dominates both sides, though glimmers of Red outline portions of UNITED STATES OF AMERICA. A diagonal streak of deeper patina passes through portions of ONE CENT. Ex: Long Beach Signature (Heritage, 5-6/2007), lot 273, where it sold for \$2,990. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 
- 1955 Doubled Die Cent, MS63 Red and Brown Strong Eye Appeal**
- 

- 3220** 1955 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS Secure. Cobalt-blue toning overlays lustrous flame-orange surfaces of this Select Red and Brown doubled die cent. While not the rarest of the doubled dies in the series, it is without question the most famous and most dramatic. This example adds vivid color to the eye appeal, punctuated by a few widely scattered carbon specks. A faint horizontal abrasion on the cheek and tiny marks through the center of the portrait are visible, some of which are typical of the diagnostic, soft strike. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826
- 3221** 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red and Brown NGC. IN GOD WE TRUST and LIBERTY are strongly die doubled. The FS-101 1970-S ranks among the most desirable doubled die varieties, and Uncirculated examples are rare. This lustrous Choice cent is mostly pumpkin-gold but shows hints of lavender on each side, just enough to deny a full Red designation. Smooth aside from a minor field graze near the profile. NGC ID# 22GN, PCGS# 37998 Base PCGS# 2938
- 3222** 1972 Doubled Die Obverse, FS-101, MS66+ Red PCGS Secure. Cherrypickers' photographs nine different obverse doubled die varieties for the 1972 cent. FS-101 shows the strongest doubling, and is the variety listed in the Guide Book. This peach-red representative has a full strike and a mark-free appearance. A lens reveals infrequent minor carbon. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

**3223** 1983 Doubled Die Reverse, FS-801, MS67 Red PCGS. The strongest reverse doubled die of the series. The legends and the base of the Lincoln Memorial exhibit a wide south-southwest spread. The salmon-pink surfaces are lustrous, carbon-free, and unabraded. Both sides display distributed Mint-made tiny trapped gas bubbles beneath the copper-plate, usual for the issue. Population: 71 in 67 (11 in 67+) Red, 1 finer (4/18).

*Ex: Long Beach Signature (Heritage, 2/2005), lot 5597; Central States Signature (Heritage, 5/2007), lot 1293; Baltimore ANA Signature (Heritage, 7/2008), lot 1240, which realized \$1,840.*

*From The Emily A. Blake Collection.* NGC ID# 22HW, PCGS# 38063 Base PCGS# 3056

**1990 Cent, MS69 Red  
The Sole Finest at PCGS**

**3224** 1990 MS69 Red PCGS Secure. The 1990 Lincoln cent may be available in roll quantity to the average collector, but Registry specialists assembling top-grade sets will encounter a shortage of coins with the quality necessary to certify in the "ultra" grades at PCGS and NGC. The finest pieces certified are two MS69 Red coins, including this PCGS example and one other NGC coin (5/18). For the PCGS Registry Set collector, this piece is the ultimate 1990 Lincoln cent. The coin is razor-sharp, carbon-free, and satiny, with lovely copper-orange and pinkish color. In other words, it is essentially flawless. NGC ID# 22JD, PCGS# 3083

**1992-D Lincoln Cent, MS64 Red  
Transitional Close AM**

**3225** 1992-D Close AM, FS-901, MS64 Red PCGS. The Close AM in AMERICA reverse, with a wide space between the designer's initials and the Lincoln Memorial, was used on both proof and business-strike Lincoln cents the following year, but the Denver Mint inadvertently struck a small number of transitional examples using this reverse shortly before the end of the year in 1992. This sharply detailed Choice example offers well-preserved original red surfaces with vibrant mint luster throughout. Population (for the variety): 6 in 64 Red, 2 finer (4/18). NGC ID# 22JJ, PCGS# 391429 Base PCGS# 83101

**3226** 1995 Doubled Die Obverse, FS-101, MS69 Red NGC. LIBERTY and IN GOD WE are nicely die doubled. The FS-101 1995 was widely publicized upon discovery, and many examples were set aside, though few compare with the remarkable quality of the present piece. The strike is full, and the lustrous pumpkin-gold surfaces are virtually devoid of carbon or contact. NGC ID# 22JS, PCGS# 38105 Base PCGS# 3127

## SMS LINCOLN CENT

**1967 SMS Cent, SP65 Red Deep Cameo  
Sole Deep Cameo at PCGS**

**3227** 1967 SMS SP65 Red Deep Cameo PCGS. Cents from the 1965 to 1967 special mint sets can be found with cameo contrast, but Deep Cameo examples are very rare. In fact, as of (4/18), PCGS has certified only a single example of the SMS 1967 cent as Deep Cameo. NGC has not certified any as Ultra Cameo. This is a magnificent Gem that boasts uniform peach-gold color. The fields are reflective and devoid of detractions. A significant opportunity for the advanced Lincoln cent collector. NGC ID# 54HH, PCGS# 93296

## PROOF LINCOLN CENTS

**3228** 1909 PR65 Red and Brown PCGS. CAC. The obverse is mostly fire-red, though lilac and apple-green are also present. The reverse displays considerable peach-gold though lavender-red is also extensive. A well-struck and mark-free Gem with minor carbon on the field above the date. Housed in a green-label holder.

*From The Reilly Cody Collection.* NGC ID# 22KS, PCGS# 3304

**3229** 1909 PR65 Red PCGS. The strike is pinpoint sharp on this Gem matte proof 1909 (without V.D.B.) cent. The surfaces are essentially mark-free. Variegated toning covers both sides in gleaming shades that range from pale-peach to ruby-red, with violet, vivid-orange, and quicksilver-blue shades intermixed. A few splashes of purple add interest at the lower reverse. Housed in a prior generation light-blue label holder with barcode on the back. Population: 61 in 65 Red, 55 finer (4/18). NGC ID# 22KS, PCGS# 3305

**3230** 1910 PR65 Red PCGS. CAC. Orange-gold and cherry-red grace both sides, with the latter shade conspicuous on Lincoln's coat and the upper reverse. The intricately struck fine-grain surfaces are mark-free though a few flecks are scattered. Certified in a green-label holder. CAC: 4 in 65, 8 finer (5/18). NGC ID# 22KT, PCGS# 3308

**3231** 1911 PR66 Red and Brown NGC. The original red surfaces of this spectacular Premium Gem have mellowed to olive-brown in most areas, but no mentionable flaws are evident and the design elements are sharply detailed throughout. Census: 16 in 66 Red and Brown, 1 finer (4/18). NGC ID# 22KU, PCGS# 3310

**3232** 1912 PR66 Brown PCGS Secure. The obverse of this Premium Gem has wisps of pale blue toning with splashes of original orange mint color, and the reverse exhibits vibrant blue toning and splashes of mint color. The strike is expectedly bold. NGC ID# 22KV, PCGS# 3312

**3233** 1913 PR65 Red NGC. A delightful Gem, from a proof mintage of 2,983 pieces, this coin exhibits sharply detailed design elements and lustrous, original red surfaces with no mentionable distractions. Census: 23 in 65 Red, 13 finer (4/18). NGC ID# 22KW, PCGS# 3317

- 3234** 1913 PR65 Red PCGS. As the most-plentiful date in the Lincoln matte proof series, the 1913 is readily available in comparison to some of the other dates, but less so with original Gem Red surfaces. This is a rich, reddish-tan representative with vibrant luster and purplish overtones. The razor-sharp devices are glossy against finely textured fields, with a few inconsequential flyspecks, zero marks, and tremendous eye appeal. Population: 51 in 65 (1 in 65+) Red, 48 finer (4/18).  
Ex: Philadelphia 2000 Signature (Heritage, 8/2000), lot 6732, where it brought \$1,437.50. NGC ID# 22KW, PCGS# 3317
- 3235** 1913 PR65 Red PCGS Secure. CAC. This fully lustrous Gem matte proof exhibits the satiny, textured surfaces associated with the manufacturing method. Both sides feature a bold strike and mellow orange mint color. NGC ID# 22KW, PCGS# 3317
- 3236** 1913 PR66 Red PCGS Secure. The matte surfaces, bold design elements and lettering, and squared rim are characteristics of the matte proof Lincoln cents. This example has full luster with brilliant orange surfaces. Population: 41 in 66 (3 in 66+) Red, 7 finer (5/18). NGC ID# 22KW, PCGS# 3317

**1914 Cent, PR66 Red and Brown  
Splendid CAC-Approved Example**

- 3237** 1914 PR66 Red and Brown PCGS. CAC. Dave Bowers' *A Guide Book of Lincoln Cents* notes of the 1914 proof: "These are scarce today. Most pristine (undipped) coins are a rich light brown color." Such a description aptly applies to this Red and Brown Premium Gem. The strike is full, the rims broad. Rose and steel-blue accents over moderately granular, near-pristine surfaces account for the CAC-approved visual appeal. From a mintage of 1,365 proofs. Population: 41 in 66 (1 in 66+) Red and Brown, 7 finer; 21 in 66 Red, 10 finer. CAC: 21 in 66, 4 finer (4/18).  
*From The Reilly Cody Collection.* NGC ID# 22KX, PCGS# 3319

**1915 Cent, PR66 Red and Brown  
Balanced Orange-Burgundy Color**

- 3238** 1915 PR66 Red and Brown NGC. This luminous Premium Gem matte proof shows a blend of burgundy-brown, olive-green, and copper-orange hues across unmarked surfaces. A few tiny pepper specks are only visible with a loupe and do not detract. High-end examples of this matte proof issue are elusive, and coins grading finer than this piece are rare. Census: 19 in 66 (1 in 66+) Red and Brown, 2 finer (4/18). NGC ID# 22KY, PCGS# 3322

- 3239** 1936 Type One — Satin Finish PR65 Red PCGS Secure. Two styles of proof Lincoln cents were coined in 1936, following a two-decade intermission of proof coinage production since the last matte proofs were minted in 1916. The initial 1936 proofs had a satin finish such as the piece offered here, and those struck later in the year had a brilliant finish with deeply mirrored fields. Both styles are highly collectible, and elusive in higher grades. This pleasing Gem exhibits the expected bold strike, with brilliant orange mint color on the satin surfaces with a trivial splash of darker toning on the reverse. Population: 69 in 65 (1 in 65+) Red, 40 finer (4/18). NGC ID# 22L2, PCGS# 3332

- 3240** 1936 Type Two — Brilliant Finish PR65 Red PCGS. The first of the Brilliant Finish Lincoln cent proofs, though satin proofs were also struck in 1936, and matte proofs were made between 1909 and 1916. This orange-gold Gem has beautiful color and exemplary preservation. A few pinpoint flecks preclude perfection. Encapsulated in an old green label holder.  
*From The Tuxedo Park Collection.* NGC ID# 22L3, PCGS# 3335

**1936 Type Two Cent, PR66 Red  
Brilliant Finish**

- 3241** 1936 Type Two — Brilliant Finish PR66 Red PCGS. The mirrorlike fields on each side of this first-year Lincoln cent proof distinguish the Brilliant finish from the Satin finish employed on proofs struck earlier in the year. This format is more collectible, and many collectors prefer the Brilliant aesthetic. Fire-orange surfaces are incredibly void of contact. Tiny carbon spots appear on each side but do not affect the appeal. Population: 62 in 66 (5 in 66+) Red, 2 finer (4/18). NGC ID# 22L3, PCGS# 3335

- 3242** 1939 PR67+ Red NGC. Liquidlike fields are almost flawless on this high-end Superb Gem proof, save for a few microscopic spots in the left obverse field. The devices are sharp and satiny. The 1939 proof cent is seldom offered this fine. Census: 32 in 67 (2 in 67+) Red, 0 finer (5/18). NGC ID# 22L6, PCGS# 3344

**1950 Cent, PR67 Red Ultra Cameo  
Registry-Grade Rarity**

- 3243** 1950 PR67 Red Ultra Cameo NGC. Red Ultra Cameos are the most sought-after of all 1950 proof Lincoln cents, but such pieces are rare in Superb Gem condition. This coin displays sharp definition and dramatic field-device contrast. The motifs are frosty and luminous, set against liquidlike mirroring in the fields. No carbon spotting is seen. Census: 18 in 67 Red Ultra Cameo (2 in 67+), 1 finer (5/18). NGC ID# 22LA, PCGS# 93359

**3244** 1959 PR69 Red Cameo PCGS. The first-year Memorial cent proof is in high demand in the ultimate Red Cameo and Deep Cameo grades. This PR69 Red Cameo displays virtually flawless copper-orange surfaces and stark contrast. No carbon spotting is present. Population: 9 in 69 Red Cameo, 3 in 69 Red Deep Cameo finer (5/18). NGC ID# 22LK, PCGS# 83386

**3245** 1960 Small Over Large Date, FS-102, PR68 Red PCGS Secure. In 1960, speculator interest in then-current cents soared once it was realized that the Small Date was scarce. Years later, the valuable varieties are the FS-101 1960-D and the three proof overhubbings. The FS-102 1960 is distinctive for doubling on the date and the BER in LIBERTY. The doubling is more dramatic than on FS-101 and FS-103, since the Small Date is over the Large Date. A pristine and fully struck cent with seamless peach-gold color. NGC ID# 22LL, PCGS# 38163 Base PCGS# 3413

## TWO CENT PIECES

**3246** 1864 Small Motto, FS-401, AU58 PCGS. CAC. The ephemeral Small Motto variety is far scarcer than its Large Motto successor. This intricately struck mahogany-brown example exhibits unblemished fields and devices, though the edge shows steel-gray patina when viewed at 1 o'clock on the obverse and 11 o'clock on the reverse. CAC: 11 in 58, 57 finer (5/18). NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

**3247** 1864 Large Motto MS66 Red and Brown PCGS Secure. CAC. This satiny, lustrous Premium Gem displays a full strike and unabraded surfaces. Faint tinges of cherry-red and greenish color accent otherwise copper-orange surfaces, and only a few unimportant flecks are seen beneath a loupe. NGC ID# 22N9, PCGS# 3577

### 1865 Two Cent, MS66 Red Few Known Finer

**3248** 1865 MS66 Red PCGS Secure. Plain 5 in date. This second-year two cent issue is available in Brown grades, but Mint State Red coins are elusive in high grade. This Premium Gem is scarce and few finer pieces are known. The coin is struck from lightly clashed dies but is nonetheless sharp and satiny with radiant original luster. A loupe reveals only a few trivial flecks. Population: 54 in 66 (3 in 66+) Red, 2 finer (5/18). NGC ID# 22NA, PCGS# 3584

**3249** 1866 MS65 Red PCGS Secure. Red 1866 two cent pieces are scarce, especially at the Gem level. This coin displays satiny copper-orange luster and well-preserved surfaces, although moderate strike weakness is visible on each side. A couple of unobtrusive flecks are present. Population: 48 in 65 (4 in 65+) Red, 13 finer (5/18). NGC ID# 274R, PCGS# 3590

### 1869 Two Cent, MS65 Red Elusive in This High Grade

**3250** 1869 MS65 Red PCGS Secure. Satiny copper-red luster illuminates sharp design elements on this Gem 1869 two cent piece. A few small flecks are visible under a loupe, but no distracting abrasions interrupt the eye appeal. This issue is scarce in Gem Red condition and rarely available finer. Population: 33 in 65 (2 in 65+) Red, 5 finer (5/18). NGC ID# 22ND, PCGS# 3605

**3251** 1871 MS65 Red and Brown PCGS Secure. This is a sharp Gem that displays primarily copper-red luster with just a few wisps of brown. Scattered specks are visible under a loupe. The 1871 two cent piece is scarce in this grade and rare finer. Population: 66 in 65 (1 in 65+) Red and Brown, 6 finer; 13 in 65 (1 in 65+) Red, 6 finer (5/18). NGC ID# 22NF, PCGS# 3610

### 1872 Two Cent, Doubled Die Obverse FS-101, MS63 Red and Brown

**3252** 1872 Doubled Die Obverse, FS-101, MS63 Red and Brown ANACS. Die doubling is most apparent on TRUST. The mintage was small — just 65,000 pieces — the lowest mintage of circulation strikes in the series. This Select Uncirculated example displays reddish-tan surfaces with strong mint luster and scattered carbon flecks. The coin is a bit softly struck from clashed dies with several reverse die cracks, yet the original Red and Brown surfaces retain considerable eye appeal. NGC ID# 22NG, PCGS# 38293 Base PCGS# 3613

## PROOF TWO CENT PIECES

1864 Two Cent, PR66 Brown  
Large Motto Proof Type Coin

**3253 1864 Large Motto PR66 Brown PCGS Secure. CAC.** Vivid violet, blue, pine-green, and gold hues adorn the glimmering fields and satiny devices of this high-end proof. The strike is sharp, and a few pepper specks around the date are not distracting. A highly appealing and conditionally rare first-year proof type coin. Population: 12 in 66 (2 in 66+) Brown, 1 finer; 13 in 66 Red and Brown, 1 finer; 1 in 66 Red, 0 finer; 4 in 66 Red Cameo, 0 finer. CAC: 4 in 66, 0 finer (5/18). NGC ID# 274T, PCGS# 3621

1864 Large Motto Two Cent Piece  
PR65 Red and Brown  
Old Green Label Holder

**3254 1864 Large Motto PR65 Red and Brown PCGS.** Glossy, mirrored surfaces showcase areas of crimson, olive, and chestnut-brown color. The strike is sharp, and a few scattered flecks are well-hidden by the patina. The 1864 Large Motto proof is elusive in high grade and rarely offered finer than the Gem level with any color designation. Housed in an old green label holder of the two-piece, plastic collar design. Population: 41 in 65 (1 in 65+) Red and Brown, 35 finer (including Red and Red Cameo pieces) (5/18).  
Ex: FUN Signature (Heritage, 1/2005), lot 5547; Dallas Signature (Heritage, 3/2018), lot 3429. NGC ID# 274T, PCGS# 3622

**3255 1869 PR65 Red PCGS Secure.** A delightful Gem proof two cent piece, this example has fully mirrored fields and mellow orange mint color with trivial splashes of dark patina on each side. A few scattered spots are evident only with a glass. Population: 49 in 65 Red, 14 finer (5/18). NGC ID# 274Y, PCGS# 3641

**3256 1871 PR66 Brown PCGS. CAC. FS-102.** As is the case with all 1871 proofs, TRUST is nicely die doubled. Although designated as Brown by PCGS, both sides show substantial orange-gold, along with blushes of lavender-red and apple-green. Both sides are sharply struck and void of detractions. A magnificent proof two cent type coin. NGC ID# 22NH, PCGS# 3645

1871 Two Cent Piece, PR65 Red Sharp With Original Surfaces

**3257 1871 PR65 Red PCGS Secure.** A lustrous piece, toned just enough to confirm its originality while still maintaining its bright proof surfaces. The coin is boldly struck and perfect for a type set. Struck from a doubled obverse die, most obvious at TRUST, as are all 1871 proof two cent pieces. Population: 41 in 65 Red, 21 finer; 1 in 65 Red Cameo, 2 finer (5/18). NGC ID# 22NH, PCGS# 3647

**3258 1873 Closed 3 PR63 Red and Brown PCGS Secure.** This Select Closed 3 proof displays mostly copper-orange color, but light tinges of violet and olive toning in the reflective fields earn a Red and Brown designation from PCGS. No mentionable carbon is visible. NGC ID# 2753, PCGS# 3652

**3259 1873 Open 3 PR62 Brown PCGS.** The Open 3 two cent proofs are thought to be restrikes, although they may have been struck later in 1873. From a small mintage of 500 pieces, the Open 3 proofs are somewhat rarer than their Closed 3 counterparts. This sharply detailed MS62 specimen features lightly marked olive-brown surfaces. Population: 6 in 62 Brown, 66 finer (5/18). NGC ID# 2754, PCGS# 3654

## THREE CENT SILVER

1851-O Three Cent Silver, MS65  
Delicately Toned, Clean for the Grade

**3260 1851-O MS65 PCGS. CAC.** This Gem representative of the sole New Orleans issue in the series displays a characteristically soft strike, although the eye appeal and preservation are anything exceptional. Delicate powder-blue and lavender tones meld with glints of magenta and reddish-orange patina. Vibrant satiny mint luster glistens throughout. A couple small ticks are present in the reverse field. Population: 57 in 65 (1 in 65+), 33 finer. CAC: 14 in 65, 19 finer (5/18). NGC ID# 22YY, PCGS# 3665

**3261 1853 MS66 PCGS. CAC.** Shades of silver, champagne, violet, and ice-blue appear on this Premium Gem representative of the "no outline to star" design. Splashes of darker gray-green color are present on both sides, primarily at the peripheries. Die clashing is present on both sides, particularly in the center of the reverse. Population: 82 in 66 (9 in 66+), 13 finer. CAC: 37 in 66, 11 finer (4/18). NGC ID# 22Z2, PCGS# 3667

**3262 1854 MS64 NGC.** The outside border was added to the star in 1854, creating a new design subtype. This sharply detailed Choice specimen shows some interesting clash marks on both sides and the lustrous surfaces are lightly marked. NGC has graded 33 numerically finer examples (4/18). NGC ID# 22Z3, PCGS# 3670

**3263** 1860 MS65 PCGS Secure. This is a sharp Gem, although the reverse definition is weakened by excessive die lapping. Nonetheless, satiny mint luster shows no major abrasions and has original olive-gray and rose-gold toning over each side. The 1860 three cent silver is scarce in this grade and rare finer. Population: 31 in 65 (1 in 65+), 18 finer (4/18). NGC ID# 5LDM, PCGS# 3678

**3264** 1861 MS66 NGC. This frosty Premium Gem appears flawless even under a loupe, showing delicate pastel hues amid the light champagne patina seen over each side. The strike is bold, although die lapping on the reverse weakens the relief of that side. Finer 1861 silver three cents are rare. NGC ID# 22ZA, PCGS# 3679

**3265** 1862/1 FS-301 MS65 PCGS. Shimmering original luster is brilliant throughout the interiors of this Gem overdate coin, surrounded by amber, russet, and blue-green hues around the borders. Slight strike weakness is visible on the central shield, and clash marks appear on both sides. This variety is elusive in Gem condition. Housed in a first generation holder.

*From The Tuxedo Park Collection.* NGC ID# CBR7, PCGS# 38580 Base PCGS# 3681

### 1866 Three Cent Silver, MS65 Prooflike Fields

**3266** 1866 MS65 PCGS Secure. This Gem 1866 three cent silver is semiprooflike and sharply struck. Excessive die polishing is seen in the recesses of the reverse design, but the obverse is full. This issue is scarce in high grade, and Mint State coins are widely scattered across the MS63 to MS67 grades. This Gem is high-quality for the grade with excellent visual merit. Population: 12 in 65, 27 finer (5/18). NGC ID# 22NK, PCGS# 3686

## PROOF THREE CENT SILVER

### 1859 Silver Three Cent, PR66 Conditionally Rare Type Three Design

**3267** 1859 PR66 PCGS Secure. On the obverse, rose-gold border toning surrounds a sea-green interior. The reverse displays the same colors but with the rose-gold hue in the center. Glimmering fields and sharp motifs are further visual attributes. Premium Gem proofs such as the present coin are rare, and Superb Gems are seldom available. Population: 6 in 66 (1 in 66+), 2 finer; 2 in 66 (1 in 66+) Cameo (4/18). NGC ID# 27C6, PCGS# 3708

### 1863 Three Cent Silver, PR66

#### Attractive Toning

**3268** 1863 PR66 PCGS Secure. This is a sharp Premium Gem proof, struck from fresh dies that do not show excessive polishing in the design recesses. Both sides have vivid cobalt-blue, turquoise, and lavender toning, which allows appreciable cameo contrast on the obverse. An outstanding coin with great eye appeal. Population: 20 in 66 (3 in 66+), 0 finer (5/18). NGC ID# 7VZF, PCGS# 3712

**3269** 1864 PR65 PCGS Secure. A Gem proof, this 1864 three cent silver piece is fully struck and adorned with mirrored fields and original russet-gold toning. Flecks of violet and blue also appear around the borders. Modest contrast is evident on the obverse, although this is not a true Cameo. NGC ID# 27CA, PCGS# 3714

**3270** 1866 PR64 Cameo NGC. The 1866 proof silver three cent is scarce in Cameo grades, and Ultra Cameos are almost unknown at NGC. This Choice Cameo displays sharp detail and mirrored fields. Original blue-green, gray, and champagne toning graces each side, being lighter in the middle, allowing modest cameo contrast. Census: 17 in 64 Cameo, 23 finer (including 1 in 65 Ultra Cameo) (4/18). NGC ID# 27CC, PCGS# 83716

**3271** 1866 PR64 Cameo NGC. This Choice proof is fully struck and starkly contrasted, showing deep mirroring in the fields and frosty luster on the relief elements. Some faint hairlines on each side blend into the equally faint die polishing lines of the fields. Neither side exhibits mentionable toning. Census: 17 in 64 Cameo, 23 finer (including 1 in 65 Ultra Cameo) (4/18).  
*Ex: Central States Signature (Heritage, 4-5/2010), lot 383, which realized \$977.50. NGC ID# 27CC, PCGS# 83716*

**3272** 1867 PR65 PCGS. Dappled aquamarine, golden-brown, and lavender toning adorns this fully struck Gem. Both sides are free from perceptible detractions. Only 625 proofs were produced, and the associated business production was a mere 4,000 pieces. Housed in a green label holder. NGC ID# 27CD, PCGS# 3717

**3273** 1868 PR64 Cameo PCGS Secure. This is a sharp Choice proof with appreciable cameo contrast and no mentionable toning. Under a loupe, no distracting marks are visible. Cameo examples of the 1868 proof are elusive in high grade. Population: 25 in 64 (2 in 64+) Cameo, 31 finer (including 1 in 65+ Deep Cameo) (5/18). NGC ID# 27CE, PCGS# 83718

**3274** 1870 PR65 PCGS Secure. This is a sharp Gem proof struck from an early die state with no excessive die polishing evident. Original rose-gold, amber, lilac, and olive hues adorn the mirrored, well-preserved surfaces of this eye-appealing proof type coin. NGC ID# 27CF, PCGS# 3721

**3275** 1872 PR65 PCGS Secure. The series-low mintage of 1,000 circulation strike makes the 1872 three cent silver an elusive issue in business-strike format. Fortunately, 950 proof examples were also struck for collectors, including this sharply detailed Gem, notable for its marvelous multicolor toning that includes shades of rose, blue, and golden-brown. Population: 48 in 65 (3 in 65+), 24 finer (4/18). NGC ID# 27CH, PCGS# 3723

- 3276** 1873 PR63 Cameo PCGS Secure. The design elements of this attractive Select proof are sharply detailed, with a frosty texture that contrasts boldly with the deeply mirrored fields to create a dramatic cameo effect. Only minor signs of contact are evident on close inspection. Population: 14 in 63 Cameo, 66 finer (5/18). NGC ID# 27CJ, PCGS# 83724

## THREE CENT NICKELS

### 1868 Three Cent Nickel, MS66+ Only One Coin Finer at PCGS

- 3277** 1868 MS66+ PCGS. CAC. The 1868 issue in this underappreciated series is scarce in MS66 and rarely offered finer. CAC-approved coins are in the minority. This Plus-graded example displays softly frosted luster and light golden toning. The Liberty portrait is sharp, although minor weakness occurs on the central Roman numerals. Light clash marks are visible on each side. Population: 60 in 66 (4 in 66+), 1 finer. CAC: 17 in 66, 2 finer (5/18). NGC ID# 2756, PCGS# 3734

- 3278** 1869 MS66 NGC. Tied for the finest certified, this Premium Gem exhibits brilliant-gray surfaces and bold design motifs with excellent eye appeal. Census: 18 in 66 (2 in 66+), 0 finer (5/18). NGC ID# 22NL, PCGS# 3735

- 3279** 1884 AU53 ANACS. An important issue in the three cent nickel series from a mintage of 1,700 circulation strike coins. An additional 3,942 proofs were minted. This piece survives from the former category, exhibiting light gray surfaces and minor toning spots. *From The Emily A. Blake Collection.* NGC ID# 2766, PCGS# 3752

### 1884 Three Cent Nickel, MS61 A Rarity in Mint State

- 3280** 1884 MS61 ANACS. The second-lowest circulation strike mintage in the three cent nickel series belongs to the 1884, at only 1,700 pieces. This issue survives primarily in circulated grades. Mint State examples are rare, with only 31 such pieces certified in all grades by PCGS and NGC combined. This ANACS coin displays a sharp strike and satiny olive-gold toning. Surprisingly few abrasions are present for the grade.

*From The Emily A. Blake Collection.* NGC ID# 2766, PCGS# 3752

## PROOF THREE CENT NICKELS

- 3281** 1868 PR66 Ultra Cameo NGC. CAC. Relatively few proof 1868 three cent nickels have been designated as Ultra or Deep Cameos. This Premium Gem is a conditionally rare example, and only four finer coins are reported by NGC and PCGS combined. The strike is sharp, and the brilliant surfaces offer stark cameo contrast. Census: 5 in 66 Ultra Cameo (1 in 66+), 4 finer. CAC: 17 in 66, 0 finer (4/18). NGC ID# 3L2N, PCGS# 93764

- 3282** 1869 PR66+ Cameo NGC. Approximately 600 proof three cent nickels were struck in 1869. This Plus-graded Premium Gem survivor exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces include deeply mirrored fields that contrast boldly with the frosty devices. Census: 39 in 66 Cameo (2 in 66+, 3 in 66★), 3 finer (5/18). NGC ID# 275P, PCGS# 83765

- 3283** 1869 PR66 Deep Cameo PCGS. CAC. Frosty design elements are set against a deeply mirrored back drop, with only a few tiny strike-throughs (as made) on Liberty's cheek. The coin appears brilliant at first glance, though closer examination reveals a hint of golden color over each side. Population: 21 in 66 (4 in 66+) Deep Cameo, 2 finer. CAC: 17 in 66, 0 finer (5/18). NGC ID# 275P, PCGS# 93765

### 1875 Three Cent Nickel, PR66+ Cameo None Certified Finer

- 3284** 1875 PR66+ Cameo NGC. CAC. The combination of bold field-device contrast, complete brilliance, and a razor-sharp strike explains the appeal of this amazing Premium Gem Cameo three cent nickel. From a reported mintage of 700+ proofs. There are none graded numerically finer at either service. Census: 6 in 66 Cameo (1 in 66+, 1 in 66★), 0 finer. CAC: 10 in 66, 0 finer (4/18). NGC ID# 22NV, PCGS# 83771

### 1877 Three Cent Nickel, PR64 Lovely Pastel Toning

- 3285** 1877 PR64 PCGS. The popularity of the 1877 three cent nickel stems from this being a proof-only production year. Coinage amounted to only 900 pieces, making the 1877 the single lowest-mintage date in the series, proofs and circulation strikes combined. This Choice example displays sharp devices and reflective fields. Lovely rose-gold and lilac hues tint each side.

*From The Emily A. Blake Collection.* NGC ID# 275X, PCGS# 3773

- 3286** 1881 PR66 Ultra Cameo NGC. This spectacular Premium Gem displays a full strike and impressive field-device contrast, unhindered by toning. A threadlike lint mark appears at the tip of Liberty's nose, as struck. Census: 1 in 66 Ultra Cameo, 3 finer (5/18). NGC ID# 2763, PCGS# 93777

- 3287** 1883 PR67+ Cameo NGC. CAC. A limited mintage of circulation strikes (just 4,000 pieces) is outnumbered by the 6,609 proofs issued for the 1883 three cent nickel, pressuring proofs to fill openings in high-grade date sets. This Superb Gem Cameo proof is suitably high-end for such purposes and displays both the NGC Plus designation and the CAC green label. Brilliant with a faint blue sheen over the mirrored fields, the strike is first-rate and the surfaces are essentially without fault. Finer pieces are only subjectively so. Census: 23 in 67 Cameo (1 in 67+, 1 in 67 ★), 6 finer. CAC: 41 in 67, 1 finer (4/18). NGC ID# 2765, PCGS# 83779
- 3288** 1886 PR67 Cameo NGC. The Philadelphia Mint struck 4,290 three cent nickel proofs in 1886, but no circulation strikes. This issue is a must-have for date collectors. Brilliant and modestly mirrored, this Superb Gem Cameo is sharply struck and free of distractions. The eye appeal is outstanding. Among the finest pieces at NGC. Census: 19 in 67 Cameo (3 in 67+, 1 in 67 ★), 0 finer (4/18). NGC ID# 5E5Y, PCGS# 83782
- 3289** 1886 PR67 Cameo PCGS Secure. This proof-only Superb Gem offers a bold strike and brilliant surfaces. The wreath and portrait contrast with smooth, lustrous fields. A few tiny flecks inside the wreath deny perfection. Population: 30 in 67 (1 in 67+) Cameo, 0 finer (5/18). NGC ID# 5E5Y, PCGS# 83782
- 3290** 1887/6 FS-302 PR66 Cameo NGC. CAC. A blatant overdate, and the 8s are also repunched. A normal date proof variety is also known. A well-struck and lustrous specimen with a pristine appearance and light, original chestnut-gold toning. Small strike-throughs are noted near the right ribbon end. Census: 33 in 66 Cameo (3 in 66+, 1 in 66★), 12 finer. CAC: 31 in 66, 9 finer (5/18). NGC ID# 276A, PCGS# 83784
- 3291** 1887 PR66+ NGC. This Plus-graded Premium Gem proof exhibits well-detailed design elements, with some incomplete detail on the wreath, due to lapping. The virtually pristine surfaces display reflective fields with subtle hints of emerald-green toning. Census: 36 in 66 (1 in 66+), 5 finer (5/18). NGC ID# 276A, PCGS# 3783
- 3292** 1889 PR67 Cameo PCGS Secure. CAC. This Superb Gem Cameo is well-contrasted and brilliant, showing silver-white luster and sharp motifs. The 1889 is the final issue in the three cent nickel series and is popular as a type coin. Cameo proofs are rare this fine, and no Deep Cameos are reported. Population: 28 in 67 (4 in 67+) Cameo, 1 finer. CAC: 20 in 67, 1 finer (4/18). NGC ID# 22NW, PCGS# 83786

## SHIELD NICKELS

- 3293** 1866 Rays MS65 PCGS. Delicate champagne toning tints the Gem surfaces of this Rays type coin, complementing satiny mint luster. Slight strike weakness is visible on the horizontal shield lines and a few stars. Finer examples are elusive. *From The Emily A. Blake Collection.* NGC ID# 22NX, PCGS# 3790
- 3294** 1866 Rays MS65+ PCGS. CAC. The date is repunched on this piece, most noticeably at the top of the 1 and 8. Strike doubling appears on the bottom of the date numerals. This variety is similar to FS-305, but the date placement is slightly further right. This high-end Gem Rays Shield nickel displays a sharp strike and champagne-tinted satin luster. Numerous radial die cracks are visible around the obverse border. NGC ID# 22NX, PCGS# 3790
- 3295** 1866/1866 Rays, Clashed Reverse, Repunched Date, FS-901, MS64 PCGS. All four date digits are repunched, but specialist attention is focused on the mysterious triple row of narrow clash marks below the large 5. An internal cud between the ME in AMERICA is also of interest. Lustrous, lightly toned, and well-preserved. The centers lack a full impression. FS-901 Population: 3 in 64, 0 finer (4/18).  
Ex: Baltimore Signature (Heritage, 3/2009), lot 7830, which realized \$1,610.  
*From The Emily A. Blake Collection.* NGC ID# 22NX, PCGS# 405716 Base PCGS# 3790

**3296** 1868 MS66 PCGS. CAC. A scarce Premium Gem example of this early No Rays issue, showing champagne-tinted satin luster and well-preserved surfaces. Slight strike weakness is seen on the shield lines and the stars. On the reverse, small but prominent die gouges are protrude from most of the relief design elements into the field. Population: 42 in 66 (5 in 66+), 2 finer. CAC: 11 in 66, 0 finer (5/18). NGC ID# 22P2, PCGS# 3795

**3297** 1873 Open 3 MS65 PCGS. A sharp Open 3 coin with satiny luster and no toning. The Gem-quality surfaces are free of distractions. As usual for the Shield nickel type, this piece displays a number of peripheral die cracks, mostly on the obverse. Finer Open 3 coins are rare. Population: 45 in 65 (7 in 65+), 12 finer (5/18).  
*From The Emily A. Blake Collection.* NGC ID# 22P8, PCGS# 3800

**3298** 1873 Open 3, Doubled Die Obverse, FS-1103, MS65 PCGS. The upper obverse is widely die doubled south. *Cherrypickers'* states "extremely strong doubling is clearly visible at the annulet, cross, and leaves," not to mention the horizontal shield lines. As of (4/18), PCGS has certified only two examples as FS-1103, in the VF35 and AU53 grades. This well-struck, coruscating, and minimally marked Gem is housed in a green label holder.  
*From The Emily A. Blake Collection.* PCGS# 569426 Base PCGS# 3800

**3299** 1875 Doubled Die Obverse, FS-103, MS65 PCGS. An interesting combination doubled die and repunched date, prominently doubled on the annulet with a secondary image of a 5 to the north of the main one. Numerous spindly obverse die cracks provide additional diagnostics. This lustrous Gem is lightly toned in lime-green and pink-red hues. As of (5/18), PCGS has certified just two pieces as FS-103, one as VF20 and another as AU53.  
*From The Emily A. Blake Collection.* PCGS# 38407 Base PCGS# 3804

## 1879 Shield Nickel, MS64 Low-Mintage Issue

- 3300** 1879 MS64 PCGS. Only 25,900 Shield nickels were struck in 1879, marking the second-lowest annual circulation coinage of the series. Uncirculated survivors of this date are moderately elusive. This Choice example displays champagne-tinted satin luster and sharp design elements. No major abrasions are observed. Population: 31 in 64, 59 finer (4/18).  
*From The Emily A. Blake Collection.* NGC ID# 5KWK, PCGS# 3808

**1879 Shield Nickel, MS65  
Old Green Label Holder**

**3301 1879 MS65 PCGS.** Gem examples of this low-mintage issue are highly sought-after, and finer pieces are rare. The 1879 Shield nickel's mintage of 25,900 coins is the second-lowest in the series, following that of the key-date 1880 at 16,000 coins. The 1879 carries a strong premium in all grades as a series semikey. This MS65 coin displays sharp devices and satiny, untoned mint luster. Housed in an old green label holder. Population: 29 in 65 (1 in 65+), 30 finer (4/18).

*From The Emily A. Blake Collection.* NGC ID# 5KWK, PCGS# 3808

**3302 1880 Good 4 PCGS.** With a mintage of only 16,000 pieces, the 1880 Shield nickel is the undisputed key date in the series. Although well-worn, this problem-free collector coin shows the remnant of a small "island" of raised medal below the base of the second T in STATES, diagnostic of circulation strikes. IN GOD WE TRUST is weak, but other design elements show boldly. Each side has uniform slate-gray color. Population: 7 in 4, 88 finer (5/18).

*From The Emily A. Blake Collection.* NGC ID# 276E, PCGS# 3810

**1882 Shield Nickel, MS67  
None Seen Numerically Finer**

**3303 1882 MS67 PCGS Secure.** From a mintage of more than 11.4 million pieces, the 1882 Shield nickel is an available issue in lower grades, but examples in MS67 condition are rare, and none have been seen in higher numeric grades (5/18). This spectacular Superb Gem offers sharply detailed design elements and virtually flawless surfaces, with vibrant mint luster and highlights of lavender and pale gold toning. Some fine peripheral die cracks are evident on both sides. Population: 10 in 67 (1 in 67+), 0 finer (4/18). NGC ID# 276Y, PCGS# 3812

**3304 1883/2 FS-301 AU58 NGC.** The most prominent among the five recognized 1883/2 obverses. The knob, corner, and right curve of the underdigit 2 is apparent. FS-301 is the Guide Book 1883/2 overdate variety, and also significantly scarcer than FS-303. This slate-gray near-Mint example is well-struck and offers smooth and satiny surfaces.

*From The Emily A. Blake Collection.* NGC ID# 22PD, PCGS# 38416 Base PCGS# 3814

**3305 1883/2 FS-302 AU50 NGC.** The bold diagonal die crack above the date confirms the late die state of this scarce overdate variant. The "point" of the 2 is apparent southwest of the lower knob of the 3. An original chestnut-gold example with moderate peripheral carbon and generally unmarked surfaces. NGC ID# 22PD, PCGS# 38413 Base PCGS# 3814

**3306 1883/2 FS-302 MS63 PCGS.** FS-302 is the second-most prominent 1883/2 variety. Fragments of the underdigit 2 include the knob, curve, and corner. A diagonal die crack from the ball to the 3 locks in the attribution. The variegated silver-gray surfaces are sharply struck and virtually void of contact. Certified in an old green label holder.

*From The Emily A. Blake Collection.* NGC ID# 22PD, PCGS# 38413 Base PCGS# 3814

**3307 1883/2 FS-303 MS62 NGC.** The corner of the underdigit 2 is visible between the bases of the 83. Another remnant of the 2 is beneath the upper ball of the 3. Vibrant cartwheel luster traverses this sharply struck overdated final-year Shield nickel. Light silver-gray toning visits minimally marked surfaces. One slight obverse rim nick is seen at 9 o'clock. PCGS# 38414 Base PCGS# 3813

## PROOF SHIELD NICKELS

**3308 1866 Rays PR64 NGC.** The 1866 is the only plentiful With Rays proof Shield nickel, popular among type collectors. This Choice example displays razor-sharp detail and mirrored fields with a hint of light champagne toning overall. The devices are satiny, not producing any significant contrast. NGC ID# 276G, PCGS# 3817

**1866 Rays Shield Nickel, PR65  
First Generation Holder**

**3309 1866 Rays PR65 PCGS.** The 1867 With Rays proof Shield nickel is a famous rarity, leaving the 1866 issue as the only readily collectible proof of this type. Gem surfaces on this piece are razor-sharp but show only slight reflectivity in the fields. Each side has delicate champagne and pastel toning. Housed in a first generation holder. NGC ID# 276G, PCGS# 3817

**3310 1866 Rays PR63 Cameo NGC.** This is the single lowest-grade Cameo proof of this issue at NGC, although its contrast is strong and there are no distracting marks. Sharp devices complement the mirrored fields amid a delicate golden glow. This first-year proof is popular as a With Rays type coin, but Cameos are infrequently offered.

*Ex: Long Beach Signature (Heritage, 9/2007), lot 564, which realized \$1,380; Los Angeles Signature (Heritage, 8/2009), lot 245, which realized \$1,840.* NGC ID# 276G, PCGS# 83817

**3311 1866 Rays PR65 Cameo NGC.** There is some central softness on the inner shield lines and inner points of the rays, but the wreath, stars, and outer shield border are all razor-sharp on this Gem proof. The surfaces are untoned, allowing full appreciation of the starkly contrasted surfaces and deeply mirrored fields. Census: 24 in 65 Cameo, 37 finer; 1 in 65 Ultra Cameo, 9 finer (4/18). NGC ID# 276G, PCGS# 83817

**3312 1866 Rays PR65 Cameo NGC.** Merely 600 or so proofs were struck during the inaugural year of the Shield nickel in 1866. This is one of only two proof issues With Rays, the other is the very rare 1867. This contrasted Gem Cameo specimen is brilliant with a glimpse of champagne-gold patina near the left obverse border. A small toning spot is located adjacent to the second set of olive leaves on the left. Census: 24 in 65 Cameo, 37 finer (4/18). NGC ID# 276G, PCGS# 83817

**3313** 1870 PR65+ PCGS Secure. CAC. Green-gold toning on each side of this high-end Gem proof has hints of iridescence throughout, complementing sharp devices and reflective fields. Few CAC-approved coins are known this fine. CAC: 23 in 65, 6 finer (4/18). NGC ID# 276L, PCGS# 3824

**3314** 1872 PR66 Cameo NGC. CAC. Essentially untoned surfaces display strong field-motif variance. Fully struck throughout. Some tiny flecks are visible on each side. Census: 16 in 66 Cameo (1 in 66★, 1 in 66+★), 4 finer. CAC: 19 in 66, 0 finer (4/18).  
Ex: Summer FUN Signature (Heritage, 7/2009), lot 205, where it brought \$1,150.

*From The Reilly Cody Collection.* NGC ID# AMU4, PCGS# 83826

**3315** 1873 Closed 3 PR66 Cameo PCGS Secure. All 1873 proof Shield nickels have the Closed 3 logotype in the date. No Deep Cameos are certified, and this Premium Gem Cameo has few superiors. The coin is sharp and brilliant with modest contrast. No surface impairments or marks are seen, and the depth of mirroring is attractive. Population: 44 in 66 (3 in 66+) Cameo, 3 finer (4/18). NGC ID# 276P, PCGS# 83827

#### 1877 Nickel, Slate-Gray PR64 Proof-Only Shield Nickel Issue

**3316** 1877 PR64 PCGS. No circulation coinage of Shield nickels was performed in 1877, although the Philadelphia Mint did strike 900 proofs. This Choice example is razor-sharp and free of bothersome contact marks. Both sides have dusky slate-gray toning and satiny luster. Proof 1877 nickels often have satiny fields rather than the deeply mirrored fields seen on proofs of other dates.

*From The Emily A. Blake Collection.* NGC ID# 276U, PCGS# 3831

#### 1877 Shield Nickel, Mirrored PR65

**3317** 1877 PR65 PCGS. The Mint struck 900 proof Shield nickels in 1877 and no circulation-issue coins, making this the single lowest-mintage date in the series. This Gem proof is sharp and toned in delicate iridescent hues. No contact marks are visible, and the fields are more deeply mirrored than on many pieces we have seen. Housed in a first-generation holder.

*From The Tuxedo Park Collection.* NGC ID# 276U, PCGS# 3831

**3318** 1878 PR65 PCGS. CAC. Repunching is present within the lower loop of the second 8. Faint wheat-gold toning adorns this sharply struck and flashy Gem. A small spot beneath the second S in STATES serves as an identifier. A popular proof-only date. Encapsulated in a green-label holder. NGC ID# 276V, PCGS# 3832

**3319** 1878 PR66+ Cameo PCGS Secure. CAC. Unlike many examples of the proof-only 1878 nickel, this Premium Gem Cameo proof exhibits mirrored fields around the lustrous devices. Essentially brilliant with delicate champagne toning. Population: 28 in 66 (4 in 66+) Cameo, 7 finer. CAC: 12 in 66, 5 finer (5/18). NGC ID# 276V, PCGS# 83832

**3320** 1879/8 PR67 PCGS. Die fill within both loops of the 9 is associated with the scarce 1879/8 overdate. Per the *Guide Book*, “some consider this variety to be 1879, 9 Over 9,” but the overdate remains recognized by PCGS. Light wheat-gold toning graces both sides. Satiny, intricately struck, and pristine. A lint mark (as made) is located beneath the C in AMERICA. Housed in a green label holder. NGC ID# 22PG, PCGS# 3834

**3321** 1882 PR67 Cameo PCGS Secure. This delightful Superb Gem proof exhibits sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. The surfaces are impeccably preserved, with delicate highlights of lavender and green toning. Population: 25 in 67 Cameo, 1 finer (5/18). NGC ID# 5EBF, PCGS# 83837

**3322** 1883 PR67+ NGC. CAC. The first of three nickel types struck in 1883, this Shield nickel is razor-sharp and frosty on the devices with mirroring in the fields. Both sides display attractive lavender-gold and lilac-blue color. Census: 49 in 67 (1 in 67+, 2 in 67★), 1 finer; 14 in 67 Cameo, 0 finer. CAC: 22 in 67, 0 finer (4/18). NGC ID# 276Z, PCGS# 3838

## LIBERTY NICKELS

#### 1885 Liberty Nickel, MS63 Attractive Example of This Key Date

**3323** 1885 MS63 PCGS Secure. This Select 1885 Liberty nickel is well-struck throughout the stars and wreath, which typically show weakness on this design type. Satiny surfaces offer light golden toning and have only a few light grazes that limit the grade. The only singular abrasion is a small mark below Liberty's eye. The 1885 nickel is a key date in the series, in demand at all levels of preservation. NGC ID# 2773, PCGS# 3846

**3324** 1886 MS62 PCGS Secure. The 1886 is the second key of the Liberty nickel business strikes, trailing only the 1885 in importance. The 1912-S has a much lower mintage but was saved in slightly greater numbers. A lustrous stone-white example with a few minor strike-throughs in the central reverse field. Both borders display many die cracks, most prominent near the U in UNITED. NGC ID# 277U, PCGS# 3847

**3325** 1893 MS66 PCGS. CAC. Splendid apple-green, rose-red, and dove-gray hues blanket each side of this Premium Gem 1893 nickel. A few obverse stars lack full definition, but the corn ear to the left of the wreath bow is unusually well-defined. Population: 38 in 66 (5 in 66+), 1 finer. CAC: 17 in 66, 2 finer (5/18).  
Ex: Long Beach Signature (Heritage, 9/2015), lot 3282; Central States Signature (Heritage, 4/2016), lot 3939, which realized \$1,762.50. NGC ID# 2778, PCGS# 3854

**3326** 1894 MS66+ PCGS Secure. A conditionally elusive Premium Gem example, and a rarity with the Plus designation. This high-end 1894 Liberty nickel displays softly frosted luster and a hint of champagne toning. Strike weakness occurs on the lower-left wreath and the stars above Liberty's head. Population: 43 in 66 (9 in 66+), 1 finer (5/18). NGC ID# 2779, PCGS# 3855

- 3327** 1897 MS66 PCGS. CAC. No part of this Premium Gem nickel is poorly struck, and the brilliant silver surfaces show a vibrant cartwheel effect without distracting abrasions. The 1897 Liberty nickel in this grade is scarce, and finer examples are almost unknown. Few Superb Gems are CAC approved. Population: 31 in 66 (5 in 66+), 1 finer. CAC: 10 in 66, 2 finer (4/18). NGC ID# 22PN, PCGS# 3858
- 3328** 1901 MS66+ PCGS. CAC. Type Two reverse, with AM fully separated. Frosty surfaces and light gold toning make a strong visual impression on this well-struck, high-end Premium Gem. A couple of minor grazes in the luster are noted. The 1901 nickel is a common date in most grades, but Premium Gem examples are elusive. Population: 84 in 66 (17 in 66+), 6 finer. CAC: 43 in 66, 4 finer (5/18). NGC ID# 277C, PCGS# 3862
- 3329** 1906 MS66+ PCGS Secure. CAC. A Superb Gem 1906 nickel is yet to be certified, making this Plus-graded Premium Gem tied for the finest known. Softly frosted mint luster yields warm champagne toning, and the strike is generally good. Under a loupe, a small area of unstruck planchet surface is visible above Liberty's ear and on the Roman numeral V, although there is not any mentionable detail lacking. Population: 36 in 66 (9 in 66+), 0 finer. CAC: 12 in 66, 0 finer (5/18). NGC ID# 277H, PCGS# 3867
- 3330** 1912-S MS65 PCGS Secure. The 1912-S represents the final year of the regular-issue Liberty design, from a small mintage of 238,000 pieces. This well-detailed Gem shows just a touch of softness on some of the stars and lower wreath. The lustrous surfaces exhibit no mentionable distractions. PCGS has graded 39 numerically finer examples (5/18). NGC ID# 277R, PCGS# 3875

### 1912-S Nickel, Satiny MS66 None Certified Finer

- 3331** 1912-S MS66 PCGS. With the 1912-S Liberty nickel, two characteristics are almost a certainty: weak strike and satiny luster. This piece upholds both reputations, being ill-defined on several stars and the lower-left wreath. But the level of preservation excels. The coin is conditionally rare and among the finest 1912-S nickels known to survive. Delicate lilac and champagne toning covers each side, and there are only two small marks on Liberty's cheek that prevent Superb Gem classification. Population: 39 in 66 (3 in 66+), 0 finer (4/18). NGC ID# 277R, PCGS# 3875

## PROOF LIBERTY NICKELS

- 3332** 1885 PR66+ Cameo PCGS Secure. Lovely champagne, lilac, and powder-blue hues merge across the mirrored fields and frosty devices of this high-end proof, yet leaving moderate cameo contrast on each side. The coin is fully struck and beautifully preserved. The 1885 date is popular among circulation strikes and proofs, with the latter format being more available in high grade for date collectors. Population: 56 in 66 (5 in 66+) Cameo, 17 finer; 3 in 66 (1 in 66+) Deep Cameo, 0 finer (4/18). NGC ID# 277T, PCGS# 83883
- 3333** 1894 PR67 PCGS Secure. A magnificent Superb Gem, with razor-sharp definition on all design elements and deeply mirrored fields that show a few highlights of emerald-green toning. The surfaces are impeccably preserved and eye appeal is terrific. Population: 4 in 67, 0 finer (5/18). NGC ID# 2784, PCGS# 3892

- 3334** 1901 PR66 Deep Cameo PCGS Secure. Deep Cameo proof coinage from the first few years of the 20th century are rare, regardless of the denomination. This Premium Gem Deep Cameo proof nickel exhibits brilliant gray surfaces with impressive field-to-device contrast. Population: 3 in 66 (1 in 66+) Deep Cameo, 3 finer (5/18). NGC ID# 278B, PCGS# 93899

- 3335** 1902 PR67 NGC. This is a brilliant, glittering Superb Gem proof with no mentionable distractions visible to the naked eye. The strike is virtually full, and the devices exhibit satiny luster. Proofs are rarely found this fine. Census: 17 in 67 (1 in 67★), 2 finer; 1 in 67 Cameo, 0 finer (5/18). NGC ID# 278C, PCGS# 3900

- 3336** 1905 PR67 PCGS Secure. CAC. Delicate lavender-blue and mint-green hues tint the interiors of this Superb Gem proof, while pastel shades of rainbow toning surround the borders. This is a sharp, beautifully preserved proof type coin with glimmering fields and a hint of contrast. Few 1905 proofs are certified this fine with CAC approval. Population: 31 in 67 (4 in 67+), 2 finer; 5 in 65 Cameo, 0 finer. CAC: 20 in 67, 2 finer (4/18). NGC ID# 278F, PCGS# 3903

- 3337** 1907 PR67 PCGS. CAC. This CAC-approved Superb Gem is closer to a Cameo designation than most 1907 proof nickels, showing mirrored fields and smooth, satiny motifs. A blend of champagne and ice-blue toning adds color to each side. None are finer at either service. Population: 33 in 67 (8 in 67+), 0 finer. CAC: 17 in 67, 0 finer (4/18). NGC ID# 278H, PCGS# 3905

- 3338** 1910 PR67 PCGS Secure. The 1910 proof Liberty nickel is scarce in PR67 and rare finer. This piece stands out from its peers with beautiful old-time toning that includes lavender, lilac, and orange-gold interiors surrounded by yellow-gold and mint-green borders. Fully struck devices are frosty and might have received a finer grade were it not for the colorful patina. NGC ID# 278L, PCGS# 3908

- 3339** 1910 PR67 PCGS Secure. CAC. A conditionally rare example with the CAC green label, this Superb Gem proof 1910 Liberty nickel boasts a full strike and delicate pastel toning. The fields glimmer with reflectivity, but no significant cameo contrast is produced. Still, eye appeal is outstanding. NGC ID# 278L, PCGS# 3908

## BUFFALO NICKELS

- 3340** 1913-D Type One MS67 PCGS. Vibrant gold and light blue toning appear on both sides of this incredible Superb Gem that exhibits a full strike and brilliant underlying mint luster. Population: 83 in 67 (8 in 67+), 2 finer (5/18). NGC ID# 22PX, PCGS# 3916
- 3341** 1913-S Type One MS66 PCGS. CAC. This first-year Premium Gem exhibits razor-sharp definition on all design elements, and the virtually pristine surfaces emit unbroken satiny mint luster, under delicate shades of ice-blue and pale gold toning. PCGS has graded 30 numerically finer examples (5/18). NGC ID# 22PY, PCGS# 3917

- 3342** 1913-D Type Two MS66 PCGS. Subdued golden-brown surfaces mask the underlying luster on this attractive Premium Gem that exhibits splashes of gold toning at the peripheries. NGC ID# 254M, PCGS# 3922
- 3343** 1913-S Type Two MS64 PCGS. CAC. An attractive near-Gem of the scarce Type Two design issued late in the first year of Buffalo production. This piece is highly lustrous with satin surfaces and vibrant orange and blue toning. NGC ID# 22R3, PCGS# 3923

- 3344** 1913-S Type Two MS65 PCGS Secure. Warm golden toning graces the luminous satin luster of this high-end Choice 1913-S Type Two Buffalo nickel. Under magnification, abrasions are difficult to discern, although some microscopic pepper specks are visible on the reverse. The strike is slightly soft in the centers. NGC ID# 22R3, PCGS# 3923

**3345** 1913-S Type Two MS65 NGC. Apple-green, rose-red, and wheat-gold toning endows this introductory-year Gem. The strike is good, as only the hair above the Indian's braid lacks crisp definition. The surfaces are clashed but appear unabraded. A key date in all grades, the Type Two 1913-S is essentially tied with the 1931-S as the second-lowest mintage Buffalo nickel. Just over 1.2 million pieces were produced, and survivors are pursued in all grades. Housed in a circa-2000 holder. Census: 65 in 65, 17 finer (4/18).

Ex: FUN Signature (Heritage, 1/2004), lot 5301, which realized \$2,645. NGC ID# 22R3, PCGS# 3923

**3346** 1914-D MS65 PCGS. CAC. Sea-green, ice-blue, and orange-gold toning enriches lustrous, unabraded, and nearly carbon-free surfaces. The strike is good, though the centers lack a complete impression. Only a small percentage of certified Gems have been confirmed by CAC. Housed in a green-label holder. CAC: 40 in 65, 27 finer (5/18). NGC ID# 22R5, PCGS# 3925

**3347** 1914-S MS65 PCGS. Pale-gold accents warm the nickel-gray surfaces of this Gem 1914-S Buffalo nickel. The strike is sharp (but not full), with strong definition on the upper hair strands and a bold date. Attractive, textured fields show minimal tiny, inconsequential marks. PCGS reports just 46 numerically finer examples (5/18).  
Ex: FUN Signature (Heritage, 1/2006), lot 1499. NGC ID# 22R6, PCGS# 3926

**3348** 1915-D MS65 PCGS. This satiny Gem displays warm golden toning with deeper lilac and amber hues throughout. The bison's shoulder and the hair above the Indian's braid show the usual strike weakness of Denver issues from this period. No major abrasions are seen. Higher-grade 1915-D nickels are scarce. NGC ID# 22R8, PCGS# 3928

**3349** 1915-D MS65 PCGS. The hallmark of this Gem 1915-D nickel is the glistening original mint luster that shows delicate iridescence and exceptional eye appeal. The usual central strike weakness occurs on both sides but is not distracting. Finer pieces are elusive. NGC ID# 22R8, PCGS# 3928

**3350** 1915-D MS65 PCGS. CAC. This Gem CAC coin has a tinge of champagne color but appears silver at first glance. No abrasions are worthy of note, and eye appeal is outstanding. Under a loupe, some minor strike weakness is seen on the tip of the upper feather and on the bison's shoulder. Finer 1915-D nickels are scarce. NGC ID# 22R8, PCGS# 3928

### 1915-D Nickel, MS66 Lightly Toned

**3351** 1915-D MS66 PCGS. CAC. Frosty, glistening mint luster yields delicate champagne color on this beautifully preserved Premium Gem. On the obverse, strike softness is only seen on the tip of the upper feather, and the reverse shows weakness only on the bison's shoulder. The reverse is rotated approximately 30 degrees counterclockwise, as sometimes seen. Population: 43 in 66 (5 in 66+), 3 finer. CAC: 21 in 66, 0 finer (4/18).

Ex: FUN Signature (Heritage, 1/2014), lot 3819, which realized \$5,287.50. NGC ID# 22R8, PCGS# 3928

**3352** 1915-S MS64 ANACS. Graded MS64 but far more appealing and cleaner than many other 1915-S nickels we have seen in this grade. Light golden toning warms glistening mint luster, and the design elements are sharp. Minor strike doubling is evident on the Indian's portrait. NGC ID# 22R9, PCGS# 3929

### 1915-S Nickel, Boldly Struck MS65

**3353** 1915-S MS65 PCGS. CAC. The low-mintage 1915-S is the first issue in the popular Buffalo nickel series that is truly difficult to locate in higher Mint State grades. This is a well-struck coin that shows no particular areas of weakness; even LIBERTY is uncommonly sharp. The satiny luster is partially subdued by an overlay of moderate gray patina that shows antique-golden overtones toward the border areas. PCGS has certified 38 finer examples (5/18). CAC: 29 in 65, 11 finer (5/18).  
Ex: Long Beach Signature (Heritage, 6/2004), lot 5683. NGC ID# 22R9, PCGS# 3929

**3354** 1916-D MS65 PCGS. An ambitious Denver mintage of more than 13 million pieces was not always of the highest quality, with the centers often lacking a full strike. This Gem 1916-D is a trifle weak above the braid knot and at the bison's shoulder, although the outer elements are generally well-struck. Reddish-gold toning surrounds lilac-gray interiors with faint blue highlights. Slight graininess near the margins suggests a worn state of the dies. PCGS has certified just 22 pieces in a finer numeric grade (4/18). NGC ID# 22RB, PCGS# 3932

**3355** 1916-D MS65 PCGS. This is an exceptionally well-preserved coin with satiny luster and light golden toning. Some die erosion is evident in the fields but not to the extent seen on many other branch mint Buffalo nickels of this period. Moderate strike weakness appears on the central high points. The 1916-D is available in this grade but rare finer. Housed in an old green label holder. PCGS lists 22 numerically finer representatives (4/18).

From The Tuxedo Park Collection. NGC ID# 22RB, PCGS# 3932

**3356** 1916-S MS65 PCGS. Delicate highlights of ice-blue and champagne-gold toning blanket the well-preserved surfaces of this attractive Gem, with sharply detailed design elements and vibrant mint luster underneath. PCGS has graded 43 numerically finer examples (5/18). NGC ID# 22RC, PCGS# 3933

**3357** 1916-S MS65 PCGS. Bright luster engulfs this Gem 1916-S nickel. The obverse has a bit of golden toning near the upper border, while the reverse deepens in color from light gold on top to sunset red near the exergue. Sharpness is lacking, as usual for this issue, but the luster, eye appeal, and relative lack of abrasions carry the grade. Like the plate coin in the Lange reference on the Buffalo nickel series, this piece features strong clash marks, with both the profile of the bison and parts of E PLURIBUS UNUM impressed on the obverse. NGC ID# 22RC, PCGS# 3933

**3358** 1917-S MS63 PCGS. This is a boldly struck Select example with satin luster and a hint of iridescent toning. No major abrasions are visible despite the grade. The 1917-S is elusive in the upper Mint States grades but is readily accessible at the current level.

From The Bob Williams Collection. NGC ID# 22RF, PCGS# 3936

**1917-S Nickel, MS65  
Exemplary Preservation**

**3359 1917-S MS65 PCGS. CAC.** Light butter-gold, lilac, and tan-gold toning visits highly lustrous and mark-free surfaces. A tiny lamination at 4 o'clock on the reverse provides the sole apparent imperfection. The strike is good save for blending near the hair braid. Clashed beneath the Indian's jaw, and opposite near PLURIBUS. A conditionally challenging branch mint issue. Fewer than 10% of certified Gems have received a CAC seal. CAC: 11 in 65, 5 finer (5/18). NGC ID# 22RF, PCGS# 3936

**3360 1918 MS66 PCGS Secure.** Lavender-gold, ice-blue, and champagne hues merge throughout much of each side, while the obverse borders also show tinges of deeper rainbow toning. This Premium Gem 1918 nickel is beautifully preserved, satiny, and luminous. Trivial strike weakness is seen only the bison's shoulder and the hair above the Indian's braid. Population: 82 in 66 (5 in 66+), 10 finer (4/18). NGC ID# 22RG, PCGS# 3937

**3361 1918-D MS65 NGC.** The 1918-D nickel is most famous for the overdate variety, although the normal date version is itself scarce in Gem condition and rare finer. This piece displays glistening, champagne-toned mint luster and has no distracting abrasions. Slight strike weakness occurs as usual on the bison's shoulder and the hair above the Indian's braid. Census: 27 in 65 (1 in 65★), 5 finer (5/18). NGC ID# 22RH, PCGS# 3938

**1918-D Nickel, MS65  
Only 30 Coins Finer at PCGS**

**3362 1918-D MS65 PCGS. CAC.** Beautifully toned in golden-champagne shades, the satiny surfaces show pinpoint striking definition that is particularly noteworthy for the issue. The smooth surfaces do full justice to the Gem grade. A find for the specialist who realizes that this D-mint nickel's population drops off markedly above the MS64 level. CAC: 16 in 65, 6 finer (5/18). NGC ID# 22RH, PCGS# 3938

**3363 1918-S MS63 PCGS.** An impressive Select specimen of this popular issue, with satiny mint luster on both sides and well-detailed design elements that show just a trace of softness on the hair above the ear and the bison's shoulder. NGC ID# 22RK, PCGS# 3940

**3364 1918-S MS63 PCGS Secure.** No wear is visible on this Select 1918-S nickel, and the satiny surfaces show delicate champagne tinting. Extensive die erosion in the fields and a deficient central strike uphold the reputation of this issue for being weakly struck. The 1918-S becomes increasingly elusive in finer grades.

*From The Bob Williams Collection.* NGC ID# 22RK, PCGS# 3940

**1918-S Buffalo Nickel, MS64  
Scarce in Near-Gem or Finer Conditions**

**3365 1918-S MS64 PCGS.** The 1918-S is one of the genuinely scarce S-mint Buffalo nickel issues in Uncirculated grades, comparing favorably in rarity to all but the 1926-S, where it is only marginally edged out. Both sides of this high-grade example exhibit thick, satiny luster, with appealing variegated pastel colors, and would be deserving of Gem status if just a bit sharper on the central details. No distractions are evident on either side of the coin. Housed in a previous generation green label holder. PCGS reports just 40 numerically finer examples (5/18).

Ex: *FUN Signature (Heritage, 1/2004)*, lot 5354. NGC ID# 22RK, PCGS# 3940

**3366 1919-D MS63 PCGS. CAC.** The obverse of this CAC-approved coin is sharp even while the bison's shoulder on the reverse has trivial softness. Moderate die erosion appears in the fields, but abrasions are minimal. Both sides of this 1919-D Buffalo nickel have uniform olive-gold toning.

*From The Bob Williams Collection.* NGC ID# 22RM, PCGS# 3942

**3367 1919-D MS64 NGC.** Dusky orange-gold, powder-blue, and olive-gray toning graces this unmarked and lustrous near-Gem. The strike is above average, especially on the bison's flank. An early and scarce branch mint issue. Certified in a circa-2000 holder. NGC ID# 22RM, PCGS# 3942

**3368 1919-S MS64 PCGS.** Fewer than 1% of all 1919-S nickels have a full strike, and even sharply struck coins are in the minority. This near-Gem example is mostly sharp, with slight weakness in the centers. The surfaces are smooth, lustrous, and semireflective in the fields, while attractive reddish-gold toning embellishes lilac-gray fields and devices. Housed in an old generation blue label holder with the barcode on the back. NGC ID# 22RN, PCGS# 3943

**3369 1920 MS66 PCGS.** This lustrous and attractively toned 1920 is sharply struck for the Philadelphia issue. The mintage was large — more than 63 million pieces — requiring many dies, where this Premium Gem example was certainly an early strike. Smooth, satiny fields surround crisply struck devices and rich golden shades merge into lavender and tan-gold central motifs. The eye appeal is terrific. PCGS reports just 18 numerically finer 1920 examples (4/18). NGC ID# 22RP, PCGS# 3944

**1920 Nickel, Lightly Toned MS66+  
Elusive CAC-Approved Example**

**3370 1920 MS66+ PCGS. CAC.** This is a satiny coin with peach-gold, lilac, and ice-blue toning over each side. Some central strike weakness is noted, but this is minor. The obverse is struck from a fresh die with little evidence of erosion, but the reverse shows the usual metal flowlines in the fields. The 1920 Buffalo nickel is only moderately scarce in MS66, but PCGS has seen just 18 finer examples. CAC: 41 in 66, 2 finer (5/18). NGC ID# 22RP, PCGS# 3944

**3371 1920-D MS64 PCGS. CAC.** An impressive Choice example of this popular branch mint issue, with well-detailed design elements and lightly marked, satiny surfaces. Low-intensity shades of ice-blue and pale gold toning deliver excellent appeal. NGC ID# 22RR, PCGS# 3945

**1920-S Buffalo Nickel, MS64  
Sharp for the Issue and Grade**

**3372 1920-S MS64 PCGS.** One of the great strike rarities of the series, the 1920-S is seldom sharp and essentially unavailable with full details. This example is far above average in that regard, although some flowlines and peripheral weakness exist. The centers are strong in comparison, with crisp hair definition and reasonably sharp details on the bison. Lustrous golden toning with vibrant, violet accents add substantially to the visual impression. PCGS reports just 28 numerically finer examples (5/18). NGC ID# 22RS, PCGS# 3946

**3373 1921 MS66 PCGS Secure.** This delightful Premium Gem exhibits sharp design elements and impeccably preserved, brilliant surfaces that radiate vibrant mint luster on both sides. PCGS has graded 32 numerically finer examples (5/18). NGC ID# 22RT, PCGS# 3947

**3374 1921-S AU58 PCGS Secure. CAC.** One of the semikey issues in the Buffalo series, the 1921-S is always in demand in any grade finer than Very Fine. This near-Mint representative exhibits a typical strike with delicate toning over virtually complete luster. *From The Bob Williams Collection.* NGC ID# 22RU, PCGS# 3948

**1921-S Nickel, MS64  
CAC Seal, Old Holder**

**3375 1921-S MS64 PCGS. CAC.** San Francisco silver dollar mintages peaked in 1921, to the detriment of the production of other denominations. The 1921-S mintage is only 1,557,000 pieces, and the issue is highly desirable in Choice Mint State. This lustrous and nicely struck example displays a hint of olive-green, straw-gold, and gunmetal toning. Exceptionally nice despite a tiny fleck beneath the U in UNITED. Certified in an old green label holder. CAC: 17 in 64, 12 finer (5/18). NGC ID# 22RU, PCGS# 3948

**3376 1923-S MS64 PCGS. CAC.** This date usually comes weakly struck, especially on the reverse, as a result of overextended die use. The present coin is an exception. The design elements are sharp, particularly on the peripheral elements. Only on the bison's head is some of the hair detail soft. Similar softness is noted on the tip of the tail, but the horn is strong. Lustrous surfaces are visited by wispy golden-brown patina. The only marks discernible on this near-Gem are a few ticks on the Indian's cheek and the bison's midsection. Ex: FUN Signature (Heritage, 1/2005), lot 5884. NGC ID# 22RW, PCGS# 3950

**3377 1924 MS66 NGC.** Powder-blue and lavender toning embrace this lustrous and virtually immaculate Premium Gem. The borders exhibit the orange-peel texture typical of long-in-use dies, but the strike is fairly sharp except across the right periphery. Housed in a circa-2000 holder. Census: 39 in 66 (1 in 66+, 1 in 66★), 3 finer (4/18). NGC ID# 22RX, PCGS# 3951

**1924 Buffalo Nickel, MS66+  
Only a Few Coins Known Finer**

**3378 1924 MS66+ PCGS Secure. CAC.** Delicate golden toning warms the satiny surfaces of this high-end Premium Gem, one of less than two dozen pieces in this grade to receive a CAC green label. Moderate strike weakness in the centers is not distracting, and die wear in the fields is minor. PCGS lists only seven finer representatives. CAC: 21 in 66, 5 finer (5/18). NGC ID# 22RX, PCGS# 3951

**3379 1924-D MS64 PCGS.** Lilac and olive colors enrich this lustrous and splendidly preserved near-Gem. Some softness of strike in the centers and on the top of the bison's head is characteristic of branch mint production from this era, however, the date, mintmark, and LIBERTY are bold.

Ex: Dallas Signature (Heritage, 12/20040 lot 5589. NGC ID# 22RY, PCGS# 3952

- 3380** 1924-D MS64 PCGS. CAC. Light gold-green toning visits the peripheries of this otherwise steel-gray near-Gem. Though the margins show significant die erosion, the horn is fully outlined and the lustrous surfaces are well-preserved.

*From The Bob Williams Collection.* NGC ID# 22RY, PCGS# 3952

**1924-D Nickel, Golden-Toned MS65  
Rarely Offered in Finer Grades**

- 3381** 1924-D MS65 PCGS. This satiny Gem is well-preserved and toned in warm golden hues. Denver issues of the 1920s are often weakly struck, and this 1924-D coin shows softness on the tip of the upper feather, the hair above the braid, and on the bison's head and shoulder. However, eye appeal is pleasing for the issue. PCGS lists only nine numerically finer representatives (4/18). NGC ID# 22RY, PCGS# 3952

**1924-D Buffalo Nickel, MS65  
Satiny and Attractive**

- 3382** 1924-D MS65 PCGS Secure. A satiny, well-preserved Gem with golden toning that yields hints of lavender. Some strike weakness is seen in the centers and at the left-hand border, for which Denver issues from this period are widely known. Gem examples of the 1924-D are scarce, and finer coins are rare. PCGS has certified just nine numerically finer examples (5/18). NGC ID# 22RY, PCGS# 3952

**1924-S Nickel, MS62  
Smooth Series Semiky**

- 3383** 1924-S MS62 PCGS Secure. The 1924-S ranks among the rarest regular issues of the popular Buffalo type. From the mintage of 1,437,000 pieces, a majority of survivors are in Fine or lower grades. This representative has a soft impression in the centers and on the bison's tail, along with a small wedge-shaped lamination west of the UN in UNUM. But the technical quality is exceptional, since the coruscating cream-gray surfaces appear void of carbon or contact.

*From The Bob Williams Collection.* NGC ID# 22RZ, PCGS# 3953

- 3384** 1925-D MS64 PCGS Secure. This is an exceptionally smooth, luminous example for the grade, showing warm golden toning and no distractions. Under a loupe, strike weakness is visible mainly on the bison's shoulder and head, although some softness also appears on the Indian's hair. The 1925-D is elusive in finer grades. NGC ID# 22S3, PCGS# 3955

- 3385** 1925-D MS64 PCGS Secure. The 1925-D is a challenging issue in high grade and with a sharp strike. This attractive Choice specimen offers well-detailed design elements, with slight softness on the bison's shoulder, and well-preserved lustrous surfaces, with a few highlights of greenish-gold toning.

*From The Bob Williams Collection.* NGC ID# 22S3, PCGS# 3955

- 3386** 1925-D MS64 PCGS. CAC. This attractive Choice Buffalo nickel is mostly well-detailed, with just a touch of the usual softness on the hair above the braid and on the bison's shoulder. The well-preserved, lustrous surfaces display attractive shades of champagne-gold and powder-blue toning. NGC ID# 22S3, PCGS# 3955

- 3387** 1925-S MS63 PCGS. Rose-red, apple-green, and butter-gold toning ensures the eye appeal of this coruscating better-date nickel. Impressively free from contact, and carbon is equally absent. The strike is above average, though a feather tip and the 19 in the date are incompletely brought up. Encapsulated in an old green-label holder. NGC ID# 22S4, PCGS# 3956

- 3388** 1925-S MS64 NGC. From a mintage of 6.2 million pieces, the 1925-S Buffalo nickel is an elusive issue in high grade. This sharply detailed Choice example offers well-preserved, lustrous surfaces, with a few subtle hints of pale gold and ice-blue toning. NGC has graded 26 numerically finer examples (5/18). NGC ID# 22S4, PCGS# 3956

- 3389** 1925-S MS64 PCGS Secure. CAC. An important condition rarity in the Buffalo nickel series, this Choice Mint State piece has brilliant light gray surfaces with full satin luster and a typical strike for the issue. PCGS has only certified 32 finer examples (5/18).

*From The Bob Williams Collection.* NGC ID# 22S4, PCGS# 3956

**1926-D Nickel, MS65  
Lustrous and Nicely Struck**

- 3390** 1926-D MS65 PCGS. CAC. Any branch mint issue from the 1920s is a better date, and the 1926-D is no exception. Most examples remained in commerce until the date was worn smooth, and the typical Uncirculated piece grades between MS62 and MS64. The present Gem attains that distinction because of its vibrant mint luster and above-average strike. Apple-green and rose-red hues overlie unabraded stone-gray surfaces. CAC: 16 in 65, 12 finer (5/18). NGC ID# 22S6, PCGS# 3958

**1927-S Nickel, Toned MS64  
Scarce Finer**

- 3391 **1927-S MS64 PCGS Secure.** Tinges of green and red appear throughout mainly olive-gold toning on this Choice 1927-S nickel. The strike is remarkably sharp for the issue, and die erosion in the fields is minimal. This San Francisco issue is plentiful in MS64, but PCGS lists only 40 finer submissions (5/18), which may include duplications. NGC ID# 22SA, PCGS# 3962

**1927-S Nickel, MS64  
Important Condition Rarity**

- 3392 **1927-S MS64 PCGS. CAC.** Although overshadowed by the key 1926-S nickel, the 1927-S is an important condition rarity in the Buffalo series with few finer Gem examples graded by PCGS or NGC. This near-Gem piece, housed in a green-label PCGS holder, exhibits lustrous satin surfaces and tinges of blue and champagne toning. NGC ID# 22SA, PCGS# 3962

- 3393 **1928-S MS65 NGC.** Pale blue and violet toning appears on the satiny and lustrous surfaces of this Gem 1928-S nickel. Finer examples of this issue are seldom encountered. Census: 45 in 65 (1 in 65+, 1 in 65★), 12 finer (5/18). NGC ID# 22SD, PCGS# 3965

- 3394 **1928-S MS65 PCGS.** A pleasing band of rainbow toning extends from the margins onto the central motifs, which meld into pale-blue centers. This Gem Uncirculated example shows areas of die clashing on both sides, yet the devices are impressively well-struck. The colorful toning and sharp, unmarked surfaces give the coin outstanding eye appeal. Population: 87 in 65 (5 in 65+), 14 finer (4/18). NGC ID# 22SD, PCGS# 3965

- 3395 **1928-S MS65 PCGS.** A shimmering pearl-gray Gem with an uncommonly sharp strike on the centers of the major devices. Slight weakness on the tops of LIBERTY and STATES is of little importance. Virtually free from contact or carbon, and desirable to the specialist as such. Population: 89 in 65 (5 in 65+), 14 finer (5/18).  
*Ex: Central States Signature (Heritage, 5/2004), lot 6383, which realized \$4,140; FUN Signature (Heritage, 1/2005), lot 5914, which realized \$4,025.* NGC ID# 22SD, PCGS# 3965

- 3396 **1929-D MS66 NGC.** The 1929-D is a scarce issue in MS66 and rare finer. This Premium Gem displays satiny mint luster and warm gold, lavender, and ice-blue toning. Well-struck save for a touch of weakness on the tip of the upper obverse feather near the rim. No distracting abrasions are apparent. Census: 19 in 66 (1 in 66+), 3 finer (4/18). NGC ID# 3EDW, PCGS# 3967

- 3397 **1929-D MS66 PCGS Secure.** This Premium Gem exhibits satiny mint luster and delicate champagne toning with no distracting abrasions. Typical of the 1929-D, slight strike weakness occurs on the tip of the upper obverse feather, as well as on the reverse bison's head and shoulder. Higher-grade examples of this Denver issue are rare. Population: 71 in 66 (6 in 66+), 3 finer (4/18). NGC ID# 3EDW, PCGS# 3967

- 3398 **1929-D MS66 PCGS.** A well-defined example of this scarcer D-mint issue that shows an arc of russet and rose toning along the lower obverse periphery and blushes of similar coloration on the reverse. Typical Mint State representatives are usually limited to the MS62 to MS64 range because of striking deficiencies. PCGS has seen merely three finer submissions (5/18).  
*Ex: FUN Signature (Heritage, 1/2006), lot 1533, where it brought \$2,760.* NGC ID# 3EDW, PCGS# 3967

**1930 Nickel, Delicately Toned MS67  
Tied for Finest at Both Services**

- 3399 **1930 MS67 PCGS Secure.** This is a frosted and lustrous example, with ice-blue and nickel-gray surfaces that lack any significant or distracting marks. The smooth surfaces radiate plenty of gleaming mint luster. In keeping with most 1930 nickels, the strike is a trifle soft in the centers, yet this coin gains sharpness approaching the borders. Neither PCGS nor NGC have certified a numerically finer example. Population: 38 in 67 (1 in 67+), 0 finer (4/18). NGC ID# 22SH, PCGS# 3969

- 3400 **1931-S MS66+ PCGS Secure. CAC.** This lovely Premium Gem has beautiful pastel border toning around brilliant interiors, and the luster is incredibly frosted and luminous. No abrasions are seen, although moderate strike weakness occurs immediately above the Indian's braid and on the bison's shoulder, typical for the 1931-S nickel. PCGS lists only eight finer pieces (4/18). NGC ID# 22SK, PCGS# 3971

- 3401 **1934-D MS66 NGC.** Satiny luster illuminates light golden toning on this Premium Gem 1934-D nickel, among the finest pieces certified. Minor strike softness in the centers is typical of the issue. The die state is lightly flowlined toward the margins, and the obverse has a horizontally bisecting crack from 9 to 3 o'clock. Census: 20 in 66 (2 in 66+, 2 in 66★), 0 finer (5/18). NGC ID# 22SM, PCGS# 3973

- 3402 **1935-D MS66+ PCGS. CAC.** A splendid Premium Gem, this 1935-D nickel exhibits delicate champagne and blue toning over frosty mint luster. The strike is above average for this issue. CAC: 51 in 66, 2 finer (5/18). NGC ID# 22SP, PCGS# 3975

- 3403 **1935-D MS66+ PCGS. CAC.** The strike is far above average on this lovely Premium Gem. Both sides have frosty mint luster that shines through delicate blue and champagne toning. CAC: 51 in 66, 2 finer (5/18). NGC ID# 22SP, PCGS# 3975

**1935-S Nickel, Splendid MS67  
Immaculate Strike and Surfaces**

**3404** 1935-S MS67 PCGS. Shades of lilac, pale-gold, and ice-blue meld together in a vibrant-yet-natural display of color, while the razor-sharp strike exceeds expectations for the 1935-S. The intricate hair details on the portrait and outstanding definition throughout the bison's musculature and fur stand out against immaculate fields. Unsurprisingly, there are no numerically finer coins at either PCGS or NGC. Population: 45 in 67 (3 in 67+), 0 finer (4/18). NGC ID# 22SR, PCGS# 3976

**3405** 1936-D 3 1/2 Legs, FS-901, VF20 PCGS. Although less famous than its 1937-D Three-Legged successor, the FS-901 1936-D is much scarcer, and also listed in the *Guide Book*. The right front leg has a ghostly appearance, presumably due to enthusiastic die lapping at the Denver Mint. A lightly abraded cream-gray example with a hint of granularity on the upper-reverse border. NGC ID# 22ST, PCGS# 38471 Base PCGS# 93978

**1937-D Buffalo Nickel, MS67+  
Few Finer Pieces Are Known**

**3406** 1937-D MS67+ PCGS. CAC. The Three-Legged variety of this date is a major series key. The regular issue is a popular type coin. This Plus-graded, CAC-approved Superb Gem 1937-D Buffalo nickel displays a bold strike and luminous satin luster. Moderate die erosion in the fields and recesses is typical of the issue. Ice-blue, yellow, and green-gold toning cover each side, and no bothersome abrasions are visible. PCGS and NGC each lists three finer representatives (5/18). NGC ID# 22SW, PCGS# 3981

**3407** 1937-D Three-Legged, FS-901 — Cleaned — PCGS Genuine. Unc. Details. Rich apple-green toning dominates though the high points exhibit lilac-red hues. The lustrous surfaces are virtually void of abrasions, and no hairlines are apparent. An impressive example of the famous die lapping mint error. The surfaces are slightly bright but acceptable to most collectors.

*From The Bob Williams Collection.*

**1937-D Three-Legged Nickel, MS62  
Light, Even Toning**

**3408** 1937-D Three-Legged, FS-901, MS62 PCGS Secure. CAC. The surfaces are more attractive than one would expect from an MS62, which undoubtedly explains the CAC designation. The satiny surfaces are covered with an even layer of pale golden toning over each side. The strike details are remarkably strong for the issue. A faint dab of discoloration is seen just below the head of the bison, and when examined closely it is seen as nothing of consequence. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Nickel, MS63  
In an Old Holder**

**3409** 1937-D Three-Legged, FS-901, MS63 NGC. This satiny Select example displays deep olive-gold toning with mint-green and rose highlights. There is minor strike softness on the bison's shoulder and horn, as normal for the variety. No major abrasions are seen. A linear planchet lamination appears beneath the bison's belly. Housed in a prior generation holder. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Nickel, MS63  
Pastel Red and Gold Toning**

**3410** 1937-D Three-Legged, FS-901, MS63 PCGS. The reverse die was carelessly lapped in the process of removing a die defect or clash mark to create the famous Three-Legged nickel. We remain skeptical of Breen's assertion that an unfortunate "Mr. Young" was responsible, since no reliable confirmation has been found. This Select Uncirculated example displays satiny and nearly unblemished rose-red, butter-gold, and olive-gray surfaces. The bison's back leg is granular, diagnostic for this key variety. Ex: Orlando FUN Signature (Heritage, 1/2004), lot 5460; Long Beach Signature (Heritage, 9/2015), lot 3769. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

## PROOF BUFFALO NICKELS

**3411** 1913 Type Two PR66 PCGS. Lavender-red and gunmetal-blue centers cede to lightly toned butter-gold borders. The lustrous and well-struck surfaces are without evidence of carbon or contact. Certified in a green label holder.  
*From The Reilly Cody Collection.* NGC ID# 278S, PCGS# 3990

**3412** 1914 PR66 PCGS Secure. The bright surfaces of this Premium Gem proof are essentially untoned and devoid of mentionable contact marks or unsightly spots. Eye appeal is outstanding. The 1914 has a relatively high survival rate in top grades. NGC ID# 278T, PCGS# 3991

**3413** 1914 PR66 PCGS. Razor-sharp definition is evident on all design elements of this spectacular Premium Gem proof and the textured fields gleam with strong matte luster. No mentionable flaws are present and eye appeal is terrific.  
*From The Reilly Cody Collection.* NGC ID# 278T, PCGS# 3991

**3414** 1915 PR66 PCGS. Light gold toning resides on both sides of this boldly detailed Premium Gem matte proof Buffalo nickel. Both sides have a few of the tiny spots that are so often seen on these pieces but a glass is required to see them. Few opportunities arise to find a finer example with only 74 submissions receiving a higher grade at PCGS (4/18).

*Ex: Long Beach Signature (Heritage, 2/2011), lot 3283, where it realized \$2,185.*

*From The Reilly Cody Collection.* NGC ID# 278U, PCGS# 3992

### 1916 Nickel, Toned PR66 Only 600 Proofs Struck

**3415** 1916 PR66 PCGS. Pink-champagne and light golden appears over each side in a faint woodgrain pattern on this Premium Gem proof 1916 nickel, the last of the matte proof issues. Both sides boast a full strike and impeccable preservation. This issue has a mintage of only 600 pieces and is scarce in high grade.

*Ex: ANA Signature (Heritage, 10/2012), lot 3530.*

*From The Reilly Cody Collection.* NGC ID# 278V, PCGS# 3993

**3416** 1936 Type One — Satin Finish PR66 NGC. Struck in the early part of 1936, the Satin Finish proofs were difficult for many collectors to distinguish from high-end circulation strikes, although the quality of strike was substantially stronger and the surfaces were exceptionally smooth in comparison to non-proofs. This Premium Gem example is exemplary for the Type One finish. Razor-sharp definition accents the fine design details, while the satiny nickel-gray surfaces show subtle iridescence. NGC ID# 278X, PCGS# 3994

**3417** 1936 Type One — Satin Finish PR66 PCGS. An amazing, boldly detailed Premium Gem proof, this piece has wisps of champagne and blue toning over its satin surfaces. No spots or marks are evident, even under magnification. NGC ID# 278X, PCGS# 3994

**3418** 1936 Type One — Satin Finish PR67 PCGS. CAC. Golden-brown, apple-green, and plum-red patina invigorates this lustrous and intricately struck Superb Gem. An outstanding Superb Gem, whose quality is confirmed by CAC. Satin proof Buffalo nickels were coined only in 1936, for just a portion of the year.

*From The Reilly Cody Collection.* NGC ID# 278X, PCGS# 3994

### 1936 Nickel, Multicolor PR67+ Type One, Satin Finish

**3419** 1936 Type One — Satin Finish PR67+ PCGS. CAC. Pastel lemon-gold, rose-red, olive-gray, and lavender toning encompasses this lustrous and boldly struck Superb Gem. The surfaces appear flawless save for a few microscopic flecks in the right obverse field. PCGS lists only 46 examples finer (4/18).

*Ex: New York Signature (Heritage, 10/2015), lot 4016, which realized \$2,467.50. NGC ID# 278X, PCGS# 3994*

**3420** 1936 Type Two — Brilliant Finish PR66 PCGS. A resoundingly sharp strike is seen on both sides of this Premium Gem 1936 proof, while hazy iridescence reveals rainbow hues when viewed at an advantageous angle on the obverse. The reverse is fully brilliant and colorful, with glassy-mirrored fields and glossy definition throughout the bison's finer details. Housed in a first generation "rattler" holder.

*From The Tuxedo Park Collection.* NGC ID# 278Y, PCGS# 3995

### 1936 Nickel, Mirrored PR67 Brilliant Finish, Pristine Surfaces

**3421** 1936 Type Two — Brilliant Finish PR67 NGC. Suggestions of sky-blue patina appear atop glimmering, hairline-free mirrors. This high-end Brilliant Finish proof is immensely appealing and shows a full strike. Examples of the 1936 Type Two proof Buffalo nickel are available in this grade but scarce finer, with only 20 coins so graded at NGC (4/18).

*Ex: Long Beach Signature (Heritage, 2/2005), lot 6070. NGC ID# 278Y, PCGS# 3995*

**3422** 1937 PR66 PCGS. Concave, mirrorlike fields embrace fully struck central motifs of this ice-blue, brilliant-finish proof. Housed in an old green label holder, this seemingly flawless Premium Gem is conservatively graded and exceptionally impressive for even the MS66 level. A strong loupe reveals just two or three nitpicking marks, so small they are microscopic and without import.

*From The Tuxedo Park Collection.* NGC ID# 278Z, PCGS# 3996

- 3423** 1937 PR67 NGC. CAC. Always of interest to collectors because of the subject matter as well as the proof finish, this piece displays spectacularly brilliant, glassy surfaces with fully struck devices. A coin with stunning eye appeal that should appeal to many different collectors. As of (4/18), only 59 have been graded higher at NGC. Ex: ANA Signature (Heritage, 7/2005), lot 5742, where it brought \$1,725.

**From The Reilly Cody Collection.** NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

- 3424** 1942-S MS67+ Full Steps PCGS. The bottom step on this sharply struck Jefferson nickel is nearly complete. Both sides are fully brilliant and lustrous with reflective fields. Population: 51 in 67 (6 in 67+) Full Steps, 0 finer (5/18). NGC ID# 22TN, PCGS# 84017

### 1943/2-P Nickel, MS66 Full Steps In-Demand FS-101 Overdate

- 3425** 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS Secure. CAC. This popular Cherrypickers' and Guide Book variety shows doubling on the obverse legends and clear evidence of an underdigit 2 beneath the primary 3 in the date — a hubbing error during preparation of the working die. Vestiges of a 2 beneath the 3 are especially bold. This nearly brilliant Premium Gem shows a few traces of gold toning and an essentially mark-free obverse. A few tiny ticks on Monticello exist on the reverse. Finely grained surfaces are brightly lustrous amid minor flow lines. Population: 48 in 66 (4 in 66+) Full Steps, 8 finer. CAC: 13 in 66, 0 finer (4/18). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

- 3426** 1949-D MS67 Full Steps NGC. Jefferson nickel specialists recognize the 1949-D as one of the strike rarities in the series, almost never found with full step detail leading to Monticello's porch on the reverse. This frosty Superb Gem has delicate champagne toning over its brilliant surfaces. Census: 6 in 67 Full Steps, 0 finer (5/18). NGC ID# 22UC, PCGS# 84038

## PROOF JEFFERSON NICKELS

- 3427** 1942-P Type Two PR68 PCGS Secure. A stunning Superb Gem proof, this Type Two Wartime nickel is fully brilliant and exhibits delicate iridescent toning on both sides. Population: 16 in 68, 1 finer (5/18). NGC ID# 27A4, PCGS# 4180

- 3428** 1952 PR67 Deep Cameo PCGS Secure. An amazing Superb Gem Deep Cameo proof, this piece exhibits excellent field-to-device contrast with brilliant nickel-gray surfaces and hints of champagne toning. Population: 11 in 67 (3 in 67+) Deep Cameo, 7 finer (5/18). NGC ID# 27A6, PCGS# 94184

## 1952 Nickel, PR67+ Deep Cameo

Registry Set Candidate

- 3429** 1952 PR67+ Deep Cameo PCGS. PCGS has designated only 19 examples of this issue as Deep Cameos, all grading at least PR66. This Plus-designated Superb Gem is virtually flawless and shows stark contrast and full detail. The devices are satiny rather than deeply frosted. An outstanding Registry Set opportunity. Population: 11 in 67 (3 in 67+) Deep Cameo, 7 finer (5/18). NGC ID# 27A6, PCGS# 94184

## EARLY HALF DIME

### 1795 Half Dime, VF30 V-4, LM-10, Pleasing for the Grade

- 3430** 1795 V-4, LM-10, R.3, VF30 PCGS Secure. CAC. Star 15 touches the bust tip and serves as the primary identifier of the LM-10 variety. (LM-5 and LM-6 show star 15 close to the bust, but they do not touch.) This richly toned, midgrade example is an excellent collector-grade representative of the Flowing Hair type. The colorful, iridescent surfaces are essentially problem-free and attractive. Light abrasions exist, as well as a few non-intrusive adjustment marks at the top of the reverse rim, but all of the devices are fully outlined and the surfaces are quite pleasing for the VF30 level. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

## BUST HALF DIMES

- 3431** 1833 V-3, LM-4.1, R.2, MS64 PCGS Secure. CAC. Broad repunching on the O in OF helps attribute this collectible Capped Bust type variety. Prominently clashed near the profile. This lustrous near-Gem is free from marks and is well-struck except for the shield. Dappled cobalt-blue, slate-gray, and wheat-gold toning consumes the obverse. The reverse is white save for peripheral peach-gold. PCGS# 38693 Base PCGS# 4280

- 3432** 1836 Small 5C, V-6, LM-5, R.2, MS64 PCGS Secure. Stars 1 and 11 are blatantly repunched, as is the N in UNITED. A satiny and boldly struck type representative that boasts original tobacco-brown, cream-gray, and gunmetal-blue toning. The surfaces are clashed but devoid of noticeable marks. NGC ID# 232J, PCGS# 38728 Base PCGS# 4288

## SEATED HALF DIMES

### 1837 No Stars Seated Half Dime, MS66 Vividly Toned Large Date Example

- 3433 1837 No Stars, Large Date (Curl Top 1), MS66 NGC.** The 1837 is the more available of the two No Stars Seated Liberty half dime issues, and the Large Date variant is the more often seen of the two 1837 varieties, ideal for type representation. This Premium Gem representative showcases vibrant, frosty luster beneath deep toning in shades of aquamarine, violet, and olive-gold. The strike is crisp throughout, and the surfaces are devoid of any major abrasions. Census: 80 in 66 (1 in 66+, 1 in 66★), 12 finer (4/18).  
Ex: FUN Signature (Heritage, 1/2015), lot 3739, where it brought \$2,820.  
*From The Reilly Cody Collection.* NGC ID# 232M, PCGS# 4311

- 3434 1837 No Stars, Small Date (Flat Top 1) MS65 PCGS Secure.** Broad forest-green borders encompass lightly toned centers. This sharply struck and lustrous Gem exhibits exemplary preservation. The short-lived No Stars subtype was struck at Philadelphia in 1837 and at New Orleans in 1838. Population: 34 in 65 (1 in 65+), 23 finer (5/18). NGC ID# 232M, PCGS# 4312

- 3435 1837 No Stars, Small Date (Flat Top 1) MS65 PCGS.** A splendid Gem representative of the cameo-like first year of issue Seated half dime with Liberty in a plain field. This piece has frosty mint luster and hints of champagne toning. Population: 34 in 65 (1 in 65+), 23 finer (5/18). NGC ID# 232M, PCGS# 4312

### 1837 No Stars Half Dime, MS65+ Small Date Variant

- 3436 1837 No Stars, Small Date (Flat Top 1) MS65+ PCGS Secure. CAC. V-6.** Struck from the Valentine-6 dies, described in Valentine's reference as having a die flaw at "right of arm holding Liberty cap, and continuing downward from the knee. Date in straight line." Valentine also suggests the V-6 coins were actually struck in 1838, since the reverse die exists in an earlier die stage when combined with 1838 obverses. This 1837 No Stars is a brilliant, frost-white example of the Small Date, Flat Top 1 type. It is the sole 1837 No Stars Small Date with the PCGS Plus designation at the Gem level. CAC endorsement confirms the quality surfaces and strong eye appeal. Population: 34 in 65 (1 in 65+), 23 finer. CAC: 17 in 65, 14 finer (4/18). NGC ID# 232M, PCGS# 4312

- 3437 1838 Large Stars, No Drapery, MS65 PCGS Secure.** This satiny Gem No Drapery, Large Stars type coin is sharp throughout both sides and attractively toned in original olive-gold, russet, and blue-gray hues with no singular abrasions of note. This short-lived early type is in high demand, but Gem and finer examples are elusive. NGC ID# 2TXX, PCGS# 4317

- 3438 1838 Large Stars, No Drapery, MS66 NGC.** The large mintage of 2.2 million 1838 dimes occasioned at least 15 die varieties listed in Valentine. This piece shows repunching most prominent on stars 1, 3, and 8. The satiny surfaces are silver-gray in the centers with iridescent rim toning. A small luster graze in the lower-reverse field is the only mentionable contact. A superb, well-struck example of the issue. Census: 45 in 66 (1 in 66+, 1 in 66★), 29 finer (4/18). NGC ID# 2TXX, PCGS# 4317

- 3439 1839 No Drapery MS65 NGC.** Golden-orange, cerulean-blue, and silver-green colors embrace each side of this No Drapery half dime. The satiny surfaces are sharp and devoid of bothersome abrasions, producing strong eye appeal. Finer examples of the 1839 No Drapery half dime are elusive. Census: 36 in 65, 32 finer (4/18).  
Ex: Houston Signature (Heritage, 12/2013), lot 4489, which realized \$1,762.50.

*From The Reilly Cody Collection.* NGC ID# 232T, PCGS# 4319

- 3440 1839 No Drapery MS65 PCGS.** This is a beautifully preserved Gem with original, frosty mint luster and sharp design elements. Olive-green, lavender-gold, and grayish toning blankets each side but does not impede the shimmer of the luster. A high-end coin for the grade, housed in an old green label holder. The 3 and 9 in the date are repunched. Population: 23 in 65, 32 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 232T, PCGS# 4319

- 3441 1839-O No Drapery MS62 PCGS Secure. V-5.** Medium O. Brilliant aside from a blush of gray patina above Liberty's knees. No marks are consequential across the satiny and well-struck surfaces. Numerous die cracks and clash marks will delight the specialist. An early and better branch mint issue. NGC ID# 232T, PCGS# 4320

- 3442 1839-O No Drapery MS63 NGC.** Medium O. Faint caramel-gold and pearl-gray toning endows this unabraded, well-struck, and shimmering New Orleans half dime. An interesting "cud" or rim die break is noted at 3 o'clock on the obverse. Census: 13 in 63, 8 finer (4/18).

Ex: Long Beach Signature (Heritage, 2/2011), lot 3327, where it brought \$1,495.

*From The Reilly Cody Collection.* NGC ID# 232T, PCGS# 4320

- 3443 1840 No Drapery MS65 PCGS.** Silver-gray frosty surfaces exhibit glowing luster and crisply struck devices. Well-preserved despite delicate contact on the right obverse field. The Stars, No Drapery subtype was only struck between 1838 and 1840. Circulated examples are plentiful, but Gems are undeniably scarce. Population: 22 in 65, 26 finer (4/18).

Ex: San Francisco Signature (Heritage, 7/2005), lot 5771; Dallas Signature (Heritage, 7/2006), lot 553.

*From The Reilly Cody Collection.* NGC ID# 232U, PCGS# 4321

- 3444 1840 Drapery MS65 NGC.** Dappled ruby-red and forest-green toning embraces the obverse. The reverse is as deeply patinated, but mostly in khaki-green shades. A boldly struck and unabraded Gem that provides exceptional eye appeal. Certified in a prior generation holder. Census: 11 in 65 (1 in 65+★), 4 finer (5/18). NGC ID# 232W, PCGS# 4326

- 3445 1840 Drapery MS65 NGC. V-7.** A single die pair was used to create the With Drapery half dimes for this date. The reverse is from the hub first used on the 1840-O Transitional (Large Letters), No Drapery coins. This is a bright, frosted coin with semiprooflike fields and is well-struck save for Liberty's hair curls and stars 8 and 9. The surfaces show only a hint of light golden color on each side. Census: 11 in 65 (1 in 65+★), 4 finer (4/18).  
*Ex: Long Beach Signature (Heritage, 9/2007), lot 870; Long Beach Signature (Heritage, 2/2008), lot 34.*  
**From The Reilly Cody Collection.** NGC ID# 232W, PCGS# 4326
- 3446 1840-O Drapery AU53 NGC.** Half dime coinage at the New Orleans Mint in 1840 was divided between the No Drapery and With Drapery design types. The latter is scarcer today, especially in high grade. This rare AU53 example is well-struck and has just a brush of high-point wear. Lilac-gray and gold toning covers the satiny surfaces. Census: 1 in 53, 19 finer (4/18).  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 3579, which realized \$1,380.*  
**From The Reilly Cody Collection.** NGC ID# 232X, PCGS# 4327
- 3447 1841 MS66 NGC.** This impressive Premium Gem exhibits sharply detailed design elements and lustrous surfaces under attractive shades of champagne-gold and dove-gray patina. The 1841 half dime is rare this fine with only a few pieces known finer. Census: 9 in 66 (1 in 66+, 1 in 66 ★), 5 finer (4/18).  
*Ex: Rosemont Signature (Heritage, 8/2013), lot 3438, which realized \$1,292.50.*  
**From The Reilly Cody Collection.** NGC ID# 232Y, PCGS# 4328
- 3448 1841-O MS63 NGC.** Small O. Tan-brown and stone-gray toning adorns satiny and sharply impressed surfaces. Marks are limited to a line beneath the A in HALF. Struck from clashed dies. Plentiful in typical circulated grades, but scarce in Mint State. Census: 1 in 63, 10 finer (4/18).  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 2264; Houston Signature (Heritage, 11-12/2012), lot 3386, where it brought \$1,645.*  
**From The Reilly Cody Collection.** NGC ID# 232Z, PCGS# 4329
- 3449 1842 MS66 NGC.** This satiny Premium Gem is sharp throughout the centers and peripheries, yielding warm golden toning that has additional lilac and blue around portions of the obverse borders. No distracting abrasions are seen on this conditionally rare early Seated half dime. Census: 8 in 66, 1 finer (4/18).  
*Ex: Dallas Signature (Heritage, 10/2006), lot 647, which realized \$1,380.*  
**From The Reilly Cody Collection.** NGC ID# 2332, PCGS# 4330
- 3450 1842-O AU55 PCGS.** Considerable satin luster is visible beneath golden-violet toning. Stars 4 and 5 are flat, and the lower left leaf cluster is similarly weak, with all other design motifs sharp. This scarce New Orleans issue has a low population in higher grades, and this example is the only AU55 that PCGS has certified. Population: 1 in 55, 15 finer (4/18).  
*Ex: Central States Signature (Heritage, 4/2015), lot 3738, which realized \$1,116.25.*  
**From The Reilly Cody Collection.** NGC ID# 256X, PCGS# 4331
- 3451 1843 MS66 NGC.** Splashes of blue-green, lavender-red, and autumn-gold toning embrace this sharply struck and semiprooflike example. Clashed from the rock above the wreath, but the surfaces appear pristine. Housed in a prior-generation holder. Census: 10 in 66, 1 finer (4/18).  
**From The Reilly Cody Collection.** NGC ID# 2334, PCGS# 4332
- 3452 1844 MS66 PCGS. CAC.** This lightly toned Premium Gem features golden toning over Liberty with lavender and sea-green splashed in the obverse margins. A few marks consistent with the grade are hidden within the central figure, and a curved line shows just inside star 11. The reverse exhibits a golden center surrounded by russet with scattered patches of blue. The present piece is "a lot of coin for the money," combining eye appeal, collectibility, provenance, and high technical grade. Moreover, the CAC verification attests to its status as an especially desirable example within the assigned grade. Population: 26 in 66 (2 in 66+), 11 finer. CAC: 12 in 66, 14 finer (4/18).  
*Ex: Globus and Shulman Collections (Stack's, 12/1998), lot 1239; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98136, which realized \$1,292.50; Long Beach Signature (Heritage, 2/2016), lot 3759, which realized \$1,292.50.*  
**From The Reilly Cody Collection.** NGC ID# 2335, PCGS# 4333
- 3453 1844 Repunched Date, V-3c, FS-301, VP-001, MS66 NGC. CAC.** Secondary remnants of earlier date punches are evident above the 1 and below the 8 and first 4. This variety is always popular among Seated Liberty specialists. Kam Ahwash presents a short discussion and a photograph of the 1844 Repunched Date in a November 1977 *Gobrecht Journal* article titled "Some Oddities in the Half Dime Series." This variety is considered scarce (Blythe, 1992), but there is some controversy about how scarce. Nevertheless, the current Premium Gem offering stands out as the finest NGC-certified specimen. Rich cobalt-blue and violet patination dominates the central obverse, ceding to soft rose and ivory around the border, while variegated sky-blue, orange-brown, and almond-tan cascade over the reverse. Lustrous surfaces exhibit well-struck design elements except for softness on a few denticles near 7 o'clock on the obverse and opposite at 11 o'clock on the reverse. Census (all varieties included): 12 in 66, 2 finer. CAC: 12 in 66, 14 finer (4/18).  
*Ex: FUN Signature (Heritage, 1/2008), lot 888, which realized \$1,897.50; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98187, which realized \$1,645.*  
**From The Reilly Cody Collection.** NGC ID# 2335, PCGS# 145429 Base PCGS# 4333
- 3454 1845 Repunched Date, FS-302, MS66 PCGS. CAC.** All four date digits are clearly repunched. Fully shaded in original and attractive golden-brown and sea-green patina. A lustrous and minimally abraded example of this interesting Seated variety. Housed in a green label holder. For all 1845 half dimes, CAC: 8 in 66, 4 finer (4/18).  
*Ex: FUN Signature (Heritage, 1/2009), lot 2102, which realized \$1,725.*  
**From The Reilly Cody Collection.** NGC ID# 2337, PCGS# 38736 Base PCGS# 4335
- 3455 1847 MS66 PCGS. CAC.** The unmarked, satiny fields display varying shades of royal-blue, teal, and straw-gold on the obverse, and more-pronounced, variegated shades of the same colors with violet accents on the reverse. A full strike adds substance to the motifs. This issue is scarce in Premium Gem condition, although not always recognized as such, making the date an exceptional type selection as well as a topline example for series specialists. Population: 15 in 66, 6 finer. CAC: 5 in 66, 4 finer (4/18).  
*Ex: FUN Signature (Heritage, 1/2015), lot 3748, which realized \$1,762.50.*  
**From The Reilly Cody Collection.** NGC ID# 2339, PCGS# 4337

---

**1848 Half Dime, MS65**  
Medium Date, Boldly Struck

**3456 1848 Medium Date MS65 NGC.** The Medium Date variety is the normal logotype for this half dime issue, while its Large Date counterpart is scarcer and features a logotype intended for dimes. The strike is bold on this attractive Gem save for a touch of trivial softness on Liberty's head and the corresponding area of the reverse. Dappled toning reveals shades of blue, purple, and russet coloration. The central obverse features mostly golden-gray patina. A few tiny ticks are nearly invisible without a glass. Census: 5 in 65, 2 finer (4/18).

Ex: Central States Signature (Heritage, 4/2015), lot 3743.

From The Reilly Cody Collection. NGC ID# 233A, PCGS# 4338

---

**1848-O Half Dime, Satiny MS66**  
A Rarity in This Condition

**3457 1848-O MS66 NGC.** Large O. Greenish-gold and orange peripheral toning is joined by splashes of reddish-gold on the reverse margins. The design elements are sharply struck except for minor weakness in the leaf ribbing of the upper left wreath. Both sides have been well cared for. A minute mark on Liberty's jaw serves as an unobtrusive pedigree marker. The 1848-O half dime is scarce in Mint State and rare in Premium Gem condition. Census: 16 in 66, 3 finer (4/18).

Ex: Long Beach Signature (Heritage, 2/2010), lot 972.

From The Reilly Cody Collection. NGC ID# 233C, PCGS# 4340

**3458 1849/8 FS-301 MS64 NGC.** Ex: Richmond Collection. Cherrypickers' considers this variety an 1849/8 overdate, while the Guide Book calls it an 1849/6. Regardless of the underdigit, this is a moderately prooflike near-Gem with rich golden-brown, cherry-red, and jade-green patina.

Ex: Richmond Collection (David Lawrence, 3/2005), lot 1026; Central States Signature (Heritage, 4/2011), lot 3247.

From The Reilly Cody Collection. PCGS# 38738 Base PCGS# 4343

---

**1850-O Half Dime, MS65**  
Seldom Offered in High Grade

**3459 1850-O MS65 NGC.** Although the New Orleans Mint struck 690,000 half dimes in 1850, this issue circulated extensively and is scarce in all Mint State grades today. Gems are rare. This piece is near the Condition Census. Old-time aquamarine and lavender toning appear on each side over frosty luster and well-struck devices. Interesting die cracks appear on each side in the margins. Census: 7 in 65, 1 finer (4/18).

From The Reilly Cody Collection. NGC ID# 233G, PCGS# 4346

**3460 1851-O MS64 PCGS. CAC.** Despite the substantial mintage of 860,000 pieces, the 1851-O Seated Liberty half dime is an elusive issue at the MS64 grade level. This attractive Choice specimen displays well-detailed design elements and lightly marked, lustrous surfaces under shades of powder-blue, lavender-gray, and greenish-gold toning. Population: 17 in 64, 7 finer. CAC: 3 in 64, 4 finer (4/18).

From The Reilly Cody Collection. NGC ID# 233J, PCGS# 4348

---

**1853 No Arrows Half Dime, Colorful MS66**

**3461 1853 No Arrows MS66 NGC.** Due to the high-melt-value silver content of pre-1853 Seated coinage that was heavily melted, the 1853 No Arrows half dime is even scarcer than its mintage of 135,000 pieces would imply. This Premium Gem shows excellent luster over surfaces concentrically toned on each side in multicolor hues. This fully struck piece shows no obvious problems. Census: 10 in 66, 2 finer (4/18).

Ex: Central States Signature (Heritage, 4/2013), lot 1660.

From The Reilly Cody Collection. NGC ID# 233M, PCGS# 4351

**3462 1853-O Arrows MS63 PCGS. CAC.** A lovely example of the elusive 1853-O With Arrows half dime, seldom seen in Mint State grades despite a mintage in excess of 2 million coins. This lustrous example has frosty surfaces with ivory and gold toning. Population: 12 in 63, 24 finer. CAC: 3 in 63, 10 finer (4/18).

Ex: Summer FUN Signature (Heritage, 7/2010), lot 3439, where it realized \$1,063.75.

From The Reilly Cody Collection. NGC ID# 233Z, PCGS# 4357

---

**1854-O Arrows Half Dime  
Pleasing Gem Example**

**3463** 1854-O Arrows MS65 NGC. This is a remarkably well-produced half dime for the New Orleans Mint, as both sides are free of clash marks or distracting planchet issues. Nearly untoned and satiny, with minimal surface disturbances and just a trace of light golden color near the borders. A conditionally scarce Gem example of superior quality. Census: 9 in 65, 6 finer (6/14).

Ex: ANA Signature (Heritage, 3/2007), lot 417; ANA Signature (Heritage, 8/2014), lot 3429.

From The Reilly Cody Collection. NGC ID# 2343, PCGS# 4359

**3464** 1855 Arrows MS65 PCGS. Satiny luster and attractive golden-russet toning give this Gem Arrows type coin immense eye appeal, complementing a sharp strike. Two faint surface grazes — one on Liberty's neck and the other near the foot — are the only visible imperfections. The 1855 Arrows half dime is scarce in this grade and rare finer. Population: 29 in 65, 17 finer (4/18).

Ex: FUN Signature (Heritage, 1/2006), lot 1660.

From The Reilly Cody Collection. NGC ID# 2344, PCGS# 4360

**3465** 1855-O Arrows MS64 PCGS. CAC. Al Blythe calls the 1855-O Arrows "scarce in all grades" and this near-Gem is boldly clashed on each side, with excellent eye appeal created by generous luster and pink and teal patina. Interesting die cracks appear on each side, most prominent through the right-side obverse stars. Population: 9 in 64, 12 finer. CAC: 5 in 64, 6 finer (4/18).

Ex: Summer FUN Signature (Heritage, 7/2012), lot 3333, where it brought \$1,380.

From The Reilly Cody Collection. NGC ID# 2345, PCGS# 4361

**3466** 1857-O MS66 PCGS Secure. CAC. The 1857-O is a slightly better date compared to the Philadelphia issues of this period, and it is rare in MS66 and finer grades. This CAC-approved Premium Gem displays a sharp strike and frosty, unabraded mint luster. Original olive-gray, gold, and lilac toning appears on each side in a mottled pattern. Population: 14 in 66 (2 in 66+), 5 finer. CAC: 9 in 66, 5 finer (4/18). NGC ID# 233T, PCGS# 4366

**3467** 1858-O MS66 PCGS. A splendid Premium Gem representing the Stars Obverse half dime coinage of the New Orleans Mint. This piece features a bold strike with full luster shining through the rich gold and iridescent toning. Population: 9 in 66 (2 in 66+), 1 finer (5/18). NGC ID# 233V, PCGS# 4369

**3468** 1858-O MS66 PCGS. This frosty Premium Gem exhibits an excellent strike for a New Orleans product with frosty mint luster and lovely gold and iridescent peripheries. The 1858-O half dime is rare in this condition and almost uncollectible finer. Population: 9 in 66 (2 in 66+), 1 finer (4/18).

Ex: ANA Signature (Heritage, 3/2016), lot 3728, which realized \$1,880.

From The Reilly Cody Collection. NGC ID# 233V, PCGS# 4369

---

**1859 Half Dime, MS67 ★  
High-End Type Coin**

**3469** 1859 MS67 ★ NGC. A conditionally rare Superb Gem example of this important Seated half dime issue, which shows an obverse design that was modified by Anthony Paquet. The arms of Liberty are slender in relation to Gobrecht's version, and each star on the obverse has a hollow center rather than the raised center of earlier issues. Many collectors consider this a distinct one-year type coin.

The present example is semiprooflike and untoned, showing strike weakness only on the upper-left wreath. The Star designation is shared by only one other coin in this lofty grade. Census: 15 in 67 (2 in 67 ★), 4 finer (5/18).

Ex: Denver Signature (Heritage, 8/2006), lot 5117, which realized \$3,450; Central States Signature (Heritage, 4-5/2009), lot 49, which realized \$2,760.

From The Reilly Cody Collection. NGC ID# 233W, PCGS# 4371

---

**1859-O Half Dime, MS66  
Only One Piece Known Finer**

**3470** 1859-O MS66 NGC. A new obverse hub was prepared in 1859, featuring slight design modifications by Assistant Engraver Anthony Paquet, but unlike the Philadelphia dies, the New Orleans dies were prepared with the old hub, and the O-mint half dimes of this year mark the final use of the older Stars Obverse type. Gem or finer survivors are rare, with the typical piece showing a degree of weakness around the borders. This Premium Gem is crisply struck. Satiny luster illuminates shades of lilac, lavender, and pale champagne over each side. Census: 5 in 66, 1 finer (4/18).

Ex: Summer FUN Signature (Heritage, 7/2014), lot 3253.

From The Reilly Cody Collection. NGC ID# 233X, PCGS# 4370

**3471** 1860 MS67 PCGS Secure. Frosted luster and a sharp strike define this brilliant and nearly untoned Superb Gem 1860 half dime. A trace of golden toning sits inside the rims. This is the first year of its type, with the legend UNITED STATES OF AMERICA on the obverse. The figure of Liberty was downsized slightly to accommodate the lettering, a James B. Longacre modification. Population: 53 in 67 (8 in 67+), 4 finer (4/18). NGC ID# 2347, PCGS# 4377

- 3472** 1863 MS66 NGC. V-1, Flynn RPD-001. The 18 is repunched south, as seen on all business-strike examples of this low mintage (18,000 pieces) Civil War date. Both sides display tobacco-brown and forest-green toning with a window of brilliance on the reverse. Lustrous and unabraded with original eye appeal. In a circa-2000 holder. Census: 19 in 66, 19 finer (4/18).  
Ex: Central States Signature (Heritage, 4/2001), lot 6147; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98171, which realized \$1,645.  
**From The Reilly Cody Collection.** NGC ID# 234C, PCGS# 4382

**1863-S Half Dime, MS65  
Scarce in This Grade**

- 3473** 1863-S MS65 PCGS Secure. The 1863-S half dime had a fairly substantial mintage for the period of 100,000 coins, but few examples survive in Mint State, and the issue is rare at the Gem grade level. This piece is sharply struck, with frosty, delicately preserved surfaces. Both sides are toned pale champagne, with the remnants of a fingerprint on the obverse in the form of some deeper golden hues. Population: 9 in 65, 5 finer (4/18).  
Ex: Long Beach Signature (Heritage, 1/2015), lot 3654.  
**From The Reilly Cody Collection.** NGC ID# 234D, PCGS# 4383

- 3474** 1864-S MS64 NGC. A brilliant San Francisco half dime that features an area of multicolor toning confined to the lower reverse. The design elements are nearly fully struck, with faint clash marks on each side. A scarce issue despite its mintage of 90,000 coins. Census: 3 in 64, 10 finer (4/18).  
Ex: ANA Signature (Heritage, 8/2014), lot 3433, where it realized \$1,997.50.  
**From The Reilly Cody Collection.** NGC ID# 234F, PCGS# 4385

**1866 Half Dime, Frost-White MS66  
Beautiful Original Mint Luster**

- 3475** 1866 MS66 NGC. A mintage of just 10,000 pieces ensures the scarcity of the 1866 half dime. During this year, the motto IN GOD WE TRUST was added to the quarter, half dollar, and dollar denominations, but the dime and half dime were considered too small to accommodate the inscription. Thus, all 1866 half dimes are "No Motto" coins. This virtually brilliant Premium Gem has luminous luster and a full strike with exceptional preservation. Struck from lightly clashed dies. Census: 12 in 66, 2 finer (4/18).  
Ex: ANA Signature (Heritage, 8/2010), lot 4370.  
**From The Reilly Cody Collection.** NGC ID# 234J, PCGS# 4388

- 3476** 1866-S MS64 NGC. Although the 1866-S half dime is plentiful in circulated condition, Mint State coins are scarce. This Choice example is in a median Uncirculated grade and is appealing for that level. It is well-struck and satiny with a hint of light golden toning over mostly unmarked surfaces. Census: 16 in 64, 9 finer (4/18).  
**From The Reilly Cody Collection.** NGC ID# 234K, PCGS# 4389

- 3477** 1867 MS66 NGC. The 1867 half dime is a key date in the Seated Liberty series. Its mintage of 8,000 coins is the lowest of the Legend Obverse type after the presumed unique 1870-S issue. This Premium Gem offers bold detail and rich blue-green, violet, rose, and champagne toning. The fields are semiprooflike. The 1867 is a rarity in this condition and in high demand. Census: 11 in 66 (1 in 66 ★), 1 finer (4/18).  
Ex: Dallas Signature (Heritage, 10/2008), lot 512, which realized \$2,300.

**From The Reilly Cody Collection.** NGC ID# 234L, PCGS# 4390

- 3478** 1868 MS65 PCGS Secure. CAC. An attractive Gem, from a mintage of 88,600 pieces, this coin exhibits sharply detailed design elements and lightly marked surfaces with much prooflike reflectivity in the fields. Population: 14 in 65, 13 finer. CAC: 3 in 65, 11 finer (5/18). NGC ID# 234N, PCGS# 4392

- 3479** 1868-S MS65 PCGS. The 1868-S half dime is a better date, especially at the higher levels of Mint State. Both sides are awash in frosty mint luster, and each is essentially untoned. Sharply struck throughout, including separation of the foot and sandal and clear venation on the reverse leaves. There are no significant marks to report. Population: 10 in 65 (1 in 65+), 4 finer (4/18).  
Ex: ANA Signature (Heritage, 8/2007), lot 492, where it brought \$2,760.  
**From The Reilly Cody Collection.** NGC ID# 234P, PCGS# 4393

**1869 Half Dime, MS67  
Pristine, Shimmering Luster**

- 3480** 1869 MS67 NGC. The 1869 half dime is a rarity in Superb Gem condition, and only a couple of examples are reported finer than the present. Light cobalt-blue and lavender toning adorns both sides, each of which displays semiprooflike fields that highlight the devices but still shimmer when tilted beneath a light. The design elements are sharp, and the surfaces are wholly unabraded. Census: 3 in 67, 1 finer (4/18).  
Ex: Long Beach Signature (Heritage, 9/2009), lot 392.  
**From The Reilly Cody Collection.** NGC ID# 234R, PCGS# 4394

- 3481** 1869-S MS64 PCGS. Although a relatively common coin in circulated grades, the 1869-S half dime is scarce in Mint State and genuinely rare in Choice or better condition. This piece is well-struck except for the usual weak part of the upper-left wreath branch, with satiny luster and deeply prooflike fields. Lilac-gray toning covers each side. Population: 10 in 64 (1 in 64+), 5 finer (4/18).  
Ex: Baltimore Signature (Heritage, 3/2009), lot 767, which realized \$1,035.  
**From The Reilly Cody Collection.** NGC ID# 234S, PCGS# 4395

**3482** 1872 MS66 PCGS. CAC. Frosty original luster is mostly brilliant on this Premium Gem, but hints of warm golden toning appear on each side. The strike is sharp and there are no abrasions, making this coin high-end even for the lofty MS66 grade. The 1872 half dime is rare so fine. CAC-approved in a green label holder. Population: 25 in 66 (10 in 66+), 2 finer. CAC: 10 in 66, 2 finer (4/18).  
Ex: Houston Signature (Heritage, 12/2010), lot 3404, which realized \$1,150.

*From The Reilly Cody Collection.* NGC ID# 234X, PCGS# 4400

**3483** 1872-S Mintmark Below Bow MS66 PCGS. CAC. This impressive Premium Gem exhibits sharply detailed design elements and impeccably preserved lustrous surfaces throughout. Some interesting clash marks are evident on the reverse. Population: 56 in 66 (5 in 66+), 11 finer. CAC: 21 in 66, 6 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 2352, PCGS# 4401

## PROOF SEATED HALF DIMES

### 1857 Half Dime, Toned PR66

Lovely Coloration, A Rare Proof Issue

**3484** 1857 PR66 NGC. There are likely fewer than 50 examples of the 1857 proof half dime known, and this issue may be as rare as the proof half dollar of this date, of which only 35 or 36 pieces are known. NGC and PCGS combined list 60 grading events, but resubmissions likely inflate this figure. A significant number of the auction appearances in recent years have been made by the same few coins, with fresh examples rare. This Premium Gem is sharp and reflective, showing beautiful preservation and lovely lavender, mint-gold, and steel-blue toning. Census: 8 in 66, 3 finer (including Cameos) (4/18).

*From The Reilly Cody Collection.* NGC ID# 3X58, PCGS# 4436

**3485** 1859 PR65 NGC. A needle-sharp Gem with smooth, glassy fields. Peach-gold, lavender, and ocean-blue toning graces both sides. The short-lived Pollock obverse subvariety with hollow-centered stars and a slightly different appearance to the Seated Liberty figure. The obverse and reverse rims differ in width, probably the cause of the "railroad rim" present on the upper reverse.

*From The Reilly Cody Collection.* NGC ID# 235P, PCGS# 4438

### 1859 Half Dime, PR65 Cameo Sharp and Well-Contrasted

**3486** 1859 PR65 Cameo PCGS. The proof 1859 half dime is relatively plentiful in the absolute sense, but Cameo examples are rare, particularly in Gem or better grades. This PR65 Cameo exhibits brilliant surfaces that show exceptional contrast between sharply struck, highly frosted motifs and mirrored fields. A couple of obverse lint marks are noted, near stars 4 and 8. Population: 3 in 65 (1 in 65+) Cameo, 4 finer (4/18).

Ex: Long Beach Signature (Heritage, 9/2007), lot 903, which realized \$4,312.50.

*From The Reilly Cody Collection.* NGC ID# 23CD, PCGS# 84438

**3487** 1861 PR66 NGC. CAC. With a net mintage of 400 proofs out of the 1,000 pieces originally struck, the 1861 is actually scarcer than one might at first think, especially in high grades. This is an exceptionally attractive coin that is toned in pleasing shades of sky-blue with dabs of scarlet and yellow, the entire color scheme brightened considerably by the mirrored fields on each side. Census: 12 in 66 (1 in 66★), 3 finer. CAC: 8 in 66, 2 finer (4/18).

Ex: New York Signature (Heritage, 11/2013), lot 3288, where it brought \$2,820.

*From The Reilly Cody Collection.* NGC ID# 5LL5, PCGS# 4444

**3488** 1862 PR65 Cameo PCGS Secure. The proof 1862 half dime (550 pieces struck) is scarce in Cameo grades. This Gem is brilliant and well-contrasted with deep mirrors. A few small lint marks (as struck) are noted in the fields under a loupe. The design elements are fully struck. Population: 7 in 65 (1 in 65+) Cameo, 12 finer (4/18). NGC ID# 235X, PCGS# 84445

**3489** 1863 PR66 NGC. Reflective fields highlight well-struck, frosted design features. Both sides are essentially untoned and devoid of mentionable marks. Die polish lines are visible in the fields. From a proof mintage of 460 pieces. Census: 14 in 66 (1 in 66+, 1 in 66★), 6 finer (4/18).

Ex: Summer FUN Signature (Heritage, 7/2009), lot 324, where it realized \$1,955.

*From The Reilly Cody Collection.* NGC ID# 235Y, PCGS# 4446

**3490** 1863 PR66 Cameo NGC. The 1863 is always in demand among Seated half dime date collectors, a fact that should come as no surprise given the paltry proof mintage of 460 pieces and the key-date status of the business strike, produced to the extent of only 18,000 coins. This bright, nearly untoned Cameo-designated specimen offers pleasing contrast between the fields and devices, which are sharply detailed throughout. Both sides are free of even a single bothersome distraction. NGC and PCGS combined have seen only 13 coins at the PR66 Cameo level, with only six finer examples (4/18).

Ex: New York Signature (Heritage, 7/2002), lot 6599; ANA National Money Show Signature (Heritage, 3/2003), lot 5505; ANA Signature (Heritage, 8/2007), lot 495.

*From The Reilly Cody Collection.* NGC ID# 235Y, PCGS# 84446

**1863 Half Dime, PR67 Cameo  
Lovely Golden Toning**

**3491 1863 PR67 Cameo NGC.** Both sides of this Superb Gem Cameo proof exhibit exceptional gold toning that accents the contrast on this sharp top-grade example. The proof half dime mintage in 1863 was just 460 coins, and 442 submissions have been certified at NGC and PCGS, suggesting that numerous resubmissions are reflected in the published population. Moreover, only 71 of the coins reported by the grading services are Cameos, and none are Deep or Ultra Cameo. This piece is among the finest known. Census: 4 in 67 Cameo (1 in 67 ★), 0 finer (5/18). NGC ID# 235Y, PCGS# 84446

**1864 Half Dime, Multicolor PR67  
Ex: Kaufman, Conditionally Rare**

**3492 1864 PR67 NGC. CAC.** Ex: P. Kaufman. Only 470 proof half dimes were struck in 1864, distributed in proof sets that were later broken up. Interest in this scarce proof issue is compounded by the elusiveness of the circulation-strike counterpart, which boasts a small mintage of 48,000 pieces. This CAC-approved Superb Gem proof is fully struck and deeply reflective. Original green-gold obverse toning and concentric rainbow reverse toning prevent a Cameo designation but still present their own brand of eye appeal. Census: 5 in 67 (1 in 67 ★), 1 finer; 2 in 67 Cameo, 2 finer. CAC: 4 in 67, 0 finer (4/18).  
Ex: Philip Kaufman Collection / Long Beach Signature (Heritage, 2/2003), lot 6199; Eugene H. Gardner Collection (Heritage, 6/2013), lot 30223, where it brought \$4,259.38.  
*From The Reilly Cody Collection.* NGC ID# 235Z, PCGS# 4447

**3493 1864 PR65 Cameo PCGS.** Gold, peach, blue, and violet patina covers most of the obverse and the left half of the reverse. The fields are brightly mirrored, and there is a significant field-device contrast evident even through the multiple layers of toning. Strong eye appeal is seen throughout. Population: 12 in 65 Cameo, 6 finer (4/18).  
Ex: Chicago Signature (Heritage, 8/2011), lot 3504, where it brought \$1,840.  
*From The Reilly Cody Collection.* NGC ID# 235Z, PCGS# 84447

**3494 1865 PR66 PCGS. CAC.** A boldly struck, deeply mirrored Premium Gem proof with lovely gold, aquamarine, and lavender-gray toning over each side. The 1865 proof half dime is seldom seen this fine, and higher-grade pieces are rare. Population: 14 in 66, 2 finer. CAC: 4 in 66, 1 finer (4/18).  
*From The Reilly Cody Collection.* NGC ID# 2362, PCGS# 4448

**3495 1865 PR65 Cameo NGC.** Moderate contrast is seen on each side of this silver-white Gem, one of 500 pieces recorded as minted in this last year of the Civil War. A couple of hairlines are visible with a loupe in the right obverse field, and some faint scrapes are seen above Liberty's cap, but these trivial, minuscule impairments fail to dampen the quicksilver appeal of this delightful piece. The reverse is choice for the grade.  
Ex: ANA Signature (Heritage, 8/2007), lot 497, where it realized \$1,610.

*From The Reilly Cody Collection.* NGC ID# 2362, PCGS# 84448

**3496 1866 PR65 Cameo NGC. CAC.** This early date in the Legend Obverse series had only 725 proofs produced. The fields display deep reflectivity and the center of each side is pale in color with slightly deeper peripheral toning present. The contrast is strongly evident even through the toning. Census: 8 in 65 Cameo, 9 finer. CAC: 1 in 65, 7 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 2363, PCGS# 84449

**3497 1866 PR66 Cameo NGC.** Lavender-rose and yellow-gold border toning surround aquamarine centers on this Premium Gem Cameo proof, with modest contrast apparent on each side. The rims are broad and squared, and the central devices are sharp — even the upper-left portion of the wreath. Eye appeal is outstanding. Census: 6 in 66 Cameo, 3 finer; 2 in 66 Ultra Cameo, 1 finer (4/18). NGC ID# 2363, PCGS# 84449

**3498 1867 PR66 PCGS Secure. CAC.** Only 8,000 circulation-strike half dimes were struck in 1867 — lowest of the Seated series — adding to demand for proofs by present-day collectors. Just 625 proofs were produced. This Premium Gem proof displays dappled, mirrorlike fields with multicolor toning that provides subtle contrast with the sharply struck, frosted devices. Blue, violet, and reddish-orange hues glisten from the attractive, undisturbed surfaces. Population: 19 in 66, 5 finer. CAC: 12 in 66, 4 finer (4/18). NGC ID# 2364, PCGS# 4450

**3499 1868 PR66 Cameo PCGS.** The 1868 proof half dime is relatively plentiful overall, but Cameo examples are rarely offered. This Premium Gem is modestly contrasted through original gold, violet, and sea-green toning. The mirrored fields glimmer when tilted beneath a light. Finer Cameos are rare. Population: 12 in 66 (2 in 66+) Cameo, 2 finer; 3 in 66 (1 in 66+) Deep Cameo, 1 finer (4/18).

Ex: FUN Signature (Heritage, 1/2011), lot 3256, which realized \$1,840.

*From The Reilly Cody Collection.* NGC ID# 2365, PCGS# 84451

**3500 1869 PR66 NGC.** Dappled navy-blue, plum-red, and stone-gray endow this crisply struck Premium Gem, with the deepest shades relegated to the peripheries. A flashy and undisturbed high-grade half dime. Just 600 proofs were produced. Census: 16 in 66, 11 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 2366, PCGS# 4452

**3501 1869 PR66 Cameo NGC. CAC.** This spectacular Premium Gem exhibits sharply detailed design elements and deeply reflective fields that contrast boldly with the frosted devices. Hints of emerald-green and powder-blue toning enhance the visual appeal. Raised die lines in the fields are evident on both sides. Census: 6 in 66 Cameo, 12 finer. CAC: 2 in 66, 0 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 2366, PCGS# 84452

**3502** 1870 PR66 PCGS. Magnificent peach-orange, rose, violet, ice-blue, and sea-green patina blankets the obverse. The reverse is much lighter in shade with delicate orange and lavender toning over the wreath and borders, while the center remains largely brilliant. The fields are deeply mirrored, generating moderate contrast on the obverse and a bold cameo effect on the reverse. The 1870 1,000-proof mintage is tied for the highest production with the 1860 and 1861 issues. Many of the earlier proofs from that period were melted, making the 1870 the most available of the three dates and one of the most collectible proof issues in the entire series.

Purchased from Rare Coins of New Hampshire (12/2001); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98209, where it realized \$1,410.

From The Reilly Cody Collection. NGC ID# 2367, PCGS# 4453

**3503** 1871 PR66 PCGS Secure. CAC. Mustard-gold and grass-green hues prevail on this Premium Gem, though additional blue elements adorn the reverse borders. The coin is carefully preserved with captivating eye appeal thanks to the patina and the profound reflectivity in the fields. The upper-left part of the wreath is weak but the strike is otherwise sharp. Population: 14 in 66 (1 in 66+), 1 finer; 7 in 66 (2 in 66+) Cameo, 5 finer. CAC: 7 in 66, 1 finer (4/18).

Ex: ANA Signature (Heritage, 3/2011), lot 3330, which realized \$2,070.

From The Reilly Cody Collection. NGC ID# 2368, PCGS# 4454

**3504** 1871 PR65 Cameo NGC. The sharply detailed design elements of this delightful Gem have a frosty texture that contrasts boldly with the deeply reflective fields. Shades of pale gold and cerulean-blue toning enhance the well-preserved surfaces. Census: 12 in 65 Cameo, 14 finer (4/18).

Ex: San Francisco Signature (Heritage, 3/2014), lot 10215, where it realized \$1,527.50.

From The Reilly Cody Collection. NGC ID# 2368, PCGS# 84454

**3505** 1873 PR66 PCGS. The last year of the type, struck without arrows since the same legislation that changed the weight of silver coins also omitted authorization for the series. A pristine specimen with deep blue-green and lavender toning. Population: 21 in 66 (2 in 66+), 7 finer (4/18).

Ex: Houston Signature (Heritage, 11-12/2012), lot 3419, where it brought \$1,645.

From The Reilly Cody Collection. NGC ID# 236A, PCGS# 4456

#### 1873 Half Dime, PR66 Cameo Excellent Final-Year Type Coin

**3506** 1873 PR66 Cameo PCGS. CAC. The Mint struck 600 proof 1873 half dimes before the denomination was abolished in April of that year, and an unknown number was likely later melted in July. This Premium Gem displays ample field-motif contrast, with well-struck design elements and no major surface marks. The obverse has rich violet and lavender hues around the margins, while the reverse exhibits a rose-gold periphery around a light teal center. Population: 7 in 66 Cameo, 4 finer; 2 in 66 Deep Cameo, 1 finer. CAC: 3 in 66, 3 finer (4/18).

Ex: Long Beach Signature (Heritage, 6/2014), lot 3549, which realized \$2,820.

From The Reilly Cody Collection. NGC ID# 236A, PCGS# 84456

## EARLY DIMES

### 1797 Draped Bust Dime, Good 4 JR-2, 13 Stars Obverse

**3507** 1797 13 Stars, JR-2, R.4, Good 4 PCGS. The two 1797 Draped Bust dime varieties are easily distinguished by the number of stars around the obverse border. JR-2 has 13 stars. This piece has a sharp date and boldly outlined devices. All border legends and stars are visible, although most of the rims blend into the fields, as is common among early screw press strikings of this denomination. NGC ID# 236D, PCGS# 38749 Base PCGS# 4463

### 1798 Small 8 Dime, VG10 Rare JR-3 Die Pair

**3508** 1798 Small 8, JR-3, R.5, VG10 PCGS. This is a rare die pair with a small, left-leaning 8 in the date. Zack, Scuderi, and Sherrill write "at least 30 examples known, about six of which are in MS." The date and other legends are readable, while Liberty and the eagle retain distinct outlines. This is a well-circulated and problem-free example that should appeal to advanced specialists. Population: 5 in 10, 17 finer (4/18). NGC ID# 236E, PCGS# 38752 Base PCGS# 4467

**3509** 1805 4 Berries, JR-2, R.2 — Cleaned — PCGS Genuine. XF Details. Tan-brown and gunmetal-gray toning encompasses this well-defined Draped Bust type coin. Although slightly glossy from a wipe, the surfaces are more than acceptable for most early silver specialists. There are only two 1805 die varieties, and each is separately listed in the Guide Book because of differing berry counts.

**3510** 1807 JR-1, R.2, AU53 ANACS. The sole die marriage for this final Draped Bust date. Steel-blue, lavender-red, straw-gold, and stone-gray shades embrace this partly lustrous and richly detailed example. The left-side borders show selected softness, but the remainder of the coin is well-struck. Housed in a small-sized holder. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

## BUST DIMES

**3511** 1814 STATESOF, JR-5, R.3, XF45 PCGS. The diesinker entered STATES too far to the right of UNITED, and was obligated to crowd the remainder of the legend to fit it on the die. A scarce but collectible Guide Book variety. This autumn-brown and dove-gray example lacks relevant marks though we note a small spot in the center of the cap. NGC ID# 236W, PCGS# 38777 Base PCGS# 4490

**1820 Bust Dime, MS64**  
**Large 0, JR-13**  
**Original Multicolor Toning**

**3512 1820 Large 0, JR-13, R.2, MS64 PCGS Secure.** Blushes of aquamarine accompany the borders, along with autumn-gold and lavender-red toning. The strike shows unimportant inexactness on the forehead curls and stars 10 and 11. This lustrous Choice Bust dime reveals a few distributed marks once inspected beneath a loupe. NGC ID# 4E45, PCGS# 38781 Base PCGS# 4492

**3513 1822 JR-1, R.4, Good 4 PCGS Secure.** The date, LIBERTY, and 10 C are clear. UNITED STATES OF AMERICA is fully readable, though a few letters are faint. About half of E PLURIBUS UNUM is present. All stars are distinct from the rim. A hair-thin line crosses the obverse, but no other marks are apparent. The sole dies for this challenging date. NGC ID# 236Z, PCGS# 38801 Base PCGS# 4497

**3514 1822 JR-1, R.4 — Obverse Scratched — NGC Details. Fine.** JR-1 is the sole 1822 die marriage. A narrow diagonal interrupted mark above the L in LIBERTY, and a pair of delicate pinscratches near the E and Y in LIBERTY, explain the NGC designation. Nonetheless, this slate-gray example provides an opportunity to secure this very scarce Capped Bust date. NGC ID# 236Z, PCGS# 38801 Base PCGS# 4497

**3515 1823/2 Small E's, JR-1, R.3, AU55 PCGS Secure.** Among the three 1823-dated die varieties, JR-1 is intermediate in rarity between JR-3 and JR-2. Only JR-1 has small letter Es within UNITED STATES OF AMERICA. Actually, most of the letters in that legend are small, except the O, M, and T. A lovely steel-gray Choice AU dime with an unmarked appearance. A late die state with a radial crack through the T in UNITED. NGC ID# 237Z, PCGS# 38802 Base PCGS# 4498

**3516 1823/2 Large E's, JR-2, R.5, MS61 NGC.** JR-2 is the rarest of the three 1823-dated die marriages. It combines the prominently overdated obverse of JR-1 with the Large E's reverse of JR-3. The present unmarked wheat-gold example has satin luster and a good strike. As of (4/18), it is the single finest at NGC designated as JR-2. PCGS# 38803 Base PCGS# 4499

**3517 1828 Small Date, Square Base 2, JR-1, R.2, MS63 ANACS.** Deep blue-green borders accompany stone-gray centers. An intricately struck and unmarked Capped Bust type coin. The surfaces are semiprooflike, and exhibit eye appeal that exceeds the numerical grade. NGC ID# 2377, PCGS# 38826 Base PCGS# 4510

**3518 1828 Large Date, Curl Base 2, JR-2, R.3, AU53 NGC.** Light golden-brown and ice-blue toning graces the margins. Well-struck save for softness on the right-side stars and the eagle's head and claws. Magnification reveals two hair-thin marks on Liberty's neck. Ex: Jules Reiver Collection (Heritage, 1/2006), lot 22208; FUN Signature (Heritage, 1/2007), lot 2546, which realized \$874. NGC ID# 2376, PCGS# 38825 Base PCGS# 4506

**3519 1832 JR-1, R.2, MS62 NGC.** The C in AMERICA is repunched. The obverse is richly toned in shades of gunmetal-blue and antique gold, while the reverse is somewhat lighter. This Mint State type coin is boldly struck on the stars but a touch softer on the middle hair curls and the talons. The 1832 dime is collectible in Uncirculated condition. NGC ID# 237C, PCGS# 38855 Base PCGS# 4521

**1836 JR-2 Dime, MS64**  
**Satin Type Coin With Original Toning**

**3520 1836 JR-2, R.2, MS64 PCGS Secure.** The 1836 Capped Bust dime is popular among type collectors. Examples are somewhat scarce in MS64, and finer pieces are rarely offered. This near-Gem displays a bold strike and satiny mint luster with no distracting abrasions. Lavender-gray margins surround sea-green interiors. Population (all varieties included): 30 in 64 (2 in 64+), 16 finer (4/18). NGC ID# 237G, PCGS# 38889 Base PCGS# 4528

## SEATED DIMES

**3521 1838-O No Stars, F-101a, R.5, AU55 NGC.** Ex: Maumee Valley Collection. The obverse rim cud at 2 o'clock is diagnostic of Fortin-101a, the rarest of the three varieties for this introductory New Orleans issue. The mintmark is repunched south, as also seen on Fortin-101. The motifs and legends are lustrous, and the pearl-gray surfaces are free from detractions.

*From The Maumee Valley Collection.* PCGS# 537644 Base PCGS# 4564

**1839 No Drapery Dime, MS65 ★**  
**Needle-Sharp, Warm Golden Toning**

**3522 1839 No Drapery, F-106b, R.2, MS65 ★ NGC.** This is a sharp, eye-catching Gem with semiprooflike fields that earned it a Star designation from NGC. The No Drapery design was struck only from 1838 to 1840, inclusive. Of these, only the 1839 and 1840 issues have stars around the obverse border. This outstanding type coin displays silvery interiors and golden margins. On the reverse, hints of deeper burgundy are visible around the outer periphery. No distracting abrasions are seen. Census: 25 in 65 (1 in 65+, 1 in 65★), 39 finer (4/18).

Ex: ANA Signature (Heritage, 2/2014), lot 3278, which realized \$2,350.

*From The Reilly Cody Collection.* PCGS# 537677 Base PCGS# 4571

- 3523** 1840 No Drapery, F-104a, R.5, MS64 NGC. The 1840 is the final No Drapery dime struck at Philadelphia. Mint State examples are scarce in Choice or better grades. This piece offers a sharp strike and champagne-tinted satin luster. Only a few light surface grazes are visible beneath a loupe. The variety is Fortin-104a, but the die state is earlier than usually seen; the die crack through Liberty's foot from the rim at 4:30 is present, but the other cracks have not yet formed. Census: 14 in 64, 26 finer (4/18).  
Ex: Long Beach Signature (Heritage, 9/2004), lot 6133, which realized \$977.50.  
*From The Reilly Cody Collection.* NGC ID# 5NJ9, PCGS# 537708 Base PCGS# 4573
- 
- 1841 Seated Dime, MS65**  
**Lovely Multicolor Toning**
- 

- 3524** 1841 F-102, R.2, MS65 NGC. The 1841 is among the more plentiful early-series Seated dimes, although Mint State pieces are still scarce. In Gem condition, this date is decidedly rare, and the present example is especially attractive. Forest-green, gold, lilac, and rose toning are a visual delight, and the design elements lack nothing in sharpness. Census: 6 in 65, 6 finer (4/18).  
Ex: Long Beach Signature (Heritage, 2/2009), lot 901.  
*From The Reilly Cody Collection.* PCGS# 537749 Base PCGS# 4579
- 
- 3525** 1842 F-102, R.4, MS65 NGC. Despite a mintage that approaches 1.9 million pieces, the 1842 Seated dime is a condition rarity in Gem and better grades. This is a pleasing champagne-tinted example with sharp devices and semiprooflike fields. Census: 7 in 65, 5 finer (4/18).  
Ex: Long Beach Signature (Heritage, 2/2002), lot 5498, which realized \$1,495; Houston Signature (Heritage, 11/2007), lot 60310, which realized \$1,955.  
*From The Reilly Cody Collection.* PCGS# 537783 Base PCGS# 4581
- 
- 3526** 1845 F-104a, R.3, MS65 NGC. In an earlier die marriage, this obverse shows triple punching on the 5 in the date, but on Fortin-104a, most signs of repunching are lapped away. This colorful Gem displays olive-gold, blue, and violet toning with satiny, unabraded surfaces. The strike is sharp. Census: 12 in 65, 7 finer (4/18).  
*From The Reilly Cody Collection.* PCGS# 537823 Base PCGS# 4586
- 
- 3527** 1853 Arrows MS65 PCGS. A Fortin-unlisted variety with myriad diagonal die lines beneath the date and arrows. The reverse shows a crack from the rim to the M in AMERICA. Lustrous and sharply struck with light wheat-gold toning. Unabraded, though faint roller marks (as made) are present on Liberty's upper legs.  
*From The Reilly Cody Collection.* NGC ID# 2398, PCGS# 4603
- 
- 3528** 1857-O Medium O, F-107a, R.3, MS65 NGC. Fortin-107 is the only Medium O variety of the 1857-O dime. This is the late die state variant, which has die cracks connecting the left obverse rim to the rock below star 1. Ocean-blue and sun-gold colors illuminate the borders of this sharply struck and prooflike example. Faint field marks are visible only with the aid of a loupe. The 1857-O is readily obtained in well-worn condition, but Uncirculated examples are scarce, most such pieces grade MS62 through MS64. Census: 14 in 65, 18 finer (4/18).  
Ex: Houston Signature (Heritage, 12/2010), lot 3428, which realized \$1,840.  
*From The Reilly Cody Collection.* PCGS# 538118 Base PCGS# 4615
- 
- 3529** 1859-O Medium O, F-103, R.3, MS65 NGC. The mintmark is low beneath the M in DIME, centered over the bow. On the obverse, the 1 in the date is over two dentils. This Gem 1859-O Seated Liberty dime is sharp and satiny with original multicolor toning. No major abrasions are visible. Census: 17 in 65, 15 finer (4/18).  
*From The Reilly Cody Collection.* NGC ID# 2395, PCGS# 538142 Base PCGS# 4620
- 
- 1863 Dime, Prooflike MS65**  
**Low-Mintage Semikey**
- 

- 3530** 1863 F-101a, R.5, MS65 NGC. The Philadelphia Mint coined 14,000 dimes in 1863, all from the same die pair used to strike proofs. This is a better date in all grades and is rare in Uncirculated condition. Prooflike fields and bold devices are hallmarks of this Gem example, which has modest cameo contrast on the frost-white obverse, while the reverse displays ocean-blue and rose-gold toning. Only a few light marks are visible beneath a loupe. Census: 9 in 65, 11 finer (4/18).  
*From The Reilly Cody Collection.* NGC ID# 239K, PCGS# 538200 Base PCGS# 4637
- 
- 3531** 1864 F-102a, R.5, AU55 PCGS Secure. Just 11,000 circulation strikes were made in total, utilizing proof dies that soon clashed during the mintage. This is a sharp, Choice About Uncirculated example with bits of rainbow toning at the margins that retain some reflectivity. Natural olive-gray toning covers smooth surfaces that reveal only a few inconsequential, tiny marks. Population: 2 in 55, 37 finer (4/18). NGC ID# 239M, PCGS# 538202 Base PCGS# 4639
- 
- 3532** 1866 F-102b, R.6, XF45 PCGS Secure. Since fractional currency was abundant in 1866, and silver coin failed to circulate except in the far West, the Philadelphia Mint struck only 8,000 dimes for commerce that year. Collectors of the day purchased proofs, but business-strike survivors are rare in all grades. This is a moderately circulated but problem-free silver-gray and golden-brown example. NGC ID# 239S, PCGS# 538214 Base PCGS# 4643
- 
- 3533** 1867 F-102, R.5, MS62 PCGS. A prooflike representative with cameo contrast and vertical die striations (as coined) throughout the fields. Apparently, the dies were lapped to remove clashmarks, with vestiges nonetheless apparent near Liberty's arms. Well-struck and unblemished with greater appeal than its grade suggests. Only 6,000 commercial pieces were issued. Housed in an old green label holder.  
*From The Reilly Cody Collection.* NGC ID# 239U, PCGS# 538218 Base PCGS# 4645

**1869 Seated Liberty Dime, MS65  
Scarce This Fine, Colorfully Toned**

**3534 1869 F-105a, R.4, MS65 PCGS. CAC.** Long Flag on 1. Iridescent calico-like toning visits the obverse of this Gem Seated dime, with light gold, blue, and cherry-red shades on the reverse. The devices are lightly frosted against reflective fields. The Fortin-105 die marriage was used to strike both proofs and circulation strikes. PCGS has assigned a Gem Mint State designation, although we note squared-off rims and particularly strong dentils on this coin, and cannot dismiss the possibility that it might a proof. Population: 4 in 65, 12 finer. CAC: 1 in 65, 5 finer (5/18). NGC ID# 239Y, PCGS# 538243 Base PCGS# 4649

**3535 1873 Arrows, F-109, R.2, MS64+ NGC. CAC.** The left arrow is repunched south. A lustrous and virtually brilliant near-Gem that boasts sharp strike and pleasing surfaces. A small strike-through (as made) is above the left ribbon loop. A steep wire rim is present on the right obverse and upper-left reverse. NGC ID# 23BG, PCGS# 538310 Base PCGS# 4665

**1874 Arrows Dime, MS66  
Rich Peripheral Toning**

**3536 1874 Arrows, F-101a, R.2, MS66 NGC.** Second and final year of the With Arrows issues, 1873-1874. Even though the mintage was high with 2.9 million pieces struck, there remains constant demand for these dimes as type coins. This is a remarkable, bright semiprooflike example that shows deep blue and russet rings surrounding the margins on each side. Census: 17 in 66, 13 finer (4/18). PCGS# 538329 Base PCGS# 4668

**3537 1876-CC MS65 NGC.** Satiny mint luster illuminates original toning on this Gem 1876-CC dime, which shows lavender-gold color across the interiors and deeper sea-green and blue around the borders. The strike is bold and no major abrasions are present. Census: 38 in 65, 26 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 23AJ, PCGS# 4680

**3538 1876-CC F-116a, R.4, MS65+ PCGS. CAC.** This Carson City dime is among the most prevalent issues from the Old West facility, but this sharply struck Gem is much nicer than the usual example. Lustrous and nearly mark-free with light tobacco-brown toning near the rims. A good strike confirms the eye appeal. CAC: 7 in 65, 8 finer (5/18).

*From The Bob Williams Collection.* NGC ID# 5W5N, PCGS# 538508 Base PCGS# 4680

**3539 1878 Type One Reverse, F-103, R.5, MS65 PCGS.** Fortin-103 is a scarce Type One Reverse variety, showing a split end on the left ribbon. This frosty Gem is well-struck and untoned, showing radiant luster that is semiprooflike in the obverse fields. Only a few small marks are seen beneath a loupe. Housed in an old green label holder. Population: 11 in 65 (1 in 65+), 7 finer (4/18). *From The Tuxedo Park Collection.* PCGS# 538627 Base PCGS# 4685

**1881 Dime, Border-Toned MS66+  
Elusive in This Condition**

**3540 1881 F-101a, R.4, MS66+ PCGS Secure. CAC.** Both sides of this high-end Premium Gem display champagne-tinted centers with layered amber, violet, and ocean-blue border toning. The design elements are well-struck, and a loupe reveals only a few trivial marks in the frosty luster. The 1881 Seated dime is conditionally scarce this fine. Only 24,000 pieces were struck. Population: 9 in 66 (3 in 66+), 3 finer. CAC: 6 in 66, 2 finer (4/18). NGC ID# 23AU, PCGS# 538646 Base PCGS# 4689

**1884 Dime, MS67  
Beautiful Type Coin, Ex: Gardner**

**3541 1884 F-102, R.2, MS67 NGC. CAC.** Gene Gardner considered this Superb Gem to be one of the most attractive 1884 dimes surviving. The obverse is moderately toned greenish-gold and blue with considerable lilac and pearl elements, while the reverse shows lighter versions of the colors that are equally attractive. It is a well-defined coin, carefully preserved and a Superb Gem in full. One of the most available Seated dime issues, the 1884 rewards selectivity and patience in finding an attractive, high-quality example ... as well as decisive bidding when a coin like this becomes available. Housed in a prior-generation holder. Census: 30 in 67 (1 in 67 ★, 1 in 67+★), 6 finer. CAC: 9 in 67, 1 finer (4/18).

*Ex: Purchased from Kathleen Duncan at Pinnacle Rarities (8/2005); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98255, which realized \$2,585.*

*From The Reilly Cody Collection.* PCGS# 538680 Base PCGS# 4692

## PROOF SEATED DIMES

**1857 Dime, Toned PR64**  
**An Infrequently Seen Rarity**  
**A Newly Discovered Proof Die Pair**

**3542 1857 PR64 NGC.** Fortin-Unlisted. This coin is from a previously undocumented proof die pair. The date position does not match F-101, and there is no die line from the rim to the R in AMERICA, a diagnostic of the only previously known proof die pair. Neither does this coin match any of the other listed Fortin varieties of the 1857 Seated dime. Diagnostics include vertical die lines in the recesses just left of the end of the pole, and a long horizontal die line through the lower part of the shield. The base of the 7 is low and centered directly over a dentil. Both sides of this near-Gem proof are reflective and sharp, and no significant contact marks are apparent. Medium-intensity russet-gold toning blankets the entire coin.

PCGS estimates 30 to 50 1857 proof dimes are known, mostly in Select and near-Gem grades. The Seated dime or proof specialist will not want to miss out on this infrequently seen rarity. Census: 11 in 64, 15 finer (4/18).

Ex: Long Beach Signature (Heritage, 6/2015), lot 3486, which realized \$2,820.

From The Reilly Cody Collection. NGC ID# 23CB, PCGS# 4746

**1858 Seated Dime, PR65**  
**A Scarce Proof Issue**

**3543 1858 F-101, R.5, PR65 NGC.** Proper storage and care of proof silver coins was still unexplored territory when the Mint stepped up its production in 1858, selling pieces to casual collectors. Consequently, only a small percentage of the 50 to 70 proof 1858 dimes known today have the level of preservation needed for a Gem grade. This is a sharp, deeply mirrored example with a hint of contrast beneath delicate rose-gold toning on each side. Eye appeal is outstanding. Census: 17 in 65, 10 finer; 2 in 65 (1 in 65+★) Cameo, 6 finer (4/18).

Ex: ANA Signature (Heritage, 8/2007), lot 552, which realized \$3,450.

From The Reilly Cody Collection. NGC ID# 23CC, PCGS# 538998 Base PCGS# 4747

**3544 1859 PR64 Cameo PCGS. F-101, R.4.** Ex: Gil Clark. Only 800 proof dimes were struck in this, the final year of the Stars Obverse design. This is a strongly contrasted proof whose devices are nicely frosted devices beneath an obvious but light layer of soft golden toning. Bold details throughout and showing minimal hairlines. Population: 12 in 64 (1 in 64+) Cameo, 22 finer (4/18). Ex: Baltimore Signature (Heritage, 7/2003), lot 6496, where it brought \$1,610.

From The Reilly Cody Collection. NGC ID# 23CD, PCGS# 84748

**1859 Dime, PR65 Cameo**  
**Toned Borders Around Brilliant Centers**

**3545 1859 PR65 Cameo PCGS Secure. F-101, R.4.** The Mint was in its early days of striking proofs for the public, selling them for a modest premium over face value. The official recorded mintage of 1859 proofs was 800 pieces. Comparatively few of those pieces survive with Cameo contrast in Gem or finer conditions. This example displays mirrored fields and strong contrast with frost-white central devices. Intermittent areas of blue and reddish-gold toning at the margins surround brilliant centers. Population: 11 in 65 Cameo, 11 finer; 1 in 65 Deep Cameo, 0 finer (4/18). NGC ID# 23CD, PCGS# 84748

**3546 1859 F-101, R.4, PR64 NGC.** The central reverse is brilliant, but the remainder of this Choice proof is patinated ocean-blue and golden-brown. Well-struck and unblemished. A scarce proof subtype, since the Legend Obverse design was introduced the following year.

From The Reilly Cody Collection. NGC ID# 23CD, PCGS# 538999 Base PCGS# 4748

**3547 1860 PR66 Cameo NGC. F-101, R.3.** First year of the Legend Obverse type, a far greater number of proofs were struck than the Mint could actually sell. This is an all-brilliant example that has brightly reflective fields that contrast nicely against the frosted devices. Census: 6 in 66 Cameo, 10 finer (4/18).

Ex: Summer FUN Signature (Heritage, 7/2012), lot 3426, where it realized \$1,955.

From The Reilly Cody Collection. NGC ID# 23CJ, PCGS# 84753

**3548 1864 PR65 Cameo PCGS Secure. F-101, R.4.** Icy legends and motifs contrast with reflective fields. The strike is bold throughout. The obverse displays a hint of wheat-gold toning. A desirable Civil War Cameo Gem. Only 470 pieces were struck. Population: 6 in 65 (1 in 65+) Cameo, 9 finer (4/18). NGC ID# 23CM, PCGS# 84757

**3549 1864 PR65 Cameo NGC. F-101, R.4.** An impressively low mintage of only 470 proofs is the hallmark of this Legend Obverse dime. This is a lovely Gem that is brilliant throughout with a significant amount of mint frost over the devices, which yields the cameo contrast that gives this piece its impressive appearance. Census: 8 in 65 Cameo, 13 finer (4/18).

Ex: Long Beach Signature (Heritage, 9/2005), lot 2392, where it brought \$1,610.

From The Reilly Cody Collection. NGC ID# 23CM, PCGS# 84757

**3550** 1864 PR64 Ultra Cameo NGC. CAC. F-101, R.4. Outstanding contrast between the icy devices and the glassy fields affirms the desirable Ultra Cameo designation, which has been achieved by only six NGC-graded proof 1864 dimes. Light rose and apple-green hues grace the margins. The Philadelphia Mint coined a mere 470 proofs during this Civil War year, and the associated business production was also very low. CAC: 1 in 64, 1 finer (4/18).  
Ex: Central States Signature (Heritage, 5/2005), lot 6574, which realized \$1,437.50.

*From The Reilly Cody Collection.* NGC ID# 23CM, PCGS# 94757

**1864 Dime, Toned PR67  
Modest Obverse Contrast**

**3551** 1864 F-102, R.5, PR67 NGC. From a mintage of only 470 coins, this Superb Gem proof 1864 dime is conditionally rare. Caramel-gold, lavender-gray, and sea-green toning enriches deeply reflective fields. The strike is sharp, and the obverse has appreciable cameo contrast. The elusiveness of circulation strikes of this year heightens the appeal of high-end proof examples such as this. Census: 4 in 67 (1 in 67 ★), 0 finer; 6 in 67 Cameo 0 finer; 2 in 67 (1 in 67+) Ultra Cameo, 0 finer (4/18).  
Ex: Baltimore Signature (Heritage, 3/2009), lot 869; Long Beach Signature (Heritage, 6/2010), lot 562, which realized \$2,990.

*From The Reilly Cody Collection.* NGC ID# 23CM, PCGS# 539013 Base PCGS# 4757

**1866 Dime, PR66 ★ Cameo  
Spectacular Multicolor Toning**

**3552** 1866 PR66 ★ Cameo NGC. F-102, R.3. A mintage of 725 proof Seated Liberty dimes was struck at the Philadelphia Mint in 1866, to complement the minuscule business-strike mintage of 8,725 pieces. The present coin is a spectacular Premium Gem, with sharply detailed, frosty devices and deeply mirrored fields. The surfaces are patinated in iridescent shades of gold, green, and violet, creating a fascinating play of colors. Census: 13 in 66 Cameo (1 in 66★), 4 finer (4/18).  
Ex: Houston Signature (Heritage, 12/2010), lot 3452, where it brought \$2,760; ANA Signature (Heritage, 10/2012), lot 3971, where it realized \$3,407.50.

*From The Reilly Cody Collection.* NGC ID# 23CP, PCGS# 84759

**3553** 1867 Repunched Date, F-103, R.5, PR65 PCGS Secure. Rich apple-green, golden-brown, and lavender toning encompasses this nicely struck and exemplary Gem. One minute flan flaw is seen near the M in AMERICA. The date was initially entered with a downward slant, then largely effaced and repunched. Remnants of the initial logotype impression are most apparent above the base of the 1. NGC ID# 23CR, PCGS# 539019 Base PCGS# 4760

**3554** 1867 Repunched Date, F-103, R.5, PR66 PCGS. CAC. Although proofs are perhaps more obtainable in than the 1867 business strikes, they are rare in high grades as confirmed by the population data. This deeply mirrored example shows considerable field / device contrast, although slightly limited by the attractive coppery-gold and cerulean-blue patina that covers both sides. The strike is razor-sharp throughout. The 18 and 7 in the date are repunched matching the Fortin diagnostics for the proof dies. Tied for finest at PCGS. Population: 5 in 66, 0 finer. CAC: 5 in 66, 0 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 23CR, PCGS# 539019 Base PCGS# 4760

**1868 Seated Dime, PR66 Cameo  
Just Two Pieces Finer at PCGS**

**3555** 1868 PR66 Cameo PCGS. CAC. F-104, R.3. Deeply reflective silver mirrors are just one half of this Premium Gem's brilliant eye appeal. Richly frosted and sharply struck devices dominate the centers, and the coin's impressive contrast is more than the sum of its parts. Random die lines across Liberty's gown confirm the F-104 proof variety. Population: 5 in 66 (1 in 66+) Cameo, 2 finer; 1 in 66 Deep Cameo, 0 finer. CAC: 10 in 66, 1 finer (4/18).  
Ex: Long Beach Signature (Heritage, 9/2010), lot 5115; Long Beach Signature (Heritage, 9/2013), lot 6318. NGC ID# 23CS, PCGS# 84761

**3556** 1870 PR66+ Cameo NGC. F-101, R.3. An even 1,000 proof dimes were struck in 1870 and two die pairs were used to strike proofs, as suggested by Breen in 1977. This piece is from the usually seen die pair with a die crack that connects the lower ribbon ends. Each side is deeply mirrored with frosted devices. The centers are brilliant with golden-russet and blue peripheral toning. Census: 5 in 66 Cameo (1 in 66+), 3 finer (4/18).  
Ex: FUN Signature (Heritage, 1/2011), lot 3330; Long Beach Signature (Heritage, 2/2012), lot 3376.

*From The Reilly Cody Collection.* NGC ID# 59UM, PCGS# 84763

**3557** 1870 F-101, R.3, PR65 PCGS Secure. Delightful sea-green, wheat-gold, and lilac-red toning embraces this well-struck and undisturbed Gem. A couple of tiny lint marks above the N in ONE are as made. Although 1,000 proofs were struck, perhaps less than half of the mintage has survived. NGC ID# 23CU, PCGS# 539025 Base PCGS# 4763

**1871 Dime, PR67  
Vividly Toned, Strong Mirrors**

- 3558 1871 F-102, R.4, PR67 NGC.** Fortin-102 is the most common of three die pairs that were used to produce 960 proof 1871 dimes, outnumbering the other two varieties combined. Vivid shades of orange, magenta, gold, and blue play across the mirrored surfaces in various combinations on both sides of this coin. A Superb Gem, with a bold strike and no obvious flaws. Census: 5 in 67 (1 in 67+), 1 finer; 3 in 67 (2 in 67 ★) Cameo, 1 finer (4/18).  
Ex: Houston Signature (Heritage, 12/2014), lot 3364, which realized \$2,173.75.  
**From The Reilly Cody Collection.** PCGS# 539028 Base PCGS# 4764

- 3559 1873 Closed 3, No Arrows, F-101, R.3, PR65 NGC. CAC.** Walter Breen (1988) writes that some of the 1873 No Arrows proof dimes were melted on July 10, 1873. In any event, specimens in the higher grades are elusive. This is a colorful Gem bathed in sea-green and rose-red shades. The mirrored surfaces are void of detractions.  
Ex: Lewis Tahoe Collection (Heritage, 6/2006), lot 1089, which realized \$1,265.  
**From The Reilly Cody Collection.** NGC ID# 23CX, PCGS# 539032 Base PCGS# 4766

- 3560 1873 Arrows PR64 Cameo PCGS. F-102, R.4.** Moderate cameo contrast with a thin veil of silver patina over each side does not subdue the bright, underlying reflectivity. The two-year 1873-1874 Arrows issues have a low-total proof production. Population: 9 in 64 (1 in 64+) Cameo, 10 finer (4/18).  
Ex: Denver Signature (Heritage, 8/2006), lot 914, where it realized \$1,725.  
**From The Reilly Cody Collection.** NGC ID# 23DH, PCGS# 84769

**1879 Dime, PR67 Cameo  
A Well-Contrasted, Brilliant Type Coin**

- 3561 1879 PR67 Cameo NGC. F-101, R.5.** Deeply reflective and practically stone-white with strong obverse contrast that only intensifies on the reverse. This Cameo proof is sharply struck with just a hint of haze in the fields. The 1879 proof dime is rarely offered in such fine condition. Census: 11 in 67 Cameo (1 in 67 ★), 0 finer; 1 in 67 ★ Ultra Cameo, 0 finer (4/18).  
Ex: Long Beach Signature (Heritage, 5-6/2007), lot 697, which realized \$2,990.  
**From The Reilly Cody Collection.** NGC ID# 23D4, PCGS# 84776

**3562 1880 F-101, R.3, PR67 PCGS.** The date placement and a die defect on the M in DIME distinguish Fortin-101 from the other 1880 proof die pair (Fortin-102). Orange and lavender tones paint the obverse, while the reverse displays predominantly steel-blue and green hues. Devoid of all but a few microscopic flecks. In this lofty grade, circulation strikes and proofs are roughly equally available. However, collector demand for high-grade examples from the low-mintage business-strike issue of only 36,000 pieces, places pressure on carefully preserved proofs such as this Superb Gem. NGC ID# 23D5, PCGS# 539047 Base PCGS# 4777

**3563 1881 PR66 Cameo PCGS. F-101, R.3.** A near-brilliant Premium Gem with lovely faint-gold color and irrefutable cameo contrast, featuring fully detailed design elements. A couple of tiny marks on the lower reverse above the bow are mentioned for accuracy. Fewer than 1,000 proofs were struck and the business strike mintage was also very low (24,000 pieces). Population: 11 in 66 Cameo, 12 finer (4/18).

Ex: Long Beach Signature (Heritage, 6/2005), lot 5799; ANA Signature (Heritage, 7/2005), lot 5873; Summer FUN Signature (Heritage, 7/2014), lot 3293.

**From The Reilly Cody Collection.** NGC ID# 23D6, PCGS# 84778

**3564 1881 F-101, R.3, PR66 PCGS. CAC.** The low-total mintage output for dimes from 1881 makes proofs especially appealing, especially since many business strikes are first-strokes and not easily distinguished from proofs. This is a nicely reflective piece that has light rose toning over each side with a significant presence of ice-blue over much of the reverse. Population: 18 in 66 (2 in 66+), 12 finer. CAC: 19 in 66, 12 finer (4/18).

Ex: Central States Signature (Heritage, 4/2012), lot 4950, where it realized \$1,840.

**From The Reilly Cody Collection.** PCGS# 539049 Base PCGS# 4778

**3565 1882 F-101, R.3, PR66 PCGS.** Rich tan-brown, lime-green, and lilac toning adorns this sharply struck and unmarked Premium Gem. The reverse displays a narrow horizontal streak above the ribbon knot. The sole proof 1882 die marriage, attributed by minor repunching on the final digit in the date. NGC ID# 23D7, PCGS# 539052 Base PCGS# 4779

**3566 1883 PR65 Cameo NGC. F-119, R.4.** Nicely reflective fields contrast against lightly frosted devices. Just a hint of reddish-golden color shows around the left side of the obverse. Solid Gem quality throughout. Census: 15 in 65 Cameo (1 in 65+, 1 in 65 ★), 18 finer (4/18).

Ex: Baltimore Signature (Heritage, 7/2003), lot 6593, where it realized \$1,006.25.

**From The Reilly Cody Collection.** NGC ID# 23D8, PCGS# 84780

**3567 1884 F-101, R.3, PR66 NGC.** Exquisite ocean-blue, cherry-red, and straw-gold patina endows the obverse of this proof dime, one of 875 such pieces struck in 1884. The reverse shows a brilliant center framed by golden-brown, cobalt-blue, and lavender toning. Census: 43 in 66 (1 in 66 ★), 26 finer (4/18).

**From The Reilly Cody Collection.** NGC ID# 23D9, PCGS# 539055 Base PCGS# 4781

**3568 1884 PR66 Cameo PCGS. CAC. F-101, R.3.** The icy-white devices exhibit impressive contrast, and approach a Deep Cameo designation. A nicely struck, lightly toned, and virtually pristine Premium Gem. A diagonal dash of struck-in grease beneath the M in DIME will identify future appearances of this lovely specimen. CAC: 11 in 66 Cameo, 26 finer as Cameo (4/18).

Ex: Pre-FUN Orlando (Superior, 1/2004), lot 233; Richard J. Chouinard Collection / Long Beach Signature (Heritage, 2/2005), lot 6264; ANA Signature (Heritage, 7/2005), lot 5876, which realized \$1,667.50.

**From The Reilly Cody Collection.** NGC ID# 23D9, PCGS# 84781

**3569 1884 PR67 Cameo PCGS Secure. CAC. F-101, R.3.** A stone-white Superb Gem that boasts radiant motifs and glassy fields. Patience is required to locate the few unimportant imperfections. A good strike despite minor blending on the wreath opposite the left corner of Liberty's rock. One of only 875 proofs produced. NGC ID# 23D9, PCGS# 84781

**3570** 1885 F-101, R.3, PR66 PCGS Secure. The sole proof dies for the date. Orange-gold centers are framed by plum-red and ocean-blue borders. The iridescent patina and smooth mirrored fields ensure the eye appeal. The strike is good, though shy of complete on the upper-left portion of the wreath. NGC ID# 23DA, PCGS# 539056 Base PCGS# 4782

1885 Dime, PR67 Cameo  
Beautifully Toned

**3571** 1885 PR67 Cameo NGC. F-101, R.3. The 1885 dime is generally perceived to be a common date in both proof and business-strike format, though proofs breaking the Superb Gem grade level and featuring cameo contrast are decidedly scarce. This piece displays well-struck devices set against remarkably deep mirroring in the fields. Vivid violet and aquamarine peripheral hues surround champagne centers, delivering an exceptional visual display when tilted beneath a light. Census: 19 in 67 Cameo (1 in 67+, 1 in 67★), 8 finer (4/18).

Ex: Long Beach Signature (Heritage, 6/2014), lot 3587, where it brought \$2,702.50.

From The Reilly Cody Collection. NGC ID# 23DA, PCGS# 84782

1887 Dime, PR67 Cameo  
Brightly Mirrored, Sharply Contrasted

**3572** 1887 PR67 Cameo PCGS. F-101, R.3. Of 710 proof dimes struck in 1887, few examples can rival the deeply mirrored fields and crisply frosted motifs of this Superb Gem survivor. Each side is brilliant throughout and there are no mentionable or detracting contact marks to report. PCGS reports just one numerically finer proof, while NGC has yet to certify a finer example. Population: 4 in 67 Cameo, 1 finer (4/18).

Ex: ANA Signature (Heritage, 2/2014), lot 3317. NGC ID# 23DC, PCGS# 84784

1888 Dime, Appealing PR67 Cameo  
Rich Border Toning

**3573** 1888 PR67 Cameo NGC. CAC. F-101, R.4. The proof 1888 Seated dime, struck to the extent of 832 coins, is a curious date in that no Deep or Ultra Cameo examples are certified at either of the two major grading services. High-end Cameos are rare. Gerry Fortin identifies three different obverses for this coinage. The watery surfaces of this Superb Gem display a remarkable degree of contrast beneath antique-golden, steel-violet, and bluish-green toning, particularly at the obverse border. As expected of the grade, this piece displays no mentionable distractions. A carefully preserved example with good eye appeal.

Ex: Long Beach Signature (Heritage, 1/2004), lot 5618; purchased from Jason Carter (3/2004); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98284, where it realized \$3,995.

From The Reilly Cody Collection. NGC ID# 23DD, PCGS# 84785

**3574** 1888 F-101, R.4, PR66 PCGS Secure. Exquisite fire-red, orange-gold, and sea-green patina endows the obverse. The reverse exhibits lightly dappled toning. The strike is less than full, but the glassy fields are unblemished and ensure the eye appeal. Fortin lists three proof varieties (F-101, F-102a, and F-103) despite a proof mintage of only 832 pieces. NGC ID# 23DD, PCGS# 539061 Base PCGS# 4785

1889 Seated Liberty Dime, PR67 Cameo  
None Numerically Finer at PCGS

**3575** 1889 PR67 Cameo PCGS. F-102, R.4. This issue has a reported mintage of 711 pieces, and a surprisingly high number of those coins still survive. The combined population of certified examples at NGC and PCGS represents more than half of the original mintage. Only a tiny fraction of that number have been rated as Superb Gems with Cameo surfaces, however; including this attractively toned specimen. The frosted devices are draped in lovely hues of alabaster-gold, while the highly reflective fields display greenish-gray and dappled russet-brown patina. Population: 8 in 67 (3 in 67+) Cameo, 0 finer (4/18).

Ex: ANA Signature (Heritage, 8/2014), lot 3496. NGC ID# 23DE, PCGS# 84786

**1891 Seated Dime, Impressive PR67 Cameo  
Splendidly Mirrored Surfaces, Strong Contrast**

**3576 1891 PR67 Cameo PCGS. F-101, R.3.** Three die marriages were used to strike 600 proofs in 1891, a tiny fraction of the circulation-strike mintage, which soared to over 15 million pieces. The F-101 proof dies show a spike-like die scratch in the lower shield that pierces the second vertical stripe. This brilliant example displays a faint hint of pale-gold patina at the top rim, but is otherwise untoned with exceptional silver mirrors. Sharply struck, frost-white motifs provide blatant white-on-black contrast. PCGS reports just one numerically finer Cameo proof plus two pieces in Deep Cameo at the PR67 level, with none finer. Population: 10 in 67 (3 in 67+) Cameo, 1 finer; 2 in 67 (1 in 67+) Deep Cameo (5/18). NGC ID# 23DG, PCGS# 84788

**1891 Seated Dime, PR67+ Cameo  
Splendid Surfaces**

**3577 1891 PR67+ Cameo PCGS Secure. CAC. F-101, R.3.** While PCGS reports one numerically finer Cameo proof, it is hard to imagine any 1891 dime exceeds the eye appeal of this high-end Superb Gem. Peripheral copper-pink and iridescent cobalt-blue toning hugs the rims, while the centers are silver-white with pale-gold accents, coated with a generous layer of thick mint frost. This is a coin for the collector who insists on splendid visual impact as well as technically outstanding surfaces. It is a superlative coin for any last-year-of-type set or for the most advanced Seated dime proof set. Population: 10 in 67 (3 in 67+) Cameo, 1 finer. CAC: 9 in 67, 1 finer (4/18). NGC ID# 23DG, PCGS# 84788

## BARBER DIMES

**3578 1893-O MS66 PCGS. CAC.** Pleasing shades of champagne-gold and lavender-gray toning blanket the well-preserved surfaces of this spectacular Premium Gem, with well-detailed design elements underneath. Vibrant mint luster shines through the patina. Population: 12 in 66 (1 in 66+), 4 finer. CAC: 8 in 66, 4 finer (4/18). NGC ID# 23DR, PCGS# 4801

**3579 1893-S MS64 PCGS Secure.** This golden-toned, satiny near-Gem displays attractive luster and has only a few light marks that limit the grade. Minor strike softness is visible on the lower portion of the wreath, but the Liberty portrait is well-defined. The mintmark is strike doubled. Population: 26 in 64, 26 finer (5/18). NGC ID# 23DS, PCGS# 4802

**1895-O Barber Dime, AU53  
Dusky Key-Date Example**

**3580 1895-O AU53 NGC.** The 1895-O represents the most elusive key date among Barber dimes that collectors can still reasonably hope to obtain, with the 1894-S being essentially unachievable. Only 440,000 coins were struck, and the average grade awarded falls between Fine 15 and VF20. Dusky gunmetal and olive-gold patina covers much of each side. LIBERTY and the headband are strong with trivial friction, so too are the right ear of corn and upper wheat stalks. Splashes of burnt-orange color appear on the bust truncation. NGC ID# C4KL, PCGS# 4807

**3581 1901-O MS64+ PCGS Secure. CAC.** This is a particularly frosty, luminous Choice example with a sharp strike and original toning. Much of each side is bone-gray but with tan-gold around the borders. No mentionable abrasions are seen. Population: 17 in 64 (1 in 64+), 19 finer. CAC: 4 in 64, 7 finer (4/18). NGC ID# 23EG, PCGS# 4825

**3582 1905-O MS66 NGC.** Iridescent powder-blue, violet-red, and peach-gold toning fills the borders of this crisply struck and highly lustrous Premium Gem. The surfaces appear free from marks, and offer exceptional eye appeal. Census: 7 in 66, 4 finer (5/18). NGC ID# 23EU, PCGS# 4836

**3583 1908-S MS66 PCGS.** Low-intensity shades of lavender-gray and pale gold toning enliven the well-preserved surfaces of this delightful Premium Gem Barber dime. Sharply detailed design elements and vibrant mint luster add to the outstanding eye appeal. Population: 15 in 66 (1 in 66+), 3 finer (5/18). NGC ID# 23FA, PCGS# 4849

**1909-O Dime, Toned MS66  
Rare in This Lofty Grade**

**3584 1909-O MS66 PCGS Secure.** Softly frosted original luster on each side of this Premium Gem illuminates olive-green, russet, and ocean-blue toning. The strike is sharp and no significant abrasions are visible. The 1909-O Barber dime is a rarity in this grade, and only a handful of finer pieces are known. Population: 19 in 66 (3 in 66+), 3 finer (5/18). NGC ID# 23FD, PCGS# 4852

**3585 1913 MS66+ PCGS Secure. CAC.** Apple-green and lilac toning visits the obverse periphery, but the remainder of this lustrous high-grade dime is practically brilliant. Immaculate aside from a faint field graze near the final A in AMERICA. A needle-sharp strike further attests to the quality. Population: 50 in 66 (14 in 66+), 0 finer. CAC: 17 in 66, 0 finer (5/18). NGC ID# 23FR, PCGS# 4863

- 3586 1914-D MS66+ PCGS Secure.** CAC. Kevin Flynn records no fewer than seven repunched mintmark varieties for the 1914-D, but this high-end, Premium Gem has a normal mintmark. Everything else is clearly above “normal,” since the coin rates among the top dozen certified at PCGS with sparkling mint luster and wholly untoned surfaces. Only minor weakness at the lower-right wreath and bow loop prevent a Full Details strike. Population: 5 in 66+, 4 finer. CAC: 15 in 66, 4 finer (4/18). NGC ID# 23FU, PCGS# 4866

## PROOF BARBER DIMES

- 3587 1895 PR65 NGC. CAC.** The proof 1895 dime has the same mintage as its famous silver dollar counterpart, but is far more affordable. The associated 1895 P-mint business mintage is the lowest of the series from that facility. The present needle-sharp Gem exhibits flashy fields and light apple-green and russet-gold toning. Housed in a prior generation holder. NGC ID# 23G8, PCGS# 4879
- 3588 1897 PR67 NGC.** The portrait displays light olive-gray toning, the obverse field is nearly white, and the border near UNITED STATES exhibits maroon-red and forest-green patina. The reverse has a green-gold center and a rich blue-green periphery. This immaculate Superb Gem has a needle-sharp strike and extraordinary eye appeal. NGC ID# 23GA, PCGS# 4881

1898 Barber Dime, PR67+  
Attractive Multicolor Toning

- 3589 1898 PR67+ NGC.** Only 735 proof Barber dimes were struck in 1898. This Plus-graded Superb Gem displays razor-sharp definition on all design elements and the virtually pristine surfaces include deeply reflective fields, with subtle traces of cerulean-blue and pale green toning. Eye appeal is outstanding. Census: 31 in 67 (1 in 67+, 1 in 67★), 6 finer (4/18). NGC ID# 23GB, PCGS# 4882

- 3590 1898 PR65 Cameo PCGS.** Sharply struck with mirrored fields and bright, frosted devices. The strike is sharp, complementing beautifully preserved Gem surfaces that have no mentionable toning. Cameo examples of the 1898 proof dime are elusive in high grade. Population: 12 in 65 Cameo, 42 finer; 1 in 65 Deep Cameo, 17 finer (4/18).
- Ex: Central States Signature (Heritage, 5/2005), lot 6706, which realized \$1,955. NGC ID# 26KV, PCGS# 84882*

- 3591 1901 PR66+ PCGS Secure.** One of 813 proofs struck, and one of the few Plus-graded proofs at the Premium Gem level. Steel-blue toning gradates from light-blue to deep cyan-blue with an interruption of vibrant rainbow colors at the lower-left obverse rim. A similar palette of colors engulfs the reverse, with deeply mirrored fields shining through on both sides. The strike is pinpoint sharp. Population: 1 in 66+, 5 finer; 3 in 66+ Cameo, 7 finer; 0 in 66+ Deep Cameo, 1 finer (4/18). NGC ID# 23GE, PCGS# 4885

- 3592 1914 PR65 PCGS Secure.** Only 425 proof Barber dimes were struck in 1914, making the issue scarce to rare in all grades today. This sharply detailed Gem displays well-preserved surfaces, with deeply reflective fields, under delicate shades of lavender and pale gold toning. Population: 30 in 65, 34 finer (5/18). NGC ID# 23GV, PCGS# 4898

- 3593 1914 PR64 Cameo PCGS. Gold CAC.** The (4/18) CAC Census indicates that among all proof Barber dimes with a Cameo designation, only the present lot has earned a gold CAC seal. This intricately struck near-Gem exhibits a frosty portrait and luminous legends. No hairlines are apparent across the glassy fields, though the margins offer indications of apple-green, tan-gold, and lavender toning. The lowest mintage proof date. NGC ID# 23GV, PCGS# 48898

## MERCURY DIMES

- 3594 1916-D VG8 PCGS.** The 1916-D Mercury dime is the acknowledged key to the series and collectors prize examples in all grades and conditions. This pleasing VG example is well-worn, but close inspection reveals about half of the sticks in the fasces are still differentiable and no large or distracting abrasions are evident. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, Choice VF  
Great Color and Surfaces

- 3595 1916-D VF35 PCGS Secure.** A lovely slate-gray example of this key date with relatively smooth surfaces and bold detail. Midgrade circulated examples of the 1916-D Mercury dime are in constant demand, especially when problem-free. This is the single “stopper” in the series, boasting a famous mintage of only 264,000 coins. The Denver Mint was ordered to cease dime production in late 1916 to focus entirely on a sudden order for millions of quarter dollars. NGC ID# 23GY, PCGS# 4906

- 3596 1916-S MS66 Full Bands NGC.** The first-year San Francisco issue in the Mercury dime series is scarce in the upper Full Bands grades. This Premium Gem displays glistening, frosty mint luster and brilliant silver color. There are no mentionable abrasions and the radiance of the surfaces is exceptional. The horizontal fasces bands are sharp, although the lower diagonal band is weak. Census: 26 in 66 Full Bands, 6 finer (4/18). NGC ID# 23GZ, PCGS# 4909

- 3597 1916-S MS66 Full Bands PCGS.** Ex: William Dominick Collection. A lustrous, well-struck, and pristine straw-gold Premium Gem. The William Dominick Collection was auctioned by Heritage at the 2001 Indianapolis Central States convention. It is ranked fifth all-time at PCGS in the Full Bands with Major Varieties, Circulation Strikes category.
- Ex: Central States Signature (Heritage, 4/2001), lot 6209; FUN Signature (Heritage, 1/2006), lot 2128, which realized \$1,035. NGC ID# 23GZ, PCGS# 4909*

- 3598 1917-S MS66 Full Bands PCGS Secure.** This spectacular Premium Gem exhibits sharply detailed design elements, with Full Bands definition on the fasces. The virtually pristine, brilliant surfaces radiate vibrant mint luster, which adds to the outstanding eye appeal. Population: 72 in 66 (2 in 66+) Full Bands, 12 finer (5/18). NGC ID# 23H4, PCGS# 4915

- 3599 1917-S MS66 Full Bands PCGS.** Razor-sharp definition is evident on all design elements of this delightful Premium Gem, and the bands on the fasces are fully split and rounded. The brilliant surfaces are virtually flawless and vibrant mint luster adds to the outstanding eye appeal. Population: 72 in 66 (2 in 66+) Full Bands, 12 finer (5/18). NGC ID# 23H4, PCGS# 4915

- 3600** 1918 MS66 Full Bands PCGS. A high-end Full Bands example of this Philadelphia issue, conditionally scarce as such. Finer examples are rare. This Premium Gem displays frosty, unabraded luster and a remarkably sharp strike. Delicate golden toning graces each side. Population: 59 in 66 (3 in 66+) Full Bands, 5 finer (5/18).  
*From The Bob Williams Collection.* NGC ID# 23H5, PCGS# 4917

- 3601** 1918-D MS64 Full Bands NGC. The 1918-D is scarce with Full Bands regardless of the grade, and the strike on this near-Gem example is indeed sharp throughout both sides. The intense, multicolor toning may divert some of the attention to its underlying surface quality, but the Choice surfaces are undeniable beneath variegated shades of blue, bronze, red, and forest-green. Census: 59 in 64 Full Bands, 10 finer (4/18). NGC ID# 23H6, PCGS# 4919

**1918-D Dime, MS64 Full Bands**  
**Seldom Encountered With Band Separation**

- 3602** 1918-D MS64 Full Bands PCGS Secure. This sharply struck near-Gem is a lovely, lustrous representative of the earliest strike rarity in the Mercury dime series. Seldom seen with Full Bands in any grade, the 1918 Denver issue is especially prized by series specialists in grades approaching Gem condition, where it commands a substantial premium. A speckling of deep-gray and olive toning distinguishes the frosted, nearly unmarked surfaces of this Choice example. Magnification reveals a short, thin abrasion on the cheek, which is the sole mark of note. Population: 81 in 64 (3 in 64+) Full Bands, 32 finer (5/18). NGC ID# 23H6, PCGS# 4919

**1918-D Mercury Dime, MS64**  
**Full Bands Definition**

- 3603** 1918-D MS64 Full Bands PCGS Secure. CAC. An early series Mercury dime, with sharply detailed design elements and Full Bands definition on the fasces, this attractive Choice specimen offers well-preserved surfaces that show a few subtle highlights of pale gold and lavender toning. Overall eye appeal is outstanding. Population: 81 in 64 (3 in 64+) Full Bands, 32 finer. CAC: 9 in 64, 5 finer (4/18). NGC ID# 23H6, PCGS# 4919

**1918-S Dime, MS64 Full Bands**  
**Radiant Mint Frost**

- 3604** 1918-S MS64 Full Bands PCGS Secure. CAC. The centers exhibit pinpoint detail on this Choice Uncirculated Full Bands example of the 1918-S Mercury dime. Definition softens slightly on the legends, but the effect is trivial. Marks are similarly scant, especially on the obverse. Both sides are entirely brilliant and thickly frosted. CAC: 10 in 64, 9 finer (5/18).  
*From The Bob Williams Collection.* NGC ID# 23H7, PCGS# 4921

**1919-D Dime, MS64 Full Bands**  
**Rare Any Finer**

- 3605** 1919-D MS64 Full Bands PCGS Secure. This Denver Mint issue can be found through MS64 with Full Bands, but anything finer is a major rarity. Largely brilliant surfaces feature slight glints of champagne-gold color and satiny mint luster. Fully struck, including the date and motto, with a couple of small die cracks at the lower obverse. PCGS reports 22 higher grading events with Full Bands definition (5/18).

*From The Bob Williams Collection.* NGC ID# 23H9, PCGS# 4925

**1920-D Mercury Dime, MS65 Full Bands**  
**Brilliant and Satiny**

- 3606** 1920-D MS65 Full Bands PCGS Secure. More than 19 million Mercury dimes were struck at the Denver Mint in 1920. This Gem example with Full Bands features bold motifs throughout, save for the lower diagonal band. Heavy clash marks surround Liberty's portrait with the leaves from the reverse branch clear. Brilliant and struck from slightly rotated dies.

*From The Bob Williams Collection.* NGC ID# 23HC, PCGS# 4931

- 3607 1920-S MS64 Full Bands PCGS. The 1920-S dime, with Full Bands, is scarce finer than MS64. This near-Gem is sharply struck and satiny with light golden interiors surrounded by deeper russet, gold, and sea-green border toning. A few small marks do not detract. NGC ID# 23HD, PCGS# 4933

1920-S Dime, MS65 Full Bands  
Crisp Impression

- 3608 1920-S MS65 Full Bands PCGS Secure. A few splashes of translucent patina complement mostly bright, frosty surfaces. Marks are nearly unseen. The impression is bold on Liberty's headdress and the fasces, including the completely delineated central bands. Strike doubling on the obverse is most prominent on 19 and the L in LIBERTY. Population: 39 in 65 (2 in 65+) Full Bands, 12 finer (5/18).

*From The Bob Williams Collection.* NGC ID# 23HD, PCGS# 4933

1921 Dime, MS65 Full Bands  
One of the Keys to the Series

- 3609 1921 MS65 Full Bands PCGS Secure. Boasting a small production of 1.2 million coins, the 1921 takes its rightful place among a handful of other key dates in the Mercury dime series. This is a marvelously preserved Gem, well-struck and maintaining its brilliance. The bands of the fasces are notably strong. Softly frosted luster shimmers over each side.

*From The Bob Williams Collection.* NGC ID# 23HE, PCGS# 4935

- 3610 1924-D MS65 Full Bands PCGS. Ex: Larry Shapiro Collection. A thoroughly lustrous and essentially brilliant Gem of this better branch mint issue. The surfaces are exemplary, and the strike is bold except on the right reverse margin. The reverse is moderately misaligned toward 3 o'clock.

Ex: FUN Signature (Heritage, 1/2006), lot 2024, which realized \$1,265. NGC ID# 23HK, PCGS# 4945

- 3611 1924-S MS63 Full Bands PCGS Secure. Struck from eroded dies with flowlines around the margins, this Select 1924-S Mercury dime is nonetheless sharp throughout. Satiny luster shows champagne and lilac toning along with a few unimportant abrasions. This San Francisco issue is a better date with Full Bands definition. NGC ID# 23HL, PCGS# 4947

- 3612 1924-S MS64 Full Bands PCGS Secure. A rarity with Full Bands, the 1924-S is equally elusive in high Uncirculated grades. This lightly toned near-Gem offers finely grained surfaces with traces of almond-gold and blue toning accented by shimmering silver luster. The strike is crisp and sharp at the centers, although minor weakness is visible at the tops of the reverse legend. PCGS has seen just 23 numerically finer examples with Full Bands (5/28).  
*From The Bob Williams Collection.* NGC ID# 23HL, PCGS# 4947

- 3613 1925-D MS64 Full Bands PCGS Secure. This champagne-tinted near-Gem is sharp in the centers, earning the Full Bands designation, although it shows some softness around the peripheries due to extensive die erosion. No distracting abrasions are noticed.  
*From The Bob Williams Collection.* NGC ID# 23HN, PCGS# 4951

1926-S Dime, MS64 Full Bands  
Better Date in the Series

- 3614 1926-S MS64 Full Bands PCGS Secure. A mintage of 1.5 million coins makes this a slightly better date in the series. Full Bands representatives like this near-Gem are conditionally scarce. Strongly struck, untoned surfaces radiate frosty luster and show faint flow lines in the fields. The only evidence of contact occurs in the form of ticks on the cheek and is visible only under close inspection.

*From The Bob Williams Collection.* NGC ID# 5LX7, PCGS# 4959

1926-S Dime, MS64 Full Bands  
Rare in Finer Condition

- 3615 1926-S MS64 Full Bands PCGS Secure. Like the 1921 and 1921-D with comparable mintages, the 1926-S (1.5 million coins struck) is a conditionally scarce semikey that becomes rare in Gem or finer grades. This Choice Mint State example is untoned and frosty with a single noticeable tick above the central bands, which are completely separated.

*From The Bob Williams Collection.* NGC ID# 5LX7, PCGS# 4959

### 1927-D Dime, MS64 Full Bands

Scarce This Sharp

- 3616 1927-D MS64 Full Bands PCGS.** Full Bands examples of the 1927-D are scarce despite the issue's unassuming mintage of 4.8 million coins. Perhaps a few hundred coins survive in Mint State with full separation of the central bands. This near-Gem is one of them. Each side is nearly all-brilliant, save for faint hints of tan-gold color at the right obverse and left reverse borders. A cluster of marks appears on the neck, otherwise the surfaces are clean. Razor-sharp.  
*From The Bob Williams Collection.* NGC ID# 23HV, PCGS# 4963

- 3617 1928-S MS65 Full Bands PCGS Secure.** Small S. An essentially brilliant Gem of this low-mintage branch issue. The lustrous surfaces appear void of contact. The field near the forehead is prooflike. The strike is intricate at the centers, though the tops of TES OF show incompleteness.  
*From The Bob Williams Collection.* NGC ID# 23HZ, PCGS# 4971

- 3618 1930-S MS66 Full Bands PCGS.** An attractive, lustrous example that is completely brilliant and very pleasing for the grade. The design elements are sharply detailed, with full definition on the bands of the fasces. PCGS has graded 23 numerically finer examples (5/18).  
Ex: Long Beach Signature (Heritage, 9/2003), lot 6526; FUN Signature (Heritage, 1/2006), lot 2173. NGC ID# 84NT, PCGS# 4981

- 3619 1930-S MS66 Full Bands PCGS.** A sharply struck Premium Gem representative, with fully split and rounded bands on the fasces, this coin exhibits virtually flawless surfaces, with vibrant mint luster throughout. Subtle hints of pale jade toning enhance the upper obverse. PCGS has graded 23 numerically finer examples (5/18).  
*From The Bob Williams Collection.* NGC ID# 84NT, PCGS# 4981

- 3620 1936 MS68 Full Bands NGC.** A conditionally rare top-grade example of this otherwise plentiful Philadelphia issue. Lovely cottonwood-green, gold, and cherry-red toning appears on both sides, complementing virtually perfect surfaces and frosty luster. The strike is full. Census: 11 in 68 (1 in 68 ★) Full Bands, 0 finer (5/18). NGC ID# 23JF, PCGS# 4999

- 3621 1940-D MS68 Full Bands PCGS.** A remarkably high-end example of this Denver issue, showing a full strike and virtually flawless surfaces. Silver interiors cede to warmer gold, russet, and olive borders, and the luster is vibrant and frosty. The 1940-D Mercury dime is scarce this fine and unknown finer. Population: 26 in 68 Full Bands, 0 finer (4/18). NGC ID# 23JV, PCGS# 5025

- 3622 1942/1 FS-101 AU58 NGC.** Smooth and still partially lustrous, this satiny About Uncirculated 1942/1 features an impressively sharp overdate and just a hint of high-point rub. Traces of golden-tan toning confirm original surfaces, which are free of any distracting marks. Always popular and in demand at this collector-friendly grade level. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

- 3623 1942/1 FS-101 AU58 PCGS Secure.** Light silver-gray toning visits this lustrous and unblemished near-Mint key date dime. The dramatic *Guide Book* overdate shows a prominent underdigit 1 over the left border of the 2. The upright of the 4 is widely doubled, which indicates that the variety would have been listed in *Cherrypickers'* even if both working hubs were dated 1942.  
*From The Bob Williams Collection.* NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

- 3624 1943-D MS68 Full Bands PCGS.** Splashes of green and russet toning in the centers accent frosty, brilliant luster elsewhere on this top-grade Full Bands example. The preservation is virtually flawless and the strike is full. Eye appeal is excellent, owing much of its merit to the undeniable originality of the surfaces. Population: 41 in 68 (2 in 68+) Full Bands, 0 finer (5/18). NGC ID# 23K9, PCGS# 5047

- 3625 1944 MS67+ Full Bands PCGS Secure. CAC.** The 1944 dime is plentiful in most grades and is only marginally scarce in MS67 Full Bands, but higher-grade representatives are rare. This Plus-graded coin is among the finest Full Bands examples endorsed by CAC. Sharp devices and frosty, unabraded luster complement warm golden border toning that produces strong appeal. PCGS lists four finer coins. CAC: 41 in 67, 0 finer (4/18). NGC ID# 23KB, PCGS# 5051

- 3626 1944 MS67+ Full Bands PCGS Secure. CAC.** While considered one of the common dates in the Mercury dime series, the 1944 is rarely encountered at higher grade levels. Just 10 examples graded MS67 have earned the Plus designation at PCGS, and only four coins are graded finer (5/18). This Superb Gem has a bold strike and frosty silver luster with splashes of gold toning. NGC ID# 23KB, PCGS# 5051

- 3627 1944-S MS67+ Full Bands PCGS Secure. CAC.** Large S. Vibrant cartwheel luster illuminates this lightly toned and immaculate Superb Gem. The strike is sharp aside from selected slight blending on the tops of the peripheral letters. Inconspicuous freckles of russet toning congregate near the rims. Population: 27 in 67+ Full Bands, 11 finer (5/18). NGC ID# 5A96, PCGS# 5055

## PROOF MERCURY DIME

- 3628 1938 PR67+ PCGS.** A Plus-graded Superb Gem proof Mercury dime, this coin exhibits razor-sharp definition on all design elements and the virtually pristine brilliant surfaces include deeply reflective fields with outstanding eye appeal. PCGS has graded only 19 numerically finer examples (4/18). NGC ID# 27D], PCGS# 5073

## ROOSEVELT DIME

- 3629 1958 MS67 Full Torch NGC.** A bold impression on the major motifs separates this snow-white Superb Gem from fellow high-grade examples. The surfaces teem with luster and are virtually void of contact or carbon. Census: 14 in 67 (1 in 67+ Full Torch, 2 in 67★, 1 in 67+★) NGC ID# 23LM, PCGS# 85116

## PROOF ROOSEVELT DIME

- 3630 Five-Piece 1970-S Proof Set Featuring a No S Dime.** An intact five-piece 1970-S proof set in its government-issued plastic case with blue cardboard box. The dime is the rare No S variety. (Total: 5 coins)

## TWENTY CENT PIECES

- 3631 1875-CC AU55 PCGS Secure. BF-4, R.2.** A pearl-gray Carson City type coin with glimpses of gunmetal toning along the obverse margin. Luster illuminates the stars and legends. Marks are absent except for a minor edge knock on the reverse at 12:30. NGC ID# 23R6, PCGS# 5297

3632 1875-CC MS62 PCGS Secure. BF-4, R.2. Light butter-gold patina accompanies the borders of this lustrous and minimally marked Carson City “double dime.” A loupe reveals myriad die polish lines, along with minor inexactness of strike on the crest of the left (facing) wing. Impressive quality for the MS62 level. *From The Bob Williams Collection.* NGC ID# 23R6, PCGS# 5297

3633 1875-S Misplaced Date, FS-301, BF-12, R.2, MS64 PCGS Secure. The top of an 8 is misplaced within the dentils below the 8. A satiny and unmarked forest-green and lavender Choice Seated type coin. The dies were slightly out of parallel, causing a light impression on portions of the upper obverse and lower reverse, though the remainder of the coin is sharp. PCGS# 395943 Base PCGS# 5298

## PROOF TWENTY CENT PIECES

3634 1876 PR61 Cameo PCGS. BF-1, R.4. From a generous mintage of 1,150 pieces, the 1876 proof twenty cent piece is seldom encountered with Cameo surfaces. This sharply detailed example displays deeply reflective fields that contrast noticeably with the frosty devices. Population: 3 in 61 Cameo, 95 finer (4/18). NGC ID# 27H3, PCGS# 85304

1876 Twenty Cent Piece, PR63 Cameo  
Lavender and Blue Toning

3635 1876 PR63 Cameo NGC. BF-4, R.4. Rich ocean-blue toning surrounds the borders on this Select Cameo proof, and delicate lavender color across the interiors lightens gradually toward the centers. Appreciable contrast and mirrored fields produce strong eye appeal despite scattered light marks that limit the numeric grade. The 1876 is one of only four proof issues in the series and is elusive in Cameo grades.

This is the first known proof example of the BF-4 die pair. The authors of *Double Dimes* (2014) write of BF-4: “Discovered jointly by the authors and Heritage Auctions in autumn 2014. ... It may exist as a proof as well as a circulation strike, but this is not yet known for certain. If so, proofs are very rare.” The present coin confirms the existence of proofs. Census: 14 in 63 Cameo (1 in 63+ Cameo), 54 finer; 2 in 63 Ultra Cameo, 4 finer (12/13).  
*Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3556; New York Signature (Heritage, 2/2014), lot 3579.*

*From The Reilly Cody Collection.* NGC ID# 27H3, PCGS# 85304

1877 Twenty Cent, PR61 Cameo  
Just 510 Proofs Minted

3636 1877 PR61 Cameo PCGS Secure. BF-1, R.3. The twenty cent denomination never caught on with the public and was abolished as a circulating coin after 1876. However, the Mint continued to strike proofs in 1877 and 1878. This is the scarcer of those two proof-only dates with a mintage of 510 specimens. Profound cameo contrast is the result of thickly frosted devices set against glistening mirrored fields, enhanced by the brilliance that dominates each side. Colorful toning accents appear around the margins, mainly on the reverse. Wispy contact marks limit the technical grade. NGC ID# 27H4, PCGS# 85305

1878 Twenty Cent, Flashy PR62  
Final Date in the Series

3637 1878 PR62 PCGS Secure. BF-1, R.3. The second proof-only twenty cent issue and the final date in the short-lived, odd-denomination series. The Mint manufactured 600 pieces and all survivors are moderately scarce. This flashy specimen is minimally toned and features a razor-sharp impression, as one would expect of a proof. Each side displays minor wispy contact marks that account for the grade. NGC ID# 27H5, PCGS# 5306

## EARLY QUARTERS

3638 1806/5 B-1, R.2, VF30 PCGS. Tompkins Die State 2/3. Deep dove-gray and lavender toning dominates this midgrade overdated Bust quarter. The first two obverse stars show splashes of silver-white patina. The lower obverse displays minor field marks, but the surfaces are generally free from detractions. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

3639 1806 B-3, R.1, VF35 NGC. Tompkins Die State 1/1. This Choice VF Draped Bust type coin has no significant wear, although weakness of strike is seen on the eagle’s neck. Both sides display mottled reddish-gold and aquamarine toning. Scattered abrasions appear under a loupe. NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

3640 1807 B-1, R.2, VF30 NGC. Tompkins Die State 5/2, with partly lapped shoulder curls. A dusky dove-gray representative with generally unmarked surfaces. The strike is soft on the reverse stars, as often seen. B-1 shows the 5 in the denomination imbedded in the fletchings. NGC ID# 23RF, PCGS# 38939 Base PCGS# 5316

## BUST QUARTERS

**3641 1818 B-8, R.3, XF45 NGC.** Tompkins Die State 2/2, heavily clashed on both sides. The strike is sharp and well-centered, and light wear over each side leaves substantial detail on the devices. Original old-time toning in shades of olive-gray, gold, amber, and russet appears on each side, with the more vibrant colors near the borders. Moderate marks are confined to the field beneath the left (facing) wing. NGC ID# 23RH, PCGS# 38949 Base PCGS# 5322

**3642 1818 B-8, R.3, XF45 NGC.** Tompkins Die State 3/5. Increasing demand for quarters and fewer circulating 2 reales pieces prompted a resumption of the 25 cent denomination in 1818. A radial die crack left of 25 C attributes the Browning-8 variety. This is a Choice XF Bust quarter with impressively smooth, "old silver" surfaces. We note only a few tiny nicks and single wedge-shaped mark between stars 6-7 and Liberty's forecurl.

*Ex: FUN Signature (Heritage, 1/2011), lot 3389.*

**From The Reilly Cody Collection.** NGC ID# 23RH, PCGS# 38949 Base PCGS# 5322

**3643 1819 Small 9, B-3, R.1, XF45 PCGS Secure. CAC.** Tompkins Die State 4/3 with numerous spindly cracks. Autumn-brown borders encompass steel-gray fields and devices. Luster glints from protected areas. A couple of carbon specks are seen on each side, but there are no marks of significance. NGC ID# 23RK, PCGS# 402646 Base PCGS# 5325

**3644 1821 B-3, R.2, AU53 PCGS.** Tompkins Die State 5/1. A prooflike representative with surprisingly mark-free pearl-gray and wheat-gold surfaces. Sharp for the designated grade, without any obvious high-point wear. Browning-3 is the most available of the six 1821-dated varieties, but most survivors are in well-circulated grades. NGC ID# 23RM, PCGS# 38965 Base PCGS# 5331

**3645 1834 O Over F in OF, B-1, FS-901, R.1, AU58 PCGS.** Tompkins Die State 4/5. The blundered reverse with the O in OF punched over an errant F, now a *Guide Book* variety. Both sides show considerable reflectivity in the fields, which are richly toned blue and gold at the margins but fade to grayish color in the centers. Just a touch of rub precludes a Mint State designation.

*Ex: Houston Signature (Heritage, 12/2010), lot 3518, where it brought \$1,121.25.*

**From The Reilly Cody Collection.** NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

### 1834 Quarter, Toned MS63 B-1, O Over F in OF

**3646 1834 O Over F in OF, B-1, FS-901, R.1, MS63 PCGS.** Ex: Indiana Collection. Tompkins Die State 4/5. A late die state with clashmarks from the shield beneath the ear and an arc-shaped die crack across the lower obverse. Luster enriches the borders and devices. Olive-green and cherry-red toning grace unmarked and nicely struck surfaces. The portrait highpoints are gunmetal-gray.

*Ex: Long Beach Signature (Heritage, 6/2010), lot 638, which realized \$3,795; ANA Signature (Heritage, 8/2017), lot 3616, which realized \$2,820. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353*

**3647 1834 B-4, R.1, MS61 NGC.** Tompkins Die State 1/2. The reverse is heavily cracked on this variety, but this die state does not show evidence of clashing or lapping. On the obverse, star 10 is repunched. This piece shows light contact marks but is satiny and toned in original lavender, blue, and orange-gold hues. Stars 1 and 7 are weakly struck. Housed in a prior-generation holder. NGC ID# 23RZ, PCGS# 38995 Base PCGS# 5353

**3648 1835 B-2, R.2, AU58 NGC.** Tompkins Die State 3/1. Autumn-brown luster fills the design elements. The fields and high points are gunmetal-gray. Liberty's forehead and shoulder curl exhibit slight wear, but marks are few and inconsequential. Eight die marriages are known for the 1835 quarter, and only B-3 and B-8 qualify as very scarce. NGC ID# 23S2, PCGS# 38998 Base PCGS# 5354

**3649 1835 B-2, R.2, AU58 NGC.** Tompkins Die State 3/2. Light golden-brown and cobalt-blue patina adorns the peripheries, while the centers are silver-gray. A sharply impressed coin that shows a slightly later die state with clashed dies and a die crack through the 5 in the date. Refreshingly unmarked, and a desirable type coin in the present quality.

*Ex: FUN Signature (Heritage, 1/2006), lot 2278; Houston Signature (Heritage, 11/2007), lot 60518; Phoenix ANA Signature (Heritage, 3/2008), lot 481, which realized \$862.50.*

**From The Reilly Cody Collection.** NGC ID# 23S2, PCGS# 38998 Base PCGS# 5354

**3650 1837 B-2, R.1, AU58 NGC.** Tompkins Die State 2/2. Lightly clashed in front of Liberty's lower neck and above the eagle's left (facing) shoulder. A well-defined and unmarked cream-gray representative that shows slight friction on the shoulder curls and the hair above the ear. NGC ID# 23S4, PCGS# 39011 Base PCGS# 5356

## SEATED QUARTERS

**3651 1853-O Arrows and Rays AU55 PCGS Secure.** A lightly circulated example of this popular, short-lived design type, with just a touch of wear on the design elements and lightly abraded surfaces that retain much of their original mint luster. Population: 10 in 55, 14 finer (5/18). NGC ID# 23U5, PCGS# 5428

**3652 1854-O Arrows, Huge O, Briggs 1-A, FS-501, Fine 15 PCGS Secure.** Apparently, a reverse die arrived in New Orleans sans mintmark. It was extensively lapped beneath the branch stem, and an abnormally large, crude, and high-relief mintmark was hand-engraved on the die. This well-known *Guide Book* variety is pursued in all grades. A straw-gold and powder-blue example with unblemished microgranular surfaces. NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

**3653 1855 Arrows MS64 PCGS.** This satiny near-Gem exhibits full luster beneath light gold and iridescent toning. The design elements show noticeable central weakness, but the surfaces are pristine. A network of fine die cracks surround the date and arrowheads. Population: 20 in 64 (1 in 64+), 12 finer (5/18). NGC ID# 23U8, PCGS# 5435

**3654 1859-S — Damage — PCGS Genuine. AU Details. Briggs 1-A.** In the early years of the San Francisco Mint, quarter production was limited relative to the generous mintages of half dollars. In 1859, only 80,000 quarters were issued. They went into circulation and remained there, since West Coast collectors hardly existed until decades later. This sharply defined example displays deep steel-gray toning. Marks are relatively few, but rim abrasions near the M in AMERICA compel the PCGS disclaimer.

**3655 1860-O MS63+ NGC. Briggs 1-A.** This is a frosty, luminous Mint State coin that is high-end for the grade, even though a few unobtrusive field marks appear on each side under a loupe. The obverse displays mottled russet, olive, and golden-gray toning, while the reverse is tinted champagne with flecks of russet around the border. On the obverse, a cluster of small carbon spots is visible below star 1. The 1860-O quarter dollar is scarce in Mint State. Census: 11 in 63 (1 in 63+), 11 finer (4/18). NGC ID# 23TR, PCGS# 5452

- 3656 1861 MS65 PCGS.** The 1861 had the sixth highest mintage of any No Motto Seated Liberty quarter. This sharply struck and satiny Gem exhibits brilliant silver surfaces and wispy champagne toning. Population: 42 in 65, 20 finer (5/18). NGC ID# 23TT, PCGS# 5454

**1873 Arrows Quarter, MS65  
Few Available in This Grade**

- 3657 1873 Arrows MS65 NGC. Briggs 3-B.** In demand for type and a favorite issue of Seated quarter collectors, the 1873 Arrows is rare in Gem or finer grades with only about two dozen pieces extant. This example is sharply struck on the central devices except for Liberty's head, which shows merging of the forecurls, and several of the stars lack central definition. Cartwheel mint luster illuminates satin-smooth fields that show areas of die clashing but no serious marks. Orange-gold accents surround lightly toned silver centers. Census: 8 in 65, 1 finer (4/18). NGC ID# BZMG, PCGS# 5491

- 3658 1876 MS65+ NGC.** Type One Reverse. Only a hint of tan toning denies full brilliance. Dynamic luster and a bold strike further ensure the eye appeal. Minor field grazes limit the grade. 1876 marked the high-water mark of Seated quarter production, as Mint priorities changed after passage of the Bland-Allison Act. Census: 46 in 65 (1 in 65+), 28 finer (4/18). NGC ID# 23V2, PCGS# 5501

- 3659 1876-CC MS64 PCGS Secure.** Type One Reverse. Small CC. A Choice Carson City type coin that boasts dazzling luster and exceptionally mark-free surfaces. The borders show a trace of tan toning, along with a minor fingerprint fragment near star 10. The strike is sharp except for the dentils.

*From The Bob Williams Collection.* NGC ID# 23V3, PCGS# 5502

- 3660 1877 MS66 NGC. Flynn-MPD-001.** The top loops of two numerals (possibly 8s) are visible in the dentils beneath and 8 and first 7 in the date. Overall, the 1877 Seated quarter is plentiful in high grade and ideal for type collectors. This Premium Gem displays frosty luster and well-struck design elements. Amber-russet and ocean-blue border toning surrounds each side. NGC ID# 23V5, PCGS# 5504

- 3661 1877/77-CC Briggs 2-B, FS-301, MS65 NGC.** Large CC. The 77 in the date is repunched south, and the mintmark is widely spaced. Dusky rose-gold toning embraces this well-struck and lustrous Carson City type coin. The reverse appears pristine and the obverse is nearly as nice.

*Ex: San Francisco Signature (Heritage, 3/2014), lot 10274; Long Beach Signature (Heritage, 6/2014), lot 3716.* NGC ID# 23V6, PCGS# 395941 Base PCGS# 5505

**1877-S Quarter Dollar, MS65  
FS-501, S Over Horizontal S  
A Guide Book Variety**

- 3662 1877-S S Over Horizontal S, FS-501, Briggs 4-D, Flynn RPM-001, MS65 PCGS Secure.** FS-501 is the only Guide Book-listed die variety in the With Motto Seated quarter series. A loupe easily reveals the horizontally oriented secondary mintmark to the left of the primary. This variety is relatively elusive in all grades and is genuinely rare in the upper Mint State levels. PCGS has attributed only three MS65 coins and two finer (5/18). This piece is well-struck and free of major abrasions. Both sides display uniform olive-gray and gold toning. NGC ID# 23V7, PCGS# 145562 Base PCGS# 5507

- 3663 1880 MS66 Prooflike NGC.** Type Two Reverse. Only four Prooflike quarters of this date have been certified (this being the finest). Of course, all have been graded by NGC (4/18). Larry Briggs stated in his reference on the series, "Proof die is used this year on both proof, and for the first and only time, on business strikes." One would expect considerable confusion between business strikes and proofs as a result. This piece shows incredible depth of mirrored reflectivity in the fields with just a hint of frost. The devices are noticeably lustrous, setting up considerable field-to-device contrast. The surfaces are mostly brilliant with just a hint of peripheral color around the margins. The devices are sharply struck throughout with the only area of softness on the upper stars. A couple of stray hairlines are seen in the right obverse field.

*Ex: Central States Signature (Heritage, 4-5/2010), lot 667, where it brought \$2,127.50.*

*From The Reilly Cody Collection.* NGC ID# 23VC, PCGS# 5512

- 3664 1881 MS65 PCGS Secure.** Aquamarine and butter-gold grace the obverse, while the reverse is consumed with forest-green and lavender-red patina. This Gem example is semireflective, lustrous, and essentially unmarked. The strike is sharp except on the uppermost stars. Just 12,000 pieces were struck. NGC ID# 23VD, PCGS# 5513

**1891 Quarter, Exceptional Premium Gem  
Plus-Graded With CAC Endorsement**

**3665 1891 MS66+ PCGS Secure. CAC.** Although the 1891 Philadelphia issue ranks among the most-available Seated quarters of any date or mint, it is scarce in Premium Gem condition and rare any finer. This Plus-graded example with CAC endorsement is certainly among the top dozen 1891 quarters certified by PCGS. The fields and devices show heavy mint frost and vibrant reddish-gold toning confined mostly to the borders. Cartwheel mint luster shines through the frosted patina. Only trivial marks accompany a bold strike that weakens slightly at the outermost elements. Population: 32 in 66 (6 in 66+), 4 finer. CAC: 11 in 66, 4 finer (4/18). NGC ID# 23VR, PCGS# 5524

**PROOF SEATED QUARTERS**

**1857 Seated Liberty Quarter, PR63  
Early and Better Proof Date**

**3666 1857 PR63 NGC.** Proof mintages are unknown for any issue prior to 1859, but PCGS estimates that 75 to 100 proof 1857 quarters have survived, a much lower number than subsequent dates in the series. This example has light golden toning and nicely mirrored fields. The strike shows minor weakness on the eagle's leg feathers and fletchings. Housed in a circa-2000 holder. Census: 5 in 63, 22 finer (4/18). NGC ID# 23WJ, PCGS# 5533

**3667 1858 PR64 PCGS.** Pinkish-gray toning dominates each side of this sharply struck near-Gem. The reverse shows a small die crack from arrowhead 2 to 3 that fades into the field above the O in DOL. The small mintage of 100 coins was from the first year that the Mint began publicly offering proof coins for sale to collectors. Population: 16 in 64 (1 in 64+), 5 finer (4/18).

*Ex: ANA Signature (Heritage, 8/2007), lot 659, where it realized \$2,070.*

**From The Reilly Cody Collection.** NGC ID# 23WK, PCGS# 5554

**1859 Seated Liberty Quarter, PR65  
Second Year of Commercial Proof Offerings**

**3668 1859 PR65 PCGS Secure.** The light gray surfaces of this spectacular Gem proof exhibit green-gold and blue toning on both sides. Sharply defined, this piece has fully mirrored fields that frame the lustrous devices, imparting slight contrast but is insufficient for a Cameo designation. From a mintage of 800 pieces in the second year of the Mint's commercial proof offerings. Population: 11 in 65, 7 finer (4/18). NGC ID# 23WL, PCGS# 5555

**1859 Quarter Dollar, PR65  
Deep Original Toning**

**3669 1859 PR65 NGC. Briggs 1-A.** The commonly accepted figure is 800 proofs produced for this issue, but this gives no accounting of how many sets were actually sold, as a remainder was likely melted or put into circulation (a normal Mint practice of the time). This well-struck Gem proof shows deep toning in shades of aqua, amber, and jade on both sides with generous luster and strong reflectivity. NGC ID# 23WL, PCGS# 5555

**3670 1860 PR64 PCGS Secure. Briggs 9-H.** Type Two Obverse. Type One Reverse. Orange-gold, cherry-red, and navy-blue toning endows the obverse margin. The reverse shows only light peripheral chestnut-gold toning. The left-side stars are lightly brought up, but the rest of the coin is crisply struck. NGC ID# 23WM, PCGS# 5556

**1863 Seated Quarter, PR65  
Splendid Multicolor Toning**

**3671 1863 PR65 PCGS.** Just 460 proofs were struck in 1863, the lowest total since 1858, when the mint began advertising proof sets to the general public. This Gem displays intermingled shades of ice-blue, mauve, and sea-green over glassy, well-preserved surfaces. The devices are frosty and the fields minimally marked. A few tiny specks in the right obverse field preclude a Premium Gem designation. Population: 14 in 65, 12 finer (4/18). NGC ID# 23WR, PCGS# 5559

---

1863 Quarter, PR65 Cameo  
Brightly Reflective

3672 1863 PR65 Cameo PCGS Secure. The obverse die differs from the listed Briggs 4-D. This fully struck Choice proof shows luminous devices that rise above glassy, undisturbed fields. The centers are brilliant but the margins exhibit forest-green patina. A mere 460 proofs were struck for this Civil War date. Population: 5 in 65 Cameo, 4 finer as Cameo, none finer as Deep Cameo (4/18). NGC ID# 23WR, PCGS# 85559

3673 1865 PR64 NGC. Briggs 3-B. Brilliant surfaces have a few delicate lines, but deep mirroring remains intact and the frost-white devices provide good contrast with the glassy silver fields. The strike is just short of full, with slight blending of Liberty's top hair strands. Die rust lumps dot the portrait and QUAR. DOL. is narrowly die doubled at the base. Just 500 proofs were struck. Census: 40 in 64 (1 in 64+), 34 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 23WT, PCGS# 5561

3674 1866 Motto PR63 Cameo NGC. Briggs 2-B. A minimally toned example with strong contrast between the silver-white fields and the moderately frosted devices. The strike is sharp and only light lines and marks are visible under a loupe. The 1866 proof is popular as the first of the With Motto coinage. Census: 6 in 63 Cameo, 28 finer (including four Ultra Cameos) (4/18).

*Ex: Central States Signature (Heritage, 4/2008), lot 839, which realized \$1,265.* NGC ID# 23WX, PCGS# 85565

3675 1868 PR64 NGC. Briggs 2-B, Flynn-RPD-001. Ex: Norweb. Light wheat-gold toning visits the obverse. Freckles of lavender, navy-blue, and tan-brown toning adorn the reverse. Fully struck and nicely mirrored with exemplary surfaces.

*Ex: James B. Wilson Collection (Thomas L. Elder, 10/1908), lot 598, 599, or 600; Albert Fairchild Holden; Emery May Norweb; Norweb Collection, Part II (Bowers and Merena, 3/1988), lot 1633, which realized \$2,970.*

*From The Reilly Cody Collection.* NGC ID# 23WZ, PCGS# 5567

---

1868 Seated Liberty Quarter, PR66  
Registry Grade Example

3676 1868 PR66 PCGS. Quarter dollar mintages remained low in 1868, both in circulation-strike and proof formats. The Philadelphia Mint accomplished a run of 29,400 coins for circulation (though silver did not circulate widely at the time) plus 600 proofs. Like the years immediately preceding and following it, the proofs of 1868 are subject to stronger-than-average demand because of the limited number of well-preserved circulation strikes. Navy and greenish-blue borders give way to red-violet and pumpkin-gold hues, surrounding brilliant centers on each side of this high-end example — a Premium Gem proof of exceptional quality. The pleasingly contrasted surfaces fail to yield any noticeable marks, save for a small planchet flaw (as made) above (I)N G(OD) on the reverse. Population: 11 in 66, 0 finer (4/18).

*Ex: Elite Coin Auction (Superior, 7/2003), lot 1054; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98521, where it brought \$4,112.50.*

*From The Reilly Cody Collection.* NGC ID# 23WZ, PCGS# 5567

3677 1870 PR65+ PCGS Secure. Kaleidoscopic neon toning resonates throughout the glassy obverse margins, while more-tempered iridescence covers the interior elements with complementary hues. The reverse is more traditionally toned with blue borders and dappled, amber-gold shades in the center. Glittering, reflective fields surround sharply struck and frosted raised devices. Any 1870 proof is scarce this fine, and certainly no other high-end Gem can match the vibrant coloration of this representative. Population: 2 in 65+, 4 finer (4/18). NGC ID# 23X3, PCGS# 5569

3678 1872 PR65 PCGS. Briggs 3-C. Shades of pale gold and cerulean-blue toning visit the well-preserved surfaces of this impressive Gem, from a proof mintage of 950 pieces. The design elements are well-detailed and the fields are deeply reflective under the patina. Population: 23 in 65, 13 finer (4/18). NGC ID# 3TWH, PCGS# 5571

---

1872 Seated Liberty Quarter, PR65  
Vivid Multicolor Toning

3679 1872 PR65 NGC. CAC. Briggs 3-C. The toning aficionado is sure to enjoy this vibrant Gem quarter, boldly impressed with strong mirrors beneath the patina. Reddish-orange centers give way to cerulean-blue on each side, and the obverse has an additional crescent of aqua above Liberty's head. A lovely piece. Census: 27 in 65, 11 finer. CAC: 8 in 65, 5 finer (4/18).

*Ex: Milwaukee Signature (Heritage, 8/2007), lot 678, where it realized \$2,070.*

*From The Reilly Cody Collection.* NGC ID# 3TWH, PCGS# 5571

- 3680** 1872 PR66 NGC. Briggs 3-C. Rich cobalt-blue, lavender-red, and peach-gold toning encompasses this well-struck Premium Gem. The glassy fields appear devoid of marks or hairlines. From a proof mintage of just 950 pieces. NGC ID# 3TWH, PCGS# 5571
- 3681** 1873 Arrows PR64 PCGS Secure. Briggs 5-D. A scant 500 proofs were struck for the first year of the two-year Arrows, Motto subtype. The present specimen is well-struck and shows only a trace of peripheral gold patina. No hairlines are readily apparent. Undesignated as Cameo, but white-on-black contrast is nonetheless significant. NGC ID# 23XR, PCGS# 5574
- 3682** 1874 Arrows PR64 NGC. A wormlike die scratch from the upper-left shield edge into the left (facing) wing feathers is an unusual marker for a proof die, but diagnostic on 1874 Arrows proof quarters. This glassy-mirrored proof is nearly brilliant with a whisper of pale-gold patina at the central obverse. A few delicate lines and areas of minor, faint obverse cloudiness are noted, yet this moderately contrasted proof easily achieves its near-Gem grade level. Census: 85 in 64 (1 in 64+, 1 in 64★), 69 finer (4/18). NGC ID# 23XS, PCGS# 5575
- 3683** 1874 Arrows PR64 PCGS Secure. Briggs 5-D. Only a whisper of golden patina visits this prominently mirrored near-Gem. Both sides display considerable white-on-black contrast, although the coin is undesignated as Cameo. A loupe reveals only inconsequential obverse hairlines. A two-year design subtype. NGC ID# 23XS, PCGS# 5575
- 3684** 1877 PR65 Cameo PCGS. Toned medium gold over most of the surfaces with deeper blue around the periphery. The centers show ample mint frost on the figure of Liberty, which clearly stands out from the mirrored fields. One of the finest of the 510 proofs struck and worthy of any top-notch collection. Examination of the surfaces fails to find disturbances aside from minimal hairlines. Population: 7 in 65 Cameo, 8 finer (4/18).  
Ex: Dallas Signature (Heritage, 11/2005), lot 1295, where it realized \$2,070.  
*From The Reilly Cody Collection.* NGC ID# 23X9, PCGS# 85578
- 3685** 1879 PR65 PCGS. Briggs 2-B, identified by a small die lump near the center of the reverse shield. The 1879 proof is scarce in Gem condition and rare finer. This piece displays excellent sharpness and subtle field-device contrast. Light golden obverse toning complements reddish-amber reverse color. A few small dark specks appear on the lower-reverse shield and on the eagle's right (facing) wingtip. Population: 44 in 65 (1 in 65+), 20 finer (4/18).  
*From The Reilly Cody Collection.* NGC ID# 23XB, PCGS# 5580
- 3686** 1880 PR66 NGC. A sensational Premium Gem proof, this 1880 quarter has brilliant silver centers with vibrant gold, blue, and iridescent toning closer to the borders. Obvious cameo contrast is evident on both sides despite the lack of any designation. Census: 23 in 66 (1 in 66★), 22 finer (4/18).  
Ex: Summer FUN Signature (Heritage, 7/2011), lot 3523, where it realized \$2,185.  
*From The Reilly Cody Collection.* NGC ID# 23XC, PCGS# 5581
- 3687** 1880 PR66 PCGS Secure. CAC. Type One Reverse. Richly toned in cerulean-blue and rose-gray shades throughout both sides, this Premium Gem proof displays bold mirroring at the borders that subsides toward the centers amid the deeply toned areas. A sharp strike is consistent throughout smooth surfaces that show virtually no flaws of either pre- or post-mint origin. Population: 43 in 66 (1 in 66+), 15 finer. CAC: 10 in 66, 8 finer (4/18). NGC ID# 23XC, PCGS# 5581
- 3688** 1880 PR65 Cameo NGC. Briggs 2-B. Type Two Reverse. Beautiful ocean-blue, honey-gold, and cherry-red shades endow this sharply struck and exemplary Gem. Cameo contrast is particularly evident on the reverse. Business strikes and proofs combined for a mintage of fewer than 15,000 pieces.  
Ex: Long Beach Signature (Heritage, 9/2007), lot 1252, which realized \$1,725.  
*From The Reilly Cody Collection.* NGC ID# 23XC, PCGS# 85581
- 3689** 1882 PR64 Cameo PCGS. CAC. Briggs 2-B. Sharply struck with frosted and contrasted silver-white devices and mirrored, golden-toned fields. A handful of faint hairlines on each side of Liberty account for the grade, but this Choice Cameo proof 1882 quarter dollar is CAC-approved and highly appealing for the grade.  
Ex: FUN Signature (Heritage, 1/2008), lot 1163, which realized \$1,207.50.  
*From The Reilly Cody Collection.* NGC ID# 23XE, PCGS# 85583
- 3690** 1883 PR66 NGC. Briggs 1-A, Flynn-MPD-001. Kevin Flynn describes the misplaced date variety as "the tops of an 88 or 83 in denticles between the first and second 8 and below the second 8." This is a boldly struck Premium Gem proof with consistent caramel-gold toning. An outstanding representative of this late-series date.  
*From The Reilly Cody Collection.* NGC ID# 23XF, PCGS# 5584
- 3691** 1884 PR66 NGC. Briggs 2-B. Excessive polishing of the proof quarter dies in 1884 caused small areas of reflectivity within the recesses of Liberty's gown and weakened the back of the eagle's left (facing) leg. This Premium Gem is fully struck and displays modest cameo contrast on the obverse along with light champagne toning. On the reverse, olive-gold and blue-gray toning prevents a Cameo designation. No distracting marks are apparent. NGC ID# 3TWH, PCGS# 5585
- 3692** 1884 PR65 Cameo PCGS. Briggs 2-B. Sea-green, cobalt-blue, plum-red, and tan-brown toning invigorate the borders of this well-struck Gem. The flashy fields are devoid of detractions. A meager 875 proofs were produced. Population: 11 in 65 Cameo, 24 finer (4/18).  
*From The Reilly Cody Collection.* NGC ID# AEZK, PCGS# 85585

### 1886 Quarter, PR65 Deep Cameo Rare So Well-Contrasted

- 3693** 1886 PR65 Deep Cameo PCGS Secure. Briggs 2-B. Deep Cameo examples of the proof 1886 Seated quarter are scarce in all grades. This piece is brilliant, allowing for full appreciation of the starkly contrasted devices. The depth of mirroring in the fields is captivating, and only a few stray lines are visible under a loupe. The only strike weakness occurs on some of the obverse border stars, where it is not distracting. Population: 1 in 65 Deep Cameo, 11 finer (5/18). NGC ID# 23XJ, PCGS# 95587

- 3694** 1889 PR66 Cameo PCGS Secure. CAC. Briggs 2-B. Exceptional white-on-black contrast proclaims the eye appeal. A bold strike and exemplary preservation confirm the quality. Faint russet and apple-green freckles visit the fields. One small speck is noted between star 1 and Liberty's rock. Population: 12 in 66 (1 in 66+) Cameo, 5 finer. CAC: 7 in 66, 1 finer (4/18). NGC ID# 23XM, PCGS# 85590

- 3695** 1891 PR66 NGC. CAC. Briggs 1-A. This is one of 600 proof quarter dollars struck in 1891, the final year of the Seated Liberty design. The CAC approval sticker is well-deserved, as each side offers gorgeous shades of lilac-gray, olive, and ice-blue patina that fail to mar reflectivity in the fields. Housed in a prior generation holder. CAC: 16 in 66, 1 finer (4/18).  
*From The Reilly Cody Collection.* NGC ID# 23XP, PCGS# 5592

## BARBER QUARTERS

**3696** 1892-O MS65 PCGS Secure. Type One Reverse. A well-struck and lustrous first-year New Orleans Gem. The borders display light wheat-gold toning. Refreshingly free from marks or other detractions. The obverse border exhibits an orange-peel texture, as made, from long-in-use dies. Population: 37 in 65 (2 in 65+), 27 finer (4/18). NGC ID# 23XU, PCGS# 5602

**3697** 1896-O MS63 PCGS. The 1896-O Barber quarter is an elusive issue in high grade. This impressive Select specimen offers well-detailed design elements and well-preserved silver-gray surfaces, with satiny mint luster throughout. Population: 14 in 63, 24 finer (5/18). NGC ID# 23Y8, PCGS# 5614

### 1896-O Quarter, MS64 Scarce Issue in the Barber Quarter Series

**3698** 1896-O MS64 NGC. Of this issue, David Lawrence (1994) notes: "Very scarce in Fine and above." This should come as no surprise to students of the Barber quarter series, since the majority of the 1.4 million coins delivered by the New Orleans Mint this year entered circulation and remained there. This fortunate survivor is free of the abrasions often associated with the MS64 grade. The outward appearance is one of frosty-white brilliance, save for a faint grease streak (as struck) in the obverse field area just to the right of Liberty's mouth. Well-struck for an O-mint issue and exceptionally appealing for the grade. Census: 19 in 64, 14 finer (4/18). NGC ID# 23Y8, PCGS# 5614

**3699** 1901-S AG3 NGC. CAC. This piece is well-circulated but evenly worn. The obverse grades Good 4 by itself, but the reverse merges the border legends with the rim uniformly around the periphery. Original battleship-gray patina and smooth surfaces deliver strong eye appeal. NGC ID# 23YR, PCGS# 5630

### 1904 Quarter Dollar, MS66 Original Toning, Old 'Rattler' Holder

**3700** 1904 MS66 PCGS. The 1904 Barber quarter is rare in MS66, and only a few coins are known finer. This piece is satiny and luminous with original luster. Mottled copper-orange, gold, and olive-russet toning appears over most of each side but leaves areas of silvery brilliance. No distracting abrasions are seen under a loupe, and the only discernible strike weakness is on a few obverse stars and the eagle's right (facing) talons. Housed in a first generation holder. Population: 11 in 66 (1 in 66+), 2 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 23YY, PCGS# 5637

**3701** 1907-O MS65 PCGS. Highly lustrous and boldly struck, this attractive Gem displays a light coating of speckled tan color over the obverse, while the reverse remains brilliant. Well-struck overall in spite of minor softness on the claws. The reverse is pristine, and the obverse has only faint marks on the cheek and a trace of a fingerprint near 9 o'clock. Population: 17 in 65 (1 in 65+), 19 finer (4/18). NGC ID# 23ZA, PCGS# 5647

**3702** 1908-D MS66 ★ NGC. An exceptional representative of this important condition rarity, featuring peripheral gold and blue toning on both sides that frame the brilliant silver centers. A sharply defined Premium Gem for the Barber quarter specialist. Census: 5 in 66 (1 in 66 ★), 4 finer (5/18). NGC ID# 23ZD, PCGS# 5650

**3703** 1909-O AU53 PCGS Secure. From a low mintage of 712,000 pieces, the 1909-O Barber quarter is a scarce issue in high grade. This attractive AU53 specimen offers lightly abraded surfaces that retain most of their original mint luster. The strongly impressed design elements show just a trace of wear. Population: 4 in 53, 61 finer (5/18). NGC ID# 23ZJ, PCGS# 5655

**3704** 1912-S MS66 PCGS Secure. The 1912-S Barber quarter is underrated due to the rarity of the three other important S-Mint issues dated 1896, 1901, and 1913. Just 708,000 quarters were minted in San Francisco in 1912. One of those is this Premium Gem that exhibits pale champagne toning over brilliant and frosty silver luster. Population: 14 in 66 (2 in 66+), 4 finer (5/18). NGC ID# 23ZT, PCGS# 5663

### 1915-S Barber Quarter, MS66+ Pastel Toning, Vibrant Luster

**3705** 1915-S MS66+ PCGS. Mint luster glistens across the silky-smooth surfaces of this high-end Premium Gem, while a faint pale-violet and ice-blue hues add a translucent glow of color. A splash of brassy-gold toning along the rim at stars 4 to 6 provides a distinctive pedigree marker. A touch of softness on the eagle's right (facing) talons and the fletchings, as well as star 11 on the obverse, is all that subtracts from an otherwise apparently sharp strike. David Lawrence called this San Francisco issue "ticky-tacky" for the unavoidable marks that appear on even high-grade pieces. This coin has a few, but they are exceedingly minor in light of the overwhelming eye appeal. Population: 23 in 66 (3 in 66+), 4 finer (5/18). NGC ID# 2424, PCGS# 5672

**3706** 1916-D MS66+ PCGS Secure. CAC. The 1916-D is a plentiful issue, and as the final Denver coin in the Barber quarter series it is popular for type purposes. This high-end Premium Gem is not only well-preserved, it is beautifully toned. Lavender-gold and lilac-gray hues cover the interiors, ceding to forest-green, russet, and orange-red borders. Several obverse stars and the right corner of the reverse shield are slightly soft. PCGS lists 18 finer examples (4/18). NGC ID# 2426, PCGS# 5674

## PROOF BARBER QUARTERS

- 3707 1892 PR66 Cameo PCGS Secure.** Type Two Reverse. This glimmering Premium Gem proof is starkly contrasted and needle-sharp, showing frost-white devices. Warm golden border toning on each side frames the interiors. The first-year Barber quarter proof is a popular type coin, although examples are elusive in grades finer than the present. Population: 21 in 66 (4 in 66+) Cameo, 18 finer; 9 in 66 Deep Cameo, 16 finer (4/18). NGC ID# CEF4, PCGS# 85678

**1893 Quarter, Toned PR67**  
**Subtle Obverse Contrast**

- 3708 1893 PR67 PCGS.** This Superb Gem proof might have qualified for a Cameo designation were it not for dusky champagne, russet, and sea-green toning that appears over much of each side. Modest contrast is readily apparent on the obverse despite the patina. This razor-sharp proof type coin displays no bothersome contact marks. Population: 18 in 67, 4 finer; 14 in 67 Cameo, 8 finer; 6 in 67 Deep Cameo, 2 finer (5/18). NGC ID# 2428, PCGS# 5679

- 3709 1894 PR64 Cameo PCGS Secure.** An intricately struck Choice proof that shows a hint of powder-blue and tan-gold toning along the right obverse periphery. A mere trace of struck-in grease is located beneath the I in UNITED. The mirrored fields exhibit a few trivial hairlines. NGC ID# 2429, PCGS# 85680

- 3710 1895 PR64 Cameo PCGS. CAC.** This modestly contrasted proof is nearly untoned in the centers but shows deep blue-green and lavender border coloration. The strike is razor-sharp, as expected for this well-made proof issue. No major contact marks are observed. Population: 21 in 64 (2 in 64+) Cameo, 47 finer. CAC: 9 in 64, 37 finer (5/18). NGC ID# 242A, PCGS# 85681

- 3711 1897 PR66 Cameo PCGS Secure.** This well-contrasted, high-end proof Cameo is also needle-sharp. Both sides display uniform champagne toning and are mark-free. Eye appeal excels. The 1897 proof Barber quarter is occasionally available as a Cameo, but such coins are scarce this fine. Population: 18 in 66 (2 in 66+) Cameo, 15 finer; 4 in 66 Deep Cameo, 8 finer (4/18). NGC ID# 242C, PCGS# 85683

- 3712 1898 PR65 Cameo NGC.** A sharp Gem, this proof 1898 Barber quarter displays champagne-gold toning on each side with stark cameo contrast on the obverse. The mirrors are well-preserved, and the devices show frosty mint luster. A suitable date or type representative. NGC ID# 242D, PCGS# 85684

- 3713 1910 PR66 PCGS Secure.** The obverse of this Premium Gem proof is predominantly sun-gold and cherry-red, while the reverse displays more mellow sea-green and champagne hues. Both sides are sharp and free of distractions, and modest cameo contrast is apparent through the patina. NGC ID# 242S, PCGS# 5696

- 3714 1912 PR65 Cameo PCGS Secure.** The 1912 Barber quarter proof is rare in high Cameo grades and is almost unknown with Deep Cameo contrast at any level. This Gem Cameo is sharp and well-contrasted beneath warm golden toning. Neither side shows bothersome contact marks. Population: 11 in 65 Cameo, 19 finer (including 1 in 66 Deep Cameo) (4/18). NGC ID# 242U, PCGS# 85698

**1913 Quarter, Richly Toned PR67**

- 3715 1913 PR67 PCGS Secure.** Non-Cameo 1913 proof quarters are scarce this fine, and Cameos are rare; no Ultra Cameos are reported at PCGS in any grade (4/18). This sharp, toned Premium Gem displays rose-gold and peach borders around sea-green interiors. No distracting marks are seen. Population: 13 in 67 (3 in 67+), 3 finer, 9 in 67 Cameo, two in 68 Cameo (4/18). NGC ID# 242V, PCGS# 5699

## STANDING LIBERTY QUARTERS

- 3716 1917 Type One MS66 Full Head PCGS.** A hint of rose-gold toning graces the Premium Gem surfaces of this Type One Standing Liberty quarter. The strike is sharp throughout, even on Liberty's head, although the early PCGS holder does not mention the Full Head detail. This is a well-preserved and a highly appealing type coin, housed in a first generation holder.

*From The Tuxedo Park Collection.* NGC ID# 242Z, PCGS# 5707

- 3717 1917 Type One MS66 Full Head NGC.** This brilliant Full Head coin displays fresh satin luster and sharp detail throughout each side. The rims are broad and squared, and no heavy abrasions are seen. The Type One 1917 quarter dollar was heavily saved at the time of issue and is the date of choice for type collectors. NGC ID# 242Z, PCGS# 5707

- 3718 1917-D Type One MS66 PCGS Secure. CAC.** Frosty original luster shows a dusting of russet toning over this mostly unabraded CAC coin. Although Liberty's head is not fully struck, the overall quality of this piece is excellent. Population: 29 in 66 (2 in 66+), 5 finer. CAC: 5 in 66, 0 finer (5/18). NGC ID# 2432, PCGS# 5708

- 3719 1917-D Type One MS66 Full Head PCGS Secure.** Rose-gold toning with some greenish tints blankets the lustrous, satiny surfaces of this Premium Gem Full Head coin. The strike is sharp, and neither side exhibits bothersome abrasions. The 1917-D Type One quarter is available in this grade, but PCGS has seen only 30 finer Full Head coins (4/18). NGC ID# 2432, PCGS# 5709

- 3720 1918-D MS64 Full Head PCGS. CAC.** The luster on this near-Gem is simply magnificent, undeniably original, and attractively toned. Russet, amber, and olive tinges appear along the borders, but most of the coin has a delicate pastel hue. No distracting abrasions are seen. The dies are in a late state on this piece, showing several cracks and some erosion around the borders. A deficient central strike affects both sides, as is seen to some extent on most 1918-D quarters, although Liberty's head is most definitely full. CAC: 17 in 64, 13 finer (5/18). NGC ID# 3TWU, PCGS# 5723

---

**1918-D Quarter, MS65 Full Head  
Boldly Struck, Lustrous Example**

- 3721 **1918-D MS65 Full Head PCGS Secure.** This attractive Gem representative exhibits sharply detailed design elements in most areas, with Full Head definition and just a trace of softness on the shield rivets. The virtually flawless surfaces radiate satiny mint luster with a few subtle hints of golden-tan and lavender toning. Population: 64 in 65 (2 in 65+) Full Head, 33 finer (4/18). NGC ID# 3TWU, PCGS# 5723
- 

**1918-D Standing Liberty Quarter, MS65  
Scarce Full Head Example**

- 3722 **1918-D MS65 Full Head PCGS Secure.** This impressive Gem exhibits Full Head definition on the obverse, with just a touch of the usual incompleteness on the shield's rivets. The reverse strike is also better-than-average, with just a trace of softness on the eagle's belly. Both sides display well-preserved surfaces with vibrant, satiny mint luster. Population: 64 in 65 (2 in 65+) Full Head, 33 finer (4/18). NGC ID# 3TWU, PCGS# 5723
- 

- 3723 **1918-S MS65 PCGS. CAC.** The head details, shield edge, and sash are almost always incomplete on the 1918-S to one extent or another, as represented by this lustrous Gem example. Numerous obverse die cracks exist in the date area and along the left margin between 9 and 10 o'clock. Creamy, brilliant mint luster provides outstanding eye appeal that offsets any deficiencies of strike. CAC endorsed, housed in a previous generation green label holder. Population: 78 in 65 (1 in 65+), 26 finer. CAC: 15 in 65, 11 finer (4/18). NGC ID# 2439, PCGS# 5724
- 

- 3724 **1919 MS66+ PCGS Secure. CAC.** This frosty, radiantly lustrous Premium Gem displays a hint of champagne tinting overall with olive accents along the right obverse border. No abrasions are seen. Liberty's toes, the shield rivets, date, and stars are sharply defined, and Liberty's head shows weakness only on the temple. The reverse is comparably well-defined. NGC ID# 243B, PCGS# 5728
- 

- 3725 **1919-D MS61 ANACS.** The design elements of this well-detailed Mint State specimen show a touch of softness on the usual trouble spots, like the head and shield rivets. The lightly toned surfaces are minimally marked for the grade, with slightly subdued mint luster. NGC ID# 243C, PCGS# 5730
- 

3726 **1920 MS65 Full Head NGC. Gold CAC.** The glistening, frosty luster on this Gem 1920 Standing Liberty quarter is original, cast in mottled peach-gold and bronze-colored toning. All design elements are pleasantly sharp save for the 1 in the date and a portion of Liberty's temple, although the requirements for a Full Head designation are present. Housed in a prior generation holder, and the sole Gold CAC 1920 quarter, an indication that the graders at CAC believe it is undergraded by at least one point. The coin certainly has immense eye appeal. NGC ID# 243E, PCGS# 5735

3727 **1920-D MS63 Full Head NGC.** This is a frosty coin with light golden toning and original luster. Liberty's head is well-defined, which is a challenging attribute to find on the 1920-D. A few light marks are present, but the overall eye appeal is pleasing for the grade. The date numerals are weak at the top but fully outlined. Census: 13 in 63 Full Head, 41 finer (5/18). NGC ID# 243F, PCGS# 5737

3728 **1921 MS63 PCGS Secure. CAC.** This is a frosty CAC-approved example with light golden toning overall. Scattered small marks account for the grade. The 1921 Standing Liberty quarter is known for being sharp on the shield but slightly weak on the date and Liberty's temple. This piece is a trifle weak in both locations, lacking a Full Head designation. NGC ID# 243H, PCGS# 5740

---

**1921 Quarter, MS63 Full Head  
Sharp CAC-Approved Coin**

3729 **1921 MS63 Full Head PCGS. CAC.** Frosty luster is original on this CAC-approved Full Head coin, cast in mottled olive toning on each side. A few well-hidden abrasions on the obverse limit the grade. Sharp head detail, shield rivets, and date numerals give this coin its appeal. While the 1921 is often seen with sharp shield rivets, head and date definition are usually lacking. NGC ID# 243H, PCGS# 5741

---

**1921 Quarter, MS64 Full Head  
Sharp Head and Shield**

3730 **1921 MS64 Full Head PCGS Secure.** The first 1 in the date is slightly flat, but Liberty's head and toes, the shield rivets, and all of the other troublesome design elements are sharp. This Choice 1921 Standing Liberty quarter displays satiny luster and light golden toning with prominent clash marks in the recesses of Liberty's gown. A semikey date that is always in demand with Full Head detail. NGC ID# 243H, PCGS# 5741

---

**3731** 1923 MS64 Full Head NGC. The sharp strike of this near-Gem includes the date, Liberty's toes, the shield lines and rivets, and Liberty's head. The student of this series will notice trivial weakness on the temple, but the overall definition earns a Full Head designation from NGC. Satiny luster shows light golden toning on each side. Census: 40 in 64 (1 in 64+) Full Head, 43 finer (5/18). NGC ID# 243J, PCGS# 5743

**3732** 1923-S AU53 NGC. Well-struck with modest high-point wear on the predominantly silver-gray surfaces. Elements of olive and golden-brown visit the margins, and the lower right obverse field shows a patch of similar patina. The date numerals and Liberty's temple are sharp on this AU coin, although weakness in the area of the ear prevents a Full Head designation.

Ex: Central States Signature (Heritage, 4/2008), lot 918, which realized \$1,725. NGC ID# 243K, PCGS# 5744

#### 1923-S Standing Liberty Quarter, MS64 Vibrant Frosted Mint Luster

**3733** 1923-S MS64 PCGS Secure. CAC. The 1923-S Standing Liberty quarter is a better date in the series, from a smallish mintage of 1.3 million pieces. This attractive Choice specimen offers well-detailed design elements, with just a touch of the typical softness on the shield rivets. Both sides are lightly marked and lustrous with outstanding eye appeal. NGC ID# 243K, PCGS# 5744

**3734** 1924 MS67 PCGS. CAC. Available in lower grades, the 1924 Standing Liberty quarter is a rarity in MS67. This non-Full Head coin displays sharp shield rivets and clear date numerals but is weak on Liberty's temple and the right-hand reverse stars. Satiny surfaces show almost flawless preservation, toned lavender-gray across the interiors with deeper olive and russet color around the borders. Population: 16 in 67 (2 in 67+), 2 finer. CAC: 9 in 67, 2 finer (4/18). NGC ID# 3TWY, PCGS# 5746

#### 1924-S Quarter, MS65 Full Head Scarce This Well-Defined

**3735** 1924-S MS65 Full Head NGC. J.H. Cline wrote in *Standing Liberty Quarters* (fourth edition) that less than 2% of surviving 1924-S quarters show Full Head definition and about 5% of the total population is known in Gem condition. This strong MS65 Full Head coin features frosty luster over each side. The obverse is minimally toned with faint golden accents. Similar hues are more prevalent on the reverse, where they coalesce with glints of lavender and powder-blue. Census: 32 in 65 (1 in 65+) Full Head, 6 finer (5/18). NGC ID# 243N, PCGS# 5751

**3736** 1925 MS66 Full Head PCGS. The 1925 quarter dollar is not particularly rare overall, but series specialists often spend years searching for a high-end Full Head coin that is "just right," since satiny luster and uneven strikes often lend to unimpressive eye appeal even in high grades. This Premium Gem is sharp on the head, shield rivets, and toes, and the luster is slightly more luminous than usual. A dusting of champagne-gold toning is deepest on the obverse. Population: 85 in 66 (3 in 66+) Full Head, 14 finer (4/18). NGC ID# 243P, PCGS# 5753

#### 1927-D Quarter, MS66 Full Head Rare in This High Grade

**3737** 1927-D MS66 Full Head PCGS. The 1927-D is underrated in high-grade Full Head. This Premium Gem example is conditionally rare and among the finest certified at PCGS. The surfaces display satiny luster with irregular splashes of olive, gold, russet, and amber toning. Struck from worn dies but with adequate head detail on the figure of Liberty. The shield and toes are not fully defined. Population: 20 in 66 (2 in 66+) Full Head, 1 finer (4/18). NGC ID# 243V, PCGS# 5763

#### 1927-S Quarter Dollar, AU58 Above-Average Head Detail

**3738** 1927-S AU58 PCGS Secure. Specialists of the series should pay close attention this near-Mint 1927-S Standing Liberty quarter. Satiny original luster glows in the fields and recesses, and the high points of the central devices show trivial friction. Both sides are russet-gold overall, but the obverse has a small area of deeper amber toning near Liberty's knee that will serve for future pedigree purposes. But the hallmark of this coin is the head detail. The 1927-S is famously a "flat head issue," but this piece is sharp on the temple and only slightly weak in the area of the ear. That feature alone sets this coin apart from its peers. NGC ID# 243W, PCGS# 5764

---

**1928-D Standing Liberty Quarter, MS64  
Attractive Full Head Specimen**

**3739 1928-D MS64 Full Head NGC. CAC.** This attractive Choice example exhibits sharply detailed design elements in most areas, with Full Head definition and just a touch of the usual softness on the shield rivets. Vibrant satiny mint luster radiates from the well-preserved brilliant surfaces on both sides, with outstanding eye appeal. Census: 21 in 64 Full Head, 35 finer. CAC: 4 in 64, 16 finer (4/18). NGC ID# 243Y, PCGS# 5769

**3740 1928-S MS66 Full Head PCGS Secure. CAC.** The 1928-S is a frequently seen issue in high grades, so collectors can be picky when it comes to eye appeal. This CAC-endorsed Full Head coin offers luminous satin luster with a hint of iridescence and no distracting abrasions. Liberty's head and toes are well-struck, although the shield rivets exhibit the almost unavoidable weakness associated with this issue. PCGS lists 24 finer Full Head 1928-S quarters (4/18). NGC ID# 243Z, PCGS# 5771

**1928-S Quarter, MS67 Full Head  
Frosty Luster, Attractive Toning**

**3741 1928-S MS67 Full Head NGC.** Large S. A high-end, conditionally scarce Full Head example of an otherwise common San Francisco issue. This Superb Gem 1928-S quarter offers glistening, frosty mint luster and unmarked surfaces. Trivial softness in the area of Liberty's ear does not prevent a Full Head designation from NGC. Both sides exhibit original champagne, olive, and russet toning. Census: 42 in 67 (4 in 67+ Full Head, 2 in 67 ★), 3 finer (4/18). NGC ID# 243Z, PCGS# 5771

---

**1929-S Quarter, MS67 Full Head  
Scarce in This Grade**

**3742 1929-S MS67 Full Head NGC.** J.H. Cline once noted that many 1929-S quarters designated as Full Heads have sharper head detail than other San Francisco issues with the same designation. This piece is indeed well-struck, although the shield rivets are soft — an almost unavoidable characteristic of the 1929-S. A trace of champagne toning covers frosty luster, and no bothersome abrasions are visible. Census: 34 in 67 (2 in 67+ Full Head, 5 in 67 ★), 2 finer (4/18). NGC ID# 2444, PCGS# 5777

## WASHINGTON QUARTERS

**3743 1932-D MS63 PCGS Secure.** The 1932-D is far scarcer than the 1932-S in MS63 grade or finer, making it the series key in those grades. This Select Uncirculated example displays an original skin of lilac-gray toning and adds olive-gray accents on the reverse. Silver luster resides fully beneath the comprehensive patina. The strike is sharp throughout both sides. NGC ID# 2448, PCGS# 5791

**3744 1932-D MS64 PCGS Secure.** The luster on this near-Gem is especially frosty and luminous, showing delicate hints of champagne and ice-blue color. Some small abrasions — including a vertical line in the left obverse field — prevent Gem classification. An appealing example of this key Denver issue. NGC ID# 2448, PCGS# 5791

**3745 1932-D MS64 PCGS.** The 1932-D is a series key based on its low mintage of just 436,800 pieces, and the issue becomes truly scarce any finer. This near-Gem example displays original silver coloration with streaky umber-gold toning and softly lustrous surfaces. The strike is extra-sharp for the issue. NGC ID# 2448, PCGS# 5791

**3746 1932-S MS65 PCGS Secure.** This is a lovely Gem with delicate lavender-gold and silvery toning over frosted mint luster. The strike is sharp and no abrasions are bothersome. The 1932-S is available in this grade but rare finer, with only four coins so graded at PCGS (4/18). NGC ID# 2449, PCGS# 5792

**3747 1932-S MS65 PCGS Secure.** Satiny mint luster shows no singular marks on this Gem 1932-S quarter dollar. Mottled russet toning over each side attests to the originality of the surfaces, which is a welcome attribute on a key-date Washington quarter. Gem examples of this issue are occasionally available, but PCGS has seen only four finer pieces (4/18). NGC ID# 2449, PCGS# 5792

**3748 1932-S MS65 PCGS Secure.** This is a lovely Gem with satin luster and brilliant surfaces. Washington's cheek is clean, setting a standard for the rest of the surfaces that is rarely missed as a person's loupe moves across each side. The strike is also sharp. PCGS lists four higher-grade 1932-S quarters (4/18). NGC ID# 2449, PCGS# 5792

**3749 1934 Heavy Motto, FS-403, MS67 PCGS.** Attractively toned in apple-green and rose-red hues. A lustrous and virtually pristine Superb Gem. The strike is bold save for the right-side peripheral legends. Among 1934 quarters, the Heavy Motto is scarcer than the Medium Motto, but more available than the Light Motto. Population: 14 in 67 (3 in 67+), 0 finer (4/18). PCGS# 146001 Base PCGS# 85794

**3750** 1940-S MS67+ PCGS Secure. CAC. The 1940-S is neither rare nor challenging to find up to the Superb Gem level, but finer coins are virtually nonexistent. This high-end, CAC-endorsed Superb Gem displays the all-important Plus designation by PCGS. A band of rainbow toning occupies the obverse margin, and diminishes to a faint speckling of russet patina over the sharply struck, virtually unmarked surfaces. Population: 12 in 67+, 1 finer. CAC: 47 in 67, 0 finer (4/18). NGC ID# 3TEK, PCGS# 5813

**3751** 1944-S MS68 NGC. For Registry Set collections, the 1944-S Washington quarter is a great condition rarity in MS68 with no MS69 examples known. This piece is sharp and frosty with unmarked surfaces. The obverse has vivid green-gold, lemon-yellow, and amber-orange toning, while the reverse is brilliant. Census: 7 in 68 (1 in 68+, 2 in 68 ★), 0 finer (4/18). NGC ID# 245A, PCGS# 5826

**3752** 1948-D MS67+ PCGS Secure. CAC. A Plus-graded Superb Gem example of this popular issue, with sharply detailed design elements and vivid shades of sea-green and magenta toning. Vibrant mint luster shines through the patina and the surfaces are impeccably preserved. Population: 80 in 67 (10 in 67+), 0 finer. CAC: 31 in 67, 0 finer (5/18). NGC ID# 245M, PCGS# 5837

**3753** 1950-S/D FS-601 MS66+ PCGS Secure. CAC. This is a brilliant and frosted example of the overmintmark, a popular *Cherrypickers'* variety and listed on page 191 in the 2019 *Guide Book*. While the S Over D is the pièce de résistance for this high-end Premium Gem quarter, the sharply struck, mark-free surfaces and vibrant silver luster with CAC endorsement rank it close to the finest-known of the variety. Population: 12 in 66+, 6 finer. CAC: 24 in 66, 2 finer (4/18). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

**3754** 1960-D MS67 NGC. A richly toned representative that likely acquired its patina from Mint set packaging. Strongly detailed for the issue with slivers of brilliance surrounded by powerful golden-tan and rose patina. Impressively preserved and immensely lustrous with amazing visual appeal. Census: 18 in 67 (2 in 67★), 0 finer (4/18).

Ex: ANA Signature (Heritage, 7-8/2008), lot 353, where it brought \$1,725. NGC ID# 3TEX, PCGS# 5869

#### 1962-D Quarter, MS67 One of Finest Certified at PCGS

**3755** 1962-D MS67 PCGS. To date, this 1962-D quarter ranks as one of the 10 finest (at maximum) PCGS-graded survivors from a mintage of more than 127.5 million pieces. Surface ticks and/or impaired luster are the usual culprits that keep the vast majority of Mint State coins from reaching such exalted grade levels. The Mint's emphasis was on quantity, not quality, and the coins show it. This is a simply stunning and flawless coin, untoned save for a faint wash of gold, pristine and boldly struck throughout. Population: 10 in 67 (1 in 67+), 0 finer (4/18). NGC ID# 246R, PCGS# 5873

#### SMS WASHINGTON QUARTERS

**3756** 1967 SMS MS69 Cameo NGC. Whether one calls these pieces Mint State or Specimen, the fact is that they are highly collectible and rarely located with practically perfect surfaces. This Superb Gem Cameo example is brilliant and prominently mirrored with bold and frosty design motifs. Census: 2 in 69 Cameo, 0 finer (5/18). NGC ID# 2494, PCGS# 85999

#### 1967 SMS Quarter, MS68 Ultra Cameo

Top-Grade Registry Coin

**3757** 1967 SMS MS68 Ultra Cameo NGC. Although struck for the Special Mint Sets of 1967, this Washington quarter displays all of the sharpness and cameo contrast of a proof. Virtually flawless surfaces show no toning and have a stark white-on-black appearance. NGC lists only 28 Ultra Cameo examples of this issue, with five in this grade and none finer (5/18). NGC ID# 4C6S, PCGS# 95999

#### PROOF WASHINGTON QUARTERS

**3758** 1937 PR67+ PCGS Secure. CAC. The apricot-gold centers are bounded by plum-red, peach-gold, and cobalt-blue borders. Fully struck and flashy without evidence of contact. A tiny fleck or two is noted on the back of Washington's neck. NGC ID# 27HP, PCGS# 5976

#### 1940 Washington Quarter, Mirrorlike PR68 Lightly Toned and Attractive

**3759** 1940 PR68 PCGS Secure. Dappled olive-gray and reddish-gold toning accent the brilliant-silver surfaces of this highly reflective Superb Gem quarter. Isolated areas of rainbow iridescence appear at the borders. The strike is needle-sharp. This is one of the finest survivors from a mintage of 11,246 proofs — neither PCGS or NGC reports any examples in a numerically finer grade. Population: 6 in 68, 0 finer (4/18). NGC ID# 27HT, PCGS# 5979

**1940 Quarter, Splendid PR68  
None Finer, Regardless of Service**

- 3760 1940 PR68 PCGS Secure. CAC.** Vibrant and attractive rainbow toning covers half of the obverse surface area, giving this high-grade Washington proof an arresting visual impression. Similar toning is restricted to the peripheries of the reverse. The surfaces are nearly perfect and pleasingly iridescent in the lightly toned areas. The immaculate fields are deeply mirrored. Neither grading service has certified a finer example. Population: 6 in 68, 0 finer. CAC: 8 in 68, 0 finer (4/18). NGC ID# 27HT, PCGS# 5979

**3761 1942 PR68 NGC. CAC.** The 1942 proof Washington quarter is a rarity this fine, and few pieces are known with a CAC endorsement. This coin displays beautiful rainbow border toning on both sides with brilliant centers. Fully struck design elements complement liquidlike mirroring in the fields. Census: 23 in 68 (3 in 68 ★), 1 finer. CAC: 11 in 68, 0 finer (5/18). NGC ID# 27HV, PCGS# 5981

**3762 1952 PR68 Cameo PCGS Secure.** The 1952 proof Washington quarter is a rarity in Deep Cameo grades, and none at PCGS are finer than PR67. This PR68 Cameo is a prime Registry Set candidate. Starkly contrasted white-on-black surfaces are virtually flawless and show no toning. Population: 10 in 68 Cameo, 0 finer (5/18). NGC ID# 248X, PCGS# 85984

**3763 1954 PR68 Deep Cameo PCGS.** An incredible Superb Gem Deep Cameo proof, this brilliant and untoned Washington quarter exhibits deeply mirrored fields in full contrast with the lustrous and sharply defined devices. Population: 26 in 68 (1 in 68+) Deep Cameo, 0 finer (5/18). NGC ID# 27HY, PCGS# 95986

***End of Session One***

## SESSION TWO

## COLONIALS

1662 Oak Tree Twopence, MS63  
Large 2, Noe-34, W-240, Salmon 1-B  
Finest Known for the Variety

**3764** 1662 Oak Tree Twopence, Large 2, MS63 NGC. Noe-34, W-240, Salmon 1-B, R.5. 12.6 grains. The Oak Tree twopence is the only denomination of its kind in the Massachusetts Colonial series. All examples are struck from a single pair of dies that underwent various alterations to the date over time. This piece, corresponding to Crosby 1-A1, Noe-34, and Salmon 1-B is a late state of the dies with a Large 2 recut from a previous Small 2 and a horizontal break left of the 1 through the beads to the W. Two of the finest examples of Noe-34 were sold in early 2015. We had the pleasure of handling the Norweb-Partrick representative in MS61 as part of our 2015 FUN Signature, while the Hain-Kendall coin in AU50 was sold by Stack's Bowers in March 2015. This MS63 representative deserves to be considered among those esteemed examples. Indeed, from a technical perspective it is finer. Although the obverse is slightly off-center toward 6:30 on the somewhat elongated flan, all the devices are clear and the strike is absolutely razor-sharp. The reverse is flawlessly centered and better-defined than either the Partrick or Kendall coins. Rich stone-gray patina with olive accents adorns each impeccably preserved side. Listed on page 50 of the 2019 Guide Book. NGC ID# 2ARE, PCGS# 45356 Base PCGS# 17

1652 Oak Tree Shilling, AU53

Noe-5, IN at Bottom

Sharp Colonial Type Coin

- 3765** 1652 Oak Tree Shilling, IN at Bottom, AU53 PCGS. Noe-5, W-470, Salmon 3-D, R.2. 72.1 gn. The usual die state with a looming linear break on the upper-obverse margin and slender reverse breaks near the ND AN. A well-defined and inoffensively granular lavender-gray representative. The reverse exhibits ideal centering, while the obverse is misaligned several degrees toward 6 o'clock. The surfaces exhibit the S-wave customary for rocker press coinage. A small vertical lamination is seen on the lower-right portion of the tree, and a spot and minor mark at 6 o'clock on the reverse. Listed on page 51 of the 2019 Guide Book. NGC ID# 2ARL, PCGS# 45362 Base PCGS# 20

1652 Pine Tree Shilling, VF35

Small Planchet, Noe-29, W-930

- 3766** 1652 Pine Tree Shilling, Small Planchet, VF35 PCGS. Noe-29, W-930, Salmon 11-F, R.3. 70.68 grains. The L in ENGLAND is directly over the 5, and the W in NEW is left of the X. Although this is called the Heavy 5 variety, the strength of that digit matches the others in the date. The obverse is struck off-center toward 9 o'clock, cutting off most of MASAT, but the visible motifs are strong. Several die cracks are noted. The reverse is nicely centered with softness on the lower border. Each side features deep stone-gray surfaces. Listed on page 51 of the 2019 Guide Book. NGC ID# 2ARZ, PCGS# 24

(1688) American Plantations Token, AU53

Newman 3-C, Sidewise 4 Rarity

- 3767** (1688) American Plantations 1/24 Part Real, Sidewise 4, AU53 NGC. Newman 3-C, W-1145, R.7. Die alignment: 360°. The Sidewise 4 variety of this enigmatic series, of which only eight or nine examples are known. This is the second finest graded by NGC, exceeded only by the MS61 example recently sold in our November 2017 Newman IX sale (lot 15014, for \$21,600). This piece boasts a consistent medium gray coloration and strong detail. While it bears obvious signs of circulation, it has no real problems, unlike most of these tokens. The granularity that develops on tin coins is not advanced here, and it shows no "tin pest." Restrikes were not made with either of these dies. Listed on page 53 of the 2019 Guide Book. Census: 1 in 53, 1 finer (4/18). NGC ID# AUB4, PCGS# 50

1776 EG FECIT Pewter Dollar, MS67  
The Finest Known Continental Dollar  
Newman 3-D, Ex: Brand-Boyd-Ford

**3768 1776 Continental Dollar, CURRENCY, Pewter, EG FECIT, MS67 NGC.** Newman 3-D, W-8460, R.4. 268.1 grains. Twin olive leaf edge device. The 1776 Continental dollar is an enigmatic, complex issue that has fascinated numismatists for more than 200 years. Numismatic scholars from Sylvester Sage Crosby to Eric P. Newman and Michael Hodder studied the issue in detail, mapping out a convincing theory of the origin and purpose of the coins and classifying the numerous varieties that surfaced over the years. Recently, exciting discoveries by authors like Eric Goldstein and David McCarthy have raised questions about the fundamental nature of these coins and their place of origin. The new evidence is certainly thought provoking, but we suspect the last word on the Continental dollar has yet to be heard. Heritage Auctions is pleased to present this coin, the single-finest certified 1776 Continental dollar of any variety, in this important offering.

#### Traditional Origin Theory

No official documentation on the striking of these coins has ever come to light. The traditional thought on the origin of the Continental dollar is that it was a type of fiat money, created as a substitute for the paper money issued by the Continental Congress to pay government obligations during the Revolutionary War. In February and May of 1776, the Continental Congress passed resolutions issuing various denominations of paper money, including the dollar bill. However, similar resolutions passed in July and November of that year authorized the printing of many other denominations, but omitted the dollar note. Eric Newman believed the Continental dollar coins were struck to take the place of paper dollars in the last half of 1776.

Seven die varieties are known, employing five different obverse dies and four different reverses (actually, only two reverse dies were used, Newman's reverses A, B, and C were the same die, but relapped and reworked). Most of the obverses differ in the spelling (or misspelling) of the word currency in the legend, but the Newman 3 obverse is differentiated by the addition of the inscription EG FECIT, which is translated as "E.G. made it", referring to the engraver. The identity of the engraver was debated for many years, but Newman identified Elisha Gallaudet, of Freehold, New Jersey, as the most likely candidate. Gallaudet engraved the plates for printing some of the Continental Currency notes, lending credence to this theory. The great majority of the coins were struck in pewter, but a few rare specimens are known in brass and silver.

In the catalog of the John J. Ford Collection, Part I (Stack's, 10/2003), Michael Hodder postulated the first issue of Continental dollars was struck in New York City, before the British occupied the city in September of 1776. Hodder suggested the minters must have traveled with the Congress after that, striking coins in various locales like Philadelphia and Lancaster in later months. Q. David Bowers notes pewter specimens appear on the market with some regularity, so the original mintage must have been extensive. Most of the coins seen today show signs of circulation, but a surprising number are known in Mint State. Because the intrinsic value of the coins was virtually nil, they were only accepted reluctantly and usually at a sharp discount.

#### Early Reports in Print Supporting the Traditional View

A satirical reference to "pewter dollars, what both hands can hold" appeared in a poem by Jonathan Odell in the November 6, 1779 edition of New York's *Rivington's Royal Gazette*. From the context of the poem, it is difficult to ascribe this reference to anything but the Continental dollar coinage, but some alternative interpretations have been suggested, since "pewter" was sometimes used as a synonym for counterfeit in colonial times.

In their article "18th-Century Writings on the Continental Dollar Coin", *The Numismatist*, July 2014 edition, Eric Newman and Maureen Levine reported the earliest known illustration of a Continental Currency dollar appeared in a German book entitled *Historical and Genealogical Almanac, or Yearbook of the Most Remarkable New World Events for 1784*, published in 1783. The book was written by Matthias Christian Sprengel and the illustration was by Daniel Berger. The legends on the Continental dollar illustration were translated into German for the benefit of the intended readers. The publisher of this work, Charles Spener, wrote to Benjamin Franklin asking for illustrations to use in the book, but there is no record of Franklin's reply. It seems likely that the German author and publisher believed the Continental dollars were American issues when they published this work in 1783.

Another early account that favors the traditional theory is Bishop Richard Watkins' *Chemical Essays* (Volume IV), first published in 1786. Watkins first noted the "gun money" issues of King James II and reported:

"The Congress in America had recourse to the same expedient; they coined several pieces of about an inch and a half in diameter, and of 240 grains in weight; on one side of which was inscribed in a circular ring near the edge - Continental Currency, 1776 - and within the ring a rising sun, with - fugio - at the side of it, shining upon a dial, under which was - Mind your business. - On the reverse were thirteen small circles joined together like the rings of a chain, on each of which was inscribed the name of some one of the thirteen states; on another circular ring, within these, was inscribed - American Congress - and in the central space - We are One."

Watkins clearly believed the Continental dollars were struck in America to serve as money of necessity when he published his work in 1786. Several accounts appeared in European publications shortly after Watkins book was published, clearly based on his account.

#### New Discoveries

Authors Eric Goldstein and David McCarthy published their "Myth of the Continental Dollar" in the January 2018 issue of *The Numismatist*, detailing several new discoveries in the literature and advancing a new theory on the origin of the Continental dollar. They first note the coin was absent from the collection of Pierre Eugene du Simitierre, the preeminent 18th century coin collector in America. Apparently, du Simitierre became aware of the Continental dollar at some point, but believed it was a fantasy piece. His note on a proposed illustration in his unpublished *Common Place Book, 1775-1784* reads:

"A coin the size of a Crown, with devices and Mottos taken from the continental money, Struck't in London on Type-Metal, and dated 1776."

Goldstein and McCarthy also note an entry in the pre-1790 ledger of Sarah Sophia Banks collection in the British Museum (written by Jonas Dryander) relating to her Continental dollar:

"Congress Dollar. 1776, never current, struck on speculation in Europe, for sale in America ..."

A later version of this ledger, in Banks handwriting, repeats this information and is accompanied by a printed tipped-in flyer advertising the sale of "These American MEDALS at/Six-Pence Each/N.B. Representing the Paper Currency of a/Dollar, which goes for/Four Shillings and Six-pence in that country." The flyer then gives a detailed description of a Newman 3-D EG FECIT Continental dollar under the heading EXPLANATION. This flyer closely resembles du Simitierre's note in his unpublished manuscript, suggesting he may have seen one of the flyers at some point.

Goldstein and McCarthy go on to cite a letter from renowned silversmith and patriot Paul Revere to Bishop Watkins, dated February 21, 1790, in which he states the Continental dollars were not made in America:

"As for pewter money struck in America, I never saw any. I have made careful inquiry, and have all the reason in the world to believe that you were imposed upon by those who informed you."

From these, and a few other citations, Goldstein and McCarthy conclude the 1776 Continental dollars were privately struck in Europe, as souvenir commemoratives, shortly after the war.

**Current Thoughts**

The debate rests here at the present time, with both sides pointing out weaknesses in the opposing positions. Certainly, the lack of any authorizing documentation for the Continental dollars is a glaring weakness in the traditional view. Extensive records on almost every subject were kept by the Continental Congress, so it is strange that an issue of such economic importance left no paper trail.

On the other hand, the flyer that is the most convincing evidence for the European theory says nothing about where the coins were struck. It is possible that some enterprising merchant gathered up a supply of high-grade Continental dollars in this country, where they were theoretically available and cheap, and offered them for sale to his European clientele.

Contemporary opinion on the origin of these pieces is divided, with Watkins and Sprengel believing they were American issues and Revere, du Simitierre, and Banks favoring a European source. Banks and du Simitierre may have based their opinion on the flyer, which is convincing, but not conclusive.

Goldstein and McCarthy promise a follow-up article on this subject, which may provide further insights.

**The Present Coin**

The coin offered here is the finest known Continental dollar, regardless of die variety or composition. This delightful Superb Gem offers impeccably preserved silver-gray surfaces, with prooflike reflectivity in the fields. The design elements are razor-sharp in most areas, with complete detail on the sun's face and all the lettering bold, except for a touch of softness on WE ARE ONE in the center of the reverse, opposite the high points on the obverse. A representative of the popular Newman 3-D variety, the important EG FECIT stands out boldly. The obverse is struck slightly off center, to the upper left, while the reverse is perfectly centered. A diagnostic semicircular die crack extends through the centers of the rings on the reverse from GEORGIA through DELAWARE. This coin was once a highlight of several important numismatic collections, including those of Virgil Brand and John J. Ford. We expect intense competition from numismatists of all collecting disciplines when this iconic issue crosses the block. Listed on page 97 of the 2019 Guide Book.

Ex: Virgil Brand; F.C.C. Boyd; John J. Ford (Stack's, 10/2003), lot 8; FUN Signature (Heritage, 1/2012), lot 3006, where it realized \$546,250.

From An Important New York Collection. NGC ID# 2AYU, PCGS# 795

1787 New York Excelsior Copper, VF20

Eagle Facing Left, W-5785

Likely an Ephraim Brasher Product

**3769** 1787 New York Excelsior Copper, Eagle Left VF20 PCGS. W-5785, R.6. Ex: Groves. John Bailey and Ephraim Brasher, as well as Thomas Machin, petitioned to strike copper coins for circulation in New York. Ultimately, the state assembly never authorized the production of copper coinage by a private contractor, although it did create a committee to look into the matter. However, die linkage suggests these New York Excelsior tokens were, indeed, produced by Bailey and Brasher at their New York City mint.

This Colonial rarity has the eagle facing left on the globe. Deep brown surfaces are generally smooth, and significant blending occurs over the design high points. Still, the legends are bold and the reverse is particularly crisp for the grade. Listed on page 76 of the 2019 Guide Book. NGC ID# 2B3M, PCGS# 427

1790 Standish Barry Threepence, VF20

A Classic Rarity, W-8510

**3770** 1790 Standish Barry Threepence VF20 PCGS. Breen-1019, W-8510, R.6. Die alignment: 360°. Boldly struck peripheries encompass more softly struck centers, as is generally the case on these rare post-Colonial issues, of which perhaps two dozen pieces are known. The uniquely expressed date — JULY 4 90 — is boldly distinct on this threepence, while BALTIMORE is faint at LTI. The central portrait is a bit soft on the face, but retains clear features. The reverse is representative of known examples at this grade level and even finer. The central THREE PENCE is quite weak, a characteristic seen on even the finest known pieces. Most of Barry's name is clear, though the initial ST of his first name and final Y of BARRY are faint. The planchet is slightly out of round, and the strike is a touch off-center toward 12 o'clock. This piece shows no sign of the prominent die cracks visible on both sides of the magnificent MS64 example — the finest known in private hands — sold by us in January 2015 as part of the Donald G. Partrick Collection.

The identity of the obverse figure has been the subject of much speculation, with Barry himself and George Washington being the most commonly proposed identifications. In the Spring 2009 issue of the C4 Newsletter, however, Max B. Spiegel discussed his discovery of an 1843 article from the *Baltimore Sun* stating that the figure depicted was James Calhoun, who was serving in a position analogous to Mayor in Baltimore on July 4, 1790. Comparison of contemporary portraits of Calhoun and the threepence's obverse figure strongly suggest that this attribution is accurate. An exciting opportunity to acquire this classic early American rarity. Listed on page 87 of the 2019 Guide Book. NGC ID# 2B5N, PCGS# 609

(1790) Albany Church Penny, XF Details  
Rare No D, W-8495 Variety

**3771** (1790) Albany Church Penny, No D, Breen-1169, W-8495, R.7 — Environmental Damage — PCGS Genuine. XF Details. The First Presbyterian Church of Albany, New York issued 1,000 uniface copper tokens in 1790, to aid parishioners in finding suitable coins for their offerings. There was a chronic shortage of small change in the newly established United States at the time, as the Mint Act of 1792 would not be signed by Congress for another two years. Circulating coinage consisted of a hodge-podge of coins from all nations and the various states, and often included underweight or counterfeit specimens. The Albany Church pennies were issued at the rate of 12 to one shilling and two varieties were produced. This coin represents the W-8495 variety, without the large D that appears above CHURCH on the other variety. The Albany Church penny began appearing at auction at least as early as lot 2079 of the Second Semi-Annual Sale (W. Elliot Woodward, 4/1863), where the coin realized \$18, a substantial price for the time. The other variety, with the large D, was offered in the next lot in that sale and realized \$25. Both varieties are rare today, with less than a dozen examples of each extant. All examples seen are well-worn. Recent sales of the W-8495 include the VF30 PCGS example in lot 3912 of the ANA Signature (Heritage, 8/2015), which realized \$30,550.

This impressive specimen shows XF sharpness on the simple design elements, with CHURCH spelled out clearly in print and PENNY inscribed in cursive underneath. The border remains complete, although weak in some places. The surfaces show some evidence of corrosion and extensive verdigris, and the planchet is clipped at 10 o'clock on the obverse. Listed on page 87 of the 2019 Guide Book.

1791 Washington Liverpool Halfpenny, AU58  
Ex: Garrett, Baker-17, W-10650

**3772** 1791 Washington Liverpool Halfpenny, Copper AU58 PCGS. Baker-17, W-10650, Musante GW-19, R.6. Ex: Garrett. The 1791 Liverpool halfpenny is sometimes confused with the 1793 Ship halfpenny, but the former is much rarer. This lightly marked golden-brown representative shows the die rust and reverse breaks that are characteristic of the issue. The strike is sharp for the issue, with nearly complete definition on Washington's epaulets. An opportunity to acquire an example pedigreed to one of the most prestigious collections of early American coinage. Listed on page 93 of the 2019 Guide Book. Population: 3 in 58, 1 finer (5/18).  
Ex: Garrett Collection, Part IV (Bowers and Ruddy, 3/1981), lot 1708; FUN Signature (Heritage, 1/2007), lot 750, which realized \$25,300; FUN Signature (Heritage, 1/2017), lot 3041; Long Beach Signature (Heritage, 9/2017), 3713; Dallas Signature (Heritage, 12/2018), lot 3006. NGC ID# 2B7H, PCGS# 698

## HALF CENTS

1793 C-2, B-2 Half Cent, VG8  
Single-Year Type Issue

**3773** 1793 C-2, B-2, R.3, VG8 PCGS. The Liberty Head facing to the left appears only on the first-year 1793 half cents. Intermingled tan and olive-brown surfaces exhibit rich steel-brown toning around the devices. Minor corrosion on each side only slightly diminishes the eye appeal of this example. Our EAC grade Good 5.  
*From The Reilly Cody Collection.* NGC ID# 2222, PCGS# 35006  
Base PCGS# 1000

1800 C-1, B-1 Half Cent  
MS64 Red and Brown

**3774** 1800 C-1, B-1, R.1, MS64 Red and Brown PCGS Secure. CAC. Manley Die State 4.0, the usual die state with most of the border dentilation absent on each side. A die crack is evident through the tops of NITE, and a die scratch is still visible up to the left from the top of the F in OF. Considerable original orange mint luster remains on the frosty surfaces of this attractive first-year Draped Bust half cent, with light olive patina on both sides. Our EAC grade MS63. Population: 4 in 64 Red and Brown, 1 finer in 65 Brown. CAC: 3 in 64 Red and Brown, 0 finer (5/18). NGC ID# 222B, PCGS# 35120 Base PCGS# 1052

## LARGE CENTS

1793 S-4, B-5 Chain Cent, Good 6

**3775** 1793 Chain, AMERICA, Periods, S-4, B-5, R.3, Good 6 PCGS. This is a relatively smooth example, although the deep olive-brown and gray surfaces show uniform granularity beneath a loupe. LIBERTY and the chain are the only bold design elements on this coin. Liberty's portrait is a ghost that blends into the planchet, and the date and reverse legends are only faintly visible. Scattered old marks are long smoothed-over by wear and environmental effects. Our EAC grade AG3. NGC ID# 223F, PCGS# 35444 Base PCGS# 91341

1793 With Periods Chain Cent, MS65 Brown  
Ex: Cleneay-Atwater-Eliasberg  
S-4, B-5, Breen Plate Coin

**3776** 1793 Chain, AMERICA, Periods, S-4, B-5, R.3, MS65 Brown PCGS. CAC. The plate coin in Walter Breen's *Encyclopedia of Early United States Cents 1793-1814*. Periods follow the date and LIBERTY on the obverse of the S-4 Chain cent. The reverse, with AMERICA spelled in full, appears on S-2, S-3, S-4, and NC-1. Breen Die State II, early, with a faint crack from the rim at 7 o'clock into the hair, and another faint crack from the first, following the rim toward the date. A tiny planchet lamination obscures the second crack. A small planchet clip is also evident at the same location.

A small number of sensational Chain cents have survived for more than two centuries since they were coined in March 1793, including this example that carries a provenance to 1864. A sensational Gem, the Eliasberg specimen has a bold strike with excellent definition of the motifs, including the fine strands of Liberty's hair. The rim is bold and the centering is excellent. Every aspect of this superlative Chain cent is remarkable.

The rich olive and mahogany-brown surfaces are highly lustrous and virtually flawless. A small patch of reverse corrosion that was described in the Eliasberg catalog remains unchanged over the last 21 years, and it is completely stable, unlikely to change in the future.

#### Historical Importance

After Congress authorized the Mint in April 1792, plans for the establishment soon began, and all was ready late that year. Although 1792 half dimes were minted before the Mint opened, and a few patterns were struck in the new facility late in 1792, the Chain cents were the first actual United States coins minted at the Philadelphia Mint in March 1793. These coins are the very first federal type coins, minted before the 1793 half cents, or the other large cent designs. Mint records identify a total mintage of 36,103 Chain cents were delivered March 1 through March 12, 1793.

#### A Distinctive Variety

The obverse of the S-4 Chain Periods cent is unlike earlier Chain cent varieties. The hair shows a different treatment, and the periods that follow the date and LIBERTY are unprecedented among all 1793 cents. Walter Breen made the reasonable suggestion that a different engraver prepared this obverse. The periods are similar to Joseph Wright's 1792 pattern quarters, and led Breen to suggest that Wright engraved this die. Harry Salyards suggested that the engraver of this die continued to prepare the Wreath cent obverse dies. The identification of engravers of the 1793 cents and half cents remains a perplexing numismatic mystery.

#### Comparative Descriptions

The five finest examples of S-4 in Del Bland's census carry a 19th century provenance. The opportunity to compare descriptions of a single coin through the years will give the 21st century numismatist an opportunity to better appreciate the work of 19th and 20th century numismatists.

In lot 603 of the Fifth Semi-Annual Sale (W. Elliot Woodward, 10/1864), Woodward described this specimen as "1793 Flowing hair, dot after Liberty and after the date; rev. links, 'United States of America.' A vine and stripes on the edge. Splendid, uncirculated, of the highest degree of rarity." The lot sold to Joseph Zanoni, for \$27. Zanoni sold the main body of his collection through Edward Cogan in 1867, but this coin was not described in the catalog for that sale. It must have been sold to the next owner, Thomas Cleneay, privately at some point.

The next auction appearance was in lot 1795 of the Thomas Cleneay Collection (S.H. and H. Chapman, 12/1890), where the Chapman brothers noted:

"1793 Same type. Head larger and hair more abundant but lower relief, periods after LIBERTY and 1793 and the inscription close. R. Same die. Beautiful sharp impression of rich light olive color. The finest specimen known of this variety which is much rarer than the preceding. See Plate VIII. From Zanoni coll."

The preceding lot the Chapmans referred to was the Zanoni-Cleneay S-3 cent. The S-4 Chain cent sold to coin dealer Charles Steigerwalt for \$122.50. Either Steigerwalt was acting as an agent for Albany collector John G. Mills at the Cleneay sale, or he later sold this coin to him privately, as the coin next appeared in lot 1227 of the John G. Mills Collection (S.H. & H. Chapman, 4/1904). The Chapman brothers wrote:

"1793 Chain. Head of Liberty r. with hair flowing loosely behind, long, reaching nearly to edge and exquisitely executed. LIBERTY above; below 1793 (periods after LIBERTY and date). Rev. UNITED STATES OF AMERICA; in centre endless chain of 15 links enclosing ONE CENT 1/100. Edge vine and bars. This specimen of the most delicate and rarest die of the 1793's, a cent that when slightly worn is almost invisible, is in uncirculated condition with a beautiful, lustrous, light olive surface. Unique state and very rare. From the Cleneay Coll. Plate XII."

The lot realized \$235, to Philadelphia collector George Earle. A few years later, in June of 1912, Henry Chapman wrote in lot 3355 of the George Earle catalog:

"1793 AMERICA. Small head of Liberty, long flowing hair. Period after LIBERTY and 1793. R. as last. Uncirculated. Sharp, even impression. The planchet on edge to left of date was not quite circular, and while it took the edge design, yet the coin is not a true circle at this point. However, it detracts so slightly that I feel this to be one of the finest specimens of this variety known. Its color is a lustrous, rich brown. Plate. Excessively rare. Crosby 4-c."

The lot was purchased by "C", possibly an abbreviation for Chapman, for a relatively modest sum of \$140. The coin was sold privately shortly after the sale to fellow Philadelphian Clarence Bement.

Just four years later, in May of 1916, Henry Chapman found this coin on his desk again, this time as part of the Clarence S. Bement, Esq., Collection. The description for this piece in lot 286 reads:

"America. Small head of Liberty r., the profile outlined, the hair very fine. LIBERTY. Below 1793. Periods after the word LIBERTY and date. R. UNITED STATES OF AMERICA, in center within a circle of 15 links ONE CENT 1/100. Sharp, even impression with high edge. The planchet on edge to left of the date is not quite circular, though it has taken the edge bars, but it is hardly noticeable and even with this very slight defect it detracts so slightly that I feel this to be one of, if not the finest specimen known of this variety. Surface beautiful and of a rich, lustrous, light brown color. Plate. Excessively rare. C. 4-C. From Zanoni coll., then to Cleneay, later from Earle sale, No. 3355, though subsequently purchased at private sale for \$200."

The lot realized \$300 to "Innis", an alias for James W. Ellsworth, who bought heavily at the sale.

This specimen soon found its way to William Cutler Atwater, via Wayte Raymond, who purchased Ellsworth's collection in 1923 in a partnership arrangement with John Work Garrett. It must have been one of the last coins Atwater purchased, because he stopped collecting around 1923, although his collection was not sold until after his death, in 1946. B. Max Mehl handled Atwater's collection, which was one of the highlights of his long and immensely successful numismatic career. In his description of lot 10 in his June 1946 catalog, Mehl overlooked the planchet clip that had been described earlier:

"1793 Chain type, but of an entirely different die, smaller head with longer flowing locks. Periods after LIBERTY and date. Uncirculated with raised borders. Glossy medium brown surface. Bold impression. Mr. Atwater's catalog described it as 'superb.' From the famous Ellsworth collection. Extremely rare and valuable both as to variety and beautiful condition."

The lot sold to super collector Louis E. Eliasberg, Sr. for \$330.

Heritage cataloger Mark Borckardt had the pleasure of describing this coin for its appearance in lot 487 of the May 1996 catalog of the Eliasberg collection, where it was graded MS64 Brown, writing, in part:

"Superbly detailed with excellent definition of all designs, including the highest points of the hair. Well centered. The letters are bifurcated on the obverse, slightly so on the reverse, an artifact of striking, due to planchet spreading. Obverse and reverse with high rims, as struck. Superb preservation without rim bruises or bumps. Lustrous brown surfaces with a tiny area of raised granularity at and to the right of F in OF. Struck on an incomplete planchet with very slight flattening of the edge at 7:00."

Prior to marketing of the Eliasberg collection in 1996, the early provenance of this coin was unknown. The Zanoni-Cleneay provenance ended with Clarence Bement. At the same time, the provenance of the Eliasberg coin began with James Ellsworth. They were listed as two different specimens, and the connection was only made when the Eliasberg coin was compared to the Bement plate.

Sometime between May 1996 and July 2004, this specimen was certified MS65 Brown PCGS, and today it remains in a green-label holder. The coin next surfaced in lot 6 of the Oliver Jung Collection (American Numismatic Rarities, 7/2004). The cataloger for American Numismatic Rarities, the now defunct New Hampshire firm, wrote:

"Sometimes in the course of numismatic events, a coin 'has it all,' with little else to be desired. Such an instance is here, with this simply incredible 1793 Chain cent, one of the most famous and rare of American coin types, combining the certification in gem grade, plus the incomparable pedigree of the Eliasberg Collection. Just about every adjective that you might care to apply would be relevant-marvelous, wonderful, and so on. You can add your own descriptions."

The cataloger continued with a reprint of the Eliasberg description. The lot realized \$391,000.

This coin's most recent appearance was in lot 3020 of our FUN Signature (Heritage, 1/2012), where it realized \$1,380,000 (see description online at <https://www.ha.com>).

#### High Condition Census and Provenance

Just three examples of S-4 exist with claims to Mint State status. The finest piece is sometimes called "The Coin" and is the example illustrated in Walter Breen's *Complete Encyclopedia of U.S. and Colonial Coins*. "The Coin" is certified Specimen 67 Brown PCGS and carries a provenance back to Joseph Mickley who may have received it from the Mint Cabinet in trade for other numismatic items. Dr. Sheldon called the Mickley piece "possibly the most perfect Chain cent in existence."

The second finest example is the Parmelee coin that was illustrated in the 1991 Noyes Photo book. Dr. Sheldon called the Parmelee cent MS65 in the 1949 publication of *Early American Cents*. Today it is certified MS66 Brown PCGS Secure, CAC. The Parmelee specimen recently sold for a record \$2,350,000 in lot 4011 of the FUN Signature (Heritage, 1/2015).

The Eliasberg 1793 S-4 With Periods Chain cent, the third finest PCGS certified example, is considered the third finest of the S-4 cents, and carries a provenance back to 1864. In *Early American Cents*, Sheldon discussed the "recent sales" of examples that traded hands in the 1940s. This piece appeared in B. Max Mehl's sale of the Atwater Collection in 1946 but was overlooked by Sheldon in that discussion.

There exists a wide gap between the grades of the three pieces discussed here and the next tier of S-4 Chain cents that include four or five AU examples. Current market values for the top grade Chain cents are significant, although they seem low in comparison to other numismatic rarities. This magnificent S-4 Chain cent is one of the most important offerings in this sale. We expect intense competition from series specialists when this lot is called. Housed in a green label holder. Our EAC grade MS60.

Ex: Fifth Semi-Annual Sale (W. Elliot Woodward, 10/1864), lot 603; Joseph Zanoni; Thomas Cleneay (S.H. & H. Chapman, 12/1890), lot 1795; Charles Steigerwalt; John G. Mills (S.H. & H. Chapman, 4/1904), lot 1227; George H. Earle, Jr. (Henry Chapman, 6/1912), lot 3355; Clarence S. Bement (Henry Chapman, 5/1916), lot 286; Col. James W. Ellsworth (3/1923); Wayte Raymond (1923); William Cutler Atwater (B. Max Mehl, 6/1946), lot 10; Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 5/1996), lot 487; Spectrum Numismatics; American Numismatic Rarities (7/2004), lot 6; FUN Signature (Heritage, 1/2012), lot 3020, where it realized \$1,380,000.

**From An Important New York Collection.** NGC ID# 223F, PCGS# 35444 Base PCGS# 91341

1793 S-9, B-12 Wreath Cent, AU55

Vine and Bars Edge

**3777** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, AU55 PCGS. Breen Die State IV. The Horizontal Stem on the obverse and the kidney-shaped ribbon bow on the reverse are diagnostic of this plentiful Wreath cent variety. The total mintage of all Wreath cent varieties was 63,353 coins, mostly produced in April, with a few pieces struck three months later in July 1793. Mint researcher R.W. Julian notes that the supply of copper planchets was exhausted at the same time that the Mint's rolling mills broke. A new supply of copper blanks was delayed until the rolling mills were repaired.

Studying rarity ratings of all 1793 Wreath cent varieties shows a total population of 2,200 to 2,900 survivors for all varieties, including 750 to 1,000 examples of S-9, or about one-third the total population. Those data suggests that about one-third of the Wreath cent mintage was from this die pair, or about 21,000 cents. In his *Large Cent Encyclopedia*, Walter Breen conveniently determined that all coins struck in July were examples of S-11 (a, b, and c), and that the cents struck in April were S-5 through S-10, along with the NC varieties. Although his accounting is likely inaccurate, it seems reasonable that the S-9 cents were struck in mid-April 1793.

This middle die state example shows faint die cracks on Liberty's face and temple, as well as on the reverse through the CA in AMERICA. The surfaces are olive-brown and tan with a few handling marks and planchet fissures. Overall, this is an attractive specimen with excellent eye appeal. Our EAC grade XF40.

*Ex: Summer FUN Signature (Heritage, 7/2013), lot 3027, which realized \$32,900. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347*

1793 Wreath Cent, XF Details

S-11a, Vine and Bars Edge

**3778** 1793 Wreath, Vine and Bars Edge, S-11a, B-16a, High R.4 — Environmental Damage — PCGS Genuine. XF Details. This die marriage is usually encountered in well-worn grades with a lettered edge (S-11b or S-11c), but this is a fairly sharp example with a Vine and Bars edge. All the legends are bold, though the lower-reverse beading has faded. The deep mahogany-brown surfaces are microgranular with occasional pitting but show only a single mentionable mark, a line above the cheekbone. Our EAC grade Fine 12.

1793 Liberty Cap Cent

Rare Sheldon-12

Very Good Details

**3779** 1793 Liberty Cap, S-12, B-21, Low R.6 — Corrosion — NGC Details. VG. Among the three major design types of first-year cents, the Liberty Cap is the most difficult to secure. The usually encountered variety is S-13 or S-14, but this is the rare Sheldon-12, identified by a low date and a single leaf below OF. The deep brown fields are granular and contrast with steel-gray high points. All peripheral legends are sharp. ONE CENT is faint but a majority of the denomination is readable. Our EAC grade AG3. PCGS# 35486 Base PCGS# 1359

1802 NC-2, B-7, XF40

Breen Plate Coin

Finest Available to Collectors

**3780** 1802 NC-2, B-7, R.6, XF40 NGC. The Breen Large Cent Encyclopedia plate coin. The obverse is cracked through ERTY as in the late states of S-229. The sharpness is VF30 with minor handling marks on each side, including minor obverse hairlines. Glossy surfaces exhibit ebony fields and chestnut-brown devices. Bland grades this piece VF35 and second finest known, while Noyes calls it VF20 and also the second finest known. The only finer piece is impounded in the ANS, and the census falls sharply after this example, with the third finest grading just VG10. Our EAC grade VF25.

Ex: Robert Friedberg (Gimbels Coin Department, New York, 4/4/1956); C. Douglas Smith (12/1956); Dorothy Paschal (1/1957); Dr. William H. Sheldon (4/19/1972); R.E. Naftzger, Jr. (2/23/1992); Eric Streiner (4/22/1992); C. Douglas Smith; Dr. Robert A. Schuman (Superior, 2/2002), lot 1279; W.M. Wadlington (via Bob Grellman and Chris McCawley, 6/30/2005); Dan Holmes (Goldberg Auctions, 9/2009), lot 445; Adam Mervis Collection (Heritage, 1/2014), lot 2766. PCGS# 36338 Base PCGS# 1470

1840 N-10 Cent, MS65 Red and Brown

Large Date, Original Luster

**3781** 1840 Large Date, N-10, N-11, R.2, MS65 Red and Brown PCGS Secure. CAC. Die State a. Several stars are weak, but the central devices are sharp. Luminous surfaces offer an attractive blend of copper-red and burgundy hues without distracting abrasions. A lone carbon spot appears in the field above ON in ONE, with planchet laminations as struck at the U in UNITED and at the rim near I in AMERICA. This coin was offered as the finest known of the variety in the Dan Holmes catalog, and we are not aware of a finer piece that has come to light since. Our EAC grade MS64. Ex: Stack's (1/15/2002), lot 823; Chris McCawley (3/2004); Dan Holmes Collection (Goldberg Auctions, 1/2011), lot 14. PCGS# 395847 Base PCGS# 1821

1855 Cent, MS65 Red

Slanted 55, N-10

**3782** 1855 Slanted 55, N-10, R.1, MS65 Red PCGS Secure. Grellman Die State b, with star 6 clogged and only partially visible, resulting in the 12-Star description that is sometimes applied to this die state. This sharply defined and lustrous cent is a lovely Gem with brilliant and frosty orange color on both sides. Our EAC grade MS65. Population: 3 in 65 Red, 1 finer (5/18). NGC ID# 226M, PCGS# 46975 Base PCGS# 1912

## FLYING EAGLE CENTS

1856 Flying Eagle Cent, AU Details

Snow-3

**3783** 1856 Snow-3 — Cleaned — ANACS. AU Details, Net AU50. The 1856 Flying Eagle cent and the introduction of a small-size cent coin for circulation is often credited with sparking an increase in U.S. coin collecting in general in the mid-19th century. The present example is well-struck and shows only light high-point wear. Hairlines in the fields appear under a loupe and prevent a numeric grade. The satiny tan-gold coloration is nonetheless pleasing. From The Bob Williams Collection. PCGS# 391479 Base PCGS# 2013

1857 Flying Eagle Cent, MS66  
Among the Finest at PCGS

**3784 1857 MS66 PCGS Secure.** The Mint struck more than 17 million Flying Eagle cents in 1857, compared to fewer than 2.7 million large cents the year before. The high coinage was in response to provisions in the Act of February 21, 1857, that allowed for old copper cents and half cents, and various Spanish silver coins, to be exchanged for the new nickel alloy cents. The same legislation that created the small cent also repealed the legal tender status of the Spanish dollar and its subsidiary denominations, creating an immediate need for new Mint-made circulating coinage. The Flying Eagle cent circulated extensively, leaving few high-grade Mint State survivors for modern-day collectors.

This Premium Gem is among the finest 1857 Flying Eagle cents at PCGS, and it is rare as such. The strike is sharp, and the frosty, unabraded surfaces show sharp detail and rich tan-gold color. A loupe reveals tinges of red and green near the wreath bow. Population: 19 in 66, 0 finer (4/18). NGC ID# 226P, PCGS# 2016

1858 Flying Eagle Cent, MS66  
Glistening Large Letters Type Coin

**3785 1858 Large Letters MS66 NGC. CAC.** This beautifully preserved type coin displays lovely rose-gold, lilac, and silver hues over unabraded satin surfaces. Cartwheel luster illuminates sharp design elements on each side, and a few tiny pepper specks around the date do not detract. Premium Gem Large Letters coins are rare, and finer pieces are almost unknown. NGC lists four MS66 examples of the 1858 Flying Eagle cent that are not designated either Large or Small letters, one of which is this piece, housed in a prior-generation holder. Census (Large Letters): 20 in 66 (1 in 66 ★), 1 finer. CAC: 12 in 66, 0 finer (4/18). NGC ID# 2277, PCGS# 2019

## PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, PR63  
Snow-9, Lovely Eye Appeal

**3786** 1856 Snow-9 PR63 PCGS. CAC. Die lines above the I in UNITED, within the tip of the eagle's wing, and from the left ribbon end are diagnostic for this Snow variety. Snow-9 coins are restrikes probably manufactured over a period of time beginning in 1857 and continuing through 1860. They are the most frequently encountered of all 1856 Flying Eagle cents, but naturally are still difficult to acquire given their key-date status. This Select proof is strongly struck and showcases beautiful coppery gold color with pale rose and violet accents. Quality for the grade is top-notch, hence the CAC approval sticker. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

1856 Flying Eagle Cent, PR65  
Sharply Struck Snow-9 Example

**3787** 1856 Snow-9 PR65 PCGS. CAC. Although technically a pattern, the 1856 Flying Eagle cent was produced in both proof and business-strike formats, and in quantities that greatly exceed the typical production quantities of patterns from the mid-19th century. At any rate, today the issue is firmly ensconced with the 1877 and 1909-S in the pantheon of avidly sought key-date cents in the Indian and Flying Eagle series.

Rick Snow theorizes that the obverse die for the Snow-9 1856 Flying Eagles was "probably produced in early 1857 and used first on S8." The reverse was one of the original dies and initially used to strike the Snow-5 variety. The Snow-9 Flying Eagle cents were "probably produced during a long period starting in late 1857 and continuing until 1860." Certainly, as the most commonly found die pairing for the proof 1856 issue, specimens are encountered in numerous different die states or stages. The present piece shows a bold and rather long die line on the lower-left bow of the wreath ribbon on the reverse, and the die line above the I in UNITED is plain. This piece is considerably more attractive than the typical Snow-9, with reddish-orange, lustrous surfaces that have mellowed slightly on the reverse, and there is much eye appeal present. A sharply struck and delightful coin, certified in a green-label holder. PCGS has certified only six numerically finer examples (5/18).  
*Ex: Baltimore Signature (Heritage, 7/2008), lot 1524, where it realized \$27,600.*

**From An Important New York Collection.** NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

1858 Flying Eagle Cent, PR64 Cameo  
Rare Small Letters Proof Issue

1877 Indian Cent, MS65 Red and Brown  
Elusive Series Key

- 3788** 1858 Small Letters PR64 Cameo NGC. Snow-PR3. Eagle Eye Photo Seal, card not included. Low Leaves, Open E in ONE, Broken U in UNITED. The A and M in AMERICA are separated at the base on the Small Letters variety. This Choice proof is fully struck from beak to tailfeathers on the eagle and throughout the wreath. There is a hint of cameo contrast on both sides amid tan-gold and lilac coloration. Proof 1858 Flying Eagle cents are rarely offered in any grade. Census: 8 in 64, 9 finer; 2 in 64 Cameo, 2 finer (4/18). NGC ID# 227D, PCGS# 2043

## INDIAN CENTS

1873 FS-101 Cent, AU55

Dramatic Doubled LIBERTY Variety

- 3789** 1873 Doubled LIBERTY, Snow-1, FS-101, AU55 PCGS Secure. This is certainly one of the most dramatic and popular varieties in the entire Indian Head cent series, featuring broad doubling on LIBERTY, the headdress, and most facial features. Rick Snow gives the variety five out five stars and estimates 300 pieces known, most in lower grades. This lovely deep-brown example in Choice AU condition features steel accents and strong detail. The surfaces are smooth and largely unabraded. NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

- 3790** 1877 MS65 Red and Brown PCGS Secure. CAC. Nearly 10 million cents from earlier years were redeemed at the U.S. Mint in 1877, and examples with little wear were reissued in lieu of new coinage. This reduced the need for new Indian cents in the national economy, and only 852,500 business-strike were produced. Today, the 1877 is the acknowledged key to the series and examples in MS65 condition, with Red and Brown surfaces, are quite elusive.

The present coin offers sharply detailed design elements in most areas, with just a touch of the usual softness on the feathertips. The well-preserved surfaces show a mix of original red and crimson patina, with vibrant mint luster underneath. Population: 80 in 65 Red and Brown, 5 finer. CAC: 24 in 65, 0 finer (4/18). NGC ID# 2284, PCGS# 2128

1903 Cent, MS67 Red  
None Graded Higher

**3791 1903 MS67 Red PCGS Secure.** A mintage of 85 million pieces ranks among the highest production totals in the Indian Head series, yet Superb Gems with full Red surfaces are conditionally rare and none are graded higher at either PCGS or NGC. This spectacularly vibrant and fully struck Registry coin boasts golden-orange color and swirling mint frost. The only mark is a tick on the O in ONE. A faint clash mark appears near the C in CENT. Population: 11 in 67 Red, 0 finer (5/18). NGC ID# 228Y, PCGS# 2216

1909-S Indian Cent, Blond MS65+ Red  
Final-Year Key Issue

**3792 1909-S MS65+ Red PCGS Secure. CAC.** This is a stunning blond-red Indian cent with frosted mint luster and sharply struck devices. A speckling of russet-brown flecks in the left obverse field evolve into faint woodgrain effect on the equally sharp and lustrous reverse. A tiny nick on the nose is the only mark to mention. Far rarer than its 1909-S Lincoln cent counterparts (with or without VDB), the 1909-S Indian remains underrated and challenging at this level. Population: 2 in 65+ Red, 31 finer. CAC: 27 in 65, 7 finer (5/18). NGC ID# 2298, PCGS# 2240

## PROOF INDIAN CENTS

1859 Indian Cent, PR65 Ultra Cameo  
The Only Certified Ultra Cameo Proof

**3793 1859 PR65 Ultra Cameo NGC.** Splashes of orange-gold toning grace the light tan surfaces of this glittering Gem proof. Both sides exhibit amazing contrast with bold design definition that is completely delineated. This is one of the finest, most eye-appealing examples of the 1859 Indian cent that we have ever handled. While we have offered several higher numerical grade proofs, this is the only Ultra Cameo proof 1859 cent we have ever offered. In fact, it is the only Ultra Cameo proof 1859 cent that has ever been certified by NGC or PCGS, regardless of grade (5/18). As the first year of issue, it is in great demand from type and date collectors, and this piece ranks as one of the most important Indian cents ever to cross the auction block.

*Ex: Baltimore Signature (Heritage, 3/2009), lot 212, realized \$14,950.  
From An Important New York Collection.* NGC ID# 2299,  
PCGS# 92247

1877 Cent, PR67 Brown  
A Premier Rarity at This Level

**3794** 1877 PR67 Brown NGC. The business-strike 1877 Indian cent is the acknowledged low-mintage key to the series, putting extreme pressure on the small production of 900 proofs from date collectors. Moreover, while proofs were carefully saved by collectors, they are rarely found in PR67 condition, regardless of color. Indeed, this is the sole finest PR67 Brown proof at NGC. The service has also seen one submission each in PR67 Red and Brown, and PR67 Red. None are finer (5/18).

This spectacular Superb Gem exhibits razor-sharp definition on all design elements, unsurprising given the coin's proof origin. Impeccably preserved surfaces have mellowed to lilac and brown in many areas, but the surfaces reveal vibrant iridescent blue patina when held at certain angles. NGC ID# 229W, PCGS# 2318

1877 Cent, Mostly Red PR65+ Red and Brown

**3795** 1877 PR65+ Red and Brown PCGS Secure. This is a razor-sharp, high-end Gem proof with almost no discernible carbon spotting. The color is almost completely copper-orange, or "Red," but a few wisps of violet color on each side earn the Red and Brown designation from PCGS. The fields are reflective and appealing. Few finer Red and Brown proofs are known. NGC ID# 229W, PCGS# 2319

1877 Indian Cent, PR67 Red  
Bright, Even Mint Red Color

**3796 1877 PR67 Red PCGS. CAC.** The September 1915 edition of *The Numismatist* featured a short article about the now-famous Indian Head cents of 1877 entitled, "He 'Kept Books' on the 1877 Cents." The author relates an entry from the *New York Sun* in which a correspondent attempted to calculate the number of 1877 cents available in circulation over time:

"Herewith find observations on the humble bronze cent bearing date 1877: Noticing that this date formed a very small proportion of the dates to be found in a handful of pennies, it occurred to me to start a memorandum record. So in 1881 I began with 1,250 procured from the bank and found six dated 1877, showing that in the general circulation it then constituted .0048 of the output. In 1883, when the number examined had reached 2,950, eleven of the date had appeared, equivalent to .0037. In May, 1884, 7,500 had yielded twenty-four, .0032. An intermission then took place, and on February 10, 1896, 10,100 had returned only twenty-four, not one having been found in the additional lot, or .0023. The final entry, November 27, 1897, brought the total to 28,450, with thirty-five of 1877, .0012."

"The foregoing shows in a striking manner how the 1877 date in sixteen years had moved toward the vanishing point. What it is to-day I do not know. I believe, however, that it would take a very long day's work to secure even one out of a batch of ten thousand. The measure of its value would be the value of the seeker's time, surely not less than \$1 a day. And yet you may have an 1877 cent among your change at this moment."

Unfortunately, the likelihood of having an 1877 cent "among your change at this moment" is virtually nil. Only 852,500 coins were produced for circulation, and about 5,000 or 6,000 pieces are estimated to survive. Indeed, the 1877 would be impossible to acquire were its value tied to the time it would take to find one in general commerce. Even with the number of coins extant that trade among collectors, the 1877 proves challenging in business-strike format. It is for that reason that many opt to obtain a nice, high-grade proof instead.

Proofs were struck to the extent of 1,250 to 1,500 pieces, according to the *Guide Book*. Rick Snow provides an estimate of 910 proofs that seems more in line with the surviving population. The exact mintage is unknown because records for minor proof coin production were not kept until 1878. Whatever the actual total may be, it was certainly small. The vast majority of known survivors fall into the Red and Brown color category. Red examples are scarce and highly desirable. Perhaps most importantly, this spectacular Superb Gem ranks among the very finest examples at PCGS and NGC combined, with two PR67 Red coins at the former and a single piece at the latter.

*Ex: Long Beach Signature (Heritage, 2/2000), lot 5325; Long Beach Signature (Heritage, 2/2009), lot 350, where it brought \$97,750.*

**From An Important New York Collection.** NGC ID# 229W, PCGS# 2320

1898 Cent, PR66 Red Cameo  
Eagle Eye Photo Seal

**3797** 1898 PR66 Red Cameo PCGS. Eagle Eye Photo Seal, card not included. This sharp, glimmering proof is well-contrasted on both sides with beautiful preservation. Lilac-gold, copper-red, and peach-yellow hues adorn each side, and no bothersome carbon spots are noticed. The 1898 proof is a rarity this fine with cameo contrast. Population: 4 in 66 Red Cameo, 5 finer; 1 in 66 Red Deep Cameo, 0 finer (4/18). NGC ID# 4YYM, PCGS# 82383

## LINCOLN CENTS

1909 VDB Lincoln Cent, MS66+ Red  
FS-1101, Doubled Die Obverse

**3798** 1909 VDB Doubled Die Obverse, FS-1101, MS66+ Red PCGS Secure. CAC. Die doubling is plain on the date and LIBERTY, as well as Lincoln's eye and bowtie. This is a popular variety, rare in Premium Gem Red condition. This Plus-graded CAC coin displays a sharp strike and fiery-orange luster across frosty, unabraded surfaces. No carbon spotting is seen beneath a loupe, and prolonged study of the surfaces under magnification only increases their appeal. A beautiful Registry coin. NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425

1909-S VDB Cent, MS66 Red  
Highest Collectible Grade

**3799** 1909-S VDB MS66 Red PCGS Secure. The famous 1909-S VDB cent holds down 23rd place on Jeff Garrett and Ron Guth's list of the 100 Greatest U.S. Coins, an honor that few collectible issues can claim. The San Francisco Mint struck 484,000 examples before Victor David Brenner's initials were removed from the lower reverse. They are strong on this Red Premium Gem, as are the wheat stalks, portrait, and legends on each side. Shimmering luster and a lack of mentionable abrasions add to the appeal of this fantastic key date representative. PCGS reports 15 higher grading events (5/18). NGC ID# 22B2, PCGS# 2428

1910-S Lincoln Cent, MS66+ Red  
Few Known Finer, CAC Endorsed

**3800** 1910-S MS66+ Red PCGS Secure. CAC. The 1910-S in Full Red becomes conditionally rare any finer than the Premium Gem level. This Plus-graded example adds CAC endorsement to its MS66+ Red credentials. The combination of peach and true-orange color coruscates across finely textured surfaces that lack all but the most minor, microscopic flecks. A tiny nick above the eyebrow is the sole mark visible under a loupe. Few examples of the 1910-S are any finer at either PCGS or NGC. PCGS Population: 8 in 66+) Red, 6 finer. CAC: 35 in 66, 0 finer (5/18). NGC ID# 22B6, PCGS# 2440

1914-D Cent, MS64 Red and Brown  
Mostly Red Surfaces

**3801** 1914-D MS64 Red and Brown PCGS Secure. CAC. Sharp design elements and satin luster are attractive attributes of this near-Gem Red and Brown coin, and only a few flecks are visible. The surfaces are mostly copper-red in color, although a few wisps of chestnut tinting earn a Red and Brown designation from PCGS. One of the most appealing Red and Brown 1914-D cents that we have seen in this grade.

*From The Bob Williams Collection.* NGC ID# 22BH, PCGS# 2472

**1914-D Cent, MS65+ Red and Brown  
High-End and Conditionally Rare**

**3802 1914-D MS65+ Red and Brown PCGS Secure. CAC.** After the 1909-S VDB, the 1914-D is the most recognizable key date in the Lincoln cent series. The issue's relatively low production total of 1.1 million coins ranks among the smallest in the set, and examples are among the rarest in high grades, regardless of color category. Unlike the 1909-S VDB or the later 1931-S, there was less speculation in the 1914-D and fewer original rolls were saved.

This high-end Gem with added recognition from PCGS and CAC is far more Red than Brown, despite what the official designation suggests. Both sides combine light golden-brown and copper orange hues that are readily appealing. There are no mentionable points of softness, and only a couple of tiny ticks appear on the shoulder. Population: 69 in 65 (3 in 65+) Red and Brown, 4 finer. CAC: 25 in 65, 2 finer (5/18). NGC ID# 22BH, PCGS# 2472

**1914-D Cent, MS64 Red  
Capstone Denver Mint Issue**

**3803 1914-D MS64 Red PCGS Secure.** One of the most challenging dates in the entire Lincoln cent series, the 1914-D, is second only to the 1909-S VDB in that regard. Examples with Red coloration are particularly elusive. This near-Gem is satiny and well-struck, save for the upper-reverse rim. Frequent carbon spotting appears on each side, but post-Mint contact is minimal. Few Uncirculated pieces survive from a low mintage of 1.2 million coins, and the '14-D is scarce in higher grades. NGC ID# 22BH, PCGS# 2473

**1914-D Lincoln Cent, MS65 Red  
Seldom Offered This Fine**

**3804 1914-D MS65 Red PCGS.** Fewer than 1.2 million cents were struck at Denver in 1914, a small mintage for the Lincoln series. This key date is scarce in Gem Red condition, reflected by both the certified population totals and auction data. Higher-grade Red coins are decidedly rare and are out of reach for most collectors. The 1914-D, although considered a secondary key compared to the 1909-S VDB, is actually the rarer issue in high grade. This Gem Red coin is well-struck with satiny copper-orange luster. Each side has a few small spots and surface marks, but nothing out of the ordinary for the Gem grade level. Population: 71 in 65 (8 in 65+ Red, 7 finer (4/18).

Ex: ANA Signature (Heritage, 8/2007), lot 1580, which realized \$20,700; Houston Signature (Heritage, 12/2008), lot 154, which realized \$19,550. NGC ID# 22BH, PCGS# 2473

1917-S Cent, MS65 Red  
One Example Graded Higher

- 3805 1917-S MS65 Red PCGS Secure.** The 1917-S is a challenging and little-saved issue that proves surprisingly rare in Gem Red condition. A mintage of 32.6 million coins belies its lack of availability in high grades. Each side offers a warm blend of copper, rose, and mahogany color with lively mint frost. Lincoln's portrait is strong, while typical softness appears at the upper-reverse border and on the O in ONE. Population: 24 in 65 Red, 1 finer (5/18).  
Ex: Summer FUN Signature (Heritage, 7/2009), lot 147. NGC ID# 22BU, PCGS# 2503

1920-S Lincoln Cent, MS65 Red  
Tied for Finest Certified

- 3806 1920-S MS65 Red NGC.** The 1920-S is seldom offered at the MS65 Red grade level, and unavailable any finer from either service. This coin is predominantly rich, reddish-orange in color with traces of golden shades in the centers. The strike is sharp in the centers, where the high-point shoulder and cheek areas are fully brought up and mark-free. Slight weakness at the ST in TRUST is the only discernible area of incomplete strike. This is a solid Gem, with a few pinpoint carbon flecks but no mentionable abrasions or distractions and excellent eye appeal. Census: 10 in 65 Red, 0 finer (4/18). NGC ID# 22C5, PCGS# 2530

1923-S Cent, MS65 Red  
Green CAC, Old Green Holder  
A Top-Grade Registry Coin

- 3807 1923-S MS65 Red PCGS. CAC.** Most Red 1923-S cents grade only MS63 or MS64. Gems are rare, and no finer pieces are known. This top-grade PCGS coin is also one of the two finest pieces endorsed by CAC. Remarkably clean, satiny surfaces display uniform copper-red luster and no carbon spotting. Even a 10x loupe fails to unearth obtrusive imperfections. The strike is sharp, and eye appeal is outstanding for the issue. This is a Registry Set coin of unsurpassed quality. We have not handled a PCGS-graded Gem Red example since our July 2013 Summer FUN Signature, lot 3067, where such a coin realized \$22,325 — without the CAC green label that the present coin possesses. This piece is also housed in an old green label holder. Population: 16 in 65 Red, 0 finer. CAC: 2 in 65, 0 finer (5/18).

*From The Bob Williams Collection.* NGC ID# 22CB, PCGS# 2548

**1924-D Cent, MS65+ Red**

**Major Plus-Graded, CAC-Approved Rarity  
An Exceptional Registry Set Candidate**

**3808 1924-D MS65+ Red PCGS Secure. CAC.** The 1924-D Lincoln cent is a rarity in Gem Red condition, more so than the certified population reports suggest. We last offered an MS65 Red coin in the January 2014 FUN Signature, lot 3537, where an NGC piece realized \$9,400. The current coin is not only the first Plus-graded Gem Red example that we have seen, it is also the first with a CAC endorsement. In fact, CAC has awarded a green label to only a dozen Red 1924-D cents in all grades combined. Moreover, we have not handled a Premium Gem Red example of this date since 2008.

Original, frosty mint luster illuminates boldly struck design elements on this almost carbon-free Registry coin. A loupe reveals minor die wear around the outer peripheries, but the coin is overall highly appealing and unabraded. Population: 44 in 65 (4 in 65+) Red, 1 finer. CAC: 5 in 65, 0 finer (5/18). NGC ID# 22CD, PCGS# 2554

**1926-S Lincoln Cent, MS64 Red**

**Challenging Condition and Color Rarity**

**3809 1926-S MS64 Red PCGS.** This San Francisco issue was touted as a rarity in high grades since shortly after its coinage, and today it is still recognized as the preeminent condition and color rarity of the series. The strike is often blurry on even high-grade pieces, but here it is sharper than most. Original pale-orange surfaces are softly lustrous beneath a faint overlay of aged bluish-gray patina. Only a few tiny marks are visible under a loupe, with perhaps a half dozen imperceptible carbon flecks. Population: 79 in 64 (2 in 64+) Red, 2 finer (5/18). NGC ID# 22CL, PCGS# 2575

**1926-S Cent, MS64 Red**

**Only Three Coins Certified Finer**

**3810 1926-S MS64 Red PCGS Secure.** This better San Francisco issue is scarce in Choice Red condition and is nearly uncollectible finer. This piece has satiny copper-orange luster and essentially carbon-free surfaces. Die erosion blurs the finer design details, but no major abrasions are present, and eye appeal is pleasing. Population: 79 in 64 (2 in 64+) Red, 2 finer (5/18). NGC ID# 22CL, PCGS# 2575

**1927 Cent, MS67+ Red**

**Among the Finest at CAC**

**3811 1927 MS67+ Red PCGS Secure. CAC.** Although a mintage of 144 million coins makes the 1927 cent an available issue through virtually all grade levels, this Plus-designed and CAC-approved Superb Gem has the distinction of being one of the top seven examples seen by PCGS. Pristine coppery surfaces shimmer with soft mint luster, and the strike is strongly impressed, save for the O in ONE. A great Registry coin. Population: 60 in 67 (7 in 67+) Red, 0 finer. CAC: 25 in 67, 0 finer (5/18). NGC ID# 22CM, PCGS# 2578

**1969-S Double Die Obverse Cent****Sharp MS61 Brown****Rare Guide Book Variety**

**3812** 1969-S Doubled Die Obverse, FS-101, MS61 Brown NGC. This is a glossy chestnut-brown example with interlaced tinges of violet and green color on each side. The strike is sharp and the devices are unworn, although scattered abrasions limit the grade. Overall, eye appeal is pleasing, and on an issue as rare as the 1969-S Doubled Die cent, collectors rarely have an opportunity to be picky about appearance. PCGS estimates that only about 30 examples are known. This variety was discovered mid-1970, and in the following years new finds were rare. Mint State examples with original coloration are in high demand among Registry Set collectors. Listed in the #1 position in Schechter and Garrett's 100 Greatest U.S. Modern Coins (2011). PCGS# 37994 Base PCGS# 2921

**PROOF LINCOLN CENTS****1916 Cent, PR65 Red and Brown****Magnificent Coloration**

**3813** 1916 PR65 Red and Brown NGC. An unquestioned proof, showing fully struck devices, broad, squared rims, and rich matte luster. Specialists of the series will admire the original coloration of this Gem Red and Brown proof, which shows copper-orange across the reverse with red, orange, olive, and lilac hues over the obverse. This is a mostly red coin that produces stronger eye appeal than many Red-graded matte proofs that we have seen. A couple of small specks are visible in the right obverse field but are not overly obvious. An outstanding example of the final-year matte proof Lincoln cent. Census: 19 in 65 Red and Brown, 14 finer; 2 in 65 Red, 3 finer (4/18). NGC ID# 22KZ, PCGS# 3325

**1916 Cent, PR65 Red and Brown  
Final-Year Matte Proof**

**3814** 1916 PR65 Red and Brown PCGS. An unquestioned matte proof, this Red and Brown Gem displays fully struck devices, broad and squared rims, and finely textured surfaces. The color is uniformly golden-orange with a few wisps of olive-brown and chestnut toning. No distracting marks are visible. The 1916 is the last of the matte proof Lincoln cents, and it is scarce, coming from a mintage of only 1,050 coins. Population: 57 in 65 (1 in 65+) Red and Brown, 28 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 22KZ, PCGS# 3325

1936 Cent, PR66 Red  
Type Two, Brilliant Finish

- 3815** 1936 Type Two — Brilliant Finish PR66 Red PCGS. CAC. The Brilliant Finish proof cents struck in 1936 (5,569 coins minted) were more popular than the Satin Finish specimens struck earlier that year. Consequently, many more were saved in high grades. This flashy Premium Gem with deep watery fields exhibits bright copper-orange color. Preservation and eye appeal are both excellent. Population: 62 in 66 (5 in 66+) Red, 2 finer. CAC: 22 in 66, 2 finer (5/18). NGC ID# 22L3, PCGS# 3335

1937 Lincoln Cent, PR67 Red Cameo  
No Numerically Finer Cameos at Either Service

- 3816** 1937 PR67 Red Cameo NGC. The Cameo designation is only grudgingly given by either service to survivors of the 9,320-piece 1937 proof mintage. The overwhelming majority of proofs show no field/device contrast whatsoever. This Superb Gem Cameo gets an assist from the liquidlike mirrored fields, which surround satiny raised motifs that display a thin skin of mint frost. The immaculate surfaces radiate flame-orange glow with no more than three or four inconsequential flecks under the scrutiny of a lens. Census: 6 in 67 Red Cameo (3 in 67★), 0 finer (5/18). NGC ID# 22L5, PCGS# 83338

1941 Cent, PR67+ Red  
Single Finest at Both Services

- 3817** 1941 PR67+ Red NGC. This is the single finest 1941 Lincoln cent proof reported at NGC and PCGS by the margin of the Plus designation. As such, we expect this lot to draw considerable attention from serious Registry Set collectors. Both sides exhibit deep copper-orange coloration and glassy, unmarked fields. Census: 12 in 67 Red (1 in 67+ Red), 0 finer (5/18). NGC ID# 3H34, PCGS# 3350

1950 Cent, PR67+ Red Ultra Cameo  
A Single Example is Graded Higher

- 3818** 1950 PR67+ Red Ultra Cameo NGC. The year 1950 was the first time since 1942 that the Mint had produced Lincoln cent proofs. In all, 51,386 specimens were struck, and this is just about the finest quality a collector could hope to find for the issue. Both sides remain fully Red and feature stark field-device contrast. A high-powered lens reveals a handful of microscopic flecks on the shoulder and cheek. The fields are essentially pristine. Census: 18 in 67 Red Ultra Cameo (2 in 67+), 1 finer (5/18). NGC ID# 22LA, PCGS# 93359

1951 Cent, PR66 Red Ultra Cameo  
A Top-Level Registry Coin

- 3819** 1951 PR66 Red Ultra Cameo NGC. This was the second year of issue in the third period of Lincoln cent production. The Mint struck 57,500 examples, and high-grade survivors are among the rarest in the latter part of the series. Watery copper-gold surfaces are deeply contrasted. The only obvious contact mark is a small tick in the field right of the final T in TRUST. Census: 1 in 66 Ultra Cameo, 1 finer (5/18). NGC ID# 22LB, PCGS# 93362

## PROOF TWO CENT PIECES

1866 Two Cent, PR66+ Red and Brown  
Magnificent Coloration

- 3820** 1866 PR66+ Red and Brown PCGS. CAC. Red and Brown coins make up the majority of certified proof 1866 two cent pieces, although even they are rare in Premium Gem condition. This Plus-graded, CAC-approved example is among the finest known in that color category. The relief elements are fully defined, set against reflective fields that showcase beautiful fire-orange, violet, and olive hues. There are no distractions observed. Population: 25 in 66 (4 in 66+) Red and Brown, 0 finer. CAC: 19 in 66, 0 finer (5/18). NGC ID# 274V, PCGS# 3631

1870 Two Cent Piece, PR66 Red  
Just One Finer at PCGS

**3821** 1870 PR66 Red PCGS Secure. Smooth and reflective surfaces display a reddish tinge over unmarked pumpkin-gold surfaces, with needle-sharp devices and strong eye appeal. While a healthy mintage of 1,000 proofs assures availability in most grades, Premium Gem pieces are scarce and finer examples are rare. Population: 16 in 66 (2 in 66+) Red, 1 finer (5/18). NGC ID# 274Z, PCGS# 3644

1872 Two Cent Piece, PR66 Red  
Outstanding Example for Registry Collections

**3822** 1872 PR66 Red PCGS Secure. CAC. PCGS has certified only a single Cameo example of the 1872 proof two cent piece (that coin in PR64+) making high-end Red non-Cameos arguably the finest available for collectors. This CAC-endorsed Premium Gem is conditionally rare, and displays mirrored fields and rich coppery-orange color. A single finer Red coin is known at both services combined. Population: 14 in 66 Red, 1 finer. CAC: 5 in 66, 0 finer (5/18). NGC ID# 2752, PCGS# 3650

1873 Two Cent, PR65 Red  
Earlier Closed 3 Variety

**3823** 1873 Closed 3 PR65 Red PCGS. High-end Red examples of the Closed 3 proof 1873 two cent piece are rare. This Gem is fully struck and shows a hint of contrast on each side amid original coppery-orange and golden surfaces. Only a few unobtrusive flecks are visible beneath a loupe. Housed in a first generation holder. Population: 18 in 65 Red, 15 finer; 1 in 65 Red Cameo, 1 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 5L57, PCGS# 3653

THREE CENT SILVER

1851 Three Cent Silver, Bright MS67+  
Delicate Golden Accents

**3824** 1851 MS67+ NGC. The 1851 is a collectible date overall with a mintage of 5.4 million coins, but it is rare in this incredible state of preservation. Delicate gold and iridescent toning is barely visible over the brilliant and highly lustrous surfaces of this impressive Superb Gem circulation-strike three cent silver. The strike is bold. Slight repunching is noted on the 5 and 1 in the date. Census: 13 in 67 (3 in 67+), 0 finer (5/18). NGC ID# 22YX, PCGS# 3664

**PROOF THREE CENT SILVER**

**1856 Silver Three Cent, PR65 Cameo  
Sharp Strike, Early Die State**

**3825 1856 PR65 Cameo PCGS.** PCGS estimates that only about 60 proof 1856 three cent silver pieces are known. Few are designated Cameos, and none are Deep Cameos at that service. PCGS and NGC combined report only nine Cameos in all grades, plus one PR67 Ultra Cameo at NGC (4/18). This is a sharp Gem struck from fresh dies. Unlike many other proofs, this piece does not show excessive die polishing in the recesses of the design. The interiors have champagne tinting, surrounded by blue-green and russet borders. Cameo contrast is pleasing on both sides. Population: 2 in 65 Cameo, 1 finer (4/18). PCGS# 83703

**1871 Three Cent Silver, PR67 Cameo  
Colorful Old-Time Toning**

**3826 1871 PR67 Cameo NGC.** This delightful Superb Gem proof is both contrasted and deeply toned. Champagne and lavender hues in the centers allow the satiny devices to contrast starkly with the rose-gold and aquamarine toning around the margins. The strike is sharp and eye appeal is outstanding. The 1871 proof silver three cent is rarely offered so fine with cameo contrast. Census: 6 in 67 Cameo (2 in 67★), 1 in 67 Ultra Cameo finer (4/18). NGC ID# 27CG, PCGS# 83722

**PROOF THREE CENT NICKEL**

**1872 Three Cent Nickel, PR67 Cameo  
No Finer Cameo Proofs**

**3827 1872 PR67 Cameo NGC.** The mintage of minor coins prior to 1878 is unknown as the Mint only recorded proof production for the silver and gold coins. In the past, collectors assumed that the minor coinage had the same production as silver coins, so the mintage of this proof issue is still recorded as "950+." This Superb Gem Cameo proof has lovely light gray surfaces with fully mirrored fields, and sharply struck, lustrous devices. A lovely example for the connoisseur. Census: 4 in 67 Cameo (2 in 67★), 0 finer (5/18). NGC ID# 26JT, PCGS# 83768

## SHIELD NICKELS

1881 Shield Nickel, MS67

Incredibly Sharp and Well-Preserved

- 3828** 1881 MS67 PCGS. A superb Registry Set candidate, this MS67 1881 Shield nickel is tied for the finest certified at both services and is a great rarity as such. The present example displays detail that can only be described as full. Beautifully preserved with a hint of delicate champagne toning that graces each side. Population: 6 in 67, 0 finer (5/18). NGC ID# 276F, PCGS# 3811

1882 Shield Nickel, MS67+  
Top-Grade Registry Coin

- 3829** 1882 MS67+ PCGS. CAC. Beautiful, luminous surfaces showcase a hint of champagne tinting amid a vibrant cartwheel effect. PCGS and NGC combined list only 15 MS67 examples of this issue, and the present coin is the only one with a Plus designation, making it the single finest 1882 Shield nickel known. Sharp design elements on each side are joined by an array of peripheral die cracks, which are characteristic of most Shield nickel issues. Population: 10 in 67 (1 in 67+), 0 finer. CAC: 4 in 67, 0 finer (4/18). NGC ID# 276Y, PCGS# 3812

## PROOF SHIELD NICKELS

1867 Rays Nickel, PR65

Dannreuther-3 Variety

- 3830** 1867 Rays PR65 PCGS. CAC. Dannreuther-3. A sharply struck Gem with light cream-gray toning and nicely mirrored fields. No contact marks are present, and carbon is limited to a couple of minuscule flecks. The proof 1867 Rays nickel is key to a complete Guide Book collection of the Shield nickel series, despite other rare varieties such as the pattern reverse 1867 proof, the proof-only 1877, and the business strike 1880. The actual mintage of the proof 1867 Rays nickel is unknown, but unlikely to exceed 100 pieces, since PCGS estimates 60 survivors. Despite the great rarity of the proof 1867 Rays nickel, four obverse die varieties exist. Rising diagonal die polish lines throughout the obverse exergue provide the best identifiers for Dannreuther-3. The rightmost leaf beneath the final T in TRUST is slightly crude. Population: 12 in 65, 2 in 66, 8 in 65 Cameo, 9 in 66 Cameo. CAC: 4 in 65, 7 in 65 Cameo, 2 in 66 Cameo (5/18).

Ex: Dallas Signature (Heritage, 10/2008), lot 333, which realized \$69,000.

**From An Important New York Collection.** NGC ID# 276H, PCGS# 3818

1871 Shield Nickel, PR67  
Registry Grade Specimen

**3831 1871 PR67 PCGS Secure.** Only 960 proof Shield nickels were struck in 1871 and few survivors can match the quality and eye appeal of the present coin. This delightful Superb Gem offers sharply detailed design elements throughout, with impeccably preserved surfaces that include hazily reflective fields. Both sides are visited by attractive shades of lavender, blue, and pale gold toning. Population: 2 in 67 (1 in 67+), 0 finer (4/18). NGC ID# 276M, PCGS# 3825

1873 Shield Nickel, PR67 Cameo  
Closed 3

**3832 1873 Closed 3 PR67 Cameo PCGS Secure.** The Closed 3 in the date is diagnostic for proofs. This magnificent Superb Gem exhibits razor-sharp, frosty design elements that contrast boldly with the deeply mirrored fields to create a dramatic cameo effect. The surfaces are impeccably preserved and show subtle highlights of pale gold toning. Eye appeal is terrific. Population: 3 in 67 (1 in 67+) Cameo, 0 finer (4/18). NGC ID# 276P, PCGS# 83827

LIBERTY NICKEL

1886 Liberty Nickel, MS66  
Sought-After Series Key

**3833 1886 MS66 PCGS Secure.** From a modest business-strike mintage of 3.3 million pieces, the 1886 Liberty nickel is usually regarded as the second-rarest issue of the series. In terms of high-grade rarity, the 1886 is actually number one, narrowly eclipsing its 1885 counterpart. It seems the coins were all released into circulation at the time of issue and circulated heavily for decades, before collector interest developed enough to cull them out of circulation in the 1930s. The 1886 is rare in MS66 condition today, and finer coins are virtually unobtainable.

This spectacular Premium Gem exhibits sharply detailed design elements in most areas, with just a touch of the usual softness on the lower wreath. The well-preserved surfaces radiate satiny mint luster, under shades of lavender-gray and pale gold toning. Population: 14 in 66 (3 in 66+), 1 finer (4/18). NGC ID# 277U, PCGS# 3847

## PROOF LIBERTY NICKEL

1910 Liberty Nickel, PR68 Deep Cameo  
The Only PR68 Deep Cameo Certified in the Series

**3834** 1910 PR68 Deep Cameo PCGS Secure. CAC. The term “perfect for type” can mean different things to different people. If a circulated type set is being assembled, then problem-free type is what is wanted. If it is business strike coins, then the finest business strike is sought. For proof strikes, then it is the highest grade proof available. As a subset of proofs, some collectors pursue Deep Cameo examples. This piece falls under the heading of “perfect for type” among Deep Cameo proofs. The fields show astounding depth of reflectivity. Likewise, the devices are heavily frosted. The combination yields the always-elusive Deep Cameo contrast. Each side presents as brilliant, but closer examination shows there is just the slightest hint of color present. As indicated by the PR68 grade, there are no contact marks on either side. In the entire run of Liberty nickels, from 1883 to 1912, PCGS has only certified 22 pieces PR68. There is only one PCGS PR68 Deep Cameo in the series, and this is it (4/18). NGC ID# 278L, PCGS# 93908

## BUFFALO NICKELS

1913-D Type One Nickel, MS67+  
Beautiful Multicolor Toning

**3835** 1913-D Type One MS67+ NGC. The Type One Buffalo nickel struck in Denver is significantly scarcer in high grade than its Philadelphia counterpart. Both issues were heavily saved in relation to their mintage figures, but while the Philadelphia issue's coinage topped 30 million pieces, the 1913-D Type One's production amounted to less than 5.4 million coins. This Plus-graded Superb Gem example is well-struck and well-preserved. Lavender-blue centers cede to vivid rainbow border toning, giving this piece tremendous eye appeal. The patina is backlit by satiny original mint luster. Census: 26 in 67 (4 in 67+, 1 in 67 ★, 1 in 67+★), 1 finer (4/18). NGC ID# 22PX, PCGS# 3916

1913 Type Two Nickel, MS67  
Razor-Sharp, Golden Patina

**3836** 1913 Type Two MS67 PCGS Secure. This razor-sharp first-year issue features the Type Two design with FIVE CENTS recessed that was used for the duration of the series. Delicate champagne-gold patina drapes near-flawlessly preserved surfaces. A single apparent mark occurs above the date. Population: 35 in 67 (6 in 67+), 0 finer (5/18). NGC ID# 22PZ, PCGS# 3921

1914-S Nickel, Sharp MS66  
Few Finer Pieces Known

**3837** 1914-S MS66 PCGS Secure. The 1914-S Buffalo nickel frequently comes well-struck, as this Premium Gem demonstrates. Satiny, champagne-tinted luster complements sharp central devices, and even the bison's head is well-defined. No distracting abrasions are visible. The 1914-S is available through MS65 but is scarce in MS66 and is rare finer. Population: 44 in 66 (6 in 66+), 2 finer (4/18). NGC ID# 22R6, PCGS# 3926

**1916 Buffalo Nickel, MS67**  
Among the Finest at PCGS

**3838 1916 MS67 PCGS Secure.** Buffalo nickels were mass-produced throughout the entire run of the series at all mints, as this denomination was heavily used in small purchases, pay phones, and banks. Uncirculated examples survive, but most show light to moderate bagmarks or surface scrapes from being stacked in rolls. This 1916 coin is conditionally scarce. Under a loupe, the satiny surfaces reveal no abrasions, and the lemon-gold and mint-green luster is luminous. Only slight strike softness is seen on the bison's shoulder. Population: 29 in 67 (1 in 67+), 0 finer (4/18). NGC ID# 22RA, PCGS# 3930

**1918/7-D Nickel, XF40**  
Important Guide Book Overdate

**3839 1918/7-D FS-101 XF40 PCGS Secure. CAC.** Appropriately graded XF40 and recognized by CAC, showing only light wear over the bison and obverse portrait. The original pewter-gray surfaces exhibit no distractions. The 1918/7-D nickel is a key Guide Book variety, created when a working die was hubbed with two different dates. The overdate feature is plain under magnification, and strong eyes can see it even without a loupe. On this lightly circulated coin, the overdate is bold. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**1918/7-D Nickel, AU55**  
Scarce Overdate

**3840 1918/7-D FS-101 AU55 PCGS. CAC.** The 1918/7-D nickel die was likely manufactured late in 1917, when the engraving department at the Philadelphia Mint (where all branch mint dies were made) would have had hubs with both the 1917 and 1918 dates in use. Working dies received at least two impressions from a hub and were annealed in between to prevent cracking. The overdate occurred when a working die was fitted to hubs of both dates at the different stages of the hubbing process.

Coins struck from this die are elusive in high grade and in great demand among collectors. In the Buffalo nickel series, the major keys are not regular issues but rather die varieties like the 1918/7-D. This Choice AU example displays subtle golden accents and satiny mint luster. The centers are poorly struck, as normal for the issue. Under a loupe, barely a brush of high-point friction is discernible. Ex: FUN Signature (Heritage, 1/2006), lot 3108, which realized \$21,850; FUN Signature (Heritage, 1/2008), lot 2732, which realized \$25,300. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**1919-D Nickel, Delicately Toned MS65  
Rare in Finer Condition**

**1926-S Nickel, MS64  
Rarely Available Finer**

**3841 1919-D MS65 PCGS Secure.** This Denver issue is available through MS64, but Gems are scarce. Higher-grade pieces are rare. This example is especially lustrous and well-preserved, showing champagne toning on the obverse and deeper lavender-gold over the reverse. Only slight strike weakness is seen on the bison's shoulder and the hair above the Indian's braid. The eye appeal is pleasing. Population: 65 in 65 (5 in 65+), 20 finer (4/18). NGC ID# 22RM, PCGS# 3942

**1924-S Buffalo Nickel, Colorful MS64  
Old Green Label Holder**

**3842 1924-S MS64 PCGS.** Lavender, gold, and ice-blue toning graces the softly frosted surfaces of this Choice 1924-S Buffalo nickel. Strike weakness occurs on the bison's shoulder and the hair above the Indian's braid, but the border regions are better defined. The 1924-S is a better date in high grade, genuinely scarce in MS65 and rare finer. This near-Gem remains readily collectible. Housed in an old green label holder. PCGS lists 50 finer coins (5/18). NGC ID# 22RZ, PCGS# 3953

**1926-S Nickel, Satiny MS63  
Better Date in All Grades**

**3843 1926-S MS63 PCGS Secure.** The 1926-S nickel's mintage of 970,000 coins is the only production total in the series below 1 million coins. This is a better date in all grades as a result. Select surfaces on this piece display satin luster and light golden-gray toning with ice-blue and lilac accents. A moderately weak central strike likely contributes to the grade.

*From The Bob Williams Collection.* NGC ID# 22S7, PCGS# 3959

**3844 1926-S MS64 PCGS.** In the past, some researchers have considered the 1926-S nickel to be overrated in circulated grades, although its low mintage (970,000 coins) ensures the date's lasting popularity in any condition. A constant of this issue, however, is its elusiveness in Choice and better condition. This near-Gem has lustrous surfaces with ice-blue and lilac-gray patina, which are devoid of significant abrasions. The border regions are well-defined, but the usual strike weakness occurs on the bison's shoulder and the Indian's central hair details. PCGS lists 17 numerically finer submissions (5/18).

*Ex: FUN Signature (Heritage, 1/2007), lot 826, which realized \$14,950. NGC ID# 22S7, PCGS# 3959*

**1929 Buffalo Nickel, MS67  
Registry Set Contender**

**3845 1929 MS67 PCGS Secure.** The 1929 Buffalo nickel claims a substantial mintage of more than 36 million pieces. This extraordinary Superb Gem is among the finest certified survivors at either grading service. The design elements are sharply detailed and the impeccably preserved surfaces radiate vibrant mint luster on both sides. Population: 12 in 67, 0 finer (4/18). NGC ID# 22SE, PCGS# 3966

**1937-D Three-Legged Nickel, MS65  
Delicate Pastel Toning**

**3846 1937-D Three-Legged, FS-901, MS65 PCGS.** Extensive die erosion is so predominant on the Three-Legged Buffalo nickel that certain patterns of die rust and flowlines are used as diagnostic points for authenticating this variety. One such diagnostic is a strip of small die lumps in field that connects the bison's body to the ground between the front and rear legs. Other portions of the fields are heavily flowlined, and the recesses of the devices show patches of heavy erosion. This heavy erosion was likely the reason that the reverse die was so heavily polished down — to the point of effacing the bison's right front leg. The hoof of the missing leg remains visible only due to the fact that it was sunk deeper into the die.

The number of Three-Legged nickels known suggests that this eroded die pair was used for a lengthy period of time before being retired. However, Gem-quality survivors are scarce. This piece is well-struck and unabraded, showing lovely champagne and pastel toning over softly frosted surfaces. Population: 62 in 65 (8 in 65+), 10 finer (5/18).

Ex: FUN Signature (Heritage, 1/2007), lot 831, which realized \$32,200; FUN Signature (Heritage, 1/2008), lot 2736, which realized \$32,200. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1938-D Nickel, Toned MS68  
Top-Grade Registry Coin**

**3847 1938-D MS68 PCGS Secure.** The 1938-D Buffalo nickel is a common date overall, but Registry Set collectors and specialists of the series who pursue top-grade examples will encounter a challenge. The 1938-D is conditionally rare in MS68 and is unknown finer. This piece displays vibrant original luster and beautiful toning. The orange-gold centers cede to lavender and ice-blue margins, and no distracting abrasions are seen. Central strike weakness is present on both sides. Population: 27 in 68 (1 in 68+), 0 finer (4/18). NGC ID# 22T2, PCGS# 3984

**1938-D/S Buffalo Nickel, MS67+  
Popular Guide Book Variety**

**3848 1938-D/S FS-511 MS67+ PCGS Secure. CAC.** This is among the finest examples of the variety reported at PCGS (5/18). The underlying S is plainly visible within and above the primary D mintmark. Working dies were prepared at the Philadelphia Mint and then shipped to the branch mints as needed. This variety occurred when a reverse die destined for San Francisco was repunched with the D mintmark and shipped to Denver instead. Satiny luster on this piece shows delicate rose-gold toning and well-struck design elements. The Plus designation and CAC green label combination add to the eye appeal. NGC ID# 22T3, PCGS# 38476 Base PCGS# 3985

## PROOF BUFFALO NICKEL

**1913 Type Two Nickel, PR67  
Only 1,514 Proofs Struck**

**3849 1913 Type Two PR67 PCGS Secure.** David Lange explains that the 1913 Type Two "is second only to 1916 in rarity among the early period proofs. It's almost a certainty that many of the proofs struck remained unsold at the end of the year and were melted." This satiny, lightly toned Superb Gem showcases delicate accents of gold and blue color. No marks to report. There are seven finer submissions at PCGS (5/18). NGC ID# 278S, PCGS# 3990

## JEFFERSON NICKELS

1946-S Jefferson Nickel, MS67 Full Steps  
Tied for the Finest Certified

- 3850** 1946-S MS67 Full Steps PCGS Secure. This stunning Superb Gem has pristine surfaces and a bold strike with full steps to the porch of Monticello. The frosty surfaces exhibit brilliant light gray luster with a glass required to see the minimal, grade-consistent marks. Population: 3 in 67 Full Steps, 0 finer (5/18). NGC ID# 22U4, PCGS# 84030

1959 Nickel, MS67 Full Steps  
Brilliant and Well-Struck

- 3851** 1959 MS67 Full Steps PCGS. The steps of Monticello are uncommonly sharp on this semiprooflike Superb Gem. No marks are evident throughout the essentially brilliant surfaces. Many rolls of 1959 nickels were saved during the hobby heyday, but only a minuscule percentage combine Full Steps with outstanding preservation. Population: 3 in 67 Full Steps, 0 finer (4/18). NGC ID# 22V6, PCGS# 84065

## EARLY HALF DIMES

1794 V-4, LM-4 Half Dime, VF30  
Important Flowing Hair Type

- 3852** 1794 V-4, LM-4, R.4, VF30 NGC. The date appears low, but only because the portrait is high on the LM-4 variety. The E in LIBERTY is higher than the surrounding letters to avoid touching the top curl, and stars 11 to 15 show recutting. This example has a granular obverse, with areas of old, deep-gray encrustation across silver-gray fields, with numerous light marks and lines. In contrast, the reverse is smooth and attractive for the assigned grade. Census (all varieties combined): 2 in 30, 97 finer (5/18). NGC ID# 22ZT, PCGS# 38584 Base PCGS# 4250

1796/5 Half Dime, MS60  
Rare V-2, LM-2 Die Marriage

- 3853** 1796/5 V-2, LM-2, R.6, MS60 NGC. The overdate gets little emphasis in the Logan-McCloskey reference, in part because it disappears on lower-graded coins. Here, the underdigit 5 is bold beneath the primary 6. The peripheries of this example are sharp and prooflike, while the central motifs are weak in the centers. A group of adjustment marks in the center of the reverse is the likely culprit, limiting the strike both on the reverse and at Liberty's mid-to-upper hair strands.

Faint wisps of reddish-gold toning at the margins frame silver-gray centers of this Mint State coin. LM-2 is normally seen well-circulated, and we seldom offer Uncirculated representatives of the variety. This one shows only a few non-Mint related abrasions and retains plentiful eye appeal. Struck from a late die state, with a long die crack that heads south from the second T in STATES. The LM-2 variety is by far the rarest of the two 1796 die marriages. Census: 2 in 60, 8 finer (4/18). NGC ID# 22ZY, PCGS# 38595 Base PCGS# 4255

1800 Draped Bust Half Dime, MS63  
Famous LIBEKTY Variety, V-2, LM-3  
Ex: Eliasberg

**3854** 1800 LIBEKTY, V-2, LM-3, R.4, MS63 NGC. Ex: Eliasberg. Mintage of half dimes resumed in 1800, and marked the introduction of the Heraldic Eagle reverse for the denomination, since no half dimes were struck in 1798 or 1799. Four die marriages struck a total of 40,000 coins. Two of the four die pairs — LM-3 and LM-4 — employ a broken R punch in LIBERTY to create the Guide Book listed LIBEKTY variant, which accounts for approximately 40% of the total 1800 mintage.

This important Select Uncirculated example is from the Eliasberg Collection. It is a richly toned LM-3 example that likely traces back to Thomas L. Elder in September, 1905 as recorded in the Clapp notebook. The obverse shows a sharp strike on Liberty except for slight weakness on the central curls, opposite die buckling that obscures BUS in PLURIBUS on the reverse. Weakness at the right-side obverse dentils and upper-right field stars exists as well. Attractive reddish-gold toning in the centers yields to bluish-gray patina at the margins. NGC ID# 2326, PCGS# 38603 Base PCGS# 4265

## BUST HALF DIMES

1831 Half Dime, MS67+  
Colorfully Toned V-1, LM-6

**3855** 1831 V-1, LM-6, R.1, MS67+ NGC. Mint reports document the production of 1.2 million half dimes in 1831. Seven distinct die varieties are known, most of them are readily available. This LM-6 marriage features the 1s in the date centered over dentils, and the branch stem slightly right of the C. Blended sea-green, cobalt-blue, rose-violet, and golden tones converge throughout this high-end Superb Gem. A full strike and bold clash marks appear on each side. Census (all varieties): 17 in 67 (3 in 67+, 2 in 67★), 1 finer (5/18). NGC ID# 232D, PCGS# 38661 Base PCGS# 4278

1835 V-7, LM-10 Half Dime, MS66+  
Small Date, Small 5C

**3856** 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS66+ NGC. The 5 in the denomination has a small triangular flag and is under the fletching. This magnificently toned Premium Gem is overtly high-end for the grade. Original shades of blue, violet, rose, and gold color cover beautifully preserved, sharply struck surfaces. The visual quality is exquisite. NGC ID# 232H, PCGS# 38719 Base PCGS# 4285

1836 Half Dime, MS67+  
Small 5C, V-6, LM-5  
None Finer at Either Service

**3857** 1836 Small 5C, V-6, LM-5, R.2, MS67+ PCGS Secure. CAC. Ex: Simpson. Only the former D. Brent Pogue coin rivals this coin for supremacy atop the Small 5C Condition Census. Both coins are graded MS67+ PCGS, although the present example adds CAC endorsement to its résumé. Remarkably, the two coins not only share the same numeric grade, they are the same LM-5 variety. Yet in a visual sense, the former Simpson and Pogue coins could not be more different.

This example displays vibrant splashes of cerulean-blue toning on the obverse and a broad band of the same blue hue surrounds the entire reverse. The centers on both sides are a vivid champagne-gold, while mint luster flashes from all angles. As usual for the variety, the dies clashed and were lapped to partially efface the die damage. Some design detail (especially on the lower reverse) was sacrificed in the process — another shared characteristic, since both Superb Gems are struck from a similar die state. The coin offered here is sharply struck with needle-sharp stars and mark-free surfaces. The two worthy adversaries are each spectacular, but only this coin is available here and now for prospective bidders. Population: 2 in 67+, 0 finer (4/18). NGC ID# 232J, PCGS# 38728 Base PCGS# 4288

## SEATED HALF DIMES

1844-O Seated Half Dime, MS62  
Major Series Rarity When Uncirculated

**3858** 1844-O MS62 PCGS. V-2, Small O Mintmark. Inverted reverse with medal-turn alignment. This is one of the rarities in the half dime series, and it is seldom found so fine. Perhaps only the 1846 and 1853-O No Arrows issues are more highly prized by specialists. Some slight strike weakness is noted on both sides, although most of the die work is quite sharply delineated, especially for a product of the New Orleans Mint. The Valentine-2 variety, with its small mintmark, is often found with the rotated reverse as on the present example. This is a lovely coin with satiny fields beneath medium gray-rose and coral-tan toning. The surfaces show few blemishes and no individually distracting marks. Population: 5 in 62, 5 finer (4/18).

Ex: Denver Signature (Heritage, 8/2006), lot 809.

From The Reilly Cody Collection. NGC ID# 2336, PCGS# 4334

**1852-O Half Dime, Toned MS66**  
Remarkably High-Grade and Rare

**3859 1852-O MS66 NGC.** The 1852-O half dime is a rarity in Uncirculated condition, and a trio of Premium Gems are the finest examples certified — two MS66 at NGC and an MS66+ at PCGS (4/18). This Condition Census example is toned in antique-gold, rose, and aquamarine hues over satiny mint luster. Liberty's head and the stars are sharp, and a loupe reveals only the most trivial signs of contact in the fields. A true Registry Set coin of remarkably rarity and quality.

Ex: Los Angeles Signature (Heritage, 8/2009), lot 421, which realized \$8,194.

*From The Reilly Cody Collection.* NGC ID# 233L, PCGS# 4350

**1860 Transitional Half Dime, Toned MS67**  
Among the Finest Known

**1853 Arrows Half Dime, MS67**  
Superb Preservation, Old-Time Toning

**3860 1853 Arrows MS67 PCGS Secure.** The 1853 is one of the two most plentiful With Arrows half dime issues and is, therefore, popular as a type coin. Superb Gem examples, however, are rarely located. This piece is among the finest known. Sharp design elements and frosty mint luster appear over unabraded surfaces. The interiors show light golden toning, while the borders have deeper amber, russet, and teal coloration. Population: 13 in 67 (2 in 67+), 0 finer (5/18). NGC ID# 233Y, PCGS# 4356

**3861 1860 Transitional, Judd-267, Pollock-315, R.4, MS67 NGC.** Not actually a pattern, but since it was issued these so-called transitional half dimes have been considered along with patterns, but have been collected in the larger sense with other Seated half dimes. These pieces were created by Mint Director James Ross Snowden as “trade bait” for coins lacking from the Mint Collection. Actually, Snowden ordered them made, it was Anthony Paquet who actually created them. The With Stars obverse was carried over from 1859 and paired with the reverse of 1860. The diagnostic die scratch is easily seen angling upward from the left base of the rock on the obverse. The bright, lustrous surfaces display deep blue toning over most of each side that is encircled by a thin ring of bright crimson around the margins. Extraordinary quality. Census: 4 in 67 (1 in 67+), 1 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 2346, PCGS# 4373

## PROOF SEATED HALF DIMES

**1844 Half Dime, Toned PR64**  
Rarely Offered in Proof Format

**3862 1844 PR64 NGC.** In 1844, the Mint did not record proof coin mintages. Moreover, proofs were not actively marketed to the public, so pieces that were struck were low in number. Today, PCGS estimates that only 10 to 15 proof 1844 half dimes survive in all grades. The combined NGC and PCGS certified population totals list 13 grading events (4/18), although some duplication may be reflected in that number. This Choice example is the first 1844 proof that we have handled since the Eugene H. Gardner Collection, Part II (Heritage, 10/2014), where a PR64 NGC CAC coin realized nearly \$13,000.

This piece displays a sharp strike and reflective fields. Golden-toned interiors cede to deeper blue and violet border toning, producing strong eye appeal. A colorfully appealing example of this rare proof issue. Census: 3 in 64, 2 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 2335, PCGS# 4420

**1852 Seated Half Dime, PR63**  
Only 5-10 Examples Known

**3863 1852 PR63 NGC.** No records were kept for proof mintages before the Mint began its program of official proof set offerings in 1858, so the exact mintage of 1852 half dimes was not recorded. The number was certainly small as PCGS estimates only 5-10 examples are extant today. This is an attractive Select coin with pinpoint sharpness and reflective fields. The surfaces show attractive shades of lavender, blue, and golden-russet toning. Only a few minor contact marks are present and the overall visual appeal is quite strong. Census: 2 in 63, 3 finer; 0 in 63 Cameo, 4 finer (4/18).  
Ex: Central States Signature (Heritage, 4/2013), lot 4174, which realized \$8,225.

*From The Reilly Cody Collection.* NGC ID# 235K, PCGS# 4429

**1854 Arrows Half Dime, Toned PR65**  
Rare in Proof Format

**3864 1854 Arrows PR65 NGC.** Al Blythe, in *The Complete Guide to Liberty Seated Half Dimes* (1992), estimated that 16 to 20 half dime proofs were produced in 1854. PCGS estimates that 12 to 16 coins survive in all grades, although the combined certification numbers of both leading services total 23 grading events, likely reflecting duplicate submissions (4/18). Arrows coinage is rare in proof format and has enduring popularity among type collectors of Seated coinage. The proof 1854 half dime is almost unknown finer than PR65. This Gem is sharp and mirrored — an unquestioned proof. Olive-green, lilac, and golden-gray toning appears over each side, masking any minor surface marks. A great rarity. Census: 4 in 65, 2 finer (4/18).

*Ex: ANA Signature (Heritage, 4/2006), lot 373; Long Beach Signature (Heritage, 2/2007), lot 2833.*

*From The Reilly Cody Collection.* NGC ID# 235S, PCGS# 4432

**1855 Arrows Half Dime, PR65  
Rare, Lightly Toned**

**3865 1855 Arrows PR65 NGC. V-6.** The date is low and the arrows are high — characteristics of the V-6 proof dies — and all examples display a shallow void in the rock base above the left arrow, likely from excessive die polishing. Star 4 is flat, typical of all proofs seen for the issue. A number of lint marks are visible on both sides of the current coin, especially at A in HALF on the reverse and around stars 1 to 4 on the obverse. Other proofs show these as well, although some do not. Either a few proofs were struck on multiple occasions as needed, or the debris fell off the dies (or was removed) at some point during mintage.

All 1855 Arrows proofs have coarsely frosted obverse devices and mirrored fields, as if a rusted obverse die was used with the fields polished for the proof coinage. The reverse is less frosted and the elements are less rough. Both the 1854 and 1855 Arrows proofs were struck in similar numbers, but the latter issue has a slightly higher estimated survivorship of 15 to 20 coins. While the 1854 issue may be slightly scarcer, both dates are of importance to type and series collectors. The present 1855 coin is a glittering Gem with faint ivory-gold patina and highly reflective fields. Census: 5 in 65, 8 finer (including 2 in 66 Cameo) (4/18).

*Ex: Long Beach Signature (Heritage, 6/2015), lot 3846, which realized \$8,518.75.*

*From The Reilly Cody Collection.* NGC ID# 235T, PCGS# 4433

**1856 Half Dime, Toned PR65  
Scarce Pre-1858 Proof Issue**

**3866 1856 PR65 NGC.** A sharply impressed example — one of 40 to 60 half dime proofs that were struck by the Mint upon request from dealers and favored individuals. Arrows on each side of the date were removed, although the increased weight from 1853-1855 Arrows coins was maintained. As usual, the date numerals (especially 56) are weaker than the overall strike, a die characteristic seen on all 1856 proofs. This Gem example displays lively mirrors and attractive orange-gold toning with moderate contrast between the frosted devices and glassy fields. Census: 6 in 65, 5 finer; 2 in 65 Cameo, 1 finer (4/18).

*From The Reilly Cody Collection.* NGC ID# 235L, PCGS# 4434

**1858 Half Dime, PR66  
Only Two Certified Numerically Finer  
Ex: Eugene H. Gardner Collection**

**3867 1858 PR66 NGC. CAC.** Pinkish-copper and teal-tinged surfaces show generous eye appeal and a bold proof strike on this attractive Premium Gem coin, which displays careful preservation as well as a high numeric grade. The 1858 half dime represents the first year that the Mint went from striking proof delicacies for the well-connected (and well-to-do, largely) to equitably marketing proof coins to all who would pay a modest premium and postage. Of course, the striking of delicacies continued apace, and actually redoubled as a result, for decades to come. Census: 13 in 66 (1 in 66★), 2 finer; 2 in 66 Cameo, 0 finer. CAC: 5 in 66, 0 finer (4/18). *Ex: U.S. Coins and Paper Money (Stack's, 3/1998), lot 349; The Eugene H. Gardner Collection, Part I (Heritage, 6/2014), lot 30220, where it brought \$6,168.75.*

*From The Reilly Cody Collection.* NGC ID# 235N, PCGS# 4437

**1870 Half Dime, PR68 Cameo  
The Sole Finest Cameo**

**3868 1870 PR68 Cameo NGC.** The finest proof 1870 half dimes certified are at NGC, including four non-Cameo PR68 coins and this Cameo example in the same grade (3/18). The best pieces are PCGS, a pair of PR67 Cameos. Arguably, this Cameo is the single finest 1870 proof known. Sharp, frost-white devices contrast against mirrored fields, which show no mentionable toning. Even under a loupe, the preservation appears flawless.

*Ex: Dallas Signature (Heritage, 11/2005), lot 850. NGC ID# 2367, PCGS# 84453*

## EARLY DIMES

1796 JR-1 Dime, MS64 Prooflike  
Dramatic Reflectivity and Contrast  
Popular First Year of Issue

3869 1796 JR-1, R.3, MS64 Prooflike NGC. The 1796 Draped Bust, Small Eagle dime represents the first regular issue for this denomination and is highly popular as such. This die marriage, JR-1, is the most often seen 1796 variety, likely comprising about half of the known coins of this issue and making it an ideal option for date or type collectors. Diagnostic markers include part of Liberty's hair curl left of the E in LIBERTY, two leaves below the A in STATES, and the leaf tip pointing to the right side of the O in OF.

This piece is in a late die state. The obverse exhibits a crack across Liberty's shoulder to the neck, and a large cud partially covers star 1. That cud becomes more advanced in later states, eventually obscuring the entire star. The reverse shows several thin die cracks, the most prominent nearly bisecting the coin from the second E in STATES down toward the final A in AMERICA. A later die state shows further cracks.

The fields are deeply prooflike, caused by heavy die polishing imparted in an attempt to efface heavy clash marks, the remnants of which are still plainly visible on both sides. The strike is well-centered and even, with strong central definition. Extensive adjustment marks, as well as the faint remnants of mint-made roller marks not fully eradicated by the die pressure, appear throughout the obverse. An impressively well-preserved example of this popular first-year issue, displaying many interesting and diagnostic striking anomalies with which the early Mint struggled. Although high-grade example of the 1796 dime can be found, this is one of only three awarded a Prooflike designation by NGC. Others include an MS64 ★ Prooflike and an MS66 Prooflike (5/18).  
Ex: FUN Signature (Heritage, 1/2015), lot 4057. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461

1805 JR-2 Dime, MS63  
Four Berries, Heraldic Eagle Type Coin

**3870** 1805 4 Berries, JR-2, R.2, MS63 PCGS Secure. No date is better suited to represent the Heraldic Eagle type than the 1805 dime, in particular this JR-2 die marriage with four berries on the reverse branch. This is a late die state example in Select Uncirculated condition that showcases strong detail on Liberty and the eagle, and glowing luster around the motifs. Each side is brilliant, while specks of gunmetal patina appear within the star recesses. Struck from rotated dies. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

## BUST DIMES

1830 Capped Bust Dime, Sharp MS66  
JR-8, First Generation Holder

**3871** 1830 Medium 10C, JR-8, R.3, MS66 PCGS. Not enough data exists in either the PCGS population report or in our own archives to confirm that this is the finest 1830 JR-8 dime, but we believe it is at least tied for the honor. Iridescent rainbow hues yield to powder-blue and light-rose toning over lustrous silver surfaces. The coin is sharply struck throughout both sides, with full definition at the eagle's talons and only brief blending of the curls below Liberty's ear, in an area where light die rust exists.

Soft mint luster glows beneath the attractive toning, while glimpses of surface reflectivity glimmer at the borders. A thin, meandering die crack wanders from the lower edge of the cap through Liberty's curls to the edge below star 13. This example is housed in a first generation "rattler" holder, long tucked away in our consignor's collection and a new candidate for anyone forming an advanced collection of Capped Bust dimes. Population (all varieties combined): 5 in 66, 2 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 2379, PCGS# 38845 Base PCGS# 4516

**1836 JR-3 Dime, MS65**  
Beautiful Multicolor Toning

**3872 1836 JR-3, R.3, MS65 PCGS Secure.** The 1836 Capped Bust dime is rare finer than MS64 regardless of variety. This Gem JR-3 coin displays sharp stars and central devices with frosty mint luster beneath beautiful multicolor toning. No distracting abrasions are present and eye appeal is outstanding. Finer examples of this issue will be out of reach for many collectors. Population (all varieties included): 12 in 65, 6 finer (4/18). NGC ID# 237G, PCGS# 38890 Base PCGS# 4528

**1837 JR-2 Capped Bust Dime, MS66**  
Colorful Border Toning  
Among the Finest Known

**3873 1837 JR-2, R.3, MS66 NGC.** The year 1837 witnessed the replacement of John Reich's Capped Bust design with Christian Gobrecht's Seated Liberty concept on the dime. The Capped Bust dime of this date is popular as a type coin but is rarely offered in Gem or better grades. This Premium Gem JR-2 example is among the finest of any variety at NGC and PCGS. Sharp stars and devices complement unabraded satin luster, which is light golden in the centers and toned vivid aquamarine, olive, and russet around the borders. A highly appealing final-year type coin. Census (all varieties included): 8 in 66 (2 in 66 ★), 0 finer (4/18). NGC ID# AS2U, PCGS# 38892 Base PCGS# 4529

**SEATED DIMES**

**1864-S Dime, MS65**  
Pearlescent, Lustrous Surfaces

**3874 1864-S F-101, Low R.3, MS65 PCGS.** This is a mostly brilliant Gem example of the conditionally rare 1864-S, which only occasionally appears at auction in any Mint State grade, and seldom at the MS65 level or finer. Surprisingly, a single die pair accomplished the entire mintage of 230,000 pieces. Mint luster glows throughout both sides of the coin, illuminating light, bluish-gray wisps of natural patina that drift across nearly mark-free surfaces. A sharp strike accompanies slight doubling along the left-side wreath elements. Housed in a first generation PCGS holder. Population: 3 in 65, 1 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 239N, PCGS# 538203 Base PCGS# 4640

**1886-S Seated Liberty Dime, MS66**  
Low-Mintage Branch-Mint Issue

**3875 1886-S F-101, R.4, MS66 NGC.** A little more than 200,000 dimes were struck in San Francisco in 1886, making the 1886-S a slightly better date in all grades and genuinely scarce in Mint State. Premium Gems are rarely offered. This delightful coin displays vibrant mint luster under iridescent champagne-gold and varying shades of ocean-blue color. The design elements are sharp and eye appeal is excellent. Census: 7 in 66, 4 finer (4/18).

*Ex: FUN Signature (Heritage, 1/2012), lot 5502, which realized \$3,737.50.*

*From The Reilly Cody Collection.* NGC ID# 23B4, PCGS# 538720 Base PCGS# 4697

## PROOF SEATED DIMES

**1843 Seated Liberty Dime, PR64  
Scarce Early Proof Issue**

**3876** 1843 F-103, R.7, PR64 NGC. Early proof experts believe between eight to 12 proof 1843 Seated Liberty dimes survive from a small but unknown number struck. This is a Choice example with pleasing autumn-gold and charcoal-gray toning surrounded by steel-blue borders. The strike is sharp as expected, including a triangular die chip at 9 o'clock on the obverse rim that is diagnostic for the proof issue.

Reflective mirrored fields glitter beneath the rich toning. Frosted central elements share the same attractive colors, but show only minimal contrast. We have handled a small number of 1843 proofs over the years — on multiple occasions for some of the coins — but no more than four or five individual specimens, which never fail to bring strong prices. This example is a new addition to our archives. Census: 3 in 64, 5 finer (4/18).

**From The Reilly Cody Collection.** PCGS# 538984 Base PCGS# 4730

**1855 Seated Liberty Dime, PR64**

**Rare With Arrows Proof**

**3877** 1855 Arrows, F-101, R.7, PR64 PCGS. A lovely, deeply toned near-Gem proof, with mirrored, tangerine-gold margins around turquoise-blue centers. Some loss of reflectivity amid the deep toning limits the assigned grade. All 1855 Arrows dimes are rare in proof format in an absolute sense, because no more than 15 pieces are thought to exist.

The Fortin-101 variety is the proof die pair, characterized by strong hub doubling of the date, arrows, stars 11 through 13, and bold doubling of the vertical shield lines. The dies were used to produce some business strikes as well (see Fortin-101a), but no other die pairs were used for proofs. The present coin is an unmistakable proof, with wonderful flash and color when rotated in light. Many advanced collections lack the very rare proof 1855 Arrows dime. Population: 8 in 64, 2 finer (4/18).  
Ex: Long Beach Signature (Heritage, 6/2014), lot 4412, which realized \$12,337.50.

**From The Reilly Cody Collection.** PCGS# 538995 Base PCGS# 4744

**1856 Dime, PR64+ Cameo  
Notable Proof Rarity**

- 3878 1856 PR64+ Cameo NGC. CAC. F-101, High R.6.** Fortin-101 is the proof die marriage, significant not only for its rarity but for the dramatic die doubling on the lower part of Liberty's gown. The proof 1856 dime mintage is unknown, but NGC has certified 22 pieces in all grades, likely including a number of resubmissions. This issue is rare. This is a flashy and fully struck example with satiny motifs and a whisper of almond-gold toning. Cameos are in the minority of the surviving population. Census: 1 in 64 Cameo (1 in 64+), 6 finer. CAC: 1 in 64, 2 finer (4/18).  
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3206, which realized \$5,287.50.  
*From The Reilly Cody Collection.* NGC ID# 23CA, PCGS# 84745

**1857 Seated Dime, PR64 Cameo  
Few Examples Survive So Fine**

- 3879 1857 PR64 Cameo PCGS. F-101, R.6.** Only a single die marriage is known for this rare, early proof, and it is most easily identifiable by repunching on the flag of the 1 in the date. The Mint did not record the exact number of proof dimes produced in 1857, but current research suggests 45 to 60 proofs were struck. The present survivor combines a silver-gray reverse with a gold-tinged obverse. Appreciable contrast exists between the sharply defined devices and the shimmering, glassy fields. This near-Gem example is free of mentionable hairlines, with a tiny, comma-shaped strike-through (as produced) in the obverse exergue below the lower-left side of the 8 in the date. Population: 1 in 64 Cameo, 3 finer (4/18).  
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5682, which realized \$4,312.50.

*From The Reilly Cody Collection.* NGC ID# 23CB, PCGS# 84746

**1863 Dime, PR66+ Deep Cameo  
Stark White-on-Black Appearance  
A Rarity This Fine**

- 3880 1863 PR66+ Deep Cameo PCGS Secure. F-101, R.4.** Only one pair of dies was employed for dime coinage in 1863, for proofs and circulation strikes. The mintages totaled only 460 and 14,000 pieces, respectively. These low-production figures, along with the rarity of surviving high-grade circulation strikes, drives strong demand for attractive proofs. This Premium Gem Deep Cameo has just a few peers with one piece finer at PCGS (4/18). Razor-sharp definition includes Liberty's temple, which is often weak, and the stark white-on-black contrast is unhindered by toning. The depth of mirroring in the fields is outstanding, and no distracting marks are seen. An outstanding example of the date and a lovely proof type coin. Population: 3 in 66 (1 in 66+) Deep Cameo, 1 finer (4/18). NGC ID# 23BS, PCGS# 94756

**1874 Arrows Dime, PR66 Cameo  
Two-Year Type, None Finer**

**3881 1874 Arrows, F-101, PR66 Cameo PCGS Secure.** Shining silver centers contrast boldly with glassy-mirrored fields, while the margins show translucent layers of peach and orange patina. Great preservation and all-around visual appeal are the hallmarks of this popular and elusive Arrows proof dime issue. An exquisite example, suitable for the finest proof Seated dime collection. Neither PCGS nor NGC have seen one finer. Population: 2 in 66 Cameo, 0 finer (5/18). NGC ID# 23DJ, PCGS# 539481 Base PCGS# 84770

**1888 Dime, PR67 Cameo  
Among the Finest at PCGS and CAC**

**3882 1888 PR67 Cameo PCGS. CAC. F-101, R.4.** No proof 1888 Seated dimes are certified Deep or Ultra Cameo, making high-end Cameos the finest pieces available to collectors. This Superb Gem is among the highest-graded Cameos at PCGS and CAC (5/18). There is a touch of softness on Liberty's temple, but the reverse is sharp. Delicate champagne toning graces the well-contrasted surfaces, complementing nearly flawless preservation. Population: 4 in 67 (1 in 67+) Cameo, 0 finer. CAC: 6 in 67, 0 finer (4/18). NGC ID# 23DD, PCGS# 84785

## PROOF BARBER DIMES

**1892 Dime, PR67+ Cameo  
CAC-Approved, Beautiful Border Toning**

**3883 1892 PR67+ Cameo NGC. CAC.** This is the only Plus-graded Superb Gem at NGC, Cameos and non-Cameos combined, with no PR68 coins listed (4/18). The preservation is virtually flawless, and the frosty devices are starkly contrasted against deeply mirrored fields. The centers are brilliant, transitioning to vivid violet and blue border toning. The first-year proof in the Barber dime series is highly sought-after as a type coin due to its often strong quality and eye appeal, as demonstrated here. Census: 16 in 67 Cameo (1 in 67+, 1 in 67 ★), 1 in 67 Ultra Cameo finer. CAC: 10 in 67, 1 finer (4/18). NGC ID# 23G2, PCGS# 84875

**1893 Dime, Colorful PR67+  
Unquestionably High-End and Original**

**3884 1893 PR67+ PCGS. CAC.** Proof production fell drastically from the first year of issue to the second, when 745 Barber dime proofs were struck in 1893. Superb Gem examples are scarce, especially when found as nice as the present piece. Each side offers unquestionably original deep violet, rose, and cobalt-blue patina with gold and mint-green accents. The underlying fields are flashy and nearly devoid of contact. NGC ID# 23G4, PCGS# 4877

**1895 Barber Dime, PR68  
Ex: Childs / Hugon  
Superlative Obverse Toning**

**3885 1895 PR68 NGC. Ex: Childs/Hugon.** Only 880 proofs were struck of the 1895 dime. This, coupled with the low business strike output of only 690,000 pieces, makes the 1895 dime a valued coin in both proof and business-strike format. This is an exceptionally attractive and vibrant example that would be almost impossible to equal in eye appeal. The obverse displays a breathtaking array of electric-blue and crimson toning in a rather mottled fashion, and the reverse is essentially untoned with only a slightly milky hue as the coin is turned under a light. As expected of the PR68 grade, there are no visible marks or other detractions. A truly outstanding, high-grade 1895 superb proof dime. Census: 10 in 68 (2 in 68+, 1 in 68★), 0 finer (4/18).

*Ex: Believed to have been purchased from the Mint by Walter H. Childs; Childs Collection (Bowers and Merena, 8/99), lot 214; Charles Hugon; Hugon Collection (Heritage, 1/2005), lot 4079; ANA Signature (Heritage, 8/2017), lot 3518. NGC ID# 23G8, PCGS# 4879*

**MERCURY DIMES**

**1916-D Mercury Dime, AU Details  
Remarkably Sharp**

- 3886** 1916-D — Surfaces Smoothed — PCGS Secure Genuine. AU Details. This AU-level key-date coin is remarkably sharp from the rims to the central fasces bands and portrait. Trivial high-point friction appears to come solely from the surface alteration that PCGS designates as “smoothing.” Under a loupe, the coin appears cleaned with a microgranular texture. Light golden toning appears on each side, mainly near the borders.

**1916-D Mercury Dime, AU Details  
Unrivaled Key to the Series**

- 3887** 1916-D — Cleaned — PCGS Secure Genuine. AU Details. The Denver Mint was famously preoccupied with quarter dollar production in late 1916, resulting in a tiny mintage of only 264,000 Mercury dimes. That is by far the lowest total in the series, making the 1916-D the unchallenged key date. This is a bright and minimally circulated representative, although it shows signs of having been cleaned at some point. The surfaces are slightly muted and small ticks are scattered over the obverse.

*From The Bob Williams Collection.*

**1919-S Dime, MS65 Full Bands  
Exceptionally Clean and Sharp**

- 3888** 1919-S MS65 Full Bands NGC. The 1919-S Mercury dime is a strike and condition rarity in the series despite a mintage in excess of 8.8 million coins. Examples in MS65 condition with the Full Bands designation are seldom seen, and finer coins are largely unobtainable.

This impressive Gem example offers unusually sharp design details with Full Bands definition on the fasces, and well-preserved, lustrous surfaces that showcase a few hints of green and amber toning mainly within the confines of the design recesses. An important offering for those building high-end Registry Sets. Census: 7 in 65 Full Bands, 3 finer (5/18). NGC ID# 5LLN, PCGS# 4927

**1920-D Dime, MS66 Full Bands  
Delicately Toned**

**1927-S Dime, MS66 Full Bands  
A Sharp Strike with Frosty Luster**

- 3889 1920-D MS66 Full Bands PCGS Secure.** The availability of this Denver issue with Full Bands declines in MS65 and drops off sharply in higher grades. This Premium Gem displays vibrant, frosty mint luster and a sharp strike that stretches from rim to rim. Delicate lavender and rose-gold toning blankets each side but does not impede enjoyment of the remarkably well-preserved surfaces. Population: 26 in 66 (1 in 66+) Full Bands, 7 finer (4/18). NGC ID# 23HC, PCGS# 4931

**1921-D Mercury Dime, MS65 Full Bands  
Vibrant Mint Luster**

- 3890 1921-D MS65 Full Bands PCGS Secure.** The 1921-D is a low-mintage issue (just over 1 million pieces struck) and a key to the Mercury dime series. This delightful Gem exhibits sharply detailed design elements, with Full Bands definition on the fasces, and well-preserved creamy surfaces that radiate vibrant mint luster on both sides. Population: 67 in 65 (2 in 65+) Full Bands, 28 finer (4/18). NGC ID# 23HF, PCGS# 4937

**1927-S Dime, MS65 Full Bands  
Elusive This Well-Struck**

- 3891 1927-S MS65 Full Bands PCGS Secure.** The central devices are sharp on this Gem example, and the borders show nearly full definition. The untoned surfaces exhibit satiny luster and no major abrasions. Crisscrossing die polish lines are visible in the fields under a loupe. The 1927-S dime is a better date with Full Bands, and examples are rarely found finer than the present. Population: 35 in 65 Full Bands, 21 finer (5/18).

*From The Bob Williams Collection.* NGC ID# 23HW, PCGS# 4965

- 3892 1927-S MS66 Full Bands NGC.** This exquisite Premium Gem features a bold strike with fully split bands and sharp details throughout. Wispy champagne and pale blue toning appear on the frosty surfaces of this lovely dime. Overshadowed by the key-date 1926-S, this 1927-S dime is an important condition and strike rarity with an impressively low population in MS66. Finer pieces virtually impossible to locate. NGC and PCGS have combined to grade just 23 in MS66 (four are MS66+), and only two finer examples. Census: 3 in 66 Full Bands, 1 finer (5/18). NGC ID# 23HW, PCGS# 4965

**1930 Dime, MS67 Full Bands  
Among the Finest Certified**

- 3893 1930 MS67 Full Bands PCGS Secure.** A plentiful date in most grades, the 1930 Mercury dime is conditionally rare in MS67 Full Bands and unknown finer (4/18). This champagne-tinted piece displays some bluish toning in the centers and has vibrant, glistening mint luster. The strike is sharp throughout, adding to the appeal and technical excellence of this Registry-grade 1930 dime. Population: 24 in 67 (2 in 67+) Full Bands, 0 finer (4/18). NGC ID# 23J5, PCGS# 4979

1930-S Dime, MS67+ Full Bands  
Tied for Finest Certified, CAC Endorsed

**3894** 1930-S MS67+ Full Bands PCGS Secure. CAC. More than 1.8 million dimes were struck in San Francisco in 1930, but this issue circulated extensively. High-grade survivors are scarce, particularly with Full Bands definition. This Plus-graded Superb Gem is among the finest Full Bands coins at either grading service and CAC. Soft, luminous mint luster appears virtually flawless on each side. The interiors have a delicate champagne hue, surrounded by lovely rainbow border toning. Registry Set collectors especially will appreciate the rarity and quality of this top-grade 1930-S Mercury dime. Population: 23 in 67 (6 in 67+) Full Bands, 0 finer. CAC: 8 in 67, 0 finer (4/18). NGC ID# 84NT, PCGS# 4981

1942/1-D Dime, MS63 Full Bands  
Popular Guide Book Variety

**3895** 1942/1-D FS-101 MS63 Full Bands PCGS. Interestingly, most Mint State examples of this variety are in the Full Bands category, and the 1942-D dime in general is well-represented with a sharp central strike. This piece is bold and satiny, showing tinges of deep olive toning near the borders and silvery brilliance in the centers. Light handling marks determine the grade but are not distracting. NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

1942/1-D Dime, MS64 Full Bands  
Popular Guide Book Overdate

**3896** 1942/1-D FS-101 MS64 Full Bands PCGS Secure. CAC. On the obverse, a thin vertical die crack begins at the rim just left of the E in LIBERTY and nearly bisects the die, disappearing on Liberty's neck. On the reverse, a small die chip is visible on the upper diagonal band of the fasces. This sharp near-Gem is untoned and satiny, showing no major abrasions. The overdate feature is plain. Population: 42 in 64 (1 in 64+) Full Bands, 34 finer. CAC: 10 in 64, 20 finer (4/18). NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

**1942/1-D Mercury Dime, MS65 Full Bands  
Bold Frost-White Example**

**3897 1942/1-D FS-101 MS65 Full Bands PCGS Secure.** This overdate was created when a die was fitted to two different hubs bearing different dates. Whether this was done intentionally to an existing 1941-dated die or by accident during the die-making process is unknown. But the variety is highly popular among series collectors, and examples are seldom offered in Gem condition. This frosty MS65 coin is fully struck, brilliant, and vibrantly lustrous. A loupe reveals only a few trivial grazes, none out of line for the grade. Suitable for Registry Sets due to its quality and uncompromising eye appeal. Population: 19 in 65 (1 in 65+) Full Bands, 15 finer (5/18). **From The Bob Williams Collection.** NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

**TWENTY CENT PIECES**

**1875-CC Twenty Cent, MS65  
Fully Struck, Exemplary Quality**

**3898 1875-CC MS65 PCGS Secure. CAC. BF-2, R.1.** The 7 is aligned with a dentil, and the mintmark is high with the first C nearly touching the fletching. According to the Brunner and Frost reference on twenty cent pieces, this is the most plentiful die marriage for the 1875-CC, representing 70% to 75% of known examples. The vast majority of surviving coins are well-circulated with an average awarded grade of VF35, but there are enough pieces to satisfy collector demand through the MS64 level. Gems are conditionally rare, especially with the endorsement of CAC.

This MS65 twenty cent piece is characteristically frosted for a Carson City product, and each side remains almost entirely brilliant with faint golden overtones. The motifs are fully struck, and we count only a handful of noticeable blemishes in the fields. Population: 32 in 65 (1 in 65+), 10 finer. CAC: 13 in 65, 5 finer (5/18).

**From The Bob Williams Collection.** NGC ID# 23R6, PCGS# 5297

1875-S Twenty Cent Piece, Frosted MS66  
Few Pieces Known Finer, Ideal for Type

- 3899** 1875-S MS66 PCGS. BF-14, R.1. A highly lustrous and frosted example, nearly brilliant save for faint glints of peach-gold in the centers and translucent ice-blue shades around the margins. This is an ideal “double dime” for type purposes — suitable for a fine collection — with vibrant surfaces and spectacular eye appeal. Minor die clashing accompanies a variable strike where several of the upper stars lack central definition, as does Liberty’s hair and the eagle’s talons. A misplaced 1 appears as a thin line in the dentils below 8 in the date. Housed in an old rattle holder. Just a handful of coins are any finer at PCGS. Population: 76 in 66 (8 in 66+), 5 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 23R7, PCGS# 5298

1875-S Twenty Cent, Frosty MS66  
Few Pieces Known Finer

- 3900** 1875-S MS66 PCGS. CAC. BF-12, R.2. FS-301. A misplaced 8 shows in the denticles below the date and the mintmark is partially filled, identifying the FS-301, BF-12 variety. This remarkable Premium Gem offers well-detailed design elements that show a touch of softness on the upper stars and Liberty’s head. The impeccably preserved, brilliant surfaces radiate vibrant mint luster, with outstanding eye appeal. Population: 77 in 66 (9 in 66+), 5 finer. CAC: 19 in 66, 0 finer (5/18).

*From An Important New York Collection.* NGC ID# 23R7, PCGS# 5298

1876 Twenty Cent, MS66+  
Incredibly Preserved, Few Known Finer

- 3901** 1876 MS66+ PCGS Secure. CAC. BF-2, R.2. This is the usually seen die marriage for the 1876 twenty cent piece, with an upward-sloping die line in the drapery above 76, slight die doubling on STATES, and a crack that joins the S in CENTS to the tip of the wing. Among the four regular issues in the short-lived twenty cent series, only the uncollectible 1876-CC claims a lower mintage than the 1876 (14,750 pieces). Survivors can be found through near-Gem and even MS65 condition with little trouble. However, Premium Gems are conditionally rare, with no more than a couple of dozen examples at that level, and only a handful of coins known finer.

This incredible MS66+ twenty cent piece with CAC approval nearly joins the finest coins at PCGS. Mottled multicolor patina across the obverse includes shades of green, blue, orange, rose, and violet, while the reverse is more of dusky lavender-gold. Each side is fully struck and lustrous with tremendous aesthetic quality to match the lack of surface abrasions. Population: 16 in 66 (3 in 66+), 3 finer. CAC: 7 in 66, 4 finer (5/18). NGC ID# 23R8, PCGS# 5299

## PROOF TWENTY CENT PIECES

1877 Twenty Cent, PR61  
Green Label Holder

- 3902** 1877 PR61 PCGS. BF-1, R.3. An appealing example for the grade, this proof 1877 twenty cent piece displays sharp stars and almost fully defined central devices. The obverse has a hint of light golden toning, contrasting with a brilliant reverse. Light hairlines in the reflective fields limit the grade but are not bothersome to the unaided eye. Only 510 proofs were struck in 1877, the first of two proof-only dates for this short-lived denomination. Housed in a green label holder. NGC ID# 27H4, PCGS# 5305

1877 Twenty Cent, PR63  
Only 510 Proofs Coined

- 3903** 1877 PR63 PCGS Secure. BF-1, R.3. Following two years of circulation strikes, the twenty cent piece was coined only in proof format in 1877 and 1878. Despite slight design differences and a plain edge, the public complained that this coin was too similar to a quarter dollar. As a result, the denomination failed. This Select proof has mirrored, deep gray fields with satiny devices. Faint hairlines are evident on each side. NGC ID# 27H4, PCGS# 5305

1878 Twenty Cent, PR65+  
Sharp and Lightly Toned

- 3904** 1878 PR65+ PCGS Secure. BF-1, R.3. Liquidlike field reflectivity and a razor-sharp strike establish the quality of this high-end Gem proof. The eagle and seated Liberty are satiny and sharp, although cameo contrast melts away in favor of rose-gold and aquamarine toning that blankets each side. Under a loupe, no mentionable surface flaws are seen. The 1878 is the final proof issue in the twenty cent series. Only 600 pieces were struck. NGC ID# 27H5, PCGS# 5306

1878 Twenty Cent, PR64 Cameo  
Sharp and Contrasted

- 3905** 1878 PR64 Cameo PCGS. BF-1, R.3. The 1878 twenty cent piece was only coined in proof format, to the tune of 600 pieces. Although examples of this issue are available in the absolute sense, Cameo coins are scarce. This near-Gem displays appreciable contrast and sharp design elements. Light golden toning on each side adds to the appeal. Population: 36 in 64 Cameo, 12 finer, 2 in 64 Deep Cameo, 2 finer (4/18). NGC ID# 27H5, PCGS# 85306

## EARLY QUARTERS

1804 Quarter Dollar, B-1, VG8  
Attractive Color and Surfaces

- 3906** 1804 B-1, R.3, VG8 PCGS. Tompkins Die State 1/1, with no visible clashing on either side. This attractive circulation cameo displays deep smoke-gray fields and lighter tan-gray relief elements. Liberty's eye remains visible, and on the reverse RIBUS UNUM is visible on the ribbon. The obverse rim is sharp, but the reverse is slightly incomplete from 2 to 7 o'clock. No bothersome abrasions are seen. The 1804 is a key date in the Draped Bust type. This was the first quarter dollar struck since 1796, and only 6,738 pieces were produced. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

**1804 B-1 Quarter, Fine Details  
Key Draped Bust Issue**

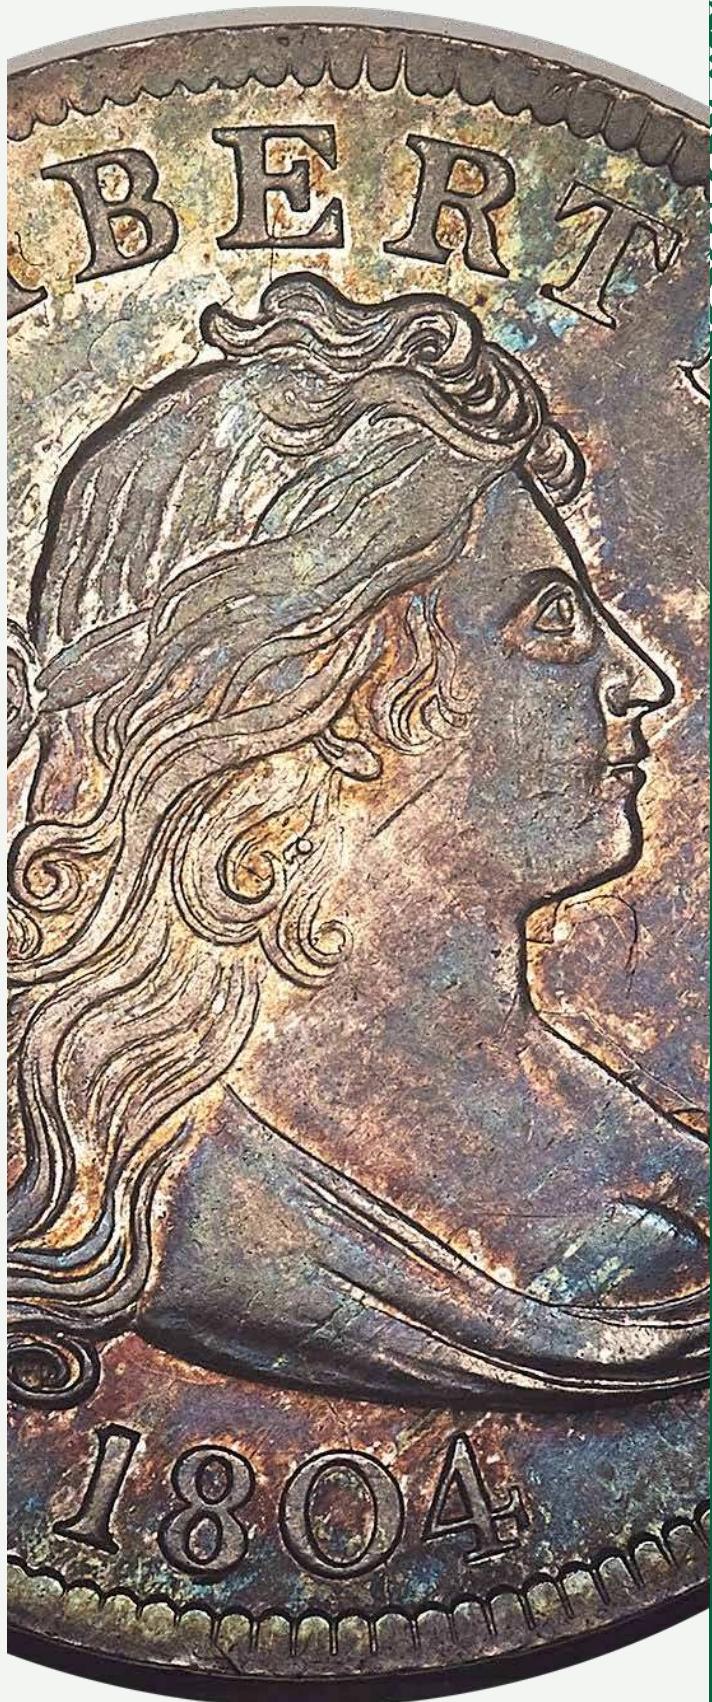

- 3907 1804 B-1, R.3 — Surfaces Smoothed — PCGS Genuine. Fine Details.** Tompkins Die State 2/2, both dies clashed. This key-date Draped Bust quarter is well-detailed with complete border dentils on the obverse and nearly complete dentils on the reverse. To the unaided eye, this lavender-gray B-1 coin appears smooth and problem-free, but a loupe reveals faint granularity over each side from an apparent attempt to smooth out abrasions.

**1804 B-1 Quarter Dollar, VF Details  
Excellent Color and Central Definition**

- 3908 1804 B-1, R.3 — Rim Filing — NGC Details. VF.** Tompkins Die State 2/2, clashed on both sides. Under a loupe, some minor rim filing is visible on this midgrade circulated 1804 quarter dollar, although no other problems are apparent. Both sides are smooth with original lavender-gray and olive patina. Complete border dentils complement well-defined central devices, producing excellent eye appeal for the grade. The 1804 is a key date in the Draped Bust quarter series. The B-1 variety is distinctive for the presence of a die gouge between stars 8 and 9.

1804 B-1 Bust Quarter, MS65  
The Finest Certified  
Ex: Colonel Green, Jerome Kern

**3909 1804 B-1, R.3, MS65 NGC.** Ex: Colonel Green. Colonel Edward Howland Robinson Green (better known as Col. E.H.R. Green or, more simply, Col. Green), was the son of Henrietta Howland Robinson Green, *née* Henrietta Howland Robinson (1834-1916). She, too, is known more simply as Hetty Green, and even more familiarly as the “Witch of Wall Street.” Hetty Green was connected on the Howland side of her family to one of the great merchant families of New England. She grew up in a Quaker household, noted for its austerity.

Upon their deaths in 1865, her father and maternal aunt willed to her a total of about \$10 million. Even after her 1867 marriage to Edward H. Green, she kept her finances separate, managing them herself with single-minded monomania. Her father and grandfather had educated her in finance from early childhood, and she dedicated herself to expanding that fortune. As her wealth increased, she continued to live with her son and daughter in modest surroundings, avoiding all social contacts or displays of wealth. In time she became a major force on Wall Street, despite which she often appeared in public in shabby garb and sought medical treatment for herself at charity clinics. She left an estate valued at more than \$100 million when she died in 1916, reputedly the world’s richest woman.

The most often-repeated story concerning her penury is that concerning her son Edward, whom she refused to take for medical treatment, resulting in the need for his leg to be amputated. Col. Green was born the year following Hetty’s marriage to Edward Green, during his parents’ tour of Europe.

By age 25, Col. Green had been admitted to the bar and become president of the Texas Midland Railroad (his mother Hetty had owned many railroad stocks during her lifetime). He was active in Texas Republican politics, served as chairman of the Texas Republican State Committee, and was a director of the St. Louis Exposition of 1904. In order to maintain a Texas residence, he kept a suit of clothes and one of his wooden legs in a “fine residence” in Terrell, Texas. He died at age 68 in Lake Placid, New York. At the time of his death—with a total estate valued at more than \$40 million—his coin collection was valued at an estimated \$5 million, along with a stamp collection worth \$3.5 million. Green’s numismatic holdings included at least seven different 1838-O half dollars, a Brasher doubloon, all five of the 1913 Liberty nickels, and a staggering hoard of 1796 quarters, said to number more than 200 pieces.

This wonderful coin, also pedigreed to the Col. Green collection of early quarters, is the Browning-1 variety, with the 4 in the date low and a die cut between stars 8 and 9, as seen on all examples. Although not as famous (because neither a single-year type nor a first year of issue) as the 1796 quarters, the 1804 quarters are many times rarer in Mint State than the 1796 pieces.

In the 1975 ANA sale, the cataloger wrote in part of this coin:

“Extremely rare grade and one of two finest known of just three, possibly four known in full Mint State. Certainly the most famous specimen and long thought to be clearly the finest.”

This coin is sharply struck, save for at some of the denticles, as usually seen, and wonderful steel-blue and pinkish-purple iridescent patina covers both sides. Bold die clashing is visible along the upper bustline, creating a “collar” effect on Liberty similar to the 1800 BB-196 Bust dollar variety. Lesser (but still dramatic) clashing is visible on the reverse as well.

As of (5/18) NGC has certified 38 Mint State 1796 quarters, compared with only five Mint State 1804s, of which this stands alone as the finest by two grade points. At PCGS, there are 37 Mint State 1796 quarters, compared with only eight Mint State 1804s. **This is the single finest 1804 quarter certified at either NGC or PCGS.** This is a monumental early Bust quarter, a coin whose rarity, historicity, and numismatic importance simply cannot be overstated.

Ex: Col. E.H.R. Green; Stack’s (1945); Jerome Kern Collection (B. Max Mehl, 1950), lot 1385; Eugene Gardner Collection (Stack’s, 2/1965), lot 1620; H. Philip Speir estate (Stack’s, 3/1974), lot 2, which brought \$16,500; ANA Sale (Superior, 8/1975), lot 352; Central States Signature (Heritage, 4/2008), lot 2274; Joseph C. Thomas Collection, Part Two / FUN Signature (Heritage, 1/2011), lot 5507.

**From An Important New York Collection.** NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

1805 B-3 Quarter, AU58+  
Antique Patina

1807 B-1 Quarter Dollar, MS64+  
Light Silver-Gray Toning, Frosted Luster

- 3910 1805 B-3, R.1, AU58+ NGC.** Tompkins Die State 5/3. Bold clash marks and die cracks are present throughout this borderline-Uncirculated Draped Bust quarter. Browning-3 is the most collectible variety for the year, identified by a separation, however slight, between the 5 and the drapery, and star 13 is away from the bust. Strike softness is another trait often found on B-3 quarters and it is seen here in the centers of each side. Antique patina adorns marvelously preserved surfaces. Shades include golden-gray and tan hues. NGC ID# 23RC, PCGS# 38925 Base PCGS# 5313

1806 B-3 Quarter, AU58  
Terminal Die State

- 3911 1806 B-3, R.1, AU58 PCGS Secure.** Tompkins Die State 4/5. A terminal die state example of the collectible B-3 die marriage. Rim cuds, clashing, die cracks, and mint-made damage to the reverse shield are diagnostic. Both dies were retired at the same time. Examples are always softly impressed over the centers (especially the reverse), as here. Luster remains within the legends, and colorful shades of blue, violet, and gold adorn the margins. NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

- 3912 1807 B-1, R.2, MS64+ NGC.** Tompkins Die State 4/2. Nearly all B-1 quarters were struck with a worn collar die, and lack reeding on at least part of the edge. This example shows faint reeding on about half of the circumference. Likewise, the dentils are missing or weakly struck throughout both sides. Die clashing on the obverse shows signs of lapping, but Liberty's curls are complete and the stars retain their size.

Frosted silver-gray surfaces are essentially unmarked with full luster glowing from high-end, Choice Uncirculated surfaces. The eagle's feathering is sharp above the shield and on both wings. Two or three field stars show minor weakness, and the hair strands above Liberty's temple blend slightly, yet this is a splendid near-Gem example of the variety that is seldom available any finer. Census: 14 in 64 (3 in 64+, 2 in 64★), 5 finer (5/18). NGC ID# 23RF, PCGS# 38939 Base PCGS# 5316

**BUST QUARTER**

**1838 Capped Bust Quarter, B-1, MS64**  
Lustrous and Attractive Final-Year Type Coin

**3913 1838 B-1, R.1, MS64 NGC.** Despite a reported mintage of 366,000 pieces, just one die marriage is known for 1838 quarters. This is a Choice Uncirculated example, with golden-tan toning and traces of blue at the margins. A glass reveals a number of faint, hair-thin abrasions in the left obverse field beneath the attractive patina, as well as a small pin scratch beneath the left (facing) wing. The strike and eye appeal are strong throughout both sides. Census: 19 in 64 (1 in 64+), 5 finer (4/18). NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

**SEATED QUARTERS**

**1855 Seated Quarter, MS65**  
Short-Lived Arrows Design

**3914 1855 Arrows MS65 NGC.** Medium blue rims on the obverse frame a golden center, while the reverse is scarcely toned silver-gold. A few scattered marks appear under a loupe, mostly confined to the obverse. This piece is sharply struck and lustrous, an attractive representative of the second-year Arrows, No Rays issue. Census: 8 in 65 (1 in 65+), 5 finer (4/18). NGC ID# 23U8, PCGS# 5435

**1860-S Quarter, AU55**  
Elusive San Francisco Issue  
Among the Finest Survivors

**3915 1860-S AU55 NGC. Briggs 1-A.** This Choice AU NGC-graded piece is far finer than most survivors of this elusive issue. A total of 56,000 coins were struck of the 1860-S quarter but most circulated, and many survivors are problem coins or in extremely low grades. Even the certified examples at NGC and PCGS only average VF20.

This coin is sharply struck and free of major distractions with lovely rose-gray, violet, and blue patina with considerable luster remaining. A few scattered light marks appear on the obverse. Census: 1 in 55, 1 finer (4/18). NGC ID# 442R, PCGS# 5453

## PROOF SEATED QUARTERS

**1865 Quarter, PR67 Cameo  
Brilliant and Contrasted  
Only One Coin Graded Finer at PCGS**

**3916 1865 PR67 Cameo PCGS.** Briggs 3-B. Only 500 proof Seated Liberty quarters were struck at the Philadelphia Mint in 1865, the final year of the No Motto design. The proof die is recognized by minor evidence of die rust on the obverse and the recut letters in QUAR. DOL. on the reverse. This issue is seldom seen with cameo contrast.

The present coin is a magnificent Superb Gem with razor-sharp definition on all the design elements, including the star centers and eagle's claws. The devices display a rich coat of mint frost that creates an intense cameo effect with the deeply mirrored fields. The brilliant surfaces are impeccably preserved, and the eye appeal is terrific. Population: 1 in 67 Cameo, 1 finer (5/18). NGC ID# 23WT, PCGS# 85561

**1882 Quarter, PR67+ ★  
Outstanding Visual Appeal**

**3917 1882 PR67+ ★ NGC. Briggs 2-B.** Beautifully preserved, this high-end Superb Gem proof exhibits vivid toning on the obverse in shades of golden-orange, teal, plum, pale yellow, and violet, with a commanding mirrored presence not often seen except on the finest proof coins. The reverse is more subtly toned but equally appealing in largely champagne-gold hues, with a thin crescent of rainbow color along the left border. The coin displays a sharp strike and exceptional eye appeal. Census: 16 in 67 (1 in 67 ★, 2 in 67+★), 0 finer; 9 in 67 (1 in 67 ★) Cameo, 3 finer; 2 in 67 (1 in 67 ★) Ultra Cameo, 0 finer (4/18).

Ex: Central States Signature (Heritage, 4/2014), lot 4267, which realized \$4,406.25; Houston Signature (Heritage, 12/2014), lot 3558, which realized \$4,846.88.

*From The Reilly Cody Collection.* NGC ID# 23XE, PCGS# 5583

## BARBER QUARTER

**1895 Barber Quarter, MS67  
Registry Grade Example**

**3918 1895 MS67 PCGS Secure.** Vivid shades of golden-brown and magenta toning blanket the impeccably preserved obverse of this spectacular Superb Gem, while the reverse remains mostly brilliant. The design elements are sharply detailed and both sides radiate vibrant mint luster. Eye appeal is terrific. Population: 4 in 67 (2 in 67+), 0 finer (4/18). NGC ID# 23Y4, PCGS# 5610

## PROOF BARBER QUARTERS

1900 Quarter, PR65 Ultra Cameo  
The Only Ultra Cameo

**3919** 1900 PR65 Ultra Cameo NGC. NGC has certified 270 proof 1900 Barber quarters, but just one of those, the present coin, has earned the coveted Ultra Cameo designation (5/18). This sensational Gem Ultra Cameo proof is fully brilliant with no evidence of toning on either side. The fields are fully and deeply mirrored, and the sharply defined devices are bright and highly lustrous. NGC ID# 242F, PCGS# 95686

1903 Quarter, PR67 Ultra Cameo  
A Major Condition Rarity

**3920** 1903 PR67 Ultra Cameo NGC. NGC and PCGS combined have seen only six Ultra or Deep Cameo proof 1903 quarter dollars in all grades. This brilliant Superb Gem is starkly contrasted despite excessive die polishing on the obverse that leaves a swath of mirrored surface immediately below Liberty's jaw line. The strike is full and the preservation almost flawless. Census: 2 in 67 Ultra Cameo, 2 finer (4/18). NGC ID# 36K4, PCGS# 95689

1910 Barber Quarter, PR69 Cameo  
Registry Grade Specimen

**3921** 1910 PR69 Cameo NGC. Ex: Simpson. A coin that is difficult to believe still exists today in such a miraculous state of preservation. The proof mintage of the 1910 Barber quarter was a nominal amount for late in the series, at only 551 pieces. The Charles Barber design was an anachronism for the new century, a design that looked backward rather than forward even when it was introduced in 1892. At that time, the proof mintage was 1,245 pieces, but collector interest soon dwindled as the novelty of the design wore off.

The proof production in 1893 dropped by nearly 500 pieces, to 792 coins, then rebounded the following year a bit, to 972 examples. After that, the yearly mintage for the proof minor silver sets, including the Barber dime, quarter, and half, began a slow, inexorable decline. By the time the 1910 Barber proofs were made, only 551 examples of each denomination fell from the dies.

This magnificent specimen displays a bold strike, with brilliant silver-white surfaces complementing a trace of peripheral iridescence along the lower reverse border. As demanded of the grade, there are no visible defects of any type on either side. Census: 1 in PR69 Cameo, 1 in PR69 ★ Cameo, 1 in PR69 Ultra Cameo, none finer (5/18).

Ex: ANA Signature (Heritage, 8/2010), lot 3121, realized \$32,300.  
**From An Important New York Collection.** NGC ID# 254Y, PCGS# 85696

## STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, AU Details  
Well-Detailed Example

- 3922 1916 — Polished — PCGS Secure Genuine. AU Details.** When grading 1916 Standing Liberty quarters, it is important to take into account the general softness of the strike that is a famous characteristic of this issue. Just a brush of wear can give the appearance of significantly more circulation than the coin actually endured. This piece is genuinely an AU-level coin, kept from a numeric grade only by surface polishing, which leaves each side bright and brilliant. Detail is sharp for the issue, particularly on Liberty's head.

1916 Standing Liberty Quarter  
Toned, Uncirculated Details

- 3923 1916 — Cleaned — NGC Details. Unc.** This lustrous and moderately well-struck 1916 Standing Liberty quarter would fit in well with a collection of otherwise problem-free Uncirculated coins. NGC notes cleaning, but deep gold and russet toning on each side masks virtually all evidence of such, and the obverse in particular remains somewhat lustrous. No distracting abrasions are visible. NGC ID# 43XR, PCGS# 5704

1917-S Type One Quarter, MS67 Full Head  
Beautiful Luster and Toning

- 3924 1917-S Type One MS67 Full Head PCGS Secure.** Softly frosted luster on each side of this Superb Gem Full Head coin is toned in olive-green, gold, and coppery-orange hues, with the deepest colors confined to the borders. A loupe fails to reveal bothersome abrasions. The 1917-S is the scarcest Type One issue of this date in high grade. The present coin is conditionally rare, and no Full Head examples are known numerically finer. Population: 19 in 67 (2 in 67+) Full Head, 0 finer (4/18). NGC ID# 2433, PCGS# 5711

1918-D Quarter Dollar, MS67  
Top-Grade Registry Set Rarity

- 3925 1918-D MS67 PCGS. CAC.** Although budget-conscious collectors will be able to acquire this issue in low grades with regularity, the 1918-D Standing Liberty quarter is conditionally rare in Premium Gem condition and a major rarity in MS67. There are only six Superb Gems certified, all at PCGS, including four non-Full Head MS67s and two MS67 Full Head pieces (5/18). Only two of the non-Full Head coins are CAC approved, one being offered here. This magnificent coin yields vibrant, glistening mint luster that is untoned across the interiors. Tinges of russet color appear around the borders. Liberty's temple and the shield rivets are a trifle soft, but no other imperfections are mentionable. NGC ID# 2438, PCGS# 5722

1918/7-S Quarter, Unc Details  
Above-Average Head Sharpness

- 3926 1918/7-S FS-101 — Cleaned — NGC Details. Unc.** Clashed and lapped, as usual for the overdate, this unworn but lightly cleaned example displays a clear 8/7 feature and has above-average head detail — only the hairline is incomplete. The shield rivets and the leading edge of the eagle's left (facing) wing are weak, characteristic of the variety. The obverse has deep, mottled amber-gold and autumn-brown toning, while the reverse displays a hint of light champagne color. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

**1924-S Quarter, MS66 Full Head**

Exceptionally Strong Strike  
One Coin Finer at PCGS

**3927 1924-S MS66 Full Head PCGS Secure.** Strike definition posed a serious problem for San Francisco Mint officials responsible for the production of these Standing Liberty quarters, as it did for all issues between 1923 and 1930. The 1924-S is actually the softest among those strike rarities. J.H. Cline estimated that 75 to 80 Gems survive with Full Head definition. In MS66 Full Head, PCGS has seen 12 submissions and a single example is known finer (5/18).

Mottled multicolor toning appears at the upper-obverse and lower-reverse borders, while the remaining areas are frosty and brilliant. Detail on the head, shield, chain mail, upper date digits, and the eagle's breast feathers are exceptionally bold. This is a prize for the specialist in this series. NGC ID# 243N, PCGS# 5751

**WASHINGTON QUARTERS****1932 Quarter, Top-Grade MS67**

A Registry Set Essential  
Few Pieces Known So Fine

**3928 1932 MS67 PCGS.** The rarity of the 1932 branch mint issues in high grade is well-known, and we occasionally see such coins in our Premier Signature sessions. But the Philadelphia issue is often overlooked as a common date, unrecognized for its conditional challenge at the Superb Gem level. PCGS and NGC combined list fewer than a dozen 1932 Washington quarters in MS67, and none are finer. The price record for this issue is currently held by an MS67 PCGS coin in lot 5104 of our April 2012 Central States Signature, which realized \$40,250.

This piece is the first top-grade coin to appear in our auctions in more than two years. Plated on CoinFacts.com, it shows frosty, vibrant luster and sharp design elements with delicate champagne toning. A loupe reveals tiny russet accents near the obverse borders, and eye appeal is simply outstanding. An exceptional Registry coin. Population: 7 in 67, 0 finer (5/18). NGC ID# 2447, PCGS# 5790

**1942-D Washington Quarter, Toned MS68**  
**Tied for the Finest Certified**  
**A Remarkable Registry Coin**

**3929 1942-D MS68 PCGS Secure.** The finest 1942-D quarter dollars certified include three MS68s at PCGS and two at NGC (one of which is Star-designated) (4/18). The NGC coins account for nearly all of the auction appearances of a 1942-D in this grade. This is the first PCGS-graded example that we have handled. The obverse has distinctive gold, violet, and russet toning on the right side and is brilliant on the left. The reverse shows similar color around the border, with a champagne-tinted interior. This sharp, satiny coin shows no bothersome abrasions. PCGS Registry Set collectors should closely consider this coin, as it is finer than the piece in the current highest-rated Registry Set (4/18). NGC ID# 2453, PCGS# 5818

**1963 Quarter Dollar, MS67+**  
**Beautiful Toning**  
**A Top-Grade Registry Coin**

**3930 1963 MS67+ PCGS.** The 1963 Washington quarter is scarce in Superb Gem condition, and this Plus-graded coin is tied for the finest certified. The surfaces are virtually flawless and exhibit vivid multicolor toning around the margins, characteristic of several other Superb Gems that we have seen. Interior hues of champagne and powder-blue allow full enjoyment of the sharp strike. A Registry-grade coin that is virtually impossible to surpass in quality. Population: 22 in 67 (2 in 67+), 0 finer (4/18). NGC ID# 246S, PCGS# 5874

## PROOF WASHINGTON QUARTER

**1936 Quarter, Brilliant PR67**  
**Among the Finest at PCGS**

**3931 1936 PR67 PCGS Secure.** No Cameo proof 1936 quarters are certified at PCGS, and Superb Gems are rare; none are finer than the present example. This brilliant Registry coin displays a full strike and glimmering fields with virtually flawless preservation. Although the Washington quarter was first introduced in 1932, proofs were not coined until 1936. Just 3,837 pieces were struck. Population: 17 in 67, 0 finer (4/18). NGC ID# 27HN, PCGS# 5975

## EARLY HALF DOLLARS

### 1794 Flowing Hair Half, Good 6 O-101, Problem-Free Wear

**3932** 1794 O-101, T-7, High R.3, Good 6 PCGS. Tompkins Die State 1/3. A smoothly worn, silver-gray example, with microscopic marks and faint lines, but there are no serious problems to mention. A pair of blurry die cracks suggest the middle die state for this pleasing, well-circulated coin. As always, wear appears heavier at the lower-right obverse and below the portrait, where the date is worn but fully readable. Housed in a previous generation green label holder.  
*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

### 1794 Half Dollar, O-101, Fine 12 First Year of the Denomination

**3933** 1794 O-101, T-7, High R.3, Fine 12 NGC. Tompkins Die State 1/2. An early die state, where a light crack near the first S in STATES has formed and extends to the nearby leaves. An earlier crack at the F in OF does not extend beyond mid-letter. Silver-gray centers transition to golden-gray at the margins on the obverse, with a small rim bump near star 10. There are no adjustment marks or other significant marks for the grade.  
*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

### 1794 Half Dollar, Fine 15 O-101, An Early Die State

**3934** 1794 O-101, T-7, High R.3, Fine 15 PCGS. Tompkins Die State 1/2. Pale olive-gold toning deepens to iridescent colors around the borders of this attractive, Choice Fine 1794 half. The rims and dentils are sharp throughout both sides, and the coin is remarkably free of abrasions. Light, silver-gray patina occupies the raised elements for pleasing contrast with the toned fields. There are no adjustment marks and the date is sharp. About half of the wing feathers show some definition.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

### 1794 O-101a Half Dollar, VG8 Pleasing Interior Detail for the Grade

**3935** 1794 O-101a, T-7, High R.3, VG8 NGC. Tompkins Die State 1/5. The familiar O-101 and O-101a varieties represent the only 1794 half dollar pairing that is considered somewhat plentiful, ideal for type purposes. The present late die stage example is well-worn, although the eagle is fully outlined and Liberty's portrait shows some hair detail. Uniform steel-gray toning blankets each side. The lower obverse rim merges with the stars, but the date is clear. The reverse rim is bold. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

### 1794 O-101a Half Dollar, VG8 Highly Collectible First-Year Issue

**3936** 1794 O-101a, T-7, High R.3, VG8 PCGS. Tompkins Die State 1/5. Free of adjustment marks, this smoothly worn Overton-101a (T-7) retains a sharp date and only slight merging of the dentils along the right obverse border. Gunmetal-gray toning surrounds lighter devices. A glass reveals some interesting planchet "bubbles" scattered among the upper stars and LIBERTY, visible with a lens. The reverse fields are biplanar, visible at F in OF.  
*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 O-101a Half Dollar, VG10**  
All Late-State Die Cracks Fully Visible

**3937 1794 O-101a, T-7, High R.3, VG10 PCGS.** Tompkins Die State 1/5. The reverse die cracked at the F in OF in an earlier use, and a second radial crack developed later, left of the first S in STATES. Middle die states show advancement of both cracks to the leaves below. Even later, the crack at F turns left through the leaves below the O in OF. It eventually continues through the top single leaf to the second S in STATES and to the edge. Die chipping and biplanar surfaces show at the first two cracks in the latest die states. This is a lightly toned, golden-gray example of the late die state, with clear die cracks that are seldom fully visible on well-circulated examples. We note adjustment marks beneath the eagle's right (facing) wing. The date and obverse motifs are bold for the assigned grade.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 Flowing Hair Half Dollar, Fine 12**  
O-101(a), Middle Die State

**3938 1794 O-101(a), T-7, High R.3, Fine 12 ANACS.** Tompkins Die State 1/3. The previous-generation ANACS holder says O-101a, but actually this is a middle die state example of O-101, where the die crack through the F in OF has advanced to the olive leaves, but has not made a left turn to join the leaves beneath the O. Golden-gray toning deepens to deep-blue at the borders, with silver-gray patina on the raised devices. In our opinion, the central definition and strong date warrant a notch higher on the grading scale. Some light marks exist beneath the toning, and a few faint but lengthy adjustment marks extend from the border between STATES OF.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 O-101a Half Dollar, VF Details**  
Glossy, Textured Surfaces

**3939 1794 O-101a, T-7, High R.3 — Damaged — NCS. VF Details.** Tompkins Die State 1/5. Overly glossy from cleaning and retoning, the surfaces show stippled fields with numerous tiny, raised lumps and microscopic pits. Walnut-brown color lightens to grayish-tan on the central motifs. Despite the attempted surface improvements, this is a well-struck and lightly worn example that far exceeds most 1794 half dollars in sharpness. There are no adjustment marks — just a few light, hair-thin lines on and around the eagle.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 O-101a Half Dollar, VF30 Details**  
Smooth, Well-Defined Surfaces

**3940 1794 O-101a, T-7, High R.3 — Scratched, Toolled, and Cleaned — ANACS. VF30 Details.** Tompkins Die State 1/5. A bit glossy with even, tan-brown toning that masks light cleaning, this well-defined 1794 half also shows efforts to minimize some short scratches on the neck and nearby field to account for the net ANACS grade. Those problems aside, it is an attractive specimen that offers considerable visual appeal. A few short adjustment marks remain hidden in the recesses of Liberty's central hair strands. About 85% feather detail remains on the eagle's wings.

*From The Terry Brand Estate, Part IX.*

1794 Half, VF20  
Richly Toned O-101a Example

1794 Half Dollar, VF20  
Inaugural Flowing Hair Type, O-101a

**3941** 1794 O-101a, T-7, High R.3, VF20 PCGS Secure. Tompkins Die State 1/5. A blurry die crack between the uppermost olive leaf and the second S in STATES confirms the late stage of the reverse, while the obverse die remains perfect as always for the O-101a variety regardless of the reverse die state. Deeply toned shades of olive-gray, blue, and tan-gold cover both the obverse and reverse fields, while the devices emphasize points of wear with light, silver-gray patina. The effect is known among some numismatists as a “circulation cameo”—a clever, but not wholly accurate description of the toning.

Marks are minimized by wear and all of the motifs are well-defined for the VF20 grade level. The date is full as are the rims and dentils. We note a few light adjustment marks at the lower-right obverse margin, plus a few more in the recesses of Liberty's central hair strands, but most of the planchet file marks are diminished by strike and wear. The 1794 is always in demand in all conditions as first-year of the Flowing Hair type and the half dollar denomination. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**3942** 1794 O-101a, T-7, High R.3, VF20 NGC. Tompkins Die State 1/5. This is a deeply toned, sharply defined VF example of the Flowing Hair design, an historic two-year type by the Mint's Chief Engraver, Robert Scot. The 1794 is much more challenging than the 1795 for type, yet it is infinitely more desirable as the first year of issue for both type and denomination. Shades of gunmetal-gray and deep lavender cover both sides. Light obverse adjustment marks are confined to a small area on the central hair strands and along the lower-right border.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 O-101a Half Dollar, XF40**  
Conditionally Rare This Fine

**3943 1794 O-101a, T-7, High R.3, XF40 NGC.** Tompkins Die State 1/5. As often seen, the reverse of this O-101a is in its late die stage with a ridgelike crack joining the second S of STATES to the tip of the uppermost olive leaf. The die pair was seventh in the emission sequence for 1794 half dollars and it was by far the hardest of 11 total 1794 die marriages, with a rarity ranking of R.3. All other 1794 halves fall into the R.5 to R.8 range.

This example shows grade-appropriate smooth wear and attractive olive-gold toning at the borders. Steel-blue shades cover the fields and silver-gray patina defines the raised devices. Occasional light marks are seen with a glass, yet the dents and rims are strong and traces of reflective luster remain in sheltered areas. We note bits of old, whitish residue within the crooks of the reverse letters and wreath, visible under magnification — perhaps glue from an old coin board. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 O-104 Half, Good 6**  
Scarce, Final Die Pairing for the Year

**3944 1794 O-104, T-11, R.5, Good 6 PCGS.** Tompkins Die State 1/1. Struck from a reverse die that is unique in the Flowing Hair series, this relatively scarce variety has 10 berries along the right side of the wreath (six inside, four outside). The reverse legend is more evenly spaced than other 1794 working dies, although UNITED shows more space between its letters than do STATES OF AMERICA. Typical of the short die life for most 1794 varieties, the O-104 obverse soon cracked, and the reverse clashed heavily, then broke. However, this example was struck from perfect dies. Smoothly worn with pleasing old-silver color that deepens at the margins, it shows grade-consistent wear and only a few light abrasions. NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

**1794 O-104 Half Dollar, VG10**  
Strong Eye Appeal for the Grade

**3945 1794 O-104, T-11, R.5, VG10 NGC.** Tompkins Die State 2/2. Golden-gray toning deepens slightly across the central motifs of this moderately worn, yet well-defined 1794 half. Brief areas of adjustment marks exist on the obverse at 2 and 5 o'clock, but they do not extend beyond the margins. An unrelated pinscratch connects the bust truncation to 7 in the date. Likewise, a few light lines are noted on the reverse but they are grade-consistent and do not affect the substantial eye appeal.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

**1794 O-104 Half, Attractively Toned Fine 15**

**3946 1794 O-104, T-11, R.5, Fine 15 NGC.** Tompkins Die State 2/2. Numerous adjustment marks crisscross the obverse, although most of the marks fade at the centers either from strike or wear. Pleasing olive-gray toning covers both sides of this well-circulated example, which retains Choice surfaces despite a long stint in circulation. Struck from a middle die state, with evidence of die clashing but before any die cracks or cuds develop that signify a later die state.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

1794 Half Dollar, Colorful VF20  
Rare O-106 Variety, Early Die State

1794 Half Dollar, Fine 15  
Very Scarce O-107 Die Pair

**3947** 1794 O-106, T-4, Low R.6, VF20 PCGS. Tompkins Die State 1/1, as usual, but nonetheless rare. Overton-106 was the fourth die variety struck at the Mint in 1794 and the first use of the familiar reverse that was later employed for Overton-101. This O-106 coin is in the early die state, before the crack develops at the F in OF. The rims are sharp, and the central devices are bold. A few faint adjustment marks are discernible on the central part of Liberty's portrait and at the right-hand obverse border, although they are unnoticed by the naked eye. Sea-green interiors cede to olive, russet, and orange-gold toning around the margins. No O-106 coins are known in Mint State, and only a handful of pieces are finer than this example. NGC ID# 24E6, PCGS# 39208 Base PCGS# 6051

**3948** 1794 O-107, T-5, R.6, Fine 15 NGC. Tompkins Die State 1/1. Lightly toned an even, golden-gray shade throughout both sides, this smoothly worn O-107 is problem-free for the grade except for a minor depression above the ear on Liberty's hair strands accompanied by a few faint adjustment marks. Elsewhere, light marks and nicks are consistent with the Choice Fine designation. The reverse in particular is well-preserved with close to 70% of the wing feathers defined. The rims, dentils, stars, and date are crisply struck. NGC ID# 24E6, PCGS# 39209 Base PCGS# 6051

**1805/4 O-101 Draped Bust Half, MS65**  
**Arguably The Finest Known 1805 Half Dollar**  
**Ex: 'Col.' E.H.R. Green, Eric P. Newman, Oliver Jung**

**3949** 1805/4 O-101, T-4, R.3, MS65 NGC. CAC. Ex: "Col." E.H.R. Green and Eric P. Newman Collection. This amazing Gem displays brilliant-silver mint luster that shines through deep golden-brown and iridescent toning on each side. The strike is exceptionally sharp and the surfaces are splendid, with only a few inconsequential handling marks. Here is an amazing Draped Bust, Heraldic Eagle half dollar — a true centerpiece for an extraordinary cabinet. Careful examination reveals faint obverse clash marks, yet no die cracks or polishing lines. The reverse also shows light die clashing, yet no other die defects.

At least two unused obverse dies for half dollars were created with the 1804 date, confirmed by two different 1805/4 obverse dies that are known today. The O-101 and O-102 varieties share one of the obverses, and O-103 employs the other. While each of O-101 and O-102 die pairs is more plentiful than O-103, only about 1,000 pieces survive of all three varieties combined in all different grades. Of these, the Eric P. Newman specimen and the Eliasberg/Pogue specimen, both certified MS65, are easily the finest known 1805/4 half dollars. We believe that the Newman and Eliasberg/Pogue coins are the only two Gem examples known today, and that they are in fact the two finest 1805 half dollars that exist of any variety.

When we offered the Eliasberg coin in August 1998, that specimen was called the finest-known 1805/4 half dollar. The coin realized over \$100,000 at a time when few coins reached the six-figure mark. It more recently brought \$111,625 as part of the D. Brent Pogue Collection in May, 2015, certified MS65 PCGS.

In comparison, the present coin last changed hands in Heritage's ANA Signature Auction in August, 2014 for a record \$152,945 as part of the Oliver Jung Collection. It had previously held the record of \$152,750 when it appeared as part of our Eric P. Newman Collection, Part II (Heritage, 11/2013). It remains in its special Eric P. Newman holder as MS65 NGC, CAC.

B. Max Mehl was fond of writing that the 1805/4 half dollar was "the closest a collector could come to an 1804 half dollar." He was obviously making that statement in an attempt to borrow from the fame and fortune of the 1804 silver dollar. Today, the 1805/4 is well known to collectors and stands on its own merit as an important numismatic delicacy and an essential early type overdate. Silver deposits were minimal in 1804, as evidenced by the low production of dimes, quarters, and silver dollars (dated 1802 or 1803). There were no half dimes or half dollars minted in 1804, although half dollars were obviously intended. The finest certified 1805 Normal Date half dollars only reach the MS63 grade level, making the present coin arguably the finest 1805 half dollar available to collectors based on its outstanding pedigree and high grade (with CAC endorsement), and recent record-setting auction appearances.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$40.00; Eric P. Newman Numismatic Education Society; The Collection of Oliver Jung (Heritage, 8/2014), lot 5583; the present consignor.

**From An Important New York Collection.** NGC ID# 24EH, PCGS# 39290 Base PCGS# 6070

1807 Draped Bust Half Dollar, AU55  
O-106, Fifth on the Condition Census

**3950** 1807 Draped Bust, O-106, T-6, R.3, AU55 PCGS. Tompkins Die State 1/3. Star 1 points to the fourth set of curls, and the top left berry touches the leaf. Overton-106 is a plentiful variety in the absolute sense but is rare in high grades. This Choice AU half dollar takes fifth place on Tompkins' Condition Census. Strike detail is needle-sharp most everywhere, save for a few of the middle curls, reverse stars, and neck feathers. A touch of cabinet friction is trivial. Each side features a rich overlay of golden-gray and gunmetal patina that allows partial luster to shine through. NGC ID# 24EM, PCGS# 39345 Base PCGS# 6079

## BUST HALF DOLLARS

1811 Half Dollar, MS64  
O-108, Small 8, Vibrant Luster

**3951** 1811 Small 8, O-108, R.2, MS64 PCGS Secure. A short tine from the right (facing) wingtip identifies the dies as Overton-108, as well as the die state, since the tine disappears on late die state coins. This steel-gray and powder-blue example displays vibrant mint luster, and is smooth save for a single thin field line near the N in UNITED. Struck from clashed dies, with the reverse rotated 30° clockwise. Population (all Small 8 varieties combined): 39 in 64 (6 in 64+), 11 finer (4/18). NGC ID# 24EU, PCGS# 39431 Base PCGS# 6097

1815/2 O-101 Half Dollar, XF40  
Popular Guide Book Overdate

**3952** 1815/2 O-101, R.2, XF40 NGC. This is the early die state of the 1815/2 overdate, showing no reverse die cracks, although both sides are heavily clashed. The 2 underdigit is plainly visible amid the 5 in the date with magnification. This is a *Guide Book* variety and the only Overton die marriage for the year. The mintage of 47,150 coins circulated extensively, making this issue scarce in high grade and rare in Mint State. This XF coin shows strong detail and uniform olive-gray patina. No major distractions are visible. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1815/2 Half Dollar, XF45  
O-101a, Near-Terminal Die State

**3953** 1815/2 O-101a, R.3, XF45 PCGS. The 1815/2 is a prized issue with Bust half specialists both for its low mintage and its numismatic importance. The Mint was in disarray from the War of 1812 and short of bullion, manpower, and serviceable dies. At the end of 1815, a rusted 1812 die pair was retrieved from storage and the date repunched. 47,150 half dollars were struck, the only significant circulating minor coinage for the year. 89,235 quarters were struck as well, but most of those went to Planter's Bank in New Orleans. This 1815/2 half comes from an extremely late state of the dies, clashed and cracked so severely few coins could have been made thereafter. Tan-gold and steel-blue toning at the rims surrounds lightly toned centers, with luster at the borders. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

**1819 O-108 Half Dollar, Rainbow-Toned MS65**  
None Finer at Either Service for the Variety

**3954** 1819 O-108, R.3, MS65 NGC. Entrancing rainbow coloration flows in a wide arc from the top downward across the obverse of this Gem half. The reverse displays similar colors, ranging from vivid orange-gold shades to lilac, pale-blue, and sea-green hues. The date is widely spaced — one of just two 1819 varieties with such wide spacing (the other is O-115), and the 5 in the denomination is recut at the top. Inconspicuous die cracks encircle the reverse suggesting a late state of the dies. Only a few tiny ticks exist on the coin beneath the chin, and they require a loupe for viewing. The fields and devices are otherwise nearly pristine, and Liberty's hair curls are razor-sharp. The coin is the only Gem in the Stephen Herrman census, where it assumes the #1 position; the Parsley reference also notes a single MS65 coin, possibly this same example. Housed in a circa 1997 to 2001 NGC holder. NGC Census (all 1819 non-overdate varieties): 8 in 65, 0 finer (4/18).  
Ex: ANA Signature (Heritage, 8/2016), lot 4575, which realized \$19,975. NGC ID# 24FB, PCGS# 39544 Base PCGS# 6117

**1829 O-105 Small Letters Half, MS65**  
Original Semireflective Surfaces

**3955** 1829 Small Letters, O-105, R.1, MS65 NGC. Dappled reddish-gray toning displays cobalt-blue shades at the borders over semireflective fields throughout this Gem O-105 half. The motifs are sharply struck with most of the obverse stars fully formed — more so than usually seen on the right-hand stars, which often lack their centers, and are less sharp than the stars at left. Soft luster illuminates frosted devices and nearly mark-free surfaces. Three or possibly four MS66 coins exist for the variety, with a host of MS65 pieces vying for the low end of the Condition Census. NGC ID# 8YZY, PCGS# 39784 Base PCGS# 6154

**1831 O-120 Half Dollar, VG10**  
Discovered in 1970

**3956** 1831 O-120, Low R.6, VG10 PCGS. This is only the sixth appearance of an 1831 O-120 half dollar in our auction archives dating back to 1993. Advanced collector Don Gunnet discovered the variety in 1970, just after publication of the second edition of Al Overton's reference. This example clearly shows the diagnostic die bulge in the left obverse field, and the tine off the upper leaf on the reverse. Pale gold toning appears on the light gray surfaces of this pleasing, problem-free example. NGC ID# 24FV, PCGS# 39857 Base PCGS# 6159

**1831 Half Dollar, VF20**  
Rare O-120 Variety

**3957** 1831 O-120, Low R.6, VF20 PCGS Secure. Aside from a prime die state of O-111 that is rated R.7, O-120 is the rarest 1831 half dollar variety, rated Low R.6. This midgrade circulated example displays even wear and original two-toned gray surfaces that are lighter on the devices than in the fields. The overall coloration is olive-tinted gunmetal-gray. A small dig in the left obverse field is the only surface imperfection, and this coin is highly appealing for the variety. NGC ID# 24FV, PCGS# 39857 Base PCGS# 6159

## REEDED EDGE HALF DOLLARS

1837 Reeded Edge Half, MS64  
GR-7, Inverted G in AMERICA

**3958** 1837 GR-7, R.2, MS64 PCGS Secure. GR-7 is one of the most readily identifiable varieties of the 1837 Reeded Edge half dollar, showing an inverted G in place of the C in AMERICA. This near-Gem example showcases an incredibly sharp strike and radiant cartwheel luster that shines through warm orange-gold toning. The borders on each side show rings of violet and blue-gray toning. Only a few faint marks are visible beneath a loupe, none distracting. The 1837 half dollar as a date is scarce in MS64 and is rarely offered finer. PCGS# 531053 Base PCGS# 6176

1839 Reeded Edge Half, MS64+  
GR-5, Only One Finer for the Variety

**3959** 1839 Large Letters, GR-5, R.2, MS64+ NGC. The 1839 GR-5 variety is easily identified by weakness on the lower half of the date and the nearby stars. Likewise, some letters on the reverse legend and denomination fade — perhaps the dies were misaligned, or the working die improperly prepared. This is a high-end Choice Uncirculated example, richly frosted and lustrous, with varying intensities of reddish-tan toning that bespeak originality of the surfaces. Marks are virtually nonexistent, while the strike has enough areas of central sharpness to counterbalance the Mint-related softness around the peripheries. This example is apparently the second-finest known of the variety according to both the Dick Graham reference and Steve Herrman's Spring, 2018 Condition Census. NGC Census (all 1839 varieties): 44 in 64 (1 in 64+), 8 finer (4/18). NGC ID# 24G6, PCGS# 531102 Base PCGS# 6179

## SEATED HALF DOLLARS

1845-O Half Dollar, Toned MS64  
WB-109, Lightly Repunched Date

**3960** 1845-O Repunched Date, WB-109, MS64 PCGS Secure. Richly dappled apple-green, burgundy-red, and golden-brown toning encompasses this fully struck example. Smooth except for delicate marks in the upper-reverse field. An early die state of the "Footless 1" variety that shows a point in place of the left foot of the 1 in the date. The horizontal die lines in the central reverse are reminiscent of those seen on the 1844-O silver dollar. Population: 9 in 64 (1 in 64+), 5 finer (4/18). PCGS# 572040 Base PCGS# 6249

1867-S/S Half Dollar, MS64  
WB-103, Brilliant and Beautiful

**3961** 1867-S/S WB-103, Die Pair 4, R.3, MS64 PCGS. WB-103 exhibits a lightly repunched mintmark. This piece is in an early die state with sharp definition except for on the dentils. The surfaces are brilliant and lustrous, and the fields are smooth aside from some mint-made clash marks. The 1867-S half dollar is rare in Mint State, despite a mintage of nearly 1.2 million pieces. Population (all die varieties included): 4 in 64, 1 finer (4/18). PCGS# 572181 Base PCGS# 6322

**1873 Arrows Seated Half Dollar, MS66+  
WB-106, FS-301, Misplaced Date  
Finest Certified at Either Service**

**3962 1873 Large Arrows, Misplaced Date, FS-301, WB-106, MS66+ NGC.** A nominal increase in weight was mandated by Congress in 1873, and was signified by arrows punched into the working dies for minor silver coinage. Substantial mintages of half dollars followed by all three Mints, led by more than 1.8 million pieces struck in Philadelphia. This high-end example is one of the few Premium Gems to survive, and it displays a misplaced digit in the dentils below the right (facing) arrow. *Cherrypickers'* lists this anomaly as FS-301, and suggests that the MPD is most likely the upper curve of an errant 3. The variety is unlisted in the Wiley, Bugert reference, although no effort was made by the authors in 1993 to define all Large Arrows die marriages.

Regardless of variety, the present coin ranks as the finest-known 1873 Large Arrows half dollar by virtue of the NGC Plus designation. Reflective fields are softly lustrous beneath a mantle of lilac-gray patina. Iridescent colors play at the margins and merge into the centers for outstanding eye appeal. The strike is extra-sharp for the issue, while abrasions are limited to a few faint lines on Liberty's knee and a hidden scrape at the eagle's right wing near IC OF AMERICA. Neither service reports a numerically finer grading event for any 1873 Large Arrows half from any of the Mints — Philadelphia, Carson City, or San Francisco. Census: 4 in 66 (1 in 66+), 0 finer (4/18). PCGS# 413732 Base PCGS# 6343

**1873 Arrows Half Dollar, MS65  
WB-109, Bold Doubled Die Obverse**

**3963 1873 Small Arrows, Doubled Die Obverse, WB-109, FS-101, MS65 NGC.** This Small Arrows variety exhibits arguably the boldest die doubled obverse in the entire Seated Liberty half dollar series. The doubling is easily seen on Liberty's gown folds, fingers, and foot, as well as the scroll, and the shield stripes which exhibit four lines each instead of the normal three. This variety is rare in Mint State, although the 1873 With Arrows half dollar is a rarity at the Gem grade level regardless of variety. NGC has seen only seven pieces in this grade (two in MS65+), all varieties included, with just four finer (4/18).

The present coin displays soft, satiny luster beneath intermingled shades of burgundy-red, olive-green, and gunmetal-gray toning. The strike is sharp and only a few minute ticks on the figure of Liberty preclude an even finer assessment from NGC. An important piece for the advanced Seated half dollar specialist. NGC ID# 24L7, PCGS# 400136 Base PCGS# 6343

**1879 Half Dollar, MS66 Prooflike  
High-End and Brilliant**

**3964 1879 Closed Bud, WB-102, MS66 Prooflike NGC.** Some proof 1879 half dollars are from an Open Bud reverse hub, but all circulation strikes show the Closed Bud design, which is recognized as WB-102. This issue overall is elusive in MS66 and rare finer, although such coins are more collectible than the mintage of 4,800 pieces would suggest. This example is brilliant and vibrantly lustrous, showing prooflike fields and a sharp strike. No distracting abrasions are visible. Census: 33 in 66 (1 in 66+, 3 in 66 ★, 1 in 66+★), 12 finer; 2 in 66 Prooflike, 0 finer (4/18). NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

**1884 Seated Liberty Half, MS67  
Elusive Low-Mintage Date**

**3965 1884 MS67 PCGS.** The 1884 Seated Liberty half dollar boasts a low mintage of just 4,400 pieces, but the issue has a higher than expected survival rate, with a few really spectacular examples extant. Among those coins is the present Superb Gem, with sharply detailed design elements and impeccably preserved surfaces that include deeply reflective prooflike fields. Shades of cerulean-blue and golden-tan toning enhance the terrific eye appeal. Population: 9 in 67 (1 in 67+), 1 finer (4/18). NGC ID# 24KX, PCGS# 6366 Base PCGS# 6366

**1890 Half Dollar, Colorful MS65  
Prooflike Fields**

**3966 1890 WB-101 MS65 PCGS. CAC.** The 1890 was the last of the low-mintage half dollar issues brought about by the Bland-Allison Act of 1878, which shifted much of the Mint's focus from minor denominations to the hefty silver dollar. Only 12,000 1890 halves were struck, solely at Philadelphia. This Gem example is scarce. Sharp design elements and prooflike fields complement original multicolor toning that delivers strong visual appeal. Population: 19 in 65 (1 in 65+), 20 finer. CAC: 4 in 65, 9 finer (5/18). NGC ID# 24L5, PCGS# 572275 Base PCGS# 6372

**1890 Seated Half Dollar, MS67  
Prooflike and Conditionally Rare**

**3967 1890 WB-101 MS67 NGC.** Peripheral arcs of yellow, cobalt-blue, and lavender cede to rich orange-gold interiors on this prooflike Superb Gem, and sharply struck, frosted design elements offer pleasing contrast with the mirrored fields. A couple of tiny milling marks in the right obverse field are only visible with a loupe. The 1890 half dollar is rare this fine. Census: 5 in 67, 1 finer (4/18). Ex: ANA Signature (Heritage, 3/2008), lot 691, which realized \$10,350; Houston Signature (Heritage, 12/2009), lot 736, which realized \$9,487.50. NGC ID# 24L5, PCGS# 572275 Base PCGS# 6372

**PROOF SEATED HALF DOLLARS**

**1861 Seated Liberty Half, PR66  
Tied for Finest at PCGS**

**3968 1861 PR66 PCGS Secure.** The Mint produced a generous mintage of 1,000 proof Seated Liberty half dollars in 1861 after successful sales in previous years, but a new 13 cent fee implemented in 1860 caused demand to drop considerably. Probably more than half of the proof mintage remained unsold at the end of the year and the coins were melted for recoinage. This sharply detailed Premium Gem exhibits well-preserved reflective fields under shades of cerulean-blue and jade-gray toning. Population: 6 in 66, 0 finer (4/18). NGC ID# 27TL, PCGS# 6415

**1871 Half Dollar, PR66 Cameo  
Beautiful Multihued Patina**

**3969 1871 PR66 Cameo NGC.** Cameo examples of this otherwise collectible proof issue are rarely encountered, and Ultra Cameos are prohibitively rare. This Premium Gem representative is deeply toned in concentric shades of mint-gold, champagne, ocean-blue, amber-orange, and pale rose, but the field-device contrast is not hindered. The sharp motifs and mirrored fields are free of any distracting contact marks or hairlines. Census: 4 in 66 Cameo, 2 finer (4/18).

Ex: Summer FUN Signature (Heritage, 7/2015), lot 3146, which realized \$4,347.50.

**From The Reilly Cody Collection.** NGC ID# 27U6, PCGS# 86429

1890 Half Dollar, Toned PR67  
In an Old Green Label Holder

- 3970 1890 PR67 PCGS.** Ex: Norweb. This Superb Gem proof is among the finest non-Cameo coins at PCGS. Old-time blue, violet, and sea-green toning encompasses each side, preventing field-device contrast but producing its own brand of eye appeal. The mirrored fields are easily appreciated when tilted beneath a light. Housed in an old green label holder. Population: 8 in 67, 0 finer; 5 in 67 (2 in 67+) Cameo, 1 finer; 2 in 67 Deep Cameo, 0 finer (5/18).  
Ex: Norweb Collection, Part III (Bowers and Merena, 11/1988), lot 3253. NGC ID# 27US, PCGS# 6451

## BARBER HALF DOLLARS

1893-O Half Dollar, MS66  
Among the Finest Certified

- 3971 1893-O MS66 NGC.** Although not rare in the absolute sense with nearly 1.4 million coins struck, the 1893-O Barber half is a condition rarity in high Mint State grades; the population thins considerably above MS63. Only seven MS66 pieces have been certified by both NGC and PCGS combined with none finer. This is a rare opportunity for a collector to obtain one of the finest representatives of this early Barber half. Splendid green-gray, gold, and crimson peripheral toning encircles the lighter silver-gray centers. The strike is razor-sharp, showing no mentionable weakness on either side — a pleasing exception to the rule for O-mint coins. Glowing luster radiates beneath the vibrant toning. This virtually pristine Premium Gem Barber half would make a perfect addition to a fine Registry Set. Census: 2 in 66, 0 finer (4/18). NGC ID# 24LL, PCGS# 6466

1895-O Barber Half, MS65  
Conditionally Rare

- 3972 1895-O MS65 PCGS Secure.** This New Orleans issue is scarce but occasionally available in grades through MS64, but Gems are rare. This piece shimmers with original mint luster and shows exceptional preservation. Moderate strike weakness occurs on the obverse stars and on the right side of the eagle, as usual for O-mint halves of the mid-1890s. Population: 6 in 65, 7 finer (5/18). NGC ID# 24LT, PCGS# 6472

1896-S Barber Half Dollar, MS65+  
Seldom Seen This Fine

- 3973 1896-S MS65+ PCGS Secure.** The 1896-S Barber half dollar is a better date in the series and high-grade specimens, with a decent strike, are quite rare in today's market. This Plus-graded Gem exhibits sharply detailed design elements in most areas, with a touch of the usual softness on the shield point. The well-preserved lustrous surfaces show a mix of powder-blue, lavender, gray, and pale gold toning. Population: 15 in 65 (2 in 65+), 6 finer (4/18). NGC ID# 24LX, PCGS# 6476

**1904-O Half Dollar, MS66+**  
The Single Finest at NGC

**3974** 1904-O MS66+ NGC. Although more than 1.1 million half dollars were coined in New Orleans in 1904, this issue is decidedly rare in Gem or finer grades today due to its widespread use in commerce in the early 20th century. This high-end Premium Gem is the sole finest example certified at NGC (4/18). Beautifully toned and satiny with exceptionally clean surfaces, it shows concentric rings of jade, cobalt-blue, magenta, and amber color around the borders, surrounding champagne-tinted interiors. A lack of significant abrasions allows for a high-end grade that is matched by few other 1904-O half dollars. The eagle's right (facing) wing junction is a trifle weakly struck, as are the tailfeathers. New Orleans issues of this period are seldom found so fine. Census: 0 in 66, 0 finer (4/18). NGC ID# 5EPG, PCGS# 6499

**1905-O Half Dollar, Lustrous MS66**  
Low-Mintage Issue, Few Are Finer

**3975** 1905-O MS66 PCGS. CAC. This low-mintage New Orleans issue — with just over a half-million pieces struck — ranks among the more difficult O-mints in the Barber half dollar series at the Mint State level. David Lawrence (1991) states: "Rarely comes nice. Usually lackluster and poorly struck." This Premium Gem displays pleasing luster, and aside from minor softness on the eagle's neck feathers and at the upper-right shield corner, the coin is sharply struck. Orange-gold patina with bluish and lavender accents enhance the coin's eye appeal, as do the nicely preserved surfaces. CAC endorsement affirms the above-average quality. Population: 6 in 66 (1 in 66+), 4 finer. CAC: 5 in 66, 4 finer (5/18).  
Ex: New York Signature (Heritage, 11/2013), lot 3629. NGC ID# 24MS, PCGS# 6502

## PROOF BARBER HALF DOLLAR

**1892 Half Dollar, PR67 Cameo**  
Colorful Original Patina

**3976** 1892 PR67 Cameo NGC. The Mint struck a relatively high number of proof Barber half dollars in the series' first year (1,245 pieces), correctly anticipating strong demand from collectors. This is one of the more collectible and popular proof issues, but seldom are coins seen so fine. Each side is profoundly and originally toned in blue, violet, gold, and rose hues, yet field-device contrast remains stark. Tremendous eye appeal. Census: 25 in 67 Cameo (2 in 67★), 3 finer (5/18). NGC ID# 24NU, PCGS# 86539

## WALKING LIBERTY HALF DOLLARS

**1916-S Half Dollar, Frosty MS65**  
Rarely Encountered Finer

**3977 1916-S MS65 PCGS Secure.** The first-year San Francisco Walker is scarce in Gem condition and rare finer. This piece displays lovely, shimmering mint luster with only the most minuscule grazes visible beneath a loupe. Both sides are brilliant. Moderate strike weakness in the centers is as typical for the issue, and the eye appeal is outstanding. PCGS lists 14 higher-grade representatives (5/18). NGC ID# 24PN, PCGS# 6568

**1917-D Half Dollar, MS65**

Reverse Mintmark

**3978 1917-D Reverse MS65 PCGS.** In 1916 and the first part of 1917, the Denver and San Francisco branch mints stamped their mark on the obverse of the new Walking Liberty half dollar, just below the motto IN GOD WE TRUST. That mintmark placement was altered midway through 1917, when it was moved to the left reverse border, where it remained for the duration of the series. Fewer examples of the 1917-D Reverse Mintmark half dollar were saved than its Obverse Mintmark counterpart, and the issue is conditionally rare at the Gem level.

Slight softness occurs on the drapery lines, the motto, and the eagle's leg — all normal for the issue — but Liberty's branch hand is fully defined. Speckled gunmetal-blue and crimson patina appears over bright, satiny surfaces that show few overt imperfections. PCGS reports five submissions finer (5/18). NGC ID# 24PS, PCGS# 6571

1919-D Half Dollar, Lustrous MS62  
Attractive Mint State Example

1919-D Half Dollar, MS64  
Above-Average Strike  
Rarely Offered in Finer Condition

- 3979 1919-D MS62 PCGS Secure.** The strike-challenged 1919-D seldom attains even 50% definition on the high points of the design, yet this lustrous and frosted MS62 is sharper than that. Liberty's head shows facial definition and thumb separation exists. The front edge of the eagle's leg is weak, yet not bald. Eye appeal is terrific, with streaming silver luster throughout both sides and areas of grayish-umber toning confined mostly to the obverse. NGC ID# 24PZ, PCGS# 6578

Adolph Weinman

- 3980 1919-D MS64 PCGS Secure.** The 1919-D is the rarest Walking Liberty half dollar in Gem condition, and it is scarce even at the Choice grade level. This issue is also weakly struck more often than not, contributing to its rarity in high grade. The present coin is above average in that regard, showing partial thumb separation on Liberty's branch hand and moderate head detail; weak definition is still visible on Liberty's thigh and the eagle's trailing leg. A few light marks in the right obverse field prevent Gem classification but are not bothersome. Just left of Liberty's figure, in the field, a small bluish toning spot serves as a pedigree marker, but the coin is otherwise brilliant. An outstanding example of this condition key in the Walking Liberty half dollar series. Population: 87 in 64 (7 in 64+), 12 finer (4/18). NGC ID# 24PZ, PCGS# 6578

**1920-D Half Dollar, Satiny MS63  
Better Denver Issue**

**1921-S Half Dollar, MS64  
Key Walking Liberty Issue in Mint State**

- 3981 1920-D MS63 PCGS Secure.** This Select example has satiny mint luster and hints of light golden toning. A few scattered abrasions define the grade. As with many 1920-D Walking Liberty half dollars, this piece is weakly struck on Liberty's head and branch hand, as well as the eagle's trailing leg. But eye appeal is nonetheless pleasing for the grade. This is a slightly better Denver issue in Mint State. NGC ID# 24R4, PCGS# 6581

**1921 Half Dollar, Lustrous AU58  
Seldom Offered CAC Example**

- 3982 1921 AU58 PCGS Secure. CAC.** The difficulty of finding an attractive, high-end-for-the-grade example of the 1921 Walking Liberty half dollar can be seen by the low number of coins bearing a CAC green label. This near-Mint coin is a rarity with the "green bean" sticker. Barely a brush of friction is visible on each side, and the lightly marked surfaces are mostly lustrous. Light golden toning graces each side. CAC: 14 in 58, 42 finer (5/18).

*From The Bob Williams Collection.* NGC ID# 24R6, PCGS# 6583

**1921-D Half Dollar, AU55  
Lowest-Mintage Cornerstone Issue**

- 3983 1921-D AU55 PCGS Secure.** The 1921-D has the distinction of being the lowest-mintage issue in the entire Walking Liberty half dollar series. Merely 208,000 pieces were struck, and examples are among the most difficult to locate in circulated condition (the 1919-D and 1921-S are rarer in Mint State). This Choice AU representative is fully brilliant with vibrant satin luster remaining. Moderate blending and incompleteness over the usual high points is unimportant. A well-preserved example of this popular key date. *From The Bob Williams Collection.* NGC ID# 24R7, PCGS# 6584

- 3984 1921-S MS64 NGC.** As the United States economy dealt with a post-war slow-down, demand for silver coins also declined, leading to lower mintages across the dime, quarter, and half dollar denominations. Additionally, resources were being focused toward the production of Morgan dollars, which needed to be coined en masse to back up new silver certificates. The San Francisco Mint, for example, struck 21.6 million silver dollars in 1921, but it produced only 548,000 half dollars — one of the lowest mintages in the series. These coins clearly circulated, as the 1921-S is one of the top condition rarities among all Walking Liberty halves.

This lustrous, untoned near-Gem is remarkably clean. There are several minute ticks hidden within the drapery folds and the feathers, but not much else. A hint of olive-green patina graces areas on each side, but the surfaces remain largely untoned. Strike detail is typical with softness on Liberty's head, branch hand, and the eagle's trailing leg. NGC lists 23 finer grading events, likely including some duplication (5/18).

*From The Bob Williams Collection.* NGC ID# 24R8, PCGS# 6585

**1929-S Walking Liberty Half, MS66  
Attractive Luster, Original Toning**

**3985 1929-S MS66 PCGS Secure.** Available in lower grades, the 1929-S half dollar is scarce in MS66. PCGS and NGC combined list only five finer pieces (5/18), which are out of reach for most collectors. This Premium Gem displays original frosted luster and exceptionally clean surfaces. Light golden toning overall shows some deeper olive-russet hues near the rims. Mild strike weakness is visible on Liberty's branch hand and the eagle's trailing leg. Population: 59 in 66 (1 in 66+), 1 finer (5/18). NGC ID# 24RD, PCGS# 6590

**1933-S Half Dollar, MS66+  
Few Available Finer**

**3986 1933-S MS66+ PCGS Secure.** The 1933-S is a relatively plentiful issue overall, although it becomes elusive in MS66 and is rarely offered finer. This high-end Premium Gem displays sharp thumb separation on Liberty's branch hand and detailed feathers on the eagle's trailing leg. Essentially brilliant surfaces are radiant and frosty, showing no distracting abrasions. PCGS lists 15 finer pieces (5/18). NGC ID# 24RE, PCGS# 6591

**1946-D Half Dollar, Scintillating MS67+  
Tied for Finest at Both Services**

**3987 1946-D MS67+ PCGS. CAC.** This is an important coin for Registry Set collectors, as this Superb Gem ranks among the finest 1946-D Walking Liberty half dollars at PCGS by the margin of the Plus designation. The CAC approval sticker confirms its quality for that esteemed grade level. Scintillating satin mint luster shimmers across virtually mark-free surface. Glints of lavender, gold, and pale blue further the eye appeal. Population: 99 in 67 (5 in 67+), 0 finer. CAC: 56 in 67, 0 finer (5/18). NGC ID# 24SK, PCGS# 6628

**PROOF WALKING LIBERTY HALF DOLLAR**

**1936 Half Dollar, Sharp PR67  
Only One Coin Finer at PCGS**

**3988 1936 PR67 PCGS Secure.** The first-year proof in the Walking Liberty half dollar series is the most elusive proof in high grade. The 1936 is scarce in PR67 and almost uncollectible finer. This piece displays a full strike and glimmering fields with no distracting marks. Delicate iridescent toning graces each side. Population: 52 in 67 (4 in 67+), 1 finer (4/18). NGC ID# 27V4, PCGS# 6636

**FRANKLIN HALF DOLLAR**

**1951-S Half Dollar, MS67 Full Bell Lines  
Splendid Registry Set Offering**

**3989 1951-S MS67 Full Bell Lines PCGS. CAC.** The 1951-S Franklin half dollar is a scarce issue in high grade and examples in MS67 with Full Bell Lines are rare. This delightful Superb Gem is among the finest-known survivors, with sharply detailed obverse devices and Full Bell Lines on the reverse. The 1951-S is nearly always softly struck, and some slight blending shows on the center of the bell and the yoke details, but the lines at the bottom of the bell are complete. Both sides display attractive shades of green, lavender, and champagne-gold toning around the borders, with vibrant, frosty mint luster underneath. Close inspection reveals virtually no marks or mentionable distractions on either side. Importantly, there are no numerically finer coins at either service for this strike-challenged San Francisco issue. Population: 6 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 3 in 67, 0 finer (5/18). NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660

## PROOF FRANKLIN HALF DOLLARS

1950 Half Dollar, PR67+  
First Proof Issue in the Series

1954 Half Dollar, PR68 Deep Cameo  
Rare Top-Grade CAC Coin

- 3990** 1950 PR67+ PCGS. CAC. This high-end Superb Gem is undoubtedly one of the finest survivors from this early Franklin half dollar issue and the first proof production in the series. The surfaces appear totally unmarked. Brilliant centers yield to splashes of crimson, gold, and blue patina around the rims. There is a single coin finer at PCGS (5/18). NGC ID# 27VA, PCGS# 6691

1951 Franklin Half, Well-Mirrored PR68  
Beautiful Iridescent Toning

- 3991** 1951 PR68 NGC. Dappled iridescent toning imparts a ripplelike effect across the mirrored obverse fields of this spectacular Superb Gem half dollar, a likely result of long storage in its original cellophane envelope. The reverse is brilliant and equally immaculate. There are simply no distractions or imperfections to report, and the strike is razor sharp on the lightly frosted devices. Census: 20 in 68 (1 in 68★), 0 finer (4/18). NGC ID# 27VB, PCGS# 6692

1952 Half Dollar, PR66 Ultra Cameo  
Condition and Contrast Rarity

- 3992** 1952 PR66 Ultra Cameo NGC. Proof 1952 Franklin halves with cameo contrast are readily available, but only 28 coins have received Ultra Cameo grades at NGC, and few are finer than the present Premium Gem. Fully struck devices contrast against liquidlike mirroring in the fields, producing ample eye appeal. A hint of light golden color is seen around the margins upon close examination. Census: 8 in 66 Ultra Cameo (1 in 66+), 6 finer (4/18). Ex: Long Beach Signature (Heritage, 6/2015), lot 4031, which realized \$5,170. NGC ID# 27VC, PCGS# 96693

**1958 Half Dollar, PR68 Deep Cameo**

Among the Finest at PCGS

- 3994** 1958 PR68 Deep Cameo PCGS. CAC. Deep Cameo examples of the 1958 proof half dollar are elusive in high grade, and a minority are CAC endorsed. This piece displays stark white-on-black contrast and a razor-sharp strike. No toning appears on either side. This remarkably well-preserved Registry coin is among the finest Deep Cameo proofs at PCGS for this date. Population: 31 in 68 (1 in 68+) Deep Cameo, 0 finer. CAC: 16 in 68, 0 finer (4/18).  
Ex: Dallas Signature (Heritage, 3/2013), lot 3681, which realized \$4,993.75. NGC ID# 27VH, PCGS# 96699

**1959 Half Dollar, PR66+ Deep Cameo**

Starkly Contrasted CAC Coin

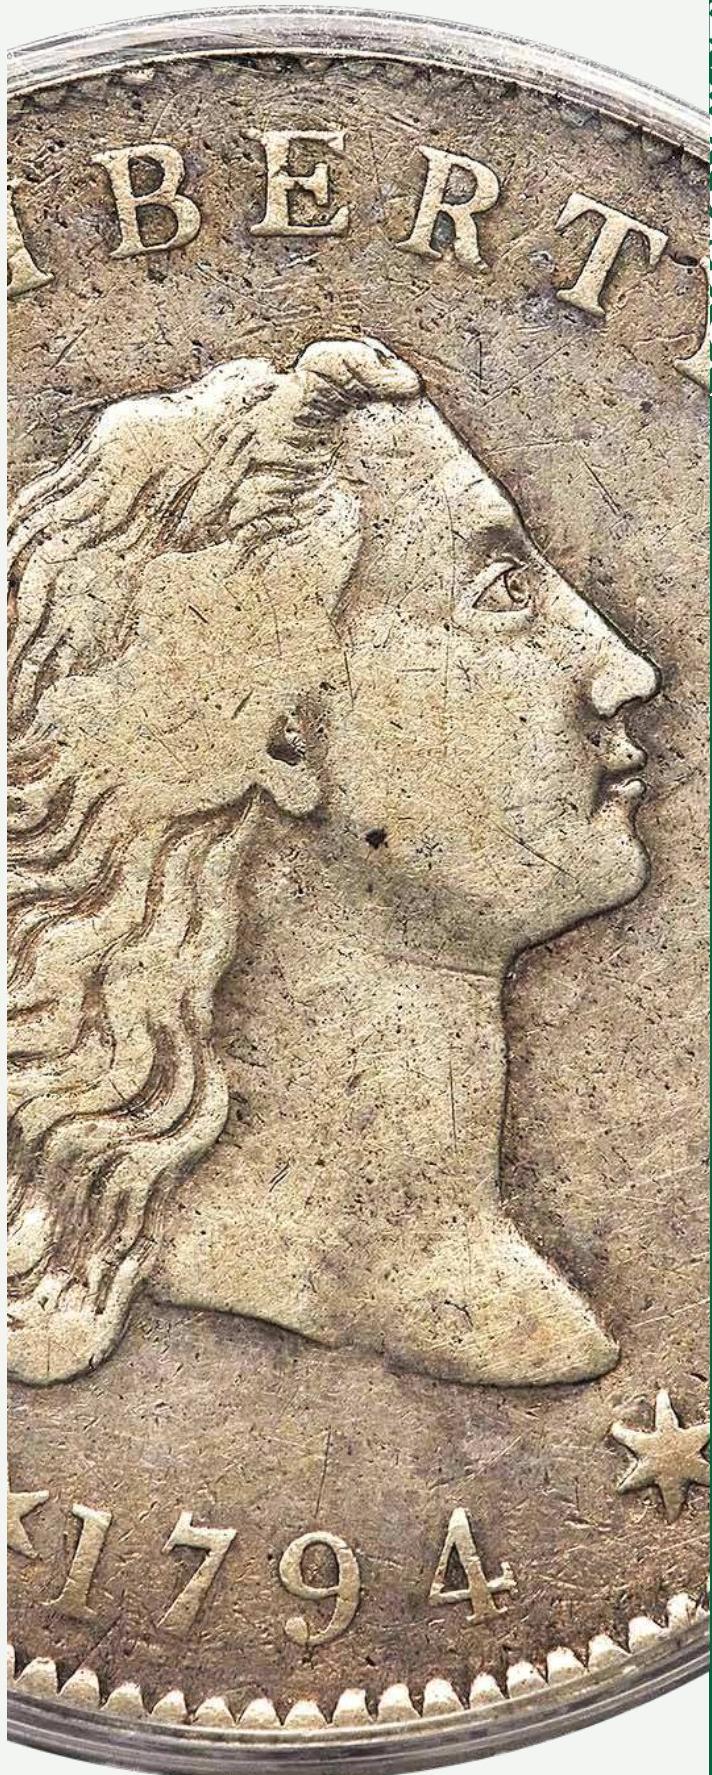

- 3995** 1959 PR66+ Deep Cameo PCGS. CAC. One of the most impressive 1959 proof Franklins that we have recently seen, this high-end Deep Cameo is a fully struck and appears flawless to the untrained eye. A strong loupe and careful examination can pick out a couple of faint lines in the mirrored fields, but these do not prevent a CAC endorsement. This Registry-grade proof is brilliant, sharp, and starkly contrasted. Deep Cameo examples of this issue are scarce. Population: 8 in 66 (1 in 66+) Deep Cameo, 10 finer. CAC: 1 in 66, 2 finer (4/18).  
Ex: Long Beach Signature (Heritage, 6/2014), lot 4597, which realized \$6,168.75. NGC ID# 4JAC, PCGS# 96700

**1963 Franklin Half, PR69 Ultra Cameo**

Among the Finest Certified

- 3996** 1963 PR69 Ultra Cameo NGC. This virtually perfect Ultra Cameo proof is tied for the finest certified by either leading service. Both sides are brilliant and show deeply mirrored fields and frost-white devices. A conditionally rare, must-have Registry coin. Census: 15 in 69 Ultra Cameo (1 in 69 ★), 0 finer (4/18).  
Ex: Beverly Hills Signature (Heritage, 11/2014), lot 4421, which realized \$7,637.50. NGC ID# 27VL, PCGS# 96704

EARLY DOLLARS

1794 B-1, BB-11 Silver Dollar, XF40  
Our First Silver Coinage

**3997 1794 B-1, BB-1, R.4, XF40 PCGS. CAC.** Following passage of the Mint Act of 1792, George Washington appointed David Rittenhouse as the first Director of the Mint, and Rittenhouse accepted the appointment. He immediately began arranging for suitable physical facilities to house the new government agency, and he also began assembling his staff of mint officers. Neither task was easily accomplished.

The Mint Act specified coinage in copper, silver, and gold, with denominations ranging from the half cent to the ten dollar gold eagle. Due to the expected quantities of gold and silver that would be handled during the course of business, Congress specified that the Assayer and the Chief Coiner should each post a bond in the amount of \$10,000, a sizeable sum in the early 1790s, equal to nearly seven years' salary for each of those officers. Albion Cox was hired as the Assayer, and Henry Voigt was hired as the Chief Coiner. Neither individual was able to fulfil the bond requirement. As part of his February 8, 1794 communication to Congress, Rittenhouse wrote:

"If it shall be thought proper to allow a refiner for the mint, I beg leave to suggest the propriety of authorizing the President to direct security to be taken to such amount as he shall judge proper; it being well known that a man's ability to give security depends much on accidental circumstances, little connected with either his qualifications or his moral character."

On March 3, 1794, Congress passed additional legislation that lowered the bond requirement to \$1,000 for the Assayer, and \$5,000 for the Chief Coiner. Cox and Voigt were able to meet these new requirements, and all was finally set for the coinage of precious metals. Silver dollars were minted first, with the entire 1794 production of 1,758 coins delivered from the Coiner to the Mint Treasurer on October 15. Six weeks later, 5,300 half dollars were delivered on December 1, 1794. Additional silver coins were minted throughout the first seven months of 1795 and beyond, and the first gold coins (half eagles) were delivered on July 31, 1795. With the coinage of dimes in January 1796, and quarters three months later, all denominations specified in the April 1792 Mint Act were finally in production after four years.

In his survey of 1794 silver dollars, Martin Logies enumerated 134 surviving examples, and we know of two new examples that were not recorded in his reference, bringing the total to 136 pieces, for a survival rate of 7.7% of the mintage. Logies accounts for six Mint State examples, 12 AU representatives (including four that are cleaned or tooled), another dozen XF45 pieces, and 10 problem-free XF40 examples including the present piece. Nearly all of those 30 top-grade examples are housed in collections ranging from type sets to specialized die variety cabinets, with few opportunities to bid on such examples.

Although imperfectly centered, the atypical strike exhibits a sharp and complete date, with each one of the 15 stars fully outlined. The border is completely detailed around the circumference of the obverse and reverse, save for the top of the reverse where the dentils are lacking. A trivial rim bump is evident over the F in OF. Attractive pale-gray silver toning appears on both sides of this lovely dollar, with hints of sky-blue toning visible with magnification. There are no marks of consequence on either side of this splendid first-year silver dollar.

*Ex: Upper Midwest Coin Collectors Convention (Leo Young, 6/1957), lot 1333; California State Numismatic Association Convention (Leo Young, 4/1958), lot 1507; American Numismatic Association Convention (Leo Young, 8/1959), lot 1647; Corrado Romano; Romano Estate (Stack's, 6/1987), lot 741; Four Landmark Collections (Bowers and Merena, 3/1989), lot 1933; private collector (Gerard Menicucci, 2004, per Martin Logies).*

**From An Important New York Collection.** NGC ID# 24WY, PCGS# 39972 Base PCGS# 6851

**1795 Flowing Hair Dollar, VF30  
B-5, BB-27, Three Leaves**

- 3998 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF30 PCGS.** Bowers Die State III. This midgrade circulated Three Leaves type coin displays a bold strike save for slight weakness on the lower-right obverse stars. No adjustment marks are visible, and the surfaces are problem-free. Although both sides exhibit mainly olive-gray patina, tinges of original luster with a golden hue emerge from the protected portions of the fields when tilted beneath a light. A highly appealing Flowing Hair dollar for this grade level. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Draped Bust Dollar, AU50  
B-14, BB-51, Off-Center Portrait**

- 3999 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, AU50 NGC.** The bust of Liberty was entered into the die off center. This variety is segregated in the *Guide Book* and is one of the subtypes associated with the Draped Bust dollar. It is also one of only two Draped Bust varieties struck in 1795, after the Flowing Hair design was retired. This AU coin displays uniform olive-gray color and well-detailed design elements. The surfaces are smooth and free of distractions. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1796 B-4, BB-61 Dollar, Choice VF  
Small Date, Large Letters**

- 4000 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF35 PCGS Secure.** Bowers Die State I. Three forecurls are apparent on this early die state B-4, BB-61 example, identified by the close spacing of TE in STATES and the single leaf under the D in UNITED. Lightly worn high points show pleasing gold and lavender patina, while the protected areas, including the fields, are light silver-gray. This Draped Bust, Small Eagle dollar is clearly well-struck with bold detail remaining on the curls and wing feathers. BB-61 is the only collectible Small Date, Large Letters variety for 1796, and it is one of the most plentiful of all die marriages for the year. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

**1796 Draped Bust Dollar, AU50  
B-5, BB-65, Large Date, Small Letters**

- 4001 1796 Large Date, Small Letters, B-5, BB-65, R.2, AU50 PCGS Secure.** CAC. Bowers Die State II. Richly toned in natural shades of steel-gray with tinges of russet and violet, this About Uncirculated early dollar is a splendid representative of the date and type. The surfaces are smooth and free of any meaningful distractions, while traces of silver luster emerge from the comprehensive patina in protected areas.

The strike is a trifle soft on Liberty's middle curls, as well as on stars 2-4 and the corresponding letters (STA of STATES) of the reverse. Even so, about half of the eagle's breast feathers remain visible. The diagnostic die lump between the IC in AMERICA is in a fairly early state and does not touch the C. BB-65 is the sole representative of the Large Date, Small Letters type (all other 1796 varieties feature Small Date numerals), and as such, this minimally worn and unquestionably original Small Eagle dollar is sure to earn a generous bid. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

**1797 B-1, BB-73 Dollar, XF Details**

- 4002 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 — Rim Filing — PCGS Genuine. XF Details.** Bowers Die State III. This Large Letters, Small Eagle type coin is evenly struck but slightly weak in the centers. The border dentils are complete around both sides and are free of adjustment marks. PCGS notes rim filing, although the holder collar prevents examination of this characteristic. Both sides are satiny with deep olive-gray toning.

PROOF EARLY DOLLAR

1804 Dollar, PR62  
The King of American Coins  
The Mickley-Hawn-Queller Specimen

**4003 1804 Original PR62 PCGS Secure.** "In all of numismatics of the entire world, there is not today and there never has been a single coin which was and is the subject of so much romance, interest, comment, and upon which so much has been written and so much talked about and discussed as the United States silver dollar of 1804."

- B. Max Mehl, from the Dunham Collection catalog, 1941

For more than a century, the 1804 dollar has reigned as the "King" of U.S. coinage, a fitting title to bestow on a coin made for royalty. The U.S. Mint received orders to strike complete sets of proof coinage meant to serve as diplomatic gifts for sovereigns such as the Sultan of Muscat, the King of Siam, and the Emperors of Cochin-China and Japan. While most denominations specified by the Mint Act of 1792 were still in production in 1834 and thus simple to produce as proofs, the silver dollar and gold ten dollar (eagle) had not been struck for many years - since 1804, the Mint's research found. There was just one catch: those silver dollars struck in 1804 were made from carryover obverse dies and did not bear that date. When the Mint struck those silver dollars dated 1804 and a few spares, an inadvertent rarity was created.

Jacob Eckfeldt and William E. DuBois revealed the existence of the Class I or "Original" 1804 dollars to the then-small coin collecting community of the United States by including a picture of one in their 1842 reference, the *Manual of Coins of All Nations*. Matthew Stickney became the first confirmed non-royal, non-government-employee owner of an 1804 dollar in 1843, when he traded a gold Immune Columbia piece - a remarkable numismatic delicacy - as well as other coins to the Mint Cabinet to get his example (for more on Stickney's transaction see Moulton, Karl and Stone, David, "The Stickney-Dubois Connection", *The Numismatist*, October 2016 edition). The second confirmed piece to come into a collector's hands was this very coin, which had come into the possession of bank teller Henry C. Young in October of 1847 and was sold to now-legendary numismatist Joseph J. Mickley the same day. By the end of the 1850s there was enough financial incentive for the self-enrichment crew of the midcentury Philadelphia Mint to try their hand at 1804 dollar restrikes, though their various gaffes - not least of which was striking the singular Class II Restrike over an 1857 shooting thaler from Bern in Switzerland - stopped their plans in the short term. After the Civil War, the market for the various 1804 dollars blossomed. The Mickley specimen offered here sold at a W. Elliot Woodward sale for \$750 in October 1867, while the Chapman brothers cracked the four-figure mark and coined the phrase "King of the U.S. series" in May 1885 when they sold the Dexter specimen for \$1,000. While those Originals were setting records, the Second Restrike or Class III coins, artificially worn and given artificial backstories (e.g. the Berg specimen of the Class III dollar turning up in Vienna), were working their way toward marketplace acceptance. In 1907, Henry Chapman called the 1804 dollar "The King of United States Coins."

If the 19th century had made the 1804 dollar "niche famous" among the relatively small elite core of U.S. coin collectors, the 20th century was an era of popularization and broader celebrity. While the 1804 dollar has been the subject of multiple scholarly volumes (Newman and Bressett, *The Fantastic 1804 Dollar*, Q. David Bowers, *The Rare Silver Dollars Dated 1804 and the Exciting Adventures of Edmund Roberts*, and Mark Ferguson, *The Dollar of 1804, The U.S. Mint's Hidden Secret*), no one person has done more to raise the 1804 dollar's profile than B. Max Mehl. His *Star Rare Coin Encyclopedia* set the numismatic gold standard for self-promotion by convincing collectors and non-collectors alike to pay for what was effectively his buylist, and his direct appeals through mass media such as newspapers and radio put his *Encyclopedia* in hundreds of thousands of homes.

Where B. Max Mehl was a teller of lore, four numismatic scholars in the late 1950s began researching the facts behind the 1804 dollar. At first independent, they joined forces in 1959, and in 1962, authors Eric P. Newman and Ken Bressett, with Walter Breen and Lynn Glaser listed as "associates in research," published *The Fantastic 1804 Dollar*, a scholarly reference that gave the facts of the 1804 dollars as they were known to that time. Shortly before the book's publication, David Spink revealed the existence of a previously unknown 1804 dollar, part of a set of mostly 1834-dated proof coins that had been presented to the King of Siam. The "King of Siam" set was the last but by no means least important piece of evidence included in *The Fantastic 1804 Dollar*, which remains a fundamentally sound reference more than half a century after its initial publication.

Prices for 1804 dollars at auction soared as the decades passed. In 1960, the Davis Restrike 1804 dollar brought \$28,000 at auction, while in 1970 the Mickley Original specimen realized \$77,500. In 1980, at one of the U.S. coin market's great heights, the Berg Restrike example reached \$400,000, while the 1989 offering of the Dexter Original representative saw it go for \$990,000, another bull-market record tantalizingly close to the million-dollar threshold. The Stickney Original piece, which in 1946 was the first five-figure U.S. coin at \$10,500, became the first seven-figure 1804 dollar and the most expensive U.S. coin ever auctioned when it sold as part of the legendary Eliasberg Collection in 1997 for \$1,815,000. The Sultan of Muscat Original, universally considered the best-preserved of 1804 dollars, leapfrogged that price to bring \$4,140,000 in 1999, a record that stood for several years.

#### Origin of the Class I 1804 Silver Dollar

Edmund Roberts (1784-1836) of Portsmouth, New Hampshire, received an appointment from President Andrew Jackson as America's first envoy to the Far East, and successfully negotiated a Treaty of Amity and Commerce with King Nangklao (Rama III) of Siam. The treaty with Siam provided free trade along with other policies, and was concluded on March 20, 1833 at the Royal City, known today as Bangkok. A similar treaty, the Omani-American Treaty of 1834, was concluded with the Sultan of Muscat. Congress ratified both treaties on June 30, 1834.

The U.S. State Department desired gifts for the leaders of both nations. Among a number of other gifts, each leader would receive a set of proof coins dated 1834. There were eight denominations that were current in 1834, from the half cent to the half eagle. Three decades earlier, the Mint had struck silver dollars and eagles, as recorded in the 1804 Mint Report (mintage of silver dollars was officially suspended in 1806, but no coins were struck after 1804). The first 19th century Mint Director, Elias Boudinot, in his annual report indicated that silver dollars were indeed struck in the first quarter of 1804. Included in that annual report was the accounting of Mint Treasurer Benjamin Rush who recorded a production of 19,570 silver dollars.

Today we understand that every one of those 19,570 silver dollars recorded for 1804 were struck from dies bearing the earlier date of 1803, or perhaps even 1802. It was the Mint's practice to continue using dies of earlier dates as long as they were still serviceable, and the 1803-dated dies were clearly adequate to strike nearly 20,000 additional silver dollars. Those dollars were the only silver coins minted in the first quarter of the year, while half dollars, quarter dollars, and dimes were minted in the second quarter, and half dollars alone during the second half of the year.

As the State Department desired to include silver dollars and eagles in the special presentation sets, they requested that the Mint produce 1804-dated silver dollars and eagles. Although eagles bearing the 1804 date had been struck, no silver dollars ever existed with that date. However, Mint engravers busied themselves preparing dies of the old designs for those two denominations.

Luckily, an unfinished obverse die for the eagle, from the 1800-1804 time frame, was still available. It required considerable polishing and reworking to make it serviceable, and the final digit in the date had to be punched in before it could be used to strike coins. This created an anomaly, as the style of the 4 punch had changed over the years, from the Crosslet 4 used in 1804 to the Plain 4 used in 1834. Apparently, this

King Nangklao (Rama III)

Said bin Sultan of Muscat

inconsistency went unnoticed for many years. Early 20th century catalogers, like Thomas Elder, still classified the different varieties of 1804 eagles by subtle differences in star positions, rather than the more obvious Crosslet 4 vs. Plain 4 distinction. John Dannreuther discovered the truth about the 1804 eagle obverse die shortly after his book on *Early U.S. Gold Coin Varieties* was published. Research by Bryce Brown and Bill Nyberg determined that the reverse die used for the 1804 Plain 4 eagle was actually an unused half dollar die leftover from 1806.

Research by R.W. Julian suggests that the Mint engravers may have benefited from some prior developments in the production of the 1804 dollar dies, as well. In 1831 Mint Director Samuel Moore learned that the flow of silver from the United States to the Orient had reversed, and the U.S. was actually importing more silver coinage than it exported. Moore requested that the prohibition against silver dollar coinage be lifted, and both President Andrew Jackson and the Treasury Department replied, authorizing a resumption of coinage of this denomination on April 18, 1831. Julian believes that several dies were prepared in anticipation of this proposed coinage, using most of the same device punches used on pre-1804 Draped Bust dollar dies, but incorporating the new beaded border design instead of the elongated denticles of earlier years. Four obverse dies and two reverse dies were prepared, with one obverse unfinished and the others exhibiting the dates 1802, 1803, and 1804. The unfinished obverse was completed at a much later date and displayed an 1801 date. The two reverse dies, designated as Reverse X and Reverse Y by Eric Newman and Kenneth Bressett, utilized the same device punches, but varied slightly in the placement of the lettering. These dies were apparently intended to strike a sequence of patterns, much like the Gobrecht dollars of 1836, 1838, and 1839. Unfortunately, the incoming flow of silver Moore had noticed was only temporary, the situation soon reverted to the normal imbalance, and the proposed resumption of silver dollar coinage did not materialize in 1831.

These dies were still on hand when the need to strike silver dollars arose in the 1830s, and later dates. The 1804 obverse was used, along with Reverse X, to strike the Class I 1804 dollars for the diplomatic proof sets, circa 1834. Edge lettering was added before the coins were struck, using the old Castaing machine. Unfortunately, because the coins were struck with the close collar technology used by the Mint since the late 1820s, this edge lettering was slightly crushed during the striking process. The same obverse was later employed, along with Reverse Y, to strike the Class II 1804 dollars, circa 1858, without edge lettering. Some of the Class II coins had edge lettering applied at a later date, and were issued as the Class III dollars. The 1801, 1802, and 1803 obverses were used, along with Reverse X, to strike the proof novodels of those dates, circa 1875. Although the 1801, 1802, and 1803 proofs were struck much later, die evidence indicates the 1802 and 1803 dies were actually finished before the 1804 obverse. The top curl of Liberty's hair broke off the bust punch after it was used to create the 1802 and 1803 dies. On the 1804 (and 1801) obverse, the final upward flip of this curl is missing, confirming that the 1802 and 1803 dies were prepared first.

Although the silver dollars and eagles were all struck three decades after the dates shown, they should never be called "restrikes" as the strikes of 1834 were the first from those dies. They should also not be called "originals" as they were not struck in the 1801-1804 time period. The coins are best called novodels, a term most commonly associated with Russian numismatics, meaning coins struck from newly created, back-dated dies.

The number of 1804 Class I silver dollars actually struck in the 1830s is unknown. However, it is highly likely that the mintage figure is the same as the number of pieces known today, or eight coins. Were all eight coins struck in 1834, or were a few pieces struck during the next few years? Either scenario is possible and there are no contemporary records to verify the actual year or years that the Class I coins were minted.

At least two of the Class I coins were released to the State Department for diplomatic purposes in 1834. Another two proof sets were requested for the emperors of Cochin-China and Japan in early 1835, just in time to accompany Edmund Roberts on his mission to Muscat, Siam and other Far Eastern locations. These last sets were never delivered because Roberts died before he could complete his mission (see Bowers' *The Rare Silver Dollars Dated 1804 and the Exciting Adventures of Edmund Roberts* for complete details). The coins were presumably returned to the State Department when Roberts' ship, the U.S.S. Peacock, returned to the United States in November of 1837. It seems most likely that the four extra 1804 dollars (the coins not included in the diplomatic proof sets) were saved by Adam Eckfeldt, and placed in the Mint Cabinet when that collection was formed in June of 1838. Certainly, the Mint retained some pieces for their own purposes, as evidenced by the 1843 trade with Matthew Stickney where he acquired an 1804 silver dollar and the Mint acquired other objects for the National coin collection. Another specimen remained in the National Numismatic Collection and is now on display alongside Class II and Class III specimens at the Smithsonian Institution.

### Class II and III 1804 Dollars

In the late 1850s, only three 1804 dollars were known, one each in the Mint cabinet and the Stickney and Mickley collections. American interest in numismatics was soaring, and demand for rarities was growing. The Philadelphia Mint during this time produced many unofficial restrikes, including 1856 Flying Eagle cents, 1851 and 1852 Seated dollars, and Gobrecht dollars.

About one dozen 1804 dollars were surreptitiously struck circa-1858 at the Mint. These coins had a die rotation of 175 degrees and lightly strike-doubled reverses. They had a plain edge, and used the same obverse die as the Class I 1804 dollars. The reverse die differed from the Class I reverse, most notably in the location of the A in STATES relative to nearby clouds. The infamous "Midnight Minters" of the 1850s did not have access to regular silver dollar planchets. Weights of surviving examples vary between 381.5 and 416.2 grains.

In 1880, Philadelphia dealer S. K. Harzfeld interviewed Mint Superintendent A. Loudon Snowden, the nephew of James R. Snowden, the Mint Director between 1853 and 1861. In the interview, Snowden states:

"About this period an old employee of the mint, a relative of one of the first and most valuable officers of the mint, who had charge of the dies in the engraver's department, was discovered by the sales made by an erring son to have taken impressions from 1804 and some other dies."

Snowden implicitly names George J. Eckfeldt, an Engraving Department foreman in 1858, and his son Theodore Eckfeldt, a night watchman at the Mint. Both were relatives of Adam Eckfeldt, an important officer in the Mint's early decades.

Well-known Philadelphia dealer and writer Ebenezer Locke Mason was more explicit about the clandestine goings-on in the Mint. In the June 1882 issue of *Mason's Coin Collectors' Magazine*, he writes "here was offered by young Eckfeldt [in 1860] three genuine U.S. 1804 dollars at \$70 each and nearly all the rare [proof restrike] ½ cents in dozens of duplicates were purchased."

In 1861, James Pollock became Mint Director. In November 1861, he received a letter from the Boston Numismatic Society complaining about "abuses which have of late years been practiced at the Mint, whereby numbers of pattern pieces, and coins from dies of former years, have been freely struck, and disposed of by employees of the Mint to dealers who have sold them at great prices. Two years since, members of this society were offered specimens of the dollar of 1804 ... two of which had been sold for \$75 each."

Robert Coulton Davis was authorized to secure the recently struck and sold 1804 dollars. According to William DuBois, curator of the Mint cabinet, four coins were recovered. Three of these were melted, and one piece went into the cabinet. This is the only known Class II example, the plain-edge underweight coin overstruck on an 1857 Swiss shooting thaler.

The December 1885 issue of *Numisma* reports "J. N. T. Levick authorizes us to say that [an 1804 dollar] was offered him in 1869," but he declined to purchase it "because he saw at a glance that it was a restrike," presumably because of its plain edge. The remaining, unsold cache of 1804 dollars struck in 1858 needed edge lettering to become acceptable to collectors. Before 1875, the coins were acquired by

James Ross Snowden  
Mint Director, 1853-61,  
during the activities of the  
infamous "Midnight Minters"

Captain John W. Haseltine, a leading Philadelphia dealer.

Henry R. Linderman became Mint Director in April 1873, and proved more amenable to restrike activity than his predecessor Pollock. The plain-edge 1804 dollars, struck circa-1858, acquired edge lettering circa-1875 at the Mint via a Castaing machine and edge dies retained since the mintage of Draped Bust dollars that ended in 1804. The newly edge-lettered coins are now known as Class III dollars.

Linderman died in 1879, and his estate included a Class III 1804 dollar, presumably his reward for aiding Haseltine's activities. Another example went to William Idler, an important Philadelphia coin dealer and Haseltine's father-in-law. Idler had helped sell the plain edge 1804 dollars between 1858 and 1860.

The remaining four Class III specimens were carried as pocket pieces until they had XF sharpness, to pass as "original" 1804 dollars found in circulation. The Berg specimen was given a pedigree from Koch & Co. of Vienna, Austria, when it was sold in 1883. This same coin was originally offered in 1876 and was said to originate from an English collection. Its early pedigree is often confused with the Phineas Adams example, which was later owned by Waldo C. Newcomer and Col. Green. The Colonel Ellsworth specimen, which first emerged in 1893, was claimed to have come from a freed slave and his son.

### Ownership History of the Mickley 1804 Dollar

#### Joseph J. Mickley

Joseph Mickley

Although Stickney's discovery of the 1804 dollars in the Mint Cabinet is more famous and well-documented, it is possible that Joseph Mickley discovered the coins two years before Stickney made his landmark visit. Born in 1799, Mickley began collecting coins in 1816, when he tried to acquire a cent from the date of his birth for a keepsake. As Mickley soon learned, the 1799 large cent is the most elusive date in the entire series, and the difficulty he experienced in finding one piqued his interest in coin collecting in general. His collecting activities in the 1820s were probably not as extensive as some collectors, like Stickney or Robert Gilmor, because he did not have the financial resources to collect at that level as a young man. We know he had a collection of silver dollars by 1827, however, and he undoubtedly pursued his collecting interests in a modest way until he became a successful businessman himself. His name was not included on the list of prominent numismatists that Dubois provided to Matthew Stickney in 1843, but his activities undoubtedly increased throughout the following decade. By the time of the Dr. Lewis Roper Sale (Moses Thomas & Sons, 2/1851), the first significant coin auction held in the United States, he had become the most prolific buyer of U.S. coins in the country and he purchased the lion's share of American coins in the sale. His collection was the most complete and well-known gathering in the United States by the 1860s.

A study of the visitor's log of the Philadelphia Mint reveals that Joseph Mickley's first documented visit to that establishment occurred on May 29, 1841, when he accompanied his brother Jacob, who was visiting from the Mickley's ancestral home in Lehigh County, Pennsylvania. The Mickley brothers were probably sightseeing while Jacob was in town and Joseph would have had a keen interest in the Mint Cabinet, which had been open to the public for almost three years by this time. Exactly when the four extra Class I dollars were placed in the Mint Cabinet cannot be determined with certainty. The coins should have been on hand in June of 1838, when the collection was formally established, but French numismatist Alexandre Vattemare reported he did not see an example when he visited the Mint that year. If the 1804 dollars were not immediately placed in the Mint Cabinet when the collection was opened to the public, we know at least two of them were included by the early 1840s, when Eckfeldt and Dubois wrote their book and Stickney made his

trade. Mickley made no public mention of his 1841 visit but, since he had been collecting silver dollars since the 1820s, we know he would have appreciated the rarity and importance of the 1804 dollar, which was almost certainly on display by that time. We know from Stickney's visit two years later that the curators of the Mint Cabinet were not parting with 1804 dollars lightly, and it seems unlikely that Mickley would have tried to acquire such an expensive issue at that time, but this visit probably made him aware of the 1804 dollar and he would have been on the lookout for one in later years. From a business journal Mickley kept from 1841 to 1848 we know he purchased a copy of the *Mint Book* on February 28, 1845 but, unlike Stickney, he probably already knew about the 1804 dollar from his 1841 visit to the Mint. In all, Mickley is recorded as making 11 visits to the Philadelphia Mint from 1841 to 1848. He likely made many more visits during the next 20 years. With his ingratiating personality, winning ways, and vast local network of personal and business connections, it seems certain that after some of those visits, he walked home with a few more baubles and a bit less cash in his pockets.

According to several 19th century sources the present coin, which Mickley eventually purchased for his collection, surfaced in a bank deposit at the Bank of Pennsylvania around October of 1847. The cashier, a Mr. Henry C. Young, recognized the coin as something special, as Mickley had given him a list of coins to watch for. Young pulled the coin out of the deposit, apparently for face value.

The numismatic community in this country was still very small in the 1840s and early 1850s. Although several well-known businessmen made occasional offerings of rare coins in their shops and auction catalogs, most students of the hobby consider Edward Cogan the first full-time coin dealer in the United States, starting around 1858. With no organized system of dealers to supply the needs of the collecting community, it was common practice for earlier collectors to establish relationships with bullion brokers and bank tellers to look out for the coins they needed for their collections, paying a small premium for any coins that could be obtained in this manner. Since Mickley lived in Philadelphia, where the Bank of Pennsylvania was located, he undoubtedly had such an arrangement with the tellers of the bank, including Henry C. Young. The exact details of the transaction were related by Young in an article in the *Philadelphia Press*, September 7, 1885 edition.

Mickley published a pamphlet titled *Dates of United States Coins and Their Degrees of Rarity* in 1858, which Q. David Bowers has called the "earliest version of a rarity scale." The work was basically a snapshot of Mickley's collection in 1858 and he based the rarity values on his experience in acquiring the coins over the years. He gave the 1804 dollar his highest rating of "Very Rare."

It was in 1867 when the "great robbery" happened, one that sapped much of Mickley's passion for numismatics. In brief, a great assortment of rare coins, mostly foreign, was stolen from his residence on April 13, 1867. The cost of the stolen coins was put at \$19,000; their market value was far greater. Chilled from the idea of further collecting, Mickley sold his remaining coins to W. Elliot Woodward. Numismatic auction expert John Adams has judged Mickley's collection of U.S. and world coins the "best all around" and "perhaps the greatest U.S. collection." The greatest tribute written about Mickley, however, was not about his remarkable coin collection:

"The late Joseph J. Mickley comprised qualities at once more attractive and more unusual than are often met with in one person. ... in Philadelphia he was most of all admired for his delightful social qualities and his extensive information on a surprising variety of topics. During forty years his house was a rendezvous for a numerous group of specialists—not alone in his favorite pursuits, which, indeed, were both many and diverse, but in any and every department of art or learning."

**William Lilliendahl: Collector Par Excellence**

William Lilliendahl was an early collector who compiled one of the finest collections of his era. He liquidated the bulk of his numismatic holdings in 1862 and 1863. The 1862 sale included proof 1851, 1852, and 1854 dollars, a proof 1831 half cent and proof 1834 cent, two 1793 Chain cents (one the AMERI. variety), three Wreath cents, a 1793 Liberty Cap cent, and three 1799 cents.

The 1863 Lilliendahl sale likewise included a plethora of numismatic rarities. Included was a 1794 dollar, a 1796 and 1797 half dollar, two 1796 quarter dollars, an 1802 half dime, three Chain cents, three Wreath cents, three 1793 Liberty Cap cents, two 1799 cents, one described as "undoubtedly the most perfect specimen ever offered at public sale", a run of 17 proof Large cents, and an Uncirculated 1793 half cent.

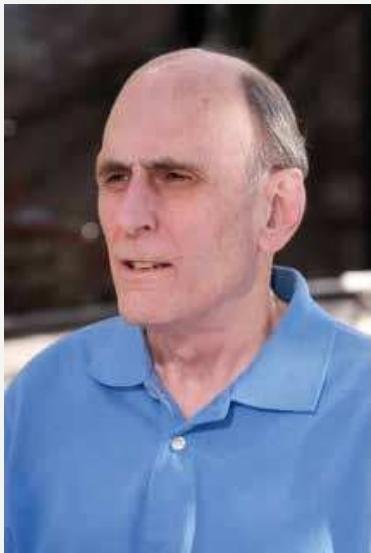

Despite selling major portions of his collection in 1862 and 1863, Lilliendahl continued to acquire numismatic prizes, highlighted by his purchase of the Mickley 1804 dollar in 1867. Bowers (1999) comments on Lilliendahl's dynamic numismatic interests:

"Similar to the style of Lorin G. Parmelee, J. Carson Brevoort, and Charles I. Bushnell, among others, Lilliendahl selected needed items and then sold or consigned the balance to be auctioned. Moreover, his interests evolved, and sometimes as one series was completed or a challenge was met, he would sell those items and go on to something else."

Lilliendahl sold Mickley's 1804 dollar to coin dealer Edward Cogan, circa 1868. Cogan soon placed the coin with Boston collector William Sumner Appleton.

**William Sumner Appleton**

William Sumner Appleton was born to wealthy parents in Boston in 1840 and graduated from Harvard in 1860. He never pursued a business career, devoting his time to the study of numismatics and history instead. His numismatic interests were varied, and he collected medals, Colonials, world, and ancient coins, as well as U.S. federal issues. He purchased Joseph Mickley's collection of American gold coins in a private transaction with W. Elliot Woodward before the 1867 sale of that collection took place. He acquired Mickley's 1804 dollar from Edward Cogan in 1868, in trade for some duplicate coins valued at \$775. He wrote many articles in the *American Journal of Numismatics* and served on the publishing committee from 1870-1891. He sold Mickley's gold collection to collector/dealer John C. Schayer in 1883. He died in Boston in 1903. Much of his collection, including the Mickley 1804 dollar, was bequeathed to the Massachusetts Historical Society after his death.

**Reed Hawn**

Reed Hawn

The present Mickley specimen was at one time thought to be off the market forever. William Sumner Appleton donated the piece to the Massachusetts Historical Society in 1905. In 1970 the Society explained their reasoning for deaccessioning this famous dollar as well as many other valuable coins. In the Foreword to the catalog the President of the Society explained, "the Society's coins have been very little used by scholars in recent decades. Nor does the Society have facilities for showing them to the general public. In 1965 the danger of theft became so apparent that the collection was placed in the vaults of a Boston bank. ... The choice appeared to be to keep them in dead storage indefinitely or to expose them to the probable danger of theft." A third choice was to deaccession their non-Massachusetts numismatic holdings, and the 1804 dollar William Appleton had bequeathed in 1905 was released for sale by the Boston Probate Court and subsequently offered at public auction. The coin was purchased by a still-anonymous "Chicago Collector" for \$77,500. The underbidder in the 1970 sale was 21-year old Reed Hawn.

More than three years later, Reed Hawn bought the coin in a private transaction. Ben Stack sold him the Mickley 1804 dollar in January 1974 for an undisclosed amount. Hawn's business interests include oil, gas, and other interests. At a young age Hawn resolved to make money as a collector and investor in rare coins. When he was 17 years old, he struck a deal with Ben Stack that if he would help him build the best possible collection, he would sell the coins back through Stack's auctions. His first offering of coins at public auction was in 1971 of his duplicates. To date, he has sold six named (and one unnamed) collections through Stack's, one auction through Quality Sales (in a nod to one of Hawn's mentors, Jerry Cohen), a numismatic literature collection through George Kolbe, and his Texas currency through Heritage. Hawn's approach to investing was best summed up in David Ganz's *Rare Coin Investing*: "The great rarities, a real honor to own, were basically calling cards to get bidders interested in the auction sale." Ganz explains: "What he meant was a \$65 coin that sold on auction for \$650 — a ten-fold increase — was hard to equal in percentage terms on a \$2,500 coin or even a \$100,000 coin (which would have to jump to a million dollars to give the same rate of return)." Hawn's plan worked. He consigned the Mickley Class I dollar and his 1913 Liberty nickel to the same October 1993 auction, assuring maximum exposure for his other coins, especially his Barber quarter collection that was 20 years in the making.

After 19 years of ownership, Reed Hawn's name was firmly attached to the Mickley 1804 dollar, and the coin has since been called the Mickley-Hawn dollar. In 1993 he put the piece up for public auction, and it was bought by another colorful collector, David Queller

**David Queller**

David Queller assembled impressive collections of half dollars, dollars, and patterns. The dollars formed one of the most comprehensive and highest-graded sets ever assembled. More than an individual effort, the collection was called The Queller Family Collection of Silver Dollars, and for good reason: Queller's son pushed him to buy the Mickley-Hawn dollar, and provided some of the financing with the help of his sisters. Queller paid \$475,000 for the coin in 1993.

**Physical Description**

Deep silver-gray patina covers the surfaces of this attractive coin. Closer examination reveals subtle iridescence and strong undercurrents of golden-tan patina. The left obverse field shows a strong element of bold blue, and areas of dusky pewter-gray appear around the peripheral devices. Minor, scattered contact marks are present on the obverse, though only a few of them would attract attention if this were a circulation strike. They appear in pairs, two on Liberty's cheek and two to the left of the hollow of Liberty's neck.

On the reverse, three reeding marks appear in the field between the shield and the olive branch, and a few smaller points of contact are present elsewhere in the fields. Such minor flaws are consistent with the discovery of this piece by Bank of Pennsylvania teller, Henry C. Young, in a mixed deposit with other coins in 1847. Both sides are luminous beneath the patina with a distinct, glossy sheen. Slight striking softness at the uppermost parts of the design and the star centers is consistent with other examples of Original or Class I 1804 dollars. A thin die crack — one that is

David Queller

present on both Original and Restrike pieces — passes across the tops of stars 5 through 7 and all but the last letter of LIBERTY.

The lettering on the edge is “crushed,” the result of a lettered-edge planchet entering a press with a smooth collar. The strike squeezed and distorted the edge design, rendering many letters unreadable—a distinctive diagnostic for the Class I 1804 dollars. The coin’s holder precludes viewing of this detail, but Bowers describes it in *The Rare Silver Dollars Dated 1804 and the Exciting Adventures of Edmund Roberts*, which was published before this piece’s encapsulation.

#### Roster of 1804 Dollars

The 15 known 1804 silver dollars include eight examples of Class I, one of Class II, and six of Class III. There are six 1804 silver dollars in museums and nine in private hands. This roster updates the historical record from the Chicago Signature (Heritage, 8/2013), lot 5699.

#### Class I - The Diplomatic Presentation Strikings

##### 1. Sultan of Muscat Specimen

**PR68 PCGS.** Chief Coiner Adam Eckfeldt; U.S. Department of State, c/o Edmund Roberts; Sayyid Sa’id-bin-Sultan (Sultan of Muscat), as part of a cased presentation set; unknown intermediaries; Charles A. Watters of Liverpool, England; Watters Collection (Glendining & Co., London, 5/1917), lot 227, realized £330; Henry Chapman (6/1918); Virgil Brand; Brand Estate; Armin W. Brand; Horace Louis Philip Brand; Ruth and Charles Green; Charles Frederick Childs; F. Newell Childs; Charles Frederick Childs II; Walter H. Childs; Childs Collection (Bowers and Merena, 8/1999), lot 458, realized \$4,140,000; Mack and Brent Pogue; D. Brent Pogue Collection, Part IV (Stack’s Bowers, 5/2016), lot 4020, failed to meet the reserve.

##### 2. King of Siam Specimen

**PR67 PCGS.** Part of the King of Siam cased presentation set. Chief Coiner Adam Eckfeldt; U.S. Department of State, c/o Edmund Roberts; King Phra Nang Klae (Rama III) of Siam; presumed remaining in the family until about 1950; David F. Spink and family, who acquired the set privately; private collector, possibly Elvin I. Unterman, via agent Lester Merkin; King of Siam Sale (Bowers and Merena, 10/1987), lot 2209, not sold; Rarities Group (Martin Paul) and Continental Rarity Coin Fund I (Greg Holloway); Father Flanagan’s Boy’s Home Sale (Superior, 5/1990), lot 3364, realized \$3,190,000 for the entire King of Siam set; Iraj Sayah and Terry Brand; January-February Auction (Superior, 1/1993), lot 1196; Spectrum Numismatics; private western collection (2001); Goldberg Coins (privately, 11/2005) to Steve Contursi and private collector.

Note: many researchers have speculated that this coin may have passed to Mrs. Anna Leonowens, of *The King and I* musical fame, sometime in the 19th century. David Spink purchased the coin from two elderly ladies in England who were reported to be her descendants. This connection, while theoretically possible, is regarded as highly conjectural today.

##### 3. Stickney Specimen

**PR65 PCGS.** Chief Coiner Adam Eckfeldt; Matthew Adams Stickney (1843); Stickney Collection (Henry Chapman, 6/1907), lot 849, realized \$3,600; Col. James W. Ellsworth; Wayte Raymond; William Cutler Atwater; Atwater Estate; Atwater Collection (B. Max Mehl, 6/1946), lot 213, realized \$10,500; Louis E. Eliasberg, Sr.; Eliasberg Estate; Eliasberg Collection (Bowers and Merena, 4/1997), lot 2199, realized \$1,815,000; Spectrum Numismatics; private collection.

##### 4. Dexter Specimen

**PR65 PCGS.** Chief Coiner Adam Eckfeldt; unknown intermediaries, possibly S.H. and H. Chapman; 46th Auction (Adolph Weyl, 10/1884), lot 159, realized \$216; S.H. and H. Chapman; Chapman Sale (Chapman Brothers, 5/1885), lot 354, realized \$1,000; Scott Stamp & Coin Company; James Vila Dexter; Dexter Estate; H.G. Brown; H.G. Brown Collection (Lyman H. Low, 10/1904), lot 431, realized \$1,100; William Forrester Dunham; B. Max Mehl; Dunham Collection (B. Max Mehl, 6/1941), lot 1058, realized \$4,250; Charles M. Williams; Abe Kosoff and Sol Kaplan; Harold Bareford; Bareford Collection (Stack’s, 10/1981), lot 424, realized \$280,000; RARCOA (Ed Milas); Leon Hendrickson and George Weingart; Auction ‘89 (RARCOA, 7/1989), lot 247, realized \$990,000; American Rare Coin Fund, Ltd. (Hugh Sconyers, manager); Northern California collector; Baltimore Auction (Superior, 7/1993), lot 551, not sold; Northern California collector; U.S. Coin Auction (Superior, 5/1994), lot 761; Harlan White; private southeastern collection; 65th Anniversary Collection (Stack’s, 10/2000), lot 1167, realized \$1,840,000; Mack and Brent Pogue; D. Brent Pogue Collection, Part V (Stack’s Bowers, 3/2017), lot 5045, realized \$3,290,000, to Kevin Lipton and John Albanese; Bruce Morelan through Legend Numismatics.

##### 5. Parmelee Specimen

**PR64 ICG.** Chief Coiner Adam Eckfeldt; unknown intermediaries; “an aged lady” who gave the coin to her son; E. Harrison Sanford; Sanford Collection (Edward Cogan, 11/1874), lot 99, realized \$700; Lorin G. Parmelee; Parmelee Collection (New York Coin & Stamp Co., 6/1890), lot 817, realized \$570; Byron Reed; Omaha City Library; Western Heritage Museum.

##### 6. Mickley Specimen, the Present Example

**PR62 NGC.** Chief Coiner Adam Eckfeldt; unknown intermediaries; Henry C. Young, a teller at the Bank of Pennsylvania (circa 1850); Joseph J. Mickley (circa 1858); Mickley Collection (W. Elliot Woodward, 10/1867), lot 1676, realized \$750; William A. Lilliendahl; Edward Cogan (1868); William Sumner Appleton (1868); Massachusetts Historical Society (1905); Massachusetts Historical Society-Maryland Collector Auction (Stack’s, 10/1970), lot 625, realized \$77,500; Chicago collection; Reed Hawn, in a private treaty transaction via Stack’s in 1974; Hawn Collection (Stack’s, 10/1993), lot 735, realized \$475,000; David Queller; Queller Family Collection (Heritage, 4/2008), lot 2089, realized \$3,737,500; Chicago Signature (Heritage, 8/2013), lot 5699, realized \$3,877,500. **The present coin.**

##### 7. Mint Cabinet Specimen

**Impaired Proof**, per conventional wisdom. Chief Coiner Adam Eckfeldt; Mint Cabinet; National Numismatic Collection; Smithsonian Institution.

##### 8. Cohen Specimen

**PR30.** Chief Coiner Adam Eckfeldt; unknown intermediaries; Edward Cohen, Richmond, Virginia; Col. Mendes I. Cohen, Baltimore, Maryland; Cohen Collection (Edward Cogan, 10/1875), lot 535, realized \$325; Henry S. Adams; Adams Collection (Edward Cogan, 11/1876), lot 356, realized \$500; Lorin G. Parmelee; Henry G. Sampson; Major William Boerum Wetmore; Wetmore Collection (Chapman Brothers, 6/1906), lot 208, realized \$720; S.H. and H. Chapman; Thomas L. Elder; James H. Manning; Manning Collection (B. Max Mehl, 5/1921), lot 778, realized \$2,500; Elmer S. Sears; B. Max Mehl; Lammot DuPont; Willis H. DuPont; unknown thieves, recovered in Zurich, Switzerland, on April 23, 1993; donated to the American Numismatic Association museum.

#### Class II - The So-Called First Restrike

##### 9. Mint Cabinet Specimen

**Proof.** National Numismatic Collection; Smithsonian Institution. Struck over an 1857 Bern, Switzerland, shooting thaler.

**Class III - The So-Called Second Restrikes****10. Linderman Specimen**

**PR63.** Mint Director Henry R. Linderman; Linderman Estate; Linderman Collection (Lyman H. Low, 6/1887), lot 40, not sold; Linderman Collection (J.W. Scott, 2/1888), lot 40, realized \$470; James Ten Eyck; Ten Eyck Estate; Ten Eyck Collection (B. Max Mehl, 5/1922), lot 394, realized \$840; Lammot DuPont; Willis H. DuPont; unknown thieves; recovered March 16, 1982; loaned to American Numismatic Association; donated to Smithsonian Institution.

**11. Idler Specimen**

**PR60** or slightly finer. Philadelphia Mint; William K. Idler; Captain John W. Haseltine; Stephen K. Nagy; Henry O. Granberg; William Cutler Atwater; Atwater Estate; Atwater Collection (B. Max Mehl, 6/1946), lot 214, realized \$2,875; Will W. Neil; Neil Collection (B. Max Mehl, 6/1947), lot 31, realized \$3,125; Edwin Hydeman; Hydeman Collection (Abe Kosoff, 3/1961), lot 994, reportedly sold for \$29,000, actually bought in; Edwin Hydeman; World-Wide Coin Investments, Ltd. (John Hamrick and Warren Tucker); Bowers and Ruddy Galleries; Continental Coin Galleries; Mark Blackburn; Larry Demerer; Dr. Jerry Buss, via Superior Galleries; Buss Collection (Superior Galleries, 1/1985), lot 1337, realized \$308,000; Aubrey and Adeline Bebee; American Numismatic Association.

**12. Adams-Carter Specimen.**

**PR58 PCGS.** Philadelphia Mint; Captain John W. Haseltine; Phineas Adams; Henry Ahlbom; John P. Lyman; Lyman Collection (S.H. Chapman, 11/1913), lot 16, realized \$340; Waldo C. Newcomer; Col. Edward H.R. Green; Col. Green Estate; A.J. Allen; Frederick C.C. Boyd; Percy A. Smith; B. Max Mehl; Golden Jubilee Sale (B. Max Mehl, 5/1950), lot 804, realized \$3,250; Amon G. Carter, Sr.; Amon G. Carter, Jr.; Carter Estate; Carter Collection (Stack's, 1/1984), lot 241, realized \$198,000; John Nelson Rowe, III; L.R. French, Jr.; French Estate; French Collection (Stack's, 1/1989), lot 15, realized \$242,000; Rarities Group (Martin Paul); National Gold Exchange (Mark Yaffe); Heritage Rare Coin Galleries; Indianapolis Collection; unknown private collection; David Liljestrand; unknown Midwest collection; David Liljestrand; National Gold Exchange and Kenneth Goldman; Legend Numismatics; Phillip Flannagan; Flannagan Collection (Bowers and Merena, 11/2001), lot 4303, realized \$874,000; Donald H. Kagin, Ph.D.; Baltimore ANA Auction (Bowers and Merena, 8/2003), lot 2026, realized \$1,207,500; West Coast collector, via Kevin Lipton; Heritage Rare Coin Galleries; East Coast collector in March 2006; Central States Signature (Heritage, 4/2009), lot 2567, realized \$2,300,000, to John Albanese.

**13. Berg Specimen**

**PR55 NGC.** Philadelphia Mint; possibly (but doubtful) Koch & Co., Vienna; Captain John W. Haseltine who displayed the coin at Edward Cogan's Jewett Sale in January 1876, along with a set of 1801, 1802, and 1803 proof novodels, claiming the coins came from a collection in England; Centennial Sale, Part I (John W. Haseltine, 3/1876), lot 194, realized \$395; O.H. Berg; Berg Collection (John W. Haseltine, 5/1883), lot 568, realized \$740; George W. Cogan; Thomas Harrison Garrett; Garrett Estate; Robert Garrett; John Work Garrett; Johns Hopkins University; Garrett Collection, Part II (Bowers and Ruddy, 3/1980), lot 698, realized \$400,000; Pullen & Hanks, later with Sam Colavita; Public Auction (Pullen & Hanks, 2/1982), lot 1076, realized \$190,000; Sam Colavita; Mike Levinson, in trade for eight acres of land in El Paso, Texas; Pennsylvania private collection; Harry Einstein Collection (Bowers and Merena, 6/1986), lot 1736, realized \$187,000; Rarities Group (Martin Paul); American Coin Portfolios (Dan Drykerman); Laura Sommer; Chicago ANA Convention Auction (Stack's Bowers, 8/2014), lot 13146; realized \$1,880,000.

**14. Davis Specimen**

**PR40.** Philadelphia Mint; probably, Captain John W. Haseltine; Robert Coulton Davis; John W. Haseltine; George M. Klein; Vicksburg Collection, Part I (W. Elliot Woodward, 5/1888), lot 1940, realized \$660; Robert Coulton Davis, via J. Colvin Randall; Davis Estate; John W. Haseltine; John M. Hale; Hale Estate; R.H. Mull; Public Auction (Parke-Bernet Galleries, 5/1950), lot 221, realized \$3,400; Mrs. Fullerton, daughter of H.P. Graves, purchased for her father; Henry P. Graves; Graves Estate; Davis-Graves Collection, Part I (Stack's, 4/1954), lot 1333, realized \$8,000; Ben H. Koenig; Fairbanks Collection (Stack's, 12/1960), lot 576, realized \$28,000; Samuel Wolfson; Wolfson Collection, Part II (Stack's, 5/1963), lot 1394, realized \$36,000; Norton Simon; James H.T. McConnell, Jr., via Stack's.

**15. Ellsworth Specimen, a.k.a. Driefus-Rosenthal Specimen**

**PR40.** Philadelphia Mint; unknown intermediaries; W. Julius Driefus; Isaac Rosenthal; Col. James W. Ellsworth; Wayte Raymond; Farran Zerbe, via Guttag Brothers; Chase National Bank; American Numismatic Society.

**From An Important New York Collection.** NGC ID# 24XH, PCGS# 6907

## GOBRECHT DOLLARS

**1836 Name Below Base Gobrecht Dollar  
Judd-58, Unc Details**

**4004** 1836 Name Below Base, Judd-58 Restrike, Pollock-61, R.6(?) — Rim Repaired — PCGS Genuine. Unc Details. Die Alignment IV (center of Liberty's head opposite right side of F in OF). Die State B. This state shows only faint traces of the die cracks that connect ITED, STATES O, and LLAR; all other die characteristics seen in Die State A have been lapped away. These curious pieces were first offered at public auction by Ed Cogan in December 1859, placing the striking period for them in either 1858 or 1859. The strike details are remarkably well-defined, but each side shows numerous small abrasions. Something, we aren't quite sure what, happened on the upper-obverse rim and then it was repaired. Light gray patina overall with streaks and dabs of deeper gray patina interspersed.

**1836 Gobrecht Dollar, PR25  
Judd-60 Original, Die Alignment I**

**4005** 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1, PR25 PCGS Secure. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the O in DOLLAR). Die State C. This early die state shows the rim nicks over the second T in STATES and the dentil chip; however, no clear indication of the diagonal die clash mark is apparent. But let's underscore the word apparent. The surfaces are abraded, as one would expect for a PR25, and there are a couple of shallow, angling marks above the eagle's wing, but nothing that looks raised above the field as one would expect from the next die-clashed die state. Otherwise, the fields are lightly toned with sharply contrasting brilliant high points on each side. NGC ID# BLWV, PCGS# 11225

**1836 Gobrecht Dollar, PR30  
Judd-60 Original, Coin Alignment, Die State B**

**4006** 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1, PR30 PCGS. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the O in DOLLAR). Die State B. This early die state shows only one diagnostic, tiny die chips in the dentils above the final A in AMERICA. This is a scarcer die state, struck in the early part of the final week of 1836. Even on high-grade 1836 Gobrecht dollars field reflectivity is minimal; on this piece it has been completely subdued by extensive time the coin spent in the channels of commerce. However, unlike many Gobrecht dollars there are minimal, grade-consistent marks and the color is attractive gray-gold with none of the dark, oppressive color seen on some examples. Even friction shows over the high points of the design. NGC ID# BLWV, PCGS# 11225

## SEATED DOLLARS

**1857 Silver Dollar, MS62  
Prooflike Fields**

**4007 1857 MS62 PCGS Secure. OC-2, R.3.** Most circulation-strike 1857 silver dollars are from this die pair, which is distinguished from OC-1 by date placement and several minor die lines that are visible on each side with a loupe. This piece is deeply prooflike but weakly struck on Liberty's head and the stars. The coin is brilliant and appealing for the grade, although some semicircular lines are visible on the obverse under a loupe, preventing a finer numeric designation. The 1857 Seated dollar is scarce across the Mint State spectrum, despite a mintage of 94,000 coins. Population: 18 in 62, 23 finer (4/18). NGC ID# 24YW, PCGS# 6945

**1870-CC Seated Dollar, MS61  
Sought-After Inaugural CC Issue  
Colorful Toning**

**4008 1870-CC MS61 ANACS. OC-2, R.5.** There is the only obverse with the right base of the 1 positioned just left of center over the dentil. The reverse features a Wide CC mintmark. From a mintage of 12,462 coins, the 1870-CC is a better date in the Seated Liberty dollar series, but it is most actively pursued because of its status as the first silver dollar issue from the Carson City Mint. Osburn and Cushing estimate that 20 or fewer examples survive in Uncirculated condition, the finest among them in MS64.

This MS61 Seated dollar is richly toned in a medley of multicolor hues that include blue, green, violet, and golden-orange. Minor softness appears on the left-hand stars and Liberty's head but the reverse is better-struck, as usual. Wispy marks beneath the patina limit the grade. Housed in a small-sized holder.

**From The Bob Williams Collection.** NGC ID# 24ZE, PCGS# 6964

1870-CC Seated Dollar, MS62  
Prooflike Surfaces, Sought-After Inaugural CC Issue  
Shared Obverse With the 1870-S Dollar

**4009** 1870-CC MS62 PCGS. OC-1, Low R.4. Osburn-Cushing Die State a/a. The 1870-CC is scarce in its own right, with a mintage of just 12,462 pieces, but in an interesting numismatic twist, the obverse die used to strike the present coin is the same obverse die used to coin the ultra-rare 1870-S dollars, of which just 9 pieces are verified.

After striking a limited number of silver dollars in Carson City — making the present example one of the first coins struck at that historic mint — the die was pulled and sent to San Francisco. The San Francisco Mint lacked an 1870 silver dollar obverse die for ceremonies and mementos planned for laying the cornerstone at the new “Granite Lady,” which was nearing completion. The festivities required examples of all denominations. Correspondence between San Francisco Mint Superintendent A.H. LaGrange and Carson City Mint Superintendent Abraham Curry suggests that the two mints cooperated to obtain the needed 1870 obverse. Indeed, die markers on this 1870-CC OC-1 example match those on 1870-S dollars as viewed in Heritage’s photographic archives.

Silver dollars were struck intermittently throughout 1870 at the Nevada Mint. Research by R.W. Julian shows that dollars were struck on at least 11 different occasions during the year. To date, nine distinct die pairs are known. The current piece is clearly prooflike throughout both sides, although not designated as such on the previous-generation PCGS holder. Lovely champagne-gold toning covers both sides, and the obverse strike is sharper than normal for the issue. Only light weakness exists at Liberty’s head and the surrounding stars, and some light hairlines mix with faint die polish lines. We expect intense competition among Carson City enthusiasts when this visually impressive lot is called. Population: 8 in 62, 8 finer (5/18).

*From The Bob Williams Collection.* NGC ID# 24ZE, PCGS# 6964

1872 Seated Dollar, MS64+  
Overlay of Lavender-Gray Patina  
Rare Any Finer

**4010** 1872 MS64+ PCGS Secure. OC-7, R.2. The right base of the 1 is just left of center, and a lump appears inside the bottom loop of the G in GOD. In the case of the 1872, a high mintage does correspond to the issue's availability. With 1.1 million coins struck and an estimated 5,500 circulation strikes extant, this is one of the most widely collectible dates in the Seated dollar series. Examples can be found through MS64, but anything finer, including MS64+, is rare.

This splendid near-Gem dollar with a Plus designation from PCGS features an overlay of original lavender-gray patina with occasional golden accents. As usual, the star centers and Liberty's head are incomplete. Better detail appears on the reverse. This is an excellent option to represent the Motto type. Population: 43 in 64 (7 in 64+), 4 finer (5/18). NGC ID# 24ZJ, PCGS# 6968

1873-CC OC-1 Seated Dollar, XF45  
Final Issue of the Type

**4011** 1873-CC XF45 NGC. OC-1, High R.4. The only known dies. The Carson City Mint produced a mere 2,300 Seated Liberty silver dollars in 1873, the final year of the design. The 1873-CC is the rarest Carson City issue of the series and is often found cleaned or damaged. The key to collecting is patience to find just the right problem-free example. The present piece is such a coin, showing no evidence of cleaning or other tampering. Scattered handling marks are consistent with the grade of this attractive light gray silver dollar that exhibits delicate champagne toning and traces of mint luster. Census: 3 in 45, 12 finer (5/18). NGC ID# 24ZN, PCGS# 6972

## PROOF SEATED DOLLARS

1858 Silver Dollar, PR64 Cameo  
Osburn-Cushing P1

**4012** 1858 PR64 Cameo NGC. CAC. OC-P1, Low R.4. Two die varieties are known for the small mintage of 1858 Seated Liberty silver dollars that were only produced in proof format. At one time it was believed that just 80 proofs were struck during the year, but the lack of Mint records means the actual production quantity is unknown. Based on the number of survivors, most numismatists now believe the mintage was in the range of 300 coins. PCGS has certified 110 examples in all grades, while NGC has examined 76 pieces. Only 11 of the 186 certified pieces are designated as Cameo proofs, and there are no Deep Cameo examples at either service. This Choice Cameo proof has deeply mirrored fields that frame the lustrous, champagne-toned devices, creating excellent eye appeal. Census: 4 in 64 Cameo (1 in 64+), 3 finer. CAC: 4 in 64, 1 finer (5/18). NGC ID# 252C, PCGS# 87001

1865 Seated Dollar, PR64+ Cameo  
Thickly Frosted, Profound Contrast

**4013** 1865 PR64+ Cameo PCGS Secure. CAC. OC-P2, R.3. The proof mintage for this final No Motto issue was 500 specimens. Osburn and Cushing estimate that 325 proofs survive. This Choice representative very nearly qualifies for the next highest grade level. Its brilliant surfaces show minimal signs of contact. The devices are fully struck and covered in a thick layer of frost, standing out against the deep, mirrorlike fields. A spindly lint mark occurs behind the eagle's head. Population: 18 in 64 (3 in 64+) Cameo, 9 finer. CAC: 7 in 64, 6 finer (5/18). NGC ID# 252K, PCGS# 87008

1869 Seated Dollar, PR64+  
Beautiful Toning

**4014** 1869 PR64+ PCGS. CAC. OC-P2, R.4. Only 600 proof Seated Liberty dollars were struck in 1869, but the issue is seen more frequently than the mintage would suggest. Dick Osburn and Brian Cushing note, "In our opinion, the statistics for this date probably include as many or more re-submissions as those for any date in the series. We've also noted numerous early business strikes misattributed as proofs by the grading surfaces, further inflating the proof population numbers." This Plus-graded Choice specimen offers sharp design elements and well-preserved surfaces, under vivid shades of golden-russet, amber, ocean-blue, and violet toning. NGC ID# 252R, PCGS# 7017

**1869 Seated Liberty Dollar, PR67 Cameo  
Brilliant Mirrors, Razor-Sharp Strike  
Among the Finest Certified, OC-P3**

**4015** 1869 PR67 Cameo NGC. OC-P3, R.4. Only 600 proof Seated Liberty dollars were minted in 1869. Dick Osburn and Brian Cushing have identified four proof die pairs for the date. The coin offered here is a representative of variety OC-P3, with the date placed slightly to the right and light doubling on the motto on the reverse. This was the only use of the obverse die, but the reverse was used to strike two other proof varieties in 1869 and the OC-P1 variety in 1870. Considered as a date, examples in PR67 Cameo are extremely rare. Currently, NGC has certified only nine coins in this exalted grade across all contrast levels, with none finer (two with the Star designation). PCGS has certified a single specimen in PR67 Deep Cameo, again with none finer (5/18).

Most 1869 proof dollars were sold as part of the proof sets for the year. These sets were quite popular, and auction appearances began almost immediately. An 1869 set containing the silver dollar was offered as lot 90 of a Valuable Collection of Coins and Medals (Edward Cogan, 9/1869), where it realized \$3.50. Recent auction appearances have been most impressive. The spectacular PR67 ★ Cameo NGC specimen in lot 2494 of the Long Beach Signature (Heritage, 9/2008) realized \$51,750.

The present coin is a magnificent Superb Gem specimen, with fully struck, frosty devices. The most intricate details of Gobrecht's Seated Liberty design are brought up to full advantage on this exquisite example. The pristine fields display a fathomless depth of reflectivity, and the field-device contrast is profound. The surfaces are brilliant throughout, and overall eye appeal is tremendous. We expect spirited competition from series enthusiasts when this lot is called. Census: 5 in 67 (1 in 67 ★), 3 in 67 Cameo (1 in 67 ★ Cameo), 1 in 67 Ultra Cameo, none finer (5/18).

Ex: Houston Signature (Heritage, 12/2010), lot 3818, where it realized \$37,375.

**From An Important New York Collection.** NGC ID# 252R, PCGS# 87017

**1872 Seated Dollar, PR64+  
Exceptional Toning, CAC Endorsement**

**4016** 1872 PR64+ PCGS Secure. CAC. OC-P1, R.2. Osburn-Cushing Die State a/a. A progression of vibrant colors imbue deeply mirrored fields with tremendous eye appeal. Royal-blue toning transitions to violet and magenta shades before yielding to flame-orange centers — a palette that enriches both obverse and reverse, with each side equally impressive, yet different in the configuration of colors. The strike is sharp throughout, with die doubling at IN GOD WE TRUST, an Osburn-Cushing Top 30 Variety. A few light slide marks across Liberty's knee and arm are all that keeps this splendid near-Gem proof from an even finer grade. Population: 54 in 64 (5 in 64+), 25 finer; 17 in 64 (3 in 64+) Cameo, 10 finer; 4 in 64 Deep Cameo, 2 finer. CAC: 7 in 64, 5 finer (5/18). NGC ID# 252U, PCGS# 7020

## TRADE DOLLARS

1874-CC Trade Dollar, MS63  
Bright and Strongly Struck

**4017** 1874-CC MS63 PCGS. Tall CC. Period after FINE. The fact that these coins were unpopular with collectors and were made almost exclusively for export overseas, and the total lack of interest in acquiring coins by mintmark prior to the mid-1890s explains why so few 1874-CC Trade dollars survive in high grades. This bright Select Mint State coin is nearly fully struck with notably strong detail on Liberty's head, the branch, and the eagle's feathers and talons. Both sides are exceptionally clean for the grade, though luster is soft rather than thickly frosted. A few pale alloy spots appear on the obverse. Housed in a green label holder. There are 24 higher grading events at PCGS (5/18).

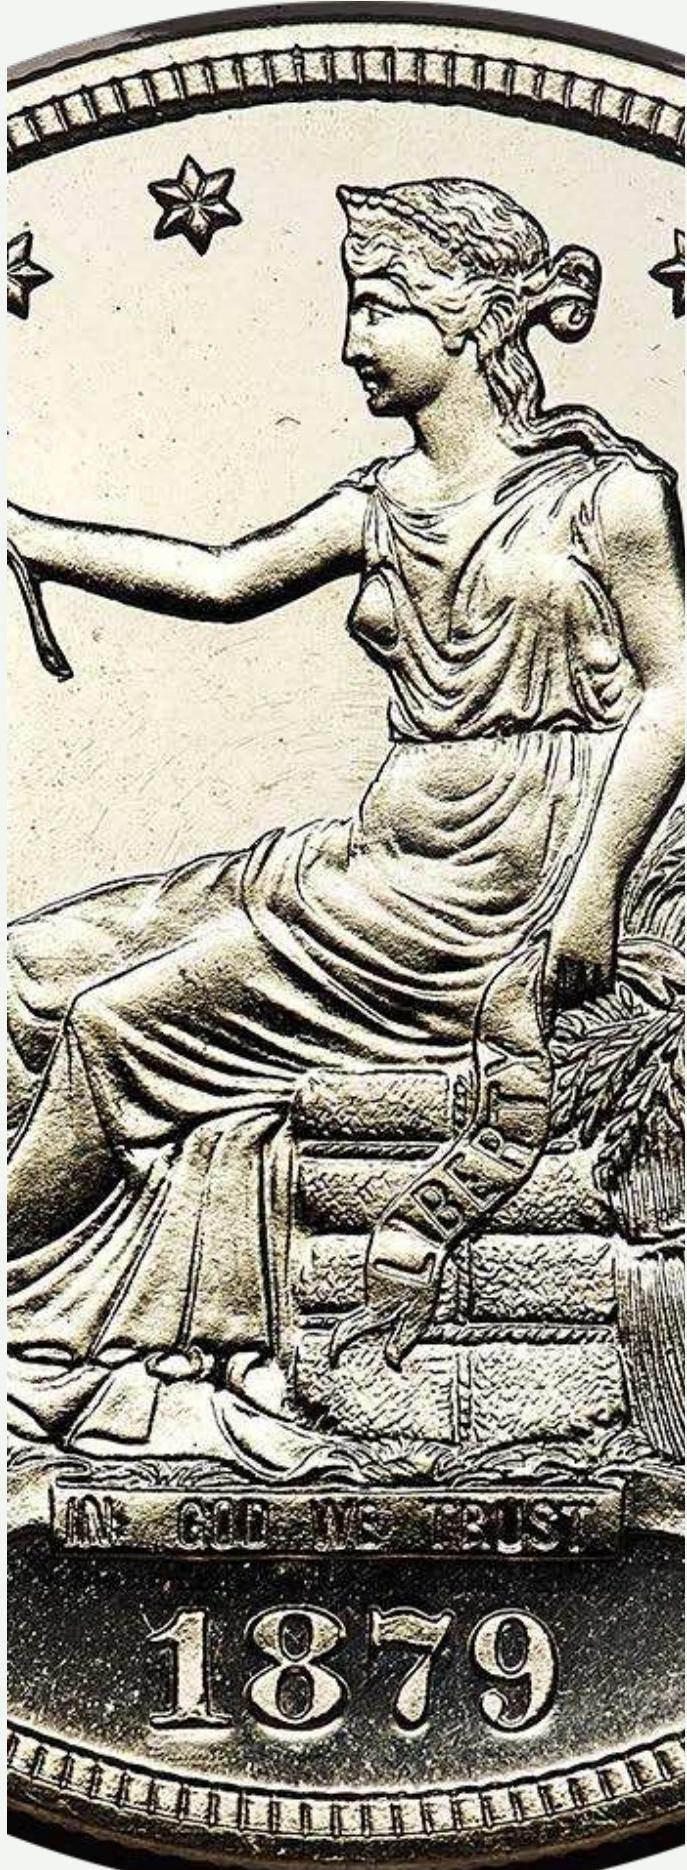

From The Bob Williams Collection. NGC ID# 2532, PCGS# 7035

1874-CC Trade Dollar, MS63  
Collector-Grade Mint State Coin

**4018** 1874-CC MS63 PCGS Secure. Micro CC, with tiny serifs and a short height. Period after FINE. Uncirculated examples of this Carson City Trade dollar are moderately elusive, dispersed primarily throughout the MS61 to MS63 grade range. Finer examples are rare. This collectible Select representative displays well-struck design elements and a hint of light champagne toning, with minimal abrasions. Population: 46 in 63 (3 in 63+), 24 finer (5/18).

From The Bob Williams Collection. NGC ID# 2532, PCGS# 7035

## PROOF TRADE DOLLARS

1879 Trade Dollar, PR68 Cameo  
Popular Proof-Only Issue

**4019 1879 PR68 Cameo NGC. CAC.** The year 1879 would see the deaths of two important figures in U.S. Mint history. Former Mint Director Henry Richard Linderman, who had resigned in December 1878 and was the subject of a congressional inquiry accusing him of official misconduct, died on January 27 at age 53, with a cloud of suspicion hanging over him. Linderman was an avid numismatist who could not resist the temptation to have unusual Mint delicacies made for his own delight and profit. Chief Engraver William Barber would pass away on August 31, after a vacation at the beach.

Linderman's successor, Horatio Burchard, took more than three months before he announced the appointment of the disliked Charles Barber, William's son, to fill the post. The Trade dollar denomination was made obsolete by the Morgan dollar, introduced in 1878. Treasury Secretary John T. Sherman was a bitter foe of the denomination, ending it (for circulation purposes) with the stroke of a pen on February 22, 1878. The Trade dollar issues from 1879 through 1883 were proof-only affairs. The 1879 leads off the string of series-ending proofs, produced to the extent of only 1,541 pieces.

Since the Trade dollar series had ended for circulation, savvy collectors held on to their low-mintage proof examples. But one has to wonder why the proof Trade dollars were issued for public consumption for a period of five years inclusive, from 1879 through 1883. Perhaps they were made as a numismatic smokescreen to keep the public eye away from even more elusive fare, including the controversial pattern stellas produced in gold and other metals, and the lovely "Schoolgirl" silver dollar patterns, also dated 1879 and designed by George T. Morgan, the assistant engraver at the Mint.

This marvelous 1879 Trade dollar is among the highest-graded proofs of the entire series, regardless of date. The fields are absolutely pristine and brilliant, with no trace of toning. The strike is full throughout, and the deeply mirrored fields engender dramatic contrast with the frosty devices. The eye appeal is simply outstanding on this unimprovable specimen. Census: 3 in 68 (1 in 68 ★), 7 in 68 Cameo (5 in 68 ★), 1 in 68 Ultra Cameo, 0 finer (5/18).

Ex: ANA Signature (Heritage, 8/2010), lot 3328; Houston Signature (Heritage, 12/2010), lot 3835, where it brought \$48,875.

**From An Important New York Collection.** NGC ID# 27YR, PCGS# 87059

## 1881 Trade Dollar, PR65

Deeply Toned Proof-Only Example

- 4020 1881 PR65 NGC.** The 1881 Trade dollar is a proof-only issue with a reported mintage of 960 pieces. A richly toned Gem example, this piece reveals several shades of color including teal, copper, orange, plum, and gray. Luster emerges beneath the patina on large portions of the coin. The design elements exhibit an unexpectedly needle-sharp strike, adding to the appeal. Census: 38 in 65, 27 finer (5/18).  
Ex: Houston Signature (Heritage, 12/2013), lot 3703, which realized \$6,756.25. NGC ID# 27YT, PCGS# 7061

1881 Trade Dollar, PR65  
Deeply Brilliant, Undesignated Contrast  
Old Green Label Holder

- 4021 1881 PR65 PCGS.** The old green label holder does not recognize the Deep Prooflike surfaces of this brilliant, blatantly contrasted 1881 proof Trade dollar, one of 960 pieces struck as a proof-only issue as the series neared its "official" end in 1883. The fields display glassy-smooth, deeply reflective silver mirrors, yet the thickly frosted devices provide most of the dramatic contrast that defines this visually arresting proof.

The strike is pinpoint sharp throughout all of the devices. Only a handful of delicate, hair-thin lines exist — visible under the scrutiny of a strong loupe. The quality of this piece is impressive, since many 1881 proofs were poorly struck and exhibit flatness on Liberty's head and the adjacent stars. Those areas are particularly sharp here. Liberty's leg drapery is complete and the eagle's feathering is sharp. Population: 39 in 65 (1 in 65+), 13 finer; 29 in 65 Cameo, 12 finer; 4 in 65 Deep Cameo, 6 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 27YT, PCGS# 7061

## MORGAN DOLLARS

## 1878 Morgan Dollar, MS66

VAM-6, 8 Tailfeathers

- 4022 1878 8TF Pierced Eyelid, VAM-6, MS66 PCGS Secure.** A short vertical die line through Liberty's eyelid earns this eight tailfeathers variety its "Pierced Eyelid" moniker. This Premium Gem example is conditionally scarce and well-struck, showing semiprooflike fields and brilliant surfaces with a clean cheek on Liberty. Neither side exhibits a single mentionable abrasion. Regardless of variety, eight tailfeathers Morgan dollars are highly sought-after. This type was issued only for part of 1878. NGC ID# 76LZ, PCGS# 133789 Base PCGS# 7072

1878 Morgan, MS65 Deep Mirror Prooflike  
VAM-33A, Weak Seven Over Eight Tailfeathers

- 4023 1878 7/8TF Doubled Legs, VAM-33A, MS65 Deep Mirror Prooflike PCGS Secure.** A clashed late die state of VAM-33, showing heavy die polishing on each side that leaves mirrored recesses in the eagle's wings and Liberty's ear. The eagle's legs are die doubled, which is a hallmark of the variety. This Gem is sharply struck and modestly contrasted with brilliant surfaces. Neither side exhibits bothersome abrasions. NGC ID# 4G65, PCGS# 40208 Base PCGS# 97075

1878 Morgan Dollar, MS66  
VAM-37, 7 Over 8 Tailfeathers

- 4024 1878 7/8TF 7/4 Strong, VAM-37, MS66 PCGS Secure.** Four of the original eight tailfeathers are still visible on this variety, along the bottom of the primary seven. This Strong 7/4 variety is scarce in high grade, as is the date in general at the MS66 level. This Premium Gem is sharp and frosty. The obverse has warm golden toning with an arc of ocean-blue along the upper border. The reverse is mostly brilliant but shows orange-gold border toning. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

**1878 Seven Tailfeathers Morgan Dollar  
Reverse of 1879, MS66**

- 4025 1878 7TF Reverse of 1879 MS66 PCGS Secure.** Frosty, untoned mint luster cartwheels around each side of this Premium Gem, illuminating well-preserved surfaces and well-struck design elements. The 1878 Reverse of 1879 Morgan dollar is conditionally rare in Premium Gem condition and is almost uncollectible finer. It is scarcer than its Reverse of 1878 counterpart. Population: 28 in 66, 1 finer; 1 in 66 Prooflike, 0 finer (4/18). NGC ID# 253L, PCGS# 7076

**1879-CC Morgan Dollar, MS61  
Semikey Carson City Issue, Old 'Rattler' Holder**

- 4026 1879-CC MS61 PCGS.** Normal Mintmark. By today's standards, the distance from Carson City, Nevada to San Francisco is small — approximately 220 miles, depending on the route — but in the late 1870s, it was a considerable journey. Still, Nevada Territory mining interests ignored the nearby Carson City Mint and shipped raw bullion to the San Francisco facility instead. Lack of silver bullion accounts for the scarcity of 1879-CC silver dollars, of which just 756,000 pieces were struck. This minimally marked example is lustrous beneath an even, golden-lilac patina. The strike is sharp, although faint roller marks exist above the ear and at the reverse bow knot. Housed in a first-generation PCGS rattler holder. NGC ID# 253U, PCGS# 7086

**1879-CC Dollar, Vibrant MS61  
Better Carson City Date**

- 4027 1879-CC MS61 PCGS.** A well-struck Mint State example of the second-rarest Carson City Morgan dollar. This piece is brilliant aside from some light golden toning just left of the date, and a hint of reflectivity is apparent in the fields when tilted beneath a light. Scattered abrasions on the obverse limit the grade. Although 756,000 silver dollars were coined in Carson City in 1879, only a little more than 4,000 pieces were distributed through the GSA sales of the 1970s. The GSA sales account for most of the Mint State CC-mint coins known to survive. NGC ID# 253U, PCGS# 7086

**1879-CC Dollar, MS62  
Frost-White Surfaces, Normal Mintmark**

- 4028 1879-CC MS62 PCGS Secure.** This scarce issue remains in strong demand by silver dollar and Carson City enthusiasts alike. Brilliant, silver-white surfaces radiate frosted cartwheel luster. The fields are minimally marked for the assigned grade, and only a pair of light luster grazes on Liberty's cheek are of note. The 1879-CC is usually a bit softly struck over the ear, a characteristic shared by this attractive example. NGC ID# 253U, PCGS# 7086

**1879-CC Morgan Dollar, MS62  
Bright and Frosty, Normal Mintmark**

- 4029 1879-CC MS62 NGC.** Normal Mintmark. Only 756,000 1879-CC Morgan dollars were struck in the series' second year, and unlike later Carson City issues from the early to mid-1880s, few were distributed as part of the GSA release of the 1970s. This is a brightly untoned representative with coruscating mint frost and phenomenal eye appeal for the grade. Light chatter is evident but minimal on each side. Well-impressed with softness confined to the hair strands over the ear.

*From The Bob Williams Collection.* NGC ID# 253U, PCGS# 7086

**1879-CC Morgan Dollar, MS63  
Better Carson City Date**

- 4030 1879-CC MS63 PCGS. CAC.** From a small mintage of 756,000 pieces, the 1879-CC Morgan dollar is the second-most challenging issue of the Carson City series. This attractive Select specimen exhibits well-detailed design elements, with a touch of the often-seen softness on the eagle's legs and talons. The lustrous surfaces are lightly marked and minimally toned. Housed in a green label holder. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS61

Capped Die, VAM-3A, Top 100 Variety

- 4031** 1879-CC Capped Die, VAM-3A, Top 100, MS61 PCGS. CAC. A Top 100 Variety. This later state of the famous Capped Die variety features a die gouge that connects the bases of AM in AMERICA, and the G in GOD is filled with larger die chips than in earlier states. This MS61 example is incompletely defined, but it retains its original surfaces and frosty mint luster. Peppered abrasions are unsurprising. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1880-CC Morgan Silver Dollar, MS67

8/High 7 Variety, VAM-5

None Certified Finer at PCGS or NGC

- 4032** 1880-CC 8 Over High 7, VAM-5, MS67 PCGS. A Top 100 Variety. Although not designated on the old green label holder, this Superb Gem 1880-CC is the VAM-5, 8 Over High 7 die pair, with tiny points of the underdigit 7 protruding from the top of the second 8 in the date, and a ghostlike remnant of the crossbar and stand of the 7 within the two loops of 8. A short die gouge between the branch stem and the top arrow fletching confirms the reverse die. Brilliant frost-white surfaces are fully struck with virtually no marks to mention. Liberty's cheek is smooth and clear of all but the smallest abrasions.

Since PCGS started tracking the VAM-5 variety more than 10 years ago, just nine examples have achieved the Superb Gem level. More important, there are no 1880-CC dollars certified finer than the MS67 level by PCGS, regardless of variety (4/18).

*From The Tuxedo Park Collection.* NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

**1881-O Dollar, MS66****Lustrous and Attractively Toned**

- 4033 1881-O MS66 PCGS Secure.** Iridescent shades of violet and golden-brown toning visit the well-preserved surfaces of this delightful Premium Gem, with vibrant mint luster underneath. The design elements are sharply detailed and overall eye appeal is terrific. From a substantial mintage of 5.7 million pieces. Population: 50 in 66 (5 in 66+), 0 finer (5/18). NGC ID# 2548, PCGS# 7128

**1883 Morgan Dollar, MS67+**  
**Scarce CAC-Approved Example**

- 4034 1883 MS67+ PCGS Secure. CAC.** The 1883 Morgan dollar is plentiful in most grades, although Superb Gems are moderately elusive and all such graded at PCGS are non-Prooflike pieces (5/18). This is a rare example that boasts both the Plus designation and a CAC green label. Liberty's cheek is flawless and the fields are nearly so. Both sides are brilliant and softly frosted, showing a bold strike. PCGS lists only four finer examples. CAC: 61 in 67, 4 finer (5/18). NGC ID# 254G, PCGS# 7142

**1884-S Morgan Dollar, MS60**  
**Challenging Issue in Mint State**

- 4035 1884-S MS60 NGC.** The 1884-S Morgan dollar is much more difficult to locate in high grade than its mintage of 3.2 million pieces would suggest. This impressive Mint State specimen exhibits well-detailed design elements, with just a trace of the usual softness on the hair above the ear, and lustrous, lightly toned surfaces that show myriad tiny contact marks distributed over each side. NGC ID# 254P, PCGS# 7156

**1884-S Morgan Dollar, MS61****Lightly Marked, Naturally Toned Surfaces**

- 4036 1884-S MS61 NGC.** The mintage of Morgan dollars declined to 3.2 million pieces at the San Francisco Mint in 1884. Additionally, it is likely that many coins were melted under the provisions of the Pittman Act in 1918, making the issue surprisingly difficult to locate in high grade today. This well-detailed MS61 specimen is lightly marked for the grade, with lustrous surfaces under shades of golden-tan and lavender-gray toning. NGC ID# 254P, PCGS# 7156

**1885-CC Silver Dollar, MS67**  
**Radiant, Frosty Luster**

- 4037 1885-CC MS67 NGC.** The 1885-CC is one of the most popular Carson City Morgan dollars to come out of the GSA sales in quantity. Its low mintage of 228,000 pieces is enticing, and yet high-grade coins with outstanding eye appeal are usually available for a price. Nonetheless, Superb Gems are scarce, and pieces grading finer than this MS67 are rare. Frosty cartwheel luster is beautifully preserved and untoned. The strike is sharp throughout. NGC ID# 254S, PCGS# 7160

**1885-O Dollar, MS66+ Deep Mirror Prooflike**  
**Stark Cameo Contrast**

- 4038 1885-O MS66+ Deep Mirror Prooflike PCGS Secure. CAC.** Deep Mirror Prooflike examples of the 1885-O dollar are scarce in MS66 and almost unknown finer. This Plus-graded CAC coin displays cameo contrast reminiscent of a proof, with a full strike and beautifully preserved, untoned surfaces. Population: 55 in 66 (3 in 66+) Deep Mirror Prooflike, 1 finer. CAC: 12 in 66, 0 finer (4/18). NGC ID# 254T, PCGS# 97163

1888-O Silver Dollar, MS62  
'Scarface' VAM-1B3

1889-CC Silver Dollar, AU55  
Field Luster Remains

- 4039** 1888-O Scarface, VAM-1B3, MS62 PCGS. A Top 100 Variety. Michael Fey describes the "Scarface" variety as "the most dramatic die break in the Morgan dollar series." The approximately diagonal crack descends the border at 10 o'clock across Liberty's cheek. To provide further interest, the eagle has a "beard" clash mark. This lustrous example has a narrow obverse peripheral band of peach-gold, lilac-red, and ocean-blue patina. The reverse has unusual toning, brilliant throughout the border with a broad autumn-brown center. A scuff in the field near the nose determines the grade. NGC ID# 2556, PCGS# 133918 Base PCGS# 87184

1888-O Morgan Dollar, MS64  
Popular Scarface, VAM-1B3 Variety

- 4040** 1888-O Scarface, VAM-1B3, MS64 PCGS. CAC. A Top 100 Variety. This is one of only two examples of the full "Scarface" variety that PCGS has graded in MS64. The Scarface is among the most popular VAMs and is certainly one of the most easily recognizable. There are four distinct die states of this issue, however, and only the third and fourth (VAM-1B3 and VAM-1B4) actually qualify as Scarface coins — the earlier states were struck before the crack extended down Liberty's cheek, and are worth much less.

This example of VAM-1B3 features mottled tan and orange obverse toning with hints of red and green. The reverse is more consistently toned, but is also complex, with orange and blue undertones amid a slate-gray background. The strike is about average, with soft hair strands above the ear and indistinct talons. There are few signs of contact. A lovely piece for the specialist. Population: 2 in 64, 0 finer (4/18). NGC ID# 2556, PCGS# 133918 Base PCGS# 87184

- 4041** 1889-CC AU55 PCGS Secure. Elements of luster remain in the fields of this Choice AU 1889-CC dollar, complementing an almost complete lack of wear. Both sides are moderately abraded as expected. No toning is apparent aside from a few small bluish spots on the reverse. This key-date Carson City dollar will appeal to many series specialists.

*From The Bob Williams Collection.* NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, AU58  
Famous Branch Mint Rarity

1889-CC Morgan Dollar, AU58  
Key CC-Mint Issue

**4042 1889-CC AU58 NGC.** No coins were struck at the Carson City Mint from 1885 until 1889 and the physical plant declined substantially during the layoff. When the Mint was reopened in 1889, it took until October 10 to repair the building and service the machinery before coinage operations could commence. There was only time to strike a small mintage of 350,000 Morgan dollars before the end of the year. Few coins were saved by contemporary collectors, as there was little interest in branch mint issues at the time. If any coins were held in government storage at the time of issue they must have been melted under the provisions of the Pittman Act in 1918, or otherwise dispersed, as only a single example was still in government custody by the time of the GSA sales of the 1970s. Today, the 1889-CC Morgan dollar is the most challenging issue in the entire Carson City series.

This attractive near-Mint representative exhibits only the slightest trace of wear on the high points of the strongly impressed design elements. The lustrous surfaces are enhanced by shades of lavender and pale gold toning. Remarkably few abrasions are evident. NGC ID# 2559, PCGS# 7190

**4043 1889-CC AU58 PCGS.** The Carson City Mint reopened for coinage operations in October of 1889, after a three-year hiatus. Coin production for the remainder of the year was limited to a small production of 350,000 Morgan dollars and 30,945 Liberty double eagles. The coins circulated heavily in the hard-money economy of the region, and few high-quality examples were saved by contemporary collectors. In 1893, only four years after the time of issue, Augustus Heaton noted the 1889-CC had become a scarce issue. Today the 1889-CC is the rarest Morgan dollar from the Carson City Mint.

The present coin is an attractive near-Mint example that shows just a trace of wear on the well-detailed design elements. A number of thin peripheral die cracks are evident on the reverse. The satiny surfaces are lightly abraded, with delicate highlights of sea-green toning. Housed in a green label holder. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS62  
Frosty and Brilliant

**4044** 1889-CC MS62 NGC. After reopening in July 1889, the Carson City Mint struck Morgan dollars in October (100,000 coins), November (100,000 coins), and December (150,000 coins) for a low production of 350,000 pieces. Writing in *The Mint on Carson Street* (2003), Rusty Goe explains: "For unknown reasons, approximately 250,000 to 325,000 1889-CC silver dollars were eventually melted, securing this date as one of the keys to a set of Morgan dollars." Mint State examples are scarce, especially in relation to the demand for them.

Unlike the vast majority of survivors, this brilliant MS62 representative looks much the same way it did immediately after striking. Frosty luster rolls over surfaces that display minimal marks for the grade. Detail is notably strong. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS63  
Semiprooflike Fields

**4045** 1889-CC MS63 PCGS. The 1889-CC is one of the chief key dates in the Morgan dollar series, and it is one of the most challenging issues from any mint to acquire in Uncirculated condition. It is the rarest of the Carson City issues. A number of examples are reported in Prooflike and Deep Mirror Prooflike grades, and these are in high demand. The present coin, although not designated Prooflike, nonetheless shows significant reflectivity that glimmers when tilted beneath a light. Light golden toning around the borders accents essentially brilliant interiors. A few light abrasions account for the grade. This is easily one of the most appealing 1889-CC silver dollars that we have seen in MS63. NGC ID# 2559, PCGS# 7190

**1891 Dollar, MS64 Deep Mirror Prooflike  
Cameo-Contrasted and Brilliant**

- 4046 1891 MS64 Deep Mirror Prooflike PCGS Secure.** Deep Mirror Prooflike examples of the 1891 Morgan dollar are scarce, and are rare in MS64; finer pieces are almost uncollectible with the DMPL designation. This near-Gem is brilliant and shows cameo contrast on each side. A few light marks are evident on Liberty's cheek but do not overly detract. A bold strike furthers the eye appeal. Population: 24 in 64 (1 in 64+) Deep Mirror Prooflike, 1 finer (4/18). NGC ID# 255G, PCGS# 97205

**1893 Silver Dollar, MS65+  
Golden Border Toning**

- 4047 1893 MS65+ PCGS Secure.** A vibrantly lustrous, high-end Gem example of this better Philadelphia issue, showing untoned interiors and golden borders. The coin is well-struck and Liberty's cheek is clean. Only 378,000 silver dollars were struck at Philadelphia in 1893, marking one of the lowest circulation strike mintages of the series from this mint. Examples of this issue are rarely seen finer than the Gem level. NGC ID# 255R, PCGS# 7220

**1893-CC Dollar, Unc Details  
Well-Struck Centers**

- 4048 1893-CC — Cleaned — PCGS Genuine. Unc Details.** This is an Uncirculated coin, but faint hairlines on each side prevent a numeric grade from PCGS. Nonetheless, Carson City dollar specialists will appreciate the well-struck centers and the cartwheel luster that enlivens minimally abraded, brilliant surfaces. The final-year Morgan dollar from the Carson City Mint is always in demand in unworn condition.

**1893-CC Morgan Dollar, MS62  
Lightly Toned With Reflective Fields**

- 4049 1893-CC MS62 PCGS Secure.** A thin layer of pleasing lilac-gray toning joins glints of gold at the margins on both sides of this reflective and minimally marked 1893-CC dollar. Only nominal softness exists in the centers — a common occurrence for the issue and a welcome trade-off for the lack of significant bagmarks seen on most of Carson City's final-year dollars. Silver luster glows from the smooth fields and lightly frosted devices. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS62  
Final Carson City Issue**

- 4050 1893-CC MS62 NGC.** The Carson City Mint struck a small production of 677,000 Morgan dollars in 1893, before being closed for coinage operations on June 1. The issue is difficult to locate in high grade, but lower Mint State examples are usually available. This attractive MS62 specimen offers sharply detailed design elements and lustrous surfaces with some scattered, minor signs of contact. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS63  
Exceptional Luster and Sharpness**

- 4051 1893-CC MS63 NGC.** Radiant cartwheel luster glistens with mint frost on this Select Uncirculated example, while the design elements show remarkably sharp definition. Traces of lilac color emerge from the peripheries, accenting brilliant interiors. A few small marks are not bothersome. This is easily one of the most appealing 1893-CC dollars that we have seen in MS63. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS63****Difficult to Obtain in Higher Grades**

- 4052 1893-CC MS63 PCGS Secure. CAC.** After the 1889-CC, this final-year issue is the most challenging Carson City Morgan dollar to obtain in high grades. The average certified assessment is fractionally higher than XF40, and examples are practically uncollectible in Gem condition, putting tremendous pressure on Select and near-Gem coins. This piece is fully frosted and brilliant with minor, grade-consistent chatter on the cheek. Strongly struck over the centers.

*From The Bob Williams Collection.* NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS62 Prooflike  
Brilliant and Reflective**

- 4053 1893-CC MS62 Prooflike PCGS.** Specialists and beginners alike recognize the 1893-CC as a difficult issue from the final year of coinage at the Carson City Mint. Prooflike examples are occasionally available, but the most reflective and contrasted coins usually display the weakest striking definition. This particular piece has strong detail on the obverse, pronounced reflectivity in the fields, and moderate frost on the devices. A couple of scrapes appear on the eagle's breast, this being the primary deterrent to a higher grade. Housed in a green label holder. Population: 63 in 62 Prooflike, 25 finer (5/18).

*Ex: Central States Signature (Heritage, 4/2002), lot 4233. NGC ID# 255S, PCGS# 7223*

**1893-S Morgan Dollar, VF20****Among the Top 100 Greatest U.S. Coins**

- 4054 1893-S VF20 PCGS Secure.** Listed among the *Top 100 Greatest U.S. Coins*, no other date-mintmark combination evokes rarity and popularity quite like the 1893-S Morgan dollar. Only 100,000 coins were struck — a reflection of the repeal of the Sherman Silver Purchase Act, which had mandated the production of large quantities of silver dollars. This original VF20 example displays the usual steel-gray patina associated with a circulated dollar. No unnatural brightness is present, and the motifs are bold despite the finer points being worn away. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, XF40  
Attractive Color and Surfaces**

- 4055 1893-S XF40 PCGS Secure. VAM-2.** A single obverse die was paired with two reverse dies to strike the rare 1893-S. This example is the VAM-2 variant, where the mintmark leans to the right. Pleasing silver-gray surfaces display hints of grayish-gold around the raised elements, joined by faint glimpses of silver luster. Marks are light and microscopic in nature, while the strike retains sharp definition with strong rims and dentils. We note two tiny edge nicks above UNUM, but they cause little distraction from the overall eye appeal. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, AU Details**

- 4056 1893-S — Cleaned — PCGS Secure. AU Details.** The 1893-S is the rarest Morgan dollar in Uncirculated condition, creating strong demand for AU-level coins. This piece is lightly cleaned and has bright, untoned surfaces, but the appeal is generally pleasing despite some scattered hairlines. A touch of wear appears on the eagle's breast and the hair above Liberty's ear, but the coin is otherwise sharply detailed.

*From The Bob Williams Collection.*

**1893-S Morgan Dollar, AU53**  
Lustrous Fields, Smooth Surfaces

- 4057** 1893-S AU53 NGC. Substantial luster remains in the fields of this About Uncirculated 1893-S dollar, illuminating a hint of champagne color across remarkably smooth surfaces. Only slight high-point wear is apparent on the devices, and the overall eye appeal of this key-date dollar is exceptional for the grade. San Francisco coined only 100,000 silver dollars in 1893, and this is the rarest date in the series in high grade. Mint State coins are out of reach for most collectors, creating exceptional demand for attractive AU examples. This piece is outstanding for the grade and will appeal to the most quality-conscious Morgan dollar specialists. *From The Bob Williams Collection.* NGC ID# 255U, PCGS# 7226

**1894-O Morgan Dollar, MS64**  
Notable O-Mint Condition Rarity

- 4058** 1894-O MS64 PCGS. Scarcer in Mint State than its 1.7 million-piece mintage suggests, the 1894-O has a reputation for substandard eye appeal and heavily bagmarked surfaces. This Choice Uncirculated example exceeds expectations in those regards, with pleasing smooth, frosted surfaces. A few scattered light marks and a touch of softness in the centers exist, but brilliant silver luster compensates, swirling across both sides with a hint of champagne-gold within the recesses of Liberty's hair. PCGS reports just 13 numerically finer pieces (4/18). NGC ID# 255W, PCGS# 7230

**1894-O Dollar, Colorful MS64+**  
New Orleans Branch Mint Rarity

- 4059** 1894-O MS64+ PCGS. The 1894-O is a better date that carries a slight premium in well-circulated grades and becomes progressively more challenging in AU condition (the average survivor grades AU50). However, a collector should be able to find an acceptable example in lower Mint State grades with a bit of patience and a decent budget. This New Orleans issue is scarce at the Choice grade level, and Gems are even more challenging. The 1894-O is notorious for its poor production quality and usually unimpressive appearance, but this high-end near-Gem is fully swathed in attractive gold, violet, cobalt-blue, and teal toning that occurs in a concentric fashion on the reverse. Strike definition is expectedly soft, and the only singular mark is a horizontal depression under Liberty's eye. There are 13 finer grading events at PCGS (5/18). NGC ID# 255W, PCGS# 7230

**1894-S Morgan Dollar, MS65**  
Frosty Original Luster

- 4060** 1894-S MS65 PCGS Secure. Liberty's cheek is especially clean on this frosty Gem, and the obverse fields are comparably well-preserved. On the reverse one can see some light marks in the fields. Luster is brilliant and appealing. The 1894-S Morgan dollar is scarce in Gem condition and rare finer, and almost all examples known in these grades are non-Prooflike coins like the present. PCGS lists 18 numerically finer examples (4/18). NGC ID# 255X, PCGS# 7232

**1895-O Dollar, AU58+**  
CAC Approved and Lustrous

- 4061** 1895-O AU58+ PCGS Secure. CAC. A CAC-endorsed near-Mint coin, this partially lustrous 1895-O dollar also boasts the PCGS Plus designation. Light champagne toning over lightly abraded surfaces leaves this piece with pleasing eye appeal for the grade. Moderate central strike weakness is typical of the issue. In the 1890s, the New Orleans Mint had a reputation for producing weakly struck coins of all denominations. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, MS61  
Low-Mintage Branch-Mint Issue

**4062** 1895-O MS61 NGC. The 1895-O Morgan dollar claims a low mintage of 450,000 pieces and the issue was not well-produced. Most examples seen are softly struck, with insipid mint luster. In addition, most of the coins were released into circulation and few were saved by contemporary collectors or preserved in government storage. The 1895-O was singularly absent from the Treasury releases of the 1960s. As a result, the issue is rarely encountered in high grade today.

The present coin is an attractive MS61 example with well-detailed design elements that show just a trace of blending on the hair strands above Liberty's ear. The satiny surfaces exhibit the minimum number of minor contact marks for the grade and are highlighted by a few hints of sea-green toning. Census: 57 in 61 (1 in 61+), 51 finer (4/18). NGC ID# 255Y, PCGS# 7236

1895-S Morgan Dollar, MS63  
Rich, Frosty Mint Luster

- 4063** 1895-S MS63 PCGS Secure. Extensive bagmarks tend to plague this challenging low-mintage semikey. Dave Bowers writes: "A piece MS-63 or finer, with minimum bagmarks, is a numismatic find and is very special." This is such a coin. It features characteristically rich, frosty surfaces that remain brilliant and crisp detail is seen everywhere except in the centers. The fields are relatively clean, especially on the reverse, and the only overt abrasion occurs on the cheek just behind the mouth.  
*From The Bob Williams Collection.* NGC ID# 255Z, PCGS# 7238

1897-O Morgan Dollar, MS63+  
Challenging Issue in High Grade

- 4064** 1897-O MS63+ PCGS Secure. The mintage of Morgan dollars was a workmanlike 4 million pieces at the New Orleans Mint in 1897. Enough coins were released into circulation to ensure a plentiful supply of examples in lower grades, but most of the coins held back in government custody were probably melted in 1918. The 1897-O was not well-represented in the Treasury releases of the 1960s, and the issue is quite elusive in high grade today. This Plus-graded Select specimen is well-detailed and lightly marked, with vibrant mint luster throughout. PCGS has graded 55 finer examples (4/18). NGC ID# 2565, PCGS# 7248

1901 Dollar, Lustrous MS62  
Elusive in Any Uncirculated Condition

- 4065** 1901 MS62 PCGS. Whispers of purple toning collect at the margins, where they are slightly deeper and more extensive on the obverse, joined by slivers of electric-blue. The coin is generally well-struck, with lustrous silver surfaces that yield a few minute contact marks. The 1901 seldom exceeds the About Uncirculated level, with fewer than 1,500 grading events in all Uncirculated grades by PCGS and NGC combined (5/18). NGC ID# 256J, PCGS# 7272

1903-S Morgan Dollar, MS62  
Underrated Branch Mint Issue

- 4066** 1903-S MS62 NGC. From a mintage of 1.2 million pieces, the 1903-S Morgan dollar is an underrated semikey issue, but the coins were well-produced and a limited number of high-quality examples are extant. This attractive MS62 specimen exhibits sharply detailed design elements and brilliant, lustrous surfaces with only minor signs of contact. NGC ID# 256T, PCGS# 7288

## PROOF MORGAN DOLLARS

1883 Morgan Dollar, Top-Grade PR68

- 4067** 1883 PR68 PCGS. Walter Breen reports in his *Encyclopedia* that 1,070 proof Morgan dollars were minted, but that only 1,039 were delivered as part of proof sets and the rest were melted at the end of the year. As a whole, the 1883 is one of the most collectible proof Morgan dollars in the series, usually available with or without contrast through grades as high as PR66. Superb Gems are far more challenging. PCGS reports two non-Cameo examples in PR67 and another two in PR68. There are also two PR67 Cameo submissions at that service, but none in PR68 Cameo (5/18). This is one of the best-preserved examples known. Both sides are virtually flawless and richly toned in original blue, violet-rose, and golden patina. A finer specimen is unimaginable. NGC ID# 27Z7, PCGS# 7318

1884 Morgan Dollar, PR64 Cameo  
Mintage of 875 Proofs

- 4068** 1884 PR64 Cameo PCGS Secure. Proof Morgan dollar production amounted to 875 coins in 1884 — a fairly typical total for the series. This near-Gem Cameo specimen is brilliant with reflective fields. Fully struck motifs are partly frosted, delivering a pleasing white-on-black effect. A few faint lines are present, but there are no major signs of contact. NGC ID# 27ZB, PCGS# 87319

1885 Morgan Dollar, PR67  
Ex: Gardner, Original Toning

- 4069** 1885 PR67 PCGS. The 1885 proof production at the Philadelphia Mint consisted of only 930 coins. This Superb Gem proof 1885 Morgan dollar is beautifully toned on both sides, showing lavender shades in the center, changing to rose-pink, finally turning to gorgeous electric-blue around parts of the periphery. The strike is expectedly sharp, and no noteworthy contact marks appear on this exceptional coin. Population: 3 in 67, 1 finer (5/18).  
Ex: Eugene H. Gardner Collection, Part I (Heritage, 6/2014), lot 30630, which realized \$25,850.00 NGC ID# 27ZE, PCGS# 7320

1894 Dollar, PR68 Cameo  
Beautiful Old-Time Toning

**4070** 1894 PR68 Cameo NGC. Ultra Cameo proof 1894 Morgan dollars are rare, and the finest at NGC is a lone PR67+. High-end Cameos are just as viable Registry coins. In PR68, however, even Cameo coins are rarities. NGC lists only six Cameos in PR68 and finer grades (5/18). This piece displays fully struck design elements and well-contrasted devices. The interiors are tinted light golden, but the borders exhibit vivid sea-green, lilac, amber, and bluish toning in concentric bands. A ribbon of deep copper-gold stretches upward across the eagle's breast, providing a ready pedigree identifier for this high-end Registry coin. The preservation is nearly flawless. NGC ID# 2577, PCGS# 87329

1895 Morgan Dollar, PR62  
Famous Key Date, Original Patina

**4071** 1895 PR62 PCGS. CAC. There are certain issues in American numismatics that are well-known to specialists outside their respective fields. These coins are often recognized for their rarity, interesting history, and mystique. Few encapsulate those qualities better than the 1895 proof Morgan dollar. The story of the 12,000 missing circulation strikes and the erroneous delivery entry has been well-told, and perhaps some day numismatists will know what happened with more certainty. Until then, this proof issue will remain one of the most famous of all Morgan dollars and a legendary emission in American coinage.

This flashy, moderately reflective specimen is cast in faint golden-lavender patina, confirming its originality and delivering lovely visual appeal. Wispy lines on the cheek are minor, and other contact marks are relatively scant for the assessment. Housed in a green label holder with a matching CAC approval sticker.

*From The Bob Williams Collection.* NGC ID# 27ZR, PCGS# 7330

**1898 Morgan Dollar, PR65**  
Only 735 Proofs Struck

**4072 1898 PR65 PCGS.** It is unfortunate the mintage was so small for the 1898 proofs, because they are considered among the Mint's best work. This Gem example is originally toned in slate-gray, blue, and tan-gold shades, yet underlying silver mirrors shine through the well-aged, natural patina. Frosted devices display a nearly full strike, although contrast is limited by the overall coloration. Housed in an old green label holder.

*From The Tuxedo Park Collection.* NGC ID# 27ZW, PCGS# 7333

**1898 Dollar, PR65 Ultra Cameo**  
All-Brilliant, Problem-Free

**4073 1898 PR65 Ultra Cameo NGC.** Ex: South Beach Collection. An incredible Proof with amazing contrast. This is an impeccable black and white proof without any indication of toning on either side. It is a fully struck Gem Proof with exceptional eye appeal. Although 1898 Morgan dollars are among the finest proofs ever made, we cannot imagine any that are more attractive than this. Census: 13 in 65 Ultra Cameo (1 in 65+, 1 in 65★), 34 finer (4/18).  
Ex: FUN Signature (Heritage, 1/2005), lot 11995, where it brought \$8,050. NGC ID# 27ZW, PCGS# 97333

**1899 Silver Dollar, PR65**  
Attractive Golden Toning

**4074 1899 PR65 NGC.** Exceptional quality in all respects characterizes this beautiful proof Morgan dollar. Rich champagne-gold shadings drape most of each side, but the center of the portrait and the eagle show lighter silver color. Sharp details and careful preservation earn this 1899 proof dollar the coveted Gem designation.  
Ex: Houston Signature (Heritage, 12/2008), lot 3320, which realized \$5,750. NGC ID# 27ZX, PCGS# 7334

**1900 Morgan Dollar, PR68**  
Registry Grade Example

**4075 1900 PR68 NGC.** A fairly generous mintage of 912 proof Morgan dollars was achieved in 1900, but it is likely that some examples were never distributed to collectors and were melted for recoinage the following year. The typical example is sharply struck, but field-device contrast was not as dramatic as in previous years, making Cameo specimens uncommon.

Vivid shades of emerald-green, cerulean-blue, and violet toning blanket the impeccably preserved surfaces of this magnificent PR68 specimen. The design elements exhibit razor-sharp definition throughout and the fields are deeply reflective, under the patina. Census: 7 in 68, 0 finer (4/18). NGC ID# 3KYV, PCGS# 7335

## PEACE DOLLARS

1923 Peace Dollar, MS67

None Numerically Finer at Either Service

- 4076** 1923 MS67 PCGS. CAC. With a mintage of more than 30 million pieces, the 1923 Peace dollar attracts legions of type collectors when available in the finest grades. Superb Gem examples cross the block on infrequent occasions, such as this exceptional coin. Gleaming silver surfaces radiate mint luster through a faint hint of almond-gold patina. The strike is sharp and marks are nearly nonexistent. CAC endorsement is of prime importance at the Superb level. Population: 69 in 67, 0 finer. CAC: 29 in 67, 0 finer (5/18). NGC ID# AMPA, PCGS# 7360

1924-S Peace Dollar, MS65+

Rare Any Finer

- 4077** 1924-S MS65+ NGC. Powerful, satiny luster graces the surfaces of this sharply struck and high-end Gem representative. A mere suggestion of pale-gold toning exists on the obverse, while the reverse is fully brilliant. A handful of superficial, tiny marks exist, but none merit individual mention. The 1924-S is difficult to locate in Gem condition, and is virtually impossible to find in a higher grade. This example challenges the finest-known by virtue of its Plus designation, the only example so-awarded by NGC at the MS65 level. Census: 74 in 65 (1 in 65+), 2 finer (5/18). NGC ID# 257K, PCGS# 7364

1926 Peace Dollar, MS66+

Remarkably High-End

- 4078** 1926 MS66+ PCGS. CAC. Deservedly Plus-graded and CAC-endorsed, this high-end 1926 Peace dollar is tied for the finest certified at PCGS and CAC. A remarkably clean cheek on Liberty complements an exceptionally well-preserved reverse — a combination that is difficult to locate for any date in high grade. Traces of iridescence suggest originality for the frosty, luminous surfaces, and eye appeal excels. PCGS lists 17 coins in MS66+ and none finer (5/18). We have previously handled only four PCGS coins in this grade with the Plus designation. NGC ID# 257N, PCGS# 7367

1926-D Peace Dollar, MS66+

Few Pieces Known Finer

- 4079** 1926-D MS66+ PCGS Secure. CAC. A remarkably frosty and sharp, high-end Premium Gem with blazing frost-white luster and a CAC endorsement for high quality. Liberty's cheek is clean on this high-end 1926-D Peace dollar. This issue is available in MS66, but CAC coins are in the minority. PCGS lists only eight Superb Gems finer. CAC: 72 in 66, 2 finer (5/18). NGC ID# 257P, PCGS# 7368

1934-S Peace Dollar, MS64+

Cornerstone of the Peace Dollar Series

- 4080** 1934-S MS64+ PCGS Secure. The San Francisco Peace dollar mintage barely crept over the 1 million mark in 1934, although collectors and dealers did not attach any particular importance to the 1934-S at the time. Five other Peace dollars had lower mintages, so no significant accumulations of the issue were formed. Thankfully, this high-end Choice Uncirculated survivor was carefully preserved. Sumptuous silver luster radiates from the frosted surfaces, which are brilliant except for a faint dusting of pale-almond toning on the obverse. Tiny, shiny marks on the cheek, chin, and in the left obverse field are little more than incidental grazes of minor consequence. NGC ID# 257Z, PCGS# 7377

## 1934-S Peace Dollar, MS64

Important Key Date

- 4081** 1934-S MS64 PCGS. CAC. The 1934-S Peace dollar is the most challenging issue of the series in high grade. The mintage was fairly small and few examples were saved by contemporary collectors. This attractive near-Gem representative is sharply detailed with especially vibrant mint luster and ample eye appeal.  
Ex: Central States Signature (Heritage, 4/2013), lot 5098. NGC ID# 257Z, PCGS# 7377

## GOLD DOLLARS

## 1854 Type Two Gold Dollar, MS64

First-Year Type Coin

- 4082** 1854 Type Two MS64 NGC. The 1854 is one of the two readily available Type Two gold dollar issues in Mint State, although pieces grading finer than MS64 are scarce. This near-Gem displays a sharp strike and heavily lapped dies with some loss of definition in the shallow parts of the wreath. The fields have a hint of reflectivity and show only a few light marks. NGC ID# 25C3, PCGS# 7531

## 1854 Type Two Gold Dollar, MS64

Outstanding Mint Luster

- 4083** 1854 Type Two MS64 PCGS. An outstanding coin for the grade, showing luminous orange-gold luster with lavender and peach hues that attest to obvious originality of color. Clash marks and minor high-point strike weakness in the centers of each side are characteristic of the type in general. A few minor marks are seen only with a loupe. Finer examples of the Type Two gold dollar are elusive. NGC ID# 25C3, PCGS# 7531

## 1855-C Gold Dollar, AU55

Deep Reddish-Gold Color

- 4084** 1855-C AU55 NGC. Variety 2. This is the more often seen of two varieties, featuring the date slightly further right. Winter calls the 1855-C the rarest Charlotte gold dollar in high grades after the 1849-C Open Wreath. This orange and reddish-gold Choice About Uncirculated example is characteristically defined and shows heavy clash marks around the portrait. Perhaps 30 or 40 pieces are known across all AU grades, while two to five Mint State coins are believed extant. NGC ID# 25C5, PCGS# 7533

## 1855-C Gold Dollar, AU55

Sole Type Two Charlotte Issue

- 4085** 1855-C AU55 NGC. Variety-2. The date is fairly sharp, and the mintmark close to the bow confirms the variety, one of two die pairs known for this high-demand Charlotte issue. The quality of strike is never good for the 1855-C, which is scarce-to-rare in Choice About Uncirculated or finer grades. This is a solid AU55 that displays characteristic rich, orange-gold color and a sharper-than-usual strike on the reverse. The obverse strike is less crisp, with die clashing that surrounds the portrait and scattered light abrasions. Census: 34 in 55, 54 finer (5/18). NGC ID# 25C5, PCGS# 7533

## 1855-O Gold Dollar, MS61

Only Type Two O-Mint Issue

Final New Orleans Gold Dollar

- 4086** 1855-O MS61 PCGS Secure. Variety 1. In a strange twist of the norm, the New Orleans Mint had better success striking 1855 gold dollars than any of the other mints, which struggled mightily with the Type Two Indian Princess Small Head design. This mostly prooflike Mint State example is representative of the quality, struck from unclashed dies with a reasonably sharp strike and LIBERTY entirely readable on the headdress. The 8 in the date shows only minor weakness. Pleasing greenish-gold color glows from the reflective fields, with a scattering of light lines on both sides. Population: 16 in 61, 25 finer (4/18). NGC ID# 25C7, PCGS# 7535

1857-D Gold Dollar, AU58  
Underrated and Strongly Struck

**4087 1857-D AU58 NGC.** Variety 9-L. The only dies used in the production of 3,533 gold dollars at the Dahlonega Mint in 1857. Both David Akers and Doug Winter have used the term “underrated” to describe this low-mintage Southern issue, with Winter adding: “It becomes very rare in About Uncirculated-55 and About Uncirculated-58 and it is extremely rare in full Mint State with just half a dozen or so currently known.” This deep yellow-gold coin is exceptionally strong with softness limited to the upper reverse and the wreath bow. Minimal friction and few marks are seen. Reflective and appealing. NGC ID# 25CF, PCGS# 7546

1865 Gold Dollar, Bright MS65  
Rarely Offered This Fine

**4088 1865 MS65 PCGS Secure.** Only 3,700 gold dollars were struck in 1865, and this issue is rare in all Mint State grades today. Gems are especially sought-after. This piece showcases bright yellow-gold surfaces and semiprooflike fields. Clash marks are visible under magnification, and a small Mint-made planchet depression is also seen on Liberty’s chin. The strike is sharp on this attractive 1865 gold dollar. Population: 7 in 65, 12 finer (5/18). NGC ID# 25CZ, PCGS# 7564

1871 Gold Dollar, Semiprooflike MS67  
Beautiful Coloration

**4089 1871 MS67 PCGS Secure.** The 1871 gold dollar survives in grades through MS68, but it becomes increasingly rare above MS64. This Superb Gem is near the Condition Census and represents exceptional Registry Set or type coin quality. The fields are semiprooflike, and the unabraded surfaces showcase lovely rose-orange, lilac, and yellow-gold coloration. Trivial softness appears on the 8 and 7 in the date, but the coin is otherwise well-struck. PCGS and NGC combined have certified only 17 coins in this and finer grades, including possible duplications. We have previously handled five individual Superb Gem examples of this low-mintage Philadelphia issue (3,900 pieces struck). Population: 8 in 67 (2 in 67+), 3 finer (5/18). NGC ID# 25D8, PCGS# 7571

**1876 Gold Dollar, MS66**  
Few Pieces Known So Fine

**4090 1876 MS66 PCGS Secure.** Although only 3,200 gold dollars were struck in 1876, and all at the Philadelphia Mint, this issue was well-saved and is available today. However, Premium Gems are conditionally rare. This piece displays original honey-gold luster and semireflective fields. Slight strike weakness on the wreath bow mirrors softness on the top of the headdress, which is opposite the wreath bow. We have previously handled only four individual examples of this issue in Premium Gem condition, the last of which appeared at auction more than two years ago. A true condition rarity in the gold dollar series. Population: 5 in 66 (2 in 66+), 2 finer (5/18). NGC ID# 25DE, PCGS# 7577

**1878 Gold Dollar, MS66**  
3,000 Coins Struck, Only One Finer at PCGS

**4091 1878 MS66 PCGS Secure.** A token mintage of 3,000 gold dollars was accomplished in 1878. These coins did not circulate and were produced almost exclusively for collecting or gift purposes. Many were saved in Mint State, but surprisingly few are known in Premium Gem condition. Frosty mint luster glistens over warm peach-gold surfaces. An area of roughness occurs in the field above AR, but each side is otherwise smooth and mark-free. Fully struck. Population: 7 in 66 (1 in 66+), 1 finer (5/18). NGC ID# 25DG, PCGS# 7579

### PROOF GOLD DOLLARS

**1860 Gold Dollar, PR63**  
Fewer Than 50 Pieces Believed Extant

**4092 1860 PR63 PCGS.** Mint records indicate that 154 proof gold dollars were struck in 1860, but it is estimated that less than a third survive. This deeply mirrored example shows pinpoint strike definition throughout. A few contact marks account for the grade, and there are a number of small lint marks on the reverse, as always. A planchet flake occurs in the left obverse field just in front of Liberty's neck, helpful for attribution purposes. Housed in a green label holder. Population: 6 in 63, 10 finer (5/18).  
Ex: New York Signature (Heritage, 11/2003), lot 7109. NGC ID# 25E3, PCGS# 7610

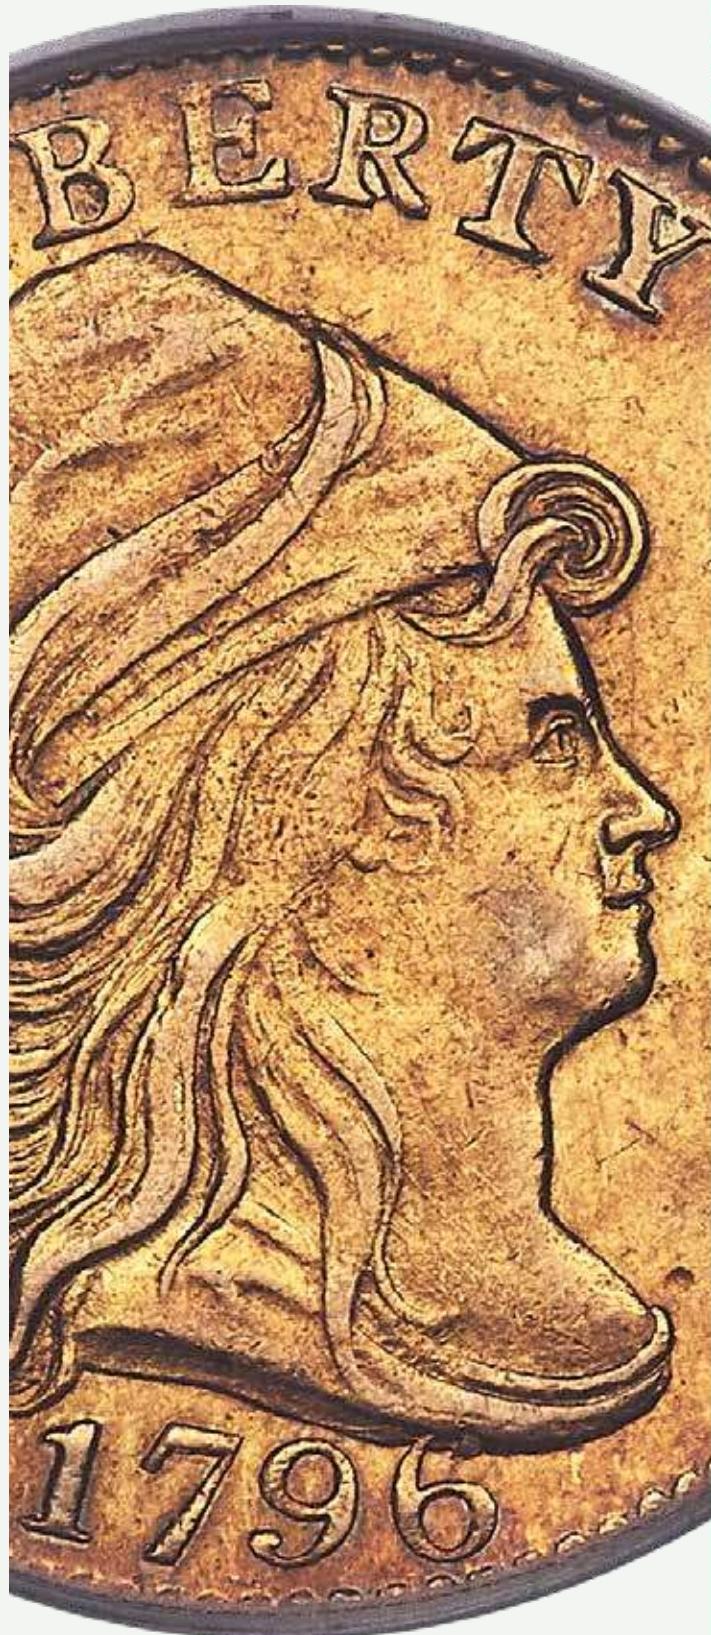

1886 Gold Dollar, PR67 Cameo  
Tied for Finest at NGC

**4093** 1886 PR67 Cameo NGC. The Superb Gem designation is conservatively given by both services, with just a half dozen or so 1886 proof coins receiving the grade and no examples certified finer by both services combined. This glittering dollar would be difficult to exceed in terms of technical merit or eye appeal. Mint frost covers the devices in bold contrast to the mirrored fields. A full strike complements the unmarked portrait. Only the 1885 proof gold dollars appear at auction more frequently than this date, making it a logical selection for type and for Registry Set caliber collections. Census: 4 in 67 Cameo, 0 finer (4/18).

Ex: FUN Signature (Heritage, 1/2015), lot 4219, where it realized \$13,512.50.

From The Reilly Cody Collection. NGC ID# 25EW, PCGS# 87636

EARLY QUARTER EAGLES

1796 No Stars Quarter Eagle, MS61  
Historic First-Year Issue  
Popular BD-2 Variety

**4094 1796 No Stars on Obverse, BD-2, R.4, MS61 PCGS. CAC.** Bass-Dannreuther Obverse State c / Reverse State b. The 1796 No Stars quarter eagle is the only 18th century American gold or silver coin issue that lacks stars within the obverse rim. The lack of stars makes the coin extremely appealing to collectors, both aesthetically and because it marks a one-year type. Why were there no 1795 No Stars half eagles, the first year of that denomination? No answer is readily forthcoming.

The specific reasons for the design choice to place no stars on the obverse of this smaller denomination, likely by designer Robert Scot, are lost today in the mists of time, but the date is significant; Tennessee joined the Union as the 16th state on June 1, 1796, and the Mint was in process of a conversion from "one star per state" to "one star each for the Original 13." Note that the 1796 With Stars quarter eagles had 16 stars, while the 1796 Draped Bust quarter dollars — also a one-year type — had 15 stars. The 1797 quarter eagles were back to the "Original 13."

The lack of stars gives the obverse design an unusual appeal in the cameo appearance of the right-facing, turbaned Liberty occupying the center with the broad, open fields surrounding her on either side. The two varieties of No Stars quarter eagles share a common obverse, with the much-more-available BD-2 having the arrows on the reverse extending only to the N in UNITED. On the much-rarer BD-1, the arrows extend further, to beneath the I. The BD-1 is a die pairing that Harry W. Bass, Jr. "rediscovered", long after it was first noticed by Edgar Adams.

The relative mintage figures are skewed, as expected, heavily in favor of the BD-2 over the BD-1, with Bass-Dannreuther estimating a mintage of 897 pieces for the BD-2 against 66 for the BD-1. There is also a 1796 With Stars variety — the Mint was clearly experimenting with this new first-year gold denomination — but the 1796 With Stars as a type belongs to the series of similar issues that extends to 1807.

The present 1796 No Stars quarter eagle is of the BD-2 variety, showing the Normal Arrows reverse, with a noticeable "lump break" above the tip of the eagle's right (facing) wing. A small die break joins the bottoms of BER, and some die clashing (likely caused during the striking of the previous BD-1 Extended Arrows pieces) on the obverse produces some light parallel raised die striations visible in the central devices at several points. The lowest hair curl is complete.

This piece is absolutely Mint State, with full luster throughout. Moreover, it possesses that marvelous "original skin" or "crusty gold" look of early, unfooled-with U.S. gold coins. Deep reddish-orange centers, more so on the obverse, cede to even deeper violet hues at the extreme margins. A few minor planchet adjustment marks appear on each side, lightly so on the obverse, a bit more prominently in the shield area of the reverse, where the strike is somewhat weakened as a result. This lovely coin would likely grade a point or two finer were it not for a trio of small gouges in the left portion of the eagle's neck, sufficient to move small bits of metal. While this phenomenon is strictly localized to that area, it does require mention. Having said that, we believe that potential bidders who inspect this coin in person will absolutely love it for what it is, among the most historic single U.S. gold coin issues, and one seldom seen at this grade level. Population: 3 in 61, 3 finer. CAC: 3 in 61, 3 finer (5/18).

*Ex: Chicago Signature (Heritage, 8/2011), lot 7436, realized \$276,000.*

**From An Important New York Collection.** NGC ID# 25F2, PCGS# 45501 Base PCGS# 7645

**1804 BD-2 Quarter Eagle, AU55  
14 Stars Reverse**

**4095 1804 14 Stars Reverse, BD-2, R.4, AU55 PCGS Secure.** Bass-Dannreuther Die State c/a, cracked to the right of the 4 in the date and in the left obverse field. In *Early U.S. Gold Coin Varieties* (2006), John Dannreuther notes of this state: "the only example seen is the ANS coin, likely ex-Brock, from the J.P. Morgan donation..." In the past decade, we have handled a few other examples of this late die state, although it remains scarce compared to die state a/a.

BD-2 is the more plentiful of two die varieties for the 1804 quarter eagle, although Dannreuther estimates that its availability hovers only in the 150 to 200-coin range for all grades combined. The reverse is distinctive for its 14-star arrangement, which easily differentiates the variety from the rare BD-1 marriage. This Choice AU example displays complete border dentils and a sharp reverse. On the obverse, the left-hand stars are weak, and planchet adjustment marks appear in the same area. Still, no distracting abrasions are present. NGC ID# BFVT, PCGS# 45510 Base PCGS# 7652

**1824/1 BD-1 Quarter Eagle, AU Details  
Only 50 to 60 Pieces Known**

**4096 1824/1 BD-1, R.5 — Scratched, Cleaned — ANACS. AU Details, Net XF40.** Bass-Dannreuther Die State a/a, as always. Several scratches in the right obverse around stars 10 to 13 and unnaturally bright surfaces prevent a numeric grade for this 1824/1 quarter eagle. But these characteristics only serve to make this coin more accessible than an issue as rare as the 1824/1 would normally be. BD-1 is the only variety of this date, and with its R.5 rarity rating it has a survivorship of only 50 to 60 pieces in all grades. This coin is slightly weak in the centers and has remnants of adjustment marks on the eagle, but the overall appeal is still pleasing. No major wear is visible. The reverse is rotated a trifle clockwise.

*Ex: Denver Signature (Heritage, 8/2006), lot 1562, which realized \$5,462.50. NGC ID# BFW4, PCGS# 45517 Base PCGS# 7663*

**1830 BD-1 Quarter Eagle, AU Details  
Scarce Low-Mintage Issue**

**4097 1830 BD-1, R.4 — Repaired — PCGS Secure Genuine. AU Details.** Bass-Dannreuther Die State a/a, as always. The U in UNITED is recut on this singular 1830 quarter eagle variety. Some field reflectivity remains despite faint tool marks that are visible in the right obverse field under a loupe. The orange-gold surfaces are otherwise problem-free aside from a few light lines on the obverse that accompany the tooling. The left portion of the shield is weak, but the remainder of each side is sharp, and this well-detailed type coin shows no significant wear. John Dannreuther estimates that only 80 to 100 examples of this issue survive in all grades. Only 4,540 pieces were struck.

## CLASSIC QUARTER EAGLES

1835 Variety 6 Quarter Eagle, MS62  
AM Widely Spaced

- 4098** 1835 MS62 NGC. CAC. Variety 6. All three 1835 quarter eagles share a single obverse die. The wide space between the A and M in AMERICA is diagnostic for this variety. This die pair appears far more often than both other varieties combined. In fact, more than 90% of all 1835 quarter eagle appearances in our archives are examples of this variety. For that reason, Variety 6 is popular with date and type collectors. Scattered, grade-consistent marks are evident on each side of this piece that exhibits full luster and wheat-gold surfaces. Census: 23 in 62, 20 finer. CAC: 6 in 62, 3 finer (5/18). NGC ID# 25FT, PCGS# 7693

1836 Block 8 Classic Head Quarter Eagle  
CAC-Approved MS63

- 4099** 1836 Block 8 MS63 PCGS. CAC. Breen-6144, Variety 15, R.2. Second Head of 1837. The Block 8 logotype is scarcer than the Script 8 issue, and this CAC-approved Select example is conditionally rare. Frosty orange-gold luster engulfs each side, and grade-limiting marks are light and unobtrusive. Moderate strike weakness occurs in the centers. Population: 14 in 63, 12 finer. CAC: 4 in 63, 4 finer (5/18). NGC ID# 25FU, PCGS# 97694

1838 Quarter Eagle, MS63+  
Conditionally Rare, A Better Date

- 4100** 1838 MS63+ PCGS Secure. Breen-6146, Variety 19, R.2. The 1838 is a better date among Classic Head quarter eagles, especially in Mint State. Most coins in Uncirculated condition grade no better than MS62. This Select example is conditionally rare. It is also one of only two pieces for the grade that are Plus-designated — one at PCGS and the other at NGC (4/18). The strike is sharp on the obverse and just a touch weak on the reverse at the left shield corner and wing junction. Some light handling marks on Liberty's cheek and in the open fields define the grade but are not detracting, and both sides have lovely yellow-gold luster with soft luminance. Population: 8 in 63 (1 in 63+), 8 finer (4/18). NGC ID# 25FY, PCGS# 7696

## LIBERTY QUARTER EAGLES

1846-C Quarter Eagle, MS61  
Elusive, Low-Mintage Issue

**4101** 1846-C MS61 PCGS. Variety 1. The Charlotte Mint was severely damaged by fire on July 27, 1844 and only reopened in October of 1846. A modest mintage of 4,808 Liberty quarter eagles was accomplished before the end of the year, one of the smallest production totals of the series. Accordingly, the 1846-C is an elusive issue in all grades today and Mint State examples are rare.

This well-detailed Mint State specimen exhibits just a touch of the usual softness on the central reverse and the lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. Housed in a green label holder. Population: 2 in 61, 4 finer (4/18). NGC ID# 25H2, PCGS# 7741

## 1852-O Quarter Eagle, MS62

A Rarity This Fine

**4102** 1852-O MS62 NGC. Variety 2. The 1852-O quarter eagle is rare in Mint State, and the majority of such coins resides in MS60 and MS61. This MS62 piece is high-end, despite the scattered light abrasions that define the grade. Softly frosted green-gold surfaces are attractive and show no wear, although moderate strike weakness occurs on the eagle's talon and left (facing) leg as well as parts of Liberty's hair curls. Census: 7 in 62, 4 finer (4/18). NGC ID# 7HX8, PCGS# 7766

## 1860-C Quarter Eagle, AU55

Final Charlotte Two and a Half

**4103** 1860-C AU55 NGC. Variety 1. The only known die pair for the 7,469 quarter eagles struck in Charlotte in 1860, the last year of production for the denomination at that facility. Scattered, grade-consistent marks appear on both sides of this satiny Choice AU example that retains considerable mint luster. Census: 24 in 55 (1 in 55+★), 36 finer (5/18). NGC ID# 25JT, PCGS# 7792

1884 Liberty Quarter Eagle, MS64+  
Seldom Seen Finer

**4104** 1884 MS64+ PCGS Secure. CAC. The Philadelphia Mint concentrated on producing half eagles and eagles during the 1880s and mintages of quarter eagles and double eagles were uniformly small throughout the decade. Only 1,950 business-strike Liberty quarter eagles were struck in 1884, making the issue quite elusive today. This Plus-graded Choice example is sharply detailed and well-preserved, with a mix of satiny luster and prooflike reflectivity in the fields. Population: 8 in 64 (1 in 64+), 3 finer. CAC: 2 in 64, 2 finer (4/18). NGC ID# 25L8, PCGS# 7836

1898 Quarter Eagle, MS67  
Unsurpassed Quality

**4105** 1898 MS67 PCGS Secure. The upper reaches of the grading scale eludes all but a few exceptional Superb Gem examples, such as this immaculate 1898 quarter eagle in MS67. The mintage was 24,000 pieces — about average for the late 1890s — but there is nothing else average about the coin. Gleaming wheat-gold color radiates mint luster in rose and olive-gold hues. A razor-sharp strike defies the late die state. Neither PCGS nor NGC report a numerically finer example. PCGS population: 14 in 67, 0 finer (5/18). NGC ID# 25LN, PCGS# 7850

1907 Liberty Quarter Eagle, MS67+  
One Finer at PCGS

**4106** 1907 MS67+ PCGS Secure. CAC. The final Liberty quarter eagle issue was well-saved for posterity. Superb Gems can be found with little trouble, although examples as fine as this are rare. Shimmering mint frost radiates over luminous peach-gold surfaces. The impression is complete and the eye appeal unbeatable. A lint mark occurs below S(TATES). Only one finer coin at PCGS (5/18). NGC ID# 2688, PCGS# 7859

## PROOF LIBERTY QUARTER EAGLES

1879 Proof Quarter Eagle, Unc Sharpness  
Only 30 Proofs Struck

**4107** 1879 — Scratch — PCGS Proof Secure Genuine. Unc Details. Only 30 proof 1879 quarter eagles were struck. PCGS estimates that 18 to 22 pieces survive in all grades, which may be a generous claim. Since our Permanent Auction Archives began in 1993, we have handled a proof 1879 quarter eagle on only 11 previous occasions, including likely duplicate appearances by individual coins. The 1879 proof is a tremendous rarity in any condition. This piece has hairlines on each side but it is a thin scratch across Liberty's neck that denies a numeric grade. The strike is full, and the glimmering fields are undeniably those of a proof.

1904 Quarter Eagle, PR63  
Collectible Proof Type Coin

**4108** 1904 PR63 PCGS. Perhaps 130 examples of the 1904 proof quarter eagle survive from the delivery of 170 pieces. The certification totals are unquestionably inflated, exceeding the original production. This example features uniform honey-gold color and considerable contrast between the fields and devices, even if insufficient for the Cameo designation. Perusal with a glass, however, reveals a few faint lines and contact marks on each side, and a shallow graze across Liberty's cheek. Despite these trivial issues, this original representative retains a great deal of eye appeal. Ex: FUN Signature (Heritage, 1/2006), lot 4909. NGC ID# 288U, PCGS# 7930

1905 Two and a Half, PR64  
Attractive Orange-Peel Texture

**4109** 1905 PR64 PCGS Secure. CAC. This Liberty Head quarter eagle was struck during the era when Mint officials manufactured all-brilliant, uncontrasted proofs. As a result, nearly all examples have this same look and few are known with cameo surfaces. Deep yellow-gold color adorns each side, and the readily appealing orange-peel texture is present throughout the profoundly reflective fields. Tiny ticks appear over each side, but they do not distract. From a mintage of 144 proofs. NGC ID# 7KG5, PCGS# 7931

## INDIAN QUARTER EAGLES

1911-D Two and a Half, MS61  
Low-Mintage, Key to the Series

**4110** 1911-D MS61 NGC. The raised wire rim between 1 and 5 o'clock on the obverse is diagnostic of the key 1911-D issue, and the strong mintmark on the reverse of this example leaves no doubt about its Denver mintage. While not all 1911-D survivors are well-struck and attractive, this one displays a sharp strike and lustrous, frosted yellow-gold surfaces. A few light field lines require a strong loupe to discern. NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half, MS61  
Sharp Mintmark**

**4111 1911-D MS61 NGC.** The mintmark and diagnostic wire rim are sharp on this 1911-D quarter eagle, and the design elements show comparably bold definition. The satin-y straw-gold surfaces exhibit no major abrasions but hairlines are visible beneath a loupe, limiting the grade. A pleasing lower-end Mint State example of the Indian quarter eagle key. NGC ID# 7KR7, PCGS# 7943

**1911-D Indian Quarter Eagle, MS61  
Eye-Catching Patina**

**4112 1911-D MS61 NGC.** Deep, reddish-tan accents at the borders surround khaki-gold surfaces of this important series key date. Iridescent colors add to the visual appeal. Sharply struck, this Uncirculated example has distinctive charm and a strong mintmark. Only the eagle's shoulder shows a bit of weakness. A trio of small marks at I and B of LIBERTY are the sole abrasions to mention. The balance of the fields and devices are remarkably free of marks for the issue. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, MS63  
Elusive CAC Example**

**4113 1911-D MS63 PCGS. CAC.** Although several dates are conditional rarities, only one Indian quarter eagle issue is considered an absolute key: the 1911-D. This Denver issue has a famously low mintage of 55,680 pieces, brought about by a lack of commercial demand for the denomination that year. Quarter eagles were not coined again at Denver until 1914, and after that not again until 1925. This Select example is sharp and satiny with yellow-gold luster. Eye appeal is pleasing for the grade. Although MS63 coins are not particularly rare for this date, CAC-approved examples in this grade are, which makes the present piece stand out. NGC ID# 7KR7, PCGS# 7943

1913 Two and a Half, MS65+  
Exceptional Surface Quality

**4114** 1913 MS65+ PCGS Secure. CAC. For Indian quarter eagles, luster quality is just as important as surface preservation when it comes to achieving a high grade. So many of these coins are either marked in the fields or exhibit substandard luster that does not befit a Gem designation. This Plus-graded CAC coin is nothing of the sort, as it shows clean surfaces and frosty luminance. The design elements are also well-struck. PCGS lists nine numerically finer representatives (4/18). NGC ID# 7KR9, PCGS# 7945

1914 Indian Quarter Eagle, MS64+  
Better Date in High Grade

**4115** 1914 MS64+ PCGS Secure. CAC. The 1914 Indian quarter eagle claims one of the smaller production totals of the series, at 240,000 pieces. Accordingly, the 1914 is a better date in high grade. This Plus-graded Choice example displays sharply detailed design elements and well-preserved yellow-gold surfaces that radiate vibrant mint luster throughout. PCGS has graded 66 numerically finer examples (4/18). NGC ID# 7KRA, PCGS# 7946

1914 Quarter Eagle, Orange-Gold MS65  
Remarkable Luster and Eye Appeal

**4116** 1914 MS65 PCGS. The 1914 Indian quarter eagle is one of the three “big keys” in the series at the Gem grade level. In MS64, this issue is plentiful, but Gems are seldom offered and are highly sought-after. Finer than MS65, the 1914 is a rarity that is out of reach for all but the most well-heeled collectors. This luminous orange-gold Gem displays luster that is immediately warm and inviting to the viewer, shimmering as the coin is rotated beneath a light. Under a loupe, the fields are revealed to be well-preserved, complementing sharp design elements. A truly outstanding example of a famous condition key. Housed in a green label holder. Population: 63 in 65 (1 in 65+), 3 finer (5/18). NGC ID# 7KRA, PCGS# 7946

## PROOF INDIAN QUARTER EAGLE

1908 Pratt Quarter Eagle, PR65  
First-Year Sandblast Proof

**4117** 1908 PR65 PCGS Secure. The year 1908 marked the debut of Bela Lyon Pratt's innovative (contemporary opponents might call it "radical") Indian Head designs for the quarter eagle and half eagle. After years of contrasted or brilliant proofs, the Mint introduced the matte (or sandblast) proof, to much public disdain. The coins were deeply colored with no brilliance or contrast, and most original examples have a distinctive brownish hue and "knife-rim or 'wire edge,'" according to the Breen Proof Encyclopedia.

This no-questions Gem proof displays both the characteristic razor-sharpness and the sparkling microscopic facets diagnostic of sandblast production. The only tiny distractions are a couple of small dark areas in the reverse field that serve more as pedigree identifiers. Although unpopular in its day, this first-year proof issue is quite popular today. NGC ID# 289G, PCGS# 7957

## THREE DOLLAR GOLD PIECES

1854-O Gold Three Dollar, AU55  
An Upper-End Example

**4118** 1854-O AU55 PCGS Secure. Variety 2. The availability of the 1854-O three dollar gold piece is high in AU50 but declines rapidly in succeeding AU grades. It is a scarce issue in Choice AU, and Mint State coins are extremely rare. This example displays bright yellow-gold color and lightly abraded surfaces. Good detail is seen on the devices despite slight high-point wear. Population: 65 in 55, 31 finer (5/18). NGC ID# 25M5, PCGS# 7971

## 1873 Closed 3 Three Dollar, XF Details

**4119** 1873 Closed 3 — Rim Filed — NCS. XF Details. Any rim filing on this coin is hidden by the holder, although both sides show bright yellow-gold color from an old cleaning. Minor strike weakness on the wreath bow is typical of the type. There is no recorded mintage for the 1873 gold three dollar issue, although all circulation strikes show the Closed 3 logotype. Survivors are scarce in all grades. This lightly circulated coin will appeal to budget-minded collectors. NGC ID# 25MW, PCGS# 7995

1879 Three Dollar Gold, MS64+  
Well-Preserved and Lustrous

**4120 1879 MS64+ PCGS.** Only 3,000 business-strike three dollar gold pieces were struck at the Philadelphia Mint in 1879, after a substantial mintage the year before satisfied the needs of the national economy for several years. This Plus-graded Choice example offers sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster throughout. PCGS has graded 50 numerically finer examples (4/18). NGC ID# 25N2, PCGS# 8001

1880 Three Dollar Gold, MS64  
Reflective Fields

**4121 1880 MS64 PCGS.** Only 1,000 three dollar gold pieces were struck in 1880. Although this date was heavily saved at the time of issue, it is conditionally scarce in Choice and finer grades and is highly popular because of its enticingly low mintage. This near-Gem displays sharp, frosty devices and reflective fields with original honey-gold and peach-orange color. A loupe reveals only a few trivial marks. Housed in a first generation holder. Population: 62 in 64 (4 in 64+), 24 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 25N3, PCGS# 8002

1885 Three Dollar Gold, MS65  
Only 801 Examples Struck

**4122 1885 MS65 PCGS.** A minuscule mintage of 801 three dollar gold pieces was accomplished in March of 1885 and none were struck during the remainder of the year. As might be expected, the 1885 has always been an elusive issue in all grades, and examples in MS65 condition are rarely encountered in today's market.

The present coin is a delightful Gem with sharply detailed design elements and well-preserved orange-gold surfaces that show a mix of vibrant mint luster and prooflike reflectivity on both sides. Overall eye appeal is outstanding. Housed in a green label holder. Population: 13 in 65 (2 in 65+), 6 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 7KDP, PCGS# 8007

## PROOF THREE DOLLAR GOLD PIECE

1860 Three Dollar, PR66 Cameo  
Prized Early Gold Proof

**4123** 1860 PR66 Cameo NGC. The PR66 grade is an extremely high level for any proof three dollar. With the added Cameo designation and as a pre-Civil War proof issue from close to the series' inception, this piece is far-and-away finer — and rarer — than most specimens encountered. While the mintage for proofs is reported to be 119 coins, it is likely that most were melted as unsold. Bowers estimates that only 10 to 12 proofs survive today. In the year that Lincoln was elected president, South Carolina seceded from the Union, and the nation's financial difficulties were so severe that the Treasury even lacked funds to pay Congress. Most U.S. citizens had other worries than obtaining a proof three dollar gold piece.

A token quantity of 7,036 business strikes for the year was produced, after which the die was resurfaced and reused for the proofs, a fact first noted by gold researcher Harry W. Bass, Jr. According to the Bowers series reference, the "relapping caused a further reduction of the J.B.L. initials and resulted in inconsistent spacing of the dentils on the obverse in certain areas." Bowers also notes a small patch of die rust on Liberty's jaw. Some of those characteristics are visible on this coin as well as some that Breen cites in his *Proof Encyclopedia*, including a "minute spine down from jaw" and "partial slight extra outlines at r. ribbon and parts of r. wreath."

The present PR66 Cameo example is one of only three so graded at NGC, with one finer (5/18). The desired gold-on-black appearance is quite evident on this piece, due to the depth of contrast between the fields and devices. Even, consistent yellow-gold color prevails throughout. The surfaces are all but free of mentionable marks, but for provenance purposes we mention a tiny planchet indent in the left obverse field, directly before Liberty's nose. This rare three dollar in excellent shape should prove to be a prize for proof gold specialists and series enthusiasts.

*Ex: Long Beach Signature (Heritage, 2/2011), lot 4431, realized \$66,229.*

**From An Important New York Collection.** NGC ID# 289Y, PCGS# 88023

## EARLY HALF EAGLES

1795 Small Eagle Five, AU55  
Scarce BD-6 Variety, S Over D Reverse

**4124** 1795 Small Eagle, S Over D, BD-6, R.5, AU55 PCGS. Bass-Dannreuther Die State b/c, in an early stage. The reverse shows a fine die crack long the top of UNI in UNITED, but the obverse is uncracked. BD-6 is a scarce Small Eagle die marriage with 60 to 80 survivors, according to John Dannreuther in *Early U.S. Gold Coin Varieties* (2006). This variety is the second and final use of the blundered S Over D reverse die, which shows the final S in STATES punched over an errant D.

This Choice AU example is well-struck and only lightly worn, showing large areas of deeply prooflike mirroring in the protected portions of the fields. The coin is problem-free and has rich tangerine-gold color. The eye appeal of the coin and the rarity of the variety make this a highly appealing first-year Small Eagle type coin.

*From The Reilly Cody Collection.* NGC ID# 25ND, PCGS# 519855 Base PCGS# 8066

1798 BD-4 Large Eagle Five, MS64  
Possibly the Finest 1798 Half Eagle

4125 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-4, High R.4, MS64 NGC. CAC. Bass-Dannreuther die state d/e, the latest die state recorded. The obverse is cracked through the tops of RTY and from the Y through all stars on the right. This die carried over from its earlier use with the 14 Stars reverse die of BD-3. The reverse was only used for this single variety, showing heavy cuds at the top, along with evidence of lapping. Although Dannreuther suggests otherwise, we have never seen an example from this reverse die without the rim breaks over TATES O. It is likely that the rim breaks developed during die manufacture before any coins were struck.

The present specimen is tied with the Bass Core Collection specimen for the finest known 1798 BD-4 half eagle, and it appears to be the single finest available 1798 half eagle of any variety. Unquestionably the single finest 1798 half eagle we have ever handled, this specimen is finer than six MS63 coins that have previously appeared in our auction archives. In fact, we are unable to find any auction appearances of an MS64 1798 half eagle by any firm. Only one other submission has received a similar grade at NGC, with none at PCGS (5/18).

Similar to the Bass Core Collection specimen, this Choice Mint State piece has frosty light yellow luster with brilliant surfaces. The peripheral detail is sharp, with weak centers. The upper obverse border is narrow, with a full reverse border, also like the Bass coin. This example has a few trivial, grade-consistent marks. Overall, it is an aesthetically pleasing piece destined for an exceptional early half eagle collection.

*Ex: Chicago Signature (Heritage, 8/2011), lot 7507, realized a record price of \$155,250.*

*From An Important New York Collection.* NGC ID# BFX6, PCGS# 507324 Base PCGS# 8078

1806 Knob 6, 7x6 Stars Half Eagle, BD-6, XF45  
Ideal Capped Bust Right Type Coin

**4126** 1806 Knob 6, 7x6 Stars, BD-6, R.2, XF45 NGC. Bass-Dannreuther Die State a/b. Always in demand as the sole Round Top, Knob 6 variety for the year, this solid XF example shows light wear and a few scattered abrasions across pleasing, apricot-gold surfaces. The coin is boldly struck from an early die state, with light die clashing on the reverse but no discernible obverse die cracks. Nor are there any adjustment marks on either side, making this a Choice example of the only 1806 half eagle with the obverse stars arranged in a 7x6 configuration. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1806 Half Eagle, AU55  
BD-6, 7x6 Stars, Knob 6

**4127** 1806 Knob 6, 7x6 Stars, BD-6, R.2, AU55 NGC. Bass-Dannreuther Die State c/d. The knobby 6 in the date identifies this plentiful variety, although the present coin is high-end and outstanding for the grade. Choice AU surfaces show luster in the fields and little wear amid original straw-gold and peach-orange coloration. Field chatter is apparent beneath a loupe. Typical of the type, this piece is weakly struck on the center and left side of the shield. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1807 Bust Right Half Eagle, AU Details  
BD-1, Late Die State

**4128** 1807 Bust Right, BD-1, High R.4 — Cleaning — PCGS Genuine. AU Details. Bass-Dannreuther Die State c/d, terminal for the reverse die, which shows a heavy cud above the T in UNITED. The obverse was used again for the BD-2 die marriage, where it finally formed a cud above the E in LIBERTY and was retired. This AU-level BD-1 coin displays an even strike and bold obverse with some weakness in the center of the reverse. Scattered abrasions are apparent on both sides, and the orange-gold surfaces have a slightly glossy appearance due to a recent cleaning.

1810 Large Date, Large 5 Half Eagle  
BD-4, AU58

**4129** 1810 Large Date, Large 5, BD-4, R.2, AU58 NGC. Bass-Dannreuther Die State a/a. This early die state coin shows no clash marks or die cracks. The strike is even and sharp, and only light high-point friction is observed, with some luster remaining in the fields. Olive-gold patina characterizes each side and no distracting contact marks are seen. Suitable for type purposes. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

**1810 BD-4 Five Dollar, MS62**  
**Large Date, Large 5 Guide Book Variety**

**4130 1810 Large Date, Large 5, BD-4, R.2, MS62 NGC.** Bass-Dannreuther Die State a/a. The earliest die state lacks die cracks or clash marks. Early U.S. Gold Coin Varieties provides the following commentary on the 1810 BD-4 half eagle: "This is one of the most seen of all the early gold coins from 1795 to 1834 Motto. The high end of the estimated mintage is 90,000 coins. Incredibly, the dies remained in great shape with nearly every example examined either in the perfect state or clashed (b/b)." An estimated 500 to 750 BD-4 five dollar gold pieces survive.

Examples offered typically fall within the AU to MS63 range, this MS62 representative being among the finer representatives we have handled in recent years. Radiant luster glows from the border areas and design recesses, illuminating lightly marked yellow-gold surfaces. Strike definition is crisp on the obverse, while trivial softness occurs on the eagle's neck and left wing feathers. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

**1811 BD-1 Tall 5 Half Eagle, AU55**  
**Elusive CAC-Approved Coin**

**4131 1811 Tall 5, BD-1, High R.3, AU55 PCGS. CAC.** Bass-Dannreuther Die State c/e, with bold clash marks above the date. The coin is evenly struck with no adjustment marks and only light wear atop the well-struck design elements. Frosty yellow-gold luster remains in the protected portions of the fields, and no major abrasions detract from the eye appeal. Few 1811 half eagles of any variety carry a CAC green label.  
*Ex: Robison Collection (Stack's, 2/1979), lot 349. NGC ID# BFXS, PCGS# 507600 Base PCGS# 8110*

**1811 Small 5 Half Eagle, BD-2, AU50**  
**Bright Luster Remains**

**4132 1811 Small 5, BD-2, R.3, AU50 NGC.** Bass-Dannreuther Die State d/a. Both sides of this partially lustrous, bright yellow-gold half eagle are void of die cracks or clash marks. Sharp design detail is minimally affected by a trace of high-point rub that defines the grade. Myriad marks, most of them minute, are peppered over each side. Both varieties of the 1811 half eagle are collectible in the sense that they come to market relatively often. The presence of an attractive, problem-free example with remaining luster would nonetheless highlight any collection. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

**1813 BD-1 Half Eagle, AU53**  
**Struck 3% Off Center**  
**on a Type One Planchet**  
**Important Early Gold Error**

**4133 1813 BD-1, R.2 — Struck 3% Off Center on a Type One Blank — AU53 PCGS Secure.** Bass-Dannreuther Die State a/a. A Type One blank is a planchet. Type Two blanks have passed through the upset mill, and exhibit a slightly raised rim, sometimes called a proto-rim. The present piece bypassed the upset mill and was struck a few degrees off center toward 3 o'clock. The stars and letters are complete, but dentils near 3 o'clock are absent or diminished. The obverse border has a fairly steep "cap" near 3 o'clock. This caramel-gold example displays light wear on the curls and wings but is refreshingly free from abrasions. Off-center early gold errors are extremely rare, and many years may pass before a similar example appears on the market.

**1821 BD-1 Five Dollar, AU Details**  
**Very Rare Date**

**4134 1821 BD-1, High R.6 — Altered Surfaces — PCGS Genuine. AU Details.** 1821 is a much better date for the Capped Head Left type. There are just two die marriages, the very rare BD-1 and the extremely rare BD-2. The two varieties share the same reverse die, but can be distinguished at a glance by the position of the final star relative to the hair curl. This orange-gold example shows only light high point wear, and exhibits luster in protected areas. The eagle is well defined but the stars are softly brought up. The surfaces appear nearly completely free from marks, but have been carefully smoothed.

## CLASSIC HALF EAGLES

1836 Second Head Five Dollar, MS63+  
Seldom Seen Finer

**4135** 1836 MS63+ PCGS Secure. CAC. Breen-6509, McCloskey 4-D, R.2. Second Head, Large Date. This Select Classic Head five is highly attractive, showing semiprooflike yellow-gold fields and well-struck, frosty devices that exhibit minor weakness only on the left shield border. The surfaces have only light field chatter that determines the grade, with few overt marks.

Most Uncirculated examples of this issue grade no finer than MS62. Typically, collectors only choose to acquire a single example of the issue for type or date purposes, although there are nine different varieties for the more ambitious specialists, using the John McCloskey table. McCloskey 4-D is one of the most plentiful of these varieties, ideal for adding a high-end coin to a collection without breaking the bank. All 1836 varieties are available in at least some capacity save for McCloskey 7-F, which is an R.7 rarity. Population: 14 in 63 (2 in 63+), 20 finer. CAC: 3 in 63, 2 finer (4/18). NGC ID# 25RY, PCGS# 8174

1836 Classic Head Half Eagle, MS64  
McCloskey 2-B, CAC Approved

**4136** 1836 MS64 PCGS. CAC. Breen-6509, McCloskey 2-B, R.4. Second Head, Large Date. The obverse has a bisecting die crack through the 6 and bust to star 8 and the border. While the die characteristic is interesting, the scarcity of the Classic Head type in Choice condition is main appeal of this near-Gem coin. For the date, it is a rarity in this grade, and only a few finer pieces are known. Aside from the usual light weakness at the center of the obverse, all design definition is sharp. Both sides have brilliant yellow-gold luster with a hint of orange. A few trivial surface marks on each side are consistent with the grade. Population: 18 in 64 (2 in 64+), 2 finer. CAC: 2 in 64, 0 finer (5/18). NGC ID# 25RY, PCGS# 8174

## LIBERTY HALF EAGLES

1840-C Five Dollar, MS64+  
Finest Known Certified by PCGS

**4137** 1840-C MS64+ PCGS. CAC. This is a monumental coin for Charlotte branch mint specialists — an 1840-C half eagle graded MS64+ by PCGS and endorsed for quality and originality by CAC. The Charlotte Mint began coining operations in 1838 and was only in its third year of production when it struck 18,992 Liberty Head half eagles in 1840. Several design changes were inaugurated that year. The portrait was modified, and the C mintmark was moved to the reverse, where it would remain for the duration of the series.

The 1840-C, more than just an early C-mint issue or the first year of the modified design, is one of the rarest half eagles produced at the North Carolina facility. The issue is scarce in any grade with about 125 to 150 survivors extant, according to Doug Winter. That puts it on par with the 1841-C and 1844-C, although it is more elusive in Mint State than either of those two issues. In fact, only the 1838-C, 1842-C Small Date, and 1861-C are rarer in Uncirculated condition.

Within the context of the issue, this MS64+ example with CAC approval is unparalleled in terms of its preservation and eye appeal. It is the single finest representative at PCGS by one and a half points, and the only near-Gem example endorsed by CAC. Its closest challenger is likely the Farouk-Pittman coin, which was graded MS64 by NGC in its last public appearance, but may now represent the single MS64+ submission at that service. Confirming this coin's status and explaining its origin, David Hall writes for PCGS CoinFacts:

“In July, 2010 two fresh new coins appeared ‘out of the woodwork.’ They are the PCGS graded MS63 and MS64+. The MS64+ is probably the finest known and the MS63 is probably tied for second finest known with the fantastic John Pittman specimen. These two ‘new’ coins had been basically unknown to the numismatic marketplace and were ‘discovered’ in the Northeast United States were they had been in a family’s private holdings for over 50 years.”

Potential interested parties should strongly consider a premium bid, as this coin may disappear once again into strong hands for some time. This green-gold near-Gem has satiny luster and excellent design definition. Although shy of fully struck, the relief elements are far stronger than typically seen for a Charlotte product. Slight softness is evident in the hair below ER of LIBERTY, and some original planchet roughness appears in that area. A hint of pale copper-orange toning on both sides adds to the incredible eye appeal.

*From An Important New York Collection.* NGC ID# 25VD, PCGS# 8196

**1845-D Half Eagle, MS61**  
Conditionally Rare in This Grade

**4138 1845-D MS61 PCGS.** Variety 13-H. Doug Winter's 2013 Dahlonega reference suggests that just 10 to 15 Uncirculated 1845-D half eagles exist, despite the fact that it is the second-most available D-Mint five dollar from the 1840s. Only the 1843-D is more available overall. Population figures suggest a higher number of 1845-D Mint State coins, although Winter's figures reflect his strict standards. In our opinion, this MS61 example fulfills any and all standards of the assigned grade. Deep greenish-gold color displays brassy undertones and the strike is remarkably sharp throughout both sides. Abrasions are limited to some light lines in the lustrous fields, and the eye appeal is great. Population: 12 in 61, 7 finer (4/18). NGC ID# 25TC, PCGS# 8224

**1852 Five Dollar, MS63**  
Rarely Offered High-End Example

**4139 1852 MS63 PCGS. CAC.** Among No Motto issues, the 1852 half eagle is fairly plentiful, but Mint State coins are scarce above MS62. This CAC-approved Select example displays a bold strike but is slightly soft on the eagle's neck. Original wheat-gold luster is frosty and shows minimal abrasions, producing strong eye appeal for the grade. Population: 20 in 63, 13 finer. CAC: 5 in 63, 4 finer (4/18). NGC ID# 2Y7R, PCGS# 8250

**1852-D Five Dollar, AU58**  
Still-Lustrous Dahlonega Type Coin  
CAC Endorsed

**4140 1852-D AU58 PCGS. CAC.** Variety 32-V. The 2 is distant from the bust to confirm the variety. The mintage was large by Dahlonega standards — 91,584 pieces — and the issue does not become scarce until the About Uncirculated level. Near-Mint AU examples are scarce, such as this AU58 with CAC endorsement. Medium green-gold surfaces show traces of pale-orange around some of the lettering. As usual, the rims and dentils are poorly impressed and the stars are rounded, yet abrasions are less numerous than expected and much luster remains across both sides. Population: 15 in 58, 9 finer. CAC: 5 in 58, 2 finer (4/18). NGC ID# 25UC, PCGS# 8252

**1853-D Half Eagle, MS60**  
Attractive Mint State Dahlonega Gold Piece

**4141 1853-D MS60 NGC.** Variety 34-Y. The mintmark is over the E in FIVE and leans slightly to the left on this variety. The 1853-D is a plentiful Dahlonega issue, ideal for type purposes, although Mint State examples are rare. This coin displays well-struck central devices but is soft around portions of the border dentils — a distinctive characteristic of the issue. The surfaces are satiny yellow-gold and without any wear. NGC ID# 25UF, PCGS# 8255

## 1874-S Five Dollar, AU58

Tied for Finest-Certified, CAC Endorsed

- 4142** 1874-S AU58 NGC. CAC. The 1874-S is quietly one of the premier condition rarities of the Liberty half eagle series. No fully Mint State coins are known, and very few near-Mint examples exist. Just 16,000 pieces were struck, and seemingly all surviving pieces entered circulation. This partially lustrous example has a few light marks on the chin and neck, but the fields are mostly free of abrasions. The sharp strike shows only faint evidence of wear. NGC reports just a few AU58 examples — only two of which have CAC endorsement — while PCGS has seen just a single AU58 and none finer. NGC Census: 8 in 58, 0 finer. CAC: 2 in 58, 0 finer (4/18). NGC ID# 25WR, PCGS# 8335

## 1890-CC Five Dollar, MS64

Attractive Color, Rare So Fine

- 4143** 1890-CC MS64 NGC. Variety 1-A. The Carson City Mint returned to half eagle production in 1890 for the first time since 1884. During much of that period the facility was entirely non-operational. The 1890-CC claims a mintage of 53,800 pieces. Perhaps five or six examples are finer than this near-Gem. Vibrant mint frost rolls over coppery lavender-gold surfaces, delivering excellent eye appeal. Strike detail is uniformly strong. Census: 17 in 64, 5 finer (5/18).

*From The Bob Williams Collection.* NGC ID# C5XF, PCGS# 8376

## 1893-CC Five Dollar, MS62

Final-Year Carson City Issue

- 4144** 1893-CC MS62 NGC. Variety 1-A. A spike from a dentil points directly at the bust tip to confirm the die marriage. This is a sharply struck, brassy-gold example from the final Carson City mintage of 60,000 half eagles. Despite its final-year status, most of the mintage was summarily released into circulation and relatively few pieces were numismatically preserved. Mint State examples are scarce today. NGC reports less than three dozen coins in a numerically finer grade. Census: 64 in 62 (1 in 62+), 35 finer (4/18). NGC ID# 25YB, PCGS# 8384

## 1903-S Five Dollar, MS66+

Among the Finest at PCGS and CAC

- 4145** 1903-S MS66+ PCGS Secure. CAC. Available in lower grades, the 1903-S half eagle is scarce in MS66 and rare finer; no finer coins are reported at PCGS (4/18). This Plus-designated example is among the finest pieces endorsed by CAC. The strike is sharp, and frosty yellow-gold luster illuminates beautifully preserved surfaces. An outstanding San Francisco type coin. Population: 26 in 66 (5 in 66+), 0 finer. CAC: 6 in 66, 0 finer (4/18). NGC ID# 25Z3, PCGS# 8408

1906 Liberty Five, MS66+  
Only Five Finer at PCGS

- 4146** 1906 MS66+ PCGS Secure. A moderate mintage of 348,700 half eagles were issued from the Philadelphia Mint in 1906, and few of those have survived in high grades. This lovely Premium Gem features a bold strike and brilliant yellow-gold luster on its satin surfaces. Population: 39 in 66 (8 in 66+), 5 finer (5/18). NGC ID# 25Z9, PCGS# 8413

1906-D Half Eagle, MS66+  
Condition Rarity

- 4147** 1906-D MS66+ PCGS Secure. CAC. Frosty wheat-gold luster is free of abrasions on this high-end Premium Gem, earning the coin a CAC green label for high-end quality. Slight strike weakness is visible on the hair curls around Liberty's face and on the reverse fletchings, but this is not distracting. The 1906-D half eagle is rarely offered this fine and is almost unknown in higher grades. Population: 8 in 66 (1 in 66+), 1 finer. CAC: 6 in 66, 0 finer (4/18). NGC ID# 25ZA, PCGS# 8414

## INDIAN HALF EAGLES

1909 Half Eagle, MS65  
Strong Definition

**4148** 1909 MS65 PCGS Secure. The 1909 is a middle-availability issue in MS64 and MS65 condition. It becomes a major condition rarity in MS66, a level that would prohibit acquisition for most collectors. Strike is typically strong, and this Gem does not deviate from that tendency. Primary color is a deep shade of orange-gold with pale blue overtones. The PCGS Population Report lists nine coins finer (5/18). NGC ID# 28DH, PCGS# 8513

1909-O Half Eagle, AU50  
The Only New Orleans Indian Gold Piece

**4149** 1909-O AU50 PCGS Secure. Arguably the most important issue of the Indian half eagle series from an historical numismatic viewpoint, the 1909-O was the only Indian gold piece coined at the New Orleans Mint just prior to its permanent closing that same year. This lightly circulated example retains considerable luster and trivial marks on its pleasing light yellow surfaces. NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, AU53  
Only O-Mint Indian Five

**4150** 1909-O AU53 PCGS Secure. Variety 1. Produced in the final year of coinage operations at the New Orleans Mint, the 1909-O is the only Indian half eagle struck at the famous Southern facility. From a small mintage of 34,200 pieces, the 1909-O is a key issue in the series. This attractive AU53 specimen features lightly worn, well-detailed design elements and lustrous orange-gold surfaces, with only minor scattered abrasions. NGC ID# 25ZK, PCGS# 8515

1909-O Five Dollar, MS60  
Final-Year New Orleans Key

**4151** 1909-O MS60 NGC. An Uncirculated example of the 1909-O half eagle is on many collectors' want lists, but the infrequency with which such coins are available prevents many enthusiasts from acquiring one. The appeal of this issue is two-fold: It is a key date in the series with a mintage of only 34,200 coins, and it is the only New Orleans issue with Bela Lyon Pratt's Indian Head design, which debuted just one year before the branch mint in New Orleans was shut down. The token quantity of half eagles coined in New Orleans in early 1909 circulated, leaving collectors with limited options if a Mint State coin is sought.

This piece is well-struck and displays original olive-gold patina. Scattered field abrasions limit the grade, but the eye appeal of this coin surpasses that of many MS61 and MS62 half eagles that we have seen of other dates. The design recesses are especially luminous. NGC ID# 25ZK, PCGS# 8515

1912-S Half Eagle, MS62

**4152** 1912-S MS62 NGC. The 1912-S Indian half eagle comes from a moderate mintage of 392,000 pieces, although it is conditionally scarce. Mint State coins are elusive overall, and pieces grading finer than MS62 are borderline rare. This coin displays original wheat-gold luster with mottled olive toning on each side. Minor strike weakness on the lower headdress feathers is not immediately noticed. Census: 59 in 62 (1 in 62+), 22 finer (4/18). NGC ID# 65KD, PCGS# 8524

1914-S Half Eagle, Satiny MS64  
A Remarkable Condition Rarity

**4153** 1914-S MS64 PCGS.

In *Indian Gold Coins of the 20th Century*, Mike Fuljenz reserves laudatory words for the 1914-S half eagle: "The 1914-S is one of the true 'condition rarities' in the Indian Head eagle [sic] series. ... in MS64 it ranks not only as the rarest date in the series but one of the rarest 20th century gold coins of any denomination." Auction data uphold this bold statement. No Choice 1914-S five has been offered at public auction since 2013, and the last PCGS-graded coin to do so was lot 5152 of our January 2011 FUN Signature, which was Plus-graded and CAC-approved and garnered \$92,000. Before that, an MS64 PCGS coin, lot 3524 in our September 2007 Long Beach Signature, realized \$54,625. Heritage has not seen a Gem example of this issue in more than a decade.

This near-Gem is satiny and free of major abrasions. Peach-gold surfaces show wisps of lilac and mint-green, adding to the eye appeal. Slight strike weakness on the lower headdress feathers is not distracting. We look forward to placing this remarkable condition rarity into the hands of an advanced Indian gold collector. Population: 7 in 64 (1 in 64+), 2 finer (4/18). NGC ID# 28DW, PCGS# 8529

1916-S Five Dollar Indian, MS64+  
Original Color, CAC Approval

**4154** 1916-S MS64+ PCGS. CAC.

This high-end, Choice 1916-S is free of most bagmarks that typically affect the issue. Highly lustrous, orange-gold surfaces flash subtle green highlights. The strike is sharp throughout all of the main motifs, although the mintmark looks more like a lump with a handle. The 1916-S is somewhat available at the MS64 level, but few pieces qualify for the PCGS Plus and CAC endorsement for overall quality and eye appeal. Population: 26 in 64+, 15 finer. CAC: 22 in 64, 9 finer (4/18). NGC ID# 28DY, PCGS# 8532

1929 Half Eagle, Uncirculated Details  
Rare Final Indian Five Issue

**4155** 1929 — Filed Rims — PCGS Secure Genuine. Unc. Details. The mintage of the 1929 half eagle exceeds its quarter eagle counterpart. But the 1929 two and a half witnessed wide distribution, while 1929 fives mostly slumbered in government holdings until their melting after the 1933 gold recall. They were likely struck to back gold certificates, since no half eagles had been coined since 1916. Exporters and bankers favored the more convenient twenty dollar denomination, while paper money was preferred in the East, Midwest, and South. This lightly abraded butter-gold representative displays coruscating luster and a good strike. The rims exhibit unobtrusive filing.

## PROOF INDIAN HALF EAGLE

**1909 Indian Half Eagle, PR68**  
**Condition Census Example**  
**Tied for Finest Certified**

**4156 1909 PR68 NGC.** Mint officials anticipated strong collector demand for the new Indian half eagle when they delivered 167 proof specimens in 1908. Sales, however, were disappointing, a fact one can easily see reflected in the limited reported mintage of the 1909 proof. This second-year issue was produced to the extent of just 78 coins, and the finish was markedly different from that employed for the 1908. The 1909, as well as the 1910, was struck with a "Roman Gold" finish, per Walter Breen, which produced a hybrid appearance between brilliant and satiny. The master hubs were lightly buffed prior to annealing, but the dies produced from the hubs were not polished and the planchets received no special treatment. The coins were struck on the medal press to fully bring up all the design elements. Aside from the extraordinary sharpness of the strike, the resulting coins were virtually indistinguishable from business-strike examples. Researcher Roger W. Burdette notes coins that went unsold were simply released into circulation as business strikes at the close of the year, to save the extra work involved in melting and recoining.

The 1909 and 1910 are the only two issues in the proof Indian half eagle series to display the "Roman Gold" finish, and survivors of both deliveries are quite rare. Considering the entire series, the 1915 is the most elusive date in absolute terms, but the 1909 is the rarest proof Indian half eagle in high grade. PCGS CoinFacts offers an estimate of just 40-50 survivors, examples of which have been graded from PR63 through PR68 at the two major grading services.

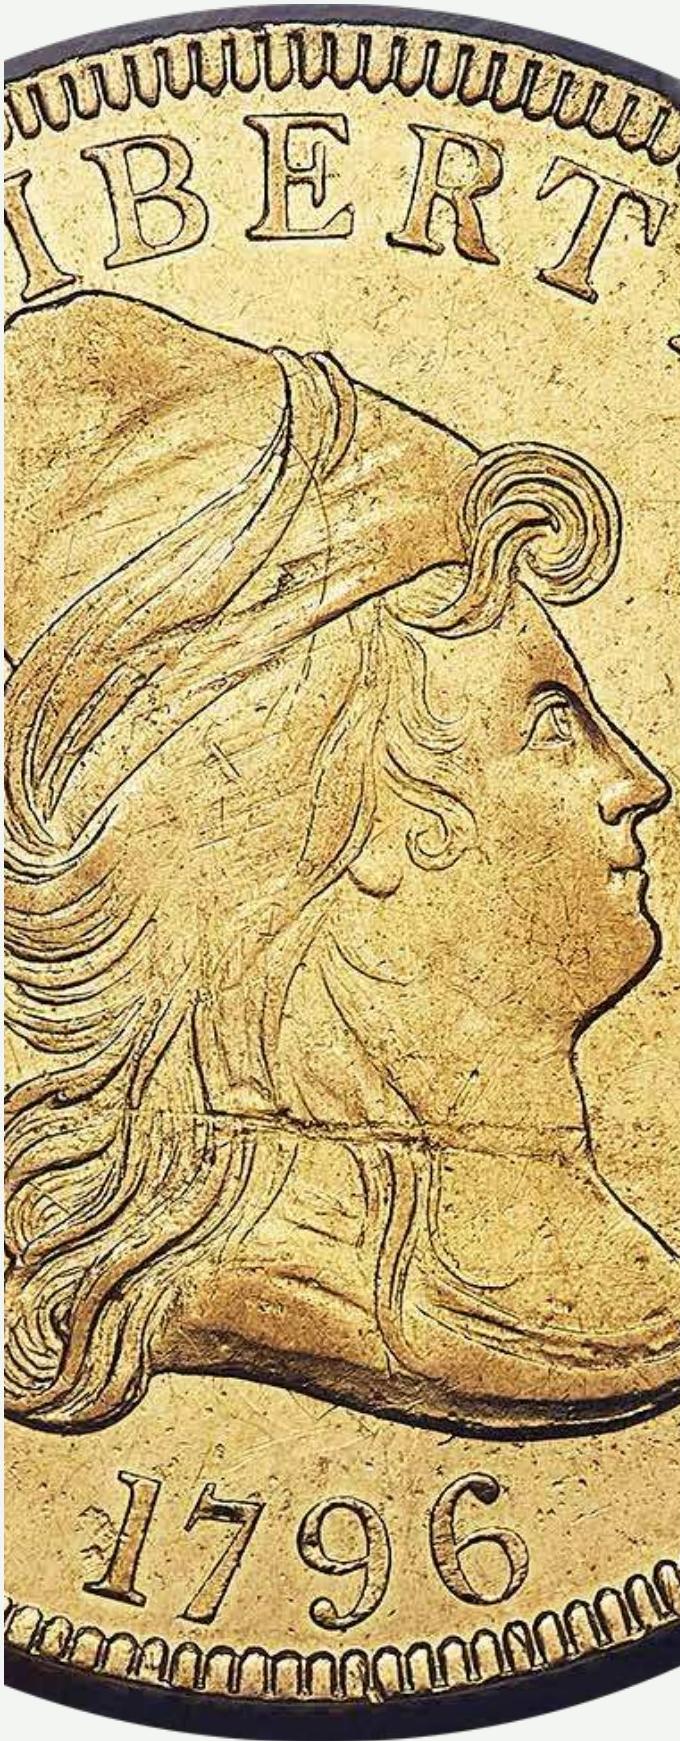

This spectacular PR68 example is tied with two other pieces for finest certified at NGC, while PCGS has graded no coins finer than PR67+ (5/18). It is easily one of the most appealing proof strikings of any denomination to sell through one of our Signature auctions. The surfaces are pleasingly bright for the finish, with considerable satin texture evident. The strike is full in all areas, and outwardly distracting and/or grade-limiting blemishes are nonexistent. It is solely for pedigree concerns that we mention a tiny swirl of overlying color in the obverse field at the upper-left corner of the first digit in the date. Medium intensity orange-gold shadings blanket both sides and dominate the outward appearance. We expect intense competition from series specialists and Registry Set enthusiasts when this lot is called.

Ex: Charlotte National Money Show Signature (Heritage, 3/2003), lot 6345; Baltimore Signature (Heritage, 3/2009), lot 3052, where it realized \$109,250.

**From An Important New York Collection.** NGC ID# 25ZS, PCGS# 8540

## EARLY EAGLES

1795 Ten Dollar, AU Sharpness  
13 Leaves, BD-1

4157 1795 13 Leaves, BD-1, High R.3 — Plugged — NCS. AU Details. Bass-Dannreuther Die State b/a, an unlisted combination. Delicate cracks connect several left-side stars, but the reverse is without cracks. A spur from the upper left serif of the Y in LIBERTY is the pick-up point for BD-1, the first half eagle die marriage. BD-1 edges out the 1796 BD-1 as the most available Small Eagle variety, and is subject to strong demand from early gold type collectors. This almond-gold example is sharply detailed. A hole has been amateurishly plugged at 12 o'clock on the obverse and 6 o'clock on the reverse. Dentils near the hole are repaired, as is the IB in LIBERTY. Both sides are hairlined but otherwise unabraded. NGC ID# 25ZU, PCGS# 45710 Base PCGS# 8551

## 1796 BD-1 Ten Dollar, AU55

Scarce, Sought-After Date

4158 1796 BD-1, R.4, AU55 NGC. Ex: American Independence Collection. Bass-Dannreuther Die State c/b. The gold coinage of 1796 is some of the most sought-after of all early United States gold. This was the inaugural year for quarter eagle coinage, which was first struck without obverse stars and then later with stars added. Three varieties of that denomination are known, one of which is largely considered uncollectible. The 1796 half eagle is a one-variety issue that shows a prominent overdate and is also scarce, with fewer than 100 pieces believed known. The most plentiful single gold issue of this date is the eagle, and this partially explains the coin's popularity in all grades. The 1796 Capped Bust ten is, like the half eagle, a one-variety coin, and it is the first die marriage of the series to feature 16 obverse stars. These are arranged 8 x 8, symmetrically on each side of the portrait of Liberty, which is an orientation unique to this issue and further heightens its intrigue.

Mintage figures for the late-18th century are not always exact. The *Guide Book* lists a mintage of 4,146 pieces for the 1796 eagle, but some 1795-dated coins may have been included in that figure. Moreover, it is believed that some 1796-dated eagles were struck in 1797. In *Early U.S. Gold Coin Varieties*, John Dannreuther suggests that the 4,146-coin mintage figure is likely the maximum number of tens struck with the date 1796, and that as few as 3,500 coins may have been produced. Whatever the case, the survival rate of this issue is well-documented due to its popularity with collectors — Dannreuther pegs it between 125 and 175 pieces for all grades. This is a large survivorship for any early gold issue, but it hardly supplies collector demand for this famous coin that is sought-after by date and variety specialists alike.

This Choice AU example displays bright yellow-gold color and satiny surfaces that have slight reflectivity in the fields. Some faint adjustment marks are visible in the center of the obverse. Minor strike weakness also occurs on Liberty's hair curls and the eagle's breast. Under a loupe, the depressed strip of an old mint-made grease streak is visible horizontally across Liberty's neck, but there is no grease within it. A few scattered abrasions on each side are also unobtrusive. On the reverse, a small lintmark is seen near the dentils at 6 o'clock. NGC ID# BFYM, PCGS# 45715 Base PCGS# 8554

1797 BD-2 Heraldic Eagle Ten, AU55  
10x6 Stars, Long Thin Neck on Eagle

**4159 1797 Large Eagle, BD-2, High R.4, AU55 NGC.** Bass-Dannreuther Die State b/b. The usual double die crack bisects the second 7 in the date. The right crack is heavy below the 7, and continues to the drapery. After a small production of Small Eagle pieces, the Mint changed to the Heraldic Eagle reverse design that was patterned after the Great Seal. All 1797 varieties exhibit 16 obverse stars, here arranged 10 left, 6 right. The eagle has a long, ungainly neck reminiscent of the Small Eagle design.

This Choice About Uncirculated piece displays pale green and grayish-gold surfaces with traces of lighter rose luster in the peripheral areas. Numerous faint surface marks and tiny planchet flakes are visible on both sides, but they barely affect the overall visual appeal. The motifs are sharply struck, while soft luster remains across both sides. NGC ID# 25ZY, PCGS# 45717 Base PCGS# 8559

1799 Ten Dollar, VF Details  
BD-7, Small Obverse Stars

**4160 1799 Small Obverse Stars, BD-7, R.3 — Ex-Jewelry — PCGS Secure Genuine. VF Details.** Bass-Dannreuther Die State a/a. Breen's "Irregular Date" obverse with the 7 entered too high and tilted right. The second 9 is also punched too high, as if a curved date was intended. The obverse die also struck BD-8, but that variety has a different placement for STAT relative to the clouds below. Those who collect by Guide Book variety often select BD-7 to represent the Small Obverse Stars listing. This is a glossy and luminous sun-gold example without any mentionable marks or evidence of repair.

1799 BD-7 Eagle, AU Details  
Irregular Date

**4161 1799 Small Obverse Stars, BD-7, R.3 — Edge Damage — NGC Details. AU.** A plentiful variety with small stars on the obverse, this die is called the Irregular Date obverse as the 1 is far below the hair curl and the second 9 nearly touches the drapery. All other obverse dies have the opposite layout with the 1 close and the second 9 distant. Both sides of this piece have myriad handling marks on the straw-gold surfaces with smoothing noted at the upper obverse rim.

1799 Eagle, AU Details  
BD-8, Irregular Date Variety

**4162 1799 Small Obverse Stars, BD-8, R.5 — Altered Surfaces — PCGS Genuine. AU Details.** Bass-Dannreuther Die State c/b. The date was entered off-kilter, the 7 high and angled right, the first 9 low. Diagnostic rim crumbling near stars 1 and 2 on the obverse pairs with a heavy die crack within C of AMERICA, but no other die cracks have formed to represent a rather early die stage for this scarce variety. The Bass-Dannreuther reference suggests just 45 to 55 pieces survive in all grades. This example is bright on the reverse, suggesting a gentle cleaning, but no signs of repair or other surface alterations are apparent. A large measure of eye appeal remains.

1799 BD-10 Eagle, AU58

Large Obverse Stars

**4163** 1799 Large Obverse Stars, BD-10, R.3, AU58 PCGS. The 10 known die varieties for 1799 eagles include eight varieties with small stars on the obverse, and two large stars varieties. The BD-10 is easily the most plentiful of all 10 varieties with an R.3 rarity rating that suggests 200 to 500 examples survive. The actual total is likely closer to the high end of that range. The Irregular Date, Small Stars variety, BD-7, is the only contender among the common varieties that are ideal for type or date collections. Those two varieties have a total population greater than the other eight varieties combined. This near-Mint representative exhibits brilliant light yellow-gold surfaces with minimal handling marks and nearly full surviving mint luster. A splendid example. NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

1800 BD-1 Eagle, AU50

Low Official Mintage of 5,999 Coins

Produced in 1801

**4164** 1800 BD-1, High R.3, AU50 NGC. Bass-Dannreuther Die State c/e. A die crack through the top of LIBERTY and clashed dentils over STAT are characteristic of the later die state for this, the only variety known for the 1800 ten dollar gold piece. That only one set of dies was employed is unsurprising. Just 5,999 coins were manufactured, according to official records. In reality, an unknown number of coins, including this one, were produced in 1801 after the first obverse die for that year failed. Thereafter, Mint officials reused the 1800 obverse until a new 1801 obverse was finished. That explains the issue's relative availability compared to other early eagles.

The stars are weak, but Liberty's portrait exhibits good detail with continued delineation of the hair strands. The eagle's wing and neck feathers are clear, but the shield is somewhat soft. Adjustment marks occur around the reverse border on this pale red-gold representative. NGC ID# BFYT, PCGS# 45732 Base PCGS# 8563

**1801 BD-2 Ten Dollar, AU Details  
Sharp, Even Impression**

**1841 Ten Dollar, Near-Mint  
Elusive Early Liberty Head Type Coin**

- 4165 1801 BD-2, R.2 — Ex-Jewelry — PCGS Genuine. AU Details.** Bass-Dannreuther Die State a/a, with no discernible die clashing. The spines in Liberty's cap are die damage other than clashing. This AU-level BD-2 eagle is sharp and evenly struck with bright yellow-gold surfaces. Both sides are polished, as normally seen on gold pieces that were once part of jewelry. This coin does not show any obvious mount locations, although they may be hidden by the holder tabs.

## LIBERTY EAGLES

**1840 Liberty Ten Dollar, AU58  
Few Finer Pieces Are Known**

- 4166 1840 AU58 NGC.** This attractive near-Mint State eagle has apricot-gold surfaces that show slight reflectivity with partly lustrous, well-mirrored fields that contrast nicely against the satiny devices. The Garrett-Guth gold Encyclopedia comments, "The 1840 eagle is an underrated date that is almost impossible to find in Mint State. This date is typically seen in Extremely Fine or worse conditions." Bearing out that assertion, both NGC and PCGS have graded 26 coins in AU58, with only nine pieces finer (5/18).  
Ex: Long Beach Signature (Heritage, 9/2006), lot 3735. NGC ID# 262G, PCGS# 8581

**1842 Ten Dollar, AU58  
Large Date, Scarce in Any Grade**

- 4168 1842 Large Date AU58 PCGS.** Although the Guide Book mintage for the Large Date variety is multiples of its Small Date counterpart, the two issues are similarly priced, and approximately equal in rarity. That is, probably about 150 to 200 of each survive. This near-Mint Large Date example has a good strike and occasional hints of honey toning. Marks are relatively few and unimportant aside from a small tick on the cheekbone. Population: 3 in 58, 7 finer (4/18). NGC ID# 262M, PCGS# 8584

**1844 Ten Dollar, MS61**  
Only 6,361 Pieces Struck  
One Example Finer

**4169 1844 MS61 NGC.** The 1844 eagle lays claim to one of the smallest mintages in the series with a production of only 6,361 coins. Most of those were struck on November 20, 1844 (4,600 pieces), while another group (1,731 coins) was delivered on December 31. As its mintage suggests, the 1844 is rare in any grade. About 60 to 80 examples are believed extant, nearly all of them in circulated condition. Only three Uncirculated coins have been certified at the leading grading services, all of them at NGC. This piece is tied with one other example in MS61 (the Twelve Oaks Collection coin), and a single MS63 from the Admiral Collection is finer.

Diagnostic die gouges occur along the left obverse border between stars 1 and 4. Luster glows from the protected areas, and the devices are impressively sharp on each side. Straw-gold surfaces with a few tiny alloy spots are readily appealing, and marks are generally small and insignificant. Examples of similar quality are extremely rare and tend to stay off the market for years, even decades at a time. A premium bid is encouraged. Census: 2 in 61, 1 finer (5/18). NGC ID# 262S, PCGS# 8590

**1844-O Eagle, AU58**  
Partly Lustrous, Rare Any Finer

**4170 1844-O AU58 PCGS. Variety 5.** Partial mint luster radiates from both sides of this yellow-gold, lightly abraded eagle, while a sharp strike is seen on both sides. A substantial mintage of 118,700 pieces translates to availability only through VF and XF grades. In About Uncirculated condition, the 1844-O becomes notably elusive and it is rare in Mint State. Five die pairs are known for the issue. This variety shows recutting on the inner left curve of the mintmark and faint die cracks that are visible above stars 3 through 7. Population: 10 in 58, 6 finer (4/18). NGC ID# 554G, PCGS# 8591

**1849 Ten Dollar, Orange-Gold MS62**  
Minimally Abraded

**4171 1849 MS62 NGC.** The 1849 is one of the more readily obtainable issues in the No Motto series and is often used as a type coin. It is most frequently encountered in VF to AU grades, however Uncirculated coins are seldom encountered, making this an important coin not just for type collectors but also for date and mintmark specialists. This piece is a bit softly struck, but the rich golden-orange coloration and minimal abrasions for the grade make it readily appealing. Census: 11 in 62, 11 finer (4/18).  
Ex: Portland Signature (Heritage, 3/2004), lot 6283. NGC ID# 2635, PCGS# 8601

**1851 Ten Dollar, MS62**  
One Finer Example at NGC

**4172 1851 MS62 NGC.** By 1851, the massive amounts of gold mined in California had the effect of driving the price of silver up to the point where such coins were being pushed out of circulation. Naturally, gold coinage production increased to compensate, and two new denominations were created. Ten dollar output remained elevated in 1851 with 176,328 pieces struck. However, only a dozen examples, possibly even fewer, are known in Mint State. This important MS62 offering features a strong strike with only slight peripheral incompleteness. Both sides shimmer with frosty mint luster over lightly marked peach-gold surfaces. Census: 4 in 62, 1 finer (4/18). NGC ID# 263A, PCGS# 8606

**1854-S Ten Dollar, AU58**  
Inaugural San Francisco Mint Eagle

**4173** 1854-S AU58 NGC. The 1854-S is generally available in VF to XF grades from a mintage of 123,626 pieces, but it becomes scarce in About Uncirculated or finer conditions. This near-Mint example approaches Uncirculated definition with sharply struck devices and brightly lustrous, yellow-gold surfaces. Light chatter and swirling lines plus a bit of wear account for the assigned grade. Just six pieces are certified numerically finer at NGC. Census: 58 in 58, 6 finer (5/18). NGC ID# 263K, PCGS# 8615

**1860-O Ten Dollar, AU58**  
Final No Motto New Orleans Issue

**4174** 1860-O AU58 NGC. Variety 2. Low Date. This near-Mint State example is one of the few survivors of the final New Orleans eagle issue before the facility was taken over by non-federal authorities — first to the State of Louisiana, and ultimately the Confederacy. No more eagles were struck in New Orleans until 1879. The production of 11,100 pieces circulated in the South, where most were lost to attrition. This example is lightly abraded with pleasing khaki-gold color and remaining mint luster. The coin retains its appeal as an underrated issue in a most-challenging series. Census: 23 in 58, 6 finer (4/18). NGC ID# 2645, PCGS# 98631

**1861 Liberty Eagle, MS61**  
Popular No Motto Type Coin

**4175** 1861 MS61 NGC. Bulging Bun Subtype. Various tales have been told to explain the substantial production of gold coins at the Philadelphia Mint in 1861. While these certainly add intrigue, the actual reason for striking so many coins was directly related to the amount of California gold being mined and shipped to Philadelphia. In all, 113,164 eagles were struck for circulation. Both sides are a light shade of peach-gold and show scattered marks as expected. Strongly defined. NGC reports 13 finer grading events (5/18). NGC ID# 2647, PCGS# 8633

**1865-S Ten Dollar, XF45**  
865 Over Inverted 186

**4176** 1865-S 865 Over Inverted 186 XF45 ANACS. The 1865-S ten dollar is a significant rarity in the absolute sense with perhaps 65 to 95 examples extant. The issue is known with a Normal Date, the scarcer variant, and with dramatically Repunched Date that shows 865 punched over an inverted 186. About 40 to 60 of these coins are known, many of them heavily circulated and/or impaired. This Choice XF survivor is neither. It maintains good detail, including clear star radials, curls, feathers, and talons. Scattered marks are present throughout orange-gold surfaces. Housed in a small-sized holder. NGC ID# 264G, PCGS# 8643

**1868 Eagle, AU58**  
An Outright and Condition Rarity

**4177** 1868 AU58 PCGS. A limited mintage of 10,630 eagles was issued at the Philadelphia Mint in 1868. At the time, silver and gold were scarce due to hoarding activities during and following the Civil War. Nobody trusted paper money during those difficult times. This Choice AU example has myriad, trivial marks on its light yellow-gold surfaces that exhibit nearly full mint luster. Population: 14 in 58, 6 finer (5/18). NGC ID# 264N, PCGS# 8653

**1868-S Ten Dollar, AU55**  
Original Surfaces, Few Are Finer

**4178** 1868-S AU55 NGC. Olive accents add an original look to the underlying orange-gold surfaces of this scarce San Francisco issue. Virtually all eagles from the 1860s are extremely challenging, with the exception of the high-mintage 1861. The 1868-S is somewhat available compared to other Motto tens, but only in circulated grades, since neither NGC nor PCGS show any full Mint State examples. This Choice About Uncirculated example shows numerous tiny abrasions but no large marks. A bold strike and traces of mint luster remain throughout both sides. Census: 14 in 55, 7 finer (4/18). NGC ID# 264P, PCGS# 8654

1871 Ten Dollar, Choice AU  
Low Mintage of 1,790 Coins

**4179** 1871 AU55 NGC. This rare, low-mintage issue had an original production total of only 1,790 business strikes. Condition is naturally a challenge with this date. Most survivors are VF or XF at best, while AU examples are rare. The fields of this Choice About Uncirculated eagle appear slightly reflective when turned under a light, unsurprising considering that virtually all examples are "first strikes." The device details are complete in all areas. Numerous small and medium-sized abrasions occur across each side. A rare opportunity for the advanced gold collector. Census: 14 in 55, 11 finer (4/18). NGC ID# 264W, PCGS# 8660

1872-S Ten Dollar, Sharp AU58  
Nearly Unseen Finer

**4180** 1872-S AU58 NGC. The San Francisco Mint made less than half as many eagles as it did five dollar gold coins in 1872 — 17,300 of the larger denomination compared to 36,400 of the smaller. Today, any example approaching Mint State is rare. This AU58 NGC representative shows a few thin marks and ticks on the obverse, none of which are distracting, along with a bold strike and lovely eye appeal. The reverse is especially sharp. Remaining luster appears over medium-gold surfaces. Census: 11 in 58, 2 finer (4/18). Ex: ANA National Money Show Signature (Heritage, 10/2012), lot 6039. NGC ID# 2653, PCGS# 8665

1876-S Ten Dollar, AU53  
Rare in This Condition

**4181** 1876-S AU53 NGC. The 1876-S is a scarce issue in all grades and unknown in Mint State. Only 5,000 pieces were struck, and even AU-level survivors are rarely offered. This About Uncirculated piece is well-detailed and retains luster in the protected regions of the fields. The bright yellow-gold surfaces show only a few light, unobtrusive abrasions, consistent with the grade. Most of the 1876-S eagles that we have handled over the years graded in the VF to XF range. This nice AU coin is an important offering for the collector of rare San Francisco gold pieces. Census: 6 in 53, 9 finer (4/18). NGC ID# 265E, PCGS# 8676

1879 Ten Dollar, MS64  
Rare at This Level

**4182** 1879 MS64 PCGS. In 1879, ten dollar gold production at the Philadelphia Mint reached a high unseen since the start of the California Gold Rush. A total of 384,780 coins were struck, yet examples are surprisingly rare at this near-Gem level. Frosty peach-gold surfaces are boldly detailed with just minor softness on the forecurls. Trivial ticks on each side. Population: 14 in 64 (1 in 64+), 3 finer (5/18). NGC ID# 265M, PCGS# 8683

1880-CC Liberty Eagle  
Uncirculated Details

**4183** 1880-CC — Harshly Cleaned — PCGS Secure Genuine. Unc. Details. Variety 1-B. Three die marriages are confirmed from the low Carson City mintage of 11,190 pieces. Most of the 300 to 400 survivors are in XF to AU grades, and PCGS has yet to certify any above MS61. This well-struck example has lustrous borders and lacks any singularly mentionable marks. The fields exhibit myriad tiny shallow strike-throughs, as struck and caused by hardened material stuck to the dies. Hairlines on the right reverse indicate an ill-advised past wipe.

1884-CC Ten Dollar, AU55  
Scarce in High Grade

**4184** 1884-CC AU55 PCGS Secure. CAC. Variety 1-A. Only one die variety is known for the 1884-CC eagle, struck to the extent of 9,925 coins. Heavy die scratches on Liberty's neck are as-made. This Choice AU coin is well-detailed and partially lustrous with original olive-gold patina. The surfaces show remarkably few abrasions. Higher-grade examples of this Carson City issue are rarely offered. Population: 24 in 55, 26 finer. CAC: 6 in 55, 8 finer (4/18). NGC ID# 266B, PCGS# 8704

1891-CC Ten Dollar, MS63

Few Certified Finer At Either Service

1893-CC Liberty Eagle, MS61

Elusive Final-Year Issue

**4185** 1891-CC/CC FS-501 MS63 NGC. Variety 4-C. While the 1891-CC is readily available in lesser grades, it becomes scarce at the Select Uncirculated level, and finer examples are rare. This lustrous and colorfully toned MS63 is sharply struck with smooth reflectivity in the fields and excellent eye appeal. Light bagmarks — the bane of Carson City eagles — are scattered across both sides, but no individually heavy marks exist. Vibrant orange-gold surfaces with deep-orange accents capture the eye. Housed in a circa-2000 holder. NGC reports just 7 numerically finer pieces (5/18).

*From The Bob Williams Collection.* NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

**4186** 1893-CC MS61 PCGS Secure. Variety 1-A. The Carson City Mint struck a small mintage of 14,000 Liberty eagles in 1893, the final year of coinage operations at the famous Western facility. The coins were released into circulation and suffered heavy wear and attrition over the years. As a result, the 1893-CC is the most elusive CC-mint eagle of the 1890s and Mint State survivors are rare. The present coin is an impressive MS61 example, with unusually sharp definition on all the design elements. The pleasing yellow-gold surfaces show the expected number of minor contact marks for the grade, but overall eye appeal is strong. Population: 5 in 61, 5 finer (4/18). NGC ID# 2672, PCGS# 8726

## 1907-S Liberty Eagle, MS66

Old Green Label Holder, Tied for Finest Known  
Underrated Rarity of the Series

**4187** 1907-S MS66 PCGS. The commentary by Jeff Garrett and Ron Guth is instructive regarding the surprising scarcity of 1907-S eagles: "The 1907-S eagle is easily the rarest of any Liberty Head eagle of the 20th century, even though the mintage is not among the lowest. Akers called this date one of his favorites and considered it one of the most underrated of all U.S. coins of any denomination."

Housed in an old green label holder, this Premium Gem 1907-S displays breathtaking surface quality and a pinpoint-sharp strike. Vibrant sun-glow-gold surfaces display orange accents and strong cartwheel luster. The 1907-S is exceptionally rare at this high grade, with just three examples certified by both services combined at the MS66 level, and none finer. The population in MS66 has not changed in more than 10 years. PCGS population: 2 in 66, 0 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 38EP, PCGS# 8765

## PROOF LIBERTY EAGLE

1905 PR63 Cameo Eagle  
A Contrast Rarity

**4188** 1905 PR63 Cameo NGC. Coinage of Liberty Head ten dollar proofs reached its zenith in 1900, when 120 pieces were struck, and by the time the 1905 issue was created, reduced demand meant that only 86 specimens were coined. Most examples of the brilliant-era 1905 proof eagle show little to no contrast, which makes the cameo effect on this Select piece important. Powerfully mirrored yellow-gold surfaces show occasional splashes of milky toning close to the devices. Though the fields show a handful of light to moderate hairlines, the boldly impressed portrait and eagle are largely unaffected. Census: 1 in 63 Cameo, 11 finer (5/18). NGC ID# 28GC, PCGS# 88845

## INDIAN EAGLES

1907 Indian Ten, MS64  
Iconic Wire Rim Variety

**4189 1907 Wire Rim MS64 PCGS Secure.** President Theodore Roosevelt approached the famed sculptor, Augustus Saint-Gaudens, with a coinage redesign project. The artist accepted, and went to work on new designs for the double eagle and the eagle. Unfortunately, cancer reared its ugly head, and Saint-Gaudens succumbed without the opportunity to work on designs for other denominations. However, other talented artists filled in, and by 1921, all denominations had new designs.

The first Indian eagles, with a wire edge or rolled edge, were issued in small quantities, and these issues have a distinctive appearance entirely different from later issues. This Choice Mint State example exhibits a satin finish and pristine light yellow-gold surfaces. An old anonymous envelope accompanies this lot, showing a price of \$150. NGC ID# 26F2, PCGS# 8850

## 1907 No Motto Eagle, MS65

Popular Two-Year Design

**4190 1907 No Motto MS65 NGC.** The introductory regular issue in the Saint-Gaudens ten dollar series is also one of the more collectible dates in high grades. Although the No Motto design was controversial, many pieces were saved. This Gem is well above-average with radiant mint luster and warm yellow-gold color. The devices are crisp. NGC ID# 28GF, PCGS# 8852

1907 No Motto, No Periods Indian Eagle  
Bright, Satiny Gem

**4191 1907 No Motto MS65 NGC.** This gorgeous No Motto Gem would serve as an ideal representative of the two-year subtype with which the Saint-Gaudens Indian Head eagle series commences. Each side boasts light yellow-gold coloration and uninhibited mint luster that generate great eye appeal. Strongly defined motifs house a couple of insignificant marks within the bonnet feathers. The exposed fields are remarkably clean. NGC ID# 28GF, PCGS# 8852

1907 No Motto Ten Dollar Indian, MS66  
Beautiful Luster, Outstanding Type Coin

**4192** 1907 No Motto MS66 PCGS Secure. This Premium Gem No Motto type coin displays a bold strike and radiant cartwheel luster with original orange-gold and peach coloration. Under a loupe, a couple of small, unobtrusive marks on Liberty's cheek and another one that is almost lost in the left reverse field are all that prevent an even finer grade. This is a highly appealing coin for the MS66 level. The No Periods 1907 Indian eagle is the ideal type coin for this series. More than 239,000 pieces were struck, and high-grade survivors are generally available for a price. But even among high-grade coins, the present piece stands out as most impressive. PCGS lists a dozen Superb Gems finer (4/18). NGC ID# 28GF, PCGS# 8852

1907 No Periods Ten, MS66  
High-End No Motto Type Coin

**4193** 1907 No Motto MS66 NGC. The 1907 No Periods Indian eagle continues to be the ideal choice for type collectors to represent the No Motto design with a high-grade coin at a reasonable cost. Although not common, Premium Gem examples of this issue are more available than those of any other No Motto issue. Coins in this grade balance quality and eye appeal with price. This piece displays bold motifs and satiny yellow-gold mint luster. Some faint metal flowlines are visible in the fields, but these only serve to make the cartwheel effect more vibrant. NGC lists 34 finer submissions (5/18). NGC ID# 28GF, PCGS# 8852

1908-S Indian Ten, MS62  
First S-Mint Indian Eagle

**4194** 1908-S MS62 PCGS. This honey-gold San Francisco Mint Indian ten represents the first appearance of the design from the California facility. Only 59,850 examples were struck, and relatively few survive in Mint State grades. This piece has pleasing surfaces with faint hairlines that are the only imperfections to limit the grade. NGC ID# 28GL, PCGS# 8861

1908-S Ten Dollar, MS63  
Scarce in High Grade

**4195** 1908-S MS63 NGC. The 1908-S has a mintage of 59,850 pieces, representing the first Indian eagles struck at the San Francisco Mint. High-grade Mint State examples are scarce, making this a better date in the series. This Select example displays pleasing, satiny luster and straw-gold patina, along with sharp design elements. A light mark or two limit the grade.  
Ex: Dallas Signature (Heritage, 11/2006), lot 2444, which realized \$7,331.25. NGC ID# 28GL, PCGS# 8861

**1909 Ten Dollar, MS64**  
Exemplary for the Grade

- 4196 1909 MS64 PCGS Secure. CAC.** Satiny yellow-gold luster produces a vibrant cartwheel effect on this near-Gem 1909 Indian eagle. No major abrasions are present. Under a loupe, a small mark appears behind Liberty's eye, but any other grade-limiting imperfections are unimportant. This is a well-struck and conditionally scarce example of this slightly better date. PCGS has only certified 30 higher-grade representatives (4/18). NGC ID# 28GM, PCGS# 8862

**1911-D Eagle, AU58**  
Low-Mintage Denver Issue

- 4197 1911-D AU58 PCGS.** With only 30,100 pieces struck, the 1911-D Indian eagle is a semikey date in all grades, particularly scarce in Mint State. No other With Motto issue has a lower mintage. This near-Mint coin displays sharp detail and bright straw-gold luster. Light friction is apparent on the high points of the devices and in the fields, but no singular abrasions are observed. NGC ID# 28GU, PCGS# 8869

**1911-D Ten Dollar, Lustrous AU58**

- 4198 1911-D AU58 PCGS Secure. CAC.** Barely a brush of high-point friction is evident on this CAC-approved 1911-D Indian eagle, and significant satin luster remains in the fields. Both sides have warm honey-gold color and relatively smooth, appealing surfaces. The 1911-D, with a mintage of 30,100 coins, is a semikey in all grades. It is collectible in the upper AU range but is elusive in Mint State. NGC ID# 28GU, PCGS# 8869

**1911-D Ten Dollar, MS62**  
Attractive and Rare

- 4199 1911-D MS62 PCGS.** Jeff Garrett and Ron Guth observe of the 1911-D eagle in their *Encyclopedia of U.S. Gold Coins*: "This is the undisputed condition rarity to the entire series; it is difficult to locate in all grades and especially so in MS65." Besides claiming the lowest mintage of the entire series, the 1911-D apparently was not an issue that was saved in any quantity as the survivor rate is observably low. Because of the financial incentive to maximize the grade of this scarce date, some examples are submitted for grading many times and, therefore, the NGC Census Report and the PCGS Population Report are artificially high. This is a sharply struck coin that has satiny mint luster. Obviously from the grade, there are a few small abrasions on each side, but none are worthy of singular mention. NGC ID# 28GU, PCGS# 8869

1911-D Ten Dollar, MS63  
Sought-After Key Date  
Seldom Offered This Fine

**4200** 1911-D MS63 NGC. Ten dollar gold coin production at the Denver Mint began on April 26, 1911. By the time officials at that facility were through, only 30,100 pieces had been struck — a total that stands as the lowest among regular issues in the series. Consequently, the 1911-D is a highly sought-after date, but like many Saint-Gaudens eagles it is scarce in high grades. Any Uncirculated representative would hold a special place in a complete set. This Select Uncirculated example would certainly be a highlight.

Full strike detail occurs on Liberty's forecurls and the two lowest headdress feathers. Detail is similarly sharp on the reverse, the sole exception being the tip of the eagle's wing. Warm golden-yellow surfaces are awash in satin mint luster and display clean fields with just a couple of ticks on the portrait. NGC ID# 28GU, PCGS# 8869

1911-S Ten Dollar Indian, MS66  
Among the Finest Certified, CAC Approved

**4201 1911-S MS66 PCGS. CAC.** The 1911-S Indian ten dollar gold piece was once considered one of the rarest dates of the series in Mint State. The date boasts a low mintage of just 51,000 pieces, and the great majority of the coins were released into circulation at the time of issue. Before the discovery of a hoard of 50 pieces in Europe in the 1970s, Mint State specimens of this date were virtually unheard-of. The date began appearing in auction catalogs in the 1940s, but even great collectors like F.C.C. Boyd and King Farouk were content with specimens that graded only VF during that era. Louis Eliasberg, the "King of Coins," settled for an XF40 example in his extraordinary collection.

The situation changed radically in 1979 when Marc Emory, acting for New England Rare Coin Galleries, brokered a deal for a group of Gem Uncirculated 1911-S eagles through his contacts in Spain. The story of this remarkable find was told for the first time in the Ivy Press publication *The Coinage of Augustus Saint-Gaudens*. The hoard was originally the property of the American governor of the Philippines in 1911, who gave a group of 50 ten dollar gold coins from the San Francisco Mint to a Spanish citizen who was residing in the Philippines at the time. The coins were preserved by that gentleman, who later returned to Spain, and the hoard became part of his estate when he died. The coins were retained by his family for many years until his grandson decided to sell them through a prominent coin collector from Barcelona. Marc Emory met with the collector and finalized a deal through a Swiss bank for 30 of the coins. The remainder of the hoard eventually became available, and NERCA became the conduit for their entry into the U.S. coin market. Nearly all Gem level 1911-S eagles in collector's hands today are from this fantastic hoard.

The present coin is sharply struck, with complete detail evident on all the design elements. The well-preserved, slightly granular surfaces are overlaid with soft, satiny luster that creates compelling visual appeal. Only 12 coins have been certified at the MS66 level by NGC and PCGS combined, with none finer (5/18).

Ex: Baltimore Signature (Heritage, 3/2009), lot 3177.

**From An Important New York Collection.** NGC ID# 28GV, PCGS# 8870

**1912 Indian Ten, MS65**

Conditionally Scarce At This Level

- 4202 1912 MS65 NGC.** The strike is razor-sharp throughout both sides and the few high-point marks that exist are well-disguised in the hair or the headdress. Mint luster radiates from the centers to illuminate vibrant, sun-gold color. This lustrous and frosted Gem is likely just a nick on the neck away from a Premium Gem designation. Housed in a prior generation holder. Census: 58 in 65 (1 in 65+), 12 finer (5/18). NGC ID# 28GW, PCGS# 8871

**1913-S Ten Dollar, MS61**  
Better San Francisco Issue

- 4203 1913-S MS61 NGC.** The low mintage of 66,000 coins makes the 1913-S one of the semikeys to the Indian eagle series. Mint State examples of this issue are universally elusive, and it is especially difficult to find a lower-end example with pleasing visual appeal. This MS61 coin is an exception. Scattered light marks limit the grade, but original wheat-gold luster and an absence of severe abrasions place it beyond its peers in terms of aesthetics. Census: 73 in 61, 47 finer (4/18). NGC ID# 28GZ, PCGS# 8874

**1915-S Indian Eagle, AU58**  
Lustrous Fields, CAC Approval

- 4204 1915-S AU58 NGC. CAC.** Satiny luster illuminates the fields on this CAC-approved near-Mint coin, complementing bold design elements that show only slight high-point friction. A few scattered abrasions appear under a loupe. Only 59,000 eagles were struck in San Francisco in 1915, making this a semikey in all grades. The present coin is highly appealing for the AU level. NGC ID# 28H6, PCGS# 8879

**1915-S Eagle, Lustrous AU58**

Rarely Offered CAC Example

- 4205 1915-S AU58 PCGS Secure. CAC.** The scarcity of Mint State 1915-S Indian eagles promotes strong demand for high-end AU coins. This is a rare CAC-approved example in the AU58 grade. Barely a brush of friction is visible beneath a loupe, and the surfaces show minimal abrasions. Original straw-gold luster remains in the fields, and the design elements are sharp. A better date with a mintage of only 59,000 pieces. NGC ID# 28H6, PCGS# 8879

**1930-S Ten Dollar, AU Details**  
Rare Mass-Melted Issue

- 4206 1930-S — Surfaces Smoothed — PCGS Genuine. AU Details.** The mintage of the 1930-S ten was only 96,000 pieces, but most of the production apparently never left Treasury vaults, and was eventually melted. There are less than 200 survivors, far fewer than the number of collectors tackling the Indian ten series. The present yellow-gold example shows little if any wear from circulation, and neither side shows abrasions. The surfaces are luminous, with glossy devices and mattelike fields.

**LIBERTY DOUBLE EAGLES****1850 Double Eagle, Choice AU**  
Partial Luster Remains

- 4207 1850 AU55 PCGS Secure.** Bright yellow-gold coloration on this Choice AU 1850 double eagle is original. The devices are sharply detailed, and each side shows moderate surface chatter consistent with the grade. Hints of soft mint luster remain in the fields. Collectors interested in federal coins struck with gold mined during the California Gold Rush should not overlook the early Philadelphia double eagles. Prior to the opening of the San Francisco branch mint in 1854, large amounts of California gold were shipped to New Orleans and Philadelphia for coinage. The double eagle denomination was the recipient of most of this gold. NGC ID# 268F, PCGS# 8902

**1850-O Double Eagle, XF45**  
Exceptionally Smooth Surfaces

**4208** 1850-O XF45 PCGS. Variety 2. The New Orleans Mint received a number of gold deposits from California mining operations in 1850, and struck 141,000 double eagles. This was the first coinage of the denomination at a branch mint, and most examples circulated extensively. This Choice XF survivor displays remarkably smooth yellow-gold surfaces and satiny fields with some luster. NGC ID# 268G, PCGS# 8903

**1851-O Twenty Dollar, AU55**  
Appealing and Sharp

**4209** 1851-O AU55 PCGS Secure. Variety 2. With a mintage of 315,000 pieces, the 1851-O is the most plentiful double eagle struck at the New Orleans Mint. But it is still significantly scarcer than the Philadelphia issue of this date, particularly in high grade. The Choice AU surfaces of this piece offer sharp detail and bright, satiny yellow-gold color. Some semiprooflike reflectivity is visible in the protected portions of the fields. Few finer examples are certified at PCGS. Population: 48 in 55, 35 finer (4/18). NGC ID# 268J, PCGS# 8905

**1851-O Double Eagle, AU55**  
New Orleans Type Coin

**4210** 1851-O AU55 NGC. Variety 2. Mintmark placement on the reverse and a few small die lumps around ER in LIBERTY on the obverse aid in identifying this 1851-O double eagle variety. Early New Orleans issues such as the 1851-O are relatively available due to higher mintages brought about by large gold deposits from California. But in AU55, the 1851-O is conditionally elusive and in high demand. This piece is sharp and has some satin luster in the fields. Bright straw-gold surfaces are lightly abraded but still pleasing. NGC ID# 268J, PCGS# 8905

**1852-O Double Eagle, AU53**  
Historic New Orleans Issue

**4211** 1852-O AU53 NGC. Variety 1. New Orleans gold, especially double eagles, is challenging and rewarding to collect. The New Orleans Mint only struck large quantities of double eagles in the first four years of the denomination's existence as a consumer for California gold until the San Francisco Mint was established and built. The 1852-O is among these collectible O-mint twenties in AU grades. This piece is bright yellow-gold and well-detailed. Heavy abrasions, as seen here, are a characteristic of Type One New Orleans double eagles that complements the history of these circulating Gold Rush-era issues. NGC ID# 268L, PCGS# 8907

**1852-O Double Eagle, AU53**  
Pleasing Original Surfaces

**4212** 1852-O AU53 NGC. Variety 1. The 1852-O Liberty double eagle is an available issue among New Orleans gold, from a mintage of 190,000 pieces. Much of the gold deposited at the Louisiana branch mint that year came from California, since there was not yet a branch mint in San Francisco. Later double eagle issues from New Orleans are famed rarities, as gold deposits at this branch mint decline dramatically in 1854, when the San Francisco Mint opened and began to serve West Coast gold miners.

The 1852-O represents one of the few O-mint double eagles that the average collector can acquire. This well-struck example shows a few traces of wear on the design elements, but a cluster of minor abrasions on Liberty's face are the most significant distractions. The pleasing greenish-gold surfaces retain some traces of original mint luster.

Ex: Central States Signature (Heritage, 4/2012), lot 6825, which realized \$6,095. NGC ID# 268L, PCGS# 8907

1853/'2' Double Eagle, Lustrous AU55  
In-Demand Guide Book Variety

**4213** 1853/'2' FS-301 AU55 NGC. While the exact nature of the so-called 1853/'2' date anomaly continues to prompt debate, it remains a popular Guide Book listing. This moderately abraded example shows many nicks and abrasions plus a few reeding marks, yet it retains nearly full mint luster throughout the bright, yellow-gold surfaces. A curved die line or remnant of a digit is visible within the lower loop of 3 to confirm the *Cherrypickers'* variety. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1853/'2' Twenty Dollar, MS60  
FS-301, Major Rarity in Mint Condition

**4214** 1853/'2' FS-301 MS60 NGC. Breen-7162. The 1853/'2' variety is included in the *Cherrypickers' Guide*, where it is described simply as a "well-known variety." The variety has been controversial with respected researchers on both sides of the debate. Doug Winter writes, "I believe it is [an overdate] and continue to list it in this book [doubleeaglebook.com] as such, but I can see the doubters' argument as well." Uncontested is its status as a rarity in Mint State, where only five to seven pieces are believed extant. NGC has seen six Uncirculated 1853/'2' twenties, possibly including resubmissions.

Mint frost issues from the protected areas, including the stars, legends, and central design elements, brightening abraded yellow-gold surfaces. Stars 10 through 13 are incomplete, but the strike is otherwise strong. A conditionally rare example of this popular and much-discussed variety. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

**1853-O Double Eagle, Choice XF  
Slight Field Reflectivity**

**4215** 1853-O XF45 NGC. Variety 1. The first four double eagle issues from the New Orleans Mint are the only collectible twenties from the facility. Of those, the 1853-O is the most elusive with a small mintage of 71,000 pieces. This example is right in line with what is normally encountered in terms of grade. Anything finer is elusive. Moderately marked yellow-gold surfaces show a hint of field reflectivity. The stars and central devices on each side are well-defined, although the date and reverse legends are slightly soft. NGC ID# 268N, PCGS# 8910

**1855-O Twenty Dollar, XF45  
Rare New Orleans Issue**

**4216** 1855-O XF45 PCGS. Variety 1. The 1855-O double eagle boasts a small mintage of 8,000 coins, but it is often overshadowed by the rarity of the even lower-mintage 1854-O and 1856-O double eagles struck immediately before and after it. This issue appears at auction only about twice as often as either of the two other aforementioned dates, which coincides with the certified population figures and survival estimates. We are aware of 24 examples of the 1854-O double eagle and 25 examples of the 1856-O, both with lower populations than the PCGS survival estimates. PCGS and NGC combined report 98 grading events for the 1855-O, which likely also includes some duplication. Recent offerings of problem-free XF and low-end AU 1855-O double eagles have surpassed \$40,000 at auction, signaling strong demand for rare New Orleans gold that only seems to grow.

This Choice XF coin displays original orange-gold surfaces with hints of luster in the protected portions of the fields. Scattered light abrasions accompany light wear, but the eye appeal is excellent for a New Orleans double eagle. Population: 16 in 45 (1 in 45+), 20 finer (4/18). NGC ID# 268W, PCGS# 8915

1856 Double Eagle, AU58  
Smooth and Partially Lustrous

**4217** 1856 AU58 PCGS. CAC. Uncirculated examples of this Type One Philadelphia issue are rare, and high-end AU pieces are scarce. This CAC-approved near-Mint coin displays original olive-gold coloration and surprisingly smooth surfaces. Luster remains in the fields and detail is sharp. A highly appealing example of the 1856 double eagle, particularly for the grade. NGC ID# 268Y, PCGS# 8917

1856 Liberty Twenty, MS60  
Rare in Mint State

**4218** 1856 MS60 PCGS Secure. The 1856 double eagle is usually only available in XF and AU grades. Mint State pieces are rare — significantly rarer than the San Francisco double eagles of this date. This piece displays a bold strike and frosty wheat-gold luster. Scattered abrasions limit the grade but none are individually bothersome. Population: 4 in 60, 30 finer (4/18). NGC ID# 268Y, PCGS# 8917

1857-S Twenty Dollar, MS66  
Ex: S.S. Central America  
Delightful ‘Ship of Gold’ Example

**4219** 1857-S MS66 PCGS. Variety 20A. Ex: S.S. Central America. SSCA 0740. The “Spiked Shield” variety, named after a pair of die lines near the left shield border. A gorgeous high-grade peach-gold example. The lustrous, crisply struck, and uncommonly smooth surfaces show no indication that they reposed for more than a century at the bottom of the Atlantic Ocean. Although a handful of ‘57-S twenties are certified finer, we doubt that any surpass the eye appeal of the present coin. Housed in a gold label holder. Included with the lot is a “Ship of Gold” book. NGC ID# 2696, PCGS# 8922

**1858 Twenty Dollar, MS61**  
Smooth, Appealing Surfaces

**4220 1858 MS61 PCGS Secure.** The 1858 double eagle is a rarity in Mint State, most often seen with heavy abrasions and below-average eye appeal. This piece is only graded MS61, but this grade is high-end for the issue and the coin offered here is remarkably smooth for the grade. Only faint slide marks over the high points of the devices appear to prevent a finer designation, as both sides are smooth, lustrous, and unabraded. The quality is outstanding. The last MS61 PCGS coin we handled was in lot 4348 of our August 2016 ANA Signature, a coin which realized \$15,275 and showed far more abrasions than this piece does. Population: 12 in 61, 9 finer (4/18). NGC ID# 2697, PCGS# 8923

**1859-S Twenty Dollar, Lustrous AU58+**  
Borderline Mint State Example

**4221 1859-S AU58+ PCGS Secure.** This Plus-graded 1859-S is just a few light marks away from wholly unabraded surfaces, and it is considerably less abraded than many full Mint State examples. Satiny rich-gold luster provides substantial eye appeal, while a trace of rub on the highest points accounts for the assigned grade. A sharp strike remains in place despite the brief stint in circulation. Note that PCGS reports just one piece with the Plus designation at the AU58 level (the present coin). Population: 39 in 58 (1 in 58+), 44 finer (4/18). NGC ID# 269C, PCGS# 8928

**1861 Double Eagle, MS62**  
Few Marks for the Grade

**4222 1861 MS62 NGC.** The 1861 No Motto twenty is one of the few Type One double eagles that is somewhat available in Uncirculated grades, thanks to a massive mintage of nearly 3 million pieces. The issue is still scarce any finer than this attractive and lustrous example, since fewer than 100 pieces have been certified by NGC and PCGS combined above the MS62 grade (5/18). Frosted sun glow-gold surfaces display olive and rose highlights, and show only a few minor grazes and tiny marks. The strike is sharp throughout. NGC ID# 269G, PCGS# 8932

**1863 Liberty Double Eagle, XF40**  
Circulated Type One Issue

**4223 1863 XF40 NGC.** Relatively few 1863 double eagles circulated to any extent during the war, since most were either held back at the Treasury, exported for foreign obligations, or hoarded by the public. Remarkably, this twenty saw significant circulation before being put aside. Luster remains among numerous light abrasions. Modest high-point wear adds to the unmistakable appearance of original, circulated gold. NGC has certified just eight examples in the XF40 grade (4/18). NGC ID# 269P, PCGS# 8939

1866 Double Eagle, MS61  
First With Motto Issue

**4224 1866 Motto MS61 PCGS Secure.** The inaugural year of the Liberty Head Motto design included a mintage of nearly 700,000 coins at the Philadelphia Mint. Most examples were exported and melted at their destination, and those that survive are often circulated to some extent. Mint State representatives prove challenging. This is a bright, softly frosted MS61 with strong detail throughout. Bagmarks are in line with the grade. Population: 41 in 61, 10 finer (5/18). NGC ID# 269X, PCGS# 8949

1867 Twenty Dollar, MS62  
Extremely Rare Any Finer

**4225 1867 MS62 NGC.** The second year of Type Two production at the Philadelphia mint dropped by nearly 65% over the previous year's output. Uncirculated examples of the 1867 are scarce and typically only available up to MS62. Finer coins are extremely rare. Excellent eye appeal is the result of coruscating luster over minimally abraded yellow-gold surfaces. Strike characteristics are strong. A blush of coppery-orange color occurs on the rim above (STAT)ES. Only three coins are finer at NGC (4/18). NGC ID# 269Z, PCGS# 8951

1868-S Type Two Twenty, MS60  
Always Elusive in Mint State

**4226 1868-S MS60 PCGS Secure.** Mint State Type Two double eagles are few and far between regardless of date or Mint, although the 1868-S has seen a small influx of lower-end Uncirculated coins in the past few decades. Apparently, most 1868-S twenties circulated heavily in West Coast commerce and some coins were exported in the course of foreign trade.

This eye-catching MS60 example is brightly lustrous. The obverse is only lightly abraded and appears finer than the assigned grade, although close inspection of the reverse reveals a mark on the horizontal shield stripes and a curved scrape well-hidden in the rays starting between S and T of STATES. Both marks are obscure in-hand, and the overall impression is positive for this bold Mint State twenty. Population: 15 in 60, 22 finer (4/18). NGC ID# 26A4, PCGS# 8954

**1868-S Double Eagle, MS61****Low Survival Rate**

**4227 1868-S MS61 PCGS Secure.** Although the San Francisco Mint emitted 837,500 double eagles in 1868, only a few of those have survived in Mint State grades. PCGS has certified 41 Mint State examples with none finer than MS62, while NGC has examined 43 examples including a solitary MS64 and no others better than MS62. This example has myriad trivial marks, although none are obvious to the unaided eye. Both sides are fully lustrous with light yellow gold surfaces and sharp design features. An important opportunity for the advanced double eagle collector. Population: 19 in 61, 6 finer (5/18). NGC ID# 26A4, PCGS# 8954

**1869-S Double Eagle, MS61****Frosty Original Luster****Scarce in Uncirculated Condition**

**4228 1869-S MS61 PCGS Secure.** The 1869-S double eagle is a plentiful date in XF and AU grades but is scarce in Mint State. This piece grades only MS61, but it is elusive even at this level, with finer pieces being decidedly rare, particularly in PCGS holders. The luster is also original — a warm peach-gold hue with orange accents. Scattered light abrasions are not individually distracting. Population: 45 in 61, 16 finer (4/18). NGC ID# 26A6, PCGS# 8956

**1872 Twenty Dollar Liberty, MS61****Condition Rarity in Finer Grades**

**4229 1872 MS61 PCGS Secure.** Any example of the 1872 Type Two twenty is scarce above the About Uncirculated level, and its rarity increases exponentially with every rung up the Mint State ladder. This lustrous MS61 example appears close to an even finer grade, with few surface abrasions, a sharp strike, and attractive sun-gold color with pale-orange accents. Only occasionally do even the finest double eagle collections have a sharper example. Population: 55 in 61, 13 finer (4/18). NGC ID# 26AD, PCGS# 8963

**1873-S Twenty Dollar, MS60****Open 3, Scarce in Mint State**

**4230 1873-S Open 3 MS60 PCGS.** Small S mintmark. Struck with dies that did not arrive at the San Francisco Mint until the larger portion of the 1 million+ mintage was complete (using Closed 3 dies). The Open 3 variant commands a significant premium among double eagle specialists and type collectors. This Uncirculated example shows myriad tiny marks but no large abrasions. Lustrous medium-gold surfaces are generally well-struck with rose highlights, although star 4 is rounded and Liberty's upper hair strands and bun lack full definition. NGC ID# 26AM, PCGS# 8979

1873-S Open 3 Double Eagle, MS61  
Bold and Well-Preserved

**4231** 1873-S Open 3 MS61 PCGS.

Small S. Mint officials decided early on that the Closed 3 date digit employed early in the year was problematic and that new dies bearing an Open 3 would have to be made. While this was easily accomplished at the Philadelphia facility, it took a considerable amount of time to get the new dies out to San Francisco. Consequently, these Open 3 S-mint coins are much scarcer than the Closed 3 pieces, which were struck through most of the 1873. Uncirculated examples are scarcely seen and rarely found finer than MS61.

Although the exposed areas are predictably bagmarked, the recesses retain frosty luster and the devices lack any signs of friction. Fewer abrasions appear on the reverse. The obverse stars are fully formed, and Liberty's curls show much detail for the Type Two design. NGC ID# 26AM, PCGS# 8979

1874-CC Double Eagle, AU53  
Attractive for the Grade

**4232** 1874-CC AU53 PCGS Secure. Variety 3-A.

The usual wide mintmark variety. A small die lump behind Liberty's eye identifies the obverse. This Carson City issue is relatively plentiful, suitable for collectors seeking a single type coin from this mint. The fields of the present coin retain glimpses of reflectivity and show minimal abrasions. The design elements are well-defined. Rich straw-gold coloration warms each side. NGC ID# 26AP, PCGS# 8971

1874-CC Twenty Dollar, Lustrous AU58

**4233** 1874-CC AU58 PCGS. Variety 4-A.

Most 1874-CC double eagles were struck with this Wide CC reverse die, which was previously employed for a portion of the small 1873 coinage. The Carson City Mint struck 115,085 twenties in 1874, and this issue is proportionately more available in high grade than the 1873-CC. Nonetheless, Mint State examples are rarely seen, and this high-end AU coin possesses of wealth of luster and original orange-gold coloration. The strike is sharp, and only a brush of friction is visible on the high points of the Liberty portrait and the eagle's head. Scattered abrasions limit the grade, including a few scrapes near star 1 on the obverse. Scarce in this grade, particularly at PCGS, where only 26 finer coins are reported (5/18). NGC ID# 26AP, PCGS# 8971

1875-CC Double Eagle, MS62

Upper-End for the Grade

1876-CC Type Two Twenty, AU58

Lustrous Red-Gold Surfaces

**4234** 1875-CC MS62 PCGS. Variety 1-B. As the most-available Type Two representative of the Nevada Mint, the 1875-CC attracts collectors of many interests as well as Carson City specialists. While available in both circulated and Uncirculated conditions, Mint State examples become scarce at the MS62 level, and they are rare any finer despite numerous imports from foreign hoards.

One would be hard-pressed to find an 1875-CC twenty with more pleasing aesthetic qualities for the assigned grade. A loupe reveals smooth, nearly unabraded fields and motifs, immersed in dappled shades of peach-gold and tangerine-orange with khaki-gold overtones. The strike is bold, although a trifle weak on a few of the high points and at the stars flanking Liberty's hair bun. Housed in a green-label holder. PCGS reports just 31 numerically finer certifications (5/18).

*From The Bob Williams Collection.* NGC ID# 26AT, PCGS# 8974

**4235** 1876-CC AU58 NGC. CAC. Variety 3-D. The widely spaced mintmark immediately identifies the variety. This reverse was paired with a single obverse and shows the first C in the mintmark directly over the center of the N in TWENTY and the second C over the left edge of the T. Aside from the rare die pairing, this near-Mint Carson City double eagle has a lot going for it, including original reddish-gold color and an impressive degree of vibrant luster remaining. There are shallow, wispy marks on each side and a touch of strike softness occurs on the hair curls and the reverse stars, but the overall impression is bold. This coin easily has the look of a higher-graded example. NGC ID# 26AW, PCGS# 8977

1879-S Twenty Dollar, MS62  
Semiprooflike and Appealing  
Few Finer Pieces Known

**4236** 1879-S MS62 PCGS Secure. A number of 1879-S double eagles were discovered in the Saddle Ridge Hoard, but the high-grade Mint State population was unaffected. This San Francisco issue remains scarce in MS62 and is decidedly rare finer. The finest pieces known are a pair of MS64 coins at PCGS. None are finer than MS62 at NGC, although a couple of coins in this grade are designated Prooflike at that service (4/18).

This PCGS coin is sharp and semiprooflike, showing remarkably clean surfaces for the grade. Only some faint lines on the cheek and in the fields (largely visible only due to the coin's reflective qualities) are all that deny a finer numeric assignment. Rich orange-gold color blankets each side, and eye appeal is far beyond expectations for the grade. Population: 94 in 62, 9 finer (4/18). NGC ID# 26B9, PCGS# 8991

1882-CC Twenty Dollar, AU55  
39,140 Coins Minted

**4237** 1882-CC AU55 NGC. Variety 1-B. The usual obverse with a spiked die line before the eye. The second C in the mintmark is slightly higher than the first. Double eagles were struck to the extent of 39,140 coins at the Carson City Mint in 1882. This is a partly lustrous Choice AU example with luster glowing from the design recesses. Well-struck and showing scattered marks over each side. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, AU58  
Pleasing Luster and Color

**4238** 1882-CC AU58 PCGS Secure. Variety 1-B. The mintmark slants ever-so-slightly upward. From a mintage of 39,140 pieces, the 1882-CC Liberty double eagle is a scarce issue at the AU58 grade level, and Mint State coins are scarcer still. This impressive near-Mint representative shows just a trace of wear over strongly impressed design elements, and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 26BF, PCGS# 8997

1883-CC Double Eagle, AU58  
Lustrous Fields

**4239** 1883-CC AU58 PCGS. Variety 2-A. Frosty mint luster illuminates the yellow-gold fields, while olive accents appear over device high points that show minimal friction. Although light surface chatter is apparent throughout, this near-Mint 1883-CC double eagle is otherwise attractive with its blatantly original coloration. The 1883-CC is a plentiful issue among Carson City twenties. However, coins grading finer than this are moderately elusive. NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, Elusive MS60**

**4240 1883-CC MS60 PCGS Secure. Variety 2-A.** Most Uncirculated examples of the 1883-CC spent time abroad in foreign holdings, only to return to the U.S. numismatic scene within the past two decades. Possibly, this MS60 example is one of the world travelers, with lightly abraded surfaces from handling and counting, but no visible wear from circulation. The strike remains sharp on both sides, and mint luster cascades over greenish-gold surfaces. NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, MS62  
Excellent Luster and Color**

**4241 1883-CC MS62 PCGS Secure. Variety 2-A.** The 1883-CC double eagle is generally available in most grades, but one look at the certified population figures reveals tremendous conditional rarity in MS62 and finer levels. We have previously handled only a dozen coins in MS62 or MS62+, including at least one reappearance of the same coin. Heritage has not offered a finer example since 2004, and we are not aware of a finer coin being offered at auction anywhere since 2009.

This rare MS62 coin displays sharp detail and minimally abraded, satiny surfaces with vibrant cartwheel luster. Rich orange-gold color is especially pleasing. Population: 24 in 62 (1 in 62+), 4 finer (5/18). NGC ID# 26BH, PCGS# 8999

**1883-S Double Eagle, MS63**

Rare in Finer Condition

**4242 1883-S MS63 NGC.** The 1883-S double eagle is available in Mint State for a price, but coins grading finer than MS63 are rare. This Select example displays a sharp strike and frosty original luster. Rose-gold interiors transition to yellow-gold borders, and only light abrasions are seen, mainly on the obverse. A vibrant cartwheel effect adds to the eye appeal. Census: 88 in 63 (1 in 63+), 6 finer (4/18). NGC ID# 26BJ, PCGS# 9000

**1883-S Twenty Dollar, MS63+  
Tall S Mintmark**

**4243 1883-S MS63+ PCGS Secure.** Two mintmarks sizes are identified among the many survivors from the mintage that approached 1.2 million coins. This piece has a Tall S mintmark, and others are known with a small or squat mintmark. The present piece, exhibiting a bold strike and frosty yellow-gold luster with lovely rose overtones, is one of just seven Plus-designated PCGS certified coins at this grade level, with only 16 numerically finer (5/18). NGC ID# 26BJ, PCGS# 9000

**1884-CC Liberty Double Eagle, MS60  
Impressive Uncirculated Carson City Type**

**4244 1884-CC MS60 PCGS Secure. Variety 1-A.** The MS60 grade can be problematic for collectors, since technically Uncirculated coins may be heavily marked and lack eye appeal, but not so here. Flashy rich-gold surfaces display a sharp strike and show minimal marks for the assigned grade. Strong cartwheel luster illuminates frosted fields and devices, with pockets of reflectivity adding to the excellent visual impression.

*From The Bob Williams Collection.* NGC ID# 26BK, PCGS# 9001

## 1884-CC Double Eagle, Lustrous MS61

1884-CC Double Eagle, MS62  
Rich Coloration and Vibrant Luster1884-CC Twenty Dollar, MS62  
Uncollectible in Higher Grades

**4246** 1884-CC MS62 NGC. Variety 1-A. Intersecting die lines above the designer's initials are diagnostic of the only known die pair for this issue, which claims a mintage of 81,139 coins. The typical survivor is lightly circulated, grading between AU50 and AU53. Mint State representatives are scarce in any grade, but they become virtually uncollectible any finer than this. Brightly lustrous straw-gold surfaces present complete definition on the relief elements. Minor ticks and grazes are present but largely inconsequential. This is an impressive Carson City twenty dollar gold piece with only six finer submissions at NGC (5/18). NGC ID# 26BK, PCGS# 9001

**4247** 1884-CC MS62 PCGS. Variety 1-A. The only known dies employed in the production of 81,139 1884-CC double eagles feature a pair of intersecting die lines on Liberty's neck and the second C in the mintmark over the right edge of the D in DOLLAR. This Carson City double eagle and its contemporaries were never intended to survive in high grades. They were produced to satisfy the needs of general commerce out West, which was based almost exclusively on the use of gold and silver coinage or "hard money." A few dozen Uncirculated examples are known, almost all of them in the MS60 to MS62 grade range and extensively bagmarked. Five to 10 pieces might survive in finer condition.

This MS62 representative boasts swirling mint frost and vibrant shades of rose and sun-gold color that deliver marvelous eye appeal. The strike is strong throughout, and the only thing that holds the grade back is a linear pin scratch that extends from the rim near star 5 across the eyebrow and through the curls. Housed in a green label holder. PCGS reports seven finer submissions (5/18).

*From The Bob Williams Collection.* NGC ID# 26BK, PCGS# 9001

**1887-S Double Eagle, MS63**  
Important Condition Rarity

- 4248** 1887-S MS63 NGC. Just 283,000 examples were coined, and many of those entered circulation, remaining there for years. This Select Mint State 1887-S double eagle is a highly attractive piece for the grade, with pleasing, mostly mark-free surfaces and rich honey-gold luster. Census: 27 in 63, 0 finer (5/18). NGC ID# 26BS, PCGS# 9007

**1889-CC Double Eagle, AU55**  
Remarkably Attractive and Luminous

- 4249** 1889-CC AU55 PCGS Secure. Variety 1-A. The 1889-CC is relatively collectible among Liberty double eagles, although this is a key date in the Morgan dollar series. The 1889-CC twenty comes from a low mintage of 30,945 coins, but many examples have turned up in hoards in recent decades to supply collections. This Choice AU example is nonetheless exceptional for the grade, showing remarkably smooth surfaces and luminous honey-gold fields. Slight high-point wear does not detract, and the coloration is original. NGC ID# 26BV, PCGS# 9011

**1890-CC Twenty Dollar, AU55**  
Attractive Color, Nice Eye Appeal

- 4250** 1890-CC AU55 NGC. Variety 1-A Two die varieties are known, identifiable by mintmark position. This example has the CC mintmark nearly centered between Y and D, and show curious unfinished areas within the recesses of each C. A total of 91,209 pieces was struck from both varieties combined. The 1890-CC remains popular with collectors as one of the more-available Carson City double eagle issues. This Choice AU coin displays vibrant, sun-gold surfaces overall, with exceptionally few abrasions for the grade. The smooth fields retain much mint luster that complement sharply struck devices.  
Ex: Long Beach Signature (Heritage, 6/2014), lot 5945. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU58**  
Frosty Original Mint Luster

- 4251** 1890-CC AU58 NGC. Variety 1-A. In this die state, lapping on the reverse has partially effaced the eagle's tailfeathers, although the obverse appears unlapped. This near-Mint 1890-CC double eagle is sharp and vibrantly lustrous, showing frosty yellow-gold mint luster. Faint high-point friction on the portrait accounts for the grade, although surface abrasions are minimal. An appealing Carson City double eagle. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty Dollar, AU58**  
Logical Carson City Type Coin

- 4252** 1890-CC AU58 PCGS. Variety 1-A, Late Die State. Ex: Rive d'Or Collection. The right (facing) tailfeathers are partially or fully missing from die lapping, a late die state characteristic of the issue. Vivid yellow-gold surfaces emit nearly full, frosted mint luster from this near-Mint State example. Light bagmarks and abrasions require magnification, which also reveals light high-point wear. The 1890-CC is always in demand for Carson City type. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, MS62  
Variety 1-A

**4253** 1890-CC MS62 PCGS. Variety 1-A. Two obverse dies and two reverse dies were mated in monogamous relationships to produce the two varieties of 1890-CC double eagles currently known. An early die state with die doubling apparent on TWENTY and PLURIBUS. The Carson City Mint coined 91,209 double eagles in 1890, and that was the fourth highest mintage of the 19 annual issues coined from 1870 through 1879, 1882 through 1885, and 1889 through 1893. This impressive Mint State piece is far finer than the average certified example with its grade of 50. The strike is bold and the frosty luster is fully brilliant. An exceptional representative. Population: 70 in 62 (4 in 62+), 8 finer (5/18). NGC ID# 26BY, PCGS# 9014

1890-S Twenty Dollar Liberty, MS64  
Frosty, Peach-Gold Surfaces

**4254** 1890-S MS64 PCGS. Medium S. More than 800,000 double eagles were struck at the San Francisco Mint in 1890. A sizeable number survive in Mint State and can be found, with patience, up to this near-Gem grade level. Anything finer becomes rare. Frosty mint luster swirls over peach-gold surfaces. The strike is fully impressed on each side. An eye-appealing, well-preserved Liberty Head twenty. NGC ID# 26BZ, PCGS# 9015

1892-CC Twenty Dollar, AU55  
Lustrous and Appealing

**4255** 1892-CC AU55 PCGS Secure. Variety 1-A. The yellow-gold surfaces retain most of the original mint luster despite light wear and minor signs of circulation. Only tiny marks dot the frosted, partially reflective surfaces. Many 1892-CC double eagles have returned to U.S. collectors from foreign holdings over the past few decades, yet Choice Uncirculated examples are always in demand. NGC ID# 26C6, PCGS# 9020

1892-CC Double Eagle, MS61  
Far Finer Than Usual

**4256** 1892-CC MS61 NGC. Reflective fields are evident on both sides of this attractive double eagle. The surfaces display light khaki-gold color with faint rose overtones. Surface marks scattered throughout, but they are entirely trivial and undistracting. The obverse exhibits slight peripheral softness, however the strike strengthens considerably over the central devices. The Carson City Mint only coined 27,265 double eagles in 1892, likely from newly mined Nevada gold. Most examples entered commerce at the time of issue, and the average certified grade of survivors is only about AU53. Few Uncirculated examples are extant, and none grade more than three points higher than this MS61.  
Ex: Long Beach Signature (Heritage, 6/2011), lot 5048. NGC ID# 26C6, PCGS# 9020

1892-CC Twenty, MS63  
Only One Finer

**4257** 1892-CC MS63 NGC. CAC. Variety 1-A. The only known dies for the 27,265-coin mintage of 1892-CC double eagles. This is an important condition rarity in the series, with a combined NGC and PCGS population of nine MS63 examples, and only one finer. Myriad copper toning spots on each side attest to the originality of this sharply defined Select Mint State double eagle that exhibits full yellow-gold luster. With most examples entering circulation, the average certified grade of survivors is about 10 points lower than the grade of this important piece. Census: 4 in 63, 1 finer. CAC: 3 in 63, 0 finer (5/18).  
*From The Bob Williams Collection.* NGC ID# 26C6, PCGS# 9020

**1892-S Liberty Double Eagle, MS64+  
Vivid Color, Vibrant Mint Luster**

**4258 1892-S MS64+ PCGS Secure.** The 1892-S Liberty double eagle is a popular Type Three issue, from a substantial mintage of 930,150 pieces. As might be expected, the 1892-S is an available issue in grades up to the MS63 level, but Choice specimens are scarce, and finer examples are rare. This spectacular Plus-graded Choice example displays sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded 21 numerically finer examples (5/18). NGC ID# 26C7, PCGS# 9021

**1893-CC Double Eagle  
Uncirculated Sharpness**

**4259 1893-CC — Cleaned — PCGS Secure. Unc. Details. Variety 2-A.** Upon first glance, this final-year Carson City twenty appears to merit an MS63 or MS64 grade. The canary-gold surfaces display vibrant cartwheel luster, the strike is crisp, and the only marks of any note are one reed impression each on the cheekbone and the field beneath the left (facing) wing. Close inspection reveals hairlines on the left obverse and a small, subdued bottle-shaped depression on Liberty's cheek. From a low mintage of 18,402 pieces.

*From The Bob Williams Collection.*

**1893-CC Twenty Dollar  
Mint State Details**

**4260 1893-CC — Scratch — PCGS Genuine. Unc. Details. Variety 2-A.** A low mintage Carson City issue from the waning days of the legendary Old West facility. The sun-gold surfaces display ample luster. A narrow mark on the field near Liberty's nose, and a noticeable depression on the cheek, correspond with the PCGS disclaimer. The reverse exhibits an even layer of translucent lacquer, and the obverse has small areas of lacquer near star 13 and between stars 1 and 2.

*From The Bob Williams Collection.*

**1898-S Twenty Dollar, MS65  
Only One Coin Finer at PCGS**

**4261 1898-S MS65 PCGS.** Housed in a first generation "rattler" holder, the frosted surfaces of this Gem example radiate cartwheel luster and rose highlights surrounded by greenish-gold fields. Only a few wispy abrasions are visible on either side of this vibrant San Francisco Type Three twenty, and the strike is razor-sharp throughout. PCGS reports just one numerically finer coin, the Superb Gem Eliasberg specimen, which was obtained directly from the Mint by John Clapp, Sr. (4/18).

*From The Tuxedo Park Collection.* NGC ID# 26CL, PCGS# 9034

**1903 Double Eagle, MS65+  
Elusive in Finer Grades**

**4262 1903 MS65+ PCGS Secure.** Although quite a large number of 1903 Liberty double eagles have earned the MS65 grade, PCGS has only designated a dozen of those as Plus-grade coins, and they have only certified four finer examples of this issue (5/18). This piece features a bold strike, pristine surfaces, and brilliant light yellow-gold luster. NGC ID# 26CW, PCGS# 9043

**1904 Twenty, MS66  
Radiant, High-Grade Liberty Head Type**

**4263 1904 MS66 NGC.** More than 6 million pieces were minted with many Gem examples known, but Premium Gem coins such as this representative are a step up the grading ladder and considerably more challenging to find. This attractive Type Three twenty ranks high technically with a couple of minor marks and a bold strike. Attractive and smooth sun-gold surfaces display cartwheel luster. Just three coins are certified numerically higher by both services combined (4/18).

*Ex: Long Beach Signature (Heritage, 6/2014), lot 5964. NGC ID# 26CY, PCGS# 9045*

## 1905 Double Eagle, Bright MS62

1906-D Twenty Dollar, MS64+  
Beautiful Frosty Luster

- 4264** 1905 MS62 PCGS. The Philadelphia Mint struck only 58,919 double eagles in 1905, making this one of the key dates to the 20th century portion of the Liberty Head series. This MS62 coin is sharply struck and satiny with bright yellow-gold luster. Handling marks on the cheek and a few light grazes in the field limit the grade, but no singular abrasions are noted. NGC ID# 26D2, PCGS# 9047

1905 Double Eagle, MS64  
Rare, Tied for Finest at PCGS

- 4265** 1905 MS64 PCGS. A mintage of only 58,919 double eagles earns the 1905 Philadelphia issue a reputation as one of the keys to the 20th century portion of the series. Uncirculated examples are occasionally available through MS62 but are scarce in MS63 and decidedly rare finer. This Choice example is among the finest pieces at PCGS. We have previously handled a near-Gem example of this issue on only four occasions, the most recent of which was in our April 2017 Dallas Signature, lot 16074, where a PCGS coin garnered \$29,000.

This top-grade example displays sharp design elements and remarkably well-preserved, satiny mint luster that shimmers when rotated beneath a light. Rich orange-gold color is original, and eye appeal is outstanding. Population: 13 in 64 (2 in 64+), 0 finer (5/18). NGC ID# 26D2, PCGS# 9047

- 4266** 1906-D MS64+ PCGS Secure. CAC. This first-year Denver issue is available in MS64 but rare finer. Few CAC-approved coins are seen at this level. The present piece is Plus-graded, and we heartily agree with that assessment. Blatantly original, frosty mint luster glows on each side, illuminating sharp devices and remarkably well-preserved surfaces. The reverse is essentially flawless, and only a few faint grazes on the obverse prevent Gem classification — on Liberty's cheek and in the adjacent field. Overall eye appeal exceeds expectations for the Choice grade level. PCGS lists 16 finer representatives (4/18). NGC ID# 26D5, PCGS# 9050

PROOF LIBERTY DOUBLE EAGLE

1870 Type Two Twenty, PR65 Ultra Cameo  
Only 35 Examples Struck, CAC Approved  
5-6 Survivors Confirmed in Collectors' Hands

**4267 1870 PR65 Ultra Cameo NGC. CAC.** The 1870 proof Liberty double eagle had an impressively low mintage of 35 pieces, a minuscule production total in absolute terms, but not unusually small in the context of the Type Two series. Distribution seems to have been remarkably low and some of the coins may have been melted as unsold after the close of the year. PCGS CoinFacts estimates that 8-12 pieces are extant today; however, when one subtracts the number of institutionally held examples of this date, the actual number available to private collectors appears to number only five or six specimens. This is an unusually low number of survivors for proof gold, indicating several pieces were most likely dropped into circulation because of their high face value when the original owners, or their heirs, encountered hard economic times. The most complete roster we have been able to assemble accounts for nine examples with a few earlier citations that may, or may not, represent the coins in the main roster (see below).

#### Roster of 1870 Proof Liberty Double Eagles

1. PR67 Ultra Cameo NGC. Richard Collection (New York Coin & Stamp, 6/1899), lot 183; John M. Clapp; John H. Clapp; Clapp Estate; Louis E. Eliasberg, Sr. in 1942, via Stack's; Eliasberg Collection (Bowers and Ruddy, 10/1982), lot 924; Ed Trompeter Collection; Orlando Sale (Stack's, 1/2007), lot 1410, which realized \$368,000; Tacasyl Collection (Bonhams, 9/2013), lot 1022, realized \$503,100.
2. PR65 Ultra Cameo NGC. CAC. Probably David S. Wilson Collection (S.H. Chapman, 3/1907), lot 330, which brought \$170 as part of a complete gold proof set; Atwater Collection (B. Max Mehl, 6/1946), lot 1262; Louis E. Eliasberg, Sr.; H.R. Lee Collection (Stack's, 10/1947), lot 1714; 49th Sale (New Netherlands, 6/1957), lot 119; Gaston DiBello Collection (Stack's, 5/1970), lot 1238; Harry W. Bass, Jr.; Bass Collection, Part II (Bowers and Merena, 10/1999), lot 1801; ANA Signature (Heritage, 8/2004), lot 7686; Central States Signature (Heritage, 4/2011), lot 5493, realized \$345,000. **The present coin.**
3. PR64 Deep Cameo PCGS Secure. FUN Signature (Heritage, 1/2014), lot 5565; Chicago ANA (Stack's Bowers, 8/2014), lot 13260.
4. PR64 Cameo NGC. CAC. FUN Signature (Heritage, 1/2011), lot 5281, which realized \$184,000.
5. PR64 Deep Cameo, per Jeff Garrett and Ron Guth. National Numismatic Collection at the Smithsonian Institution.
6. PR64 Deep Cameo. Smithsonian duplicate.
7. PR61 PCGS. Samuel Wolfson (Stack's, 10/1962), lot 896; Spring Sale (Stack's, 4/1978), lot 913; Rarities Sale (Bowers and Merena, 8/1995), lot 372.
8. Proof. Brock (a.k.a. John Colvin Randall); J.P. Morgan; American Numismatic Society.
9. Brilliant Proof. Heman Ely, probably directly from the Mint; W. Elliot Woodward; T. Harrison Garrett in late 1883; Robert Garrett; John Work Garrett; Johns Hopkins University; Garrett Collection (Stack's, 3/1976), lot 434, part of an original 1870 gold proof set.

#### Additional Appearance:

- A. Proof. George Seavey, part of a complete proof set purchased directly from the Mint; Lorin G. Parmelee, purchased Seavey's entire collection in 1873; Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1370; H.P. Smith, bidding as "Clay", probably just bought the coin in for Parmelee.
- B. Proof. Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 420, part of a complete gold proof set.
- C. Proof. Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 421, part of a complete gold proof set.
- D. Proof. William B. Wetmore (S.H. & H. Chapman, 6/1906), lot 154, part of a complete gold proof set; Virgil Brand.
- E. Brilliant Proof. Waldo Newcomer; F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 1/1946), lot 873; "Memorable"/J.F. Bell Collection (Numismatic Gallery, 3/1948), lot 693; Adolph Menjou Collection (Numismatic Gallery, 6/1950), lot 1808. There is no known illustration of this specimen.

One curious attribute common to all proof 1870 twenties is mentioned in the 2007 Orlando Sale by Stack's. A complex lintmark is seen through the letters IBE on Liberty's coronet; apparently this was impressed into the master hub.

The rarity and importance of Type Two twenties as proofs are difficult to overstate. When one compares Type Two to Type Three proofs, there are approximately eight times as many Type Three proof twenties available. Of course, there are many more dates available in the Type Three series, but the mintages of Type Twos are uniformly low, ranging from a low of 25 proofs to a high of 50.

This glittering, deeply mirrored proof displays heavy mint frost over the devices, giving the coin a stark cameo contrast on both sides. The design elements exhibit razor-sharp definition throughout and no mentionable distractions are evident on the pristine orange-gold surfaces. Unbelievable quality in a rare early date in the Liberty double eagle series.

*From An Important New York Collection.* PCGS# 99085

## HIGH RELIEF DOUBLE EAGLES

1907 High Relief Double Eagle, XF40  
Collector-Grade Wire Rim Example

- 4268** 1907 High Relief, Wire Rim XF40 PCGS. Housed in a green label holder, this lightly worn High Relief Saint-Gaudens double eagle represents an outstanding opportunity for a budget-minded collector to acquire a well-detailed, problem-free example of this sought-after artistic triumph. Whether this coin circulated briefly or was simply carried as a pocket piece, wear is light, and the original surfaces show pleasing olive-gold patina. Only 12,367 High Relief double eagles were struck in 1907, each receiving three impressions from the dies to fully bring up the design. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty Dollar, AU Details  
Wire Rim

- 4269** 1907 High Relief, Wire Rim — Harshly Cleaned — PCGS Genuine. AU Details. This AU-level coin is sharp and minimally marked, although vigorous cleaning has left the surfaces hairlined with a dusky orange-gold hue. A sharp wire rim surrounds much of each side. High Relief Saint-Gaudens double eagles are in high demand in all grades. The design on this piece is fully appreciable despite the cleaning.

1907 High Relief Double Eagle  
Wire Rim, AU55 Details

- 4270** 1907 High Relief, Wire Rim — Altered Surfaces — ANACS. AU55 Details. This is a sharp Wire Rim coin that shows barely a trace of high-point friction, and wear that is present can likely be attributed to the surface altering noted by ANACS. The coin appears problem-free to the unaided eye — albeit slightly dull — but a loupe reveals some faint hairlines, and rotating the coin beneath a light fails to produce the expected cartwheel effect that even High Relief Saints typically have. Nonetheless, there are no stand-out abrasions, and eye appeal is pleasing. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, MS63

Wire Rim Variant

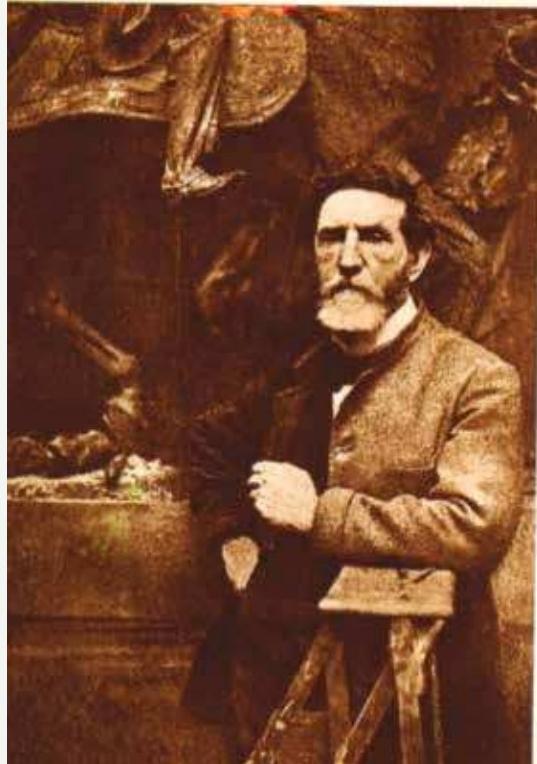

- 4271** 1907 High Relief, Wire Rim MS63 NGC. After the death of Augustus Saint-Gaudens on August 3, 1907, there was little initiative to follow through on the production of the High Relief twenties. It might safely be said that if it were not for Theodore Roosevelt's dogged determination to see U.S. gold struck in high relief, much as ancient Greek coins were, the High Relief twenties would be a numismatic footnote and relegated to interesting patterns. But Roosevelt was determined and he did follow through. He managed to keep his legendary impatience in check for the most part. Three days after the sculptor's death Roosevelt suggested to Secretary of the Treasury George Cortelyou that he get in touch with Saint-Gaudens's assistant (Henry Hering):

“Why don't they get into touch with him again? I am sure there has been good-will upon the part of the mint authorities, but I cannot help feeling that there has been a certain clumsiness of mind and inability to do the speediest modern work, as shown by these delays.”

And that was as diplomatic as Roosevelt could be, considering the concept for the High Relief began over dinner in December 1904. His communiqués became increasingly brusque as the month wore on, culminating in his alleged order to begin the new issue even if it took an entire day to strike one impression. Fortunately it did not come to that, and eventually 12,367 High Relief twenties were produced by the end of the year. This is a bright yellow-gold example that is sharply detailed on each side. A few small contact marks are scattered about, but the only one of note is located in the right obverse field. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, MS63  
Wire Rim, Celebrated Saint-Gaudens Design

4272 1907 High Relief, Wire Rim MS63 NGC. Augustus Saint-Gaudens' sprawling Aspet estate sits on the eastern side of the Connecticut River in Cornish, New Hampshire, just across from Windsor, Vermont. The two towns are joined by the longest covered wooden bridge in the country, built in 1866, and a structure that Saint-Gaudens undoubtedly traversed countless times after purchasing his property in 1885. Today, visitors can take the same route as Saint-Gaudens from the Windsor train station, across the bridge, and two-and-a-half miles up the road to Aspet. There, one can enjoy the same sights as the great artist: Mount Ascutney in the distance beyond the expansive front acreage, the winding stream down a trail north of the property, and the studio where Saint-Gaudens and his assistants created, among other celebrated works, the design for this magnificent High Relief twenty dollar gold piece. This Select Uncirculated example with the usual Wire Rim features bright yellow-gold surface color and small ticks in the field. The devices are well brought-up. A satiny and eminently appealing representative of Saint-Gaudens' original design. NGC ID# 26F2, PCGS# 9135

---

1907 High Relief Twenty, MS67  
Extraordinary Wire Rim Example

4273 1907 High Relief, Wire Rim MS67 PCGS. CAC. Augustus Saint-Gaudens' depiction of Liberty on the obverse of the double eagle was influenced by his figure of Victory for the Sherman monument outside of Central Park in New York City. Both winged representations stride forward assuredly with palm and olive branches in their left hands. On the Sherman, Victory holds her right hand high, while Liberty on the twenty dollar gold piece clutches a guiding torch aloft.

Saint-Gaudens' use of this motif on the new double eagle made perfect sense. Obviously, it satisfied Theodore Roosevelt's demand for heightened sculptural quality in American coinage reminiscent of the ancient Greeks. Saint-Gaudens' design was especially effective in conveying a three-dimensional effect when executed in High Relief as originally intended. Aside from its physical suitability, the new double eagle also fulfilled a symbolic role. Nike, the Greek goddess of victory, was commonly represented on Greek coinage. Steve M. Benner explains in the April 2018 edition of *The Numismatist*: "Greek and Roman cities and leaders knew the importance of communicating their victories to their subjects and boosting the citizens' confidence in their regimes. The use of Nike on coinage was widespread and was a means to this end." Similarly, the United States was quickly becoming a dominant world power in the early part of the 20th century, a position it sought to convey and ensure through its coinage.

After Augustus Saint-Gaudens' untimely death from stomach cancer in August 1907, Roosevelt made sure to have a small number of High Relief twenties struck as souvenirs, knowing that the design as originally envisioned was impractical for large-scale production and circulation. A total of 12,367 pieces were coined, mostly of the Wire Rim variant. This is an amazing coin. The surfaces are essentially perfect, and the satiny mint luster glows evenly across each side. The strike is complete, of course. Exceptional preservation of surfaces turns this into a rare and wondrous High Relief twenty. Population: 20 in 67, 4 finer. CAC: 5 in 67, 2 finer (5/18).

**From An Important New York Collection.** NGC ID# 26F2, PCGS# 9135

## PROOF HIGH RELIEF DOUBLE EAGLE

1907 High Relief Twenty, PR64  
Bright, Uniform Yellow-Gold Satiny Mint Luster

**4274** 1907 High Relief PR64 NGC. The case for the production of proof High Relief twenties mainly rests on the relationship between the serif collar on Ultra High Reliefs and the same collar used on a limited number of Wire Rim twenties struck in the early days of regular High Relief production. The use of the same collar is unmistakable. These similarities are outlined in depth in a soon-to-be-released reference by Heritage on the Saint-Gaudens double eagle series. In addition to the use of the same collar, there are certain commonalities seen on the surfaces of coins NGC has designated as proofs. These include swirling die polish marks in the right obverse field, die lines within the raised portion of the sun's rays on the reverse, and heavy die polish in the space between the wing and eagle's neck.

This is a remarkable coin that displays bright, satiny mint luster and is light in color throughout. Most High Reliefs show some trace of reddish patina, but not this piece. It is uniformly bright yellow-gold. As one would expect, the strike is complete throughout, including the tops of the letters on the upper-reverse that are separated from the nearby rim. An outstanding High Relief by any measure. NGC ID# 28AX, PCGS# 9132

## SAINT-GAUDENS DOUBLE EAGLES

1910-D Saint-Gaudens Twenty, MS66  
Only Two Finer Coins at PCGS

**4275** 1910-D MS66 PCGS Secure. From a mintage of 429,000 pieces, the 1910-D Saint-Gaudens double eagle is scarce in MS66 condition and finer examples are rare. This spectacular Premium Gem offers sharply detailed design elements and well-preserved orange-gold surfaces on both sides. PCGS has certified only two numerically finer examples (4/18). NGC ID# 26FG, PCGS# 9155

**1910-D Saint-Gaudens Twenty, MS66+**  
Conditionally Rare, Few Known Finer

**4276 1910-D MS66+ PCGS Secure.** Although nearly 200 1910-D Saint-Gaudens double eagles are certified in Premium Gem condition, only a fraction of those pieces have appeared at auction in recent years. Higher-grade coins are decidedly rare. We have previously handled only two Plus-graded Premium Gems, one in lot 4380 of our August 2016 ANA Signature which realized \$17,625, and the other in our recent February 2018 Long Beach Signature, lot 4433, a coin that brought \$38,400 with a CAC green label. We have not handled a Superb Gem example since 2012.

This high-end coin is sharp and frosty, showing vibrant honey-gold luster that exhibits no mentionable abrasions, not even on the high points of Liberty's figure. The eagle's feathers are remarkably well-preserved. Only four other MS66 coins are Plus-graded at PCGS, and PCGS and NGC each list just two finer coins (4/18). NGC ID# 26FG, PCGS# 9155

**1911 Double Eagle, MS66**  
Fully Struck, Nearly Unimprovable

**4277 1911 MS66 PCGS Secure.** The 1911 claims one of the few mintages of less than 200,000 coins, but the story of its availability is similar to that of other issues in the series. Most examples were exported to European markets, either directly from New York to London or through Ottawa, Canada. Those pieces that avoided melting overseas were subjected to rough handling, explaining why nearly all 1911 double eagles are found in MS64 or lower condition. Gems are scarce, and survivors at this impressive grade level are significant condition rarities bested by only a handful of coins in MS67.

This Premium Gem Saint-Gaudens twenty appears immaculate and is nothing short of fully struck. There are only a couple of trivial flecks on the lower reverse. Luminous yellow-gold surfaces are awash in vibrant mint frost. Population: 16 in 66 (3 in 66+), 1 finer (5/18). NGC ID# 26FK, PCGS# 9157

1913-D Twenty Dollar, MS65  
Frosty Original Surfaces

**4278 1913-D MS65 PCGS Secure.** The 1913-D Saint-Gaudens twenty is available in MS65 for a price, but PCGS has seen just seven higher-grade representatives (4/18). This Gem example is well-struck and devoid of any distracting abrasions. Original orange-gold, rose, and peach hues decorate the frosty surfaces, and the eye appeal is outstanding. Worthy of consideration for the finest double eagle collection. NGC ID# 26FP, PCGS# 9162

1924-S Double Eagle, MS63  
Better Date in High Grade

**4279 1924-S MS63 PCGS.** Unlike its Philadelphia counterpart, the 1924-S double eagle is challenging to acquire in attractive mint condition. Coins grading finer than the present Select example are genuinely scarce in PCGS holders. This piece shows expected abrasions for the grade but has well-struck design elements and pleasing wheat-gold luster. NGC ID# 26G9, PCGS# 9179

1926-S Double Eagle, MS64+  
Elusive in Finer Grades

**4280 1926-S MS64+ PCGS Secure. CAC.** The mintmark is punched in crooked on this obverse, and both sides show metal flowlines around the borders from die wear. The 1926-S double eagle is available in MS64 but scarce finer, and Choice CAC coins such as the one offered here are rare. Sharp central devices complement vibrant orange-gold luster. The obverse is nearly worthy of a Gem grade by itself, although scattered light marks on the eagle's wing prevent a designation above the assigned MS64+ grade. CAC: 42 in 64, 9 finer (4/18). NGC ID# 26GF, PCGS# 9185

1928 Double Eagle, MS66+  
Popular Type Issue

**4281 1928 MS66+ PCGS Secure. CAC.** With a mintage of nearly 9 millions coins, more double eagles were minted in 1928 than in any other year at the Philadelphia Mint. Despite the large production, few have survived at the top grades. The average certified grade, for example, is just MS63. This frosty Premium Gem has brilliant light yellow-gold luster with flawless surfaces and excellent eye appeal. NGC ID# 34VK, PCGS# 9189

COMMEMORATIVE SILVER

1893 Isabella Quarter  
Impressively Toned MS66+

**4282 1893 Isabella Quarter MS66+ PCGS. CAC.** Ex: Paul Denby. The frosted portrait of Queen Isabella displays toning worthy of regal grandeur, with shades of amber-orange, steel-blue, and yellow-gold across vibrantly lustrous surfaces. A boldly struck example of this popular commemorative quarter, symbolic of the industry of American women. This dramatic Premium Gem is housed in a PCGS Secure holder and is obviously CAC approved. NGC ID# BYJ9, PCGS# 9220

## 1921 Alabama 2x2 Half, MS67

Standout Eye Appeal

Among the Finest Known

**4283** 1921 Alabama 2x2 MS67 NGC. Mintage figures for both varieties of the 1921 Alabama half dollars vary according to different references. The 1922 *Report of the Director of the Mint* confirms production of \$35,022 in face value, which translates to 70,044 total pieces struck. Current research indicates 6,006 pieces were struck first with the incuse 2x2 imprint, commemorating Alabama's status as the 22nd state of the Union. After that brief mintage, the 2x2 was removed from the die and the balance of Alabama halves were struck without the 2x2 imprint. A small portion of the mintage was melted as unsold (perhaps around 5,000 pieces).

The majority of "plain" 1921 Alabama half dollars were sold to citizens of Alabama, and not to dealers or preservation-conscious numismatists. The 2x2 variety is generally sharper as the first coins struck, and more care may have been taken with that portion of the mintage. This example is extremely sharp for an Alabama, with the obverse portraits and the eagle's plumage showing nearly full definition. Attractive and lustrous surfaces display a pale greenish-gray hue. The Alabama 2x2 is extremely rare in Superb Gem condition, as witnessed by the combined NGC and PCGS population of just 15 MS67 examples, and none numerically finer. NGC Census: 7 in 67 (1 in 67★), 0 finer (4/18). NGC ID# BYEZ, PCGS# 9225

## 1935-S Daniel Boone Bicentennial Half

Condition Census MS68

**4284** 1935-S Boone MS68 NGC. The finest 1935-S Boone half dollars are a pair of MS68s at NGC and an MS68 at PCGS (4/18). Of these, the only example to have previously appeared at public auction was the other NGC piece, in lot 1498 of our November 2007 Dallas Signature, which realized \$17,250. No top-grade coin has been seen since. In fact, Boone halves of any date and mint are rarities in MS68, the level at which Registry Set collectors most heavily pursue this issue. This piece is sharp and satiny with light golden patina. Hints of multicolor toning appear around the outer periphery. A superb example of this popular classic commemorative type. NGC ID# BYFW, PCGS# 9260

## 1892 Columbian Half Dollar, MS67

Only Two Finer

**4285** 1892 Columbian MS67 PCGS. CAC. PCGS and NGC have each certified one numerically finer example of the 1892 Columbian half dollar. This Superb Gem exhibits champagne-gold toning at the centers, with lovely cobalt-blue, violet, gold, and rose toning closer to the borders. Population: 41 in 67 (11 in 67+), 1 finer. CAC: 37 in 67, 0 finer (5/18). NGC ID# BYGF, PCGS# 9296

**1936 Gettysburg Half Dollar, MS68****A Top-Graded Registry Coin****Virtually Pristine**

**4286 1936 Gettysburg MS68 NGC.** Frank Vittor is responsible for the design of the Gettysburg half dollar, which was struck in 1937 and issued in 1938 (despite the irrelevant 1936 date) to commemorate the monumental Civil War battle that took place 75 years prior. Vittor was born in Milan, studying later in Paris with the likes of August Rodin, and was eventually brought to the United States by none other than Sanford White, the famous architect who worked closely with Augustus Saint-Gaudens. His design for the Gettysburg half dollar is widely popular among collectors today, but examples are typically found no finer than MS67. This splendid survivor ranks among the top coins graded at NGC and PCGS combined.

Rich and original forest-green, magenta, and fire-orange patina covers each side, deepening toward the rims. No marks appear on the portraits of the two Civil War veterans or on the reverse shields, virtually unheard of for the issue. Census: 4 in 68 (1 in 68★), 0 finer (5/18). NGC ID# BYGM, PCGS# 9305

**1920 Maine Half Dollar, MS68****Registry-Grade, Single-Finest Certified**

**4287 1920 Maine MS68 NGC.** While this design by Anthony de Francisci — better-known as the designer of the Peace dollar — is one of his lesser works (Cornelius Vermeule in particular had some scathing words for the Maine commemorative), collectors respect it as part of the series. This coin is of particular interest, as it is the *single finest representative* in the combined certified population and an NGC Registry Set collector essential as such (5/18). Remarkably smooth surfaces glow beneath a light layer of patina that shifts from pale silver-gray to bolder greenish-gold, with a few hints of crimson-tan away from the well-defined devices. NGC ID# BYGY, PCGS# 9326

**1921 Missouri Half Dollar, MS66****Variety Without 2★4**

**4288 1921 Missouri MS66 PCGS.** This is the variety with a plain obverse field that lacks the 2★4 notation that identifies Missouri as the nation's 24th state. This lovely Premium Gem has mostly brilliant silver surfaces with lovely gold and iridescent peripheral toning. Population: 54 in 66 (2 in 66+), 0 finer (5/18). NGC ID# BYH2, PCGS# 9330

**1935-D Texas Half Dollar, MS68****Pompeo Coppini's Design**

**4289 1935-D Texas MS68 PCGS Secure.** Born in Italy in 1870, Pompeo Coppini emigrated to the United States in 1896, moved to Texas in 1901, and died at San Antonio in 1957. The majority of Coppini's work is found in Texas. After he completed the designs for the Texas Independence Centennial half dollar, the first examples were minted in 1934, and the series continued through 1938. The present Superb Gem is one of the finest surviving examples among 66 Texas half dollars of all years to achieve the PCGS MS68 grade. None are finer. This piece has highly lustrous with brilliant silver surfaces, an above average strike, and a splash of gold toning at the lower obverse. Population: 11 in 68, 0 finer (5/18). NGC ID# BYJC, PCGS# 9383

**1952-D Washington-Carver Half Dollar, MS66+  
Among the Finest at PCGS and CAC**

- 4290 1952-D Washington-Carver MS66+ PCGS. CAC.** The final issue in the classic commemorative series was struck over the course of four years. This second-year example derives from a mintage of only 8,006 pieces and ranks among the finest survivors graded by PCGS. Brilliant silver surfaces are fully struck and remarkably clean. There is only minor chatter on Carver's cheek. Population: 79 in 66 (4 in 66+), 0 finer. CAC: 15 in 66, 0 finer (5/18). NGC ID# BYL4, PCGS# 9435

**1936 Wisconsin Half Dollar, MS68+  
Remarkably High-End for the Issue**

- 4291 1936 Wisconsin MS68+ NGC. CAC.** The Wisconsin Territorial Centennial half dollar comes from a distribution of 25,015 pieces. Examples are plentiful in most grades but are scarce in MS68 and nearly unknown numerically finer. This Plus-graded CAC coin is remarkably attractive, showing original sun-orange, copper-red, and olive-green toning over each side that lightens in the centers. The strike is sharp and the preservation is virtually flawless. Census: 46 in 68 (3 in 68+, 7 in 68 ★, 1 in 68+★), 1 finer. CAC: 25 in 68, 0 finer (4/18). NGC ID# BYKU, PCGS# 9447

## COMMEMORATIVE GOLD

**1915-S Pan-Pac Quarter Eagle, MS66  
Satiny Luster**

- 4292 1915-S Panama-Pacific Quarter Eagle MS66 PCGS.** In MS66 the Panama-Pacific quarter eagle is relatively plentiful, but finer coins are seldom encountered in a PCGS holder. This Premium Gem displays sharp design elements and satiny lemon-gold luster with no abrasions. A small copper-orange toning area appears near the lower-left reverse border. PCGS lists 48 Superb Gems finer (5/18). NGC ID# BYLP, PCGS# 7450

**1915-S Pan-Pac Quarter Eagle, MS66+  
Outstanding Surface Quality**

- 4293 1915-S Panama-Pacific Quarter Eagle MS66+ NGC. CAC.** While the Panama Canal was of immense importance to ocean-going commerce, transportation, and access to the West Coast of America, it was also the crucible for understanding the causes and effects of yellow fever and malaria. Advances in sanitation and mosquito control helped control the diseases, commemorated on the quarter eagle issued at the 1915 Panama-Pacific Exposition. This high-end Premium Gem displays smooth, nearly unmarked surfaces with a sharp strike and radiant mint luster that shimmers over frosted wheat-gold fields and devices. NGC ID# BYLP, PCGS# 7450

**1915-S Quarter Eagle, MS67  
Panama-Pacific Commemorative**

- 4294 1915-S Panama-Pacific Quarter Eagle MS67 PCGS.** Following two failed attempts by the French government in 1881 and 1894, the United States began construction of the Panama Canal in 1904, and completed the project 10 years later. Completion provided the perfect opportunity to celebrate, and the Panama-Pacific International Exposition was held in San Francisco in 1915. A series of coins were issued, including this quarter eagle. This lovely Superb Gem, tied for the finest certified, exhibits frosty yellow-gold luster and pristine surfaces. Population: 48 in 67 (2 in 67+), 0 finer (5/18). NGC ID# BYLP, PCGS# 7450

## MODERN BULLION COINS

1990 Silver Eagle, MS70  
Low PCGS Population

**4295** 1990 Silver Eagle MS70 PCGS. While large quantities of silver eagles were submitted to NGC through an arrangement with a major dealer, few coins found their way to PCGS. As a result, the population figures are widely divergent. For example, NGC has certified 248 of these 1990 Silver Eagles as MS70, while PCGS has only graded nine examples in MS70 (5/18). The present piece is one of those nine, a perfect example with a bold strike, satiny luster, and brilliant silver surfaces. NGC ID# 26JC, PCGS# 9836

1999 Silver Eagle, MS70  
Brilliant and Stunning

**4296** 1999 Silver Eagle MS70 NGC. Both sides of this exquisite American Eagle exhibit satiny silver luster with no evidence of toning on its brilliant silver surfaces. The strike is complete with every intricate details boldly rendered. This is an outstanding example for the connoisseur. NGC ID# 26JX, PCGS# 9947

## TERRITORIAL GOLD

1852 Assay Office Ten, Choice VF  
K-12a, Late Die State

**4297** 1852 Assay Office Ten Dollar VF35 PCGS. K-12a, R.4. A midgrade example of this scarce Assay Office variety, struck shortly after John Little Moffat left the firm. The green-gold surfaces display a surprising amount of luster, and are minimally abraded despite slight reverse rim nicks at 4 and 5 o'clock. A late die state, listed by Kagin as the Faint Beads K-12a(2), with absent reverse dentils, a diagonal crack through the O in OFFICE, and a horizontal crack below the S in SAN. On the obverse, die cracks pass through MERI, UNIT, and TEN. Listed on page 399 of the 2019 Guide Book. NGC ID# ANGV, PCGS# 10001

'1850' Baldwin & Co. Ten Dollar, MS64

Kagin-1d, Nagy Brass 'Restrike'  
Distinctive Horseman Motif

**4298** "1850" 'Restrike' Baldwin & Co. Ten Dollar, Brass, MS64 NGC. K-1d, R.6. The "Horseman" Baldwin ten dollar "restrikes" were made from copy dies in various metals by Stephen K. Nagy in 1909. They are a collectible alternative to the rare and desirable but costly originals. In previous auctions, we have offered gilt, silver, and white metal examples, but this is the first Heritage appearance in brass. The issue should not be confused with the "1857/0" replicas struck in 2002 from melted-down S.S. Central America ingots. An early die state without breaks on the lower right reverse border. Die rust is nonetheless present across smooth, sharply struck, and semiprooflike deep olive-brown surfaces. NGC ID# 2BDA, PCGS# 10036

## 1855 Wass Molitor Ten Dollar

Ex: Eliasberg Collection

Kagin-6, VF30

- 4299** 1855 Wass Molitor Ten Dollar VF30 PCGS. K-6, High R.5. Ex: Eliasberg. An original dusky apricot-gold example of this rare Wass Molitor variety, made at a time when the San Francisco Mint was open but lacked parting acids to produce sufficient double eagles to meet the demands of the Gold Rush economy. This coin shows softness of strike on TEN D and GOLD, and the left field has a couple of thin marks, but otherwise it is well-defined and pleasing for the VF30 level. Sold uncertified as XF40 in its 1996 Eliasberg auction appearance, where it was pedigreed (per Walter Breen) to the "Lusk and Clapp collections." That would imply that the present coin appeared as lot 659 in the B. Max Mehl December 1930 auction of the Frank S. Lusk Collection, then to J.M. Clapp and Eliasberg. But Mehl's description does not match this example; he states it has a "light scratch [on the] back of [the] head" not apparent here. Listed on page 405 of the 2019 Guide Book.  
Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 361; Chicago ANA (Stack's-Bowers, 8/2011), lot 7558, which realized \$19,550. NGC ID# ANJR, PCGS# 10354

## 1855 K-6 Wass Molitor Ten Dollar, AU55

Ex: S.S. Central America

- 4300** 1855 Wass Molitor Ten Dollar AU55 PCGS. K-6, High R.5. Ex: S.S. Central America. SSCA 7287. At one time, the K-6 variety was considered R.7 with fewer than a dozen known, but after the discovery of the S.S. Central America treasure, the rarity dropped to its present High R.5 level. The Wass Molitor firm was well-respected for the quality of their coinage and accuracy of their assays. The 1855 ten dollar gold coins were struck as an emergency measure during a period when a shortage of parting acids caused the San Francisco Mint to temporarily suspend coinage operations. The present coin is softly struck, but textured, lustrous orange-gold surfaces show only light wear. As expected, a number of minor marks and scrapes contribute to the grade. As an AU55 example, it is a higher-end survivor of the rare 1855 Wass Molitor ten. Listed on page 405 of the 2019 Guide Book. Population: 5 in 55, 2 finer (5/18). NGC ID# ANJR, PCGS# 10354

## CALIFORNIA FRACTIONAL GOLD

1853 Octagonal Liberty Quarter  
BG-101, MS64

**4301** 1853 Liberty Octagonal 25 Cents, BG-101, Low R.5, MS64 PCGS. Die State III. Yellow-gold lustrous surfaces display occasional splashes of bluish-purple at the margins of this near-Gem. Well-struck for the issue, except for the usual softness on the 8 in the date. Devoid of mentionable marks. This is the single finest certified of the BG-101 variety at PCGS; equaled by one example at NGC and bettered by one at NGC also. Population: 1 in 64, 0 finer (4/18).

Ex: Long Beach Signature (Heritage, 2/2010), lot 1863, where it brought \$3,450; ANA Signature (Heritage, 8/2010), lot 6400, where it realized \$4,600. NGC ID# 2BGK, PCGS# 10370

1854 Liberty Octagonal Quarter Dollar  
BG-104, MS64 Prooflike

**4302** 1854 Liberty Octagonal 25 Cents, BG-104, R.4, MS64 Prooflike NGC. A Period One octagonal quarter dollar struck by Frontier, Deviery & Co. This near-Gem Prooflike example displays stark cameo contrast and bright yellow-gold color with good mirroring in the fields. Struck from cracked dies but lacking any post-minting abrasions that limit eye appeal. Census: 3 in 64 Prooflike, 1 finer (4/18).

Ex: ANA Signature (Heritage, 8/2015), lot 8682, which realized \$4,935. NGC ID# 2BGN, PCGS# 710373

1854 Octagonal Liberty Quarter, MS66  
Finest Certified BG-109

**4303** 1854 Liberty Octagonal 25 Cents, BG-109, High R.5, MS66 NGC. As of (4/18), this is the single-finest certified BG-109 example at either leading service. The mattelike apple-green and apricot-gold surfaces are nicely struck and unabraded. BG-109 is the rarest of the four Antoine Louis Nouizillet octagonal quarter die varieties, readily identified by an obverse date and DOLLAR spelled out in full.

Ex: Chicago ANA Signature (Heritage, 8/2014), lot 4380, which realized \$6,462.50. NGC ID# 2BGU, PCGS# 10378

(1853) Liberty Round Quarter, MS67

Finest Seen at NGC, BG-222

**4304** Undated (1853) Liberty Round 25 Cents, BG-222, R.2, MS67 NGC. These undated pieces were struck in 1853. The fraction on the reverse is higher in the wreath than on the BG-221. This Superb Gem is the sole finest of the issue graded at NGC (4/18). The golden-yellow surfaces are virtually pristine and nearly prooflike, showing reflective black, inky fields against the frosty devices. This piece appears to be the early die state, although the prongs of the holder cover a bit of the area at star 1.  
Ex: National Money Show Signature (Heritage, 2/2014), lot 4363, where it brought \$4,993.75. NGC ID# 2BHU, PCGS# 10407

1855 Round Liberty Quarter

BG-227, MS65 Prooflike

None Certified Finer

**4305** 1855 Liberty Round 25 Cents, BG-227, R.6, MS65 Prooflike NGC. A rare round quarter dollar variety made by Antoine Louis Nouizillet in 1855. Struck from "solid native California gold" according to the BG reference. The reverse die is shattered, a diagnostic of this variety, while the obverse stars are noticeably repunched. The obverse die is heavily polished from its previous use for BG-226A; it is later polished again before being employed for BG-228. The present, yellow-gold example displays deep mirroring in the fields and well-defined motifs. This is the only example of BG-227 certified as Prooflike by NGC, and is rivaled numerically at that service only by a single non-Prooflike MS65 coin, with none finer (4/18). PCGS# 710412

1853 Liberty Octagonal Half, MS66  
BG-302, Popular 'Peacock' Reverse  
Single Finest at PCGS

**4306** 1853 Octagonal Liberty, Peacock Reverse, 50 Cents, BG-302, Low R.4, MS66 PCGS. Die State II. The famous "Peacock" variety, named after the glory of rays above the eagle. The nickname is a misnomer since the tail feathers are evident beneath the arrows perch. Listed in the 2019 Guide Book on page 413 as the less evocative "Small Eagle With Rays" description. The same reverse die also struck the very rare BG-303. The F.D. initials nestled below the hair bun identify the maker as Frontier, Deviercy & Co. The present high-grade example has a convex obverse and a concave reverse. The mirrored honey-gold surfaces are sharply struck and essentially as made. BG-302 can be obtained in AU55 through MS64 grades, but at the MS66 level this piece becomes the single finest certified by PCGS (4/18). NGC ID# 2BJ7, PCGS# 10422

1854 Liberty Octagonal Dollar, MS62  
'Assay Office' Eagle Reverse, BG-504  
Scarce Guide Book Type

**4307** 1854 Liberty Octagonal Dollar, Eagle, BG-504, Low R.5, MS62 PCGS Secure. Die State III with a radial crack through the left star to the scroll. Frontier, Deviercy & Co. struck four octagonal dollar varieties with reverse motifs that imitate the obverse design of the Assay Office fifty dollar "slugs." BG-502 and BG-503 are extremely rare, which leaves BG-501 and BG-504 for collectors to pursue. Demand is high due to its Guide Book listing as the "Liberty Head / Large Eagle" variety. A crisply struck and moderately mirrored sun-gold example. Population: 9 in 62, 10 finer (5/18). NGC ID# 2BKZ, PCGS# 10481

1871 Liberty Octagonal Quarter, MS67  
Scarce BG-716 Variety  
Tied for Finest Known

**4308** 1871 Liberty Octagonal 25 Cents, BG-716, R.6, MS67 PCGS Secure. Die State II with a couple of short, delicate obverse cracks. The LA in DOLLAR overlap to attribute the rare BG-716 marriage. This lustrous pumpkin-gold Superb Gem is immaculate, and thus retains the concentric lathe die lines that circumvent the fields. The strike is full, though certain design elements have been lapped from the dies, such as the tip of the coronet and the top of the O in DOLLAR. Population: 3 in 67, 0 finer (5/18). NGC ID# 2BMT, PCGS# 10543

## 1863 Liberty Octagonal 25 Cents

BG-733, MS61

One of Only Five Examples Known

- 4309** 1863 Liberty Octagonal 25 Cents, BG-733, High R.7, MS61 NGC. An extremely rare variety. Breen-Gillio suggests that there are only five known examples, and one of those is in the Smithsonian. This piece is typically struck for the type and variety, with somewhat soft definition. The light green-gold surfaces are a trifle subdued, but are unmarked on both sides. Slight purple-rose color appears on the lower reverse, the result of an imperfect alloy mixture. Census: 1 in 61, 0 finer (4/18).  
Ex: Houston Money Show Signature (Heritage, 12/2014), lot 3945, where it brought \$4,700. NGC ID# 2BNF, PCGS# 10560

## 1852 Indian Octagonal Quarter

BG-799V, MS66 Prooflike

Finest Certified Example

- 4310** 1852 Indian Octagonal 25 Cents, BG-799V, High R.7, MS66 Prooflike NGC. The present lot is the finest example certified by NGC (4/18). PCGS has yet to certify any above the MS65 level, which makes the present lot the single-finest graded at either major service. It is a sharply struck yellow-gold example with flashy fields and an unabraded appearance. Minute strike-throughs are distributed, as coined.  
Ex: FUN Signature (Heritage, 1/2013), lot 7705, where it realized \$5,140.63. NGC ID# 26NX, PCGS# 710648

## 1872 Round Liberty Quarter, MS63

Elusive BG-815 Variety

- 4311** 1872 Liberty Round 25 Cents, BG-815, High R.7, MS63 PCGS Secure. The 1872 Liberty round 25 cent pieces, BG-815, were manufactured by the jewelry firm of Frontier & Bellemere of San Francisco and sold primarily as souvenirs. Like many other Period Two issues, BG-815 is rarely seen in today's market, probably because of mass government seizures carried out in the years 1881-1883, at the behest of Secret Service Chief James J. Brooks, who believed these pieces violated laws governing private coinage and counterfeiting.

The present piece is an attractive Select specimen, with well-detailed design elements that show a little weakness on the denomination and some incomplete detail on the wreath. The lightly marked yellow-gold surfaces display prooflike reflectivity throughout. Population: 4 in 63, 2 finer (4/18). NGC ID# 2BT6, PCGS# 10676

1876 Period Two Round Indian Quarter  
BG-879, MS67 Prooflike

- 4312 1876 Indian Round 25 Cents, BG-879, R.4, MS67 Prooflike NGC. As of (4/18) the present coin is the finest Prooflike NGC-certified example of BG-879, by a margin of two grades. At PCGS, two are graded MS66 with none finer. This piece is from an unlisted die state with a small cud at the left wreath stem. A flashy yellow-gold Superb Gem with exemplary preservation and only minor incompleteness of strike.  
Ex: FUN Signature (Heritage, 1/2015), lot 7884, where it brought \$4,230. NGC ID# 2BVE, PCGS# 710740

1873/2 Period Two Octagonal Indian Dollar  
BG-1122, MS65  
Finest Known

- 4313 1873/2 Indian Octagonal 1 Dollar, BG-1122, High R.6, MS65 PCGS. A Mohrig design with hand-engraved (over)date, in an earlier state with long base to the 1 on the obverse and still-long denticles. Gleaming yellow surfaces have just a touch of green, not uncommon for the alloyed state of California gold. This is the finest example certified at both services (4/18).  
Ex: Dallas Signature (Heritage, 10/2012), lot 6465. NGC ID# 2C3P, PCGS# 10933

## COINS OF HAWAII

1883 Hawaii Dime, PR61  
Just 26 Proofs Produced

- 4314 1883 Hawaii Ten Cents PR61 PCGS Secure. The business strike 1883 Hawaiian coins were produced at San Francisco, a practical choice given its closer proximity to the Hawaii Kingdom. But the proofs were made in Philadelphia, and in vastly fewer numbers. The proof 1883 Hawaii dime or keneta has a mintage of only 26 pieces. This is a fully struck and faintly hairlined pearl-gray specimen with a minor alloy imperfection on the reverse near 9 o'clock. NGC ID# 2C55, PCGS# 10981

1883 Hawaii Quarter, MS67+  
Delightfully Patinated

- 4315 1883 Hawaii Quarter MS67+ PCGS Secure. CAC. Attractive golden-brown, lavender, navy-blue, and apple-green toning fills the obverse. The reverse is ocean-blue save for an apricot-gold margin. This lustrous Superb Gem exhibits a full strike and pristine preservation. Ideal for the collector who seeks just one Hawaiian coin of the date. Population: 22 in 67 (3 in 67+), 1 finer. CAC: 18 in 67, 1 finer (5/18). NGC ID# 2C58, PCGS# 10987

1883 Hawaii Dollar, MS63  
Dusky Antique-Gold Patina

- 4316 1883 Hawaii Dollar MS63 PCGS Secure. The dollar was the highest-denomination coin struck at the San Francisco Mint in 1883 for circulation in the Kingdom of Hawaii. Most of the 500,000 pieces minted were eventually melted. This sharp Uncirculated example exhibits dusky antique-gold patina over each side. Minor grade-limiting ticks appear mainly on the obverse. NGC ID# 2TGD, PCGS# 10995

1883 Hawaii Dollar, MS63  
Struck in San Francisco

- 4317 1883 Hawaii Dollar MS63 PCGS. CAC. The San Francisco Mint issued the 1883 coinage on behalf of the Kingdom of Hawaii using existing silver planchets for U.S. production coinage. This frosty Select Mint State Hawaiian dollar, or akahi dala, features brilliant silver luster and splashes of delicate gold toning on both sides. Population: 19 in 63, 45 finer. CAC: 5 in 63, 16 finer (5/18). NGC ID# 2TGD, PCGS# 10995

(1860) Waterhouse Token, AU50  
Medcalf 2TE-1, Early Hawaiian Issue

**4318** (1860) Waterhouse Token AU50 PCGS Secure. Medcalf 2TE-1. John Waterhouse was one of the earliest issuers of tokens in the islands. This soft white metal issue is seldom seen in grades above the XF range and the area around the king's nose is almost always somewhat flattened. This attractive AU example shows only light wear on the design elements, with the typical flattened nose and lightly abraded surfaces. Pleasing shades of walnut-brown and silver-gray toning blanket both sides. Listed on page 426 of the 2019 Guide Book. Population: 5 in 50, 13 finer (4/18). NGC ID# 2UBK, PCGS# 600500

1880 Wailuku Plantation Token, XF45  
Medcalf 2TE-7, Half Real

**4319** 1880 Wailuku Plantation Half Real XF45 PCGS Secure. Medcalf 2TE-7. The Wailuku Plantation tokens were manufactured by the company blacksmith shop on Maui and circulated as money throughout the islands. Although the 1880 one real pieces are not too difficult to locate, the half reals are more elusive. This Choice XF specimen shows moderate wear on the well-detailed design elements and the lightly abraded walnut-brown surfaces exhibit some porosity on both sides. Listed on page 426 of the 2019 Guide Book. Population: 2 in 45, 3 finer (4/18). NGC ID# 2UBP, PCGS# 600509

1882 Haiku Plantation Token, MS63+ Brown  
Medcalf TE-15, One Rial

**4320** 1882 Haiku Plantation One Rial Token MS63+ Brown PCGS Secure. Medcalf TE-15. The 1882 Haiku Plantation token was a high-quality issue, reportedly struck in San Francisco from dies that still exist. The denomination was a slightly inaccurate rendering of the Latin American real, worth one eighth of a dollar. This Plus-graded Select specimen exhibits sharply detailed design elements and lightly marked mahogany-brown surfaces. Listed on page 426 of the 2019 Guide Book. Population: 4 in 63 (1 in 63+) Brown, 3 finer (4/18). NGC ID# 2UBZ, PCGS# 600518

1886 Grove Ranch Plantation Token, AU50  
12 1/2 Cent, Medcalf TE-16

**4321** 1886 Grove Ranch Plantation 12 1/2 Cent Token AU50 PCGS. Medcalf TE-16. The Grove Ranch was a large Maui sugar cane plantation. In 1886 and 1887, the plantation issued 12 1/2 cent tokens, equivalent to a Spanish-American one real. This chocolate-brown example has a good strike and no distracting marks. The center of the obverse shows moderate granularity. Listed on page 426 of the 2019 Guide Book. Population: 3 in 50, 7 finer (4/18). NGC ID# 2UC2, PCGS# 600521

## PATTERNS

1850 Unperforated Cent in Nickel, PR65  
Judd-124c, PR65

**4322** 1850 One Cent, Judd-124c, Pollock-141, R.8, PR65 NGC. Part of an effort to reduce the diameter of the large cent. The obverse displays CENT and 1850 separated by two eight-petal flowers. The reverse exhibits a widely separated ONE CENT encompassed by a laurel wreath. Struck in nickel with a plain edge on an unperforated planchet. Formerly known as Judd-152a, the pattern variety was renumbered in the Eighth Edition to accompany others struck from the same die pair. Light tan toning visits primarily pearl-gray surfaces. Satiny and unabraded with moderate incompleteness of strike at the centers. NGC ID# 298C, PCGS# 62306

1858 Indian Head Cent in Copper-Nickel  
Judd-211, Snow-PT26, MS63

**4323** 1858 Indian Cent, Judd-211, Pollock-262, Snow-PT26, R.4, MS63 NGC. The obverse of this popular pattern displays the Longacre Indian Head motif that appears on the production cent of 1859. The bust point is broad and the date centered. The reverse, however, carries a thick oak wreath similar to that on the 1860 reverse, but no shield is present. Struck in copper-nickel with a plain edge. A broad bust point confirms the Pollock-262 subvariety. Well-struck and attractively toned in orange, rose, and green-gold shades. A hair-thin mark above the headdress determines the grade. Ex: FUN Signature (Heritage 1/2008), lot 3557. PCGS# 11893

1864 Half Dollar in Aluminum  
Judd-395, PR64  
Only Two Examples Known

**4324** 1864 Half Dollar, Judd-395, Pollock-463, R.8, PR64 PCGS. Originally described as a regular dies trial striking for the half dollar. Struck in aluminum with a reeded edge. However, as with most off-metal strikings, this was most likely produced for sale by Mint personnel to favored customers. Only two examples are known of this rarity. The surfaces are slightly subdued but still show the usual cameo contrast commonly found on aluminum patterns. A darker area on the reverse is an obvious identifier, located below the ED of UNITED.  
Ex: Larry Shepherd Collection (Superior, 8/1991), lot 932; Herman Halpern Collection (Bowers and Merena, 3/1995), lot 2518, unsold. PCGS# 60566

1869 Standard Silver Quarter in Aluminum  
Judd-725, PR64

**4325** 1869 Standard Silver Quarter Dollar, Judd-725, Pollock-806, High R.7, PR64 PCGS. Liberty faces left, and is adorned with a large cap with stars along the lower-front border. IN GOD WE TRUST is featured on a scroll below the portrait. The reverse has a wreath of oak and laurel leaves, with 25 CENTS crowded inside while the date is below and STANDARD SILVER is centered above. Struck in aluminum with a reeded edge. The right obverse field has an area of slightly granular surface, as made, while the reverse has a couple of retained mint-made laminations. A few wisps of charcoal patina are seen on each side.

Ex: FUN Signature (Heritage, 1/2004), lot 8451; Long Beach Signature (Heritage, 9/2008), lot 3442. NGC ID# 29S9, PCGS# 60952

1871 Standard Silver Half Dime in Aluminum  
Judd-1070, PR65  
Fewer Than Three Pieces Confirmed

**4326** 1871 Half Dime, Judd-1070, Pollock-1206, R.8, PR65 PCGS. A seated figure of Liberty facing left is seen on the obverse with the date 1871 below. She is surrounded by an arc of thirteen stars and wears an Indian headdress, supporting a Liberty Pole with her right hand. The reverse is the same type that was used to coin regular-issue half dimes. Struck in aluminum with a reeded edge. A very rare pattern with fewer than three pieces confirmed. This is a bright, sparkling, unoxidized aluminum strike with the usual deeply reflective fields and contrasting frosted devices.

*From The Tuxedo Park Collection.* PCGS# 61329

1875 Regular Dies Quarter in Aluminum  
Judd-1417, PR63 Cameo

**4327** 1875 Quarter Dollar, Judd-1417, Pollock-1559, R.7, PR63 Cameo PCGS. CAC. Struck from regular production dies, but in this case struck in aluminum with a reeded edge. USPatterns.com states: "Although these are described as regular die trial pieces in the standard references, it is more likely that these were deliberately struck for sale to collectors as part of complete off-metal sets." Examples were also produced in copper. Fewer than three aluminum pieces are confirmed and this may be a fourth. Copper strikings are equally rare, also with three pieces known. The fields are bright and highly reflective and establish a "black" background for the thickly frosted devices. A number of planchet flakes and irregularities (often seen on aluminum patterns) are noticed on the obverse, but only one (located next to the eagle's neck) is present on the reverse. PCGS# 627137 Base PCGS# 61724

1882 Liberty Head Five Cents in Nickel  
Judd-1690, PR62

**4328** 1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR62 PCGS Secure. A popular precursor to the Liberty nickel. Dated 1882 instead of 1883, and the stars are arranged differently relative to the portrait, particularly star 10. The reverse is identical to the issued 1883 No Cents nickel. Struck in nickel with a plain edge. Blue-green, rose, violet, and golden tones cover each side. Faint marks are well-hidden and undistracting.

*From The Collection of William Rau, Part II.* NGC ID# 2AKC, PCGS# 62095

1884 Perforated Cent in Nickel  
Judd-1721, PR67  
Among the Finest Certified

**4329** 1884 One Cent, Judd-1721, Pollock-1929, R.5, PR67 PCGS Secure. A "holey" cent design, credited to Eastman Johnson, with a large irregular center perforation. These experimental pieces were intended to make small denomination coinage easier to distinguish by the blind, and thereby to "remedy the inconvenience of similarity in our small coin." The obverse bears the legend UNITED STATES OF AMERICA about the upper rim and the date at the bottom. The reverse shows the denomination ONE CENT at the top with an inverted shield and two laurel sprigs below. Struck in nickel with a plain edge on a thick planchet. A needle-sharp and practically pristine specimen with attractive pastel straw-gold, lime-green, pink-red, and lilac toning. NGC ID# 2AL9, PCGS# 62150

1896 Federal Shield Cent in Pure Nickel  
Judd-1767A, PR65

**4330** 1896 One Cent, Judd-1767A, Pollock-1981, Low R.7, PR65 PCGS. Eagle Eye Photo Seal, card included. Charles Barber's pattern for a uniform coinage in the cent and nickel denominations. The obverse has a shield as the central design element, crossed poles behind, one has a liberty cap atop and the other an eagle. E PLURIBUS UNUM, 13 stars, and the date are at the margin. The reverse is simply laid out with the denomination in the center, an olive wreath around, and UNITED STATES OF AMERICA at the margin. Struck in pure nickel (and as such it is magnetic) with a plain edge. The surfaces are bright with moderately reflective fields and each side is untoned. NGC ID# 2AM6, PCGS# 62221

**End of Session Two**

# SESSION THREE

## EARLY HALF DOLLARS

1794 Half Dollar, VG8  
O-101, Berries 10/11

**4331** 1794 O-101, T-7, High R.3, VG8 NGC. Tompkins Die State 1/2. Overton-101 is the only 1794 variety with 21 berries — 10 left, 11 right. The berry count is clear on even this VG coin, which is an easy way to confirm the variety when all berries are visible. The eagle's wings are just about smooth with only a trace of feather detail. Obverse wear is heaviest at the lower border, suggesting the dies were slightly misaligned. A pair of curved lines in the right obverse field and some small pits above the eagle's head are the most noticeable marks on lightly abraded golden-gray surfaces. We note the holder calls this example O-101a (the late die state), but we believe this is actually an earlier O-101 die stage without the late-forming extended crack beneath O in OF to the final S in STATES.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

**4332** 1794 O-101, T-7, High R.3 — Plugged, Heat Damage — NCS. **VG Details.** Tompkins Die State 1/3 or later. A hole was repaired between the B and E in LIBERTY, and the repair is visible beneath the reverse wreath as well. Blue, gray, and olive shades cover both sides with many raised ebony-gray encrustations along the borders and surrounding the eagle. The date area and Liberty's portrait are less affected by the heat damage.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 O-101a Half Dollar, VG8  
Deeply Toned Original Surfaces

**4333** 1794 O-101a, T-7, High R.3, VG8 NGC. Tompkins Die State 1/5. Dusky, steel-gray toning with charcoal-gray overtones disguise the well-worn devices, which fortunately show a thin outline of silver around most of the raised motifs to balance the aged patina. A glass reveals some expected small marks and abrasions, with a short, straight strike-through on either side of Liberty's head. The central elements show considerable wear, while the perimeters are sharper with nearly full dentils, date, legends, and stars. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half Dollar, VG10  
O-101a, Advanced Die State

**4334** 1794 O-101a, T-7, High R.3, VG10 NGC. Tompkins Die State 1/5. Pale-blue and sea-green toning surrounds lilac-gray surfaces of this smooth, collector-grade O-101a example. The 1794 date is worn at the base of the numerals but fully readable, and all of the motifs and stars are well-outlined. There are no serious abrasions for the grade, nor are there any adjustment marks. Some feather detail remains on the wings, and Liberty's portrait shows unexpected definition in the hair recesses.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**4335** 1794 O-101a, T-7, High R.3 — Plugged, Toolooed — NCS. **Fine Details.** Tompkins Die State 1/5. Dove-gray toning deepens at the borders, while the raised motifs show light, silver-grade shades. A hole was plugged and repaired at the date, where numerals were reengraved, and similar tooling is visible at TE in STATES. Minor pinscratches are noted near stars 9 and 13. Short adjustment marks exist on Liberty's central hair strands and at the lower-right border.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Flowing Hair Half  
VF Details, Sharply Defined

**4336** 1794 O-101a, T-7, High R.3 — Obverse Toolooed, Reverse Scratched — NCS. **VF Details.** Tompkins Die State 1/5. Although barely visible in-hand, a loupe reveals fine tooling throughout the fields and portrait to minimize abrasions and marks. The reverse shows angled adjustment marks, which do not affect the coin's grade, but two long pinscratches intersect the Mint-made file marks. This example is richly toned in shades of gunmetal-blue and faint rose. Solid VF details exist throughout both sides.

*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 Flowing Hair Half, Good 4  
Elusive Overton-104 Die Pair**

- 4337 1794 O-104, T-11, R.5, Good 4 PCGS. Early screw press strikings are often unevenly impressed, which can translate to uneven wear, as seen on this O-104 half dollar. All the legends are readable and the devices are boldly outlined, but the border dentils merge with the fields along the right-obverse and reverse peripheries. A few small marks appear under a loupe, but the lavender-gray surfaces are generally pleasing for the Good 4 grade level.  
*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

- 4338 1794 O-105a, T-3, R.6 — Bent, Environmental Damage — NCS. Good Details. Tompkins Die State 1/2. The central motifs are worn smooth — especially on the reverse, from a combination of a slight bend in the coin, sinking of the reverse die, and circulation wear. A band of deep bluish-gray porosity angles across the remaining details of the portrait. Peripheral elements are better-defined on both sides, including the all-important date, which is fully visible. The O-105a variety is scarce, as are all 1794 varieties, with the exception of O-101 and O-101a.  
*From The Terry Brand Estate, Part IX.* NGC ID# 24E6, PCGS# 39207 Base PCGS# 6051

- 4339 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, VG8 PCGS. The legends, stars, and dentils are bold on this lightly hairlined dove-gray Flowing Hair type coin. Liberty's forehead has a narrow horizontal flan flaw. The anonymous die sinker initially entered an E where the A should be in STATES, but promptly recognized the blunder. The same presumably inexperienced person may have been responsible for the S over D errors on the 1795 B-6 half eagle and O-129 half dollar. NGC ID# 24E7, PCGS# 39254 Base PCGS# 39252

- 4340 1795 2 Leaves, O-116, T-11, R.4, Fine 12 NGC. Tompkins Die State 2/2. Deep gunmetal-gray fields contrast with stone-gray high points. No marks are noticeable on this evenly circulated Flowing Hair type coin. All the legends are boldly defined. The dentilation is weak along the right obverse periphery. NGC ID# 24E7, PCGS# 39232 Base PCGS# 6052

**1795 O-121a Half Dollar, VF25  
Two Leaves, Y Over Star, Late Die State**

- 4341 1795 2 Leaves, Y Over Star, O-121a, T-2, R.6, VF25 PCGS. Tompkins Die State 3/1. The scarce Overton-121a (T-2) "Y over Star" engraver's blunder is mentioned on page 210 of the 2019 Guide Book but not separately priced. This is a late die state with a heavy vertical crack between the 95 in the date. The center of the obverse is almond-gold and the remainder of the coin is ocean-blue. Clash marks are prominent near the profile, and the reverse displays moderate adjustment marks, all as made. The only mentionable abrasion is a solitary pin scratch at the top of the wreath.  
Ex: Long Beach Signature (Heritage, 6/2014), lot 3871. NGC ID# 24E7, PCGS# 39257 Base PCGS# 6052

- 4342 1795 2 Leaves, O-122, T-5, R.5, VG10 NGC. Tompkins Die State 5/3. A charming dove-gray representative with generally pleasing surfaces. All the legends are clear, and partial hair and plumage detail is evident. A small edge flaw at 2:30 is of mint origin. Overton-122 is a better die marriage that is distinguished by a prominent curved crack through the M and final A in AMERICA. NGC ID# 24E7, PCGS# 39238 Base PCGS# 6052

**1803 Draped Bust Half, AU53  
O-101, Large 3, Small Reverse Stars**

- 4343 1803 Large 3, Small Reverse Stars, 12 Arrows, O-101, T-1, R.3, AU53 NGC. Tompkins Die State 2/3. A minimally marked, cream-gray example of the Large 3 type with light golden-brown color overall, and aqua patina near the margins. Slight high-point wear is consistent with the AU53 grade level. Minor adjustment marks are visible on the lower-right obverse, with die clashing noted on the reverse. Liberty's hair is sharp and many of the eagle's breast feathers above the shield remain intact, while the beak and head show wear. Soft mint luster is strongest at the margins. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

- 4344 1805 O-111, T-3, R.2, VF35 PCGS Secure. Tompkins Die State 2/3. A scarce die state with a horizontal crack between the AM in AMERICA. A beautiful Draped Bust type coin that boasts lovely orange-red, ocean-blue, and stone-gray toning. No marks are remotely relevant, and the strike is even except on the upper-right reverse stars. NGC ID# 24EG, PCGS# 39285 Base PCGS# 6069

- 4345 1805 O-112, T-2, R.2, VF35 PCGS. A wheat-gold Choice VF Draped Bust type coin. Marks are trivial except for a pair of thin lines above the M in UNUM. The "collar" clash mark below the chin helps attribute the available O-112. A delicate die crack near STATES provides a precursor to the large cud seen in later die states. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

**4346** 1805 O-112, T-2, R.2, XF45 PCGS. Tompkins Die State 1/1. The Overton-112 (Tompkins-2) variety is the most-available 1805 die marriage despite the dodgy state of the reverse die, which shows die crumbling at the rim above the second S of STATES and a long, looping die crack that engulfs all of STATES in a retained cud, which becomes a full cud in the rare latest die stage. This Choice XF coin is sharply defined and richly toned in gunmetal-gray shades. Marks are limited to tiny ticks and die clashing on the obverse, while the reverse shows light wear on the eagle's head, clouds, and wingtips but no marks of consequence. Early Bust half specialists will like the natural look and Choice surfaces of this O-112. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

**4347** 1806/5 O-102, T-7, High R.3, XF45 NGC. Tompkins Die State 2/2. Deep steel-blue and autumn-brown toning blankets this unblemished and pleasing Choice XF Draped Bust half. A small rim flaw between the IB in LIBERTY is of mint origin. Circulation wear is moderate and the portrait is fairly sharp, though the area near the eagle's head is incompletely brought up. NGC ID# 24EK, PCGS# 39298 Base PCGS# 6077

**4348** 1806 Knob 6, Small Stars, O-106, T-4, R.4, VF30 PCGS. Tompkins Die State 2/1. The high points are stone-gray, but the remainder of this midgrade Draped Bust half dollar displays lavender toning. Impressively unabraded, and the strike is good except on the reverse stars and clouds opposite the bust tip. NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

#### 1806 O-109 Half Dollar, AU50

No Stem, Pointed 6

Exceptional Eye Appeal

**4349** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU50 PCGS Secure. Generous glimmers of luster emerge from the borders and motifs of this cream-gray Draped Bust type coin. The lightly circulated surfaces are refreshingly unabraded. The die sinker neglected to punch the stem of the eagle's branch into the die, which makes it appear as if the branch is growing from the claw. Both sides exhibit multiple sets of clash marks, usual for the popular Guide Book variety. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

#### 1807 Draped Bust Half Dollar

Overton-105, AU50

**4350** 1807 Draped Bust, O-105, T-4, R.1, AU50 PCGS Secure. Tompkins Die State 4/3. The obverse field and high points are dove-gray, but pockets of bright silver luster are plentiful throughout both sides. The smooth surfaces are impressively devoid of contact. Overton-105 is readily attributed by a die flaw on the reverse border near 1 o'clock. The obverse strike is a touch soft, compounded by 10 points of wear, yet the visual effect of this About Uncirculated early half is undeniably appealing. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

#### 1807 Draped Bust Half, AU50

O-108, Mid-To-Late Die State

**4351** 1807 Draped Bust, O-108, T-1, R.3, AU50 PCGS. Tompkins Die State 2/3. Rich autumn-brown and olive toning intensifies toward the rims, with an area of deep toning between stars 4 and 5. The devices are dove-gray. There are no relevant marks, although moderate wear is noted on the eagle's neck and Liberty's jaw, forehead, and shoulder. This is a problem-free, originally toned example of the Draped Bust silver type that was soon replaced by John Reich's Capped Bust design.  
Ex: Dallas Signature (Heritage, 11/2007), lot 716. NGC ID# 24EM, PCGS# 39348 Base PCGS# 6079

**4352** 1807 Draped Bust, O-109, T-2, R.7, Fine 12 PCGS. Tompkins Die State 1/1. Tompkins-2 is R.3, but the early die state, without a crack through the date or LIB, is rare. A dusky chestnut-gold and slate-gray example with even wear and an absence of relevant marks. Population: 2 in 12, 1 finer (4/18). NGC ID# 24EM, PCGS# 39349 Base PCGS# 6079

**4353** 1807 Draped Bust, O-110a, T-3, R.2, XF40 NGC. Tompkins Die State 3/4. The late die state with many slender reverse cracks. Peripheral hints of sea-green and sun-gold surround stone-gray centers. Glimmers of luster brighten the margins, and marks are absent save for a slight reverse rim knock at 6:30. NGC ID# 24EM, PCGS# 39352 Base PCGS# 6079

### BUST HALF DOLLARS

**4354** 1808/7 O-101, R.1, AU55 PCGS. An impressive example of the sole 1808/7 die marriage, a popular Guide Book variety. The borders display only a hint of golden patina. Lustrous and nearly friction-free, though we note a few small brown spots on the reverse, and a thin mark near the shoulder curl. Encapsulated in an old green label holder. NGC ID# 24ER, PCGS# 39378 Base PCGS# 6091

**4355** 1808 O-109a, R.3, AU58 NGC. Apricot-gold, sea-green, and steel-blue toning embraces this partly lustrous early Capped Bust half. Wear is minimal. A loupe reveals a couple of thin marks on each side. A late die state with no reverse dentilation and the bottom of 50 C merging into the rim. NGC ID# 24EP, PCGS# 39375 Base PCGS# 6090

**4356** 1809 XXX Edge, O-102, R.1, XF40 PCGS. CAC. Blended olive-gray and powder-blue toning encompasses moderately circulated but problem-free surfaces. The straight row of triangular elements above the eagle is as-made, and characteristic of O-102. The U in UNITED is widely repunched south. Since the same reverse die also struck O-101 and O-110, the position of star 13 and the absence of reverse cracks confirm the Overton variety. NGC ID# 24ES, PCGS# 39380 Base PCGS# 6093

**4357** 1809 XXX Edge, O-108a, R.4 — Harshly Cleaned — PCGS Genuine. Fine Details. Interestingly, the early die state O-108 usually has the III Edge, while the late die state O-108a is usually the XXX experimental edge. A die crack from the edge through the lower points of star 4 into the field confirms the O-108a designation. This example had a past cleaning that left many hairlines throughout both sides. Bluish-gray border toning surrounds stone-gray centers.

**4358** 1809 III Edge, O-109a, R.2, AU55 PCGS. CAC. A Choice About Uncirculated example of an advanced die state of this popular variety, although not the latest state since there are no large broken patches at the arrowheads. A strong die crack runs through the middle of AMERICA and Liberty's top forecurl is clear of the headband. Soft mint luster remains beneath attractive lilac-gray toning, with high-point wear visible on the eagle's left wing shoulder, head, and the portrait. Patience is required to locate trivial contact. NGC ID# 24ES, PCGS# 39387 Base PCGS# 6094

**4359** 1810 O-101a, R.1, AU58 PCGS Secure. CAC. Orange-gold and lavender toning embraces this exceptionally unabraded near-Mint half dollar. The strike is sharp except on the top of the left (facing) wing. A late die state with many cracks and clashes. For all 1810 die varieties, CAC: 24 in 58, 18 finer (5/18). NGC ID# 24ET, PCGS# 39405 Base PCGS# 6095

**4360** 1810 O-104, R.3, AU58 PCGS Secure. Sharply struck from an early die state, this Overton-104 half displays attractive, slate-gray surfaces with deep gray accents. The obverse stars show sharp centers and the reverse legend sits well away from the edge with crisp definition on all of the letters. A die flaw at the top-left of the shield confirms the O-104 variety. NGC ID# 24ET, PCGS# 39409 Base PCGS# 6095

**4361** 1810 O-106a, R.3, AU55 PCGS. A lightly circulated and unblemished stone-gray representative. The curls display moderate wear but the eagle is well-defined. Dentilation is nearly absent, as made. Clashed several times beneath the scroll, but the pick-up point for the die marriage is a lengthy diagonal extension of the right shield point. NGC ID# 24ET, PCGS# 39413 Base PCGS# 6095

**4362** 1810 O-110, R.2, AU55 PCGS. A dusky stone-gray Choice AU type representative. The high points show scant evidence of wear, and marks are confined to a slight obverse rim nick at 6:30. The stars are lightly brought up but the remainder of the design is bold. Overton-110 lacks die markers but is triple clashed above the eagle's right (facing) shoulder. NGC ID# 24ET, PCGS# 39420 Base PCGS# 6095

**4363** 1811/10 O-101, R.1, AU53 PCGS. Light to medium peach-gold toning enriches this unabraded and partially lustrous Capped Bust half. Exceptionally nice for the designated grade. The 1811/10 overdate is subtle, but the spike from the top of Liberty's cap allows prompt attribution. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

**1811 O-110 Half Dollar, MS63  
Small 8, Original Frosted Color**

**4364** 1811 Small 8, O-110, R.1, MS63 PCGS. Early date Capped Bust half dollars at the Select Uncirculated grade are an intriguing buying opportunity at current price levels. This original and lustrous O-110 meets the criteria, with strong eye appeal and attractively toned surfaces. Blue accents at the borders encircle pale peach-gold centers. The strike is just a touch weak at some high points, but sharp everywhere else. Marks are few and far between, and entirely non-distracting. Population (all Small 8 varieties combined): 36 in 63, 50 finer (5/18). NGC ID# 24EU, PCGS# 39434 Base PCGS# 6097

**1812/1 O-102a Bust Half, MS61**

**Small 8, Guide Book Variety**

**Scarce in Mint State**

**4365** 1812/1 Small 8, O-102a, R.2, MS61 NGC. Overton-102 is the only 1812 die marriage with a Small 8 in the date. This Uncirculated example represents the O-102a late die state, which has a weak die crack at the date connecting 1 and 2 (or, more accurately, connecting 1 with the underdigit 1 beneath 2). The coin is sharply struck, with stars that show nearly full central details, although a few of the right-hand stars are drawn to the edge as usual for the die state. Golden-tan toning joins shades of blue and reddish-orange across nearly mark-free, softly lustrous surfaces. Census: 3 in 61, 8 finer (5/18). NGC ID# 24EY, PCGS# 39444 Base PCGS# 6101

**4366** 1812 Large 8, O-103, R.1, AU58 PCGS. This lustrous Borderline Uncirculated half is almond-gray aside from peripheral hints of russet-brown. The right-side stars are softly brought up, but the remainder of the strike is bold, and no abrasions are apparent. Ex: Summer FUN Signature (Heritage, 7/2010), lot 3668, where it realized \$2,070. NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100

**1812 O-103 Bust Half, Sharp MS63  
Highly Lustrous, Colorfully Toned**

**4367** 1812 Large 8, O-103, R.1, MS63 PCGS Secure. This lustrous Select O-103 half dollar displays vibrant luster and mottled golden and russet toning. The strike is sharp albeit slightly uneven, with the right-hand stars flat as always for the variety. Metal flowlines in the margins fail to affect the strike sharpness. Minor marks on the portrait and in the fields determine the grade but pose little distraction. NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100

**1812 O-107 Half, MS63  
Early 'Prime' Die State**

**4368 1812 Large 8, O-107, R.1, MS63 PCGS Secure.** Overton-107 is a "Jumping 1" variety, with the first 1 in the date high, and the other date digits leaning left toward it. O-108 shares the same obverse. The O-107 reverse shows a long, slender tine from the top-right shield corner into the wing feathers to differentiate the two varieties. This example is sharply struck from the "prime" early die state, without any lump or mounding above the eagle's left (facing) wing. Deep-blue rim toning surrounds copper-red accents and harvest-gold interiors, with nearly mark-free fields. A series of small neck abrasions is well-hidden in the attractive toning. We note light die clashing on the reverse and the faint beginnings of a die crack from 8 through 1 to the bottom curl. NGC ID# 24EW, PCGS# 39452 Base PCGS# 6100

**4369 1813 O-103, R.2, AU58 PCGS.** Autumn-brown and cream-gray toning blankets this partly lustrous and multiply clashed Borderline Uncirculated half dollar. A good strike save for blending on the uppermost stars. Refreshingly unabraded aside from a faint hair-thin line on the cheek.

*Ex: Long Beach Signature (Heritage, 2/2007), lot 3382; Houston Signature (Heritage, 12/2008), lot 612, which realized \$1,265. NGC ID# 24EZ, PCGS# 39461 Base PCGS# 6103*

**4370 1817/3 O-101a, R.2, VG10 PCGS.** The less-famous of two blatant overdates that headline several interesting 1817 varieties. While the 1817/4 is the premier rarity of the entire series, the 1817/3 is popular in its own right for the sharpness of its naked-eye overdate. This is a late die stage example, defined by a die crack that runs along the top of 50C. Deep golden-gray toning covers smoothly worn, Choice surfaces. Three tiny marks opposite Liberty's lips and chin require a loupe for viewing and do not cause any distraction. NGC ID# 24F7, PCGS# 39512 Base PCGS# 6111

**1818/7 Capped Bust Half, AU58  
Large 8 Guide Book Variety, O-101  
Exceptional Early Strike**

**4371 1818/7 Large 8, O-101, R.1, AU58 PCGS.** Copper-red and deep cobalt-blue toning combine for an impressive visual display over remarkably smooth, hard, and sharply struck surfaces of this nearly Mint State, popular overdate. Struck from obviously fresh dies, there are no signs of die wear such as granularity or metal flow. A glass reveals a few light marks from brief circulation — a hair-thin line from chin to chest exists — and the high points reveal a touch of wear. Soft mint luster glows resiliently beneath the toning. Population: 17 in 58, 22 finer (4/18). NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

**4372 1818/7 Large 8, O-103a, R.4, AU50 PCGS.** A fine vertical die crack appears just left of the 1 in the date and a die bulge is seen in the left obverse field next to Liberty's profile, but there is not yet a crack connecting the two 8s in the date. This AU overdate half dollar displays sharp detail and bright, satiny surfaces with a blush of light golden toning. NGC ID# 24FA, PCGS# 405384 Base PCGS# 6115

**4373 1819/8 Small 9, O-101, R.1, AU58 PCGS Secure.** An early die state without any reverse peripheral cracks. This momentarily circulated half dollar displays ample luster and displays only a hint of straw-gold and ice-blue toning. No marks are of interest, and the strike is sharp except in the vicinity of the claws. NGC ID# 24FC, PCGS# 39555 Base PCGS# 6118

**1820/19 Half Dollar, AU58  
O-101a, Square Base 2, Richly Toned**

**4374 1820/19 Square Base 2, O-101a, R.3, AU58 PCGS.** This is the Square 2 overdate variety, with both the 1 and 9 underdigs readily observed, although in this later die state the bottom loop of the 9 is less visible than in earlier die states. Liberty's drapery and the eagle's brow display slight wear, yet luster dominates the borders. Richly toned sea-green, blue, and reddish-brown surfaces are refreshingly unabraded. This is a popular two-digit overdate, necessary for type as well as variety.

*Ex: Long Beach Signature (Heritage, 2/2010), lot 1148; Long Beach Signature (Heritage, 6/2015), lot 4474. NGC ID# 24FE, PCGS# 39573 Base PCGS# 6125*

**4375 1820/19 Curl Base 2, O-102, R.1 — Questionable Color — PCGS Genuine. Unc Details.** Powder-blue, caramel-gold, lilac-red, and tan-brown toning embraces this well-defined and satiny representative. Minimally hairlined, and abrasions of notice are absent. As the sole Curl 2 overdate die marriage, Overton-102 receives its own Guide Book listing.

**4376 1821 O-105, R.1, AU58 NGC. CAC.** The early die state without a die crack through TAT in STATES. This well-struck Choice AU example displays dusky stone-gray and walnut-brown toning. Marks are minimal, and wear is apparent only on the crests of the wings and the top of the eagle's head. For all 1821 varieties, CAC: 23 in 58, 23 finer (5/18). NGC ID# 24FF, PCGS# 39582 Base PCGS# 6128

**4377 1821 O-107, R.3, AU58 NGC. CAC.** Vibrant cartwheel luster confirms the quality of this unmarked and attractive Bust half dollar. Stone-gray and apple-green peripheral toning further attests to the originality. As nice as they come for the grade.

*Ex: ANA Signature (Heritage, 8/2012), lot 3391, where it realized \$2,115. NGC ID# 24FF, PCGS# 39586 Base PCGS# 6128*

**1822 Half Dollar, MS61  
O-104, Attractively Toned**

- 4378 1822 O-104, R.3, MS61 NGC. Each side displays bright mint luster. A broad band of blue-green toning dominates the obverse border, though lilac-red is also present. The obverse center is brilliant, and the reverse displays delicate lime-green patina near the rims. Well-struck and unblemished.  
Ex: San Francisco Signature (Heritage, 3/2014), lot 10348, where it brought \$3,290. NGC ID# 24FG, PCGS# 39589 Base PCGS# 6129

- 4379 1822 O-106a, R.3, AU58 PCGS. Splashes of golden-brown and navy-blue toning endow the margins of this partly lustrous and pleasing near-Mint Bust half. No marks are remotely consequential, and the eye appeal surpasses the numerical grade. A delicate die crack through the lower-reverse margin confirms the later Overton subvariety. NGC ID# 24FG, PCGS# 39592 Base PCGS# 6129

- 4380 1822 O-111, R.2, AU58 PCGS. Faint glimpses of reddish-tan toning visit the mostly brilliant surfaces of this near-Mint 1822 half. The O-111 variety is known for its rust-pitted reverse die, which imparts groupings of rust lumps beneath each wing and also in the shield stripe recesses. Most of the needle-sharp strike remains despite a brief time in circulation. Partial mint luster is strongest at the margins and retains much of its cartwheel effect. NGC ID# 24FG, PCGS# 39599 Base PCGS# 6129

- 4381 1823 Patched 3, O-101a, R.1, AU55 PCGS. The so-called "Patched 3" variety, showing a heavy die lump in the middle of the 3 in the date; the early die state lacks the "patch" and the 3 is nearly disjointed in the middle. This satiny Choice AU coin is evenly struck with only a touch of wear over the high points of the devices. Luster remains in the fields. Both sides are brilliant in the centers with warm golden color around the borders. NGC ID# 24FJ, PCGS# 39621 Base PCGS# 6133

**1825 Bust Half, High-Luster MS64  
O-106, Recut Flag on 5**

- 4382 1825 O-106, R.3, MS64 PCGS. This is a sparkling near-Gem example of the scarce O-106 early die state, lacking any of the die cracks that soon develop for the variety. Satiny mint luster beams brightly over smooth, sharply struck surfaces that display a medley of earthy colors — gunmetal blue, umber, forest-green, deep aquamarine, and stone-gray. The flag of 5 is broadly recut to provide instant confirmation of the variety. Tied for third in the Spring, 2018 Steve Herrman Condition Census for the variety. PCGS# 39652 Base PCGS# 6142

**1826 O-102 Half Dollar  
Lightly Toned MS63**

- 4383 1826 O-102, R.1, MS63 PCGS. A tiny die line through the top-right serif of the E in E PLURIBUS UNUM differentiates the O-102 variety from O-103, which share the same obverse die. The 6 in the date is abnormally high, and star 7 points directly at the upper edge of the headband to confirm the obverse. This Select Uncirculated coin is smooth, frosted, and lustrous with well-struck motifs and razor-sharp hair definition. A small mark is noted near the eagle's left wingtip, yet the balance of the coin is essentially mark-free. Vibrant champagne-gold toning covers both sides. NGC ID# 24FM, PCGS# 39668 Base PCGS# 6143

- 4384 1826 O-113'b, R.7?, MS62+ NGC. The late die state of O-113a with a crack through the tops of TATES. The Spring 2018 Herrman revision lists just five examples of O-113'b, and only the present lot is designated as Mint State. This satiny and pleasing half dollar has dusky steel-gray and walnut-brown toning. Clashed near the profile, but without any consequential marks. NGC ID# 24FM, PCGS# 39684 Base PCGS# 6143

**1827 Half Dollar, O-112, MS64  
Near-Brilliant Condition Census Example**

- 4385 1827 Square Base 2, O-112, R.3, MS64 PCGS Secure. A faint hint of gold lingers near the margins and atop some of the devices, yet vibrant silver luster dominates the frosted surfaces. As usual, the stars are close to the milling and sharper on the right than on the left sides of the portrait. The A and T of STATES are solidly joined at their bases, and the D of UNITED is too close to the nearby S. Several of the 49 1827 die varieties are scarce, although the O-112 is only moderately so. Still, this nearly brilliant and lustrous near-Gem example ranks in the middle of the Condition Census according to both the Parsley reference and Stephen Herrman's Spring, 2018 listing (4/18). NGC ID# 24FN, PCGS# 39705 Base PCGS# 6144

- 4386 1827 Square Base 2, O-125, R.3, MS62 NGC. A die line travels through (LIBER)T(Y) and the band to the cap. The marginal design elements are drawn to the rims, and slight die erosion is present in the fields, but central motif detail is good. The obverse is toned in iridescent blue and gold patina, while the reverse is largely brilliant. Lustrous and attractive for the grade. NGC ID# 24FN, PCGS# 39724 Base PCGS# 6144

- 4387 1827 Square Base 2, O-128, Low R.4, MS61 PCGS. Rich powder-blue and straw-gold toning blankets this satiny and uncommonly unabraded representative. Most of the stars lack full centers, and the late die state ensures an absence of reverse dentils, but the overall strike is good. A scarce die marriage identified by a die lump centered within the I in PLURIBUS. NGC ID# 24FN, PCGS# 39727 Base PCGS# 6144

- 4388** 1829/7 O-101, R.1, AU58 PCGS. Hints of almond-gold patina grace this lustrous and essentially unabraded Borderline Uncirculated representative. Despite its momentary stint in Jackson-era commerce and a few lightly impressed stars, any Capped Bust collector would be proud to own this half dollar. NGC ID# 24FT, PCGS# 39807 Base PCGS# 6155

**1830 Half Dollar, MS64  
Overton-101, Small 0**

- 4389** 1830 Small 0, O-101, R.1, MS64 PCGS Secure. The A in STATES is recut and partially filled, diagnostic for Overton-101. A splendidly toned example that has sea-green, straw-gold, russet-brown, and steel-gray shades throughout both sides. The fields are uncommonly smooth, and the cheek shows only unobtrusive marks. A quality addition to an early silver type set. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

**1830 O-114 Half Dollar, VF Details  
Sole Large Letters Reverse Variety**

- 4390** 1830 Large Letters, Small 0, O-114, R.5 — Cleaning — PCGS Genuine. VF Details. This important Overton variety is easily identified as the only one for the year with a Large Letters reverse and features its own listing in the annual *Guide Book*, adding to its collectibility. Smooth cream-gray surfaces present few marks of note. Remaining detail is good, showing signs of moderate circulation and a slightly incomplete strike.

**1830 Half Dollar, Choice VF  
Small 0, Overton-114  
Rare Large Letters Variety**

- 4391** 1830 Large Letters, Small 0, O-114, R.5, VF35 NGC. The elusive O-114 is the sole Large Letters die marriage for the date. As a key *Guide Book* variety, it commands an enormous premium over the typical Capped Bust half dollar. This is a midgrade example with dove-gray fields and stone-white high points. Smooth save for a slight obverse edge knock at 3 o'clock. A late die state with a wing clash below the chin, and the stars drawn toward the rim. NGC ID# 24FU, PCGS# 39836 Base PCGS# 39835

- 4392** 1830 Large 0, O-121, R.3, MS63 PCGS Secure. Golden-brown, powder-blue, and lilac-red toning adorns this coruscating and minimally marked Select half dollar. Some of the stars are soft, as is the top of the eagle's head, but a majority of the design is well-impressed. NGC ID# 24FU, PCGS# 39832 Base PCGS# 6157

- 4393** 1831 O-104, R.1, MS63 PCGS Secure. Die lines beneath the bust tip suggest Overton-104, and the die line through the upper berry locks in the attribution. This coruscating and unmarked Select Bust half offers medium to deep golden-brown and steel-gray toning. The strike shows softness only on the RIB in PLURIBUS. NGC ID# 24FV, PCGS# 39840 Base PCGS# 6159

**1831 O-110 Half Dollar, MS64  
Highly Lustrous, Attractively Toned**

- 4394** 1831 O-110, R.2, MS64 PCGS Secure. As always for the O-110 variety, the left-hand stars are drawn to the edge, typical for the second use of the obverse die that also struck O-109. On this example, the right-hand stars are slightly drawn, and all of the stars are essentially flat. On the reverse, the A in STATES is rotated clockwise to dip below the adjacent second T. This is an extremely lustrous near-Gem example, with blue, violet, and reddish-gold toning at the borders and primarily silver-gray interiors with pale-tan accents. The scroll shows incompleteness at URI in PLURIBUS, which is normal for the variety. Several MS64 coins occupy the lower end of the Condition Census for the variety. NGC ID# 24FV, PCGS# 39846 Base PCGS# 6159

- 4395** 1831 O-118, R.3, MS62 PCGS. A satiny olive-green and gunmetal-gray example. Lustrous and refreshingly devoid of marks. Only stars 5 and 6 lack a sharp impression. The relatively scarce O-118 is often attributed by a cluster of parallel die lines in front of Liberty's bust truncation. NGC ID# 24FV, PCGS# 39855 Base PCGS# 6159

- 4396** 1831 O-119, R.3, MS63 PCGS. Lovely autumn-brown and navy-blue toning grace the borders of this lustrous and lightly marked half dollar. The centers are well-struck, though the letters PLUR are incomplete, since they were struck in opposition with Liberty's bust tip. NGC ID# 24FV, PCGS# 39856 Base PCGS# 6159

- 4397** 1832 Small Letters, O-102, R.1, MS63 PCGS Secure. The 8 in the date is recut within both loops, and a vertical die line at Liberty's mouth creates the O-102 "Laced Lips" variety. This is a lustrous Select Uncirculated coin, with calico-like toning of cobalt blue, reddish-gold, gray, and ivory hues. Mint luster shines brightly across both sides. The strike is a bit weak on stars 7-9 and at the eagle's right (facing) talons, but the coin is sharp in all other regards for its middle die stage. NGC ID# 24FW, PCGS# 39858 Base PCGS# 6160

- 4398** 1832 Small Letters, O-113, R.2, AU58 NGC. CAC. Fire-red, gunmetal-gray, and sea-green toning encompasses lightly marked and satiny surfaces. Liberty's forehead and the top of the shield confirm brief circulation. A die line from the right (facing) wingtip identifies Overton-113. A late die state with many peripheral elements drawn to the rim. NGC ID# 24FW, PCGS# 39871 Base PCGS# 6160

**4399** 1832 Small Letters, O-115, R.1, MS62 NGC. CAC. A dusky gunmetal-gray and walnut-brown half dollar that exhibits satin luster and minimal marks. The strike is crisp except on the PL in PLURIBUS and stars 1, 4, and 5. A collectible Overton variety distinguished by fine vertical die lines above the right (facing) claw. NGC ID# 24FW, PCGS# 39874 Base PCGS# 6160

**4400** 1833 O-104, R.1, MS63 PCGS Secure. The second T in STATES was entered too high; Dr. Peterson's pick-up point for Overton-104. A late die state example with peripheral elements drawn toward the rims. Brilliant centers are framed by golden-brown, lilac-red, and electric-blue borders. Smooth aside from grazes in the right obverse field. NGC ID# 24FX, PCGS# 39891 Base PCGS# 6163

**4401** 1834 Large Date, Small Letters, O-106, R.1, MS64 NGC. Diagnostic markers for the available O-106 variety include the Large 4 cut over a Small 4, and the curved left leg of the M in AMERICA over a straight M. Definition is bold on the central elements, and few overt marks are present for the MS64 grade. Mint luster is radiant over each brilliant side. NGC ID# 24FY, PCGS# 39910 Base PCGS# 6165

**4402** 1834 Large Date, Small Letters, O-107, R.1, MS63 NGC. Satin luster traverses this essentially unabraded Bust half dollar. Most of the coin is pearl-gray, but a minutely granular area with deeper toning is noted on the lower and left portions of the reverse. A curved line within the M in AMERICA is an identifier for this frequently encountered Overton die marriage. NGC ID# 24FY, PCGS# 39911 Base PCGS# 6165

#### 1834 O-109 Half Dollar, MS64 Small Date and Small Letters

**4403** 1834 Small Date, Small Letters, O-109, R.1, MS64 NGC. CAC. Stars 8, 9, and 10 are diagnostically repunched to confirm the O-109 variety. A rich blanket of blended autumn-brown and olive-green toning endows this Choice Uncirculated Capped Bust type coin. The semireflective fields display faint clash marks, as produced, but abrasions are refreshingly few and minor. Aside from a small number of stars that lack their full definition, the remainder of the strike is sharp. Subtle iridescence glows from beneath the attractive patina. NGC ID# 24FY, PCGS# 39913 Base PCGS# 6166

#### 1834 O-110 Half Dollar, MS64

##### Small Date, Small Letters

**4404** 1834 Small Date, Small Letters, O-110, R.3, MS64 PCGS Secure. An unabraded pearl-gray and straw-gold Capped Bust type coin. Vibrant cartwheel luster rolls around each side, illuminating well-struck central devices. Several border stars are weak, and the reverse periphery exhibits moderate die wear. Overton-110 is readily attributed by its lengthy and elliptical reverse die crack. NGC ID# 24FY, PCGS# 39914 Base PCGS# 6166

#### 1836 Lettered Edge Half Dollar, MS64 O-112, Condition Census Quality

**4405** 1836 Lettered Edge, O-112, R.1, MS64 PCGS Secure. Splashes of caramel-gold and blue-green toning endow this lustrous and well-preserved near-Gem. The strike is good except on the LUR in PLURIBUS. Among the finest survivors of this die marriage. A diagonal die line between the lowest two arrowheads is the pickup point for Overton-112, per the handy attribution guide by Dr. Glenn Peterson. NGC ID# 24G2, PCGS# 39959 Base PCGS# 6169

## REEDED EDGE HALF DOLLARS

**4406** 1836 Reeded Edge, GR-1, R.2, VF30 PCGS. The status of the 1836 Reeded Edge half as an introductory issue and a low-mintage rarity is well known. Only 1,200 coins were struck, and these were the first for which a steam-powered press was used. Lavender and golden-gray patina over this high-end VF example is appealing. The upper reverse border is mostly worn away, but most of the other elements are well-detailed. The underlying surfaces show wispy hairlines. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

**4407** 1836 Reeded Edge, GR-1, R.2 — Cleaned — NGC Details. XF. The historic Reeded Edge 1836 half dollar has a traditional mintage of 1,200 pieces, and as a result it has been hoarded by speculators over the years. The actual mintage is almost certainly higher, though the issue becomes very scarce in better circulated grades. This is a well-defined olive-gray example with noticeable luster and moderate hairlines. We note unobtrusive marks through star 7 and on the rim near the date.

**4408** 1837 GR-22, R.2, MS62 NGC. Deep electric-blue, plum-red, and chestnut-brown toning encompasses this satiny Reeded Edge half dollar type coin. Well-struck in the centers, though border elements are incompletely impressed. An unobtrusive scuff on the cheekbone is all that precludes a finer grade. NGC ID# 24G4, PCGS# 531071 Base PCGS# 6176

**1837 Half Dollar, GR-23, MS64**

**Lightly Toned and Lustrous**

**4409 1837 GR-23, R.2, MS64 NGC.** The GR-23 variety is characteristically sharp in the centers and weak at the periphery (especially on the reverse). Other distinguishing features are few. This near-Gem example displays a short, blurry die crack from the outer point of star 10 to between the dentils, the only crack on either side of the coin. The reverse dentils are almost nonexistent and the legend is drawn to the edge. Almond-gold toning forms a light patina and mint luster shines brightly across both sides. PCGS# 531073 Base PCGS# 6176

**4410 1837 GR-25, High R.5, VG8 PCGS.** It is nothing short of amazing that we have two examples of the rare 1837 GR-25 variety in this sale. This is a problem-free Very Good example, with smoothly worn surfaces struck from the late, near-terminal die stage. The obverse is cracked into two levels, readily apparent just left of the date. As always, the dentils fade on the reverse in the later die state, where the legend and denomination merge with the edge. Remarkably few abrasions or marks are visible on the attractive, old-silver surfaces. The GR-25 die pair is the scarcest of all 1837 halves, with a high R.5 rarity rating. PCGS# 531079 Base PCGS# 6176

**1837 Reeded Edge Half, AU Details  
Rare GR-25 Variety, Near-Terminal Die State**

**4411 1837 — Improperly Cleaned, Obverse Tooled — NCS. AU Details. GR-25, High R.5.** Ex: Jules Reiver Collection. While the 1837 GR-1 variety is often thought to be the rarest of all 1837 half dollars, the GR-25 die marriage is equally scarce, and may in fact be rarer. GR-25 is clearly rarer in high grades, where it is unknown in Mint State. The dies failed almost at once, prompting Dick Graham to write in his reference, "I have seen coins in all stages from the 'prime' to the terminal stage, with two halves (of the obverse) on different planes, all in the space of about ten coins ... " This example is the Jules Reiver coin, with nearly full Mint State definition, although lightly hairlined from cleaning and tooled near Liberty's portrait. Faint gold toning retains mint luster at the margins. The near-terminal die stage is obvious, with a strong bisecting die crack from left of the date to the coin's top edge above the highest fold of the cap. A second crack curves behind the portrait, touching star 7, passing through Liberty's bottom curls, and across the 37 of the date. Biplanar surfaces flank the first crack. The present coin realized a strong \$1,495 in Heritage's January, 2006 Signature Auction of the Reiver Collection. It is worth much more now that the rarity of GR-25 is well established and documented. Ex: Jules Reiver Collection, Volume III (Heritage, 1/2006), lot 23399. PCGS# 531079 Base PCGS# 6176

**4412 1838 GR-8, R.2, AU58 PCGS. CAC.** Star 8 is widely repunched, diagnostic for GR-8. Light to medium gunmetal-gray toning graces this satiny Borderline Uncirculated example. The fields are unabraded and the strike is bold, though the obverse displays faint roller marks on the high points, as made. A few ticks on the portrait are of little import. For all die marriages, CAC: 23 in 58, 53 finer (5/18).

Ex: Central States Signature (Heritage, 4/2014), lot 4383, which realized \$998.75. PCGS# 531089 Base PCGS# 6177

**4413 1838 GR-15, R.3, MS62 PCGS Secure.** Medium iridescent toning provides substantial eye appeal across both sides of this interesting and attractive 1838 Reeded Edge half. Hair-thin field marks near star 5 determine the grade. A late die state with a pie-shaped retained cud above star 7. NGC ID# 24G5, PCGS# 531096 Base PCGS# 6177

**4414 1839-O GR-1, R.1, AU50 PCGS Secure.** The mintmark is repunched southwest, as seen on most 1839-O halves. This is the usual die state with many advanced cracks throughout the peripheries. A lightly circulated example with luster brimming throughout the borders. The surfaces are occasionally microgranular, but mentionable marks are absent. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

## SEATED HALF DOLLARS

**4415 1839 No Drapery, WB-101, Die Pair 2, R.3, XF45 PCGS.** This Choice XF example is one of four 1839 No Drapery die marriages, while the With Drapery variant adds another three varieties for the year. Golden-gray surfaces show light lines and tiny marks with magnification, but there are no individual marks of mentionable significance. Moderate wear on Liberty's portrait and some weakness at the reverse dentils are grade-consistent. Traces of mint luster remain in the sheltered areas. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

**1840 Seated Half Dollar, MS64+  
WB-102, Small Letters Reverse of 1839**

**4416 1840 Small Letters, Repunched Date, FS-301, WB-102, Die Pair 1, R.2, MS64+ PCGS Secure. CAC.** Repunched 40. Small Letters Reverse of 1839. Struck from an early die state, with the reverse die cracks not fully visible and diagnostic die lines by Liberty's foot. This is a *Cherrypickers'* variety, where the 0 in the date is triple-punched southeast and the 4 is repunched south. Peach-to-orange peripheral toning gives way to pale silver and deeper medium-gray color in the centers. The surfaces are lustrous with light abrasions that dot the reverse, while the design elements are sharply defined. Despite a mintage of more than 1.4 million pieces, the 1840 Reverse of 1839 half dollar is scarcer in Mint State than is generally realized by nonspecialists. Select Mint State examples are seldom seen, and Gem-quality pieces are rare. Population (all Small Letters varieties): 18 in 64 (2 in 64+), 14 finer (5/18). NGC ID# 24GM, PCGS# 392647 Base PCGS# 6234

**4417 1841-O Medium O, WB-102, Die Pair 3, R.3, MS62 PCGS.** The Medium O variety is considered scarcer than its Large O counterpart. Only two of the eleven 1841-O die marriages feature a Medium O mintmark, and the other die pair is R.5. A lightly abraded wheat-gold New Orleans half dollar with distributed gray freckles on the reverse. NGC ID# 24GS, PCGS# 572010 Base PCGS# 6237

**1847/(6) Half Dollar, AU55  
WB-102, FS-301, Late Die State**

**4418 1847/(6) WB-102, FS-301, Late Die State, AU55 ANACS.** The underdigit 6 is no longer visible between 47 on this late die state example. Doubling on LIBERTY and the scroll, strongest at TY, identifies this *Guide Book* variety. Smooth surfaces present a layer of intermixed blue and gold patina. The motifs are well-struck and show few traces of rub. Extensive spidery die cracks encircle the reverse legends. PCGS# 537379 Base PCGS# 6258

**1855-O Arrows Half Dollar, MS64  
Colorful Toning**

**4419 1855-O Arrows, WB-101, Die Pair 15, R.3, MS64 PCGS Secure.** Golden-brown, ocean-blue, and plum-red patina invigorates this prooflike Select New Orleans type coin. The strike is intricate, and the glassy fields show only inconsequential contact. Coined for just two years, the Arrows, No Motto, No Rays subtype is seldom seen with such impressive eye appeal. NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

**4420 Three-Piece S.S. Republic Half Dollar Three-Government Set.** Includes: 1860-O WB-103, Die Pair 11, R.3 — Shipwreck Effect — NGC, struck by the United States; 1861-O, WB-101, Die Pair 3, R.2 — Shipwreck Effect — NGC, struck by the state of Louisiana; and 1861-O, WB-103, Die Pair 13, R.2 — Shipwreck Effect (B) — NGC Details, AU, struck by the Confederate States of America; All three NGC-certified items are housed in a mahogany presentation case with slipcover. The certificate of authenticity is included.

Ex: Central States Signature (Heritage, 4/2012), lot 4460. (Total: 3 coins)

**4421 1861 WB-101 MS64 ★ NGC.** Splendid multicolor toning illuminates the borders of this lustrous and well-preserved Civil War half dollar. The exceptional toning coaxed the seldom-seen star designation from NGC. The strike is complete except on the eagle's left (facing) ankle. NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

**4422 1871 WB-101 MS63 PCGS.** Golden-brown and mauve-red toning visits the peripheries of this nicely struck and lustrous Select half dollar. Lightly abraded overall, with one small dig noted above the H in HALF. The 1871 is plentiful in VF and lower grades but is surprisingly scarce in mint condition. Population: 13 in 63, 26 finer (5/18). NGC ID# 6469, PCGS# 572193 Base PCGS# 6330

**1871-CC Half Dollar, XF45  
Choice Original Surfaces**

**4423 1871-CC WB-101, Die Pair 7, R.4, XF45 PCGS.** Fewer than 154,000 half dollars were struck at Carson City in its second year of operation, making the 1871-CC a semikey issue in all grades. This lightly and evenly worn piece retains bold overall detail, with dominant charcoal-gray toning. We can find no noteworthy circulation marks on either side of the coin. A scarce and highly desirable issue. Population: 23 in 45, 26 finer (4/18).  
Ex: Long Beach Signature (Heritage, 9/2005), lot 3240, which realized \$3,220. NGC ID# 646D, PCGS# 572196 Base PCGS# 6331

**4424 1873-CC No Arrows, Small CC, WB-101, Die Pair 1, R.3, VF25 PCGS.** One of two known die pairs for the No Arrows variety, showing a small mintmark and the Closed 3 logotype. This midgrade coin displays lovely battleship-gray patina and smooth surfaces. The design elements retain most major details, although the E in LIBERTY is weak. An outstanding coin for the grade. NGC ID# 24KC, PCGS# 572214 Base PCGS# 6338

**1873 Arrows Half Dollar, MS64  
Important Two Year Subtype**

**4425 1873 Large Arrows, WB-106, MS64 PCGS Secure. CAC.** Several subtypes are known for the Seated Liberty half dollars, beginning with the 1839 No Drapery pieces that began the series. In 1853, a single year subtype appeared with Arrows and Rays, and in 1854 and 1855, arrows flanked the date. The With Motto reverse was first issued in 1866, and arrows again flanked the date in 1873 and 1874. This sharply detailed Choice Mint State example features attractive gold and iridescent toning over frosty mint luster. Population: 44 in 64 (3 in 64+), 19 finer. CAC: 11 in 64, 2 finer (5/18). NGC ID# 24L7, PCGS# 572211 Base PCGS# 6343

1873 Arrows Half Dollar, MS64  
Rare CAC-Approved Example

**4426** 1873 Large Arrows, WB-106, MS64 PCGS. CAC. This lovely Choice Mint State example offers grayish-gold toning and soft luster. The design motifs have above-average definition, including nearly complete head detail on the obverse. Tiny splashes of deep blue toning are noted on the obverse. The 1873 Arrows half dollar is seldom offered finer. Population: 43 in 64 (3 in 64+), 19 finer. CAC: 11 in 64, 2 finer (4/18).  
Ex: FUN Signature (Heritage, 1/2012), lot 3590, which realized \$2,760. NGC ID# 24L7, PCGS# 572211 Base PCGS# 6343

1873-CC Arrows Half Dollar, Choice AU  
Small CC, Fully Struck

**4427** 1873-CC Arrows, Small CC, WB-102, Die Pair 3, R.4, AU55 ANACS. Bill Bugert estimates 750 1873-CC Arrows half dollars exist. All feature an Open 3 in the date, and the vast majority are heavily circulated, making this Choice AU piece all the more impressive. The obverse shows a large wedge-shaped die lump right of the scroll and a Small CC mintmark. A full strike, smooth, frosted surfaces, and faint traces of golden color contribute to the appeal of this challenging and numismatically significant Seated half dollar. PCGS# 572215 Base PCGS# 6344

**4428** 1874 Large Arrows, WB-102, MS63+ NGC. A two-year type coin that approaches Choice quality. Well-struck and lustrous with pleasing preservation. Mostly brilliant, though the margins display hints of russet toning. A distinctive (though presently unlisted) die variety with several die lines near OF and IN GOD WE TRUST. NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346

1875-CC Half Dollar, MS62  
Repunched Mintmark, Shimmering Surfaces

**4429** 1875-CC Repunched Mintmark, WB-102, Die Pair 8, R.4, MS62 PCGS Secure. There is a small die chip in the upper-right portion of Liberty's shield, another in the upper area between shield stripes 1 and 2 on the reverse, and there are lumps above the CA in AMERICA. The inner part of the first C in the Medium CC mintmark is repunched. This MS62 Carson City half dollar is incompletely struck with partial roller marks apparent on each side. However, its softly shimmering golden-gray surfaces are readily appealing, even in spite of a few grade-defining abrasions. NGC ID# 3GXX, PCGS# 572228 Base PCGS# 6350

**4430** 1875-S Very Small S, WB-101, Die Pair 17, R.3, MS64+ PCGS Secure. CAC. The Spiked 5 variety. A small tine opposite the intersection of the bottom flag of the 5 in the date protrudes from the left upright and confirms the variety. The coin is struck from an early die state, before die clashing appears in Liberty's lap and before a faint crack develops above the reverse legend. This is a smooth and sharply struck, high-end Choice Uncirculated example, with scattered areas of almond-gray toning over lustrous, frosted silver surfaces. We note a hair-thin abrasion along Liberty's shoulder, accentuated by the toning. Population: 4 in 64+, 86 finer. CAC: 8 in 64, 25 finer (4/18). NGC ID# 24KF, PCGS# 572229 Base PCGS# 6351

1876 WB-101 Seated Half, MS65  
A Lustrous, White Coin

**4431** 1876 Open Bud, WB-101, MS65 NGC. Type One Reverse (Open Bud). This brilliant-white, frosted Gem shows a sharp strike with vibrant mint luster. Abrasions are limited to a few tiny marks plus some Mint-related diagonal roller marks on each side. The 1876 had a large mintage of 8.4 million pieces in the nation's centennial year. Some pieces were saved as souvenirs, although the issue is quite scarce in Gem Uncirculated and finer grades. Census: 13 in 65, 6 finer (4/18). NGC ID# 645N, PCGS# 572234 Base PCGS# 6352

**4432** 1876-S Open Bud, Very Small S, WB-102, Die Pair 25, R.3, MS64 NGC. A "Chin Whiskers" variety, with an unfinished area below Liberty's chin with die lines extending downward. The mintmark is centered just below the junction of the branch and feather tip, tilted left. Raised lumps from die rust are scattered across the portrait and gown. This is a softly lustrous, Choice Uncirculated example with slight weakness on the upper hair and flanking stars, but otherwise sharply struck. Golden highlights warm the bluish-gray toning. Census (all varieties combined): 28 in 64 (2 in 64+), 12 finer (4/18). NGC ID# 24KJ, PCGS# 572242 Base PCGS# 6354

1876-S Half Dollar, Colorful MS65  
WB-102, Unlisted Die Pair

4433 1876-S Open Bud, Very Small S, WB-102, Die Pair-Unlisted, MS65 PCGS Secure. Both the obverse and reverse dies are known in other marriages but are not documented in a single pair. Thus, this is a new die pair for the 1876-S half dollar. Obverse 24 is elsewhere used for Die Pair 30, and Reverse BB is also found on Die Pair 40. This Gem coin is well-struck with a frosty reverse and semiprooflike obverse. Both sides have concentric toning that paints lemon-gold, sea-green, and violet borders around orange-gold interiors. Population: 10 in 65 (1 in 65+), 4 finer (4/18). NGC ID# 24KJ, PCGS# 572242 Base PCGS# 6354

4434 1877 Closed Bud, WB-103, MS64 PCGS. CAC. An impressive near-Gem, showing brilliant silver luster and faint hints of gray patina over frosted surfaces. Both sides show evidence of central strike weakness.  
Ex: FUN Signature (Heritage, 1/2009), lot 2881, where it realized \$1,380. NGC ID# 24KK, PCGS# 572246 Base PCGS# 6355

1877-CC Half Dollar, MS64  
WB-103, Closed Bud, Medium CC  
Old Green Label Holder

4435 1877-CC Closed Bud, Medium CC, WB-103, MS64 PCGS. This Carson City issue boasts a mintage in excess of 1.4 million coins, but Choice examples are scarce and finer pieces are borderline rare. This near-Gem displays a sharp strike and mostly brilliant, frosty surfaces. Heavy clash marks appear on each side. Date and mintmark placement, as well as rust lumps below HALF DOLLAR, identify the variety. Housed in an old green-label holder. Population: 62 in 64 (5 in 64+), 30 finer (4/18). NGC ID# 24KL, PCGS# 572250 Base PCGS# 6356

1877-CC Half Dollar, Brilliant MS64  
Closed Bud, Medium CC, WB-103

4436 1877-CC Closed Bud, Medium CC, WB-103, Die Pair 15, R.2, MS64 PCGS. This is one of the more plentiful varieties for the 1877-CC half dollar, attributed by diagonal lines in the drapery below the elbow and bold cracks through the top of ERICA. Frosted surfaces are overwhelmingly bright and brilliant, giving this well-struck near-Gem Mint-fresh appeal. Minimal chatter is present. Housed in a green label holder.

*From The Bob Williams Collection.* NGC ID# 24KL, PCGS# 572250 Base PCGS# 6356

4437 1877-S Open Bud, Micro S, WB-101, Die Pair 5, R.3, MS64 PCGS. CAC. A splendid near-Gem Seated type coin. The rich and original tobacco-brown toning is more extensive on the reverse. The coruscating surfaces are well-struck and exhibit only trivial indications of contact. CAC: 29 in 64, 17 finer (5/18). PCGS# 572252 Base PCGS# 6357

1878 Half Dollar, Toned MS65  
Rarely Seen This Fine

4438 1878 WB-101 MS65 PCGS. Type Two Reverse, closed bud. The 1878 is a better date in Uncirculated condition and is rarely seen at the Gem level. This piece exhibits frosty luster and original amber-orange, gold, and sea-green toning. The strike is sharp, and there are no significant abrasions. Population: 10 in 65, 5 finer (4/18). NGC ID# 24KN, PCGS# 572256 Base PCGS# 6358

**1878 Seated Half, MS65  
Lightly Toned, Scarce This Fine**

- 4439 1878 WB-101 MS65 PCGS. CAC.** Peripheral autumn-gold shades add an extra amount of eye appeal to this lustrous and impressively unabraded Gem. Sharply struck aside from customary weakness at the eagle's left (facing) ankle and talons, the surfaces are frosty and show minuscule marks. The 1878 is a better date than its immediate predecessors, since production fell with the advent of the Morgan dollar. Population: 10 in 65, 5 finer. CAC: 4 in 65, 3 finer (4/18).  
Ex: Houston Signature (Heritage, 12/2008), lot 742. NGC ID# 24KN, PCGS# 572256 Base PCGS# 6358

**1881 Seated Half Dollar, MS65  
Rare Prooflike Specimen**

- 4440 1881 MS65 Prooflike NGC. WB-102.** The 1881 Seated Liberty half dollar claims a small business-strike mintage of 10,000 pieces, but the issue has a fairly high survival rate. Examples with prooflike surfaces are seldom encountered. This spectacular Gem exhibits sharply detailed design elements and well-preserved brilliant surfaces that show much prooflike reflectivity in the fields. Census: 2 in 65 Prooflike, 3 finer (4/18). NGC ID# 24KU, PCGS# 86363

**1883 Half Dollar, Fully Struck MS65**

- 4441 1883 WB-101 MS65 PCGS Secure.** Production of circulation-strike half dollars was merely to satisfy collectors and to prevent speculation in proofs. In all, 8,000 business strikes were minted plus 1,039 specimens. This frosty near-Gem features an absolutely complete impression and clean silver surfaces. A blush of color appears at the lower obverse below the date. Population: 14 in 65 (1 in 65+), 17 finer (4/18). NGC ID# 24KW, PCGS# 572267 Base PCGS# 6365

- 4442 1884 MS63 PCGS. CAC.** Tobacco-brown and sea-green toning fills the borders of this semiprooflike and nicely struck representative. The obverse field shows unimportant marks, and the reverse is well-preserved. Housed in a green label holder. From a mintage of only 4,400 pieces. NGC ID# 24KX, PCGS# 6366 Base PCGS# 6366

**1888 Half Dollar, Brilliant MS65  
Late-Series, Low-Mintage Issue**

- 4443 1888 WB-101 MS65 PCGS Secure.** Liberty's head shows brief weakness on the topmost hair strands and stars 7 and 8 are rounded, but everything else is razor-sharp on this brilliant, frosted half. Just 12,000 circulation strikes were issued in 1888. This untoned example is well-preserved and only trivial contact is present, although a tornado-shaped strike-through (as produced) obscures part of the first T in STATES. Mint luster flashes from every perspective. Population: 22 in 65 (1 in 65+), 31 finer (4/18). NGC ID# 24L3, PCGS# 572273 Base PCGS# 6370

**1888 Seated Liberty Half Dollar, MS65  
Elusive, Low-Mintage Issue**

- 4444 1888 WB-101 MS65 NGC.** Only 12,001 business strike Seated Liberty half dollars were struck in 1888, a typical production total for the low-mintage decade of the 1880s. Few survivors are as well-preserved as the present coin. As with most of the halves from this decade the fields are glittering and somewhat prooflike. In the past less-than-expert collectors and dealers have experienced difficulty telling the difference between business strikes and proofs because of the highly reflective nature of the fields on the low-production business strikes. This coin retains some of the original brilliance in the centers with scattered purple, russet, and cobalt-blue toning around the margins. Just a bit softly struck on Liberty's head and the upper stars on the obverse. Census: 14 in 65, 28 finer (4/18). NGC ID# 24L3, PCGS# 572273 Base PCGS# 6370

**PROOF SEATED HALF DOLLARS**

- 4445 1862 PR63 PCGS Secure.** The strike is razor sharp on this Civil War era proof, when just 550 proofs were struck. A thin band of cobalt-blue and reddish-brown toning exists at the borders on both sides. The mirrored fields and frosted devices are pale champagne gold, with slight contrast. Faintly hairlined fields are factored into the assigned grade. Population: 60 in 63, 74 finer (4/18). NGC ID# 27TN, PCGS# 6416

**4446** 1866 Motto PR63 Cameo PCGS. CAC. This razor-sharp specimen is untoned aside from a glimpse of golden-brown and pale-gold near the rims. The devices exhibit noticeable frost, and the fields are glassy with a few delicate lines. A meager 725 proofs were struck. Population: 11 in 63 Cameo, 23 finer. CAC: 2 in 63, 6 finer (4/18). NGC ID# 27TZ, PCGS# 86424

**1874 Arrows Half Dollar, PR64  
Old Green Label Holder**

**4447** 1874 Arrows PR64 PCGS. Light russet-gold toning covers most of this Choice 1874 Seated half dollar, although sea-green highlights appear around the peripheries. Modest contrast is apparent on each side through the patina. The only visible strike weakness is visible on Liberty's temple and the eagle's left (facing) talons. Housed in an old green label holder.

From The Tuxedo Park Collection. NGC ID# 27UV, PCGS# 6435

**1879 Seated Half Dollar, PR65  
Attractive Multihued Toning**

**4448** 1879 PR65 PCGS. CAC. Iridescent shades create a medley of hues that reside beneath primary shades of blue, violet, and reddish-gold on the obverse, while blaze-orange, violet, and bright-blue colors occupy the reverse of this attractive Gem proof. The strike is sharp throughout both sides. A healthy mintage of 1,100 proofs was well-saved by collectors and speculators during the first year of extremely low circulation-strike mintages of Seated halves that continued for 10 years. Housed in an old green label holder with CAC endorsement. Population: 30 in 65 (2 in 65+), 21 finer. CAC: 9 in 65, 10 finer (4/18). NGC ID# 27UE, PCGS# 6440

**1879 Half Dollar, PR66  
Vibrant Rainbow Colors**

**4449** 1879 PR66 PCGS Secure. Reddish-brown mirrored fields and frosted devices are framed by spectacular blue-green, olive-gold, and violet-red borders. The strike is pinpoint sharp on the obverse stars but a touch weak on Liberty's high-point curls and at the eagle's left (facing) talons. All 1879 proofs have the Type One reverse with an open bud above the H in HALF, utilizing a carried-over die from 1876. Circulation strikes use the Type Two Closed Bud reverse. We have seen an occasional 1879 with the Closed Bud reverse called a proof, but these may be, in fact, prooflike business strikes. Population: 18 in 66, 3 finer; 11 in 66 (2 in 66+) Cameo, 2 finer; 0 in 66 Deep Cameo, 2 finer (4/18). NGC ID# 27UE, PCGS# 6440

**1879 Half Dollar, Toned PR66  
Rare High-End CAC Coin**

**4450** 1879 PR66 PCGS Secure. CAC. Both sides of this high-end proof display blended aquamarine, blue, lilac, and golden toning over mirrored fields and frosty devices. The strike is sharp, and subtle cameo contrast is apparent on the obverse despite the patina. The 1879 proof half dollar is usually available, but Premium Gems with a CAC green label are scarce. High-end examples are popular due to the low mintage of the circulation strike of this year (4,800 pieces). The Philadelphia Mint struck 1,100 proofs. NGC ID# 27UE, PCGS# 6440

**1881 Seated Liberty Half, PR66 Cameo  
Sharply Detailed, Frosty Devices**

- 4451 1881 PR66 Cameo NGC. WB-101.** 1881 half dollars in proof format are readily available (Randy Wile and Bill Bugert, 1993). Better-grade Cameos, however, remain elusive. Such is the case with the current Premium Gem. Both sides reveal strong field-motif contrast. Hints of gold color gravitate to the rims, slightly more so on the reverse. The design elements are sharply detailed, and both faces are well-preserved. Census: 18 in 66 Cameo (1 in 66★), 3 finer (4/18).  
Ex: Long Beach Signature (Heritage, 9/2008), lot 2275, where it realized \$4,233.44. NGC ID# 27UG, PCGS# 86442

**1882 Seated Liberty Half, Untoned PR65 Cameo  
WB-102, Misplaced Date Variant**

- 4452 1882 Misplaced Date, WB-102 PR65 Cameo PCGS Secure.** The Misplaced Date feature clearly shows two errant 8s in the denticles. This stunning, contrasted proof is razor-sharp with brilliant, silver-white surfaces. The frosted devices provide dramatic white-on-black contrast. While the number of obverse dies used to strike a total of 1,100 proofs is unconfirmed, we have confirmed that not all 1882 proofs are the Misplaced Date variety (WB-102). Which variety is more plentiful is yet to be determined. Population (all varieties combined): 23 in 65 (2 in 65+) Cameo, 12 finer; 4 in 65 Deep Cameo, 9 finer (4/18). PCGS# 525784 Base PCGS# 86443

- 4453 1883 PR64+ Cameo PCGS Secure.** Razor-sharp definition is evident on all elements of this Plus-graded Choice proof, and the deeply mirrored fields contrast boldly with the frosty devices. A few hints of cerulean-blue and sea-green toning enhance the well-preserved surfaces. Population: 46 in 64 (1 in 64+) Cameo, 28 finer (5/18). NGC ID# 27UJ, PCGS# 86444

**1884 Seated Half, PR66  
Sharply Detailed and Nicely Toned**

- 4454 1884 PR66 NGC. WB-101.** From an average-sized mintage of 875 pieces, the 1884 proof Seated Liberty half dollar is not especially difficult to locate in lower grades, but Premium Gem examples are rare. This well-preserved specimen exhibits sharply detailed design elements and deeply reflective fields, under vivid shades of cerulean-blue and pale gold toning. Census: 15 in 66 (2 in 66★), 5 finer (4/18). NGC ID# 27UK, PCGS# 6445

- 4455 1886 PR63 Cameo PCGS.** Snow-white frosted motifs set against deeply reflective silver mirrors display strong white-on-black contrast. Fully struck devices add to the excellent eye appeal. Pale-blue toning rides the inside obverse rim, while golden borders frame the razor-sharp reverse. A few light abrasions and delicate lines in the right-hand obverse field account for the Select Cameo proof grade. Population: 18 in 63 Cameo, 47 finer (4/18). NGC ID# 27UM, PCGS# 86447

**1888 Seated Half, PR66  
Fully Detailed and Attractively Toned**

- 4456 1888 PR66 NGC.** Light, even patina covers both sides of this lovely Premium Gem proof 1888 Seated half, which further exhibits a needle-sharp strike and excellent preservation throughout. The PR66 grade level is the highest in which examples can be located with any regularity. Only 832 proofs accompanied the circulation-strike mintage of 12,001 pieces. Census: 12 in 66, 6 finer (4/18). NGC ID# 27UP, PCGS# 6449

### 1889 Seated Liberty Half, PR65

Only 711 Examples Struck

- 4457 1889 PR65 NGC. CAC. WB-101.** Only 12,000 business strike Seated Liberty half dollars were struck in 1889, accompanied by a small proof mintage of 711 pieces produced to satisfy collector demand. This attractive Gem proof exhibits sharply detailed design elements and well-preserved reflective fields, with highlights of sea-green and turquoise toning. Census: 29 in 65, 23 finer. CAC: 4 in 65, 8 finer (4/18). NGC ID# 27UR, PCGS# 6450

### 1891 Seated Half Dollar, PR66 Final-Date, Seldom Seen Finer

- 4458 1891 PR66 NGC. WB-101.** The design was changed to the Barber motif in 1892, making the 1891 Seated Liberty half the final issue of the series. This delightful Premium Gem proof exhibits mostly brilliant centers surrounded by vivid shades of cerulean-blue, golden-brown, and magenta toning. The design elements are sharply detailed and the virtually flawless fields are deeply mirrored. From a proof mintage of 600 pieces. Census: 29 in 66 (2 in 66+), 5 finer (4/18). NGC ID# 27UT, PCGS# 6452

### 1891 Seated Half, PR65 Cameo All-Brilliant Contrasted Proof

- 4459 1891 PR65 Cameo PCGS Secure.** Always in demand as the final-year issue of the long-running Seated half design, just 600 proofs were struck. This is a scarce Cameo Gem example, with brilliant-silver surfaces and strong, white-on-black contrast between the untoned, glassy-mirrored fields and frost-white devices. A few wispy, delicate lines are visible under magnification, but the strike is sharp and the eye appeal is excellent. Population: 10 in 65 Cameo, 5 finer; 1 in 65 Deep Cameo, 0 finer (4/18). NGC ID# 27UT, PCGS# 86452

## BARBER HALF DOLLARS

### 1892 Barber Half Dollar, MS65

Frosted, Multicolored Example

- 4460 1892 MS65 PCGS. CAC.** Thick mint frost covers both sides of this well-produced half, with an underlying, multicolored display of pastel shades in the fields that emerge as a lustrous counterpoint to the frosted motifs. This is an interesting and sharply detailed Barber, undisturbed and unique in its originality and appeal. A distinctive Gem for the specialist who prefers remarkably toned coins.  
Ex: Long Beach Signature (Heritage, 6/2014), lot 3974, where it brought \$2,585. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

- 4461 1895-S MS64 PCGS.** The Barber half dollar was a workhorse of the economy from the 1890s to well-beyond the end of the series in 1916. Barber's artistically uninspiring design failed to generate contemporary enthusiasm among numismatists, and high-grade Uncirculated survivors of any date for the most part exist merely by chance. This near-Gem 1895-S displays a full strike and semiprooflike fields. Small daubs of sea-green and amber toning appear in the margins, leaving the interiors brilliant. Population: 37 in 64, 17 finer (4/18). NGC ID# 24LU, PCGS# 6473

- 4462 1896-S MS64 PCGS.** Like the 1896-S Barber quarter, this half dollar issue is a better date in the series, though not to the same extent. Examples are scarce but obtainable in near-Gem condition. Soft mint luster radiates beneath shades of deep steel-gray patina. Nearly fully struck except for the tip of the right shield corner. A small planchet flake is seen in front of the forecurl. Population: 26 in 64 (2 in 64+), 21 finer (5/18). NGC ID# 24LX, PCGS# 6476

- 4463 1897 MS64 PCGS Secure.** Original olive-gold and gray toning blankets each side of this near-Gem 1897 Barber half, complementing satiny luster and a sharp strike. There are no bothersome abrasions. The 1897 is scarce in high grade, particularly above the MS64 level. NGC ID# 24LY, PCGS# 6477

- 4464 1898-O AU58 PCGS.** The 1898-O is a better date in the Barber half dollar series, scarce in Mint State and seldom seen in AU. This near-Mint coin displays satiny fields and deep olive-gray and russet toning over each side. Slight high-point friction is evident beneath a loupe. Typical of New Orleans issues from the 1890s, this piece is weakly struck, most notably on the eagle's right (facing) talons and wing junction, as well as the right obverse stars. Population: 13 in 58 (1 in 58+), 62 finer (4/18). NGC ID# 24M4, PCGS# 6481

**1902-O Half Dollar, MS64  
Better Date in High Grade**

**4465 1902-O MS64 PCGS Secure.** This New Orleans issue is elusive in many Mint State grades, and pieces grading finer than the present are rare. This Choice coin displays satiny luster and a hint of light golden border toning. Minor marks on Liberty's cheek limit the grade, and considerable strike weakness occurs on the reverse eagle. Population: 26 in 64 (1 in 64+), 8 finer (5/18). NGC ID# 24MG, PCGS# 6493

**4466 1902-S MS62 PCGS Secure.** The 1902-S Barber half dollar is an elusive issue in Mint State. This attractive MS62 example is well-detailed, with just a touch of the usual softness on the eagle's claw and shield point. The pleasing surfaces are lightly marked, with satiny mint luster throughout. Population: 11 in 62, 37 finer (5/18). NGC ID# 24MH, PCGS# 6494

**4467 1903 MS64 PCGS. CAC.** The motifs are well-defined with softness limited to the last few obverse stars and right shield-wing juncture. Antique golden-gray and steel-blue patina covers much of this Choice Uncirculated Barber half dollar. Population: 35 in 64 (1 in 64+), 14 finer. CAC: 8 in 64, 7 finer (5/18). NGC ID# 24MJ, PCGS# 6495

**4468 1903-O MS64 PCGS Secure.** The 1903-O Barber half dollar is occasionally available in Choice condition but is rare finer. This piece displays satiny original luster with russet, gold, and sea-green toning. Only a few minor abrasions are visible, and the only strike weakness is seen on the upper-right shield corner. Population: 48 in 64 (3 in 64+), 17 finer (4/18). NGC ID# 24MK, PCGS# 6496

**4469 1903-O MS64 PCGS Secure.** Violet-gray patina includes accents of blue, green, and gold. Perhaps the most impressive feature is the full strike seen on the forecurls, stars, shield corner, and fletchings. Small ticks are effectively concealed beneath the rich toning. Population: 48 in 64 (3 in 64+), 17 finer (4/18). NGC ID# 24MK, PCGS# 6496

**4470 1909 MS65 PCGS.** Delicate gold and iridescent toning visits the satiny and highly lustrous surfaces of this Gem Barber half dollar. The 1909 is a plentiful date from a mintage of more than 2 million coins. Population: 64 in 65 (1 in 65+), 16 finer (5/18). NGC ID# 24N8, PCGS# 6516

**4471 1910-S MS65 PCGS.** Surviving Mint State 1910-S half dollars are dispersed throughout many grades, but those in Gem or better condition are scarcely seen. The present coin displays frosty mint luster beneath gold, olive-green, and lavender-gray toning. The eagle's right (facing) talons and the fletchings show the only mentionable strike weakness. There are no significant abrasions. Population: 11 in 65, 19 finer (5/18). NGC ID# 24NC, PCGS# 6520

**4472 1912 MS64 PCGS. CAC.** The well-detailed design elements of this attractive Choice example show just the slightest softness on the usual trouble spots, the eagle's claw and shield point. The lightly marked surfaces radiate vibrant, satiny mint luster. PCGS has graded 24 numerically finer examples (5/18). NGC ID# 24NG, PCGS# 6524

**4473 1913 MS63 PCGS Secure.** This is one of the three scarce P-Mint issues produced at the end of the Barber half dollar series, and survives from a mintage of 188,000 coins. A lovely Select Mint State example, this half dollar is fully brilliant with untoned silver surfaces and satin luster. Population: 21 in 63, 55 finer (5/18). NGC ID# 24NK, PCGS# 6527

**1913-D Half Dollar, MS65  
Clean Cheek, Conditionally Rare**

**4474 1913-D MS65 PCGS Secure. CAC.** Among Barber half dollars, the 1913-D has a relatively low mintage: 534,000 pieces. This Gem CAC coin is conditionally rare, and finer pieces are out of reach for many collectors. Liberty's cheek is exceptionally clean on this piece, and the champagne-tinted luster is attractively luminous. Several stars are weakly struck, as are the eagle's right (facing) wing junction and talons. Population: 18 in 65 (1 in 65+), 5 finer. CAC: 5 in 65, 4 finer (5/18). NGC ID# 24NL, PCGS# 6528

**4475 1913-S MS63 PCGS.** The 1913-S Barber half dollar is a better date in Uncirculated grades. This Select example displays stone-gray luster and better preservation than is typical of the MS63 level. Minor strike softness occurs on the eagle's right (facing) wing junction and talons. Population: 28 in 63, 52 finer (5/18). NGC ID# 24NM, PCGS# 6529

**4476 1914 MS64 PCGS Secure.** The 1914 Barber half dollar claims a small mintage of 124,300 pieces, making the issue elusive in high grade. This attractive Choice example displays sharp design elements and lightly marked, brilliant surfaces, with vibrant mint luster throughout. Population: 58 in 64 (4 in 64+), 14 finer (5/18). NGC ID# 24NN, PCGS# 6530

**PROOF BARBER HALF DOLLARS**

**4477 1897 PR64 PCGS.** Well-defined and strikingly toned. Chalk-white and champagne-gold shadings appear on each side, and the obverse sports salmon accents as well. Strongly mirrored beneath the patina. NGC ID# 24NZ, PCGS# 6544

**4478 1898 PR63 Cameo PCGS.** Both sides of this Select piece display pleasing contrast, though the effect is stronger on the reverse. The deeply reflective fields display only light hairlines, and a few tiny dabs of hazy patina appear over the obverse. One of just 735 proofs coined.  
Ex: Central States Signature (Heritage, 4/2007), lot 869, where it brought \$1,897.50. NGC ID# 24P2, PCGS# 86545

**4479 1900 PR64 Cameo PCGS Secure.** This wonderful Choice proof exhibits a bold strike, frosted motifs, and rich light golden toning. An outstanding turn-of-the-century Cameo proof for the type or date collector. NGC ID# 24P4, PCGS# 86547

---

**1903 Half Dollar, Colorful PR65 Cameo  
Scarce Contrasted Proof**

**4480 1903 PR65 Cameo PCGS Secure.** Few 1903 proofs show cameo contrast, with only about 5% of the PCGS-graded proofs earning Cameo designation. This Gem example displays frosted central motifs set against variably toned, mirrored fields. Intermittent shades of blue, violet, yellow-gold, and amber-orange toning allows much silver luster to shine forth amid the attractive patina. The strike is suitably sharp, with just a hint of weakness along the right shield edge and talon. Population: 2 in 65 Cameo, 9 finer; none in Deep Cameo (4/18). NGC ID# 24P7, PCGS# 86550

**4481 1911 PR64 Cameo PCGS.** An impressive example of this low-mintage issue, this near-Gem Cameo proof is fully brilliant and untoned with excellent contrast between the deeply mirrored fields and lustrous devices. Population: 22 in 64 Cameo, 45 finer (5/18). NGC ID# 6UPG, PCGS# 86558

**4482 1913 PR65 PCGS Secure.** Deep sea-green, lavender, and orange-gold toning surrounds the borders, leaving the interiors of this Gem proof brilliant. The strike is sharp and modest contrast is apparent on each side. No distracting marks appear under a loupe. NGC ID# 24PH, PCGS# 6560

## WALKING LIBERTY HALF DOLLARS

**4483 1916 MS65 PCGS. CAC.** Luster glistens from the Gem surfaces of this CAC-approved first-year Walker, carrying hints of gold and lilac toning with only a few tiny marks. The strike is also sharp, adding to the appeal. The 1916 is available in this grade overall, but few such pieces claim eye appeal that is comparable to that of this coin. CAC: 43 in 65, 37 finer (5/18). NGC ID# 24PL, PCGS# 6566

**1916 Walking Liberty Half, MS66  
Glistening Mint Luster**

**4484 1916 MS66 NGC.** This high-end first-year Walker is brilliant and sharply struck, displaying frosty cartwheel luster. A few trivial contact marks within Liberty's gown folds are too small to detract from the appeal of this beautiful Premium Gem. Finer examples are rarely offered. Census: 62 in 66 (2 in 66+, 1 in 66 ★), 12 finer (4/18).

Ex: FUN Signature (Heritage, 1/2003), lot 7302, which realized \$2,415. NGC ID# 24PL, PCGS# 6566

**4485 1917-D Obverse MS64+ PCGS. CAC.** A Plus-graded Choice example of this popular early series issue with the prominent obverse mintmark, this coin offers well-detailed design elements and well-preserved lustrous surfaces, with subtle highlights of pale gold and pink toning. NGC ID# 24PR, PCGS# 6570

---

**1917-D Walking Liberty Half, MS64+  
Popular Obverse Mintmark Variant**

**4486 1917-D Obverse MS64+ PCGS Secure. CAC.** The 1917-D Walking Liberty half dollar, with the prominent obverse mintmark, claims a small mintage of 765,400 pieces. This Plus-graded Choice specimen exhibits well-detailed design elements and well-preserved lustrous surfaces, with a few subtle hints of greenish-gold toning. PCGS has graded 82 numerically finer examples (4/18). NGC ID# 24PR, PCGS# 6570

**4487 1917-S Obverse — Cleaned — PCGS Secure Genuine. Unc.** **Details.** The 1917-S is conditionally rarest among the four issues with an obverse mintmark. This example has light almond-gold toning and a good strike. Cartwheel luster is prevalent across unblemished mattelike surfaces. Careful examination reveals trivial vertical hairlines.

*From The Bob Williams Collection.*

---

**1917-S Half Dollar, MS64  
Reverse Mintmark**

**4488 1917-S Reverse MS64 PCGS Secure.** This untoned near-Gem is devoid of bothersome abrasions and might have been considered for a finer grade were it better struck. Considerable weakness on Liberty's upper leg and the central eagle is typical of many Reverse Mintmark coins. The excellent preservation of this piece produces strong eye appeal. NGC ID# 24PU, PCGS# 6573

---

**1918-D Walking Liberty Half Dollar, MS63  
Delicate Border Toning**

**4489 1918-D MS63 PCGS Secure.** The 1918-D is a slightly better date in Uncirculated grades, but it does not become rare and out of reach until MS65. This Select example displays satiny luster that is brilliant over the interiors and toned golden around the borders. The usual strike weakness occurs on Liberty's branch hand and the eagle's trailing leg, and scattered light abrasions account for the grade. NGC ID# 24PW, PCGS# 6575

**1918-D Walking Liberty Half, MS63  
Original Pearlescent-Gray Luster**

**4490** 1918-D MS63 PCGS Secure. CAC. The 1918-D is somewhat challenging in Mint State, where original, Select Uncirculated coins are anything but common. This CAC-endorsed example exudes originality, with soft, satiny mint luster glowing beneath a natural cloak of deep, lilac-gray patina with scattered, charcoal-gray flecks plus an overall pearlescent hue. The strike is good for a 1918-D, with most feathers visible on the eagle's trailing leg and thumb/finger definition on the branch hand. NGC ID# 24PW, PCGS# 6575

**4491** 1918-S MS63 PCGS Secure. The strike is seldom sharp on the 1918-S. Any example with decent head definition and thumb separation draws the attention of collectors, especially when combined with brilliant and frosted surfaces showing strong mint luster. This Select Uncirculated example has all of those attributes. A few light marks run through the central elements, visible with a lens.

*From The Bob Williams Collection.* NGC ID# 24PX, PCGS# 6576

**4492** 1918-S MS64 PCGS Secure. A blush of champagne color graces the satiny surfaces of this Choice 1918-S half dollar, and abrasions are minimal for the grade. Moderate strike weakness is seen on Liberty's branch hand and the eagle's trailing leg. Finer 1918-S Walkers are elusive. NGC ID# 24PX, PCGS# 6576

**1919-D Half Dollar, AU58  
Denver Mint Condition Rarity**

**4493** 1919-D AU58 PCGS Secure. From a production of 1.1 million coins, this is one of the lower-mintage, conditionally rare issues in the series. A near-Mint example like this would delight most any collector. Satiny mint luster shimmers across bright silver surfaces. Marks and high-point rub are absolutely minimal. Strike, as always, presents an issue, particularly on Liberty's head, branch hand, and the upper part of the date.

*From The Bob Williams Collection.* NGC ID# 24PZ, PCGS# 6578

**4494** 1920-D — Questionable Color — PCGS Secure Genuine. Unc. Details. A lustrous, lightly abraded, and nicely struck early branch mint Walker. Faint tan toning visits both sides, and a blush of lilac patina accompanies AMERICA. The reverse high points are slightly glossy, but the eye appeal is attractive.

*From The Bob Williams Collection.*

**4495** 1920-S MS62 PCGS. Lightly toned in pearlescent-ivory hues, this lightly toned 1920-S shows only insignificant, microscopic marks where the strike is a bit weak — through the central portrait and on the eagle's trailing leg. It is otherwise bold and attractive, with excellent surfaces and lustrous, satiny eye appeal. NGC ID# 24R5, PCGS# 6582

**4496** 1921 — Altered Surfaces — PCGS Genuine. AU Details. During 1921, the U.S. Mint was compelled by the Pittman Act to coin silver dollars, and the Philadelphia and Denver halves became the two lowest-mintage issues of the Walking Liberty series. This briefly circulated example displays luster throughout the wings and legends. The silver-gray surfaces are mattelike but without any noticeable marks.

**4497** 1921-D — Cleaned — PCGS Genuine. AU Details. The 1921-D is the lowest-mintage Walking half dollar issue. Most survivors are well-worn, but this brilliant example displays partial luster and only a hint of wear on the eagle's breast. Free from noticeable marks, although the surfaces are slightly subdued.

**1921-S Walking Liberty Half, XF40  
Smooth, Unmarked Surfaces**

**4498** 1921-S XF40 PCGS. In one of the quirks of the Walking Liberty series, the 1921-S is less highly valued in conditions up to VF than its Philadelphia or Denver counterparts, but that changes dramatically starting at the XF level. Few examples exist in XF or finer condition to satisfy the plethora of Walker enthusiasts. This example displays soft, pearl-gray surfaces and virtually mark-free surfaces. The rims are perfect.

*Ex: Beverly Hills Signature (Heritage, 11/2014), lot 4352, which realized \$2,585. NGC ID# 24R8, PCGS# 6585*

**1921-S Half Dollar, AU Details  
Partly Lustrous, Series Key**

**4499** 1921-S — Toolled — PCGS Secure Genuine. AU Details. In XF or better grades, the 1921-S is the key to the Walking Liberty series. This partly lustrous representative is brilliant aside from occasional traces of golden toning. The coin is attractive to the unaided eye. When viewed beneath a loupe, the eagle exhibits a number of pinscratches, and both sides display minor hairlines.

*From The Bob Williams Collection.*

**4500** 1923-S — Cleaned — PCGS Secure Genuine. Unc Details. Bright mint luster sweeps this unmarked rare-date Walking Liberty half. Light golden-brown and lime-green toning graces the borders. The branch hand is indistinct, as usual. No hairlines are readily apparent, and the eye appeal is substantially greater than suggested by the PCGS disclaimer.

*From The Bob Williams Collection.*

**1927-S Half Dollar, MS64**  
Elusive in Finer Condition

- 4501 **1927-S MS64 PCGS Secure.** An essentially brilliant near-Gem with satiny luster and minimal abrasions. Liberty's branch hand and the eagle's trailing leg show moderate strike softness as usual. The 1927-S Walking Liberty half dollar is usually available in MS64 for a price, but higher-grade pieces are scarce. NGC ID# 24RA, PCGS# 6587

**1927-S Walking Liberty Half Dollar, MS64**  
Colorfully Toned

- 4502 **1927-S MS64 PCGS. CAC.** The 1927-S Walking Liberty half dollar is a noted strike rarity in the series and this CAC-endorsed Choice specimen shows some of the typical softness on the central design elements, but the peripheral devices are much sharper. Shades of golden-tan, lavender-gray, and russet toning visit the well-preserved satiny surfaces. NGC ID# 24RA, PCGS# 6587

- 4503 **1933-S MS64 PCGS.** This Choice 1933-S half dollar is fully struck throughout Liberty's branch hand and head, and the eagle's trailing leg and wing. A few minor abrasions are hidden beneath mottled russet toning. NGC ID# 24RE, PCGS# 6591

- 4504 **1934 MS67+ NGC. CAC.** Extravagant lemon-gold, ruby-red, and forest-green toning endows this pristine, lustrous, and well-struck Superb Gem. The 1934 was the first Philadelphia issue in 13 years, and it has a mintage of nearly 7 million pieces. Yet it is a formidable rarity at the MS67+ level, with only seven pieces recognized as such by NGC, and just 13 pieces finer (4/18). NGC ID# 24RF, PCGS# 6592

- 4505 **1934-S MS65 PCGS.** This impressive Gem exhibits sharply detailed design elements throughout, and the well-preserved surfaces radiate vibrant mint luster, with vivid highlights of amber and violet-gray toning. NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS66**  
Few Pieces Known Finer

- 4506 **1934-S MS66 PCGS Secure.** The 1934-S Walking Liberty half dollar claims a mintage of 3.6 million pieces, making the issue scarce in MS66 condition, and rare in any finer grade. This delightful Premium Gem exhibits a better-than-average strike, with plain separation between Liberty's thumb and fingers on the wreath hand. The well-preserved surfaces are visited by dappled shades of lavender-gray and amber toning. PCGS has graded eight numerically finer examples (4/18). NGC ID# 24RH, PCGS# 6594

- 4507 **1935-D MS65 PCGS.** Gem surfaces show frosty luster and warm golden toning on this 1935-D Walker. Liberty's branch hand has partial thumb separation, but the head is weak, and the eagle's trailing leg is not fully defined. Higher-grade examples of this Denver issue are elusive. Housed in a first generation holder.  
*From The Tuxedo Park Collection.* NGC ID# 24RK, PCGS# 6596

- 4508 **1935-D MS65 PCGS.** A whisper of pale-gold patina gathers at the upper-obverse rim of this otherwise brilliant and lustrous 1935-D Walker. The strike shows the usual lack of definition on the head and hand, but it is otherwise crisp and the fields are smooth, flashy, and attractive. NGC ID# 24RK, PCGS# 6596

- 4509 **1935-S MS65 PCGS Secure.** Golden toning appears over frosty luster on this Gem 1935-S half dollar. The "skin" is particularly fresh, likely contributing to the grade. Under a loupe, a horizontal line that bisects the obverse from 9 to 3 o'clock is the only mentionable imperfection. Liberty's branch hand and the eagle's trailing leg exhibits strike weakness. NGC ID# 24RL, PCGS# 6597

- 4510 **1935-S MS65 PCGS. CAC.** Mottled olive and gold toning appears on each side of this Gem 1935-S quarter dollar, with deeper color around the borders. The strike is sharp, and a loupe reveals only a few small marks. Few coins are CAC approved this fine. CAC: 44 in 65, 46 finer (4/18). NGC ID# 24RL, PCGS# 6597

- 4511 **1936 MS67+ NGC.** From a large mintage of 12.6 million pieces, the 1936 Walking Liberty half dollar is only scarce in MS67 condition, but finer coins are condition rarities. This sharply detailed MS67+ example is impeccably preserved and lustrous, with delicate hints of pale gold and lavender toning. NGC has graded 13 numerically finer examples (5/18). NGC ID# BYGX, PCGS# 6598 Base PCGS# 6598

- 4512 **1938-D MS66 PCGS.** A frosty Premium Gem representing the low-mintage 1938-D issue (491,600 pieces struck), this Walking Liberty half dollar is fully lustrous and attractive with delicate champagne toning. PCGS has only certified 47 finer examples (5/18). NGC ID# 24RV, PCGS# 6605

- 4513 **1938-D MS66 PCGS Secure. CAC.** The key issue among the later date Walking Liberty half dollars, this Premium Gem is brilliant and lustrous with an above-average strike. A hint of gold toning appears at the obverse border. PCGS has only certified 47 finer examples (5/18). NGC ID# 24RV, PCGS# 6605

**1938-D Walker, Brilliant MS67  
High-End and Scarce**

**4514 1938-D MS67 PCGS.** This satiny Superb Gem displays original luster with no perceptible toning, and under a loupe the fields are found to be devoid of abrasions. Liberty's branch hand and the eagle's trailing leg are a trifle soft as usual, but the overall strike is pleasing for this Denver issue. None are numerically finer at either service (4/18). Housed in a green label holder. NGC ID# 24RV, PCGS# 6605

**1938-D Half Dollar, Frosty MS67  
Among the Finest Certified**

**4515 1938-D MS67 PCGS.** The 1938-D carries a price premium in all grades due to its small mintage of 491,600 coins, but it only becomes truly scarce in MS67. It is also unknown finer. This Superb Gem displays brilliant, frosty mint luster and unabraded surfaces that shimmer when rotated beneath a light. Liberty's head and branch hand exhibit sharp definition. Population: 47 in 67 (3 in 67+), 0 finer (4/18). NGC ID# 24RV, PCGS# 6605

**4516 1939-D MS67 PCGS.** Frost-white, original mint luster glistens beneath a light, and this Superb Gem 1939-D Walker is devoid of distracting abrasions. Minor strike softness on Liberty's branch hand and the eagle's trailing leg is normal for the issue. The 1939-D is moderately scarce in MS67, and PCGS and NGC each list only two numerically finer coins (5/18). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

**4517 1939-S MS67 PCGS. CAC.** The branch hand shows blending, but this pristine Superb Gem displays a sharp strike on other design elements. The lustrous surfaces are brilliant save for a wisp of honey patina and a glimpse of russet on the obverse rim near 3 o'clock. An outstanding candidate for the silver type collector. NGC ID# 24RY, PCGS# 6608

**4518 1940 MS67+ PCGS. CAC.** A small splash of gold toning appears at 12 o'clock on the obverse of this otherwise fully brilliant, lustrous, and untoned Superb Gem. Examples in finer grades are rarely encountered. PCGS has only certified 27 numerically finer examples and CAC has only approved 22 finer pieces (5/18). NGC ID# 24RZ, PCGS# 6609

**4519 1941 MS68 NGC.** The surfaces of this sharp, high-end Superb Gem are virtually flawless, yielding frosty, radiant mint luster and incredible eye appeal. Rich golden toning covers the interiors but cedes to rainbow border rings. The 1941 Walker is rarely offered this fine. Census: 26 in 68 (2 in 68 ★), 0 finer (4/18). NGC ID# 24S3, PCGS# 6611

**4520 1941-S MS66+ PCGS. CAC.** Value is affected greatly by seemingly small nuances of grade at the MS66 level, since the 1941-S is rare in MS67 or finer. This example benefits from incremental awards — the PCGS Plus designation, and CAC endorsement. Sharp and lustrous surfaces display traces of reddish-gold toning at the rims. The strike shows only small areas of high-point weakness — at the top of the grade numerals, and on Liberty's branch hand. There are no significant marks. Population: 76 in 66+, 9 finer. CAC: 152 in 66, 4 finer (5/18). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

**4521 1942-D MS67+ PCGS Secure. CAC.** This lovely Denver Mint half dollar has satin luster and brilliant silver surfaces with traces of peripheral gold toning limited to the rims on each side. PCGS has only assigned the Plus designation to 14 coins in this grade, and have only certified five finer examples (5/18). CAC: 62 in 67, 0 finer (5/18). NGC ID# 24S7, PCGS# 6615

**4522 1943 MS67+ NGC. CAC.** The centers show a glimpse of golden toning, but most observers would regard this lustrous Superb Gem as brilliant. Both sides are remarkably free from contact, and the strike is full on Liberty's head and skirt lines. An outstanding type coin. NGC ID# 24S9, PCGS# 6618

**4523 1943-D MS67+ NGC. CAC.** The 1943-D is regarded as common, but at the MS67+ level it is rare. NGC has certified just six examples as such, with another six finer (4/18). This remarkably unabraded Superb Gem displays dynamic luster and only a whisper of wheat-gold toning. The strike is fairly sharp for a wartime Walker, though the fingers of the branch hand are mostly merged. NGC ID# 24SA, PCGS# 6619

**4524 1944-S MS66+ PCGS. CAC.** Large S. A hint of peripheral tan toning is noted near the mintmark and the R in LIBERTY. Lustrous and uncommonly unabraded. The cheek and branch hand are incomplete, but the overall strike is good for a wartime San Francisco issue, particularly on the skirt lines. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

**4525 1946-D MS67 PCGS. CAC.** The thumb of the branch hand is well-defined, and the skirt lines are fully impressed. A high-grade, pearl-gray representative with hints of golden-brown toning along the right reverse border. Stray grazes in the right obverse field preclude perfection. CAC: 56 in 67, 0 finer (5/18). NGC ID# 24SK, PCGS# 6628

**4526 1946-D MS67 PCGS Secure. CAC.** This Superb Gem Walking Liberty half dollar is among the finest survivors of the date. The design elements are well-detailed and the pristine, lustrous surfaces show a few hints of golden-tan toning. Population: 99 in 67 (5 in 67+), 0 finer. CAC: 56 in 67, 0 finer (5/18). NGC ID# 24SK, PCGS# 6628

**4527 1946-S MS67 PCGS.** Knob S. Wisps of honey-gold toning deny full brilliance, but this lustrous Superb Gem has remarkably smooth fields, and the strike is crisp except for the unavoidable incompleteness on the branch hand. About as nice as can be found for this final San Francisco issue. NGC ID# 24SL, PCGS# 6629

**1947-D Walking Liberty Half, MS67  
Final-Date Issue in High Grade**

**4528 1947-D MS67 PCGS. CAC.** The 1947-D Walking Liberty half dollar represents the final year of the series. This spectacular Superb Gem displays well-detailed design elements, with a touch of the usual softness on the central obverse and the eagle's leg. Dappled shades of sea-green, turquoise, and lavender-gray toning enhance the impeccably preserved, lustrous surfaces. Population: 53 in 67 (3 in 67+), 0 finer. CAC: 24 in 67, 0 finer (4/18). NGC ID# 5ESK, PCGS# 6631

**1947-D Half Dollar, MS67  
Top-Grade Coin at PCGS and CAC**

**4529 1947-D MS67 PCGS. CAC.** The 1947-D half dollar is conditionally scarce in MS67 and unknown finer at PCGS. However, CAC-approved coins are rare in this lofty grade. This piece offers luminous frosted luster and well-struck design elements. A loupe fails to identify any abrasions. The obverse has warm orange-gold and greenish toning, while the reverse displays lighter champagne color. Population: 53 in 67 (3 in 67+), 0 finer. CAC: 24 in 67, 0 finer (4/18). NGC ID# 5ESK, PCGS# 6631

**PROOF WALKING LIBERTY  
HALF DOLLARS**

**1936 Half Dollar, PR65  
Sharp and Well-Preserved**

**4530 1936 PR65 NGC.** This Gem proof 1936 Walker is fully struck and satiny on the devices, with deep mirroring in the fields. A hint of cameo contrast is apparent on the obverse, and a blush of light champagne toning is mainly visible around the outer peripheries. The 1936 is the first proof issue in the Walking Liberty half dollar series and is the most elusive proof in high grade. Only 3,901 pieces were struck, compared to more than 21,000 coins produced in 1942. Ex: New York Signature (Heritage, 7/2004), lot 6725, which realized \$4,601.15. NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR65  
Attractively Toned Proof Type Coin**

**4531 1936 PR65 PCGS.** This glimmering Gem proof is boldly struck and beautifully preserved, showing original champagne toning across the interiors with deeper colors around the outer peripheries. No bothersome marks appear on the eye-appealing surfaces. First-year proof Walkers with original toning are always in demand. Housed in a first generation holder.

*From The Tuxedo Park Collection.* NGC ID# 27V4, PCGS# 6636

**4532 1937 PR67 NGC. CAC.** Glassy-mirrored fields have acquired an original hazy-gold patina that drifts over sharply struck, nearly flawless surfaces of this Superb Gem proof. CAC endorsement reinforces the high numeric grade and outstanding eye appeal. Housed in a prior generation holder with an intact hologram. NGC reports just 30 numerically finer examples (4/18). NGC ID# 5ESS, PCGS# 6637

**4533 1942 PR68 NGC. CAC.** This CAC-approved Superb Gem is struck from fresh dies and almost flawlessly preserved with glimmering fields and frosty motifs. Full definition characterizes the devices, and the interiors display champagne toning. Both sides have vivid border toning in bright rainbow hues, producing remarkable eye appeal that must have just missed a Star designation from NGC. NGC ID# 282G, PCGS# 6642

## FRANKLIN HALF DOLLARS

**4534 1953-S MS67 PCGS Secure.** The 1953-S Franklin half dollar is scarce in any grade with Full Bell Lines, and no such coins are certified at PCGS above MS66. This Superb Gem non-Full Bell Lines example is conditionally scarce. Softly frosted surfaces show original multicolor toning and a pleasing cartwheel effect. A small reed mark immediately above the date in the field is the only noted imperfection. Population: 33 in 67 (2 in 67+), 0 finer (4/18). NGC ID# 24T8, PCGS# 6666

**4535 1958-D MS67 Full Bell Lines PCGS.** The 1958-D is well-known for its outstanding “color coins,” imbued with mint set toning that ranges from refined iridescence to vivid neon shades. This Superb Gem has its share of both color palettes. Concentric rings of neon green and yellow join fuchsia-pink and magenta-red, while ruby-red, emerald-green, and chestnut-brown patina decorate the obverse. The reverse adds pale-gold and sunset-orange to the mix. Population: 76 in 67 (3 in 67+) Full Bell Lines, 0 finer (4/18). NGC ID# 5HNM, PCGS# 86675

**4536 1958-D MS67 Full Bell Lines PCGS Secure. CAC.** An exceptional Superb Gem, this highly lustrous half dollar exhibits satiny surfaces with vibrant gold, emerald, and iridescent toning over much of the obverse and all of the reverse. Tied for the finest numerically certified. Population: 75 in 67 (3 in 67+) Full Bell Lines, 0 finer. CAC: 46 in 67, 0 finer (5/18). NGC ID# 5HNM, PCGS# 86675

### 1959 Franklin Half, MS67+ The Single Finest at PCGS

**4537 1959 MS67+ PCGS. CAC.** Type Two Reverse. The 1959 Franklin half dollar is a great rarity in Superb Gem condition. Only one such coin (an NGC piece) is in the Full Bell Lines category. This Plus-graded Superb Gem is the sole finest at PCGS and one of only two Superb Gems endorsed by CAC. The strike lacks just slightly on the lower bell near the crack. Softly frosted luster shows no abrasions and has original multihued toning over both sides. Population: 3 in 67 (1 in 67+), 0 finer. CAC: 2 in 67, 0 finer (5/18). NGC ID# 24TJ, PCGS# 6676

**4538 1959 MS66 Full Bell Lines PCGS. CAC.** Type One Reverse. According to Breen, 70% of business strike (and all proof) 1959 halves have a Type Two Reverse with sharper plumage on the eagle. This lustrous high-grade example is exceptionally free from marks. Light to medium sea-green and tan-gold toning confirms the originality. CAC: 17 in 66, 0 finer (5/18). NGC ID# 24TJ, PCGS# 86676

**4539 1959-D MS66+ Full Bell Lines PCGS. CAC.** Dappled shades of crimson, golden-brown, and khaki-green have a foothold on the obverse border, surrounding the brilliant silver center. The reverse surrenders fully to the toning, where orange-gold, rose-red, and sea-green shades predominate. This lustrous and well-preserved example earns both the PCGS Plus designation and CAC endorsement for its high quality and iridescent patina. Population: 14 in 66+ Full Bell Lines, 2 finer. CAC: 28 in 66, 0 finer (5/18). NGC ID# 6L37, PCGS# 86677

### 1961 Franklin Half, MS66 Full Bell Lines

#### Top-Grade Registry Coin

**4540 1961 MS66 Full Bell Lines PCGS Secure.** A light champagne glow emerges on each side of this Premium Gem, complementing sharp devices and satiny cartwheel luster. The 1961 Franklin half dollar is a rarity in this lofty grade and unknown finer. This is an essential Registry-grade candidate for the series specialist. Population: 18 in 66 (2 in 66+) Full Bell Lines, 0 finer (5/18). NGC ID# 24TN, PCGS# 86680

**4541 1962 MS65+ Full Bell Lines PCGS Secure.** The Plus designation sets this piece apart from the majority of Gem 1962 Franklin halves with Full Bell Lines. Other than some aquamarine toning along the upper obverse, the coin is brilliant, and it displays slightly reflective satin luster. This sharp coin has only a few small marks visible under a loupe. Population: 14 in 65+ Full Bell Lines, 17 finer (5/18). NGC ID# 24TR, PCGS# 86682

## PROOF FRANKLIN HALF DOLLARS

**4542 1950 PR67 NGC.** A delicate champagne hue warms the glimmering fields and satiny devices of this Superb Gem first-year proof Franklin. The coin is fully struck with modest contrast on the obverse. An outstanding example of the debut Franklin half dollar proof. NGC ID# 27VA, PCGS# 6691

**4543 1950 PR67 PCGS.** Franklin half dollars were struck in proof format for the first time in 1950. This spectacular Superb Gem is sharply detailed throughout, with deeply mirrored fields and no mentionable distractions. PCGS has graded only one numerically finer example (4/18). NGC ID# 27VA, PCGS# 6691

### 1950 Half Dollar, PR66 Cameo First Proof Franklin Issue

**4544 1950 PR66 Cameo NGC.** The Mint struck proof Franklin half dollars for the first time in 1950. This impressive Premium Gem exhibits sharply detailed design elements and deeply reflective fields that contrast boldly with the frosty devices. The well-preserved surfaces show a few subtle hints of amber and pale gold toning. Census: 70 in 66 Cameo (2 in 66+, 4 in 66★), 18 finer (4/18). NGC ID# 6L9N, PCGS# 86691

**1950 Franklin Half, PR66 Cameo**  
**A Key Date in the Cameo Series**

- 4545 1950 PR66 Cameo PCGS. CAC.** Regarded as an enduring key to the Cameo series of Franklin halves — second only to the 1959 issue in high grades — the 1950 is a prize in Premium Gem Cameo or finer. Cameo contrast was a product of fresh dies. This example is almost brilliant with just a hint of golden peripheral color and slight obverse haziness around the well-frosted motifs. Population: 71 in 66 (5 in 66+) Cameo, 22 finer. CAC: 39 in 66, 17 finer (5/18).  
Ex: Central States Signature (Heritage, 4/2012), lot 4825; Central States Signature (Heritage, 4/2017), lot 3952. NGC ID# 6L9N, PCGS# 86691

**1951 Franklin Half, PR65 Ultra Cameo**

- 4546 1951 PR65 Ultra Cameo NGC.** This early proof Franklin half issue is relatively available in non-cameo condition, but Ultra Cameo pieces are scarce. Gleaming mirrored surfaces backlight the fully struck frost-white devices for pleasing white-on-black contrast. Census: 25 in 65 Ultra Cameo (1 in 65★), 21 finer (4/18).  
Ex: Long Beach Signature (Heritage, 6/2013), lot 4236. NGC ID# 27VB, PCGS# 96692

**1952 Franklin Half, PR67+ Cameo**  
**Spectacular Eye Appeal**

- 4547 1952 PR67+ Cameo PCGS. CAC.** Rick Tomaska writes that the availability of 1952 Gem Cameo halves is “quickly approaching rare status,” a statement that applies equally as well for Premium Gem and Superb Gem cameo examples. This specimen is high-end for the MS67 Cameo level as confirmed by the PCGS Plus designation and CAC endorsement. It is perhaps moderate mint frost on some of the devices that keeps this piece from a Deep Cameo designation. The fields are stunningly and deeply mirrored, and the surfaces are impeccable with superb eye appeal. Population: 5 in 67+ Cameo, 5 finer; 1 in 67 Deep Cameo, 0 finer. CAC: 57 in 67, 6 finer (4/18).  
Ex: FUN Signature (Heritage, 1/2014), lot 4811. NGC ID# 27VC, PCGS# 86693

**1953 Franklin Half, PR66 Ultra Cameo**  
**Eye-Catching Brilliance**

- 4548 1953 PR66 Ultra Cameo NGC.** There has been no significant change in the population of upper-end Ultra Cameo proofs for several years — an indication that few new opportunities to acquire a top-shelf proof will come via the “upgrade” route. This Premium Gem example resides solidly among the top two dozen or so Ultra Cameos recognized by NGC. Entirely untoned with fully brilliant mirrors and frost-white motifs, there are simply no distractions to mention and the eye appeal is terrific. Census: 14 in 66 Ultra Cameo, 10 finer (4/18). NGC ID# D9VF, PCGS# 96694

**1954 Franklin Half, PR69 Cameo**  
**No Numerically Finer Cameos Exist**

- 4549 1954 PR69 Cameo NGC.** Tied for the finest known with only six others, this unsurpassed Superb Gem displays the strong strike and near-perfect surfaces expected for such a high numeric grade. Flawless black mirrors surround the frosted devices with seemingly improvable brilliance and charismatic eye appeal. Census: 7 in 69 Cameo (2 in 69★), 0 finer (4/18).  
Ex: FUN Signature (Heritage, 1/2013), lot 5024. NGC ID# 6L9R, PCGS# 86695

- 4550 1956 Type One, FS-901, PR68 Cameo NGC.** A brilliant and beautiful example of the famous Type One proof 1956 half dollar. Only a scant percentage of proofs from that year show the obsolete, low relief, four-feathertips-west eagle subtype. This specimen has a frosty Franklin and Liberty Bell, and the reflective fields appear pristine.  
Ex: FUN Signature (Heritage, 1/2013), lot 11077, which realized \$2,115. NGC ID# 24TV, PCGS# 510120 Base PCGS# 86686

- 4551 1956 Type Two PR69 Deep Cameo PCGS.** The more plentiful Type Two Reverse, ideal for date collectors. This remarkably well-preserved coin is among the finest certified, and it is scarce in a PCGS holder at this level. The strike is full, and each side displays brilliant surfaces and stark field-device contrast. Population: 77 in 69 Deep Cameo, 0 finer (4/18). NGC ID# 24TW, PCGS# 96697

**4552** 1956 Type Two PR69 Ultra Cameo NGC. The Type Two proof 1956 Franklin half dollar differentiates from the Type One via the high relief of the small eagle on the reverse. This later variety is the more plentiful of the two for date collections. This piece is fully struck and virtually perfect, showing dramatic white-on-black contrast and no toning. Census: 98 in 69 Ultra Cameo, 0 finer (4/18).

Ex: Dallas Signature (Heritage, 3/2013), lot 3678; Rosemont Signature (Heritage, 8/2013), lot 4156, which realized \$1,938.75. NGC ID# 24TW, PCGS# 96697

**4553** 1956 Type Two PR69 Deep Cameo PCGS. This impressive Superb Gem Deep Cameo proof Franklin half dollar has black-and-white contrast, a phrase indicative of the highest quality cameo proof coins. The Type Two variant, with the eagle in bold relief, is the usual variety of this proof issue, representing about 90% of the total population for the date. Population: 77 in 69 Deep Cameo, 0 finer (5/18). NGC ID# 24TW, PCGS# 96697

**4554** 1957 PR69 Cameo NGC. This near-flawless proof is among the finest 1957 Cameos certified. Brilliant surfaces yield glimmering mirrors and frost-white motifs, which are fully struck. The 1957 proof half dollar is scarce this fine and in demand among Registry Set collectors. Census: 41 in 69 Cameo (9 in 69 ★), 0 finer; 4 in 69 Ultra Cameo, 0 finer (4/18). NGC ID# 24TX, PCGS# 86698

**4555** 1959 PR68 White Cameo NGC. A brilliant and immaculate specimen with strong white-on-black distinction on both sides. Only a small percentage of 1959 proofs exhibit comparable contrast. The strike is full, though portions of the eagle's plumage are lapped away. Housed in a circa-2000 holder.

Ex: FUN Signature (Heritage, 1/2006), lot 4275; FUN Signature (Heritage, 1/2013), lot 1101. NGC ID# 27VJ, PCGS# 86700

**4556** 1961 PR68 Deep Cameo PCGS. A stunning Superb Gem Deep Cameo proof, this untoned, brilliant-silver example displays spectacularly deep, watery mirrors and strong white-on-black contrast. A pair of tiny, opaque spots near the reverse legend appear to represent the sole imperfections. PCGS has seen just two numerically finer Deep Cameo proofs (4/18).

Ex: Long Beach Signature (Heritage, 2/2009), lot 8598; Rosemont Signature (Heritage, 8/2013), lot 4159. NGC ID# 24TZ, PCGS# 96702

**4557** 1961 PR68 ★ Ultra Cameo NGC. This sharp, starkly contrasted Ultra Cameo proof is conditionally scarce and an ideal Registry coin. Both sides are untoned, and the preservation is virtually flawless. Few finer Ultra Cameos are known. Census: 81 in 68 Ultra Cameo (3 in 68 ★), 9 finer (4/18).

Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6755, which realized \$1,840; Central States Signature (Heritage, 5/2007), lot 3181, which realized \$1,380; Dallas Signature (Heritage, 3/2013), lot 7890, which realized \$1,292.50. NGC ID# 24TZ, PCGS# 96702

### 1962 Franklin Half Dollar, PR69 Elusive Ultra Cameo Specimen

**4558** 1962 PR69 Ultra Cameo NGC. The 1962 proof Franklin half dollar is seldom encountered with Ultra Cameo surfaces. The richly frosted design elements of this spectacular PR69 example exhibit razor-sharp definition throughout and create intense cameo contrast with the deeply mirrored fields. The brilliant surfaces are just one tick away from perfection. Census: 35 in 69 Ultra Cameo, 0 finer (4/18). NGC ID# 27VK, PCGS# 96703

## PROOF KENNEDY HALF DOLLARS

**4559** 1964 Accented Hair, FS-401, PR68+ Cameo PCGS. Accented Hair half dollars constitute a decided minority of 1964 proofs, and are not seen on other dates or in business-strike format. The briefly issued subtype is identified by the deeply etched lines above Kennedy's ear. Most 1964 proofs lack consequential cameo contrast, but the present brilliant and immaculate specimen features a frosty portrait and a luminous eagle. NGC ID# 4EA9, PCGS# 145626 Base PCGS# 86801

### 1964 Accented Hair Kennedy Half PR67 Ultra Cameo

**4560** 1964 Accented Hair, FS-401, PR67 Ultra Cameo NGC. Ultra Cameo examples of the proof Accented Hair variety are elusive, particularly in Superb Gem condition. This brilliant example is starkly contrasted and fully struck, showing no contact marks or other distractions. The liquidlike mirroring in the fields glimmers with only the slightest rotation beneath a light. NGC ID# 24WG, PCGS# 145627 Base PCGS# 96801

## EARLY DOLLARS

**4561** 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has been repaired and resurfaced. The microgranular cream-gray surfaces show evidence of repair on the reverse field near the eagle's head and right (facing) wing.

### 1797 9x7 Stars Dollar, VF Details B-1, BB-73, Large Letters

**4562** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 — Reverse Scratched — NGC Details. VF. Bowers Die State I. This is an evenly struck Small Eagle type coin with sharp borders and no adjustment marks. Wear affects the central devices, but Liberty's hair curls and the eagle's wing feathers retain significant detail. Both sides are smooth and toned a deep, uniform olive-gray hue.

1798 Draped Bust Dollar, XF40  
Heraldic Eagle, B-23, BB-105 Variety

4563 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, XF40 NGC. Bowers Die State III. The BB-105 features a Wide Date, with a Pointed 9 on the obverse and the reverse shows several die flaws distributed between the letters in STATES. This XF40 specimen exhibits light, even wear on the well-detailed design elements, with some incompleteness in Liberty's hair and cloud 3 on the reverse, due to lapping. The lavender-gray surfaces are lightly abraded and appealing. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1799/8 Draped Bust Dollar, VF25  
15 Star Reverse, B-3, BB-141

4564 1799/8 15 Stars Reverse, B-3, BB-141, R.3, VF25 PCGS. Bowers Die State III, with a die crack from near the right ribbon, through MERIC. The plainly visible overdate and the enlarged first and last clouds that partially conceal the extra stars on the reverse identify the famous BB-141 variety. The moderately worn surfaces of this VF25 example are lightly abraded and toned in shades of slate-gray and blue-steel. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

1799 B-4, BB-153 Dollar, VF25  
15 Stars Reverse

4565 1799 Irregular Date, 15 Stars Reverse, B-4, BB-153, R.4, VF25 PCGS Secure. Bowers Die State II, as usual, showing heavy clash marks from the dentils along the left obverse border. This Large Eagle type coin is sharp and evenly struck, showing grade-consistent wear. The border dentils are complete around both sides with no adjustment marks. Light gray surfaces cede to deeper russet hues around the borders. NGC ID# 24X7, PCGS# 40062 Base PCGS# 6879

1799 Dollar, Choice XF  
B-5, BB-157, 7x6 Stars

4566 1799 7x6 Stars, B-5, BB-157, R.2, XF45 PCGS Secure. Bowers Die State III, with reverse peripheral cracks. This sharp XF coin shows no adjustment marks and has complete border dentils. Rich olive-gray patina blankets each side. Under a loupe, the surfaces appear smooth and problem-free. An excellent Heraldic Eagle type coin with good eye appeal. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

4567 1799 7x6 Stars, B-16b, BB-158, R.2, XF40 ANACS. Bowers Die State IV with several lengthy obverse cracks. A richly detailed gunmetal-gray Heraldic Eagle type coin. Careful examination reveals only a small teardrop-shaped spot on the eagle's neck and a couple of unobtrusive marks above Liberty's shoulder. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

4568 1799 7x6 Stars, B-10, BB-163, R.2 — Planchet Flaw — PCGS Genuine. XF Details. Bowers Die State II. This oft-used obverse die shows signs of lapping — star 1 is spindly and small, and the "pocket" beneath Liberty's throat from die clashing during previous use is gone. A faint die crack connects stars 11 to 13. Light golden-gray toning covers both sides, with sharp definition for the assigned grade. We note a group of light pinscratches below the left (facing) wing. The prominent edge flaw near star 13 is from a Mint-related defective planchet, rather than any post-Mint damage.

1799 7x6 Stars Draped Bust Dollar, VF35  
B-9, BB-166 Variety

4569 1799 7x6 Stars, B-9, BB-166, R.1, VF35 PCGS. Bowers Die State IV, with a long die crack passing through the points of star 10. The die break after the final S in STATES identifies the available B-9 variety. This Choice VF specimen shows some wear on the left side of the drapery, but much interior detail remains bold in other areas. The pleasing lavender-gray surfaces are lightly abraded. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**1800 Bust Dollar, VF35  
B-10, BB-190, Wide Date, Low 8  
Ideal Surfaces for the Grade**

**4570** 1800 Wide Date, Low 8, B-10, BB-190, R.3, VF35 PCGS. Bowers Die State VI. Considerable mint luster remains across the smooth, attractively toned surfaces of this Choice VF BB-190 dollar. Golden-lilac toning drapes the nearly unmarked surfaces throughout both sides. Moderate wear accounts for the assigned numeric grade, which is easily surpassed by its eye appeal and overall surface quality. The reverse is rotated 20° counterclockwise. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

**4571** 1801 B-4, BB-214, R.4, Fine 15 ANACS. Bowers Die State III. The 1801 is the rarest Heraldic Eagle date, if the novodel 1804 is excluded. B-4 is attributed by the proximity of the first 1 to the shoulder curl. This lightly abraded, evenly struck, and microgranular representative displays medium tan-brown and powder-blue patina. NGC ID# 24XA, PCGS# 40086 Base PCGS# 6893

**1802/1 Draped Bust Dollar, VF30  
Wide Date, B-2, BB-233**

**4572** 1802/1 Wide Date, B-2, BB-233, R.4, VF30 NGC. Bowers Die State I. The widely spaced numerals in the date and a spur on the curve of the D in UNITED identify the BB-233 variety. The BB-233 is a scarce variety and examples are seldom seen in high grade. This pleasing VF30 example shows moderate, even wear on the well-detailed design elements and the lightly abraded surfaces are toned in shades of lavender-gray and blue-steel. NGC ID# 24XC, PCGS# 40093 Base PCGS# 6899

**1802 Narrow Date Dollar, XF45  
B-6, BB-241, Well-Defined**

**4573** 1802 Narrow Date, B-6, BB-241, R.1, XF45 PCGS. Bowers Die State III. The usually encountered lapped die state with incomplete detail on Liberty's shoulder curls. This is an imposing stone-gray and almond-gold Heraldic Eagle type coin that shows surprisingly few abrasions. We note only a slight rim knock between the RI in AMERICA. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

**1803 Dollar, AU Details  
Small 3, B-5, BB-252**

**4574** 1803 Small 3, B-5, BB-252, R.3 — Surfaces Smoothed — PCGS Genuine. AU Details. A brilliant Bust dollar with considerable eye appeal when viewed without magnification. The sharpness is exceptional for the type, and luster dominates the hair, wings, and legends. The fields have been smoothed with a mechanical brush, most noticeably near the chin, hair ribbon, and reverse stars. No marks are apparent.

**1803 Draped Bust Dollar, VF25  
Small 3, B-4, BB-254**

**4575** 1803 Small 3, B-4, BB-254, R.3, VF25 PCGS. Bowers Die State I. The Small 3 in the date and the position of star 1 near the curl identifies the BB-254 variety. This pleasing VF25 example shows the left side of the drapery worn smooth, but much interior detail on Liberty's hair remains intact. The lightly abraded surfaces are blanketed in shades of lavender-gray, blue-steel, and golden-brown toning. NGC ID# 24XD, PCGS# 40099 Base PCGS# 6900

## SEATED DOLLARS

### 1840 Seated Dollar, Toned AU58 Scarce in Near-Mint and Finer Grades

**4576** 1840 AU58 PCGS Secure. OC-3, R.3. Autumn-brown and jade-green toning embraces this first-year Choice AU Seated dollar. As such, the 1840 is very challenging in high grades and was little saved by the general public, who extensively set aside other first-year coinage. The strike is good and the surfaces retain substantial satin luster. The only remotely reportable mark is a minor rim ding near the L in DOL. In a small-sized holder. Population: 30 in 58 (3 in 58+), 33 finer (4/18). NGC ID# 24YA, PCGS# 6926

**4577** 1843 MS61 NGC. A shimmering silver-gray and almond-gold silver dollar that has a decent strike and moderately abraded fields. The obverse has a hair-thin mark near the first two stars and a tiny rim nick at 6 o'clock. Some interesting clash marks are evident in the right obverse field, under Liberty's arm. The 1843 has a plentiful mintage by No Motto Seated dollar standards, yet remains quite scarce in Mint State. Census: 22 in 61, 31 finer (4/18).  
Ex: Long Beach Signature (Heritage, 9/2008), lot 2436; FUN Signature (Heritage, 1/2009), lot 4322. NGC ID# 24YD, PCGS# 6929

**4578** 1846-O AU58 NGC. OC-1, R.2. Osborn-Cushing Die State b/d, coin turn. Medium golden-brown toning graces the obverse. Deep forest-green and tan toning embraces the reverse. Liberty's high points display slight wear, but luster dominates the design elements, and marks are minimal save for a brief slender line on the right obverse field. NGC ID# 26GG, PCGS# 6933

### 1857 Seated Dollar, AU58 OC-P1, Osburn-Cushing Proof Dies

**4579** 1857 AU58 PCGS. OC-P1, R.5. Slabbed in an older blue-label holder as a circulation strike, this 1857 Seated dollar is from the die pair that Dick Osburn and Brian Cushing designate as the proof variety on seateddollarvarieties.com. Date alignment identifies the P1 obverse, and die lumps on the L in DOL., along with an absence of die lines in the shield recesses, identify the 1856 PA reverse. Although each side of the coin has light high-point rub, consistent with the AU58 grade, the fields are deeply reflective and the strike is sharp. Delicate champagne toning graces each side. Population: 21 in 58, 50 finer (4/18). NGC ID# 24YW, PCGS# 6945

**4580** 1860-O MS61 PCGS Secure. OC-4, Low R.3. This lustrous New Orleans type coin is likely one of the Seated dollars released by the Treasury at face value during the early 1960s. The well-struck surfaces display a smattering of minor abrasions, usual for Mint State examples of the issue. Light gold toning adorns the borders. NGC ID# 24Z3, PCGS# 6950

**4581** 1865 — Cleaned — ANACS. Unc. Details, Net AU55. OC-4, High R.4. A Top 30 Variety. The "Bar 6" variety with a bold die line through the ball of the 6 in the date. OC-4 is second-scarcest among the four business marriages for this Civil War date. The forest-green and golden-brown surfaces are moderately marked and display a patch of hairlines on the upper reverse field. NGC ID# 24Z8, PCGS# 6955

### 1867 Seated Dollar, MS62 Repunched Date, Strong Detail

**4582** 1867 MS62 NGC. OC-1, R.2. A Top 30 Variety. A single die pair is known to have struck 47,525 Seated dollar circulation strikes in 1867. All show repunched date digits, possibly from a quarter dollar punch. Examples often come semiprooflike rather than frosty, as the dies were continually polished, and this MS62 coin is a bit of both. Creamy silver-gray surfaces display faint hints of golden color. Liberty's head and sandal, the stars, and the eagle are all strongly brought-up. Scattered ticks are mostly hidden within the confines of the drapery and feathers. A small planchet flake occurs at the tip of the foot. NGC ID# 24ZA, PCGS# 6960

**4583** 1870 MS61 NGC. OC-4, Low R.3. Barely a hint of straw-gold toning adorns this sharply struck and satiny Seated dollar. Abrasions are absent aside from a cluster of faint marks on the field near the knees. OC-4 has a high date with the 1 centered beneath the shield point. IN GOD WE TRUST is die doubled, as seen on most examples of the issue. NGC ID# 24ZD, PCGS# 6963

**4584** 1870-CC Fine 12 PCGS. OC-1, Low R.4. A charming cream-gray representative of the first-year Carson City silver dollar. Substantial plumage detail is present, and the date and mintmark are bold. The surfaces are surprisingly unabraded, save for a minor rim knock at 1 o'clock on the reverse. NGC ID# 24ZE, PCGS# 6964

### 1870-CC Dollar, VF30 First-Year Carson City Issue

**4585** 1870-CC VF30 PCGS Secure. OC-2, R.5. Osburn-Cushing Die State a/a. Always in high demand, the 1870-CC dollar is less rare than other Carson City denominations from the Nevada Mint's inaugural year, which adds to its popularity. Based on research by R.W. Julian, the Osburn-Cushing website ([www.seateddollarvarieties.com](http://www.seateddollarvarieties.com)) suggests a mintage of 12,462 pieces, compared to the 2019 Guide Book mintage of 11,758 silver dollars. This is a well-circulated, moderately abraded example with golden-tan toning that deepens near the borders. NGC ID# 24ZE, PCGS# 6964

**4586** 1870-CC — Cleaned — PCGS Secure Genuine. XF Details. OC-8, High R.4. The 1870-CC is the first and least rare of the four Carson City Seated dollar issues, yet the tiny mintage of 12,462 pieces ensures that survivors are insufficient to meet type demand from Old West collectors. This gunmetal-gray and golden-brown example displays patches of hairlines, along with a few unobtrusive rim bumps and a hair-thin horizontal mark near star 12.

**1870-CC Dollar, AU Details  
Challenging Carson City Type**

**4587** 1870-CC — Cleaned — PCGS Secure Genuine. AU Details. OC-8, High R.4. Struck during the initial year of Carson City coinage, the 1870-CC has a tiny mintage of 12,462 pieces. Some were set aside, perhaps by local citizens proud of their new branch mint, but survivors are under strong demand from CC-mint type collectors. This primarily stone-gray example offers hints of golden patina. Well-defined and nearly unabraded, but the surfaces are somewhat subdued. One small trapped gas bubble is noted near the right (facing) wingtip.

**4588** 1871 AU58 PCGS. CAC. OC-10, R.2. Apple-green, walnut-brown, and ruby-red toning embraces this lightly circulated and problem-free Motto type coin. A solid strike further ensures the eye appeal. A horizontal die line between WE is the pick-up point for the Osburn-Cushing variety. CAC: 9 in 58, 38 finer (5/18). NGC ID# 5DNV, PCGS# 6966

**4589** 1872 AU58 PCGS. OC-7, R.2. Tan-brown, plum-red, and cobalt-blue toning overlies satiny pearl-gray surfaces. The smattering of minor obverse marks is commensurate with the grade, though the reverse is surprisingly void of abrasions. A nicely struck near-Mint Motto type example. NGC ID# 24ZJ, PCGS# 6968

**PROOF SEATED DOLLARS**

**1859 Seated Dollar, PR64  
Sharp and Reflective**

**4590** 1859 PR64 ANACS. OC-P1, R.3. Only one die variety is known for the 1859 proof Seated dollar. The obverse die is only seen in this marriage and was not used for circulation coinage. The reverse was later employed for restrikes of the 1851, 1852, 1854, and 1858 proof dollars. Original 1859 proofs are elusive in high grade, coming from a reported mintage of 800 pieces. This near-Gem is sharp and deeply mirrored. Both sides have a hint of champagne toning, but the reverse also shows deeper copper-red color along the lower margin. NGC ID# 252D, PCGS# 7002

**1860 Seated Dollar, PR63  
One Proof Die Variety Known**

**4591** 1860 PR63 PCGS. OC-P1, R.2. This is the only proof die pair known for the 1860 Seated dollar, and it was later used to strike a small number of circulation-issue coins, namely variety OC-6. Dick Osburn and Brian Cushing write: "We've found no conclusive method for separating proofs from business strikes. It's a judgment call based on surfaces and strike characteristics." This Select proof is a trifle weak on the border stars but is otherwise sharp and deeply mirrored. Light russet-gold toning with some splashes of sea-green appears on each side. Only light marks are visible. NGC ID# 252E, PCGS# 7003

**1866 Seated Dollar, PR62 Cameo  
First-Year With Motto Proof**

**4592** 1866 Motto PR62 Cameo PCGS. OC-P2, R.3. Although a pair of No Motto proofs are known, date collectors will have to acquire an 1866 With Motto Seated dollar for a proof series set. Examples are available in most grades, but Cameo pieces are in the minority. This coin is fully struck and well-contrasted with warm golden toning on each side. Scattered light marks account for the grade but are not overly bothersome.

Ex: Summer FUN Signature (Heritage, 6/2008), lot 1254, which realized \$2,990. NGC ID# 252M, PCGS# 87014

**1870 Dollar, Richly Toned PR63**

**4593** 1870 PR63 NGC. OC-P1, Low R.3. This issue enjoys a relatively generous mintage of 1,000 proofs. As such, it is one of the more available proof dates in the series, a popular consideration for type purposes. Shades of deep violet, gray-blue, and apricot-orange combine over the surfaces and likely prevent a Cameo designation. All the design motifs are predictably bold, and signs of contact are minimal.

Ex: FUN Signature (Heritage, 1/2015), lot 5387, which realized \$2,820. NGC ID# 252S, PCGS# 7018

- 4594** 1871 PR61 PCGS Secure. OC-P1, R.2. Powder-blue toning is uniform across this well-struck proof silver type coin. Patient rotation beneath a loupe reveals unobtrusive hairlines. Clashed above the date (from the top of the scroll), a late die state unlisted in the Osburn-Cushing standard reference. NGC ID# 252T, PCGS# 7019

## TRADE DOLLARS

- 4595** 1874-CC MS61 PCGS Secure. Micro CC. Period after FINE. Cartwheel luster sweeps this moderately marked Carson City representative. The obverse is mostly white, though a few small blushes of lavender-gray accompany the borders. The reverse is medium dove-gray with frequent glimpses of stone-white surface. The strike is sharp except on Liberty's hair. NGC ID# 2532, PCGS# 7035
- 4596** 1875-CC AU55 PCGS Secure. Type One Reverse. Period after FINE. A semiprooflike and untoned Carson City type coin. The design elements exhibit luster, and the strike shows only minor merging on Liberty's hair and the eagle's right (facing) leg. No marks are of singular significance. NGC ID# 2535, PCGS# 7038

### 1875-CC Trade Dollar, Bright MS62 Type One Reverse

- 4597** 1875-CC Type One Reverse MS62 PCGS Secure. Period after FINE. This is the normal variety for the issue, which claims a mintage of 1.5 million coins. This MS62 coin is entirely brilliant, lacking even the slightest hint of color. Mint luster is bright over moderately marked surfaces. Strike detail is impressively sharp. An excellent CC Trade dollar type coin.

*From The Bob Williams Collection.* NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

- 4598** 1875-S MS63 PCGS. Type One Reverse. Large S. Dusky golden-gray toning drapes this lustrous and unblemished representative. The strike is sharp, aside from the usual slight blurring of detail on Liberty's hair and the eagle's right (facing) leg. The eye appeal is excellent for the grade.

*Ex: Houston Signature (Heritage, 11/2007), lot 60770, FUN Signature (Heritage, 1/2013), lot 4611.* NGC ID# 2536, PCGS# 7039

- 4599** 1876 Type One Obverse, Type One Reverse, MS64 PCGS Secure. No period after FINE. An essentially brilliant near-Gem with dynamic luster and minimally marked surfaces. The strike is intricate throughout. This Trade dollar will satisfy even advanced specialists. NGC ID# 2539, PCGS# 40110 Base PCGS# 7041

### 1877 Trade Dollar, MS64+ Frosty With Colorful Toning

- 4600** 1877 MS64+ PCGS Secure. The 1877 Trade dollar is significantly scarcer than the San Francisco issue of this year, and it is genuinely rare in Gem condition. This high-end Choice example displays frosty luster and beautiful multicolor toning imbedded in otherwise orange-gold and blue-gray patina. Moderate strike weakness affects the obverse stars and Liberty's head, but the central devices show sharp detail. Population: 88 in 64 (8 in 64+), 14 finer (4/18). NGC ID# 253C, PCGS# 7044

- 4601** 1878-S MS63 PCGS. More than 4.1 million Trade dollars were struck by the San Francisco Mint in 1878 — the final year of circulation-strikes for the type. The Carson City Mint struck another 97,000 pieces, although later in the year nearly half of those were melted. Thereafter, the only Trade dollars produced were proofs for collectors, dealers, and speculators. A crescent of auburn-brown toning graces the left edge of this Select Uncirculated 1878-S, with pale-brown and silver shades on the obverse and a gold-toned reverse. A few tiny ticks visit the well-struck surfaces. NGC ID# 253G, PCGS# 7048

## PROOF TRADE DOLLARS

### 1874 Trade Dollar, PR64+ Seldom Encountered Finer

- 4602** 1874 PR64+ PCGS Secure. Period after FINE. The second year of the Trade dollar denomination saw an increased mintage of 700 proofs struck to satisfy collector demand. This Plus-graded Choice specimen exhibits sharply detailed design elements in most areas, but the eagle's right (facing) leg shows a touch of the usual softness. The lightly marked surfaces are enhanced by shades of greenish-gold, cerulean-blue, and lavender-gray toning, with reflective fields underneath. Population: 44 in 64 (2 in 64+), 14 finer (4/18). NGC ID# 27YK, PCGS# 7054

**4603** 1875 PR60 PCGS Secure. Type One Reverse. Period after FINE. A brilliant specimen with substantial frost throughout raised elements, though the fields lack the reflectivity requisite for a Cameo designation. The strike is bold aside from the eagle's right (facing) leg. The fields display hairlines typical for the PR60 level. From a proof mintage of just 700 pieces. NGC ID# 27YL, PCGS# 7055

**4604** 1876 PR62 PCGS Secure. Type One Obverse, Type Two Reverse. Period after FINE. Splashes of ocean-blue and cherry-red toning adorn this nicely mirrored and well-struck Trade dollar. The obverse field exhibits minor handling marks, while the reverse shows only trivial hairlines. NGC ID# 27YM, PCGS# 7056

**1876 Trade Dollar, PR63**  
Ex: Jules Reiver Collection

**4605** 1876 PR63 NGC. Ex: Jules Reiver Collection. Type One Obverse, Type Two Reverse. Minute die doubling is visible on some of the central details, especially the LIBERTY ribbon and the lower edges of Liberty's gown. Golden-brown and jade-green toning visits the peripheries. This Select proof is well-struck aside from a hint of incompleteness on Liberty's hair. Attractive for the grade and not far from a Cameo designation, since the devices demonstrate consistent and substantial frost.

Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21584, which realized \$3,105; Dallas Signature (Heritage, 4/2017), lot 16217, which realized \$2,291.25. NGC ID# 27YM, PCGS# 7056

**1878 Trade Dollar, PR62 Cameo**  
From the Jules Reiver Collection

**4606** 1878 PR62 Cameo NGC. Ex: Jules Reiver Collection. The 1878 is the first of the proof-only Trade dollars from the Philadelphia Mint, although San Francisco and Carson City each produced some circulation strikes this year before dies for the Morgan type arrived. The 1878 proof mintage is only 900 coins, with later proof-only issues tallying higher production totals. This fully struck and faintly hairlined specimen has frosty motifs and glassy fields. Toning is limited to golden-brown and aquamarine iridescence near the rims. Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21595, which realized \$3,335; Dallas Signature (Heritage, 4/2017), lot 16219, which realized \$2,056.25. NGC ID# 27YP, PCGS# 87058

**4607** 1879 PR60 PCGS Secure. Light hairlines on both sides limit the grade of this brilliant proof that retains fully and deeply mirrored fields around satiny silver devices. No contact marks are apparent on either side of this attractive Trade dollar. NGC ID# 27YR, PCGS# 7059

**4608** 1880 PR55 PCGS Secure. A trace of rub is expected on the high points at this grade, as seen on the present Trade dollar proof. Both sides exhibit pale gold toning with light hairlines and trivial contact marks. An affordable opportunity for the budget-minded collector. NGC ID# 27YS, PCGS# 7060

**4609** 1881 PR61 PCGS Secure. An attractive PR61 specimen of this popular, proof-only issue, with razor-sharp definition on all design elements and deeply mirrored fields that show some minor hairlines, but few signs of contact. NGC ID# 27YT, PCGS# 7061

**1881 Trade Dollar, PR64 Cameo**  
Sharp, Contrasted Type Coin

**4610** 1881 PR64 Cameo NGC. The 1881 Trade dollar often comes with sharp detail and stark cameo contrast, earning it a reputation as a popular type coin in the proof series. This near-Gem Cameo lacks nothing in eye appeal. Pinpoint sharpness across each side complements liquidlike mirroring in the fields, all cast in a delicate golden hue. No distracting contact marks are visible. Census: 35 in 64 Cameo (3 in 64+), 54 finer; 1 in 64 Ultra Cameo, 5 finer (4/18). NGC ID# 27YT, PCGS# 87061

**1882 Trade Dollar, Toned PR64**

**4611** 1882 PR64 PCGS. If one considers the total production of proofs and circulation strikes for every issue in the Trade dollar series, then the 1882 has the lowest absolute mintage: 960 coins, all proofs. (The 1884 and 1885 are not considered official issues due to a lack of Mint records for their coinage.) Multicolor patina over each side of this piece includes shades of blue, green, gold, and magenta. The fields maintain noticeable reflectivity despite the toning. NGC ID# 27YU, PCGS# 7062

**4612** 1883 PR61 PCGS Secure. From a proof-only mintage of 979 pieces, this PR61 specimen represents the final regular-issue Trade dollar. The design elements are sharply detailed and the deeply reflective fields show a number of minor hairlines and contact marks. NGC ID# 5DP8, PCGS# 7063

## MORGAN DOLLARS

- 4613 1878 7TF Reverse of 1878 MS65+ PCGS. VAM-196.** Dramatic concentric bands of apple-green, cherry-red, and honey-gold adorn the upper-left obverse. The reverse displays only light peripheral steel-blue and lemon patina. The lustrous surfaces are smooth save for a few tiny field ticks beneath the chin. NGC ID# 2TY3, PCGS# 7074

**1878 Morgan Dollar, MS66  
7 Tailfeathers, Reverse of 1878**

- 4614 1878 7TF Reverse of 1878 MS66 PCGS.** The seven feathers in the eagle's tail, combined with the parallel top arrow feather, identifies the popular Reverse of 1878. This well-detailed Premium Gem shows the effects of die polishing on the eagle's wings and some die crumbling on the talons. The impeccably preserved surfaces display vibrant mint luster, with vivid greenish-gold toning on the obverse. Population: 55 in 66 (9 in 66+), 0 finer (4/18). NGC ID# 2TY3, PCGS# 7074

- 4615 1878 7TF Reverse of 1879 MS65 PCGS Secure.** The 1878 7 Tailfeathers Reverse of 1879 variant is significantly less available than the 1878 Reverse of 1878 type, a fact that is not lost on collectors who specialize in Gem or finer Morgan dollars. This brilliant MS65 Reverse of 1879 has the telltale angled top arrow feather and rounded eagle's chest. The fully brilliant surfaces are sharply struck and brightly lustrous. The few abrasions are light and non-distracting. NGC ID# 253L, PCGS# 7076

- 4616 1878 7TF Reverse of 1879 MS65 PCGS.** An arc of beautiful ocean-blue toning crosses the obverse, with sea-green and rose-red shades beneath. The upper-right obverse remains brilliant, where another coin apparently rested above it to deny contact with the Treasury bag. Well-struck and lustrous with minor facial grazes and a small strike-through on the eagle's belly. NGC ID# 253L, PCGS# 7076

- 4617 1878 7TF Reverse of 1879 MS65 PCGS. VAM-202.** Lustrous, brilliant, and well-struck. This first-year, third reverse Gem has an exceptionally smooth reverse and only trivial obverse contact. VAM-202 is best known for a die lump on the curve of the D in UNITED. NGC ID# 253L, PCGS# 7076

- 4618 1878-CC MS65 PCGS.** This sharp, frosty Gem displays original olive-gold, sun-orange, and lavender-gray toning over each side. Under a loupe, Liberty's cheek is found to be clean, and the fields show only a few truly insignificant marks. A high-end coin for the grade. NGC ID# 253M, PCGS# 7080

- 4619 1878-CC MS65 PCGS.** This frosty Gem displays radiant cartwheel luster and sharp design elements. Hints of light golden toning emerge from the peripheries, warming each side. Only a few light, scattered marks are apparent. NGC ID# 253M, PCGS# 7080

- 4620 1878-CC MS65 PCGS Secure.** This attractive Gem from the famous Carson City Mint represents the first year of the Morgan dollar design. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster. NGC ID# 253M, PCGS# 7080

- 4621 1878-CC MS65 NGC.** First year of issue and popular as such for collectors of Carson City material. An unusually high percentage of 1878-CC dollars are found with brilliant surfaces, such as seen here. Fully struck throughout with uncommonly clean surfaces for a CC dollar. Thick mint frost. NGC ID# 253M, PCGS# 7080

- 4622 1878-CC MS65+ PCGS Secure. CAC.** The obverse of this Gem first-year Carson City Morgan dollar is brilliant and highly lustrous with peripheral gold and blue toning. The reverse is fully toned in rich sea-green color. A dramatic presentation. NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar, MS66  
Popular First-Year Issue**

- 4623 1878-CC MS66 PCGS Secure.** The 1878-CC Morgan dollar represents the first year of the design and claims a mintage of 2.2 million pieces. This spectacular Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces are brilliant and lustrous, with outstanding eye appeal. PCGS has graded six numerically finer examples (4/18). NGC ID# 253M, PCGS# 7080

- 4624 1878-CC MS65 Prooflike PCGS.** Both sides of this Gem first-year Carson City Morgan are Prooflike and cameo-contrasted with a hint of light golden toning. A few trivial marks are not distracting. The 1878-CC is only marginally scarce in this grade, but finer Prooflike coins are rarely offered. NGC ID# 253M, PCGS# 7081

- 4625 1879 MS66 PCGS Secure.** A brilliant, frosty Premium Gem with radiant cartwheel luster. A loupe reveals only trivial luster grazes on Liberty's cheek, and minor strike weakness is visible on the eagle's breast and the hair above Liberty's ear. Finer 1879 Morgan dollars are scarce. NGC ID# 253S, PCGS# 7084

- 4626 1879 MS66 PCGS.** Vivid shades of violet, golden-brown, and slate-gray toning enhance the well-preserved surfaces of this impressive Premium Gem, with well-detailed design elements that show just a touch of softness on the hair above the ear and vibrant mint luster that shines through the patina. PCGS has graded six numerically finer examples (5/18). NGC ID# 253S, PCGS# 7084

- 4627 1879 MS66 PCGS.** Dusky shades of gray, golden-brown, and violet toning blanket the well-preserved surfaces of this attractive Premium Gem, with well-detailed design elements and vibrant mint luster underneath. PCGS has certified six numerically finer examples (5/18). NGC ID# 253S, PCGS# 7084

- 4628 1879 MS66 PCGS.** The virtually pristine surfaces of this remarkable Premium Gem are visited by shades lavender-gray toning, with most of the color on the obverse. The design elements are well-detailed and both sides radiate vibrant mint luster beneath the patina. PCGS has graded six numerically finer specimens (5/18). NGC ID# 253S, PCGS# 7084

- 4629 1879 MS66 PCGS.** This delightful Premium Gem exhibits sharply detailed design elements and impeccably preserved brilliant surfaces throughout, with vibrant mint luster on both sides. Overall eye appeal is terrific. PCGS has graded six numerically finer examples (4/18). NGC ID# 253S, PCGS# 7084

- 4630 1879-CC Capped Die, VAM-3, XF45 PCGS Secure.** A Top 100 Variety. The remnants of an undertype CC are plainly visible below the primary mintmark on this Choice XF specimen, identifying the popular Capped Die variety. Only light wear is evident on this scarcer Carson City semikey issue, and the pleasing silver-gray surfaces are lightly abraded.

*From The Bob Williams Collection.* NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-S Morgan Dollar, MS64 Prooflike  
Reverse of 1878, VAM-52, Top 100 Variety**

**4631** 1879-S Reverse of 1878, VAM-52, MS64 Prooflike NGC. CAC. A Top 100 Variety. Diagnostic markers include a closed 9, die chip between TY, full R in TRUST, and die lines on the right (facing) wing. This phenomenally appealing near-Gem boasts reflective fields, frosted, fully struck devices, and peripheral multicolor toning around brilliant centers. Rightfully endorsed by CAC. NGC ID# 253W, PCGS# 41001 Base PCGS# 7095

**4632** 1880 MS66 PCGS Secure. Although there are a few Prooflike and Deep Mirror Prooflike coins in MS66, PCGS lists no numerically finer examples of the 1880 Morgan dollar (4/18). This Premium Gem is semiprooflike, showing brilliant, frosty surfaces and reflective fields. A few light grazes on the obverse prevent an even finer grade. NGC ID# 253Y, PCGS# 7096

**4633** 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS. A Top 100 Variety. The most prominent overdate of the series is paired with an obsolete reverse bearing the ever-popular Carson City mintmark. Light silver-gray toning visits this lustrous and well-struck Gem. The fields are smooth and the portrait shows only wispy grazes. Ex: FUN Signature (Heritage, 1/2007), lot 6918, which realized \$2,070. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

**4634** 1880-O MS64 PCGS. Small or Micro O. Given the five-figure cost of a Gem 1880-O, most advanced collectors instead attempt to obtain a nice MS64 example. This lustrous Choice silver dollar displays rich green, gold, orange, and lilac patina. Marks are irrelevant aside from an unobtrusive field cluster near the chin. NGC ID# 2543, PCGS# 7114

**1880-O Morgan Dollar, MS64+  
Vivid Toning and Vibrant Luster**

**4635** 1880-O MS64+ PCGS Secure. From a substantial mintage of 5.3 million pieces, this Plus-graded Choice example displays a sharp strike for a New Orleans issue and shows some interesting clash marks on the reverse. The lightly marked surfaces radiate vibrant mint luster, under attractive shades of golden-tan and magenta toning. PCGS has graded 48 numerically finer examples (4/18). NGC ID# 2543, PCGS# 7114

**4636** 1880-O MS64 PCGS. CAC. Small or micro O. Peach-red and caramel-gold toning adorns the borders of this otherwise pearl-gray Choice dollar. The coin is lustrous and sharply struck with fewer marks than is customary for the MS64 level. NGC ID# 2543, PCGS# 7114

**4637** 1880-O MS64 PCGS Secure. CAC. Oval O. Original sea-green, gold, and rose-red toning blankets both sides of this Choice 1880-O Morgan dollar, intermingling across the frosty luster without fully blending. Marks are confined to the cheek and the field beneath the second U in PLURIBUS. Slight strike weakness is seen as usual on the central high points. NGC ID# 2543, PCGS# 7114

**4638** 1880-O MS64 PCGS. CAC. VAM-11A. Micro O mintmark. A dash below the second 8 and doubling on 188 join numerous die clash marks and diagnostic die lines to confirm the VAM-11A variety. Sharply struck for the issue, this near-Gem Uncirculated example displays semireflective surfaces and lustrous, silver-gray surfaces with a narrow crescent of golden toning on the reverse. The 1880-O is rare any finer. PCGS reports just 48 numerically finer pieces (4/18). NGC ID# 2543, PCGS# 7114

**4639** 1880/79-O Crossbar, VAM-4, MS64 PCGS Secure. CAC. A Top 100 Variety. Micro O. This popular variety shows the remnant of a 7 within the upper loop of the second 8. The present coin is sharp and brilliant with only light abrasions visible under a loupe. CAC-approved and vibrantly lustrous. NGC ID# 2543, PCGS# 133880 Base PCGS# 7116

**4640** 1880-O 8 Over 7 Ear, VAM-6A, MS64+ PCGS. CAC. A Top 100 Variety. The remnants of an undertype 7 show as a small "ear" mark at the left top of the second 8 in the date and a faint M clash mark is barely visible above the D in GOD, identifying the VAM-6C. This Plus-graded Choice example displays sharply detailed design elements and well-preserved brilliant surfaces, with vibrant mint luster on both sides. Population (for the variety): 32 in 64 (4 in 64+), 0 finer (4/18). NGC ID# 2543, PCGS# 133883 Base PCGS# 7114

**4641** 1880-S MS67 Prooflike NGC. Medium S. A gorgeous Superb Gem that boasts dynamic luster across brilliant and fully struck surfaces. The obverse is virtually perfect, as is the reverse except for minor field contact beneath the TES in STATES. Ideal for the silver type collector. NGC ID# 2544, PCGS# 7119

**4642** 1880-S MS66 Deep Mirror Prooflike PCGS. Medium S. The 1880-S is known for its quality, but the present deeply mirrored Premium Gem will impress even the veteran specialist. The virtually stone-white surfaces are uncommonly clean, and the strike is bold throughout. NGC ID# 2544, PCGS# 97119

**4643** 1880/9-S VAM-11, Medium S, Hot 50, MS67 PCGS Secure. CAC. A Hot 50 Variety. This near-flawless VAM-11 coin is beautifully frosted and brilliant with radiant cartwheel luster. The strike is sharp, and the CAC green label is well-earned. Each side is far more luminous than many other examples of this date that we have seen, even with the 1880-S Morgan dollar's reputation for vibrant luster. VAM-11 shows raised metal within the 0 of the date and a tiny checkmark-shaped die line on Liberty's neck. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

**1881 Morgan Dollar, MS66+  
Attractive Iridescent Toning**

**4644** 1881 MS66+ PCGS Secure. From a mintage of 9.1 million pieces, the 1881 Morgan dollar is an available issue in grades up to the MS66 level, but finer coins are condition rarities. This Plus-graded Premium Gem exhibits sharply detailed design elements and well-preserved surfaces, under iridescent shades of golden-brown and lavender toning. Vibrant mint luster shines through the patina. PCGS has graded five numerically finer examples (4/18). NGC ID# 2546, PCGS# 7124

- 4645** 1881 MS65 Prooflike PCGS Secure. Prooflike and Deep Mirror Prooflike 1881 Morgan dollars are scarce in Gem condition and nearly uncollectible finer. This Gem displays brilliant surfaces and a hint of cameo contrast. The devices are well-struck, and a loupe reveals only a few trivial contact marks. Population: 18 in 65 Prooflike, 1 finer; 10 in 65 (2 in 65+) Deep Mirror Prooflike, 0 finer (4/18). NGC ID# 2546, PCGS# 7125
- 4646** 1881-CC MS66 PCGS. VAM-3. A number of linear die gouges among the lower wreath leaves and bowknot identify the VAM-3 variety. Non-VAM enthusiasts and VAM specialists alike will appreciate the frosted, snow-white surfaces and minimally marked surfaces of this brightly lustrous Premium Gem coin. The central devices are ultra-frosty with only a few light luster grazes and sharp definition. NGC ID# 2549, PCGS# 7126
- 4647** 1881-CC MS66 PCGS. VAM-4. This low-mintage and high-grade Carson City dollar is lustrous and splendidly preserved. The strike is good and the surfaces are brilliant save for light peripheral rose-gold toning.  
Ex: Central States Signature (Heritage, 5/2003), lot 6440, which realized \$948.75. NGC ID# 2549, PCGS# 7126
- 4648** 1881-CC MS66 PCGS. VAM-4. This lovely Premium Gem displays dazzling luster throughout untoned surfaces. Minor facial grazes are in keeping with the designated grade. Among the lowest mintage CC-mint Morgan issues.  
Ex: FUN Signature (Heritage, 1/2013), lot 6090, which realized \$1,410. NGC ID# 2549, PCGS# 7126
- 4649** 1881-CC MS66 PCGS. VAM-2. A boldly struck Carson City silver dollar that has only a whisper of olive-gold toning. Sweeping cartwheel luster illuminates well-preserved surfaces. A popular low-mintage issue made available by dispersal of the GSA holdings.  
Ex: FUN Signature (Heritage, 1/2012), lot 6968, which realized \$1,495. NGC ID# 2549, PCGS# 7126
- 4650** 1881-CC MS66+ PCGS Secure. VAM-3. A high-grade representative of this popular and low-mintage Carson City issue. Brilliant and sharply struck with dazzling luster and exceptionally unabraded fields. Even Liberty's cheek shows only unimportant contact. VAM-3 is scarcer than VAM-2, and can be identified by the die line east of the wreath ribbon knot. NGC ID# 2549, PCGS# 7126

### 1881-CC Dollar, Frosty MS67 Few Finer Pieces Known

- 4651** 1881-CC MS67 PCGS Secure. Most of the high-grade 1881-CC dollars known came from the GSA sales of the 1970s, which yielded nearly 150,000 pieces. Nonetheless, Superb Gems are in the minority and are the subject of unceasing collector demand. This piece is sharp and untoned, yielding frosty cartwheel luster. Eye appeal is exceptional. NGC ID# 2549, PCGS# 7126
- 4652** 1881-CC MS66 Prooflike PCGS. VAM-3. This visually attractive Premium Gem displays nicely frosted devices and impressive field reflectivity. The strike is good, the reverse is uncommonly unabraded, and the obverse displays only inconsequential contact. Population: 33 in 66 (4 in 66+) Prooflike, 2 finer (5/18). NGC ID# 2547, PCGS# 7127
- 4653** 1881-CC MS64 Deep Mirror Prooflike PCGS Secure. Choice surfaces are brilliant and starkly cameo-contrasted on each side of this Deep Mirror Prooflike Carson City Morgan. The strike is sharp, and only a few faint grazes on Liberty's cheek limit the grade. Eye appeal is outstanding. NGC ID# 2547, PCGS# 97127
- 4654** 1881-O MS65 PCGS Secure. Cherry-red, lemon-gold, and powder-blue toning makes the obverse memorable. The reverse shows only a whisper of golden-gray patina. A lens locates occasional minor marks, but the eye appeal is undeniable. New Orleans Morgan dollars are rarely encountered any finer. NGC ID# 2548, PCGS# 7128
- 4655** 1881-O Pummeled Eye, VAM-1D, MS64 Prooflike PCGS Secure. CAC. A Hit List 40 Variety. Also known as the "Flaky Eye" variety, VAM-1D has a multilayered appearance near the upper left border of Liberty's eye. This is the finest of only three Prooflike examples certified as VAM-1D by PCGS (4/18). Light gold toning visits this flashy and nicely struck near-Gem. Aside from a solitary tick on the cheekbone, the surfaces show only minimal marks. PCGS# 412602 Base PCGS# 7129
- 4656** 1881-S MS66 PCGS. Remarkable iridescent bands of violet-red, jade-green, lemon-gold, and powder-blue endow this lustrous high-grade silver type coin. An intricate strike contributes further to the eye appeal. Certified in a green-label holder. NGC ID# 2549, PCGS# 7130
- 4657** 1881-S MS67+ NGC. Dazzling cartwheel luster encompasses this high-end Superb Gem type coin, illuminating gold, violet, and ocean-blue toning that covers the obverse and the left side of the reverse. This 1881-S dollar is well-struck and shows no mentionable abrasions beneath a loupe. NGC ID# 2549, PCGS# 7130
- 4658** 1881-S MS67+ PCGS Secure. CAC. Liberty's cheek is pristine on this high-end Superb Gem type coin, and the CAC green label places this coin in a minority of elites among its peers. Well-struck motifs and vibrant cartwheel luster are in keeping with the reputation of the 1881-S Morgan dollar, and this coin also has multicolor obverse toning matched to a brilliant reverse. NGC ID# 2549, PCGS# 7130
- 4659** 1882-CC MS66+ PCGS Secure. CAC. Scarce by virtue of its PCGS Plus designation coupled with CAC endorsement, this 1882-CC displays vivid mint luster and a razor-sharp strike. Liberty's cheek is clean and the fields are nearly unabraded throughout both sides of this untoned, silver-white coin. Dollar-for-dollar, it will be hard to improve on this visually impressive Premium Gem. NGC ID# 2548, PCGS# 7134
- 4660** 1882-CC MS66 Prooflike NGC. A delightful Premium Gem Morgan dollar from the famous Carson City Mint, this coin exhibits razor-sharp definition on the frosty design elements and the well-preserved surfaces show much prooflike reflectivity in the fields. NGC has graded five numerically finer examples (4/18). NGC ID# 254B, PCGS# 7135
- 4661** 1882-CC MS65 Deep Mirror Prooflike PCGS. Bright, reflective surfaces and deeply frosted devices combine for tremendous eye appeal on this Gem Deep Mirror Prooflike example. Hints of light rainbow rim toning accompany a number of minor die cracks. The strike is sharp, and only a few light abrasions and small marks exist on the mirrored fields and frosted portrait of Liberty. NGC ID# 254B, PCGS# 97135
- 4662** 1882-CC MS65 Deep Mirror Prooflike PCGS. VAM-3A. Dazzling field reflectivity, a bold strike, and a trace of tan-gold toning combine with exemplary preservation to ensure the eye appeal. The 1882-CC is among the more available Carson City Morgan dollar issues, but examples of the present quality are scarce. NGC ID# 254B, PCGS# 97135
- 4663** 1882-O/O VAM-7 MS65+ PCGS. A Top 100 Variety. The mintmark is widely repunched to the south on this high-end Gem 1882-O Morgan dollar, being the hallmark of the popular but conditionally elusive VAM-7 variety. This example is sharp and brilliant with vibrant cartwheel luster. A lone mark below Liberty's eye is all that prevents a finer grade from PCGS. NGC ID# 254C, PCGS# 133895 Base PCGS# 7136

**4664** 1882-S MS67+ PCGS Secure. From a large mintage of more than 9.2 million pieces, the 1882-S Morgan dollar is an available issue in high grade and a popular choice with branch mint type collectors. This Plus-graded Superb Gem offers sharply detailed design elements and virtually flawless surfaces, with subtle hints of pale gold toning. Vibrant mint luster adds to the terrific eye appeal. NGC ID# 254F, PCGS# 7140

**1883-CC Morgan Dollar, MS66+**  
**Spectacular Deep Prooflike Example**

**4665** 1883-CC MS66+ Deep Prooflike NGC. The 1883-CC Morgan dollar claims a mintage of 1.2 million pieces and most of the coins were held in government storage until the 1960s, providing collectors with a large supply of high-grade specimens to choose from. This Plus-graded Premium Gem exhibits sharply detailed, frosty design elements and deeply reflective prooflike fields. The surfaces are brilliant and impeccably preserved. Census: 36 in 66 (1 in 66+ Deep Prooflike, 1 in 66 ★), 5 finer (5/18). NGC ID# 254H, PCGS# 97145

**4666** 1883-S MS63 PCGS Secure. A sensational example of this conditionally scarce Morgan dollar issue that exhibits the usual grade-consistent marks on its brilliant and highly lustrous silver surfaces. Both sides are satiny and untoned. NGC ID# 254K, PCGS# 7148

**4667** 1883-S MS63 PCGS. The 1883-S is the missing link between the common 1882-S and the conditionally rare 1884-S. At the Select level, the 1883-S is a much better date. Apparently, prior San Francisco issues filled the vaults, so the '84-S mostly went into West Coast circulation. This brilliant and lustrous representative has clean fields and a good strike.  
Ex: Long Beach Signature (Heritage, 2/2007), lot 5486, which realized \$2,070. NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, MS64**  
**Rarely Offered Finer**

**4668** 1883-S MS64 PCGS. The 1883-S is a better date in all Uncirculated grades, but it is genuinely rare above MS64. This near-Gem displays brilliant satin luster and sharp design elements. A hint of reflectivity in the obverse fields adds to the eye appeal, despite scattered light marks that define the grade. NGC ID# 254K, PCGS# 7148

**4669** 1884 MS66+ PCGS Secure. CAC. The fields and devices are remarkably free of any marks or abrasions — entirely untoned — with flashy silver luster and a strong strike. More than 14 million pieces were struck, yet only 68 pieces have achieved a finer numeric grade from PCGS (4/18). We seldom offer an 1884 any finer. NGC ID# 254L, PCGS# 7150

**4670** 1884 MS66+ PCGS Secure. CAC. Beautiful, frosty mint luster covers each side of this high-end Premium Gem that is brilliant throughout the interiors with thin rings of gold and blue around the outer peripheries. The coin is well-struck and outstanding for the issue in all respects. Few finer pieces are known with a CAC endorsement. NGC ID# 254L, PCGS# 7150

**4671** 1884 MS65 Deep Mirror Prooflike PCGS. The 1884 was a high-mintage issue, but only a tiny percentage of Mint State pieces attain "dimple" status, and most such coins grade between MS62 and MS64. This is a brilliant and lustrous Gem with smooth, flashy fields and one minor strike-through on Liberty's lower cheek. Encapsulated in an old green-label holder. Population: 38 in 65 (1 in 65+) Deep Mirror Prooflike, 9 finer (4/18). NGC ID# 45WD, PCGS# 97151

**1884-CC Morgan Dollar, MS67**  
**Sharply Detailed and Impeccably Preserved**

**4672** 1884-CC MS67 PCGS Secure. The 1884-CC Morgan dollar was well-represented in the GSA sales of the 1970s and even at the MS67 grade level the issue can only be called scarce. However, the 1884-CC is extremely rare in finer grades. This spectacular Superb Gem exhibits sharply detailed design elements and impeccably preserved creamy surfaces, with vibrant mint luster throughout. PCGS has graded three numerically finer examples (4/18). NGC ID# 8BBF, PCGS# 7152

**1884-CC Silver Dollar, MS67**  
**Early Green Label Holder**  
**Exemplary Surface Quality and Luster**

**4673** 1884-CC MS67 PCGS. Not only are the fields flawless on this high-end Carson City dollar, but the devices also show almost no signs of contact. A sharp strike and frosty, unblemished luster are other hallmarks of this piece, and the only toning is a dusting of tan-gray color across the PLUR in PLURIBUS. A truly outstanding example, even for the MS67 grade level. Housed in an old green label holder.

*From The Tuxedo Park Collection.* NGC ID# 8BBF, PCGS# 7152

**4674** 1884-CC MS66 Prooflike PCGS. VAM-3. A thoroughly lustrous and essentially brilliant high-grade Carson City type coin. The centers show slight incompleteness of strike, but the preservation is outstanding. Very rare any finer with a Prooflike designation.

Ex: Dallas Signature (Heritage, 11/2005), lot 3230; Charlotte ANA Signature (Heritage, 3/2007), lot 1274, which realized \$1,150. NGC ID# 254M, PCGS# 7153

- 4675 1884-CC MS66 Deep Mirror Prooflike PCGS.** Rarely are Carson City Morgan dollars found with the dramatic contrast of this example. Both sides are brilliant with deeply mirrored fields and frosty devices that are akin to the characteristics of a Philadelphia proof. PCGS has only certified three finer DMPL examples of this Carson City issue (4/18). NGC ID# 254M, PCGS# 97153
- 4676 1884-CC MS66 Deep Mirror Prooflike PCGS. VAM-6.** Nearly 85% of the 1.1 million-piece mintage was released to the public during the GSA sales of the 1970s. Almost all of those coins were Uncirculated, or nearly so. Many were prooflike. While the 1884-CC is available in Deep Mirror Prooflike through the Gem grade, Premium Gems are scarce, and finer coins are extremely rare. This brilliant and sharply struck example has brightly mirrored surfaces and a few traces of wispy golden-gray patina. The devices exhibit thick mint frost and yield bold contrast with minimally marked, glassy fields. PCGS reports just three numerically finer Deep Mirror Prooflikes (4/18). NGC ID# 254M, PCGS# 97153
- 4677 1884-CC MS66 Deep Mirror Prooflike PCGS.** A brilliant Premium Gem, this Deep Mirror Prooflike Morgan dollar has sharply defined, lustrous devices that contrast with the mirrored fields. Only three numerically finer examples reside in PCGS holders (5/18). NGC ID# 254M, PCGS# 97153
- 4678 1884-O MS67 NGC.** The strike is pinpoint-sharp on both sides of this remarkably high-quality New Orleans dollar. Full hair details are equaled only by the eagle's sharpness from beak to talons. The obverse is nearly brilliant with a hint of orange toning at the top border, while the reverse displays brilliant centers with orange patina around the margin. NGC and PCGS each report just one numerically finer coin (5/18). NGC ID# 254N, PCGS# 7154
- 4679 1884-S AU58 PCGS.** Original russet and gold toning appears on each side of this near-Mint 1884-S dollar, attesting to the originality of the surfaces that still show cartwheel luster in the fields. This is the definition of a "slider," showing only a brush of friction over the high points of the devices with a few accompanying marks. Outstanding for the grade. NGC ID# 254P, PCGS# 7156
- 4680 1884-S AU58 NGC.** Virtually Mint State, this lovely 1884-S Morgan dollar has brilliant silver surfaces with reflective fields inside a frame of peripheral gold toning on the obverse. The reverse is equally lustrous but largely untoned. Neither side exhibits bothersome contact marks. NGC ID# 254P, PCGS# 7156
- 4681 1884-S AU58 NGC.** Much luster remains in the fields of this near-Mint example, along with distinctive semiprooflike reflectivity. Golden toning around the borders surrounds champagne interiors. This lightly marked better-date dollar exhibits only a brush of friction. NGC ID# 254P, PCGS# 7156
- 4682 1884-S AU58 NGC.** The lightly abraded surfaces of this impressive near-Mint specimen show much prooflike reflectivity on the obverse, while the reverse retains much of its original satiny mint luster. The strongly impressed design elements exhibit only a trace of wear. NGC ID# 254P, PCGS# 7156
- 4683 1884-S AU58 NGC.** The lightly abraded surfaces of this attractive near-Mint specimen retain much of their original mint luster and only a trace of wear is evident on the well-detailed design elements. From a mintage of 3.2 million pieces, the 1884-S is a better date in high grade. NGC ID# 254P, PCGS# 7156
- 4684 1884-S AU58 PCGS Secure.** Wisps of peripheral gold toning appear on the highly lustrous surfaces of this key Morgan dollar issue that enjoys strong demand in all grades. An important opportunity for the advanced collector. NGC ID# 254P, PCGS# 7156
- 4685 1884-S AU58 PCGS.** This impressive near-Mint specimen exhibits just a trace of high-point wear on the design elements and the lightly abraded brilliant surfaces retain much of their original mint luster. The 1884-S Morgan dollar is a challenging issue in Mint State, making nice AU58 examples a good balance of quality and value. NGC ID# 254P, PCGS# 7156
- 4686 1884-S AU58 NGC.** Whether large quantities were melted in the U.S. as authorized by the 1918 Pittman Act, or if much of the mintage was exported and melted in a foreign country, the fate of most 1884-S dollars is uncertain. Mint State examples remain scarce. This is a sharp and partially reflective near-Mint example, minimally abraded for the borderline Mint State grade. Faint silver-gray patina is secondary to nearly full mint luster. NGC ID# 254P, PCGS# 7156
- 4687 1884-S AU58 PCGS. VAM-3.** Years ago — before the advent of third-party grading — this 1884-S might have passed for Brilliant Uncirculated. Nearly full luster remains beneath a thin skin of yellow-gold toning with orange accents over semireflective surfaces. Magnification reveals a hint of rub above the ear and at the eagle's breast, plus a few light abrasions on Liberty's cheek. The mintmark is repunched within the upper and lower loops. NGC ID# 254P, PCGS# 7156
- 4688 1884-S AU58 PCGS.** A trace of high-point rub separates this highly lustrous Morgan key from the Mint State grade level. This near-Mint example has a hint of light gold toning but is essentially a brilliant-white silver dollar that would fit nicely in a Mint State collection of these popular coins. NGC ID# 254P, PCGS# 7156
- 4689 1884-S AU58 PCGS. CAC.** The original surfaces of this near-Mint 1884-S Morgan dollar display lustrous fields and traces of champagne toning. Well-struck devices show little friction, and the CAC green label is well-earned. No distracting abrasions are present. The 1884-S is a key date in Uncirculated condition and is widely collected in high-end AU grades. NGC ID# 254P, PCGS# 7156
- 4690 1884-S — Obverse Improperly Cleaned — NGC Details. Unc.** Were this coin numerically graded, it might have received a Prooflike designation. Both sides are reflective and well-struck. Golden toning is deeper on the obverse but enjoyable on the reverse as well. Under a loupe, faint hairlines identify a light cleaning. The 1884-S is scarce in Uncirculated condition.
- 4691 1885-CC MS66 NGC. VAM-3.** The exceptional preservation of this Carson City dollar is undoubtedly one of its leading qualities, but this coin's main draw is the spectacular multicolor toning that covers the obverse in shades of peach-orange, rose-violet, and ice-blue. Similar hues frame thickly frosted centers on the reverse. Strongly struck over the ear and breast. NGC ID# 254S, PCGS# 7160
- 4692 1885-CC MS66 PCGS. VAM-3.** The low-mintage 1885-CC has long been a favorite among Carson City collectors. This highly lustrous Premium Gem has an essentially immaculate reverse and only trivial obverse contact.  
*Ex: New York Signature (Heritage, 3/2012), lot 8358, which realized \$1,782.50. NGC ID# 254S, PCGS# 7160*
- 4693 1885-O MS67+ NGC. VAM-2.** The top flag of the 5 is narrowly repunched. Attractive sunset-orange toning graces the obverse of this high-end Superb Gem, while the reverse is entirely brilliant. The 1885-O is seldom seen so sharp, with smooth, unabraded fields and a clean cheek on Liberty. We note a solitary tiny tick on the jawline. Census: 18 in 67+, 21 in 67★, 2 in 67+★, 11 finer (4/18). NGC ID# 254T, PCGS# 7162

**1885-O Morgan Dollar, MS66  
Elusive Deep Mirror Prooflike Example**

**4694 1885-O MS66 Deep Mirror Prooflike PCGS.** Although the 1885-O Morgan dollar is plentiful in higher Mint State grades, examples with strong contrast are elusive. This brilliant piece has untoned silver surfaces with deeply mirrored fields around lustrous, well-detailed devices. Population: 55 in 66 (3 in 66+) Deep Mirror Prooflike, 1 finer (4/18). NGC ID# 254T, PCGS# 97163

**4695 1885-S MS65 PCGS Secure.** Sharp, frosty devices show only a few light grazes, and the fields are almost fully prooflike. This Gem 1885-S Morgan dollar is brilliant and highly appealing. Examples are usually available in MS65 for a price, but few pieces are known with reflective fields. NGC ID# 254U, PCGS# 7164

**4696 1885-S MS65 PCGS.** A lovely Gem, this 1885-S Morgan dollar enjoys frosty silver luster and minimal grade-consistent marks that are inconsequential. PCGS has only certified 61 finer examples (5/18). NGC ID# 254U, PCGS# 7164

**4697 1885-S MS65+ PCGS Secure. CAC.** A well-struck, high-end Gem example of this conditionally elusive San Francisco issue, showing brilliant surfaces and vibrant cartwheel luster. Other than a few minute ticks on Liberty's cheek, the preservation is nearly flawless. CAC-approved and fully deserving of that recognition. NGC ID# 254U, PCGS# 7164

**4698 1885-S MS64 Prooflike PCGS.** The 1885-S is a scarce issue in the Prooflike category and is prohibitively rare as a Deep Mirror Prooflike. This near-Gem coin displays brilliant luster and white-on-black cameo contrast. The design elements are well-struck and no distracting abrasions are seen. Population: 58 in 64 (2 in 64+) Prooflike, 13 finer (including a lone Deep Mirror Prooflike coin, in MS65) (5/18). NGC ID# 254U, PCGS# 7165

**4699 1886 MS67+ NGC.** Spectacular highlights of golden-brown and violet toning blanket the well-preserved obverse surface of this Plus-graded Superb Gem, while the reverse remains essentially brilliant. The design elements are sharply detailed and both sides radiate vibrant mint luster. NGC has graded 31 numerically finer examples (5/18). NGC ID# 254V, PCGS# 7166

**4700 1886-O MS61 NGC.** The 1886-O is a better New Orleans issue in Mint State despite a mintage in excess of 10.7 million coins. This piece displays tan-gold toning and frosty luster. No major abrasions are visible, although a loupe reveals faint lines on each side that limit the grade. Expected strike weakness affects the centers. NGC ID# 254W, PCGS# 7168

**4701 1886-O MS61 NGC.** Original luster creates a nice cartwheel effect on this Mint State 1886-O Morgan dollar, showing traces of champagne toning overall. Grade-limiting abrasions are light and remarkably unobtrusive. Save for a touch of strike weakness on the central high points, this better-date New Orleans dollar is quite exceptional for the grade. NGC ID# 254W, PCGS# 7168

**4702 1886-O MS61 PCGS.** The 1886-O is a challenging issue in high grade. This impressive Mint State specimen exhibits well-detailed design elements, with a trace of the usual softness on the hair above the ear. The lustrous surfaces show the expected number of minor contact marks for the grade. NGC ID# 254W, PCGS# 7168

**4703 1886-O MS61 PCGS.** The obverse exhibits subdued grayish toning over its silver luster with blue, violet, gold, and champagne toning intermingled on the reverse. NGC ID# 254W, PCGS# 7168

**4704 1886-O MS62 NGC.** A well-struck example of this New Orleans issue, showing brilliant surfaces with characteristically satin mint luster. A few light handling marks limit the grade, but none are individually bothersome. Pleasing for the MS62 grade level. NGC ID# 254W, PCGS# 7168

**4705 1886-O MS62 PCGS Secure.** This is a vibrantly lustrous Mint State example with well-struck design elements and wisps of light golden toning. Abrasions on Liberty's cheek limit the grade. The 1886-O comes from a mintage of more than 10.7 million pieces but is a slightly better date in Uncirculated condition. NGC ID# 254W, PCGS# 7168

**4706 1886-O MS62 PCGS.** The high-mintage 1886-O is plentiful in VF but unexpectedly scarce in Mint State. Gems are extremely rare. Lustrous and nicely struck with only minor marks for the MS62 level. Brilliant aside from a few infrequent and minute specks of patina. NGC ID# 254W, PCGS# 7168

**4707 1886-O MS62 PCGS.** A high-mintage issue, the 1886 New Orleans silver dollar did not appear in quantity in the Treasury release that occurred just over half a century ago. Rather, nearly all of the mintage entered circulation. As a result, few Mint State examples survive, and they are always in demand. One such piece is this MS62 coin that has frosty silver mint luster with peripheral gold and delicate blue toning. NGC ID# 254W, PCGS# 7168

**4708 1886-S MS65 PCGS Secure.** This sharp, untoned Gem has frosty, glistening devices and mirrored fields. There is a hint of contrast on each side, just missing a Prooflike designation. Under a loupe, a few unobtrusive abrasions are visible, mainly on Liberty's cheek. Higher-grade 1886-S dollars are scarce. NGC ID# 254X, PCGS# 7170

**4709 1886-S MS65 PCGS.** This mostly brilliant example has smooth, highly lustrous surfaces. Well-struck with no singularly mentionable abrasions, though roller marks are present on the cheek. PCGS has graded 55 numerically finer examples (5/18).  
Ex: Central States Signature (Heritage, 5/2005), lot 9635; FUN Signature (Heritage, 1/2007), lot 7091. NGC ID# 254X, PCGS# 7170

**1887/6-O Silver Dollar, MS64  
Important Condition Rarity**

**4710 1887/6-O VAM-3 MS64 PCGS.** A Top 100 Variety. A tail from the underlying 6 is visible at the lower right curve of the 7 on this important variety that is rarely encountered in higher grades. In fact, PCGS has certified just eight of these with a finer MS64+ designation, and only one example that is numerically finer, graded MS65 (5/18). The opportunity to acquire a Choice Mint State example such as the present piece is rare indeed. This lovely dollar has frosty silver mint luster and a trace of champagne toning on each side. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

- 4711 1887-O MS65 PCGS.** The 1887-O can be obtained without obstacle in lesser Mint State grades, but Gems are surprisingly scarce, although less so than its 1886-O predecessor. The present lustrous and virtually snow-white example displays only inoffensive contact. The strike is shy of complete, as usual for New Orleans coins of the era. NGC ID# 2547, PCGS# 7176

**1887-O Morgan Dollar, MS65+  
Conditionally Rare in Finer Grades**

- 4712 1887-O MS65+ PCGS.** The 1887-O Morgan dollar was produced in large numbers and the issue can be located in MS65 condition without much difficulty, but finer coins are rare. This Plus-graded Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces with highlights of greenish-gold and lavender toning. PCGS has graded 14 numerically finer examples (4/18). NGC ID# 2547, PCGS# 7176

- 4713 1887-S MS65 PCGS Secure.** This brilliant Gem is semiprooflike and well-preserved. The centers are weakly struck, but the eye appeal remains strong. The 1887-S Morgan dollar is available in this grade but elusive finer. Almost no Prooflike or Deep Mirror Prooflike coins are listed in MS65 or better condition at PCGS (4/18). NGC ID# 2554, PCGS# 7180

- 4714 1887-S MS65 PCGS Secure.** This Gem 1887-S dollar is mainly brilliant, although splashes of amber, sea-green, and violet toning appear around portions of the peripheries. The coin is well-struck and has satiny, unabraded surfaces. Finer 1887-S dollars are scarce, although pieces in this grade are readily collectible. NGC ID# 2554, PCGS# 7180

- 4715 1888 MS66+ PCGS. CAC.** Vibrant luster illuminates color-free surfaces on this high-end Premium Gem. The hair above Liberty's ear is well-struck, although the eagle's breast is slightly soft. A few light, insignificant grazes take away nothing from the coin's pleasing eye appeal.

Ex: FUN Signature (Heritage, 1/2014), lot 5790, which realized \$1,762.50. NGC ID# 26KF, PCGS# 7182

- 4716 1888-O MS66 PCGS. VAM-12.** Round O. A vivid crescent of sea-green and magenta toning highlights the lower-right obverse of this memorable Premium Gem, while the rest of the coin remains essentially brilliant. The well-preserved surfaces are lustrous and appealing. While the 1888-O is not difficult to locate in MS66 condition, PCGS has graded no coins in higher numeric grades (4/18). NGC ID# 2556, PCGS# 7184

- 4717 1888-S MS65 NGC.** A sharply detailed Gem representative of this low-mintage, better date, with well-preserved surfaces and vibrant mint luster on both sides. NGC has graded 14 numerically finer examples (5/18). NGC ID# 2557, PCGS# 7186

- 4718 1888-S MS65 PCGS.** The 1888-S Morgan dollar is a better date in Gem condition and scarce finer. This piece is well-struck and semiprooflike, showing radiant cartwheel luster and just a few wisps of golden border toning. Liberty's cheek is clean, but a few light marks appear in the left obverse field. Housed in a first generation holder.

*From The Tuxedo Park Collection.* NGC ID# 2557, PCGS# 7186

- 4719 1888-S MS65 PCGS.** The 1888-S Morgan dollar is rarely seen finer than the currently offered Gem example. This piece is radiantly lustrous with a touch of semiprooflike mirroring in the fields and a tinge of light golden color throughout. The hair above Liberty's ear is a trifle soft. PCGS has seen 36 numerically finer submissions (4/18).

Ex: Long Beach Signature (Heritage, 9/2013), lot 5751; FUN Signature (Heritage, 1/2014), lot 5800; FUN Signature (Heritage, 7/2015), lot 4251. NGC ID# 2557, PCGS# 7186

**1889 Silver Dollar, Frosty MS66+  
Beautiful, Shimmering Mint Luster**

- 4720 1889 MS66+ PCGS Secure. CAC.** The 1889 Morgan dollar is plentiful in MS66 but rare finer. PCGS lists six Superb Gem non-Prooflike coins that are finer, plus three Prooflike and four Deep Mirror Prooflike pieces in MS66 with none finer (5/18). This Plus-designated, CAC-approved non-Prooflike Premium Gem displays frosty, untoned mint luster and a clean cheek. Trivial strike softness is visible on the hair above Liberty's ear. NGC ID# 2558, PCGS# 7188

- 4721 1889-CC VF30 PCGS Secure.** Carson City specialists and those working on a mid-grade set of Morgan dollars will want to pay special attention to this wonderfully original 1889-CC. Rich and attractive deep-lavender and gray toning is evenly dispersed across smooth surfaces that show only microscopic signs of circulation other than moderate wear. The rims, fields, and devices are nearly perfect for the VF30 grade. NGC ID# 2559, PCGS# 7190

- 4722 1889-CC XF40 NGC.** A pleasing, problem-free collector-grade example of this key Carson City issue, showing uniform pewter-gray patina and lightly worn, well-detailed design elements. The 1889-CC is the scarcest of the Carson City Morgans overall, and high-end circulated pieces are in constant demand. NGC ID# 2559, PCGS# 7190

- 4723 1889-CC — Cleaned — PCGS Secure Genuine. XF Details.** The borders and wings display ample luster, but the pearl-gray surfaces reveal hairlines when inspected beneath a lens. Marks are relatively few, though we note a brief narrow horizontal depression on the cheek. Key to the Carson City Morgan series.

*From The Bob Williams Collection.*

**1889-CC Morgan Dollar, XF45  
Sought-After Branch Mint Key**

**4724 1889-CC XF45 PCGS.** The 1889-CC is the most elusive Morgan dollar from the Carson City Mint, with a reported mintage of 350,000 pieces. This pleasing Choice XF specimen shows some light wear on the well-detailed design elements and the surfaces are lightly abraded, aside from a short gouge in Liberty's neck and a scrape near the second U in UNUM. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, XF45+  
Excellent Detail for the Grade**

**4725 1889-CC XF45+ PCGS Secure.** The 1889-CC holds the distinction of being not only a key date in the Morgan dollar series, but of being one of the most well-known and sought-after issues in all of American numismatics. Both sides are light silver with merging over the highest points, namely the middle curls and breast feathers. Marks are thin and superficial. The only larger abrasion occurs below Liberty's eye. On the absolute edge of an AU assessment. NGC ID# 2559, PCGS# 7190

**4726 1889-CC — Cleaned — NGC Details. AU.** A lightly abraded example of this challenging Carson City Mint issue, from a small mintage of 350,000 pieces. The design elements were strongly impressed and show just a trace of wear and the satiny surfaces show traces of prooflike reflectivity, despite the noted cleaning. NGC ID# 2559, PCGS# 7190

**4727 1889-S MS65+ PCGS Secure. CAC.** An outstanding representative from a modest mintage of just 700,000 pieces. Although not rare at the grade level, examples are elusive with so much eye appeal. This piece has frosty luster, sharp design motifs, and untoned silver surfaces. NGC ID# 255B, PCGS# 7194

**4728 1890 MS65 Prooflike NGC.** NGC has handled nearly 20,000 1890 Morgan dollars since its inception, but only a few hundred pieces have shown the traits required for a Prooflike assessment. This brilliant Gem, among the finest Prooflike examples at that service, exhibits faint golden overtones. Bold contrast exists between the frosted motifs and glassy fields. Census: 4 in 65 Prooflike, 0 finer (4/18). NGC ID# 255C, PCGS# 7197

**4729 1890-CC MS64 PCGS. VAM-3.** Rich navy-blue, lavender-red, and golden-brown hues consume the obverse. The reverse exhibits peripheral bands of russet, aquamarine, and plum-red. The lustrous surfaces are exceptionally unabraded, even for the MS64 level. A desirable scarcer-date Carson City dollar.  
*Ex: FUN Signature (Heritage, 1/2010), lot 2959, which realized \$1,322.50. NGC ID# 255D, PCGS# 7198*

**4730 1890-CC MS64 PCGS. VAM-3.** The 90 in the date is repunched southwest. A lustrous and brilliant example of this scarcer Carson City issue. The obverse field is well-preserved, though the cheek displays grazes commensurate with the grade. Certified in a green-label holder. NGC ID# 255D, PCGS# 7198

**1890-CC Morgan Dollar, MS65  
Sharply Detailed, Lustrous Specimen**

**4731 1890-CC MS65 PCGS Secure.** The 1890-CC Morgan dollar claims a substantial mintage for a Carson City issue, at more than 2.3 million pieces. The 1890-CC is somewhat scarce in MS65 condition and finer coins are condition rarities. This attractive Gem is sharply detailed throughout and the well-preserved, creamy surfaces are lustrous and appealing. PCGS has graded 16 numerically finer examples (4/18). NGC ID# 255D, PCGS# 7198

**1890-CC Morgan Dollar, Toned MS65  
Outstanding Surfaces and Eye Appeal  
Ex: Eliasberg**

**4732 1890-CC MS65 PCGS Secure. Ex: Eliasberg.** Attractive blue and amber-gold toning visits both sides of this sharply struck 1890-CC. While most survivors of the 2.3 million-piece mintage show an indifferent strike and numerous bagmarks, this Gem example displays essentially mark-free fields. Close examination with a lens reveals a clear cheek on Liberty, and just a few tiny contact marks hidden within the hair strands. Mint luster illuminates the delightful toning and frosted motifs. PCGS reports just 16 numerically finer examples (5/18). NGC ID# 255D, PCGS# 7198

**1890-CC Morgan Dollar, MS65  
Old Green Holder, Clean Cheek**

**4733 1890-CC MS65 PCGS.** Housed in an old green label holder, this Gem 1890-CC Morgan dollar is frosty and vibrantly lustrous, showing remarkably clean surfaces even for the MS65 grade. Mild strike weakness is visible on the eagle's breast and the hair above Liberty's ear, but such is typical of the 1890-CC. The ear and cheek have a couple of golden toning areas, but the remainder of the coin is frost-white. PCGS lists 16 numerically finer non-Prooflike pieces (4/18).

*From The Tuxedo Park Collection.* NGC ID# 255D, PCGS# 7198

**4734 1890-CC Tail Bar, VAM-4, MS62 NGC.** A Top 100 Variety. A mere wisp of chestnut toning visits this otherwise stone-white Carson City dollar. Lustrous and well-struck with moderate contact on the cheek. This famous VAM shows a broad die scratch or "bar" below the left border of the eagle's tail. VAM-4 is arguably the most easily attributed variety of the series, since the "bar" can be seen at arm's length. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

**1890-CC 'Tail Bar' Dollar, MS63+  
VAM-4, Top 100 Variety**

**4735 1890-CC Tail Bar, VAM-4, Top 100, MS63+ NGC.** A Top 100 Variety. A massive die gouge — visible at arm's length — connects the lowest fletching to the leaves below and gives this R.5 variety its "Tail Bar" moniker. Finer examples are difficult to locate, appearing only a couple of times a year at auction. This high-end Select CC dollar is frosty and brilliant. Diagonal roller marks appear on each side, though the breast feathers are still strongly detailed. A few trivial marks in the left obverse field barely limit the grade. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

**4736 1890-O MS64 Deep Mirror Prooflike PCGS.** The glimmering fields provide modest cameo contrast on this near-Gem, while the frosty devices show only trivial strike weakness. A few light marks are not distracting. Neither side of this 1890-O dollar shows toning. Deep Mirror Prooflike examples of this issue are moderately elusive, and PCGS lists only 23 such pieces finer than the present (5/18). NGC ID# 255E, PCGS# 97201

**4737 1890-S MS65 Prooflike NGC.** The design elements of this Gem Morgan dollar are sharply detailed, with vibrant frosty luster, while the fields are deeply reflective throughout. Some minor contact marks and hairlines are evident on close inspection, but overall eye appeal is outstanding. Census: 11 in 65 (1 in 65★) Prooflike, 1 finer (4/18). NGC ID# 255F, PCGS# 7203

**4738 1890-S MS64 Deep Mirror Prooflike NGC.** The 1890-S is challenging with either Prooflike or Deep Prooflike designation. This Choice Uncirculated example is Deep Prooflike, with well-mirrored fields and frost-white devices. The grade falls short of full Gem condition only because a few light abrasions and a couple of small, foggy areas exist on the obverse. Census: 30 in 64 Deep Mirror Prooflike, 7 finer (5/18). NGC ID# 255F, PCGS# 97203

**4739 1891 MS65 PCGS.** Although the 1891 Philadelphia Morgan dollar issue is available up to the Gem level of the present example, higher-graded coins are virtually nonexistent; both NGC and PCGS report precisely three submissions each in MS66 or higher (5/18). The finest is a lone MS67 at PCGS. This piece boasts superior luster and strike on pastel-toned surfaces with top-notch eye appeal. One single nick on the side of the eagle's breast is consistent with the grade. NGC ID# 255G, PCGS# 7204

**4740 1891-CC MS63 Deep Mirror Prooflike PCGS.** The deeply reflective surfaces of this attractive Select Deep Mirror Prooflike coin show some scattered, minor contact marks, and the well-detailed, frosty design elements exhibit a touch of the usual blending on the hair above the ear. PCGS has graded 69 numerically finer examples (5/18). NGC ID# 255H, PCGS# 97207

**1891-CC Dollar, MS65  
VAM-3, 'Spitting Eagle'**

**4741 1891-CC Spitting Eagle, VAM-3, Top 100, MS65 NGC.** A Top 100 Variety. The thick mint luster that covers each side shows only a few small, inoffensive abrasions. The coin is largely snow-white throughout, with design elements that show trivial softness in the centers. VAM-3 is a popular and widely collected Carson City VAM variety, with a small die lump in the field below the eagle's beak. Ex: *Dallas Signature (Heritage, 11/2007)*, lot 1250, which realized \$2,760. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**1891-CC Silver Dollar, MS65  
VAM-3, 'Spitting Eagle' Variety**

**4742 1891-CC Spitting Eagle, VAM-3, Top 100, MS65 PCGS.** A Top 100 Variety. A small die lump in the field near the opening of the eagle's beak earns this popular variety the "Spitting Eagle" moniker, although recutting on the first C in the mintmark is arguably a more interesting feature. This piece is frosty and well-struck with a clean cheek on Liberty. Aquamarine and orange-gold toning appears in small, localized amounts on each side amid otherwise bone-white coloration. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**1891-CC ‘Spitting Eagle’ Dollar, MS65  
VAM-3, A Top 100 Variety**

**4743** 1891-CC Spitting Eagle, VAM-3, Top 100, MS65 PCGS. A Top 100 Variety. A frosty, untoned Gem example of this important VAM variety, showing well-struck devices and a vibrant cartwheel effect. A few light grazes on Liberty's cheek and in the field prevent an even finer grade. VAM-3 is scarce in high grade. Population (VAM-3): 23 in 65 (2 in 65+), 2 finer (5/18). NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**4744** 1891-CC Spitting Eagle, VAM-3, MS63 Deep Mirror Prooflike PCGS. A Top 100 Variety. Though the die lump beneath the beak attracts all the attention, VAM-3 also exhibits repunching on the top of the first C in the mintmark. The variety is plentiful except with Deep Mirror Prooflike surfaces. A brilliant better-date Carson City dollar with a good strike and a grade-limiting mark beneath the left ribbon end. Population: 7 in 63 Deep Mirror Prooflike, 5 finer (4/18). NGC ID# 255H, PCGS# 43505 Base PCGS# 97207

**1891-O Silver Dollar, MS65  
Clean Cheek, Early Green Label Holder**

**4745** 1891-O MS65 PCGS. This Gem 1891-O Morgan is frosty and untoned, showing vibrant cartwheel luster. Liberty's cheek is clean, and a loupe reveals only a few faint field grazes. Strike weakness on the central high points likely contributes to a seemingly conservative grade, although the 1891-O is well-known to come weakly struck. Gems are scarce and finer pieces are unknown at PCGS (4/18). Housed in an old green label holder.

*From The Tuxedo Park Collection.* NGC ID# 255J, PCGS# 7208

**4746** 1892 MS65 PCGS Secure. A lovely Gem from a mintage that just broke the million-coin mark, this dollar has frosty mint luster and brilliant, untoned silver surfaces. An elusive issue in higher grade, PCGS has only certified eight numerically finer examples (5/18). NGC ID# 255L, PCGS# 7212

**4747** 1892-CC MS62 PCGS Secure. VAM-10. A misplaced date variety with the upper curve of a 9 or 2 digit emerging from the dentils between the 92. This brilliant scarcer-date Carson City dollar offers vibrant luster and a good strike. The reverse displays only incidental contact, while the cheek and obverse field exhibit distributed wispy marks.

*From The Bob Williams Collection.* NGC ID# 255M, PCGS# 7214

**4748** 1892-CC MS62 PCGS Secure. CAC. VAM-4B. The mintmark is lightly repunched, and the N in IN is multiply clashed. Lustrous and brilliant with minor incompleteness of strike in the centers. Moderate obverse grazes correlate to the grade. A better Carson City issue. CAC has confirmed only 86 pieces as MS62 (5/18). *From The Bob Williams Collection.* NGC ID# 255M, PCGS# 7214

**4749** 1892-CC MS63 PCGS Secure. An untoned, frosty Select example of this late Carson City issue, showing uncommonly well-struck centers and pleasing eye appeal for the grade. Scattered light abrasions are mainly visible on the obverse and pose little distraction. NGC ID# 255M, PCGS# 7214

**4750** 1892-CC MS64 PCGS. Liberty's cheek is mostly clean on this near-Gem 1892-CC dollar. The strike is above-average, and wisps of tan-gold toning in the left obverse field are the only evidence of notable color. This issue becomes increasingly scarcer in finer grades. NGC ID# 255M, PCGS# 7214

**4751** 1892-CC MS64 PCGS. Natural shades of pinkish-gray toning visit the lightly marked surfaces of this pleasing Choice example, with strong mint luster and sharply detailed design elements underneath. The 1892-CC Morgan dollar is always popular because of the charismatic CC mintmark. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64  
Bright and Frosty**

**4752** 1892-CC MS64 PCGS Secure. A single 1892-CC Morgan dollar was distributed as part of the GSA release. Most examples were paid out from the 1920s through the mid-1950s. This Choice representative is wholly brilliant with vibrant, frosty luster. A touch of strike softness over the ear is normal. The eagle's breast and talons are fully formed. Faint clashmarks appear in front of Liberty's mouth and neck. About 10 grade points higher than the typical survivor. NGC ID# 255M, PCGS# 7214

**4753** 1892-CC MS63 Prooflike NGC. The 1892-CC Morgan dollar is a scarce issue in MS63 condition and with prooflike surfaces. This attractive Select specimen offers sharply detailed design elements and reflective prooflike fields with the expected number of scattered, minor contact marks for the grade. Census: 82 in 63 (1 in 63★) Prooflike, 57 finer (4/18). NGC ID# 255M, PCGS# 7215

**1892-O Morgan Dollar, MS65  
Well-Preserved, Brilliant Surfaces**

**4754 1892-O MS65 PCGS Secure.** The 1892-O Morgan dollar can be located in MS65 condition with a little patience, but finer examples are prime condition rarities. This impressive Gem offers well-detailed design elements, with just a touch of the usual softness on the hair above the ear. The well-preserved, brilliant surfaces are lustrous and appealing. PCGS has graded six numerically finer examples (4/18). NGC ID# 255N, PCGS# 7216

**4755 1892-S AU50 PCGS.** Hints of russet toning grace the borders of this otherwise untoned AU example. Light wear leaves significant detail on the devices from a sharp strike. The 1892-S is a semikey date in the Morgan dollar series. The date is rare in Uncirculated condition but collectible in AU grades. NGC ID# 255P, PCGS# 7218

**4756 1892-S AU53 PCGS.** A pleasing AU53 example of this better-date Morgan dollar, with minor wear on the design elements and lightly abraded surfaces that retain some original mint luster. Neither side exhibits significant toning. NGC ID# 255P, PCGS# 7218

**4757 1892-S AU53 PCGS.** Glimpses of prooflike surface remain at the margins of this About Uncirculated 1892-S. The untoned, silver-gray surfaces show numerous light marks including a cluster of nicks on Liberty's cheek, but there are no heavy abrasions. The strike is characteristically soft over the ear, but otherwise sharp given its brief time in circulation. NGC ID# 255P, PCGS# 7218

**4758 1892-S AU53 NGC. CAC.** From a smallish mintage of 1.2 million pieces, the 1892-S Morgan dollar is a challenging issue in high grade. This satiny AU53 specimen offers well-detailed design elements, with just a touch of wear, and lightly abraded surfaces with hints of rose toning. NGC ID# 255P, PCGS# 7218

**4759 1892-S AU53 PCGS. CAC.** The 1892-S failed to turn up in any large quantity during the Treasury release of the early 1960s, alerting collectors to its elusive nature, especially in high grades. This pleasing AU53 dollar enjoys CAC approval for its quality within the grade. Glimmers of peripheral peach patina cede to stone-gray fields and centers. A trace of friction over the high points is expected, but design detail remains bold.  
*Ex: Paul H. Gerrie Collection / Central States Signature (Heritage, 4/2016), lot 5233, which realized \$2,232.50.* NGC ID# 255P, PCGS# 7218

**4760 1893 MS63 NGC.** The strike is a trifle soft on this piece, but otherwise it is outstanding for the grade. Untoned surfaces are frosty and only lightly marked, and a vibrant cartwheel effect appears on each side. The 1893 Morgan dollar is a semikey in high grade due to its small mintage of 378,000 coins. NGC ID# 255R, PCGS# 7220

**4761 1893 MS63 PCGS Secure.** Some wisps of russet toning appear in the left-obverse margin, but this Select 1893 Morgan dollar is otherwise brilliant and vibrantly lustrous. The coin is well-struck and shows limited abrasions for the grade. Only 378,000 pieces were struck. NGC ID# 255R, PCGS# 7220

**4762 1893 MS63 PCGS. VAM-2.** Mintages of silver dollars at Philadelphia declined annually between 1889 and 1895, and the 1893 production was less than 400,000 pieces. This lustrous representative displays medium chestnut-gold toning on the obverse. The reverse has only a hint of tan patina. NGC ID# 255R, PCGS# 7220

**4763 1893 MS63 PCGS Secure.** The financial Panic of 1893 quickly cooled an overheated U.S. economy, although many critics blamed the Sherman Silver Purchase Act and an overabundance of silver dollars sitting unwanted and unused at the Treasury. This scarce Select Uncirculated 1893 was one of just 389,000 pieces struck during the year. Brilliant surfaces display a sharp strike, flashy cartwheel luster, and only a few minor abrasions. A splash of pale-almond toning sits above the eagle's left wing. NGC ID# 255R, PCGS# 7220

**4764 1893-CC XF40 NGC.** Always in demand as the final issue from the famous Carson City Mint, the 1893-CC Morgan dollar is a challenging issue in high grade. This lightly worn, lightly abraded XF specimen is blanketed in shades of lavender-gray and amber toning. NGC ID# 255S, PCGS# 7222

**4765 1893-CC XF45 PCGS.** Pockets of luster outline design elements on this silver-gray semiky Carson City Morgan. The centers display moderate wear. Mentionable marks are limited to a thin line from the 8 in the date to the rim at 4 o'clock. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan, AU53  
Slightly Reflective Fields**

**4766 1893-CC AU53 PCGS Secure.** Although lightly worn, this About Uncirculated final-year Carson City dollar displays semiprooflike reflectivity in the fields, along with orange-gold border toning. Weakness on the eagle's breast and the hair above Liberty's ear is a combination of wear and strike; the 1893-CC is famously weak in the centers more often than sharp, which can affect how circulated pieces are graded in VF and XF levels. This AU coin is attractive with light golden toning near the rims. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, AU53  
Final Carson City Issue**

**4767 1893-CC AU53 NGC. VAM-4.** Only a single GSA 1893-CC is known, and it is certified by NGC as XF40. Although Carson City dollars from the 1880s were saved in bag quantity in Treasury vaults, the 1893-CC mostly entered circulation. The typical example is a cleaned VF. This untoned AU53 representative retains much of its initial luster, though the strike is incomplete and the centers exhibit minor wear. No marks are of singular consequence. The top of the 3 in the date is lightly repunched. NGC ID# 255S, PCGS# 7222

- 4768** 1893-CC AU55 PCGS Secure. VAM-3. The 3 is lightly doubled outside the top loop, and the eye shows slight doubling at its front. This Choice About Uncirculated example is mostly prooflike and entirely untoned. Faint field chatter and friction-like lines account for the assigned grade, with a hint of rub over the highest points of the hair and the eagle's breast. The strike is sharp on both sides. *From The Bob Williams Collection.* NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, Bright AU58  
Frosty Luster Remains**

- 4769** 1893-CC AU58 NGC. All four 1893 Morgan dollar issues are better dates in the series, and all have low, six-figure mintages. The 1893-CC represents the final year of production for the Carson City facility, and only 677,000 examples were struck before the branch mint shuttered its doors. This nearly Uncirculated dollar boasts frosty remaining luster and strong, virtually unworn devices. Each side is bright silver with minimal shallow grazes. NGC ID# 255S, PCGS# 7222

- 4770** 1893-O AU58 PCGS Secure. VAM-3A. The date slants upward, but of greater specialist interest is the clashed N in front of Liberty's neck. The 1893-O has the lowest mintage of any New Orleans Morgan issue. The present piece is virtually Mint State, since cartwheel luster is abundant and the breast feathers show barely a whisper of wear. Brilliant save for light peripheral golden patina. NGC ID# 255T, PCGS# 7224

**1893-O Morgan Dollar, MS62  
Scarce in Mint State**

- 4771** 1893-O MS62 PCGS. The 1893-O is the lowest-mintage Morgan dollar from the New Orleans Mint (just 300,000 pieces produced). It is considered scarce in Mint State because of the low mintage and, like several O-Mint issues, is often lightly struck with average luster. This appealing dollar is an exception, displaying nice luster throughout the frost-white surfaces and an above-average strike. A few minor abrasions confirm the grade. NGC ID# 255T, PCGS# 7224

- 4772** 1893-S Good 4 PCGS Secure. The date and mintmark are unmistakable on this key Morgan issue. The obverse is chiefly cream-gray, and the reverse field shows charcoal shades. The central reverse displays traces of residue, and a minor reverse rim ding is at 4 o'clock. NGC ID# 255U, PCGS# 7226

- 4773** 1893-S — Tooled — PCGS Genuine. Good Details. VAM-1. The obverse field is smoothed near Liberty's chin and the M in UNUM. An opportunity to secure a less-costly example of the famous Morgan dollar key. All of the legends are bold. The mintmark is filled but well-outlined. Both sides display light apricot toning.

- 4774** 1893-S — Cleaning — PCGS Genuine. VG Details. VAM-1. Deep ebony and golden-brown patina encompasses this key date Morgan dollar. The legends are clear and the dentils are sharp for the VG level, particularly on the reverse. A couple of thin field marks are noted beneath GOD and east of the left-side obverse stars.

- 4775** 1893-S — Harshly Cleaned — PCGS Secure Genuine. VG Details. VAM-1. The slate-gray surfaces are hairlined, and a few unimportant marks are noted near Liberty's eye. All the legends are bold and the eagle displays considerable plumage. Most Morgan dollar collectors can recite the mintage of the 1893-S from memory: 100,000 pieces, lowest among commercial issues of this widely collected series.

*From The Bob Williams Collection.*

**1893-S Silver Dollar, Fine 12  
Problem-Free Surfaces**

- 4776** 1893-S Fine 12 PCGS. VAM-1. Problem-free collector-grade 1893-S Morgans are seldom seen. Most examples with Fine details are cleaned or damaged in some manner, but the present key date dollar has appealing pearl-gray surfaces and retains a majority of its wing plumage. The only mentionable marks are a narrow hit on Liberty's jaw and a thin line concealed in the hair east of the earlobe. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, Fine 12  
Heralded San Francisco Rarity**

- 4777** 1893-S Fine 12 PCGS. The 1893-S is the lowest-mintage issue in the Morgan dollar series with only 100,000 coins struck. It is also one of the rarest overall. To be sure, the 1893-S is the most famous key date. Many examples are impaired, but this well-circulated survivor maintains natural silver-gray surfaces. The high points are smooth, though plenty of detail remains with the lowest curls and the eagle's lower wing feathers. NGC ID# 255U, PCGS# 7226

---

**1893-S Morgan Dollar, VF20  
Low-Mintage Series Key**

**4778** 1893-S VF20 NGC. A pleasing VF20 example of this key date Morgan dollar, from the lowest business-strike mintage of the series. The 1893-S is typically seen in the VF-XF grade range. This attractive specimen shows moderate wear on the devices, with two-thirds of the hair lines still visible in Liberty's curls. The lightly abraded surfaces are blanketed in low-intensity shades of pale pink toning. NGC ID# 255U, PCGS# 7226

---

**1893-S Silver Dollar, XF Details**

**4779** 1893-S — Cleaned — PCGS Genuine. XF Details. VAM-2. Faint hairlines cross both sides, but the stone-gray surfaces display noticeable luster, and the surfaces are only lightly abraded. The eagle's breast and the hair above the ear exhibit minor wear. The Panic of 1893, partly caused by the Sherman Silver Purchase Act, led to the repeal of that law and a low mintage for silver dollar issues of the era, most notably the 1893-S.

**4780** 1894 AU55 PCGS. One of the important Morgan dollars in all grades, this Choice AU example survives from the 1894 mintage of just 110,000 circulation strikes. The natural light gray surfaces retain nearly full luster and exhibit light peripheral gold toning. NGC ID# 255V, PCGS# 7228

**4781** 1894 AU58 NGC. The 1894 Morgan dollar is the rarest Philadelphia issue in the series among circulation strikes. This near-Mint example is brilliant and lustrous, showing light friction over the central high points with some marks in the fields. A small bluish toning spot appears near the final A in AMERICA, along the reverse rim. NGC ID# 255V, PCGS# 7228

---

**1894 Morgan Dollar, MS61  
Key Philadelphia Circulation Strike**

**4782** 1894 MS61 NGC. From a low Philadelphia Mint production of just 110,000 pieces, the 1894 Morgan dollar is prized by collectors in all grades and conditions. This attractive Mint State example is well-detailed and has lustrous surfaces that show the minimum number of contact marks for the grade. A few highlights of golden border toning add to the eye appeal. NGC ID# 255V, PCGS# 7228

---

**1894 Silver Dollar, MS61  
Low P-Mint Production**

**4783** 1894 MS61 PCGS. With a mintage of 110,000 pieces, the 1894 had the lowest mintage of any Philadelphia Morgan dollar known in circulation strike format. This brilliant example shows minimal, inconsequential marks on the frosty and fully lustrous surfaces. No toning is evident on either side. NGC ID# 255V, PCGS# 7228

---

**1894 Dollar, Brilliant MS63  
Well-Struck and Appealing**

**4784** 1894 MS63 PCGS. Satiny, untoned mint luster illuminates well-struck design elements on this lightly abraded 1894 Morgan dollar. Eye appeal is excellent for the grade, and this issue is often seen with a strike that is inferior to the sharpness of the present piece. The 1894 dollar comes from a mintage of 110,000 pieces — just 10,000 coins more than the series key, the 1893-S. NGC ID# 255V, PCGS# 7228

**1894 Silver Dollar, MS63  
Well-Preserved for the Grade**

**4785 1894 MS63 PCGS Secure.** This well-struck example is frost-white and vibrantly lustrous, showing a strong cartwheel effect. A few light luster grazes on the obverse limit the grade, but the reverse is several points finer by itself. This is easily one of the most appealing 1894 Morgan dollars that we have handled in MS63. NGC ID# 255V, PCGS# 7228

**4786 1894-O MS61 PCGS Secure.** The 1894-O is a better date in Uncirculated condition. This piece is moderately abraded but mainly on the obverse, with the reverse being virtually flawless. Vibrantly lustrous surfaces are brilliant. The centers show strike weakness as normal for New Orleans issues of the mid-1890s. NGC ID# 255W, PCGS# 7230

**4787 1894-O MS62 PCGS Secure.** The 1894-O is a slightly better date in Uncirculated condition. This piece displays vibrant mint luster and a dusting of golden color. Scattered abrasions and weakly struck centers fit in well with the grade. NGC ID# 255W, PCGS# 7230

**1894-O Silver Dollar, MS63  
Excellent Eye Appeal**

**4788 1894-O MS63 PCGS.** Typical of New Orleans dollars of the period, this example has strike weakness over Liberty's ear and on the eagle's breast. The surfaces exhibit the usual grade-limiting marks on each side. However, the combination of brilliant, frosty silver luster and delicate peripheral gold toning creates strong eye appeal that makes this example an ideal choice for a collector seeking an attractive 1894-O dollar at a reasonable price. NGC ID# 255W, PCGS# 7230

**4789 1894-S MS63 PCGS Secure.** This is an appealing example for the grade, showing softly frosted, untoned surfaces and well-struck design elements. Light contact marks over each side determine the grade but are not detracting. The 1894-S is a better date in Uncirculated condition, coming from a mintage of 1.26 million coins. NGC ID# 255X, PCGS# 7232

**4790 1894-S MS63 PCGS.** Although it is the most plentiful silver dollar dated 1894, this S-mint issue is scarce in its own right. Pearlescent silver-gray surfaces display orange-tan accents around the raised devices, with silver luster shining through. The 1894-S is often brilliant and untoned in mid- to upper-Uncirculated grades — this naturally toned Select Uncirculated example is a pleasing alternative. NGC ID# 255X, PCGS# 7232

**4791 1894-S MS64 PCGS.** Vibrant tobacco-brown, cherry-red, and navy-blue toning dominates the borders. The centers are stone-gray. The centers lack an absolute impression, but the overall strike is good. A coruscating near-Gem with smooth fields and original eye appeal.

*Ex: Long Beach Signature (Heritage, 2/2007), lot 5709, which realized \$1,380. NGC ID# 255X, PCGS# 7232*

**4792 1895-O AU53 PCGS. CAC.** This is an obviously original About Uncirculated example of this scarce New Orleans issue, blanketed in deep lilac-gray patina with glimpses of silver luster at the margins. Bits of old, deep-gray build-up remain around several devices and only minor marks exist. Bold rims add to the exceptional eye appeal. CAC endorsed. NGC ID# 255Y, PCGS# 7236

**4793 1895-O AU55 PCGS Secure.** From a small mintage of 450,000 pieces, the 1895-O is a challenging branch mint issue in the Morgan dollar series. This impressive Choice AU specimen displays much prooflike reflectivity in the fields, with the expected amount of minor chatter for the grade. Only a trace of wear is evident on the well-detailed design elements. NGC ID# 255Y, PCGS# 7236

**4794 1895-O AU55 PCGS Secure. VAM-3.** The top of the 5 is repunched. The 1895-O is the rarest New Orleans Morgan issue, despite a mintage 50% greater than the also elusive 1893-O. Most survivors are in VF or lesser grades, but the present piece displays substantial luster and shows only a whisper of wear in the centers. The untoned surfaces are moderately abraded. NGC ID# 255Y, PCGS# 7236

**4795 1895-O AU55 NGC.** Pale gray toning appears on the brilliant silver surfaces of this Choice AU Morgan semikey issue that exhibits nearly full luster and slight high-point wear. NGC ID# 255Y, PCGS# 7236

**1895-O Dollar, AU58  
Scarce Any Finer**

**4796 1895-O AU58 NGC.** Several factors conspire to make the 1895-O one of the more challenging emissions in the Morgan dollar set: the absence of a Philadelphia issue from 1895, a low mintage of 450,000 coins, and the issue's scarcity in Mint State. Satiny luster glows from the device recesses on this brilliant example. Detail is above-average for an O-mint dollar, and trivial friction is apparent. A few specks of color are noted near the eagle's left wing and the wreath below. NGC ID# 255Y, PCGS# 7236

**1895-O Silver Dollar, AU58**

New Orleans Key

- 4797 1895-O AU58 PCGS.** In VF, the 1895-O is key to a date collection of Morgan dollars. The 1895-S is rarer in circulated grades, but in Mint State, the 1895-O is much more difficult to acquire than the '95-S. This Borderline Uncirculated '95-O Morgan is brilliant aside from small reverse spots at 3 and 6 o'clock. A band of bright luster fills the borders. Relevant contact is limited to a cluster of field marks near the forehead curl. NGC ID# 255Y, PCGS# 7236
- 4798 1895-S AU53 PCGS Secure.** An attractive AU53 specimen of this popular San Francisco issue, with just a trace of wear on the well-detailed design elements and lightly abraded surfaces that show original mint luster in the sheltered areas of the design. NGC ID# 255Z, PCGS# 7238
- 4799 1895-S AU55 PCGS.** A brilliant Choice About Uncirculated example of this better San Francisco issue, showing almost fully prooflike fields and well-struck design elements. A few light, scattered abrasions accompany the minor high-point friction that determines the grade. NGC ID# 255Z, PCGS# 7238
- 4800 1896 MS67 PCGS. VAM-3.** The lower loops of the 89 are repunched. Mostly brilliant, with a sliver of deep golden toning along the right obverse rim. The lustrous surfaces are remarkably free from contact, as expected of the lofty MS67 grade. Die cracks pass through LUR and the right (facing) wingtip. NGC ID# 2562, PCGS# 7240
- 4801 1896 MS67 PCGS.** Nearly 20 million silver dollars were struck in 1896 at all U.S. Mints combined, with nearly half of the total struck in Philadelphia alone. The quality was surprisingly high for such a large mintage. Superb Gems like the present coin are scarce but available at an attractive price. This is a sharply struck example with nearly full brilliance and smooth, unabraded fields and devices. Glimpses of gold patina at the rims confirms the originality of the frosted, lustrous surfaces. PCGS shows just two numerically finer examples (4/18). NGC ID# 2562, PCGS# 7240
- 4802 1896-O MS61 PCGS.** The usual strike weakness occurs on the central high points of this 1896-O Morgan dollar, and moderate abrasions on the obverse limit the grade. But luster is vibrant and neither side shows mentionable toning. An elusive New Orleans issue in Mint State. NGC ID# 27ZU, PCGS# 7242
- 4803 1896-O MS61 NGC. VAM-9.** The flag of the 1 is nicely repunched. A lustrous representative of this high-mintage but conditionally challenging New Orleans issue. Brilliant except for faint fingerprint fragments near the chin and the G in GOD. The fields are surprisingly unabraded, though the cheek exhibits moderate contact. NGC ID# 27ZU, PCGS# 7242
- 4804 1896-O AU58 Prooflike NGC.** Despite a generous mintage, the 1896-O is well-known for its rarity with prooflike surfaces. This brilliant example shows only a trace of wear in the centers. The fields exhibit impressive reflectivity. Refreshingly unabraded, though we note a small spot concealed in the hair above the ear. Census: 20 in 58 Prooflike, 18 finer (5/18). NGC ID# 2563, PCGS# 7243

**4805 1896-S — Cleaned — PCGS Genuine. Unc. Details.** Although the 1896-S has a high mintage and can be readily located in well-circulated grades, Mint State examples are both scarce and collected in all grades. This example has been dipped but nonetheless exhibits cartwheel sheen. Marks are few, though we note a small spot on the final A in AMERICA.  
*From The Bob Williams Collection.*

**4806 1897 MS66 Prooflike PCGS Secure.** This Prooflike Premium Gem Morgan dollar has delicate champagne toning at the borders with nicely mirrored fields around satiny devices. Population: 20 in 66 (3 in 66+) Prooflike, 0 finer (5/18). NGC ID# 2565, PCGS# 7247

**4807 1897-S MS66 PCGS. CAC. VAM-2.** The 1 is repunched, with a small tine protruding from the upright below the flag and minor repunching within the top loop of the 8, and at the top curve of the 7. This is an essentially brilliant and highly lustrous Premium Gem with unabraded fields and only faint grazes on the portrait. Just 30 1897-S dollars are certified numerically finer at PCGS. CAC: 79 in 66, 5 finer (4/18).

Ex: *New York Signature (Heritage, 12/2011)*, lot 4090, where it brought \$1,380. NGC ID# 2567, PCGS# 7250

**4808 1897-S MS66 PCGS. CAC. VAM-2.** The flag of the 1 is repunched. A highly lustrous and essentially brilliant silver dollar that boasts smooth fields and a good strike. Delicate grazes on the portrait decide the grade. CAC: 79 in 66, 19 in 66 Prooflike, 7 finer (4/18).

Ex: *ANA Signature (Heritage, 8/2010)*, lot 10527, which realized \$1,380. NGC ID# 2567, PCGS# 7250

**4809 1898 MS67 PCGS.** The 1898 Morgan dollar is fairly plentiful overall, but it is scarce in Superb Gem condition. This piece is frosty and brilliant, showing sharp design elements and clean surfaces. An outstanding type coin or date representative. NGC ID# 2568, PCGS# 7252

**4810 1898-O MS67 PCGS.** Just the slightest trace of blending shows on the hair above the ear, but this spectacular Superb Gem is sharply struck for a New Orleans issue. The well-preserved surfaces show highlights of silver-gray, sea-green, and amber toning, with vibrant mint luster underneath. PCGS has graded no numerically finer examples (4/18). NGC ID# 2569, PCGS# 7254

**4811 1898-S MS65 PCGS.** The 1898-S Morgan dollar is collectible in MS65 but scarce finer. This Gem is well-struck and vibrantly lustrous with no mentionable toning. Liberty's cheek is clean, but a few light grazes in the left obverse field prevent a finer grade from PCGS. Housed in an older green label holder.

*From The Tuxedo Park Collection.* NGC ID# 256A, PCGS# 7256

**4812 1898-S MS65 PCGS.** The 1898-O and 1898-S have similar mintages, but the 1898-S is much rarer in Mint State. Gems are always in demand, especially if they possess smooth, lustrous fields and nicely struck devices. Light to medium olive-gray and straw-gold toning encompasses both sides. NGC ID# 256A, PCGS# 7256

### 1899-O Silver Dollar, MS67

Among the Finest at PCGS

**4813 1899-O MS67 PCGS. CAC.** The 1899-O Morgan dollar is moderately elusive in Superb Gem condition. PCGS lists a single MS68 coin finer than the present, as well as two MS67 Deep Mirror Prooflike pieces (5/18). Otherwise, this CAC-approved Registry coin ranks among the finest 1899-O dollars at PCGS. Luster is vibrant and frosty, showing no bothersome abrasions. No toning is visible on either side. NGC ID# 256C, PCGS# 7260

**4814 1899-S MS65 PCGS. CAC.** Orange-gold and blue-green toning endows the peripheries of this otherwise brilliant Gem. Nicely struck and thoroughly lustrous with a virtually pristine reverse. Minor obverse grazes do little to diminish the eye appeal. Like other San Francisco issues from the turn of the century, the 1899-S is desirable in quality Mint State. CAC: 64 in 65, 35 finer (5/18). NGC ID# 256D, PCGS# 7262

### 1900-O Silver Dollar, MS67+ A Top-Grade Registry Candidate

**4815 1900-O MS67+ NGC.** This Plus-graded Superb Gem is among the finest-known 1900-O Morgan dollars, if one discounts a pair of MS67 Prooflike coins at NGC. The two leading certification services combined have Plus-graded only eight coins in this grade, including possible duplication (5/18). We have previously handled only one other specific coin in this condition, which has appeared in both NGC and PCGS holders. This is a fresh example, showing frosty, untoned mint luster and well-struck design elements. Liberty's cheek and the fields are clean. Census: 78 in 67 (3 in 67+, 2 in 67 ★), 0 finer; 2 in 67 Prooflike, 0 finer (5/18). NGC ID# 256F, PCGS# 7266

**4816 1900-O/CC VAM-8A, MS65+ PCGS Secure. CAC.** A Top 100 Variety. The left borders display hints of golden-brown toning, but this nicely struck and lustrous Gem is primarily brilliant. VAM-8A is a scarcer O over CC variety, especially compared with VAM-11. The speckles of die rust (as coined) beneath the wreath stems are diagnostic, along with the remnants of the undermintmark CC on each side of the New Orleans mintmark. NGC ID# 256G, PCGS# 133961 Base PCGS# 7268

**4817 1900-O/CC VAM-11, MS65 PCGS.** A Top 100 Variety. Several variants of the 1900-O/CC exist, including nearly a dozen Top 100 varieties of interest to VAM specialists. The O/CC is always popular with mainstream Morgan dollar collectors, too — a separate *Guide Book* listing, which represents the last appearance of the famed CC mintmark on a U.S. coin. This is a lustrous Gem coin, with smooth and brilliant-silver centers surrounded by amber-gold toning at the margins. The overmintmark is clearly visible on the sharply struck surfaces. Population (VAM-11 variety): 7 in 65, 2 finer (4/18). NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

### 1900-O/CC Morgan Dollar, MS66

VAM-11, A Top 100 Variety

**4818 1900-O/CC VAM-11 MS66 PCGS.** A Top 100 Variety. This O/CC variety shows a faint but readily discernible overmintmark feature, with die lines and cracks that confirm the attribution. Brilliant, softly frosted surfaces yield mostly unabraded luster, and Liberty's cheek is especially clean. Trivial softness on the eagle's breast and the hair above Liberty's ear is not bothersome. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

**4819 1900-S MS65 PCGS.** Housed in a first generation holder and high-end for the Gem grade level, this 1900-S Morgan dollar is both radiant and remarkably well-preserved. There is a hint of reflectivity in the fields and traces of champagne toning on each side, but no distracting abrasions are seen either in the fields or on Liberty's cheek. A loupe is needed to observe a few unobtrusive grazes in the lower-left obverse quadrant. An outstanding coin for the grade.

*From The Tuxedo Park Collection.* NGC ID# 256H, PCGS# 7270

**4820 1900-S MS65 PCGS.** A trace of golden patina accompanies this generally brilliant Gem. Lustrous and well-struck with a smooth reverse and delicate obverse grazes. Much scarcer in the present quality than its New Orleans cousin. Housed in an old green label holder. NGC ID# 256H, PCGS# 7270

**4821 1900-S MS65 PCGS.** The 1900-S is available in XF and lower grades, but becomes conditionally rare in Mint State. This lustrous and boldly struck Gem has a remarkably smooth cheek, and the remainder of the coin is also refreshingly unabraded. Lavender, ruby-red, and jade-green toning congregates across the margins. NGC ID# 256H, PCGS# 7270

### 1901 Morgan Dollar, MS61 Seldom Encountered in Uncirculated Grades

**4822 1901 MS61 PCGS Secure.** Nearly 7 million Morgan dollars were struck at the Philadelphia Mint in 1901, but the issue was not well-made, as the new C4 reverse hub produced coins with flat, weakly defined devices. Many examples were released into circulation at the time of issue and most of the coins held in government storage were later melted under the provisions of the Pittman Act. Accordingly, the 1901 is one of the most challenging issues of the series in high grade. This well-detailed MS61 example shows the typical softness on the eagle's breast and the hair above the ear. The surfaces are toned in shades of golden-brown and lavender-gray, with the expected number of minor contact marks for the grade. NGC ID# 256J, PCGS# 7272

**1901 Dollar, Satiny MS61  
Elusive in Uncirculated Condition**

**4823 1901 MS61 NGC.** This Philadelphia issue is best known for its scarcity in high grades. Mint luster is typically satiny on this well above-average survivor. The surfaces maintain much of their original brilliance and show additional accents of speckled gold patina. Strike detail is characteristic for the issue. Marks near the chin, star 4, and under the corner of the eye are partly responsible for the grade. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS61  
Fewer Marks Than Expected**

**4824 1901 MS61 NGC.** A novice collector might understandably assume that the 1901 is an available date based on its mintage of nearly 7 million coins, but the issue is a famous rarity in high grades. Slightly subdued mint luster is satiny rather than frosty, but fewer marks are present than one might expect for an MS61 Morgan dollar. The devices are well-struck (all dies from the new C4 hub lack detailed breast feathers), and pale hints of gold and powder-blue complement silver surfaces. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS61  
Lustrous and Lightly Toned  
'Two-Olive' Reverse**

**4825 1901 MS61 ANACS.** The 1901 Morgan dollar mintage approached 7 million pieces, but the issue is surprisingly scarce in AU, and decidedly rare in Mint State. This lustrous and nicely struck representative displays peripheral russet-red toning, deepest near ONE DOLLAR and PLURIBUS. This is a "two olive" reverse variety, caused by the change in design from the C3 to C4 reverse, with hubs of both subtypes used to make the working die. The secondary olive (on the eagle's branch) is small and low relief, but readily apparent. Housed in a small-sized holder. NGC ID# 256J, PCGS# 7272

**1901 Silver Dollar, Choice AU  
Doubled Die Reverse, VAM-3  
Desirable Guide Book Variety**

**4826 1901 Doubled Die Reverse, VAM-3, AU55 PCGS.** A Top 100 Variety. The famous "Shifted Eagle" variety. The tailfeathers are widely die doubled south, and doubling is also apparent on the nearby design elements and the eagle's beak. It is a great rarity in Mint State, and AU58 examples trade for five figures, which leaves the AU55 grade as the nicest obtainable by most collectors. This partly lustrous pearl-gray example is minimally marked aside from a tick on Liberty's jaw.

Ex: Central States Signature (Heritage, 4/2014), lot 5019, which realized \$4,112.50. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

**4827 1901-O MS66+ PCGS. CAC.** Freckles of autumn-brown and navy-blue toning visit both sides, but are less conspicuous on the reverse except near the LAR in DOLLAR. The centers show only slight inexactness of impression. A lustrous and remarkably preserved Premium Gem. PCGS has graded 51 pieces as MS66+ with only six finer (4/18). NGC ID# 256K, PCGS# 7274

**4828 1901-S MS64 PCGS Secure.** Brilliant-silver surfaces show faint areas of pale-gold toning and a razor-sharp strike. While nearly 2.3 million pieces were struck, no large quantity of original bags were released in the mid- to late-20th century, leading Miles Standish to suggest that the 1901-S is on a par with the 1879-CC in terms of rarity at the AU or finer grades. This example is brightly lustrous and sharply struck.

From The Bob Williams Collection. NGC ID# 256L, PCGS# 7276

**4829 1901-S MS64 PCGS Secure. CAC.** This San Francisco issue becomes increasingly scarce in grades above MS64. The present CAC-endorsed coin is in a minority of Choice examples for the grade and shows vibrant, frosty mint luster. The strike is sharp, and a few tiny grazes on Liberty's cheek are all that limit the numeric assignment. NGC ID# 256L, PCGS# 7276

**4830 1901-S MS64+ PCGS. CAC.** The 1901-S has a certified population in Choice Mint State roughly comparable to the more famous (and much more expensive) 1879-CC. This Plus-Graded example with CAC endorsement ranks high among those coins at this grade level with a sharp strike and smooth, minimally abraded surfaces. The coin is all-brilliant with vibrant cartwheel luster. NGC ID# 256L, PCGS# 7276

**4831 1901-S MS65 PCGS.** An elusive Morgan dollar at the Gem grade level, the 1901-S is rarely encountered better, with only 42 numerically finer pieces certified by PCGS (5/18). This example has brilliant and frosty silver luster with a sharp strike and strong eye appeal. NGC ID# 256L, PCGS# 7276

**4832 1901-S MS65 PCGS.** Delicate wheat-gold toning adorns this lustrous better-date dollar. The strike is good save for inexactness on the hair above the ear. Marks are inconsequential except for a graze on the lower portion of the cheek.

Ex: FUN Signature (Heritage, 7/2007), lot 1722, which realized \$2,760. NGC ID# 256L, PCGS# 7276

- 4833** 1902 MS66 PCGS. Delicate speckles of lavender-gray toning visit the well-preserved, lustrous surfaces of this spectacular Premium Gem. The design elements are well-detailed, with just a trace of softness on the hair above the ear and eagle's breast. PCGS has graded 32 numerically finer examples (5/18). NGC ID# 256M, PCGS# 7278
- 4834** 1902 MS66+ PCGS Secure. The 1902 Morgan dollar is an elusive issue in grades above the MS66 level. This Plus-graded Premium Gem displays sharply detailed design elements and virtually flawless surfaces, with vibrant mint luster and outstanding eye appeal. PCGS has graded 32 numerically finer examples (5/18). NGC ID# 256M, PCGS# 7278
- 4835** 1902-S MS65 PCGS. Ex: Ray George. As with neighboring San Francisco issues, the 1902-S is a better date in all grades. The present crisply struck and lustrous Gem has a dusky gunmetal-gray and lavender-red obverse. The reverse displays much lighter lilac and wheat-gold toning. Ex: Orlando Signature (Heritage, 1/2007), lot 7437, which realized \$1,840. NGC ID# 256P, PCGS# 7282
- 4836** 1902-S MS65 PCGS. CAC. Shades of greenish-gold, lavender-gray, and amber toning visit the well-preserved surfaces of this impressive Gem, with well-detailed design elements and vibrant mint luster underneath. Although occasionally available in this grade, the 1902-S dollar is scarce finer. NGC ID# 256P, PCGS# 7282
- 4837** 1903-S AU55 NGC. A bright Choice AU coin with satiny luster in the fields and a touch of wear on the high points of the devices. No major abrasions are visible. The 1903-S is a better date overall, coming from a mintage of a little more than 1.2 million coins, which was small for the period and denomination. NGC ID# 256T, PCGS# 7288
- 4838** 1903-S AU55 PCGS. The 1903-S is a better date among 20th century Morgan dollars. This Choice AU representative offers gold and russet border toning around brilliant interiors, and appreciable reflectivity appears in the fields. The surfaces are relatively smooth, heightening the eye appeal. NGC ID# 256T, PCGS# 7288
- 4839** 1903-S AU55 PCGS Secure. A touch of wear shows on the high points of the design elements, namely the hair above the ear and the eagle's breast, but the lightly abraded surfaces of this attractive Choice AU 1903-S dollar retain much original mint luster. *From The Bob Williams Collection.* NGC ID# 256T, PCGS# 7288
- 4840** 1904 MS65 PCGS. This well-struck, satiny Gem displays warm golden toning on the obverse, surrounded by lavender and aquamarine peripheral color. The reverse is deep ocean-blue and sea-green. The 1904 is usually available in this grade, but PCGS lists only 37 numerically finer representatives (4/18). NGC ID# 256U, PCGS# 7290
- 4841** 1904 MS65 PCGS. Blended multicolor toning covers both sides of this Gem 1904 silver dollar, masking any minor imperfections that prevent an even finer grade. Slight strike weakness is seen only on the eagle's breast and the hair above Liberty's ear. Eye appeal is pleasing. NGC ID# 256U, PCGS# 7290
- 4842** 1904 MS65 PCGS. Attractive shades of lavender and pale gold toning blanket the well-preserved surfaces of this spectacular Gem, with vibrant mint luster and sharply detailed design elements underneath. Eye appeal is outstanding. PCGS has graded 37 numerically finer examples (4/18). NGC ID# 256U, PCGS# 7290
- 4843** 1904 MS65 PCGS. Most of the 1904 Philadelphia mintage fell victim to the authority of the Pittman Act, where the coins were summarily melted. Survivors at any level of Mint State are scarce, with only the occasional Gem and even fewer pieces any finer. This vibrant and lustrous MS65 is nearly brilliant with silver luster that packs a punch. The strike is sharp in the centers, while the infrequent light abrasions are entirely grade-consistent. Just 37 pieces have received a finer numeric grade at PCGS (4/18). NGC ID# 256U, PCGS# 7290
- 4844** 1904 MS65 PCGS. The 1904 dollar is readily available through the MS64 level, but becomes elusive in Gem condition. The surfaces are sharply struck and lustrous, and visited by occasional whispers of steel-blue and tan-brown toning. A well-preserved and desirable example. Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 1393, which realized \$2,530. NGC ID# 256U, PCGS# 7290
- 4845** 1904 MS65 PCGS. CAC. The Gem level is seldom bettered for the 1904 Morgan issue, an elusive late-series Philadelphia issue. The well-struck ivory-gray surfaces show rim accents of pale blue and sunset-orange on each side. NGC and PCGS combined have seen fewer than 50 numerically finer submissions (4/18). Ex: Long Beach Signature (Heritage, 9/2013), lot 5905. NGC ID# 256U, PCGS# 7290
- 4846** 1904-S MS61 PCGS Secure. Satiny and untoned, this Mint State 1904-S Morgan dollar displays a pleasing cartwheel effect and light, scattered abrasions. The centers are weakly struck as usual, although this coin is appealing for the grade. The 1904-S is a better 20th century issue in Uncirculated condition. NGC ID# 256W, PCGS# 7294

- 1904-S Dollar, MS62**  
Better Date in High Grades

- 4847** 1904-S MS62 PCGS. Occasional splashes of light gold color accent both sides of this attractive S-mint representative, each of which exhibits well-struck devices. Small marks over softly lustrous surfaces limit the grade. Still, this is a pleasing example for MS62 assessment. From a mintage of 2.3 million pieces, the 1904-S Morgan dollar is a better date in the series. Ex: Central States Signature (Heritage, 4-5/2010), lot 1417; ANA National Money Show Signature (Heritage, 3/2014), lot 4983. NGC ID# 256W, PCGS# 7294

**1904-S Morgan Dollar, MS63**  
Lightly Toned, Lustrous Example

- 4848** 1904-S MS63 PCGS Secure. Among 20th century San Francisco Mint Morgan dollar issues, only the 1903-S is rarer than the 1904-S. This mostly brilliant and lustrous example shows the typical softness on the hair above the ear, but surface marks are surprisingly few and inconspicuous. The overall eye appeal of this Select specimen is outstanding. NGC ID# 256W, PCGS# 7294

**1904-S Morgan Dollar, MS63  
Better-Date Branch Mint Issue**

**4849 1904-S MS63 PCGS Secure.** From a relatively small mintage of 2.3 million pieces, the 1904-S Morgan dollar was not heavily represented in the Treasury releases of the 1960s and locating a truly high-grade specimen today is a significant challenge. This impressive Select example shows just a trace of the usual blending on the hair strands above Liberty's ear and the lightly marked surfaces are lustrous and appealing. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, MS63  
Scarce in High Grades**

**4850 1904-S MS63 NGC.** Most 1904-S Morgan dollars were paid out long before the Treasury release of the early 1960s. Locating a high-grade example can pose a challenge. Untoned and frosty surfaces show a few wispy marks but nothing major. Well-struck devices add to the appeal of this Select representative. NGC ID# 256W, PCGS# 7294

**4851 1921-D MS66+ PCGS Secure. CAC.** The 1921-D Morgan dollar was produced in large numbers, but the issue is rare in grades above the MS66 level. This Plus-graded Premium Gem is well-preserved and sharply detailed, with radiant mint luster and terrific eye appeal. PCGS has graded only 11 numerically finer examples (5/18). NGC ID# 256Y, PCGS# 7298

**PROOF MORGAN DOLLARS**

**1881 Morgan Dollar, PR64  
Deep Multicolor Toning**

**4852 1881 PR64 NGC.** Ex: M & T Collection. Both Trade and Morgan dollar proofs were struck in 1881 — 960 examples of the former and 984 of the latter. Gold and orange patina progresses to shades of cobalt-blue and violet on the obverse, while the opposite pattern occurs on the other side. The toning is deep and all-encompassing, minimizing contrast but also concealing what few grade-limiting marks exist. NGC ID# 27Z5, PCGS# 7316

**1884 Morgan Dollar, Toned PR64**

**4853 1884 PR64 PCGS.** Shades of sea-green, burnt-orange, and olive-gray toning blanket the well-preserved surfaces of this impressive Choice proof, with sharply detailed design elements and deeply reflective fields underneath. Overall eye appeal is quite strong. From a proof mintage of 875 pieces. NGC ID# 27ZB, PCGS# 7319

**4854 1890 PR62 PCGS Secure. CAC.** Glimmering fields and satiny devices complement a sharp strike on this lower-end proof Morgan, while both sides of the coin are toned gold, russet, and olive. Under a loupe, hairlines are visible that limit the grade. NGC ID# 27ZK, PCGS# 7325

**4855 1891 PR62 PCGS. CAC.** Ex: Teich Family Collection. The obverse is beautiful and displays orange-gold toning around the periphery. The reverse has peach border toning along with a broad gray, granular diagonal streak between 5 and 11 o'clock. The strike shows minor blending in the centers.

*Ex: Consignment R.L. Wilson, Chicago (Stack's, 10/1959), lot 263; New York Signature (Heritage, 2/2014), lot 4323. NGC ID# 27ZL, PCGS# 7326*

---

**1891 Morgan Dollar, PR64**

Vivid Obverse Toning

- 4856 1891 PR64 PCGS Secure.** Vivid shades of golden-brown and cobalt-blue toning blanket the obverse of this attractive Choice proof, while the reverse remains mostly brilliant. The well-detailed design elements show just a trace of softness on the hair above the ear and the fields are deeply reflective. Population: 52 in 64 (1 in 64+), 41 finer (4/18). NGC ID# 27ZL, PCGS# 7326
- 

**1896 Morgan Dollar, PR64**

Attractive, Multicolor Toning

- 4857 1896 PR64 PCGS Secure.** Only 762 proof Morgan dollars were struck in 1896, but the issue was extraordinarily well-produced. This attractive Choice proof specimen exhibits the sharply detailed design elements and deeply mirrored fields typical of the issue, with well-preserved surfaces that are blanketed in vivid shades of lavender, pale gold, and violet toning. Eye appeal is terrific. Population: 63 in 64, 76 finer (4/18). NGC ID# 27ZT, PCGS# 7331
- 

**1897 Morgan Dollar, PR64**

Rich, Golden-Russet Hues

- 4858 1897 PR64 NGC.** The dusky golden-russet interiors are bounded by peripheral glimpses of lavender-red and cobalt-blue. This charming Choice proof has mirrored fields and clean surfaces. The strike is sharp aside from a whisper of incompleteness on the hair curl directly above the ear.

Ex: Rosemont Signature (Heritage, 4/2008), lot 3066, which realized \$3,450. NGC ID# 27ZV, PCGS# 7332

---

---

**1900 Morgan Dollar, PR64**

Spectacular Obverse Toning

- 4859 1900 PR64 PCGS Secure.** Vivid shades of burnt-orange, golden-brown, and violet-gray toning blanket the obverse of this delightful Choice proof specimen, while the reverse shows less intense hints of patina. Only a couple of minor hairlines are evident and the design elements are sharply defined. Population: 69 in 64 (1 in 64+), 37 finer (4/18). NGC ID# 3KYV, PCGS# 7335
- 

**1900 Silver Dollar, PR64**

Original Two-Sided Toning

- 4860 1900 PR64 PCGS.** This Choice proof is sharp on the eagle's breast and talons but slightly weak on the hair above Liberty's ear. Both sides display deep reflectivity in the fields and have orange-gold and russet toning across the interiors with violet and blue border hues. The patina masks any small, unobtrusive contact marks. NGC ID# 3KYV, PCGS# 7335
- 

**1904 Dollar, Toned PR64**

Among 650 Proofs Struck

- 4861 1904 PR64 PCGS.** Mixed golden-brown and violet patina blankets the surfaces of this proof Morgan dollar. Intermittent accents of powder-blue color appear throughout. The rich toning subdues field-device contrast, but also serves to minimize the few signs of contact. Only 650 Morgan dollar proofs were manufactured in 1904. NGC ID# 2824, PCGS# 7339
-

## PEACE DOLLARS

- 4862 1921 MS65 PCGS.** Deep gold, russet, and lilac toning covers frosty luster on this Gem High Relief Peace dollar. The usual softness occurs in the centers, but no distracting abrasions are present. Finer examples of this one-year type are elusive. PCGS# 7356
- 4863 1921 MS65 PCGS.** This impressive Gem exhibits a touch of the typical softness on Liberty's hair, due to the high relief of the design. Low-intensity tan-gray toning blankets the well-preserved surfaces, with satiny mint luster underneath. PCGS# 7356
- 4864 1921 MS65 PCGS.** Just a touch of the usual softness shows on Liberty's hair, due to the high relief of the design, but this attractive Gem is well-preserved, with lustrous surfaces that exhibit subtle highlights of lavender-gray and golden-tan toning. PCGS# 7356
- 4865 1921 MS65 PCGS.** A hint of champagne toning graces the original, satiny surfaces of this Gem High Relief Peace dollar. The centers exhibit above-average sharpness but are not quite full. Liberty's cheek and the fields are clean, and eye appeal is pleasing for the grade. Higher-grade examples are elusive. Housed in an old green label holder.  
*From The Tuxedo Park Collection.* PCGS# 7356
- 4866 1921 MS65 PCGS.** Golden-tan toning and shimmering luster combine with wonderfully preserved surfaces to ensure the Gem status of this lovely Peace dollar. The centers are typically struck, but the eye appeal is otherwise formidable. Always of interest to both type and date/mintmark collectors. PCGS# 7356
- 4867 1921 MS65 PCGS.** This satiny Gem representative shows warm golden color and minimally disturbed surfaces. The centers have some of the typical strike softness, an unavoidable affect of the unusually high relief of this first-year issue. PCGS# 7356
- 4868 1921 MS65+ PCGS Secure.** This satiny Gem is exceptionally clean for the grade, showing a pristine cheek and undisturbed fields. A few light grazes on the reverse likely limit the PCGS designation. The centers show the usual softness but are better defined than frequently seen. The Plus designation adds to the appeal of this High Relief Peace dollar. PCGS# 7356
- 4869 1921 MS65+ NGC.** Of great importance in any Peace dollar collection, the 1921 High Relief claims scarcity by collector demand rather than by its Uncirculated population. This high-end Gem example displays delicate iridescence across both sides, illuminated by strong satiny luster. The strike is average at best on the hair strands nearest the cheek, yet the absence of any significant marks and sharpness of the remaining devices confirm the assigned grade. Eye appeal is exceptional. PCGS# 7356
- 4870 1921 Satin Proof Dies, VAM-1H, MS63 PCGS Secure.** An Elite 30 Variety. This is a business strike, from the same die pair that struck satin proofs. Light gold toning visits the borders, but this lustrous representative is close to brilliant. Uncommonly unabraded for the MS63 level, though the centers lack a full impression.  
Ex: Long Beach Signature (Heritage, 6/2015), lot 8118, which realized \$1,410. NGC ID# 2U4E, PCGS# 518800 Base PCGS# 7356
- 4871 1923 MS67 NGC.** Like its 1922 predecessor, the 1923 was struck in great numbers, but most Uncirculated pieces grade MS63 to MS64. Superb Gems constitute only a minute percentage of survivors. This brilliant silver dollar boasts booming mint luster, an intricate strike, and essentially mark-free fields.  
Ex: Beverly Hills Signature (Heritage, 11/2014), lot 4783, which realized \$2,352.35. NGC ID# AMPA, PCGS# 7360
- 4872 1924-S MS64 PCGS. CAC.** The well-detailed design elements of this Choice Peace dollar show the usual softness in the centers, but the lustrous surfaces display only minor signs of contact. Wisps of light gold toning visit the surfaces of both sides.  
Ex: Central States Signature (Heritage, 4/2012), lot 5840. NGC ID# 257K, PCGS# 7364

- 4873 1925 MS67 NGC.** The 1925 is the final silver dollar issue with a mintage of more than 10 million pieces. Examples abound in typical Mint State grades, but Superb Gems are relatively scarce. This lustrous representative displays caramel-gold and ice-blue toning. The cheek is pristine, the strike is exemplary, and the eye appeal is formidable. Census: 96 in 67 (4 in 67+, 1 in 67★), 1 finer (5/18). NGC ID# 257L, PCGS# 7365

### 1925 Peace Dollar, MS67 Sharply Detailed, Lustrous Example

- 4874 1925 MS67 PCGS.** The 1925 Peace dollar was produced in large numbers but examples in MS67 condition are conditionally scarce, and finer coins are virtually unobtainable. This spectacular Superb Gem exhibits sharply defined design elements and impeccably preserved, lustrous surfaces, under low-intensity shades of golden-tan toning. PCGS has graded only one numerically finer example (4/18). NGC ID# 257L, PCGS# 7365
- 4875 1926 MS66 PCGS Secure.** This Premium Gem 1926 is a Registry Set quality coin, with sharply struck design elements and satin-smooth surfaces. Vibrant mint luster reveals a mere hint of pale-gold and ice-blue color over the nearly unabraded silver surfaces. PCGS has yet to certify a numerically finer 1926 dollar (4/18). NGC ID# 257N, PCGS# 7367
- 4876 1926 MS66 PCGS Secure.** The 1926 Peace dollar is available in MS66 with some patience, but no finer coins are reported at PCGS (4/18). This satiny Premium Gem displays a sharp strike and untoned surfaces. No abrasions mar the eye appeal. NGC ID# 257N, PCGS# 7367
- 4877 1926 MS66 PCGS Secure.** Among the finest coins at PCGS, this Premium Gem 1926 Peace dollar is satiny and well-preserved with good eye appeal. Both sides exhibit delicate iridescence, with the obverse showing specks of olive and russet along the borders. There is one small, almost unnoticed mark in the left obverse field. NGC ID# 257N, PCGS# 7367
- 4878 1926 MS66 PCGS.** Peace dollars of any date seldom display the originality of this outstanding Premium Gem. In addition to a sharp strike that accents Liberty's hair, iridescent colors play beneath an overall pale-orange and pearlescent-gray patina. Satiny mint luster illuminates the complex coloration. Registry Set enthusiasts who demand original surfaces are urged to pay extra attention to this exceptional MS66 coin. None are certified finer at PCGS (4/18). NGC ID# 257N, PCGS# 7367
- 4879 1926 MS66 PCGS.** Softly frosted luster and well-struck design elements show mostly unabraded surfaces on this Premium Gem example. A hint of light champagne toning graces each side. Moderately available in this grade but unknown finer at PCGS (4/18).  
Ex: Central States Signature (Heritage, 5/2007), lot 5120, which realized \$977.50; Baltimore Signature (Heritage, 3/2009), lot 1618, which realized \$1,092.50; ANA Signature (Heritage, 8/2010), lot 10684. NGC ID# 257N, PCGS# 7367

- 4880 1926-D MS66 PCGS Secure.** The 1926-D Peace dollar is available in MS66, but Superb Gems are rarely offered, with only eight such coins certified at PCGS (4/18). This Premium Gem is sharp and frosty. The well-preserved surfaces have flecks of olive and russet toning near the borders. NGC ID# 257P, PCGS# 7368

**4881** 1927 MS65 PCGS Secure. The 1927 Peace dollar is a slightly better date, and examples are rare finer than MS65. This collectible Gem displays well-struck motifs and softly frosted luster. A dusting of olive-gold toning graces each side. PCGS reports 16 numerically finer submissions (5/18). NGC ID# 257S, PCGS# 7370

**4882** 1927 MS65 PCGS. Splashes of golden-brown toning endow this lustrous and well-struck Gem. Exceptionally free from contact, with outstanding quality for the designated grade. The 1927 has the second-lowest mintage of the Peace dollar series and is rarely encountered finer. Certified in an old green label holder. NGC ID# 257S, PCGS# 7370

**4883** 1927 MS65 PCGS. VAM-2. A Top 50 Variety. The VAM is undesignated on the holder, but the obverse die doubling on the monogram and rays is apparent beneath a loupe. A fully struck and beautifully preserved Gem of this low-mintage date. NGC ID# 257S, PCGS# 7370

**4884** 1927-D MS65 PCGS. The 1927-D Peace dollar is an important condition rarity that is elusive in MS65 and nearly impossible in any finer grades. PCGS has certified only 15 numerically finer examples, and NGC has graded just three finer pieces (5/18). This Gem has brilliant and frosty silver luster with delicate gold toning on the obverse. The reverse is brilliant and untoned. NGC ID# 257T, PCGS# 7371

#### 1928 Peace Dollar, MS65 Frosty and Brilliant

**4885** 1928 MS65 PCGS Secure. A brilliant, frosty Gem example of this key date, showing remarkably well-preserved surfaces that have just a few light grazes in the fields. The strike is sharp, contributing to uncommonly strong eye appeal on a 1928 Peace dollar. Examples are occasionally available in this grade, but PCGS lists only 19 finer coins (4/18). NGC ID# 257V, PCGS# 7373

**4886** 1928 MS65 PCGS Secure. The 1928 Peace dollar claims a low mintage of 360,649 pieces, making it a better date in the series. Pleasing shades of golden-tan toning enhance the well-preserved surfaces of this attractive Gem representative, with well-detailed design elements and vibrant mint luster underneath. PCGS has graded 19 numerically finer examples (5/18). NGC ID# 257V, PCGS# 7373

**4887** 1928 MS65 NGC. A well-detailed Gem representative of this popular, low-mintage issue, with well-preserved surfaces that show speckled highlights of golden-tan and raspberry toning. Vibrant mint luster adds to the considerable eye appeal. NGC has graded five numerically finer examples (5/18). NGC ID# 257V, PCGS# 7373

**4888** 1928-S MS64+ PCGS Secure. CAC. Die doubling is apparent on the designer's monogram and the TR in TRVST, as usually seen on better-grade examples of this conditionally rare issue. The present brilliant and lustrous example is as close to a Gem as can be obtained for less than five figures. The surfaces show only trivial contact, along with myriad die polish lines in the obverse field, as made. NGC ID# 257W, PCGS# 7374

**4889** 1934 MS66 NGC. The 1934 Peace dollar is a low-mintage issue that becomes conditionally rare in grades above the MS66 level. This sharply detailed Premium Gem is well-preserved and lustrous, with a few hints of pale gold toning. NGC has graded five numerically finer examples (5/18). NGC ID# 257Y, PCGS# 7375

**4890** 1934 MS66 PCGS. This impressive Premium Gem exhibits frosty silver luster with wisps of champagne toning on the obverse. The reverse is brilliant, and both sides feature nearly full design definition. PCGS has certified a mere three submissions numerically finer (5/18). NGC ID# 257Y, PCGS# 7375

#### 1934-S Peace Dollar, MS62+ Frosty and High-End for the Grade

**4891** 1934-S MS62+ NGC. The 1934-S is the scarcest Peace dollar issue in Mint State, coming from a mintage of barely more than 1 million coins. This piece is one of four Plus-graded MS62 coins at NGC (5/18). It is well-struck and has minimal abrasions for the grade, and the frosty luster is unusually vibrant and attractive. Ideal for the budget-conscious collector. NGC ID# 257Z, PCGS# 7377

#### PROOF EISENHOWER DOLLAR

**4892** 1973-S Clad PR70 Deep Cameo PCGS. Given a high mintage of 2.7 million proofs, it should come as little surprise that the 1973-S clad Eisenhower dollar is readily available through PR69 Deep Cameo. There are, however, remarkably few PR70 Deep Cameo specimens reported at PCGS, just 28 pieces in all (5/18). This conditionally rare proof dollar features entirely brilliant, strongly contrasted surfaces. Deeply reflective, jet-black fields are absolutely pristine. NGC ID# 258U, PCGS# 97430

#### MODERN ISSUES

**4893** 1997-W Jackie Robinson Gold Five Dollar MS70 NGC. A scant mintage of 5,714 pieces makes the Uncirculated finish Jackie Robinson half eagle one of the keys to the modern commemorative series. A pristine example with dynamic luster and an intricate strike. NGC ID# 28UG, PCGS# 9759 Base PCGS# 9759

**4894** 2000-W Library of Congress Bimetallic Ten Dollar MS70 NGC. A technically flawless example of the Uncirculated-finish Library of Congress ten dollar, the only bimetallic U.S. type. The outer gold ring is as perfect as the platinum interior, and the whole is satiny and delightful.

*Ex: Houston Signature (Heritage, 12/2010), lot 4139, which realized \$5,175. NGC ID# 26U9, PCGS# 9784*

#### MODERN BULLION COINS

**4895** 1988 Quarter-Ounce Gold Eagle MS70 NGC. Only 49,000 quarter-ounce Gold Eagles were struck in 1988, down from almost 270,000 pieces the year before. This fully struck, impeccably preserved example exhibits technically perfect lemon-yellow surfaces with vibrant mint luster throughout. Census: 91 in 70 (4/18). NGC ID# 26M4, PCGS# 9820

**4896** 1988 Half-Ounce Gold Eagle MS70 PCGS. A technically perfect example of the half-ounce Gold Eagle, with razor-sharp definition on all design elements and impeccably preserved orange-gold surfaces that radiate vibrant mint luster on both sides. Population: 37 in 70 (4/18). NGC ID# 26N9, PCGS# 9822

- 4897 1989 Silver Eagle MS70 PCGS.** Legions of Silver Eagle Registry Set specialists will take note of this spectacular MS70 PCGS example, an essentially perfect example of the satin-brilliance required for such a grade. A total of 78 MS70 certifications are reported by PCGS — 56 coins in regular holders, and 22 pieces in special holders (5/18). NGC ID# 26JA, PCGS# 9826

**1990 Silver Eagle, MS70  
Elusive in This Top Grade**

- 4898 1990 Silver Eagle MS70 NGC.** According to John Mercanti's *American Silver Eagles*, the average price of silver in 1990 was \$4.82, a price that fell off even further the following year. In 1990, the Philadelphia Mint struck more than 5.8 million Silver Eagles, but few examples survive certified in MS70. This NGC coin displays a full strike and untoned satin luster. The preservation is flawless. NGC ID# 26JC, PCGS# 9836

**1990 Silver Eagle, MS70  
Obvious Registry Candidate**

- 4899 1990 Silver Eagle MS70 NGC.** Regular-issue bullion strikes of the Silver Eagle denomination were struck at Philadelphia from 1987 through 1999, although they bear no mintmark. In 1990, coinage amounted to more than 5.8 million coins, but this has not translated into large numbers of MS70 coins today. This top-grade coin displays sharp motifs and brilliant, satiny mint luster. No surface flaws are visible. NGC ID# 26JC, PCGS# 9836

- 4900 1991 Silver Eagle MS70 NGC.** Lustrous and fully impressed, this brilliant silver eagle has a pristine obverse. The reverse rim shows only minuscule imperfections near 3 and 9 o'clock. A high-mintage issue, but relatively few remain as made. NGC ID# 26JE, PCGS# 9846

- 4901 1991 Silver Eagle MS70 NGC.** The 1991 mintage of 7.1 million Silver Eagles has yielded few coins that warrant the unimprovable MS70 designation. This is a flawlessly struck and immaculately preserved recipient of the NGC's ultimate reward. Brilliant, satiny surfaces give no opportunity for argument about the assigned grade. NGC ID# 26JE, PCGS# 9846

**1992 Silver Eagle, MS70  
Top-Grade PCGS Coin**

- 4902 1992 Silver Eagle MS70 PCGS.** NGC-certified 1992 Silver Eagles in MS70 are plentiful, but only 46 coins carry the top grade from PCGS, and these are sought-after by Registry Set collectors. This example displays a full strike and pristine, softly frosted surfaces. Neither side exhibits mentionable toning. NGC ID# 26JG, PCGS# 9856

- 4903 1993 Quarter-Ounce Gold Eagle MS70 NGC.** A sharp example with perfect satin luster and uniform golden color. This Registry-grade 1993 quarter-ounce Gold eagle comes from a mintage of 71,864 pieces, but top-grade survivors are elusive. NGC ID# 26M9, PCGS# 9870

- 4904 1995-W Silver Eagle PR69 Ultra Cameo NGC.** Ice-white devices rise in full detail above immaculate mirrored fields. The '95-W has been regarded as the key to the silver eagle series since its issue. Offered by the Mint only as part of a proof set that included four gold eagles, sales were low but values soared promptly in the aftermarket. NGC ID# CFWX, PCGS# 9887

**1995-W Silver Eagle, PR69 Deep Cameo  
Proof Series Key**

- 4905 1995-W Silver Eagle PR69 Deep Cameo PCGS.** In the context of the proof Silver Eagles, the 1995-W is a great rarity. Only 30,125 examples of this issue were struck, and high-grade examples are in unceasing demand among Registry Set collectors. This near-flawless PR69 Deep Cameo displays sharp motifs and stark white-on-black contrast with liquidlike mirroring in the fields. NGC ID# CFWX, PCGS# 9887

**1995-W Silver Eagle, PR69 Ultra Cameo  
Low-Mintage West Point Key**

**4906 1995-W Silver Eagle PR69 Ultra Cameo NGC.** A virtually flawless example of the key to the Silver Eagle series, showing stark white-on-black contrast and liquidlike mirroring in the fields. The devices are fully struck and frosty. The 1995-W Silver Eagle was issued only in special 10th anniversary bullion proof sets, which had a limited distribution of 30,125 sets. The Silver Eagle is highly sought-after in high grade. NGC ID# CFWX, PCGS# 9887

**4907 1997 Quarter-Ounce Platinum Eagle MS70 NGC.** A technically perfect example of this quarter-ounce Platinum Eagle, from the first year of the series. This fully struck specimen shows the reversed contrast of the design to good effect, with mattelike gray fields and deeply reflective devices. Census: 96 in 70 (4/18). NGC ID# 26SR, PCGS# 99753

**4908 1997 Half-Ounce Platinum Eagle MS70 NGC.** A magnificent MS70 example of this popular bullion issue, in a First Year of Issue holder. This piece exhibits fully struck design elements and technically perfect surfaces with terrific eye appeal. Census: 48 in 70 (4/18). NGC ID# 26TC, PCGS# 99752

**4909 1998 Silver Eagle MS70 PCGS.** We have not offered an MS70 PCGS example of the 1998 Silver Eagle for a while, and looking back in our archives it is indeed a rare occurrence — just three appearances in the past 12 years. To date, PCGS reports just 39 coins in MS70 plus seven examples with the Mercanti Signature (5/18). This example is housed in a regular PCGS holder with stunning silver brilliance and flawless surfaces. NGC ID# 26JV, PCGS# 9929

**4910 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** A virtually pristine honey-gold representative. The strike is intricate, and a lens reveals only a couple of microscopic imperfections. The mintage of the wrong-finish 1999-W ten dollar gold eagle is unknown, but the Whitman website estimates 10,000 pieces were struck. Examples trade for multiples of the regular sans-mintmark 1999 quarter-ounce eagle. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

**4911 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** Demand for bullion during the Y2K panic is blamed for the curious FS-401 Uncirculated Finish tenth-ounce and quarter-ounce 1999-W gold eagles. Due to a mint error, two dies bearing a West Point mintmark received the wrong finish, and coined bullion pieces instead of deep mirror proofs. This is an essentially immaculate example with a full strike and seamless sun-gold surfaces. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

**2000 Silver Eagle, MS70  
Elusive in This Ultimate Grade**

**4912 2000 Silver Eagle MS70 NGC.** In the year 2000, regular production of bullion Silver Eagles was shifted from Philadelphia to West Point, New York. Still, no mintmark was placed on the coins. This "turn-over" year is popular with collectors but also difficult to acquire in MS70 condition. This piece is sharp, frosty, and brilliant. The surfaces are pristine. NGC ID# 26JZ, PCGS# 9949

**4913 2007 Four-Piece Platinum Eagle Set, Early Releases, PR70 Ultra Cameo NGC.** The set includes: tenth-ounce \$10, quarter-ounce \$25, half-ounce \$50, and one-ounce \$100. The four pieces are separately holdered but identically and ideally graded. All are as struck, with smooth glassy fields and fully struck luminous motifs. (Total: 4 coins)

**4914 2008-W Four-Piece Gold Buffalo Set MS70 NGC.** Separately housed in holders bearing consecutive certification numbers. All the coins are flawless save for one or two pinpoint orange flecks. The lot includes the tenth-ounce \$5; quarter-ounce \$10; half-ounce \$25; and one-ounce \$50. (Total: 4 coins)

**4915 2008-W Four-Piece Platinum Eagle Set PR70 Deep Cameo PCGS.** The quartet is housed in separate but identically graded holders. 2008 was the final year of fractional-ounce platinum coinage. The set includes the tenth-ounce \$10; quarter-ounce \$25; half-ounce \$50; and one-ounce \$100. All four pieces are pristine and intricately struck. The frosty motifs fully contrast with the mirrored fields. (Total: 4 coins)

## COINS OF HAWAII

**4916 1847 Hawaii Cent MS62 Brown PCGS Secure. Medcalf 2CC-2.** Crosslet 4, 7 x 8 berries. A nicely struck medium-brown example with hints of faded red in the design crevices. Minor edge nicks are noted at 1 o'clock on the obverse and 4:30 and 7:30 on the reverse. A single-year type struck by Attleboro, Massachusetts Hard Times-era manufacturer H.M. & E.I. Richards. NGC ID# 2C52, PCGS# 10965

**1883 Hawaii Dime, MS65  
Attractive Golden-Brown Toning**

- 4917 1883 Hawaii Ten Cents MS65 PCGS. CAC.** Variegated tan-brown patina is prevalent, though a few splashes of deep forest-green toning cross the upper obverse periphery. A lustrous and sharply struck high-grade example. Precious few Gems survive of this lowest-denomination 1883 issue, struck for the kingdom through the connections of sugar baron Claus Spreckels. Population: 22 in 65, 16 finer. CAC: 7 in 65, 12 finer (4/18).  
Ex: Long Beach Signature (Heritage, 2/2005), lot 10777; Long Beach Signature (Heritage, 9/2010), lot 4931; Pittsburgh Signature (Heritage, 10/2011), lot 4502, which realized \$3,737.50. NGC ID# 2C54, PCGS# 10979

**1883 Hawaii Quarter, MS67  
Few Certified This Fine**

- 4918 1883 Hawaii Quarter MS67 PCGS Secure.** The quarter dollar is the most plentiful of the 1883 silver denominations struck by the San Francisco Mint for Hawaii. But this Superb Gem is conditionally rare, and only a couple of finer coins are known. The frosty surfaces exhibit a hint of champagne color and are virtually flawless, yielding to deeper russet toning along the upper obverse border. Sharp design elements complete the eye appeal. Population: 22 in 67 (3 in 67+), 1 finer (4/18). NGC ID# 2C58, PCGS# 10987

- 4919 1883 Hawaii Half Dollar MS63 PCGS.** Semiprooflike on the reverse, satiny on the obverse, a lightly toned example. An interesting coinage for the island of Hawaii, issued only in this year by King Kalakaua I. Struck by the United States Mint at San Francisco. Originally, 700,000 half dollars were struck, but 612,245 were recalled and melted, thus making this a scarce issue.  
Ex: Palm Beach Signature (Heritage, 11/2004), lot 10440. NGC ID# 2C5B, PCGS# 10991

- 4920 1883 Hawaii Half Dollar MS63 PCGS Secure.** This Select Mint State Hawaiian half dollar, also known as a hapalua, features strong design elements and frosty silver mint luster without toning on either side. An attractive representative of this San Francisco-issued coinage. NGC ID# 2C5B, PCGS# 10991

- 4921 1883 Hawaii Half Dollar MS63 PCGS Secure.** Like the other Hawaiian denominations of 1883, the hapalua or half dollar was mass-melted soon after the island nation became a U.S. territory. The hapalua has a net mintage of 87,755 pieces per the Breen Encyclopedia. This satiny silver-gray Select example is sharply struck and minimally abraded. A scarce single-year type. NGC ID# 2C5B, PCGS# 10991

**1883 Hawaii Dollar, MS61  
Sharp and Lightly Toned**

- 4922 1883 Hawaii Dollar MS61 PCGS.** The silver dollar is among the more challenging regular-issue Hawaii coins. The San Francisco Mint struck 500,000 dollars for the island kingdom in 1883, but most were later withdrawn and melted when Hawaii became a U.S. territory at the turn of the century. This MS61 coin is well-struck and satiny with slate-gray toning over silver surfaces. Abrasions are light and unobtrusive. NGC ID# 2TGD, PCGS# 10995

**1880 Wailuku, Maui Plantation Token  
1 Real, Choice XF  
Medcalf 2TE-6**

- 4923 1880 Wailuku Plantation Token, 1 Real, XF45 PCGS Secure. M. 2TE-6.** Both Wailuku and its 19th-century sugar cane plantation were located on the island of Maui. One real tokens, equivalent to 12 1/2 cents, were struck on site by a blacksmith. This walnut-brown example displays light wear but is essentially unabraded. The obverse border is lightly granular at 3 and 6 o'clock. Listed on page 426 of the 2019 Guide Book. Population: 7 in 45, 13 finer (5/18). NGC ID# 2UBN, PCGS# 600512

- 1879 Thomas H. Hobron Railroad Token, MS62 Brown  
Medcalf 2TE-8, 12 1/2 Cent, Thin Planchet**

**4924** 1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, 6/2 Stars, Thin Planchet, MS62 Brown NGC. Medcalf 2TE-8, Variety 1. Two die varieties are known for the Thomas H. Hobron Railroad token. This one features a block 7 in the date, rather than a rounded 7, although there are many other distinguishing markers. Most examples of this private issue, which circulated in general commerce, were struck on thin, 1 mm planchets, as here. Both sides display pleasing reddish-brown color and a strong, well-centered impression. Few serious marks. Listed on page 426 of the 2019 Guide Book. Census: 3 in 62, 1 finer (4/18). PCGS# 515877 Base PCGS# 600515

**4925** 1882 Haiku Plantation One Rial Token AU53 PCGS. M. TE-15. A lightly abraded and minimally granular medium brown example with glimpses of lighter tan toning at the centers. The picturesque and popular Haiku tokens were valued at 12 1/2 cents in Federal coin. The sugar cane plantation was located in Maui, and outsourced its tokens to professional engravers, unlike the blacksmith-made varieties issued by competitors. Listed on page 426 of the 2019 Guide Book. NGC ID# 2UBZ, PCGS# 600518

**4926** 1882 Haiku Plantation One Rial Token AU58 PCGS Secure. M. TE-15. The Maui Haiku sugar cane plantation issued the most aesthetically attractive Hawaiian tokens of the 19th century. The denomination of one rial is a misspelling of the Spanish-American real, or eighth dollar. This medium to deep brown representative is nicely struck and shows only a single mark, near the O in ONE. Listed on page 426 of the 2019 Guide Book. Population: 8 in 58, 12 finer (4/18). NGC ID# 2UBZ, PCGS# 600518

**1882 Haiku Plantation Token  
One Rial, Medcalf TE-15, MS63 Brown**

**4927** 1882 Haiku Plantation One Rial Token MS63 Brown PCGS. M. TE-15. The Maui Haiku tokens were superior in both design and quality to other Hawaiian plantation tokens of the era, which were mostly crude blacksmith productions. The denomination, equivalent to an eighth of a dollar, is spelled phonetically. This mahogany-brown and stone-gray example exhibits satiny luster and lacks any mentionable marks. Incorrectly attributed as TE-6A by NGC. Listed on page 426 of the 2019 Guide Book. Census: 3 in 63 Brown, 2 finer (4/18). NGC ID# 2UBZ, PCGS# 600518

## GSA DOLLARS

**4928** 1878-CC Lines in Wing, VAM-11, GSA Soft Pack, MS64+ NGC. A Top 100 Variety. VAM-11 is the easiest 1878-CC die variety to identify, due to the many straight die lines within the eagle's wings. The variety is certainly known housed in hard plastic GSA holders, but soft pack examples are comparatively rare. The quality of the present near-Gem demonstrates how arbitrary the division was between hard plastic and soft pack distribution of the GSA hoard. Sharply struck, lustrous, and uncommonly free from contact. Toning is limited to a narrow orange peripheral band near TES OF AMERICA. NGC ID# 253M, PCGS# 518845 Base PCGS# 7080

**4929** 1881-CC GSA MS66 NGC. VAM-2. Glimpses of golden-brown toning accompany Liberty's curls and the right reverse margin, but this lustrous and splendidly preserved Carson City dollar is mostly white. The strike is sharp, and the eye appeal is outstanding. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126

**4930** 1881-CC GSA MS66 NGC. CAC. VAM-2. The 1881-CC has the second-lowest mintage among Carson City Morgans, less than the '89-CC, '79-CC, and '93-CC keys. Fortunately for collectors, the GSA holdings included many high-grade examples, such as the present lustrous Premium Gem. The virtually brilliant surfaces show only delicate indications of contact. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126

**4931** 1885-CC GSA MS65+ NGC. A brilliant and highly lustrous Gem that remains housed in its black GSA holder, now with the addition of an NGC grading band around the holder, this piece exhibits excellent eye appeal and untoned surfaces. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

**1890-CC Dollar, MS62  
Better GSA Issue, VAM-7 Variety**

**4932** 1890-CC GSA MS62 NGC. VAM-7. The first C of the mintmark is repunched east, and the top of an errant 0 is visible in the dentils beneath the primary 0 in the date to confirm the variety. Fewer than 4,000 pieces were part of the GSA distributions of the 1970s, adding to the appeal of this brilliant and lustrous example still resident in its NGC band-certified, original GSA holder with accompanying black box (no certificate). Many 1890-CC dollars are weakly struck and "washed out" in the centers, yet this example is quite sharp in those areas. Light bagmarks and abrasions determine the assigned grade. NGC ID# 255D, PCGS# 518878 Base PCGS# 7198

**4933** 1891-CC Spitting Eagle, VAM-3, GSA, MS62 NGC. A Top 100 Variety. A die lump beneath the beak explains the nickname. The first C in the mintmark is repunched north. A lustrous and brilliant scarcer date Carson City dollar. Pleasing for the grade, since the reverse is well-preserved, as is the obverse field. A GSA box accompanies the lot. NGC ID# 255H, PCGS# 544108 Base PCGS# 518881

## CERTIFIED MODERN PROOF SETS

### 1936 Five-Piece Proof Set PR64

Old Green Holders

Cent and Dime CAC-Approved

**4934** 1936 Five-Piece Proof Set PR64 PCGS. All five coins are housed in old green label holders. The cent and dime grades are confirmed by CAC. This low-mintage set includes:

**Cent — Type Two — PR64 Red. CAC.** A splendid orange-red and lime-green Choice cent.

**Nickel — Type Two — PR64.** Faint lilac and straw-gold toning visits this sharply struck near-Gem. One small fleck is seen above the bison's head.

**Dime PR64. CAC.** Fully struck and pristine. Brilliant aside from faint horizontal gray streaks on the lower reverse.

**Quarter PR64.** Light lilac toning graces satiny and undisturbed surfaces. The strike is good and the eye appeal is superior.

**Half Dollar PR64.** Faintly freckled blue-green and tan-gold. Well struck and pleasing. (Total: 5 coins)

### 1936 Proof Set, PR63 to PR64 Two Green CAC, Three Gold CAC Five First-Generation Holders

**4935** 1936 Five-Piece Proof Set, PR63 to PR64 PCGS. CAC. The well-matched coins are individually housed in first-generation PCGS holders. Included are:

**Cent — Type One — PR63 Red and Brown. CAC.** This Satin Finish proof is sharp and shows original copper-orange and golden color. Scattered carbon specks contribute to the grade.

**Nickel — Type One — PR64. CAC.** A beautiful Satin Finish coin with champagne and lilac toning across luminous surfaces and sharp devices. No contact marks are immediately discernible on this attractive proof.

**Dime PR64. Gold CAC.** A few flecks of russet toning appear on the glimmering silver surfaces of this Choice proof, which CAC determines to be undergraded by at least one numeric point.

**Quarter PR64. Gold CAC.** Similar in appearance to the dime, being silvery overall with flecks of russet occasionally seen. This near-Gem is sharp, and according to CAC, undergraded.

**Half Dollar PR64. Gold CAC.** The flagship coin in this set is sharp and exceptionally well-preserved — so much so that it has received a Gold CAC endorsement. Light golden border toning surrounds untoned interiors. (Total: 5 coins)

## ERRORS

1910 Liberty Nickel, Fine 12  
Rotated Double Struck in Collar

**4936** 1910 Liberty Nickel — Double Struck in Collar — Fine 12 ANACS. The first strike was normal, but the coin remained in the die chamber, rotated approximately 65 degrees clockwise, and was struck again. No planchet was fed in between strikes. Despite the dramatic error, the coin remained in commerce for some time, or was perhaps carried as a pocket piece by a finder. The cream-gray surfaces show only a single noticeable mark, on the O in OF.  
*From The Emily A. Blake Collection.*

1885-O Silver Dollar, AU53  
Struck 8% Off Center

**4937** 1885-O Morgan Dollar — Struck 8% Off Center — AU53 PCGS. Struck noticeably off-center toward 12 o'clock. All legends are intact, but the dentils near 12 o'clock, and on the reverse near 6 o'clock, are extremely narrow. Meanwhile, the dentils at 6 o'clock and opposite at 12 o'clock are softly defined and accompanied by a curved broad area of unstruck surface. A fairly large strike-through (as made, and a secondary mint error) affects the first L in DOLLAR. Minimally abraded and without apparent circulation wear, but the luster is subdued and the silver-gray surfaces are evenly granular.

## NATIVE AMERICAN PORTRAIT GALVANOS

AT-ZI-DI  
Probably Navajo  
(1904) Sawyer Bronze Galvano

All galvanos shown reduced size.  
Actual size 125 mm (5-inch diameter).

**4938** (1904) Bronze Galvano, Edward Warren Sawyer, AT-ZI-DI, Uncertain Tribe, Medalllic Art Company. Uniface. 125 mm. Circa 1904 with incuse letters and illegible lettering at the lower right. The style of this sculpture, with incuse lettering, closely matches that of Yuma Indian Ne-I-So-Meh. The appearance of the individual, with a headband and hair in a bun at the back of the head, closely matches later Navajo natives in the Sawyer series. We know of only two examples of this galvano, both large diameter pieces. The other example is in the collection of the Whitney Western Art Museum in Cody, Wyoming.  
*From Sawyer's Native American Portrait Galvanos.*

ISH-KI-LA-CAI  
Probably Navajo  
(1904) Sawyer Bronze Galvano

**4939** (1904) Bronze Galvano, Edward Warren Sawyer, ISH-KI-LA-CAI, Uncertain Tribe, Uncertain Location, Medalllic Art Company. Uniface. 125 mm. Pleasing, semi-glossy olive-brown surfaces. Probably circa 1904, as the last two, with incuse lettering that differs from his other work. The lettering behind the Indian's shoulder is illegible. The hair style and bandana around the Indian's head suggest that AT-ZI-DI in the previous lot, and ISH-KI-LA-CAI in this lot are closely related and likely from the same tribe. We know of only two examples of this galvano, both large diameter pieces. The other example is in the collection of the Whitney Western Art Museum in Cody, Wyoming.  
*From Sawyer's Native American Portrait Galvanos.*

(1904) Navajo Indian CAPITAN  
Unique Sawyer Bronze Galvano

(1904) Navajo Indian QUINLICHINI-NEZ  
Undated Sawyer Bronze Galvano

4940 (1904) Bronze Galvano, Edward Warren Sawyer, CAPITAN, Navajo Tribe, Ganado, Arizona, Medallic Art Company. Uniface. 125 mm. Circa 1904, this piece was sculpted on Sawyer's first western excursion to Ganado, Arizona. Attractive emerald patina appears on glossy chocolate-brown surfaces. A detailed census of 41 varieties of Sawyer medallions finds no other examples of the Capitan medallion in any private or museum collections.

A 63-year-old Native American named Capitan appeared in the 1920 Federal Census for St. Michaels, Apache County, Arizona, just under 30 miles from Ganado. While we are unable to confirm that they were the same, it seems likely. Capitan lived with his two wives aged 60 and 30, and his six year old daughter, Grace Capitan. He was a doctor according to that record.

*From Sawyer's Native American Portrait Galvanos.*

Navajo Indian EST-ZAN-LOPA  
1904 Sawyer Bronze Galvano

4941 1904 Bronze Galvano, Edward Warren Sawyer, EST-ZAN-LOPA, Navajo Tribe, Ganado, Arizona, Medallic Art Company. Uniface. 125 mm. Glossy chocolate-brown surfaces display traces of mahogany on the devices. Two large medallions are known, along with six small size (70 mm.) examples. This example and one other are the only galvanos known outside of museums. Our census has accounted for 216 medallions in total for all of the varieties. In his 1913 *American Journal of Numismatics* article titled "My Work Among the Indians," Sawyer noted that Est-Zan-Lopa was "a little girl basket weaver."

*From Sawyer's Native American Portrait Galvanos.*

4942 (1904) Bronze Galvano, Edward Warren Sawyer, QUINLICHINI-NEZ, Navajo Tribe, Ganado, Arizona, Medallic Art Company. Uniface. 125 mm. Circa 1904 from Sawyer's first trip to Indian reservations. His 1904 trip was exclusively to the Navajo reservation at Ganado, Arizona. Pleasing mahogany and steel-brown with glossy surfaces. Just two examples of this medallion are known, and both are large diameter pieces. The other example is in the collection of the Whitney Western Art Museum in Cody, Wyoming.

The U.S. Indian Census Rolls dated 1915 for Navajos living in the Cornfields, Ganado, and Wide Ruins Districts include the family of 78-year-old Kinlacheney Nez who had one wife, three daughters, and two sons. He would have been 67 years old in 1904 when this relief was created. The connection is clearly plausible.

*From Sawyer's Native American Portrait Galvanos.*

Arapahoe Indian BA-HAW  
1912 Sawyer Bronze Galvano

4943 1912 Bronze Galvano, Edward Warren Sawyer, BA-HAW, Arapahoe Tribe, Geary, Oklahoma, Medallic Art Company. Uniface. 125 mm. Lustrous deep steel surfaces exhibit slight corrosion that creates an attractive stippled appearance. Two large size medallions and five small diameter pieces are currently identified. This is the only example that we know of outside of museums.

Ba-Haw was also known as "Big Boy" or "Thunder." An Arapahoe named Thunder appeared in the 1903 Arapahoe Census. He was born about 1846 and was married to Julia Thunder who was born about 1865. They had a daughter, Clara Thunder, born about 1895, and a son, Frank Thunder, born in 1902.

*From Sawyer's Native American Portrait Galvanos.*

**Yuma Indian NE-I-SO-MEH  
(1904) Sawyer Bronze Galvano**

**4944 Undated Bronze Galvano, Edward Warren Sawyer, NE-I-SO-MEH, Yuma Tribe, Yuma, Arizona, Medallic Art Company.** Uniface. 125 mm. Intermingled mahogany and steel surfaces. Probably circa 1904, from Sawyer's first visit to Arizona. The lettering is incuse and the style is completely different from the majority of his work, suggesting this was one of his earliest works. A second version of this galvano exists with well-formed, raised letters, signed "Sawyer, Yuma, 1904."

The Yuma Indian Reservation is located in California, on the border with Arizona and near the Mexican border. The reservation was established in 1884, just two decades before Sawyer made his first trip to the American west. After visiting the Yuma reservation, he traveled to Ganado, Arizona. Ne-I-So-Meh was the first Indian that Sawyer sculpted.

*From Sawyer's Native American Portrait Galvanos.*

**Arapahoe Indian HAN-NI-AIT  
1912 Sawyer Bronze Galvano**

**4945 1912 Bronze Galvano, Edward Warren Sawyer, HAN-NI-AIT, Arapahoe Tribe, Geary, Oklahoma, Medallic Art Company.** Uniface. 125 mm. Reddish chocolate-brown surfaces exhibit traces of rose patina on the high points. Two large size and five small size examples are known, including this medallion that is the only one outside of museums.

Also known as Coyote Robe, he was born about 1864 and died in 1927. He appeared in a number of Oklahoma Indian Census Rolls, residing in Concho, Oklahoma, just 20 miles east of Geary. His wife was Long Hair, born about 1865. His daughter was Lottie Coyote, born about 1896, and his son was August Coyote Robe, born about 1901.

*From Sawyer's Native American Portrait Galvanos.*

**Cheyenne Indian MA-KI-NA-KO  
1912 Sawyer Bronze Galvano**

**4946 1912 Bronze Galvano, Edward Warren Sawyer, MA-KI-NA-KO, Cheyenne Tribe, Lame Deer, Montana, Medallic Art Company.** Uniface. 125 mm. Attractive reddish chocolate-brown surfaces show insignificant corrosion points. Two large medallions and five small size examples are known, and only one other is known in a private collection. Ma-Ki-Na-Ko was also known as Big Bear or Old Bear. He was apparently involved in the massacre of the Seventh Cavalry but no further information has been located.

*From Sawyer's Native American Portrait Galvanos.*

**Crow Indian CURLEY  
1912 Sawyer Bronze Galvano**

**4947 1912 Bronze Galvano, Edward Warren Sawyer, CURLEY, Crow Tribe, Crow Agency, Montana, Medallic Art Company.** Uniface. 125 mm. The famous Crow scout for Custer, his name appears as Curley or Curly in various sources. He is perhaps the best remembered of Sawyer's Indians today. The rich mahogany surfaces exhibit olive toning on the high points. This is the only example that we know of outside of museums. One other large size and five small size examples are known.

Curley was born about 1856 and died in 1923. He was buried at the Big Horn National Cemetery. He was a scout for Custer's battalion of the Seventh Cavalry who witnessed the battle at Little Big Horn. He was known to be the sole survivor of Custer's troops.

*From Sawyer's Native American Portrait Galvanos.*

Crow Indian ECH-SPA-DI-E-ASH  
1912 Sawyer Bronze Galvano

4948 1912 Bronze Galvano, Edward Warren Sawyer, ECH-SPA-DI-E-ASH, Crow Tribe, Crow Agency, Montana, Medallic Art Company. Uniface. 125 mm. Glossy, rich mahogany surfaces exhibit exquisite details. Two large size and five small size examples are known to the cataloger, and all others are held in museum collections.

He was also known as Other Medicine or Hunts the Enemy. He was a Crow medicine man who posed for the cover of *My Friend the Indian* by Major James McLaughlin, published in 1910.  
*From Sawyer's Native American Portrait Galvanos.*

Kickapoo Indian BE ME THA  
1912 Sawyer Bronze Galvano

4949 1912 Bronze Galvano, Edward Warren Sawyer, BE ME THA, Kickapoo Tribe, McLoud, Oklahoma, Medallic Art Company. Uniface. 125 mm. Glossy mahogany devices stand out against steel-brown fields. There are two large size and five small size examples of this medallion known to the cataloger. This is the only one of either size outside of museums.

*From Sawyer's Native American Portrait Galvanos.*

Oglala Sioux Indian HUNPE-KA  
1912 Sawyer Bronze Galvano

4950 1912 Bronze Galvano, Edward Warren Sawyer, HUNPE-KA, Oglala Sioux Tribe, Manderson, South Dakota, Medallic Art Company. Uniface. 125 mm. Outstanding light chocolate-brown surfaces with hints of olive. Two large size and five small size examples are known to the cataloger, and all others are in museum collections.

Hunpe-Ka was also known as Moccasins or Picket Pin. A 1907 interview at Manderson, South Dakota reveals that Picket Pin, or Hum-Pi-Ka, was 56 years old and the son of Little Wound, chief of the Ki-Ya-Xas band.

*From Sawyer's Native American Portrait Galvanos.*

Osage Indian KAH-WAH-SE  
1912 Sawyer Bronze Galvano

4951 1912 Bronze Galvano, Edward Warren Sawyer, KAH-WAH-SE, Osage Tribe, Pawhuska, Oklahoma, Medallic Art Company. Uniface. 125 mm. A pleasing example that exhibits semi-glossy light chocolate-brown surfaces. Like so many others in this offering, the cataloger is aware of two large size and five small size examples of this variety, with just one other in a private collection.

Kah-Wah-Se was also known as Yellow Horse and was a member of the E-Pa-Tsa clan of Osage Indians. He was married to Kea-Sum-Pa of the Pon-Ka Peace Maker clan. Yellow Horse appeared in several *Indian Census Rolls* in the early 20th century for Oklahoma. A representative 1913 Census states that he was born about 1857, and that he had a 46-year-old wife named Ke-Ah-Som-Pah, a 20-year-old daughter named Pun-Kah-Me-Tsa-He whose English name was Maggie Bates, a 16-year-old son named Ah-Kah-Hu whose English name was John Bates, and a 14-year-old daughter named Hun-Kah-Me-Tsa-He. The family also included two older sons who were born about 1887 and 1890.

*From Sawyer's Native American Portrait Galvanos.*

Pawnee Indian SAH-COOH-RU-TU-REE-HOO  
1912 Sawyer Bronze Galvano

4952 1912 Bronze Galvano, Edward Warren Sawyer, SAH-COOH-RU-TU-REE-HOO, Pawnee Tribe, Pawnee, Oklahoma, Medallic Art Company. Uniface. 125 mm. Reddish steel-brown surfaces exhibit microscopic corrosion. This example and one other large size galvano are known, along with five small size examples, and all others are held in museum collections.

Sah-Cooh-Ru-Tu-REE-HOO, also known as Big Sun or Seeing Eagle, was married to Pee-Ru-Ths, whose image was also sculpted by Sawyer. A 1903 Census of Pawnee Indians appears online at genealogytrails.com, and notes that Seeing Eagle was born about 1835. He was married to Maggie Peerootz who was born about 1864, and he had a stepson, Edgar Peetwotz, who was born about 1892.

*From Sawyer's Native American Portrait Galvanos.*

Pawnee Indian STAH-PE-U  
1912 Sawyer Bronze Galvano

4953 1912 Bronze Galvano, Edward Warren Sawyer, STAH-PE-U, Pawnee Tribe, Pawnee, Oklahoma, Medallic Art Company. Uniface. 125 mm. This lovely Indian maiden posed for Sawyer at a young age, retaining the appearance of a child. An attractive mahogany example, this medal exhibits rose patina on the high points with traces of greenish-steel verdigris. There are only seven examples known, including this large size piece and one other. The present representative is the only one known outside of museums.

*From Sawyer's Native American Portrait Galvanos.*

Southern Cheyenne Indian NOCO-TO-MAH  
1912 Sawyer Bronze Galvano

4954 1912 Bronze Galvano, Edward Warren Sawyer, NOCO-TO-MAH, Cheyenne Tribe, Geary, Oklahoma, Medallic Art Company. Uniface. 125 mm. Glossy magenta surfaces with excellent eye appeal. Two large size and six small size examples are known, including one other held in a private collection. Noco-To-Mah was also known as Bear Robe.

*From Sawyer's Native American Portrait Galvanos.*

Wichita Indian Chief TO-WAK-ONI-JIM  
1912 Sawyer Bronze Galvano

4955 1912 Bronze Galvano, Edward Warren Sawyer, Chief TO-WAK-ONI-JIM, Wichita Tribe, Anadarko, Oklahoma, Medallic Art Company. Uniface. 125 mm. Glossy rose surfaces provide excellent eye appeal. This example and another large size galvano in the collection of the Whitney Western Art Museum are known, along with five small size examples that are all in museum collections.

Sawyer wrote in his *American Journal of Numismatics* article that "Jim has been a great scout in his day and always friendly to Uncle Sam. He is a great orator and is found at many meetings speaking to his people." This chief of the Wichita tribe appears in the 1903 *Indian Census* as Jim Tow-Akoni, and in the 1911 Indian census as Jim-To-Wak-O-Ni, born about 1847. His wife was Hos-Que-Day-As-Sun-Odi-Say-Us, born about 1863. The 1903 Census reports a nine-year-old son whose English name was Grover Cleveland.

## U.S. PRESIDENTS & STATESMEN

1857 Buchanan Inauguration Medal  
MS61, White Metal

**4956** 1857-Dated James Buchanan Inauguration Medal MS61 NGC. DeWitt-JB-1856-1. White metal. 61 mm. The reverse peripheral legend reads: THE UNION MUST AND SHALL BE PRESERVED, ironic given Buchanan's inaction regarding Southern secession. The Sullivan reference states that the dies were engraved by Anthony Paquet. A well-struck and satiny specimen with a lightly marked obverse field and occasional granularity, particularly along the lower-reverse margin.

## MISCELLANEOUS MEDALS AND TOKENS

**4957** Silver 1903 Vespucci ANS Plaque by Brenner. Silver, 59.3 x 71.5 mm. 1503-1903 ANS commemorative Amerigo Vespucci plaque designed by Victor D. Brenner of Lincoln cent fame. Italian explorer Vespucci made two important voyages to the east coast of Latin America between 1499 and 1502, prompting him to assert that it was a new continent — a bold claim at a time when other explorers crossing the Atlantic thought they were arriving in Asia. The plaque shows themes of navigation, exploration, and besides shows some beautiful cartography. Ice-blue and magenta toning appears on both sides. The V.D.B. initials noted near the obverse rim are instantly recognizable to Lincoln cent collectors. The original burgundy cardboard box accompanies.

## SO-CALLED DOLLAR

**4958** 1933 Nevada Dollar MS63 PCGS. HK-821, R.6. Silver. 38 mm. Light tan toning visits semiprooflike silver-gray surfaces. The dies are in-between coin and medal turn. The scarce "Nevada dollar" is an issue of Sterling Investment Co. of Reno, Nevada. The Pedley-Ryan firm supplied the planchets and the reverse impression, as seen on HK-825. Most of the production was melted. As of (4/18), PCGS has certified four examples in all grades. Population: 2 in 63, 0 finer (4/18). PCGS# 643556

## EXPOSITIONS AND FAIRS

Souvenir Ladle From Copy Die  
Octagonal 'Slug' Impression

**4959** Souvenir Octagonal "Slug" Ladle. Presumably made in the early 20th century, possibly in conjunction with the 1915 Panama-Pacific Exposition, this fascinating ladle (or large-bowl spoon) is approximately 150 mm long. The bowl of the ladle measures 54 mm in diameter, while the handle is approximately 100 mm in length. The ladle is struck in sterling silver throughout, with gold plating inside the bowl, although some of the plating is now worn thin. A copy die impression of the Krag-14 1852 900 Thous. Assay Office octagonal fifty is impressed into the bowl. The handle finial forms a Gold Rush miner with his fist raised in triumph. A similar spoon brought \$1,527.50 in our January, 2014 FUN Signature Auction as lot 6308.

***End of Session Three***

# SESSION FOUR

## PATTERNS

(1853) Uniface Small Cent in Billon  
Judd-151d, PR63

4960 (1853) Uniface Small Cent, Judd-151d, Pollock 181, Low R.7, PR63 PCGS. CAC. This uniface unfinished die trial has ONE CENT in the center and is surrounded by a wreath. Struck in billon with a plain edge. These pieces were also struck in copper and copper-nickel. Fewer than a half-dozen are known in each of the three compositions. According to USPatterns.com the dentilated blank side was probably struck from the same die as the gold dollar. The surfaces are dull gray overall with brighter accents around the devices. Remarkably well-preserved. PCGS# 62409

1855 Flying Eagle Cent in Copper-Nickel  
Judd-171, AU Details

4961 1855 Flying Eagle Cent, Judd-171, Pollock-196, Low R.7 — Damage — PCGS Genuine. AU Details. The obverse features an eagle flying to the left, surrounded by 13 stars with the date at the bottom. The reverse shows a wreath with four leaves under the E in STATES. The diameter is similar to a quarter dollar, intermediate between the large and small cents. Struck in copper-nickel alloy with a plain edge. The surfaces are light gray overall. The nature of the damage that is mentioned is a mystery to us. The center of each side is generally flat, while the extreme edges of the peripheral devices, the stars, date, and reverse lettering are sharper defined near the rims.

1858 Flying Eagle Cent Pattern in Copper-Nickel  
Judd-193, PR64

4962 1858 Flying Eagle Cent, Judd-193, Pollock-236, R.5, PR64 PCGS. A popular early pattern that utilizes the regular dies for the Flying Eagle cent on the obverse paired with a reverse that features an oak wreath and a more ornate shield than on the adopted design. Struck in copper-nickel with a plain edge. Minor spotting and deep violet patina are seen over both sides, taking the focus away from an angling pinscratch below the tail.  
Ex: Long Beach Signature (Heritage, 6/2004), lot 9567. NGC ID# 29BD, PCGS# 11844

1858 Indian Cent With Laurel Wreath Reverse  
Judd-208, Pollock-259, PR63

4963 1858 Indian Cent, Judd-208, Pollock-259, R.1, PR63 NGC. Ex: Exemplar Collection. The Indian Head cent as adopted in 1859 with rounded bust. The reverse has clusters of five leaves in the wreath. This is the Centered Date Pollock variant. The combination of these two design features makes this a Pollock-259. Struck in copper-nickel with a plain edge. The surfaces are uncommonly bright with even reddish-tinged tan patina. Fully struck. NGC ID# 29BP, PCGS# 11885

1858 Indian Cent in Copper-Nickel, PR64  
Judd-213, Centered Date, Low Leaves Variant

4964 1858 Indian Cent, Judd-213, Pollock-258, Snow-PT22, R.5, PR64 NGC. Eagle Eye Photo Seal, card included. The obverse is the Indian type as issued in 1859, but dated 1858. The reverse is the same as used on Flying Eagle cents. The Broad Bust Point, Centered Date, Low Leaves Pollock and Snow subvariety of Judd-213. Struck in copper-nickel with a plain edge. Several copper-nickel variants were struck for the Indian cent in 1858, but only two used the adopted broad wreath on the reverse. This is a well-preserved example with bright mint luster and sharp definition throughout. NGC ID# 29BV, PCGS# 11897

1859 Indian Cent Pattern, MS65  
Transitional Judd-228 Example

4965 1859 Indian Cent, Judd-228, Pollock-272, R.1, MS65 PCGS. A transitional pattern that combines the issued 1859 Indian Head cent obverse with the Shield Reverse first issued for commerce in 1860. Struck in copper-nickel with a plain edge. This satiny Gem is needle-sharp aside from the top of the shield. Lightly toned in honey and rose shades. A few minute flecks are of no importance. Housed in a first-generation holder.  
Ex: Long Beach Signature (Heritage, 9/2008), lot 3426; Los Angeles Signature (Heritage, 8/2009), lot 2255. NGC ID# 29C8, PCGS# 11932

1866 Washington Five Cent Dies Trial in Lead  
'Judd-520a,' Pollock-547, AU58

4966 1866 Washington Five Cent Lead Dies Trial, 'J-520a,' Pollock-547, AU58 PCGS Secure. The obverse shows a portrait of Washington facing right with UNITED STATES OF AMERICA around and date below. The reverse is from the Without Rays dies adopted for regular-issue coinage in 1867. Struck in lead on a broad planchet with a plain edge. These Washington five cent patterns were privately made from official government dies. Neil Musante suggests 19th century dealer John W. Haseltine or someone in his employ was able to procure the dies and sold these mulings to collectors. Examples are known in silver, nickel, copper, brass, and lead. Five lead examples are known, three of which have a cracked reverse and two that are uncracked, suggesting two striking periods. This dies trial, apparently unique and unlisted in the Judd or Musante references, is one of three with the crack that extends from the second S in STATES down through the 5, the star below, and the E in CENT to the lower rim. Pollock writes, "struck on a crude oversize planchet." The unstruck area of the planchet exhibits nicks and flakes on each side but is generally smooth. Washington's portrait, the stars, and denomination are well-detailed, if slightly uneven. This is an important pattern and a curious piece of Washingtonia that requires additional research.  
Ex: Metropolitan Washington Sale (Kagin's, 7/1975), lot 1125; ANA Auction (Kagin's, 8/1977), lot 2109; Empire State Collection (Stack's, 1/1997), lot 1265.

Base PCGS# 60717

1868 Cent, Struck in Nickel  
Judd-605, PR66

4967 1868 One Cent, Judd-605, Pollock-670, R.5, PR66 PCGS. The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the laurel wreath. Struck in nickel with a plain edge. This design was struck in nickel, copper, and aluminum. The nickel impressions are by far the most frequently encountered (in aluminum it is unique). The planchet for this piece shows differing degrees of preparation in the Mint. The obverse is bright with nicely reflective fields, while the reverse is less polished with horizontal streaks of granularity across that side. An untoned example. NGC ID# 29UU, PCGS# 60817

1868 Three Cent Nickel in Nickel  
Judd-618, PR63

4968 1868 Three Cent Nickel, Judd-618, Pollock-687, R.4, PR63 ANACS. Similar to the regular issue, but the Roman numerals on the reverse are smooth instead of fluted. Struck in nickel with a plain edge. Examples were also struck in copper and aluminum, but the nickel strikes are by far the most obtainable. The surfaces are nearly brilliant but close examination shows slight oil-slick iridescence over each side. The only mark of any note is a shallow scratch in the lower reverse field. NGC ID# 29NA, PCGS# 60834

1868 Five Cent in Nickel, PR64  
Judd-633, Pollock-704 (Low Date)

4969 1868 Five Cents, Judd-633, Pollock-704, R.6, PR64 PCGS. CAC. The obverse design resembles the adopted three cent nickel, but on a larger planchet, with minor design modifications appropriate to the increased diameter. The reverse features a Roman numeral V in the center, with a wreath encircling, scroll with IN GOD WE TRUST and Maltese cross above. This is an example of the scarcer Low Date variant (Pollock-704). Struck in nickel with a plain edge. The 1 in the date is closer to the milling than the truncation. Glassy and delicately toned with few contact marks for the grade. Housed in a first generation holder. NGC ID# 29NN, PCGS# 60851

1869 Standard Silver Ten Cents in Silver  
Judd-702, PR65

4970 1869 Standard Silver Ten Cents, Judd-702, Pollock-781, R.5, PR65 PCGS. Standard Silver design with a diadem in Liberty's hair on the obverse. The reverse has an oak and laurel wreath with STANDARD SILVER above and the date below with 10 CENTS in the center. Struck in silver with a reeded edge. GOD has been recut. This lovely pattern exhibits deep cobalt-blue and rose-violet colors and is well-struck in all regards. The surfaces are essentially undisturbed beneath the blanket of deep patina.  
Ex: Central States Signature (Heritage, 5/2004), lot 10618. NGC ID# 29RF, PCGS# 60927

1869 Standard Silver Ten Cents in Copper

Judd-704, PR65 Red and Brown

The Only Red and Brown Piece Graded

4971 1869 Standard Silver Ten Cents, Judd-704, Pollock-783, R.7, PR65 Red and Brown PCGS. CAC. Standard Silver design with the head of Liberty facing right with a diadem in her hair, motto below, and UNITED STATES OF AMERICA above. The reverse has 10 CENTS in the center, surrounded by a wreath of oak and laurel, with STANDARD SILVER 1869 around the margin. Struck in copper with a reeded edge. This year and design combination was also struck in silver and aluminum, both reeded and plain edge variants. One is hard pressed to see the brown on this piece. Each side is deep cherry-red with a few tiny flecks of carbon noted on the reverse.

From The Reilly Cody Collection. NGC ID# 29RH, PCGS# 70929

1869 Standard Silver Half in Silver  
Judd-748, PR61

4972 1869 Standard Silver Half Dollar, Judd-748, Pollock-831, R.5, PR61 PCGS Secure. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty is wearing a diadem inscribed LIBERTY, the legend is around the border, and the motto IN GOD WE TRUST is on a scroll at the bottom. The reverse exhibits the denomination 50 CENTS within a wreath of oak and laurel. STANDARD SILVER is at the periphery, the date 1869 is below the wreath. Struck in silver with a reeded edge. The surfaces are subdued from cleaning but still retain significant mirrors in the fields. Light peripheral toning. NGC ID# 26VS, PCGS# 60977

1869 Standard Silver Half in Silver  
Judd-755, Toned PR63

4973 1869 Standard Silver Half Dollar, Judd-755, Pollock-839, High R.6, PR63 PCGS. Standard Silver design for the half dollar with Liberty wearing a ribbon inscribed LIBERTY on the obverse. The ribbon is ornamented with a star, the legend UNITED STATES OF AMERICA is around the periphery, and the motto IN GOD WE TRUST is on a scroll below. On the reverse, the denomination 50 CENTS is positioned within a wreath of oak and laurel. STANDARD SILVER is above, the date, 1869, is below. Struck in silver with a plain edge. The surfaces are hazy blue-gray. Significant reflectivity is seen in the fields on the reverse. NGC ID# 29T6, PCGS# 60985

1870 William Barber Half Dime in Copper  
Judd-817, Blue-Green PR66 Brown

4974 1870 Half Dime, Judd-817, Pollock-906, High R.6, PR66 Brown PCGS. The William Barber half dime pattern obverse, which, although somewhat ungainly (Liberty appears to have only one leg, and the Liberty pole springs up vertically with nothing holding it up), nonetheless has some artistic merit. The reverse is the regular-issue half dime die. Struck in copper with a reeded edge. Denomination sets of this pattern design were struck by the Mint for sale to well-placed numismatists. Ocean-blue and gold colors intermingle throughout this intricately struck and well-preserved Premium Gem.

Ex: Denver Signature (Heritage, 8/2006), lot 1452; Dallas Signature (Heritage, 11/2006), lot 1845.

From The Reilly Cody Collection. NGC ID# 29UU, PCGS# 61061

1870 Seated Liberty Dime in Copper  
Judd-834, PR66 Brown  
Remaining Mint Red, Ex: Newman

4975 1870 Ten Cents, Judd-834, Pollock-924, High R.6, PR66 Brown NGC. CAC. The William Barber obverse depicts a seated figure of Liberty facing left and supporting a shield in her right hand with an olive branch in her left. A free-standing liberty pole is present behind the shield. The reverse is from a regular issue Seated dime reverse die. Struck in copper with a plain edge. Among the several hundred variants of 1870-dated patterns, this series is one of the more completable ones. The silver and copper strikings of this die pairing are obtainable with patience, and only the aluminum pieces present a significant collecting challenge.

Unlike most of the copper pieces in this series, this example retains moderate remnants of the original red surrounding the devices, especially on the reverse. Elsewhere the surfaces are deep blue-gray and violet. The strike is well-defined in most areas with just the slightest weakness on the head of Liberty and the upper leaves of the wreath. There are no obvious marks or spots that would serve as pedigree identifiers. This is the finest Brown example certified by either of the major services (4/18).

Ex: Eric P. Newman Collection (Heritage, 4/2013), lot 3984, where it brought \$3,172.50.

From The Reilly Cody Collection. NGC ID# 29VA, PCGS# 61078

1870 Standard Silver Dime in Copper  
Judd-839, PR64 Brown

**4976** 1870 Standard Silver Ten Cents, Judd-839, Pollock-930, High R.7, PR64 Brown NGC. On the obverse, a Liberty Head with cap and three stars is in the center, with UNITED STATES OF AMERICA around and IN GOD WE TRUST on a scroll below. The reverse shows 10 / CENTS / 1870 inside an open agricultural wreath with STANDARD along the upper border. Struck in copper with a reeded edge. This near-Gem proof is strikingly toned with skeins of copper-gold streaking through the deep blue-brown surfaces.

Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4564, where it realized \$2,300.

From The Reilly Cody Collection. NGC ID# 22SX, PCGS# 61083

1870 Standard Silver Quarter in Silver  
Judd-894, PR65 Cameo, Gold CAC

**4977** 1870 Standard Silver Quarter Dollar, Judd-894, Pollock-1001, R.5, PR65 Cameo PCGS. Gold CAC. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty wears a ribbon inscribed LIBERTY, the legend UNITED STATES OF AMERICA is at the periphery, the motto IN GOD WE TRUST is on a scroll below. The reverse depicts the denomination 25 CENTS and the date 1870 within a wreath of corn and cotton. The word STANDARD is at the top. Struck in silver with a reeded edge. The reeded edge pieces in silver are known with thin and thick planchets. This appears to be a thin planchet variant. The outstanding surface quality is readily apparent, as reinforced by the Gold CAC sticker. Deeply reflective mirrors on each side with frosted devices that yield the Cameo designation. Exceptional quality. PCGS# 861138 Base PCGS# 61138

1870 Standard Silver Quarter in Copper  
Judd-920, PR64 Brown

**4978** 1870 Standard Silver Quarter Dollar, Judd-920, Pollock-1024, High R.7, PR64 Brown PCGS. CAC. Ex: Denali Collection. Liberty faces right and wears a headband ornamented by a large star. IN GOD WE TRUST is below within a scroll, and UNITED STATES OF AMERICA is above. The reverse displays STANDARD SILVER and the date above and beneath an oak and laurel wreath, which crowds the denomination, 25 CENTS. Struck in copper with a reeded edge. Beautiful iridescence lends great visual appeal and is enhanced even more by the bright, reflective fields on each side.

Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4569, where it realized \$2,760.

From The Reilly Cody Collection. NGC ID# 29XU, PCGS# 61164

1879 Goloid Metric Dollar in Silver  
Judd-1626, AU Details

**4979** 1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4 — Polished — PCGS Genuine. AU Details. The William Barber Goloid Metric dollar designs combines a capped Liberty Head with a reverse carrying the statutory as well as elemental inscriptions. A circle of stars around the central text breaks the otherwise continuous wording. Allegedly struck in goloid (a silver alloy that includes a small portion of gold) with a reeded edge. The surfaces are bright from polishing with just a faint suggestion of color on the reverse.

**1882 Liberty Nickel Pattern in Copper**

Judd-1691, PR64 Brown

Ex: Eric P. Newman

**4980 1882 Liberty Head Five Cents, Judd-1691, Pollock-1893, High R.6, PR64 Brown NGC. CAC.** The obverse appears the same as the regular die of 1883, but it is actually struck from an obverse die with a slightly different arrangement of the stars. The reverse is as the first variety of 1883, the "nickel without CENTS." Struck in copper with a plain edge. Judd-1691 is a popular issue and is reasonably available in the context of the pattern series. This design was also struck in nickel (Judd-1690) and aluminum (Judd-1692). Curiously, Robert Coulton Davis did not list this variety in his seminal work on patterns in *The Coin Collectors Journal*, even though he had a specimen in his collection — lot 1131a of the R.C. Davis Collection (New York Coin & Stamp, 1/1890). Perhaps he acquired his example after publishing his research.

Pleasing shades of chestnut-brown toning cover much of the well-preserved surfaces of this attractive Choice example, with a few hints of original red and blue intermingled. The design elements are well-detailed and surface marks are minimal. Areas of bright reflectivity show at intervals beneath the patina.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$17.50; Eric P. Newman Collection (Heritage, 4/2013), lot 4035, where it realized \$3,965.63.

From The Reilly Cody Collection. NGC ID# 3AH8, PCGS# 62096

**1884 One Cent Pattern in Nickel**

**Eastman Johnson's 'Holey Cent'**  
Judd-1721, PR66, Ex: Newman

**4981 1884 One Cent, Judd-1721, Pollock-1929, R.5, PR66 NGC.** The Eastman Johnson "holey cent" design. The planchet is holed in the center. The obverse has UNITED STATES OF AMERICA above with the date below, and no other design or ornament. The reverse shows ONE CENT above with an inverted shield and wheat stalks below, within fields that are open. Struck in nickel with a plain edge. Thick and thin variants are known. This piece was struck on a thin planchet and shows a smaller perforation. USPatterns.com states that about two dozen are known. Delicate champagne toning appears on both sides of this fully mirrored Premium Gem. The minimal design elements suggest a bold strike with a few trivial planchet flakes and lint marks as made.

Ex: Eric P. Newman Collection, Part I (Heritage, 4/2013), lot 4043, where it realized \$6,462.50. NGC ID# 2AL9, PCGS# 62150

**(1870s) Uniface Eagle Die Punch in Copper**

**4982 (circa-1870s) Eagle Punch Die Trial Uncertified.** 6.7 gm. 41 mm. A uniface copper disc, almost wafer thin, with a granular reverse. The obverse exhibits a large standing eagle in relief, complete but barely within the diameter of the piece. The left, right, and lower borders are tooled, but the eagle itself appears as made aside from steel-gray high-point toning. The eagle punch was engraved in fine style, and resembles many of the eagles seen on patterns from the mid-to-late 1870s, such as Judd-1554. However, the eagle is not a perfect match for a device on any known pattern.

From The Collection of William Rau, Part II.

**1875 Twenty Cent Die Trial, MS63  
Judd-A1875-1, Struck in White Metal**

**4983 1875 Twenty Cent, White Metal Reverse Die Trial,** Judd-A1875-1, Pollock-3398, MS63 PCGS Secure. This uniface die trial shows UNITED STATES OF NORTH AMERICA across the upper obverse with the date below. No central device is present. Struck in white metal with a plain edge. This is one of two examples known. Saul Teichman, writing for USPatterns.com, explains: "It is unclear if this [is] for an obverse or a reverse design or if it is really for a 20 cent piece. It is more likely a design for a medal or token of some sort." The pewter-gray obverse is partly lustrous, and the devices on that side are sharp. A small centering dot is apparent. The unstruck reverse is rough and porous.

Ex: S.K. Nagy; Kosoff Sale (Bowers and Merena, 11/1985), lot 1145; Superior (2/1991); Early American History Auctions (12/2004).

From The Collection of William Rau, Part II. PCGS# 673865

(1805) Dickeson Half Eagle Token in Copper  
Judd-C1805-3, MS62 Brown

4984 (1805) Circa 1859 Dickeson Half Eagle, Copper, Judd-C1805-3, Pollock-6130, High R.7, MS62 Brown PCGS Secure. We last sold this unusual concoction in the ANA Signature in 2007, and rather than reinvent the wheel here is part of the description from that auction appearance: "Struck in copper with a plain edge. Glossy olive-brown surfaces have a few darker stains and spots. An out-of-round planchet and crude rim filing are associated with the actual production of this unusual piece, explained further below. On USPatterns.com, Saul Teichman reports that three or fewer examples of this 'strange concoction' are known. Created from the combination of a federal half eagle obverse in a rusted and dilapidated state, with the 'Eagle on Shield' (sometimes Eagle on Rock) die made famous by Dr. Montrovile Dickeson. The obverse die is that found on 1805 half eagle varieties BD-1 and BD-2, with all of the die cracks found on the latest state of BD-2. Today, we believe that the Eagle on Shield die is actually a rejected or discarded embossing die intended to stamp or emboss revenue paper. ... the so-called 1792 Dickeson cents, produced at about the same time as this piece, are much larger in diameter, approximately 30 mm. Examination of this piece indicates that a larger planchet was struck by a press containing both dies. Once produced, the flan was apparently trimmed by hand to the approximate diameter of the half eagle obverse. The edge shows clear signs that it was trimmed to the smaller diameter, and the slightly out-of-round shape indicates a hand operation. Nearly all of the obverse border show clear file marks that were undoubtedly part of this same process."

(1837) Cent in German Silver  
Judd-C1837-1, AU55

4985 (1837) One Cent, German Silver, Judd-C1837-1, AU55 PCGS Secure. The obverse legend has ONE CENT within an olive wreath, surrounded by a circle of dots. The reverse is similar but from a different die. Struck in German silver, or "Feuchtwanger's composition" as suggested on USPatterns.com (which would, of course, be the same thing). Plain edge. Only four or five pieces are believed known. The surfaces are dull from either short-term use in circulation or carried for a short time as a pocket piece.

*From The Collection of William Rau, Part II.*

(1920) Pilgrim Half in Brass  
Pollock-7030, MS65

4986 1920 Pilgrim Half Dollar, Brass, Pollock-7030, MS65 PCGS Secure. Struck from similar dies to the adopted Pilgrim half dollar. Struck in brass with a reeded edge. Listed in the Pollock reference, but this piece is not listed in Judd. On USPatterns.com, Saul states it "is believed to be counterfeit." He goes on to list the design differences between this piece and the adopted half dollars. Obviously brass, the surfaces are the expected yellow hue with lilac interspersed over each side.  
*From The Collection of William Rau, Part II.* PCGS# 673875  
Base PCGS# 9359

## GOLD DOLLARS

4987 1849 Closed Wreath, D-5, Close Stars, MS64+ PCGS. Breen-6005 with heavy numerals in the date. This high-end Choice example is sharply struck and vibrantly lustrous with pleasing olive-gold surfaces. A few faint obverse marks are all that prevent Gem classification. NGC ID# 25BA, PCGS# 521672 Base PCGS# 7503

1849-D Gold Dollar, AU58  
First-Year Dahlonega Type Coin

4988 1849-D AU58 PCGS Secure. Variety 1-A. The first-year gold dollar from the Dahlonega Mint was struck to the extent of 21,588 pieces. All are Open Wreath coins, and survivors are elusive in high grade. This near-Mint example displays sharp detail and partially lustrous olive-gold surfaces. Only a few small marks are seen under a loupe. NGC ID# 25BD, PCGS# 7507

---

**1849-O Open Wreath Gold Dollar, MS63+  
Attractive First-Year Issue**

- 4989 1849-O Open Wreath MS63+ NGC.** Variety 3. The 1849-O gold dollar represents the first year of the denomination, from a substantial branch mint production of 215,000 pieces. This Plus-graded Select specimen exhibits well-detailed design elements with some incomplete detail on the reverse, due to lapping. The lustrous yellow and rose-gold surfaces are well-preserved and appealing. Census: 52 in 63 (2 in 63+), 42 finer (4/18). NGC ID# 25BE, PCGS# 7508
- 

**1852 Gold Dollar, MS65+  
CAC-Approved Type Coin**

- 4990 1852 MS65+ PCGS Secure. CAC.** The 1852 is an available Type One gold dollar, popular for representing the first design of this series. The Type One gold dollar has a diameter of only 13 mm, making it the smallest gold coin struck by the United States Mint for general circulation. This high-end Gem displays a sharp strike and frosty wheat-gold luster with no distracting abrasions. Eye appeal is outstanding, as the CAC endorsement suggests. Population: 67 in 65 (6 in 65+), 23 finer. CAC: 27 in 65, 5 finer (5/18). NGC ID# 25BP, PCGS# 7517
- 

- 4991 1853-O MS63 PCGS Secure. Variety 1.** Sharp hair details, wreath leaves, and border stars are a welcome sight on this Select Uncirculated 1853-O gold dollar. Lustrous orange-gold surfaces are original and show minimal contact marks. The 1853-O gold dollar is relatively available in Mint State, but this piece is especially pleasing for the grade. NGC ID# 25BX, PCGS# 7524
- 

---

**1854-S Gold Dollar, MS62  
Elusive in Mint State**

- 4992 1854-S MS62 PCGS Secure.** In its first year of operation, the San Francisco Mint struck only 14,632 gold dollars, all of the Type One design. Uncirculated survivors are scarce. This piece displays sharp stars and central devices with satiny honey-gold luster. Light handling contact on each side is all that limits the grade. Population: 19 in 62 (1 in 62+), 17 finer (4/18). NGC ID# 25C2, PCGS# 7527
- 

- 4993 1856-S/S FS-501 AU53 NGC.** The mintmark is lightly but widely repunched northeast. The '56-S is the only Type Two San Francisco issue, struck at a time when the other branch mints had transitioned to the Type Three design. The present briefly circulated tan-gold example has noticeable pockets of luster, and is free from any detrimental abrasions. NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

- 4994 1857-S AU55 PCGS Secure.** From a mintage of 10,000 pieces, the 1857-S gold dollar is scarce to rare in all grades today. Just a trace of wear shows on the design elements of this attractive Choice AU specimen and the lightly abraded orange-gold surfaces retain much of their original mint luster. Population: 14 in 55, 16 finer (4/18). NGC ID# 25CG, PCGS# 7547

- 4995 1867 MS62 NGC.** No formal designation is present on the NGC insert, but this MS62 gold dollar from a mintage of 5,200 coins is distinctly prooflike. Yellow-gold surfaces feature reflective fields and frosted motifs that deliver marvelous visual appeal. Strike detail is bold throughout the obverse, while the date and lower wreath are slightly soft. NGC ID# 25D3, PCGS# 7566
- 

**1867 Gold Dollar, MS64  
Rare Prooflike Specimen**

- 4996 1867 MS64 Prooflike NGC.** The 1867 gold dollar is an underrated and elusive issue in all grades, from a modest mintage of 5,200 pieces. This attractive Choice example exhibits sharply detailed design elements and well-preserved canary-yellow surfaces with deeply reflective prooflike fields. Overall eye appeal is outstanding. Census: 2 in 64 Prooflike, 4 finer (4/18). NGC ID# 25D3, PCGS# 7566
-

**4997** 1874 MS65 NGC. CAC. Bright yellow-gold surfaces are remarkably luminous on this Gem gold dollar, shimmering when tilted beneath a light. The strike is sharp and no major abrasions are visible. The 1874 gold dollar comes from a mintage of nearly 200,000 pieces and is collectible in high grade as a type coin. However, CAC-approved Gems are elusive. CAC: 41 in 65, 42 finer (4/18). NGC ID# 25DC, PCGS# 7575

**4998** 1877 MS63 PCGS Secure. CAC. A low-mintage issue (3,900 pieces struck), the 1877 gold dollar was well-saved in the 19th century and is collectible today in Mint State. This Select example displays a sharp strike and prooflike fields with bright yellow-gold color. Only a few scattered marks are seen on each side. NGC ID# 25DF, PCGS# 7578

**4999** 1877 MS60 Prooflike NGC. The 1877 is one of the better-known gold dollars, primarily because of its association with other low-mintage rarities that share this date. Only 3,900 gold dollars were produced. That low mintage gives an indication why this coin has such pronounced prooflike fields: The initial die polish never wore off, producing an unusually high number of "first strikes." The surfaces are reddish-tinged and highly attractive, especially for the grade. Census: 2 in 60 Prooflike, 28 finer (4/18). NGC ID# 25DF, PCGS# 77578

**5000** 1883 MS66 PCGS Secure. CAC. Like many gold dollars from the later low-mintage issues, this Premium Gem 1883 coin shows semiprooflike fields and a bold strike. Warm honey-gold surfaces complement a lack of abrasions, producing strong eye appeal. Suitable for type representation. NGC ID# 25DM, PCGS# 7584

**5001** 1885 MS65 PCGS Secure. CAC. This CAC-approved Gem is high-end for the grade, showing semiprooflike fields and sharp central devices. A loupe fails to reveal surface marks, although faint die polishing lines are visible in the fields at certain angles. A spindly die crack also connects the D in UNITED to Liberty's forehead. This lovely late-series type coin will fit in well with a collection of higher-grade gold dollars. NGC ID# 25DP, PCGS# 7586

**5002** 1885 MS65 NGC. CAC. The small circulation-strike mintage of just 11,156 pieces was popular with jewelers, and the 1885 was moderately well-saved as a result. Struck from dies that show a fine die crack to Liberty's forehead and a die bulge beneath STA OF STATES, this reflective, lemon-yellow example displays die polish lines in the fields and faint remnants of die clashing. The strike is sharp on both sides. NGC ID# 25DP, PCGS# 7586

**5003** 1889 MS66 PCGS Secure. The final year of issue for the gold dollar exists in substantial quantities despite a modest mintage of 29,000 circulation strikes. This Premium Gem features a bold strike and frosty light yellow-gold luster. NGC ID# 25DU, PCGS# 7590

**5004** 1889 MS66 PCGS Secure. A splendid sun-gold type coin that offers booming luster, a bold strike, and pleasing preservation. As always for business strikes of this final-year date, the lower reverse is die doubled south, apparent on the ribbon, stems, and nearby leaves. NGC ID# 25DU, PCGS# 7590

## EARLY QUARTER EAGLE

**5005** 1807 BD-1, R.3 — Repaired — PCGS Genuine. Fine Details. A glossy sun-gold example with sharply detailed borders and softly defined centers. Faint file marks are noted above the R in LIBERTY and beneath the eagle's tail. The only dies for this final Heraldic Eagle date. A mere 6,812 pieces were produced.

## CLASSIC QUARTER EAGLES

**5006** 1834 AU55 NGC. Breen-6138, Variety 1, R.1. The introductory "Small Head" subtype, known only on a single die pair although many were set aside. This apricot-gold representative displays a band of luster throughout both peripheries. A field tick is present beneath the O in OF, but otherwise the surfaces are surprisingly void of reportable contact. NGC ID# 25FS, PCGS# 7692

**5007** 1836 Script 8 AU58 NGC. Breen-6143, Variety 11, R.2. A lovely type representative that boasts original apricot-gold color and relatively few abrasions. The centers exhibit moderate incompleteness, but the remainder of the strike is sharp. A radial die crack through star 6 is characteristic of Variety 11. NGC ID# 25FU, PCGS# 7694

**5008** 1836 Script 8, Head of 1835, Breen-6143, Variety 11, R.2 — Cleaned — PCGS Genuine. Unc. Details. The position of star 6 close to the hair and the branch with no berry on the reverse identifies Variety 11. This well-detailed, lightly marked example is from a late state of the dies, with an extensive network of die cracks on the obverse. The orange-gold surfaces show somewhat muted mint luster, due to the noted cleaning.

**5009** 1837 AU53 PCGS. Breen-6145, Variety 16, R.2. An underappreciated Classic date with a low mintage of 45,080 pieces. Liberty's curls above the ear and eye show light wear, but this caramel-gold quarter eagle has lustrous stars and legends. The sole reportable marks are on the obverse rim at 5 and 7 o'clock. NGC ID# 25FX, PCGS# 7695

### 1839-C Classic Two and a Half, AU Details Two-Year Branch Mint Type Issue

**5010** 1839-C — Cleaned — NGC Details. AU. Breen-6149, Winter-3, Variety 24, R.4. One of just two Classic Head quarter eagles from the Charlotte Mint, the 1839-C claims a small mintage of 18,140 pieces, but it is still seen more often than its 1838 counterpart. This lightly worn AU specimen was sharply struck in most areas, but the reverse shows some incompleteness on the branch, due to lapping. The lightly abraded orange-gold surfaces exhibit slightly subdued mint luster, the results of the noted cleaning.

**5011** 1839-C — Cleaning — PCGS Genuine. AU Details. Breen-6150, Variety 22, R.4. The second Charlotte quarter eagle issue was struck from three die pairs, despite a meager mintage of 18,140 pieces. Variety 22 exhibits a boldly repunched 39 in the date. The reverse shows a vertical crack through the eagle's beak. An early die state without obverse cracks. The caramel-gold surfaces are hairlined, and the portrait shows three narrow mint-made strike-throughs.

**5012** 1839-D — Obverse Scratched, Cleaned — NGC Details. AU. Winter 1-B, Variety 25, R.4. The first Dahlonega two-and-a-half issue has a scant production of 13,674 pieces. Two die marriages are known, best distinguished by the shape of the branch stem. The long die crack through the second T in STATES is also diagnostic. This lightly worn straw-gold example displays a curved thin mark below Liberty's jaw and a pinscratch on the right obverse field.

- 5013 1839-O — Cleaned — NGC Details. AU. Breen-6152, Variety 27, R.3. The high-date, wide-fraction variant of the introductory New Orleans quarter eagle issue. A mintage of just 17,781 pieces ensures the rarity. This lightly circulated pumpkin-gold example is hairlined but shows only a single mentionable mark, a tick on the reverse rim at 1 o'clock. NGC ID# 25G7, PCGS# 7701

## LIBERTY QUARTER EAGLES

- 5014 1840 AU55 PCGS Secure. The 1840 quarter eagle is the first issue of this denomination with the Liberty Head design. Only 18,800 coins were struck, and survivors are scarce in high grade. This Choice AU representative displays pleasing apricot-gold color with hints of luster in the fields. Strike weakness occurs on the eagle's left (facing) leg, as usual. Population: 4 in 55, 9 finer (4/18). NGC ID# 25GA, PCGS# 7717

### 1840-C Quarter Eagle, XF40 One Variety Known

- 5015 1840-C XF40 PCGS. Variety 1. The 1840-C quarter eagle is relatively scarce with fewer than 225 pieces believed known (Doug Winter, 2008). This XF example shows little wear but does have characteristic strike weakness and planchet roughness — all mint-made imperfections common to early Charlotte gold coinage. A few scattered abrasions are also visible on the bright straw-gold surfaces. NGC ID# 25GB, PCGS# 7718

- 5016 1842-O — Improperly Cleaned — NGC Details. AU. Variety 1. No hairlines are readily evident, but the apricot-gold surfaces are microgranular and moderately bright. The centers are typically struck, though peripheral elements are nicely defined. A few small marks are of little relevance. A very scarce New Orleans issue with a mintage of 19,800 pieces.

- 5017 1844 XF45 PCGS Secure. A meager mintage of 6,784 pieces makes the 1844 a sleeper within the Liberty quarter eagle series. A green-gold example with moderate incompleteness of strike on Liberty's lovelock and the eagle's lower body. NGC ID# 25GT, PCGS# 7734

- 5018 1844-D — Repaired — NGC Details. AU. Variety 5-J. The obverse is extensively tooled to remove abrasions in the fields and on the portrait, but the reverse appears unaltered. Both sides have bright yellow-gold color and sharp detail, save for several obverse stars which are weak. NGC ID# 25GV, PCGS# 7736

### 1845 Quarter Eagle, MS62 Distinctive Red Toning Accents

- 5019 1845 MS62 PCGS Secure. CAC. Dramatic reddish-orange accents at the margins surround medium-gold centers of this distinctively toned quarter eagle. While the 1845 issue is perhaps the most-available Philadelphia issue from the 1840s, it is quite scarce in lustrous and attractive Mint State — especially with CAC endorsement. A strong die crack runs from the edge through the 2 in the denomination and heads north into the shield, where it contributes to slight weakness of strike on the eagle's leg. Population: 16 in 62, 15 finer. CAC: 6 in 62, 3 finer (4/18). NGC ID# 25GW, PCGS# 7737

### 1845 Liberty Quarter Eagle, MS63 Rarely Seen in Mint State

- 5020 1845 MS63 PCGS Secure. The 1845 Liberty quarter eagle claims a mintage of 91,051 pieces, a substantial production total in the context of the series. Despite the large mintage, the 1845 is a rare issue in Mint State grades today and examples that grade higher than MS63 are prime condition rarities. This attractive Select specimen offers well-detailed design elements, with a touch of the usual softness on the eagle's left (facing) leg. The lightly marked yellow-gold surfaces are lustrous and appealing. Population: 9 in 63 (1 in 63+), 6 finer (4/18). NGC ID# 25GW, PCGS# 7737

- 5021 1845-D VF25 PCGS. Variety 6-J. Like all Dahlonega two-and-a-half dollar issues, the 1845-D has a low mintage and is sought in all grades. This tan-gold representative is surprisingly free from abrasions despite its service in the channels of commerce. The dentils and star centers are sharp, though Liberty's hair and the eagle's plumage exhibit wear. NGC ID# 25GX, PCGS# 7738

- 5022 1845-D — Scratch — PCGS Genuine. AU Details. Variety 6-J. A few wispy field marks are near star 12 and the eagle's head, but these are less of a distraction than implied by the PCGS designation. Strike-throughs on Liberty's jaw and below the O in OF are as made. A well-defined, olive-gold example. The 1845-D has a mintage of just 19,460 pieces and is rare in all grades.

**1847 Two and a Half, MS63**  
**High-End Condition Rarity**  
**Single Finest at CAC**

**5023 1847 MS63 PCGS. CAC.** A Condition Census example of the 1847 quarter eagle, this Select coin is also the sole finest endorsed by CAC. A bold strike and bright straw-gold luster produce ample eye appeal, while a scattering of light contact marks limits the grade. The 1847 quarter eagle is rare in all Mint State grades. Population: 1 in 63, 1 finer. CAC: 1 in 63, 0 finer (5/18). NGC ID# 25H5, PCGS# 7744

**1849-C Quarter Eagle, AU58**  
**A Rarity in High Grade**

**5024 1849-C AU58 PCGS Secure. CAC. Variety 1.** This and one other AU58 coin are the finest 1849-C quarter eagles endorsed by CAC, even though the grading services list a few higher-grade pieces. The 1849-C boasts a small mintage of 10,220 coins and is a rarity in the upper AU grades and Mint State. Doug Winter estimates that only 125 to 150 pieces survive overall. This example shows some strike weakness on the eagle's left (facing) leg but is otherwise sharp and has only trivial wear. The minimally marked surfaces exhibit pleasing olive-gold coloration. Population: 9 in 58, 2 finer. CAC: 2 in 58, 0 finer (4/18). NGC ID# 7HRT, PCGS# 7753

**5025 1851 MS64 PCGS. CAC.** This is one of those issues that doesn't mentally register as a rarity or a common date. As Garrett and Guth wrote a "staggering number of coins were produced." Indeed. More than 1.3 million. But relatively few are known in MS64; in fact, only 37 have been so graded at NGC with a mere 11 finer (4/18). The surfaces are uncommonly smooth and covered with softly frosted mint luster. Well-struck, but not completely brought up. Available for a small premium over a truly common, later date quarter eagle. NGC ID# 25HL, PCGS# 7759

**5026 1851-C — Reverse Scratched — NGC Details. AU. Variety 1.** A challenging Charlotte issue, as only 14,923 pieces were struck. This sun-gold example displays marks on the numerator and fraction bar, and in the field beneath the TA in STATES. The borders glimmer with luster, and the obverse strike is above-average.

**1851-O Two and a Half, MS60**  
**A Rare Issue in Mint State**

**5027 1851-O MS60 NGC. Variety 1,** distinctive for repunching on the 5 and final 1 in the date. The 1851-O quarter eagle as a whole is rare in Mint State, and this lower-end example is quite appealing for the grade. Moderate strike weakness on the eagle's left (facing) leg is typical of the issue, but remarkably few singular abrasions are present. Satiny straw-gold luster illuminates each side. Census: 3 in 60, 36 finer (5/18). NGC ID# 25HP, PCGS# 7762

**5028 1853-D — Repaired — NGC Details. AU. Variety 17-N.** A tiny mintage of 3,178 pieces ensures the rarity of the 1853-D quarter eagle. This golden-brown example has minimal circulation wear, but the strike is incomplete on the eagle's legs and fletchings, and on the opposite portion of Liberty. The surfaces appear virtually unabraded due to well-disguised smoothing. The obverse rim has minor bumps near 2, 6, and 8 o'clock.

**5029 1854 MS63 PCGS. CAC.** The 1854 was a fairly high-mintage issue, but the present well-struck example exhibits exceptional quality. A sharp strike, smooth surfaces, and original green-gold toning ensures the eye appeal. Housed in a green-label holder. CAC: 15 in 63, 10 finer (4/18). NGC ID# 25HX, PCGS# 7769

**1854 Quarter Eagle, MS64**  
**Unlisted Misplaced Date Variety**

**5030 1854 MS64 NGC. CAC.** An unlisted misplaced date variety with the top of an 18 on the rim below the date. A charming caramel-gold Choice two and a half. Lustrous and refreshingly unabraded with minor clash marks near the motifs. Both sides exhibit a partial wire rim. The 1854 has a mintage of nearly 600,000 pieces, but most survivors are in AU through MS63 grades. Census: 29 in 64, 11 finer. CAC: 5 in 64, 5 finer (5/18). NGC ID# 25HX, PCGS# 7769

**1854 Quarter Eagle, MS64+  
Conditionally Rare at This Grade**

**5031 1854 MS64+ PCGS Secure. CAC.** A thickly frosted, high-end example of this conditionally challenged Philadelphia issue. Nearly 600,000 pieces were struck, yet few survivors come close to matching the quality of this coin. Straw-gold surfaces exhibit rich orange accents and deep-seated mint luster. The strike is razor-sharp throughout both sides. A shallow, solitary mark on the jawline is the sole abrasion of note. Apparently, the present coin is the only Plus-graded example at the MS64 level by PCGS, with fewer than a dozen pieces graded any finer by that service. Population: 36 in 64 (1 in 64+), 10 finer. CAC: 5 in 64, 5 finer (4/18). NGC ID# 25HX, PCGS# 7769

**5032 1856-C — Cleaned — PCGS Secure Genuine. AU Details.** Variety 1. An inoffensively hairlined wheat-gold example of this challenging Charlotte issue. No marks are apparent, but both sides exhibit several strike-throughs, as made. The strike is incomplete on several stars and the eagle's extremities, but circulation wear is minimal.

**5033 1856-O AU55 PCGS. Variety 2.** A briefly circulated apricot-gold example. A loupe reveals occasional unimportant marks. The centers show slight incompleteness, but the strike is above average for this antebellum New Orleans issue. Population: 15 in 55, 14 finer (4/18). NGC ID# 25JA, PCGS# 7780

**5034 1858-C — Reverse Graffiti — NGC Details. AU. Variety 1.** A former owner engraved a fancy letter M in the upper-reverse field, below the E in STATES. Otherwise, this rare Charlotte Mint quarter eagle is a well-defined and moderately abraded example with golden-brown and sea-green toning in the protected areas.

**5035 1861 New Reverse, Type Two, MS64 NGC.** The arrowheads on the Two Two reverse are thinner, and the letters are smaller. This impressive near-Gem is fully struck with glistening orange-gold surfaces. Thick mint frost covers each side, and minute ticks only become apparent under close scrutiny. An excellent type coin. NGC ID# 25JX, PCGS# 7794

**5036 1861 New Reverse, Type Two, MS64 NGC. CAC.** Nearly 1.3 million pieces were struck — a huge mintage for any quarter eagle, regardless of date — yet Choice Uncirculated examples are scarce and full Gems are notably elusive. This CAC-endorsed near-Gem is thickly frosted with ghostlike die clashing around the fully struck central motifs. Abrasions are limited to a few tiny marks, none of which cause the least distraction. NGC reports just 29 numerically finer certifications (4/18). NGC ID# 25JX, PCGS# 7794

**5037 1862 AU58 NGC.** Quarter eagle production at the Mint fell dramatically over the previous year, from 1.2 million to 98,508 coins. Survivors are scarce in the upper AU levels and pose a significant challenge in Mint State. This semireflective reddish-gold example in near-Mint condition boasts a crisp impression and broad rims. Faint marks are peppered over each side. NGC ID# 25JZ, PCGS# 7796

**5038 1865-S XF40 PCGS Secure.** Only 23,376 quarter eagles were struck at San Francisco in 1865. This issue is scarce overall and rare in mint condition. This is a collectible XF coin with pleasing detail and smooth olive-gold surfaces. Some weakness on the eagle's left (facing) leg is due to strike more than wear. Population: 19 in 40, 46 finer (4/18). NGC ID# 25K6, PCGS# 7802

**5039 1872 — Cleaned — PCGS Genuine. Unc. Details.** In the aftermath of the Civil War, gold coins failed to circulate except in the West. Since trade was conducted with Federal currency, mintages of quarter eagles at Philadelphia dwindled to token levels between 1864 and 1872. The proof-only 1863 had become prized among collectors, and the small mintages of subsequent dates were intended to dampen speculation. In 1872, just 3,000 pieces were struck. This sharply struck and prooflike honey-gold example has moderate hairlines and a small strike-through near the nose.

**5040 1874 MS61 NGC.** Deep reddish-gold hues color each side of this Uncirculated 1874 quarter eagle — one of only 3,920 examples produced. As expected for such a low-mintage issue, the surfaces display a hint of semiprooflikeness and pinpoint detail. Census: 19 in 61, 5 finer (5/18). NGC ID# 7JS4, PCGS# 7821

**5041 1878 MS64+ PCGS Secure.** An intricately struck near-Gem with rich proof-gold patina. Only trivial grazes emerge beneath a lens. Mintages of quarter eagles soared in 1878, in anticipation that demand for gold coins would increase once the paper dollar achieved parity with its gold equivalent. NGC ID# 25KY, PCGS# 7828

**5042 1878 MS65 PCGS Secure.** This Gem 1878 quarter eagle is sharp and frosty with original honey-gold coloration and clean surfaces. The 1878 is scarce in this grade and rare finer, despite a mintage that exceeded 286,000 coins. Population: 53 in 65 (2 in 65+), 13 finer (4/18). NGC ID# 25KY, PCGS# 7828

**1878-S Two and a Half, MS64+  
A Better Date in High Grade**

**5043 1878-S MS64+ NGC. CAC.** The 1878-S quarter eagle has a small Mint State survivorship compared to its mintage of 178,000 pieces. Choice examples are rare, and finer pieces are out of reach for most collectors. This Plus-graded CAC near-Gem displays a sharp strike and satiny yellow-gold luster. A few light, scattered ticks do not detract from the eye appeal. Census: 16 in 64 (1 in 64+), 5 finer. CAC: 8 in 64, 1 finer (5/18). NGC ID# 25KZ, PCGS# 7829

**1878-S Two and a Half, MS64+  
Semiprooflike Fields**

**5044 1878-S MS64+ PCGS Secure. CAC.** The 1878-S quarter eagle is scarce in this grade with only a few finer pieces known. This high-end Choice example, CAC-endorsed for quality and eye appeal, shows razor-sharp detail and semiprooflike fields. Under a loupe, the yellow-gold surfaces exhibit a few light, unobtrusive abrasions that prevent Gem classification. Population: 20 in 64 (1 in 64+), 1 finer. CAC: 8 in 64, 1 finer (5/18). NGC ID# 25KZ, PCGS# 7829

**5045** 1885 — Filed Rims — PCGS Genuine. Unc. Details. The 1885 has one of the lowest business-strike mintages of any series: a meager 800 pieces. This example is fully struck and unworn. Orange-red margins frame apricot-gold centers. No impairment of the rims is readily apparent, though the fields exhibit patches of hairlines.

**1896 Liberty Quarter Eagle, MS66  
Elusive Any Finer**

**5046** 1896 MS66 PCGS. Luminous tangerine-orange and golden surfaces display lovely original luster and sharp design elements. A few microscopic ticks seen only with a loupe define the grade. The 1896 quarter eagle is scarce this fine and decidedly rare any finer. From a mintage of 19,000 pieces. Population: 38 in 66 (3 in 66+), 10 finer (4/18). NGC ID# 25LL, PCGS# 7848

**1896 Quarter Eagle, MS66  
Honey-Gold Mint Frost**

**5047** 1896 MS66 PCGS Secure. CAC. This generally plentiful Philadelphia quarter eagle becomes conditionally scarce in MS66 and is rare finer. CAC-endorsed coins in these upper grades are seldom offered. This Premium Gem displays sharp design elements and frosty, beautifully preserved honey-gold mint luster. Eye appeal is outstanding. Population: 38 in 66 (3 in 66+), 10 finer. CAC: 14 in 66, 6 finer (5/18). NGC ID# 25LL, PCGS# 7848

**5048** 1898 MS65 PCGS. Frosty wheat-gold luster illuminates Gem-quality surfaces on this 1898 quarter eagle. The devices are razor-sharp, and a loupe reveals only trivial surface contact. Higher-grade examples are somewhat elusive. NGC ID# 25LN, PCGS# 7850

**1898 Two and a Half, MS66  
Attractive, Frosty Surfaces**

**5049** 1898 MS66 PCGS. CAC. Razor-sharp detail and frosty luster adorn this Premium Gem 1898 quarter eagle, while the CAC green label endorses obvious eye appeal. The interiors are yellow-gold, and the peripheries show slightly deeper peach coloration. A loupe fails to reveal noteworthy abrasions. The 1898 had a small 24,000-coin mintage, but Premium Gem examples remain only marginally available for type purposes. Population: 47 in 66 (3 in 66+), 14 finer. CAC: 19 in 66, 12 finer (4/18). NGC ID# 25LN, PCGS# 7850

**1898 Two and a Half, MS66+  
High-End Type Coin**

**5050** 1898 MS66+ PCGS Secure. CAC. This common date is only available through MS65 with regularity. In MS66, it is scarce, and finer pieces are rare. CAC-approved coins, especially with a Plus designation, are highly sought-after but difficult to locate, even with patience. This piece is fully struck and frosty. The wheat-gold luster is original, and no distracting abrasions are visible. Population: 47 in 66 (3 in 66+), 14 finer. CAC: 20 in 66, 12 finer (5/18). NGC ID# 25LN, PCGS# 7850

**1900 Quarter Eagle, MS67  
Frosty Luster, Conditionally Rare**

**5051** 1900 MS67 PCGS. A popular type coin in the series, the 1900 Liberty quarter eagle is generally available save for in MS67 and finer grades. This Superb Gem is conditionally rare and among the finest examples of the date at PCGS. Sharp motifs and frosty, unabraded luster produce strong eye appeal. Original wheat-gold and amber-peach hues characterize each side. Population: 18 in 67, 0 finer (5/18). NGC ID# 25LR, PCGS# 7852

**1901 Quarter Eagle, MS67**  
Only Two Pieces Reported Finer

- 5052 **1901 MS67 PCGS Secure.** The 1901 Liberty quarter eagle is an available date and a popular type coin, although Superb Gems are conditionally scarce. This coin shows razor-sharp devices and blazing mint luster. The surfaces are a pleasing yellow-gold color, with attractive rose highlights. Finer pieces are almost uncollectible. Population: 23 in 67, 1 finer (5/18).  
Ex: Central States Signature (Heritage, 4/2011), lot 6362, which realized \$4,312.50. NGC ID# 25LS, PCGS# 7853

- 5053 **1904 MS62 Prooflike NGC.** This 1904 two and a half previously appeared as lot 495 in the August 1950 Milwaukee A.N.A. auction, where it was cataloged by James Kelly as a “brilliant proof.” The apricot-gold example does offer strongly reflective fields, and it is well-struck except for star 4. The date position is associated with business strikes instead of proofs. Minor hairlines determine the grade. Census: 8 in 62 (1 in 62+) Prooflike, 8 finer (4/18). NGC ID# 25LV, PCGS# 77856

## INDIAN QUARTER EAGLES

- 5054 **1908 MS65 NGC.** An attractive Gem representative from the first year of the Indian design, this coin is sharply detailed in most areas, with just a trace of softness on the eagle's shoulder. The pleasing orange-gold surfaces are lustrous on both sides. NGC has certified 68 numerically finer examples (5/18). NGC ID# 288Y, PCGS# 7939

- 5055 **1908 MS65 NGC.** A typical example for the first-year Indian quarter eagle, this piece has brilliant luster and sharp design motifs with light yellow surfaces and good eye appeal. NGC ID# 288Y, PCGS# 7939

- 5056 **1909 MS64 PCGS.** The 1909 is the second year of issue, and as such the Mint ironed out the production problems they experienced with the first year, notably the lack of strike completeness. This is a sharply struck piece with strong detail at the top of the eagle's wing, detail one would never see on a 1908. Rich reddish patina covers each side with softly frosted underlying mint luster. NGC ID# 288Z, PCGS# 7940

- 5057 **1911 MS64+ PCGS Secure.** A short nick by the nose is the sole mark to mention, although it is visible only under magnification. Otherwise, this high-end Choice Uncirculated 1911 seems close to an even finer grade. The strike is sharp for the issue and bright luster shines over attractive, light-gold surfaces. Eye appeal is far above average. NGC ID# 7KR6, PCGS# 7942

- 5058 **1911 MS64+ NGC. CAC.** From a respectable mintage of 704,000 pieces, the 1911 Indian quarter eagle is an available issue at the MS64 grade level, but finer coins are somewhat scarce. This sharply detailed MS64+ example displays pleasing orange-gold surfaces with vibrant mint luster and outstanding eye appeal. NGC ID# 7KR6, PCGS# 7942

**1911-D Weak D Quarter Eagle, AU58**

- 5059 **1911-D Weak D AU58 PCGS.** PCGS does not include the Weak D variety in their *Population Report*, although we occasionally see examples at auction. The mintmark varies in visibility, and on this piece is particularly weak — just when you think you see it, a slight adjustment to the angle of lighting makes it vanish again. This coin is otherwise sharp and satiny with yellow-gold luster and remarkably little evidence of high-point wear. No wire rim is discernible on the obverse. NGC ID# 2895, PCGS# 7954

**1911-D Two and a Half, AU53**  
Famous Low-Mintage Issue

- 5060 **1911-D AU53 PCGS.** Strong D. The mintmark is clear on this AU53 representative, unlike many survivors of this important quarter eagle issue from a low mintage of 55,680 coins. The rest of the design is equally bold, although a hint of friction is present. The diagnostic partial wire rim is seen on each side. Medium yellow-gold with a handful of wispy marks. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU53**  
Strong D Mintmark

- 5061 **1911-D AU53 PCGS.** Strong D. Unprocessed khaki and reddish-gold surfaces show minimal signs of circulation. There is only a modest amount of high-point rub, and there are no severe abrasions. Bold detail appears on the headdress and eagle's feathers, and the mintmark is equally clear. The 1911-D is unchallenged as the key date in the Pratt quarter eagle series. NGC ID# 7KR7, PCGS# 7943

- 5062 **1912 MS64 PCGS.** Frosty golden luster shows only a few light field marks on this near-Gem 1912 Indian quarter eagle, and eye appeal is excellent as a result. The lower headdress feathers show minor weakness, noted with a loupe. Higher-grade examples of this date are elusive. NGC ID# 7KR8, PCGS# 7944

- 5063 1912 MS64 PCGS Secure. A satiny butter-gold near-Gem with an above-average strike and an unmarked appearance. Although regarded as common in circulated condition, the 1912 emerges as a better date in the present quality. NGC ID# 7KR8, PCGS# 7944
- 5064 1912 MS64 PCGS. Pumpkin-gold and apple-green alternate across this coruscating and carefully preserved Choice Indian two-and-a-half type coin. The lower headdress feathers lack a full impression, but the strike is generally good. A costly acquisition any finer. NGC ID# 7KR8, PCGS# 7944

#### 1914 Indian Quarter Eagle, MS64 Lower-Mintage Better Date

- 5065 1914 MS64 PCGS Secure. The 1914 Indian quarter eagle is a better date in the series, from a smallish mintage of 240,000 pieces. This attractive Choice example offers sharply detailed design elements and lustrous orange and rose-gold surfaces with few signs of contact. PCGS has certified 66 numerically finer examples (4/18). NGC ID# 7KRA, PCGS# 7946

#### 1914 Indian Two and a Half, MS64 Lightly Marked, Lustrous Example

- 5066 1914 MS64 PCGS. This frosty Mint State piece has splendid yellow luster with sharp design details. A few scattered marks on each side prevent a higher grade. The mintage of 240,000 was the second-lowest of the Indian quarter eagle design behind the 1911-D. An impressive, highly appealing example. PCGS has graded 66 numerically finer examples (4/18).  
*Ex: Dallas Signature (Heritage, 10/2008), lot 1994.* NGC ID# 7KRA, PCGS# 7946

- 5067 1914-D MS64 NGC. In Gem grade the 1914-D is the key to the Indian Head series, although the 1911-D is the key overall in any grade. This near-Gem 1914-D boasts lovely golden-yellow color and lacks mentionable marks. An inner rim runs through portions of the reverse, a common trait among Indian Head mintmarked coins of this era. Seldom offered in better condition. NGC has graded 46 numerically finer examples (5/18). NGC ID# 2899, PCGS# 7947

- 5068 1927 MS65 PCGS Secure. Too bad this isn't a photo coin because there is some wonderful, original toning present on this piece. Obviously original, the mint luster rolls around each side as it is tilted beneath a light. In addition, each side shows rich reddish-tinted patina with significant amounts of lilac interspersed. Sharply struck. Perfect for type purposes. NGC ID# BUTL, PCGS# 7951

- 5069 1927 MS65 NGC. Sharply struck as usual for the 1927 issue, this softly lustrous Gem displays medium-gold surfaces with greenish overtones. The obverse has remarkably few marks for a late-series quarter eagle, although the reverse shows a few light lines throughout the fields. NGC reports just 10 numerically finer pieces (5/18). NGC ID# BUTL, PCGS# 7951

- 5070 1927 MS65+ PCGS Secure. CAC. The 1927 Indian quarter eagle is a plentiful issue, often chosen for type purposes in Gem condition, although this Plus-graded CAC coin is especially pleasing. Well-struck design elements and frosty, luminous luster show no bothersome abrasions. PCGS lists 22 finer representatives (4/18). NGC ID# BUTL, PCGS# 7951
- 5071 1929 MS65 PCGS Secure. The final issue in the Indian quarter eagle series, this Gem 1929 has rich lemon-yellow patina over fully brilliant and lustrous surfaces with inconsequential marks. PCGS has only certified five finer examples (5/18). NGC ID# 289F, PCGS# 7953

## THREE DOLLAR GOLD PIECES

- 5072 1854 AU58 NGC. A sharp strike and significant remaining yellow-gold luster give this near-Mint 1854 three dollar gold piece outstanding eye appeal. The surfaces are smooth, and grade-limiting friction is restricted to the high points of the design. NGC ID# 25M3, PCGS# 7969
- 5073 1854 AU58 NGC. An attractive near-Mint coin from the first year of the three dollar denomination, this coin shows just a trace of high-point wear on the design elements. The lightly abraded orange-gold surfaces retain traces of satiny mint luster. NGC ID# 25M3, PCGS# 7969
- 5074 1854 AU58 NGC. Moderate yellow-gold mint luster remains in the protected areas on this near-Mint first-year three dollar gold piece. The wreath bowknot and other design elements show uncommonly sharp definition. The surfaces are smooth and attractive. NGC ID# 25M3, PCGS# 7969
- 5075 1854 AU58 NGC. An above-average strike and moderate luster give this near-Mint 1854 three dollar gold piece excellent eye appeal for the grade. Rich orange-gold color is original, and no major abrasions are seen. NGC ID# 25M3, PCGS# 7969
- 5076 1854-O XF40 NGC. Variety 2. This is a straw-gold example of the 1854-O three dollar, the only New Orleans Mint product in the series. The ribbon loops are partly lapped away, usual for the issue. Both sides exhibit evidence of time spent in circulation, but the appeal of this coin is readily apparent. Only 24,000 pieces were struck. NGC ID# 25M5, PCGS# 7971
- 5077 1855 AU58 NGC. The straw-gold surfaces offer substantial reflectivity in the fields on each side with minimal friction. Well-defined for this popular, second year of the denomination.  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 2616, where it brought \$2,070.* NGC ID# 25M6, PCGS# 7972
- 5078 1856-S XF40 PCGS. Medium S. A charming San Francisco type coin. No marks are noticeable, and luster illuminates the legends. The portrait high points display gunmetal toning, and the open fields are golden-brown. NGC ID# 25M9, PCGS# 7975
- 5079 1856-S AU53 PCGS. Breen-6356. The scarce Small S variety. Three die pairs are known from the low mintage of 34,500 pieces. A lightly circulated but problem-free apricot-gold San Francisco type coin. There are no noticeable marks, and luster accompanies the borders and devices. NGC ID# 25M9, PCGS# 7975
- 5080 1857-S — Scratches — NGC Details. AU. A luminous lemon-gold example with glimpses of cherry-red toning in design crevices. The high points display wear, but the scattered field abrasions are less consequential than implied by the NGC disclaimer. The 1857-S has less than half the mintage of the 1856-S, and is scarcer in all grades.

- 5081 1859 AU55 PCGS.** Significant luster and a hint of field reflectivity remain on this Choice AU coin, complementing sharp design elements that show only a trace of high-point wear. Rich tangerine-orange coloration is original. NGC ID# 7K5K, PCGS# 7979

**1862 Gold Three Dollar, XF45  
Appealing Original Surfaces**

- 5082 1862 XF45 PCGS Secure.** This low-mintage issue (5,750 pieces struck) was produced more than a decade before the three dollar gold denomination was heavily saved by dealers and speculators. Mint State 1862 coins are rare. This collectible Choice XF example displays excellent detail and original straw-gold coloration. Scattered light marks accompany the grade. NGC ID# 7K5P, PCGS# 7983

- 5083 1870 — Cleaned — PCGS Genuine. AU Details.** This well-struck better-date three dollar gold piece has moderately bright straw-gold surfaces. The strike is good, and although minor abrasions are evident throughout, none are of individual consequence. A mere 3,500 pieces were coined.

**1871 Three Dollar Gold, AU58  
Only 1,300 Pieces Struck**

- 5084 1871 AU58 PCGS Secure.** The mintage was extremely small — just 1,300 circulation strikes — although perhaps 20% of the mintage survives today. Most of the coins are in About Uncirculated or Uncirculated conditions, and most have either partially prooflike or fully prooflike surfaces. The present near-Mint example is prooflike throughout both sides with a touch of high-point wear and only a few light abrasions. Strike and luster remain strong on both sides of this attractive, medium-gold coin. Population: 44 in 58 (1 in 58+), 69 finer (4/18). NGC ID# 25MU, PCGS# 7993

**1872 Three Dollar Gold, AU53  
Only 2,000 Examples Struck**

- 5085 1872 AU53 NGC.** The 1872 three dollar gold piece claims a small business-strike mintage of 2,000 pieces and the issue is scarce-to-rare in all grades today. This lightly abraded AU53 specimen shows light wear on the well-detailed design elements and both sides display satiny mint luster, with traces of prooflike reflectivity in protected areas. NGC ID# 25MV, PCGS# 7994

- 5086 1874 AU58 NGC.** The 1874 is prone to a weak strike on the wreath bowknot and the corresponding portion of the obverse, the upper edge of Liberty's headdress. This piece is typical in that regard, but the bright yellow-gold surfaces display enough luster to balance the eye appeal. No significant wear is present. NGC ID# 7KDE, PCGS# 7998

- 5087 1878 AU58 NGC.** This is a favorite three dollar gold issue for type purposes. The Mint struck 82,304 pieces in 1878, many of which survive across a variety of grade levels. Light yellow-gold color dominates this AU58 representative with complementary hues of peach and lavender. The coin is frosty and well-detailed. NGC ID# 25MZ, PCGS# 8000

- 5088 1878 AU58 PCGS.** A partly lustrous lemon-gold example. The eyebrow shows a hint of wear, and the fields display infrequent thin marks. The upper-right portion of the wreath is lightly die doubled, as seen on many examples of the issue.  
*Ex: Twelve Oaks Collection (Heritage, 9/2016), lot 13584, which realized \$1,028.13. NGC ID# 25MZ, PCGS# 8000*

- 5089 1878 MS62+ PCGS Secure.** A Plus-graded MS62 specimen of this popular type issue, with well-detailed design elements and lightly marked canary-yellow surfaces that show the expected number of minor contact marks for the grade. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 25MZ, PCGS# 8000

- 5090 1879 AU58+ PCGS Secure.** An impressive example that survives from a low mintage of just 3,000 examples, this near-Mint 1879 three dollar gold piece has prooflike fields and a hint of contrast between the fields and devices. NGC ID# 25N2, PCGS# 8001

- 5091 1886 — Cleaned — PCGS Genuine. AU Details.** The butter-gold surfaces are somewhat bright, but no marks are noticeable, and substantial luster illuminates the legends and outlines the motifs. Light wear on the curls confirms a brief stay in circulation. From a mintage of only 1,000 commercial pieces.

---

**1886 Three Dollar Gold, AU55**  
Challenging Late-Series Issue

- 5092 1886 AU55 PCGS.** With a circulation-strike mintage of just 1,000 pieces, the 1886 three dollar gold is a landmark issue among its late-date cohorts. Auction appearances are sporadic and of great interest to specialists. This sharply struck Choice example has a bit of wear and light field abrasions, but retains most of its original prooflike surfaces. The rich-gold color deepens to pale-orange in brief areas for substantial eye appeal. NGC ID# 25N9, PCGS# 8008

**1888 Three Dollar Gold, Frosty MS64**

- 5093 1888 MS64 PCGS.** The 1888 three dollar gold issue comes from a mintage of 5,000 pieces, all of which shows die doubling on UNITED, as only one die pair was used for coinage. This issue is collectible in Choice condition, and the present example displays lovely yellow-gold luster and frosty surfaces. Slight strike weakness is seen on the wreath bow, although it is not as soft as on some other examples. NGC ID# 25NB, PCGS# 8010

---

**EARLY HALF EAGLES**

- 5094 1803/2 BD-1, R.4 — Ex-Jewelry — PCGS Genuine.** VF Details. Bass-Dannebrenner Die State a/b. An affordable butter-gold example. The somewhat bright surfaces are glossy but show few marks. The dentils beneath the 80 in the date are tooled, and the edge at 6 o'clock is smoothed. The shield is well-worn but all letters in E PLURIBUS UNUM are at least partly present.

---

**1805 BD-2 Half Eagle, XF Details**

- 5095 1805 BD-2, R.4 — Repaired — PCGS Genuine.** XF Details. Bass-Dannebrenner Die State d/a. Myriad small marks and pits cover both sides of this coin, with evidence of smoothing to minimize some of the marks throughout both the obverse and reverse. An area of tooling is visible at LIB of LIBERTY and at the opposing area of the eagle's tail and arrow fletchings, perhaps to repair damage or a hole in those areas. Considerable definition remains on the devices despite the surface problems, and the coin displays consistent, greenish-gold color.

---

**CLASSIC HALF EAGLES**

- 5096 1834 Plain 4 AU58 NGC.** Breen-6501, McCloskey 3-B, R.1. First Head. A well-detailed Classic type coin that has original rose and olive toning atop orange-gold surfaces. Luster shimmers throughout the devices and reverse border. Marks are trivial save for a tick on Liberty's jaw. In 1834, the dollar was devalued in terms of gold, which enabled gold coins to finally circulate in the United States. NGC ID# 25RR, PCGS# 8171

- 5097 1836 AU50 PCGS.** Breen-6509, McCloskey 4-C, R.3. Luster glimmers across the motifs and margins. A blush of golden-brown toning fills AMERICA, but the rest of this lightly circulated Classic type coin is peach-gold. Marks are trivial except for a tick northwest of the left shield corner. NGC ID# 25RY, PCGS# 8174

- 5098 1836 AU50 PCGS. CAC.** Breen-6509, McCloskey 6-E, R.4. A charming and original green-gold Classic half eagle. The high points display hints of lilac toning. The surfaces, particularly the shield, exhibit the "dirty gold" look favored by veteran specialists. A better die marriage noted for its lengthy obverse die cracks, although this earlier die state example shows only a vertical bisecting crack through the L in LIBERTY. CAC: 9 in 50, 51 finer (5/18). NGC ID# 25RY, PCGS# 8174

---

**1837 Half Eagle, AU58**  
Ex: S.S. New York, Attractive Surfaces

- 5099 1837 Large Date, Block 8, Breen-6511, McCloskey 1-A, R.4, AU58 NGC.** Ex: S.S. New York. The 1837 half eagle is a scarce date when compared to more plentiful Classic Head dates such as the 1834 and 1836. Three die marriages are known, from monogamous combinations of three obverse dies and three reverse dies. This delightful, green-gold example displays excellent luster and only a trace of wear. The surfaces are frosted and remarkably unabraded for the assigned grade.  
Ex: ANA Signature (Heritage, 3/2010), lot 2252. NGC ID# 25RZ, PCGS# 8175

## LIBERTY HALF EAGLES

### 1839 Half Eagle, AU58 First-Year Liberty Head Issue

**5100** 1839 AU58 NGC. Christian Gobrecht's Liberty Head design was introduced on the half eagle in 1839. More than 118,000 coins were struck at Philadelphia, but this issue is nonetheless rare in Mint State and scarce in the upper AU grades. Such coins are also highly sought-after as first-year type pieces. This near-Mint example is sharp and satiny with straw-gold luster. The surfaces are smooth and appealing. Census: 44 in 58, 33 finer (4/18). NGC ID# 25S7, PCGS# 8191

**5101** 1840 Narrow Mill AU58 PCGS Secure. This near-Mint example shows little high-point wear but does have scattered abrasions. The bright yellow-gold surfaces show areas of prooflike reflectivity in the protected portions of the fields. Finer 1840 half eagles are rare. Population: 17 in 58, 15 finer (4/18). NGC ID# 25SA, PCGS# 8194

**5102** 1840 Narrow Mill AU58 NGC. Both Narrow Mill and Broad Mill 1840 coins exist, with the Narrow Mill by far the more-available variant. This is a nearly Mint State Narrow Mill example, with gleaming semiprooflike fields and attractive, orange-gold color. The strike is sharp, with only high-point weakness on the right (facing) talons. Fully Uncirculated coins are rare. Census: 61 in 58, 27 finer (4/18). NGC ID# 25SA, PCGS# 8194

**5103** 1842-D Small Date XF40 PCGS Secure. Variety 7-E. The 1842-D has a mintage of less than 60,000 pieces, but is available by the rarified standards of the Dahlonega Mint. This example has the sharpness of a higher grade, though the olive-gold surfaces are evenly microgranular, perhaps from a long stint in seawater. Marks are absent aside from a few brief thin lines on the cheekbone. NGC ID# 25SX, PCGS# 8210

### 1843-D Five Dollar, AU55 Elusive Small D Variant

**5104** 1843-D Small D AU55 NGC. Variety 9-F. The Small D variety is scarce. This Choice AU example displays bold detail and original olive-gold patina with deeper copper-gold color around the borders. Scattered surface marks are as typically seen on Dahlonega gold of this period. Most 1843-D half eagles certified at NGC are not attributed by mintmark variety. The PCGS population includes 242 Medium D coins and 37 Small D examples, which is a good estimation of the ratio between these two varieties and shows the Small D issue to be in the distinct minority. NGC ID# 25T4, PCGS# 98215

### 1843-O Half Eagle, AU53 Small Letters, Small Mintmark

**5105** 1843-O Small Letters AU53 PCGS. Variety 2. Small mintmark, early die state. This About Uncirculated 1843-O half eagle displays sharp devices and satiny bronze-gold surfaces with no major abrasions. Only light wear is evident over the high points of the devices, mainly the eagle's neck and talons. This early New Orleans issue is scarce in high grade and rare in Mint State. NGC ID# 25T5, PCGS# 8217

**5106** 1846-O XF45 NGC. CAC. Variety 3. The 1846-O has a mintage of only 46,000 pieces, and nice original green-gold examples (such as the present coin) are very scarce. Marks are minimal and wear is moderate. Ideal for the collector who pursues quality instead of numeric grade. CAC: 6 in 45, 12 finer (5/18). NGC ID# 25TK, PCGS# 8230

**5107** 1848 MS61 NGC. CAC. This No Motto Philadelphia issue is scarce in Uncirculated condition and rarely offered so fine with a CAC endorsement. This piece has subtle reflectivity in the fields and only light surface chatter. Mild strike weakness occurs on the hair curls around Liberty's face and on the eagle's neck and the fletchings. Census: 14 in 61, 20 finer. CAC: 2 in 61, 2 finer (4/18). NGC ID# 42A7, PCGS# 8236

**5108** 1849-C XF45 NGC. Variety 1. Hints of lilac-red toning overlie pumpkin-gold surfaces. The peripheral strike is sharp, though the centers show blurring on the eagle's legs and the hair above the coronet. Small marks are scattered though none merit mention. A collectible Charlotte type coin. Struck from moderately rotated dies. NGC ID# C5XD, PCGS# 8241

### 1849-D Five Dollar, XF45 Original Olive-Gold Coloration

**5109** 1849-D XF45 NGC. Variety 25-S. The 1849-D half eagle is a challenging date to acquire with original coloration, as fewer than 200 pieces are believed known. This Choice XF example displays olive-gold surfaces that deepen to coppery hues around the borders. A short, horizontal strike-through is noted in the left obverse field, but there are no prominent abrasions. A well-struck Dahlonega five with pleasing eye appeal. NGC ID# C5XE, PCGS# 8242

**1850-C Half Eagle, Original VF35  
Gold CAC, Old Green Holder**

**5110 1850-C VF35 PCGS. Gold CAC.** Variety 1. The mintmark is bold and a radial die crack extends from the rim left of the U in UNITED. If one was to target a single Charlotte half eagle for type purposes, the 1850-C would be among the top choices. It is one of the few issues that can be found with pleasing surfaces and is more available than most other products from the facility. This remarkable Choice VF example is a prize. Housed in an old green label holder with a gold CAC approval sticker, it is unquestionably original and finer than the awarded grade. Deep orange-gold surfaces exhibit faint lavender hues and hints of luster. A touch of central softness and minor marks are trivial. From a mintage of 63,591 coins, of which about 350 pieces survive. NGC ID# 25TZ, PCGS# 8244

**5111 1853-C VF35 PCGS. Variety 2.** This original green-gold Charlotte five is exemplary for its grade despite a small lamination on Liberty's jaw. Although the mintage was only 65,571 pieces, three die marriages are known for the 1853-C. Most survivors are Variety 1, but the present coin is from a different obverse die with the date lower in the field. Specialist interest will instead be focused on the heavy retained die break on the reverse at 6 o'clock. Housed in an old green label holder. NGC ID# 25UE, PCGS# 8254

**1860-D Half Eagle, AU53  
Medium D, Modest Field Reflectivity**

**5112 1860-D Medium D AU53 NGC. Variety 46-GG.** This Medium D variety makes up most of the 1860-D half eagle population, although the date as a whole is scarce with an estimated survival of fewer than 275 coins (Doug Winter, 2013). This About Uncirculated example displays bright yellow-gold surfaces with glints of reflectivity in the fields. A small mark in front of Liberty's chin is mentionable, but other abrasions are light and scattered, as expected for the issue. NGC ID# 25VH, PCGS# 8286

**5113 1869-S XF45 NGC.** The 1869-S Liberty half eagle claims a low mintage of 31,000 pieces, an average production total in the context of the series. This Choice XF specimen shows light wear on the well-detailed design elements and the canary-yellow surfaces show scattered minor abrasions, the most noticeable on Liberty's cheek. Census: 17 in 45, 43 finer (5/18). NGC ID# 25W8, PCGS# 8318

**5114 1874-CC VF25 NGC. Variety 1-C.** Seven die marriages are confirmed despite a paltry mintage of 21,198 pieces. This rare-date Carson City half eagle is almond-gold aside from a few specks of ebony patina on the reverse. The wings and stars appear sharper than the VF25 grade, though Liberty is softly defined, partly due to a typical strike. NGC ID# 25WP, PCGS# 8334

**5115 1876-CC Fine 15 PCGS. Variety 1-A.** Only 6,887 half eagles were struck at Carson City in 1876, and surviving examples are scarce in all grades. This issue circulated extensively, as indicated by this well-worn example. The orange-gold surfaces are generally smooth and appealing, and much wing detail remains on the eagle. Housed in a green label holder. Population: 5 in 15, 76 finer (4/18). NGC ID# B5SN, PCGS# 8340

**1877-CC Half Eagle, VF35  
Choice Collector-Grade Example**

**5116 1877-CC VF35 PCGS Secure. Variety 1-B.** The small mintage of just 8,680 pieces contributes to the 1877-CC's scarcity in all grades, while Doug Winter estimates just 85 to 95 pieces survive today. The issue is equally challenging as other low-mintage Carson City fives, although it is not always appreciated as such. This is a Choice VF example, with olive-gold color and smooth, attractive surfaces. Traces of old build-up persist around the raised devices, and moderate wear accents a slightly soft strike that typifies most early CC-Mint five dollar gold pieces. Population: 10 in 35, 62 finer (4/18). NGC ID# BT9Z, PCGS# 8343

**5117 1878-S MS63 NGC.** This high-luster, pale-gold 1878-S half eagle is a notable condition rarity in Select Uncirculated condition. PCGS and NGC each report just a single MS65 example and a handful of near-Gem coins, followed by only a few MS63 representatives. The present coin is sharply struck and frosty with only minor field chatter and no individually prominent marks. Census: 7 in 63, 4 finer (5/18). NGC ID# 25X6, PCGS# 8347

**1880 Five Dollar, Sharp MS65+  
Far Finer Than Normally Encountered**

**5118 1880 MS65+ PCGS.** Even though nearly 3.2 million examples of the 1880 half eagle were struck, few survive anywhere near as nice as the present MS65+ PCGS representative. The honey-gold centers cede to deep caramel-gold near the rims on the obverse, while the reverse is a more consistent orange-gold. The strike is sharp but not absolute. A few dark flecks occur near star 11 and on the reverse rim at 7:30. Population: 22 in 65 (4 in 65+), 4 finer (4/18). NGC ID# 25XA, PCGS# 8351

1882-CC Five Dollar, AU53  
Old NGC Holder, Gold CAC Label

5119 1882-CC AU53 NGC. Gold CAC. Variety 1-A. A remarkable AU example of this collectible Carson City issue, showing sharp devices and lustrous yellow-gold fields. Light surface chatter appears under a loupe, but no significant wear is visible. Housed in a prior generation holder and awarded CAC Gold label, indicating that this coin has “exceeded CAC’s stringent grading standards.” NGC ID# 25XH, PCGS# 8359

5120 1883-S MS63 PCGS. A slightly better date in Uncirculated condition, the 1883-S half eagle comes from a mintage of only 83,200 coins. This Select representative is as fine as most collectors will have a chance to acquire the issue. A sharp strike complements frosty rose-gold luster. Scattered light marks account for the grade. Population: 56 in 63 (4 in 63+), 5 finer (5/18). NGC ID# 25XM, PCGS# 8363

5121 1885 MS62 Deep Prooflike NGC. Reflective fields and cameo contrast produce strong eye appeal on this well-struck 1885 half eagle, despite scattered abrasions that limit the grade. A couple of bluish discolorations are on the obverse, near star 5 and below Liberty's ear. NGC has designated only two coins Deep Prooflike, including this piece and one other in MS63 (4/18).  
Ex: Long Beach Signature (Heritage, 6/2004), lot 8912. NGC ID# 25XS, PCGS# 8367

1891-CC Five Dollar, MS62  
Frosted Carson City Type Coin

5122 1891-CC MS62 PCGS Secure. Variety 2-A. The second 1 in the date is minimally repunched south. As the most-available half eagle from the Carson City Mint, the 1891-CC is a logical selection for type. Although it is readily obtainable even in Uncirculated grades, bagmarks plague the issue. This example shows numerous tiny ticks, yet it is refreshingly free of large marks and abrasions. The strike is sharp except at the underside of the scroll, and cartwheel mint luster rolls across the attractive, sun-gold surfaces. NGC ID# 25Y5, PCGS# 8378

1891-CC Half Eagle, MS62  
Frosted Wheat-Gold Example

5123 1891-CC MS62 NGC. Variety 2-A. The second 1 in the date is slightly recut at the top, and the center fold of the banner below WE is incomplete to confirm the variety. Unlike most Carson City gold, the 1891-CC is readily available even in Mint State grades up to the Choice Uncirculated level. This heavily frosted example grades a lustrous and sharp MS62, with wheat-gold coloration and essentially full details. Marks are limited to some light luster grazes and numerous tiny ticks. NGC ID# 25Y5, PCGS# 8378

1891-CC Five Dollar, MS63+  
Better-Grade Carson City Type Coin

5124 1891-CC MS63+ PCGS Secure. Variety 2-A. The 1891-CC is an issue often selected by Carson City type collectors. A significant quantity of pieces apparently ended up in foreign bank holdings, only to return to the U.S. after World War II. Most such coins are notably abraded or lightly circulated, but the present Select half eagle is thoroughly lustrous and free from mentionable abrasions. The orange-gold surfaces are well-struck. The top of the second 1 in the date is repunched. The “A” reverse has a broken banner below the W in WE.

*From The Bob Williams Collection.* NGC ID# 25Y5, PCGS# 8378

**1892 Five Dollar, Frosty MS66**

Obverse Border Toning  
Old Green Label Holder

- 5125 1892 MS66 PCGS.** Sharp design elements and vibrant cartwheel luster characterize this high-end Liberty Head type coin. Most of each side displays original honey-gold color, although olive and coppery toning surrounds the obverse border. Under a loupe, the only mentionable abrasions are found in a cluster in the field behind Liberty's neck, but these are unobtrusive. The 1892 five is rarely offered this fine. Housed in an old green label holder. Population: 21 in 66, 1 finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# C5XG, PCGS# 8379

- 5126 1892-CC AU58 PCGS Secure. Variety 1-A.** This Carson City type coin exhibits light peach-gold toning and a bold strike. Luster dominates the borders and devices. Lightly abraded overall, though we note a mark on the 18 in the date.

*From The Bob Williams Collection.* NGC ID# 25Y7, PCGS# 8380

- 5127 1892-CC — Cleaned — PCGS Genuine. Unc. Details. Variety 1-A.** Wispy hairlines cross the fields of this lustrous pumpkin-gold Carson City half eagle. The strike is bold, and the scattered small abrasions do not distract. The underappreciated '92-CC is considerably scarcer than its '91-CC predecessor.

**1892-CC Five Dollar Liberty, MS62**  
Scarce, Late-Series Issue

- 5128 1892-CC MS62 PCGS Secure. Variety 1-A.** The 1892-CC Liberty half eagle claims a mintage of 82,968 pieces and it remains the most elusive Carson City issue of the decade, despite the emergence of a small hoard that surfaced in the mid-1990s. This well-detailed MS62 specimen exhibits lustrous orange-gold surfaces with the expected number of minor contact marks for the grade. From a late state of the dies, a die crack is evident from the D in the denomination to the final A in AMERICA and the scroll below WE is almost effaced by die polishing. Population: 43 in 62 (3 in 62+), 19 finer (4/18). NGC ID# 25Y7, PCGS# 8380

- 5129 1893-CC AU53 PCGS Secure. Variety 1-A.** Luster fills the margins of this lightly circulated canary-gold Carson City half eagle. The strike is good and the obverse is minimally abraded. A few hair-thin marks are noted in the field near the wings. NGC ID# 25YB, PCGS# 8384

- 5130 1893-CC AU53 PCGS Secure. Variety 1-A.** The most available of the three die marriages for this final Carson City issue. Just 60,000 pieces were struck, less than 5% of the Philadelphia five dollar production that year. This partly lustrous peach-gold representative has a single mentionable mark in the upper hair, but is otherwise exemplary.

*From The Bob Williams Collection.* NGC ID# 25YB, PCGS# 8384

- 5131 1893-S MS64 PCGS. CAC.** The 1893-S five dollar is surprisingly affordable. Almost a quarter million pieces were struck, but few are known today in high grades. The mint luster is strong and frosted over each side. There also are remarkably few abrasions present, obviously one reason for the CAC endorsement. In terms of bang for the buck, this S-mint five is worth considering and maybe even stretching for. Population: 41 in 64 (10 in 64+), 4 finer. CAC: 8 in 64, 2 finer (4/18). NGC ID# 25YD, PCGS# 8386

- 5132 1894-O MS60 NGC. Variety 2.** The fletchings on the reverse and the hair curls around Liberty's face exhibit trivial softness on this Mint State 1894-O half eagle, although the remainder of the coin is sharp. Original orange-gold surfaces show semiprooflike fields and light chatter that limits the grade. Eye appeal is outstanding for the MS60 level. NGC ID# 25YF, PCGS# 8388

**1901-S Five Dollar, MS66**  
Excellent 20th Century Type Coin

- 5133 1901-S MS66 PCGS.** Lovely mint-green hues appear near the rims on both sides of this satiny and highly lustrous lemon-yellow Gem. Both sides exhibit trivial, grade-consistent marks that are only visible with a loupe. This is a highly appealing piece for an advanced Liberty half eagle collection or a gold type set. Population: 77 in 66 (10 in 66+), 3 finer (4/18). NGC ID# 25YX, PCGS# 8404

- 5134 1906-S MS64 PCGS Secure.** An attractive Choice Mint State Liberty half eagle. This issue is conditionally elusive as the PCGS population data reveals. Both sides are fully lustrous with frosty yellow-gold surfaces and a solitary copper toning spot on the obverse. Population: 42 in 64 (4 in 64+), 18 finer (5/18). NGC ID# 25ZB, PCGS# 8415

**1907 Five Dollar, MS65+**  
Elusive in Finer Condition

- 5135 1907 MS65+ NGC.** A high-end Gem example of an available type coin issue, showing sharp motifs and frosty yellow-gold mint luster. A loupe reveals only insignificant, scattered contact marks, and eye appeal is outstanding. Gems are occasionally available, but the 1907 Liberty half eagle becomes scarce in higher grades. NGC ID# 25ZC, PCGS# 8416

- 5136 1908 MS65+ PCGS. A transitional year that saw the last of the Liberty half eagles and the first of the Indian design. This Gem represents the earlier type that was introduced in 1839. A pleasing Gem, this light yellow example has pristine surfaces and bold design definition. PCGS has only certified 58 numerically finer examples (5/18). NGC ID# 25ZE, PCGS# 8418

## INDIAN HALF EAGLES

- 5137 1909-D MS64+ PCGS Secure. The 1909-D Indian half eagle was produced in large numbers, but the issue becomes scarce above the MS64 grade level. This Plus-graded Choice example is sharply detailed throughout, with well-preserved orange-gold surfaces and vibrant mint luster. NGC ID# 28DJ, PCGS# 8514

### 1909-O Half Eagle, XF Details Popular New Orleans Issue

- 5138 1909-O — Altered Surfaces — PCGS Secure Genuine. XF Details. Most details are sharp on this lightly circulated coin, and the mintmark is clear. The 1909-O Indian half eagle is a unique design type for the New Orleans gold series and is in high demand in all grades. It is also a key date among Indian Head fives with a mintage of only 34,200 coins. This piece displays olive-gold and coppery color with deep olive-russet toning on each side. The surfaces are muted from cleaning or some other alteration, preventing a numeric grade.

### 1910 Half Eagle, MS65 Prohibitively Rare Finer

- 5139 1910 MS65 NGC. The 1910 Indian half eagle is decidedly scarce in MS65, and only a few finer coins are known. This Gem displays bright yellow-gold surfaces and satiny mint luster with only a few small field grazes. The strike is a trifle weak on the lower headdress feathers, but the coin is otherwise appealing. Census: 32 in 65, 3 finer (4/18). NGC ID# 28DK, PCGS# 8517

- 5140 1910-D MS63 NGC. Attractive, medium-gold color has a greenish tinge and the devices are sharply struck throughout this Select Uncirculated Indian five. A few small abrasions exist — one across the eyebrow, and a pair of short scrapes above the olive leaves and behind the eagle's neck — yet all other marks are minor. Bright golden luster glows throughout both sides with traces of "bag grime" confirming the original coloration. The D mintmark is open and sharp. NGC reports just 34 numerically finer coins (4/18). NGC ID# 28DL, PCGS# 8518

- 5141 1912 MS64+ PCGS Secure. The 1912 Indian half eagle becomes scarce in grades above the MS64 level. This Plus-graded Choice example exhibits well-preserved orange-gold surfaces that radiate vibrant mint luster and sharply detailed design elements throughout. PCGS has graded 64 numerically finer examples (4/18). NGC ID# 28DS, PCGS# 8523

### 1914 Indian Half Eagle, MS64 Colorful Toning, Seldom Finer

- 5142 1914 MS64 NGC. CAC. Lilac accents over lustrous, orange-gold surfaces give this 1914 a two-tone hue throughout both sides of the coin. Marks are limited to a few microscopic, delicate lines that occupy the fields, while the recessed devices are essentially mark-free and sharply struck. CAC endorsement recognizes the Choice surfaces and substantial eye appeal. The issue is quite scarce any finer — NGC has seen just 20 numerically finer examples (4/18). NGC ID# 28DU, PCGS# 8527

- 5143 1914-D MS63 PCGS. 30th Anniversary Green Label Holder. A generally well-struck example with only minor softness on the lower headdress feathers. The peach-gold surfaces teem with luster and display minimal contact for the Select level. The mintmark has a crude appearance due to a very deep impression. NGC ID# 28DV, PCGS# 8528

- 5144 1914-S MS61 PCGS. The 1914-S is one of the more elusive Indian half eagles in high grade. This well-detailed Mint State example offers pleasing orange gold surfaces with slightly subdued mint luster and the expected number of minor contact marks for the grade. NGC ID# 28DW, PCGS# 8529

- 5145 1916-S MS61 NGC. The 1916-S ranks as the final half eagle struck at San Francisco, and it is also the only issue produced this year of that denomination. The current Mint State example shows moderate abrasions and original straw-gold color with some olive overtones. Minor strike weakness occurs on the lower headdress feathers. NGC ID# 28DY, PCGS# 8532

## LIBERTY EAGLES

### 1843 Ten Dollar, Choice AU Rare Finer

- 5146 1843 AU55 NGC. Although more than 75,000 eagles were struck in 1843, this issue circulated extensively and is rarely offered in high grade. Only a few Mint State coins are known. This Choice AU representative displays light, even wear and well-detailed motifs. Scattered abrasions accompany the grade. Census: 30 in 55, 19 finer (5/18). NGC ID# 262P, PCGS# 8588

**1846-O Ten Dollar, AU53  
Scarce Variety 4 Die Pairing**

**5147 1846-O AU53 NGC.** Variety 4. This is a scarce variant, most easily attributed by the normal obverse but the mintmark is centered over the space between TEN and D. This piece is from the same die pairing as the AU53 we sold in our FUN Signature in 2011, but it is clearly a different coin. The surfaces are light, even yellow-gold with just a tinge of reddish patina. Lightly and thoroughly marked on each side. NGC ID# 554J, PCGS# 8595

**5148 1847 AU58 NGC.** Bright yellow-gold surfaces display traces of luster in the recessed areas of the well-detailed design motifs. Minuscule circulation ticks are uniformly distributed.  
Ex: Central States Signature (Heritage, 4/2008), lot 3568; ANA Signature (Heritage, 7-8/2008), lot 9906; Fort Worth Signature (Heritage, 3/2010), lot 2412. NGC ID# 262Z, PCGS# 8597

**5149 1847-O AU58 NGC. Variety 5.** Although the 1847-O half eagle is a significant rarity, its ten dollar counterpart has the highest mintage of any New Orleans gold issue. Variety 5 is among the rarest of the eight die marriages, identified by a low left mintmark and no repunching on the date. This caramel-gold example has substantial luster, and is smooth save for a nick on the obverse rim at 3 o'clock. NGC ID# 2632, PCGS# 8598

**5150 1848 AU58 PCGS.** The 1848 Philadelphia eagle is a rarity in mint condition despite a mintage in excess of 145,000 pieces. This AU58 coin is sharp and appealing, offering a more affordable option for the collector. The fields are prooflike, and the orange-gold color is original. Population: 9 in 58, 16 finer (4/18). NGC ID# 2633, PCGS# 8599

**5151 1850 Large Date AU58 NGC. Breen-6891, Repunched Date.** The 1 in the date is repunched at its base. This near-Mint Large Date coin has sharp devices and lustrous fields. Scattered abrasions on each side are typical of No Motto eagles in this grade and are not overly distracting. The 1850 Large Date issue is seldom offered finer. Census: 57 in 58 (1 in 58+), 16 finer (4/18). NGC ID# 2637, PCGS# 8603

**1851 Ten Dollar Liberty, MS61  
A Rare Issue in Mint State**

**5152 1851 MS61 NGC.** The 1851 is an underrated issue in the eagle series, struck after the first influx of California gold reached the Philadelphia Mint. Bright, yellow-gold color evenly covers both sides of this frosted, finely granular example, with sharply struck devices and luster surrounding the raised elements. A glass reveals several tiny marks and abrasions, but no heavy contact. The S.S. Republic yielded 33 examples of the 1851 eagle, although no information is available on the provenance of this exact coin. Census: 11 in 61 (1 in 61+), 5 finer (4/18). NGC ID# 263A, PCGS# 8606

**5153 1852 AU58 NGC.** The 1852 eagle is only moderately scarce in this grade and is infrequently offered finer. Razor-sharp central devices show almost no perceptible wear, although slight rub is visible in the fields. Weakness on the border stars is due to strike. The surfaces are bright and satiny with light abrasions. NGC ID# 263C, PCGS# 8608

**5154 1853 AU58 NGC.** Rich peach-gold patination displays traces of mint-green. Well-defined save for the usual softness on some of the star centers. The recessed areas reveal traces of luster. NGC has seen only 36 Mint State examples in AU58 (4/18). NGC ID# C82G, PCGS# 8610

**5155 1854 AU55+ NGC. CAC.** Moderate remaining luster in the recesses no doubt contributed to this Choice AU 1854 ten also receiving a Plus designation. The surfaces show original orange-gold patina and the design elements retain pleasing detail.  
Ex: Long Beach Signature (Heritage, 6/2015), lot 5332, where it brought \$1,410. NGC ID# 263G, PCGS# 8613

**5156 1854-O Small Date XF45 NGC. Variety 1.** The 1854-O Small Date and Large Date issues are similar in availability, both being rare in high grade. This collectible Choice XF Small Date coin displays lightly marked yellow-gold surfaces and pleasing detail. There are no mentionable areas of strike weakness. NGC ID# 263H, PCGS# 8614

**5157 1855 AU58 NGC.** The final use of the Slanted 5s makes this a popular No Motto issue with collectors. Both sides exhibit deep yellow-gold color and there is a hint of reflectivity in the lightly marked fields. Liberty's portrait and the eagle are strong with nearly indiscernible friction, while the outer elements are a touch incomplete. NGC ID# 263L, PCGS# 8616

**5158 1855 AU58 NGC.** This pleasing near-Mint No Motto ten is uncommonly free from abrasions, although a few wispy marks are found in the upper-reverse field. The strike is sharp with the sole exception of star 13. A peripheral band of luster encompasses many of the stars.  
Ex: Central States Signature (Heritage, 4-5/2010), lot 3719, where it realized \$1,610. NGC ID# 263L, PCGS# 8616

**5159 1856 AU58 NGC.** A moderately abraded example but with sharp detail, partial luster, and original olive-gold coloration. The 1856 Liberty ten dollar is scarce in the uppermost AU grade and is seldom available in mint condition. NGC lists 34 submissions finer than the present coin (4/18). NGC ID# 263P, PCGS# 8619

- 5160 1857-S XF45 PCGS Secure.** An important early S-Mint Liberty ten from a mintage of only 26,000 coins struck during the fourth year of San Francisco Mint operations, this Choice XF example has honey-gold surfaces with hints of luster. Trivial marks are consistent with the grade. Population: 12 in 45, 38 finer (5/18). NGC ID# 263V, PCGS# 8624

**1860 Ten Dollar, AU58  
From the S.S. Republic**

- 5161 1860 AU58 NGC.** Ex: S.S. Republic. Six-fold or “bulging” bun subtype. Bright lemon-gold surfaces have a considerable reflective component to the luster. Strongly struck devices exhibit only modest friction. Moderate abrasions are present around Liberty’s eye and just to the left of her neck, but the reverse is comparatively clean.

Ex: Central States Signature (Heritage, 4/2010), lot 3730. NGC ID# 2644, PCGS# 8631

- 5162 1868 XF45 NGC.** Like other Philadelphia issues struck between 1862 and 1873, the 1868 has a low mintage. Just 10,630 pieces were struck, and since the few gold collectors of the day purchased proofs, there are only about 300 survivors, mostly in XF and AU grades. This butter-gold example displays pockets of bright luster, and can be identified by a minor obverse rim knock at 1:30. Housed in a former generation holder. NGC ID# 264N, PCGS# 8653

**1868 Eagle, AU55  
Choice With Motto Example**

- 5163 1868 AU55 NGC. CAC.** The 1868 is a somewhat available Motto ten, and the AU55 grade level represents good value for the issue. At the next highest grade level (AU58) NGC shows 29 pieces have been graded (4/18), but it is tough sledding after that. This is an original orange-gold example with noticeable traces of mint luster and CAC endorsement. The surfaces are remarkably free from abrasions. Just 10,630 pieces were struck. CAC: 5 in 55, 7 finer (5/18). NGC ID# 264N, PCGS# 8653

**1874 Ten Dollar Liberty, MS62  
Smooth Surfaces**

- 5164 1874 MS62 NGC.** Smooth surfaces possess the eye appeal of a finer grade, although luster in the open fields is slightly subdued. This is a crisply struck example of an underappreciated issue that claims a mintage of 53,140 pieces. Mint State survivors are rare, as the series received little numismatic consideration in circulation-strike format until two decades later. Census: 8 in 62 (1 in 62+), 7 finer (5/18).

Ex: Summer FUN Signature (Heritage, 7/2007), lot 2680. NGC ID# 2657, PCGS# 8669

- 5165 1878 MS62 PCGS.** Vibrant yellowish-golden luster beams off the surfaces. While the 1878 has the third largest mintage of the 1870s-dated eagles, one could hardly say its mintage is large with fewer than 74,000 pieces struck. Choice Uncirculated and better specimens are scarce and more expensive by a factor of more than two with each jump in grade. Population: 54 in 62 (3 in 62+), 18 finer (4/18). NGC ID# 265J, PCGS# 8680

- 5166 1879-S MS62 PCGS.** Although a common coin in grades up to and including AU58, few Mint State examples of this San Francisco Mint issue have survived. This piece is sharply struck and has orange-gold surfaces with emerald-green accents. NGC ID# 265R, PCGS# 8686

- 5167 1880 MS63+ PCGS. CAC.** Hints of orange grace the brilliant yellow-gold surfaces of this attractive Select Mint State Liberty ten. PCGS has only assigned a Plus designation to five pieces at this grade level, and they have certified just 24 finer (5/18). CAC: 7 in 63, 10 finer (5/18). NGC ID# 265S, PCGS# 8687

**1880-CC Liberty Ten, XF45  
Scarce Branch Mint Issue**

- 5168 1880-CC XF45 PCGS. Variety 1-B.** Only 11,190 Liberty eagles were struck at the Carson City Mint in 1880, but the issue has a higher survival rate than CC-mint issues of earlier years. This Choice XF specimen displays light, even wear on the well-detailed design elements and the lightly abraded orange-gold surfaces show traces of prooflike reflectivity in the sheltered areas around the devices. From a late state of the dies, with a strong die line through the tops of EN in TEN. Population: 34 in 45, 89 finer (4/18). NGC ID# 265T, PCGS# 8688

**1880-O Liberty Ten, XF45  
Scarce, Low-Mintage Issue**

**5169 1880-O XF45 NGC.** Variety 1. The 1880-O ten dollar Liberty claims a mintage of 9,200 pieces, certainly a small production total in absolute terms, but not unduly small in the context of the series. This Choice XF specimen shows only light wear on the well-detailed design elements and traces of prooflike reflectivity cling to the protected areas around the devices. NGC ID# 265U, PCGS# 8689

**5170 1880-S MS63+ PCGS Secure.** This is a beautiful coin for the grade, showing warm orange-gold interiors and greenish-gold borders with hints of lilac throughout. The fields have a hint of reflectivity, but the surfaces are primarily radiant and lustrous. Sharp design elements and a few unobtrusive surface abrasions make up the balance of this 1880-S eagle's appearance. Population: 76 in 63 (3 in 63+), 7 finer (4/18). NGC ID# 265V, PCGS# 8690

**5171 1881 MS64 NGC.** Few collectors are aware that the 1881 has the second-highest mintage of the denomination, trailing only the 1932. But while the latter is plentiful in MS64, the 1881 is surprisingly rare. This sharply struck and lustrous apricot-gold eagle displays no more than the expected number of minor field abrasions. Census: 34 in 64 (3 in 64+), 2 finer (5/18). NGC ID# 265W, PCGS# 8691

**5172 1882 MS64+ PCGS.** The 1882 Liberty eagle was produced in large numbers, but most examples seen are circulated or bagmarked. The apricot-gold surfaces of this high-end near-Gem exhibit sharply struck devices and pleasing luster. A bargain relative to other gold issues of similar conditional rarity. Population: 50 in 64 (2 in 64+), 1 finer (4/18).

Ex: FUN Signature (Heritage, 1/2014), lot 6909, which realized \$3,290. NGC ID# 2662, PCGS# 8695

**5173 1882-S MS62 PCGS.** This radiantly lustrous Mint State coin displays original, frosty luster. The interiors are warm orange-gold, surrounded by brighter yellow-gold peripheries. Moderate abrasions account for the grade. PCGS lists only 18 finer 1882-S eagles (4/18).

Ex: Summer FUN Signature (Heritage, 7/2010), lot 9264, which realized \$1,610. NGC ID# 55GK, PCGS# 8698

**5174 1882-S MS62 PCGS.** A razor-sharp example with semiprooflike fields and bright yellow-gold color. Grade-limiting abrasions are uniformly scattered, producing little distraction. PCGS records 18 finer examples of this San Francisco issue (4/18), which are out of reach for many Liberty eagle collectors.

Ex: Long Beach Signature (Heritage, 2/2012), lot 9396, which realized \$1,380. NGC ID# 55GK, PCGS# 8698

**5175 1883-S Misplaced Date, FS-301, MS62 PCGS.** The 1883-S is a much better date due to a mintage of only 38,000 pieces. Likely, a single obverse die was needed to fulfill the production, and all examples may exhibit the misplaced date digit in the dentils between the ball of the 3. This lustrous Liberty ten has sea-green borders and orange-gold centers. Minor marks are prevalent, as expected of the grade. Population: 22 in 62, 7 finer (4/18). PCGS# 145726 Base PCGS# 8702

**5176 1887 MS62 PCGS.** Softly frosted surfaces yield warm orange-gold luster and sharp design elements on this Mint State 1887 eagle. Grade-limiting abrasions are light and unobtrusive. This issue is scarce in Uncirculated condition and a major rarity finer than MS62. Population: 31 in 62, 8 finer (4/18). NGC ID# 266H, PCGS# 8710

**1887-S Ten Dollar, MS64  
A Condition Rarity**

**5177 1887-S MS64 NGC.** The issue is plentiful in circulated grades but becomes scarce in Mint State. The Smithsonian collection includes an XF example, while Harry Bass owned an MS63 coin. This MS64 representative is a conditional rarity, and only one piece is certified finer by both NGC and PCGS combined (5/18). Pinpoint-sharp design features, orange-gold color, and frosty luster further enhances the desirability of this San Francisco ten. Census: 11 in 64, 1 finer (5/18). NGC ID# 5552, PCGS# 8711

**5178 1888 MS62 PCGS.** The 1888 ten dollar Liberty is scarce in Mint State and a major rarity finer than MS62. This piece is sharp and semiprooflike with warm honey-gold coloration. Scattered abrasions limit the grade. Population: 52 in 62, 8 finer (4/18). NGC ID# 266V, PCGS# 8712

**5179 1888-O MS61 NGC. Variety 2.** The scarcer of the two die pairings for this low-mintage issue of 21,335 pieces. This honey-gold example displays good luster and a sharp strike on the major design motifs. The stars are lightly impressed. Small scattered marks are fewer than anticipated for the grade. NGC ID# 266L, PCGS# 8713

**1889 Liberty Ten Dollar, MS61  
Scarce, Low-Mintage Issue**

**5180 1889 MS61 NGC.** From a limited mintage of 4,440 pieces, the 1889 ten dollar Liberty is definitely an underrated issue, outside of series specialists. This impressive MS61 specimen offers well-detailed design elements and lustrous orange-gold surfaces that show the expected number of grade-consistent minor contact marks on both sides. Census: 27 in 61, 9 finer (4/18). NGC ID# 266N, PCGS# 8715

**5181 1889-S MS63 PCGS. CAC.** Rich yellow-gold and orange shadings dominate this patinated Select coin, a lustrous and lightly abraded S-mint ten dollar. Well-struck and an excellent selection for an original type set.

Ex: Summer FUN Signature (Heritage, 7/2010), lot 4742, where it brought \$1,840. NGC ID# 267L, PCGS# 8716

1890-CC Ten Dollar, AU58  
Just 17,500 Coins Struck

5182 1890-CC AU58 NGC. Variety 1-A. This is an appealing Carson City eagle for the grade with remaining luster and few significant distractions. The only mark of note travels down Liberty's cheek, but it is fairly shallow. Multicolor alloy spots occur around the obverse margin, while soft orange and wheat-gold hues dominate each side. The stars, feathers, claws, and fletchings are strong. Only the middle curls and olive leaves display a hint of softness. This is one of just 17,500 1890-CC tens manufactured. NGC ID# 266S, PCGS# 8718

5183 1891-CC MS61 PCGS Secure. Variety 2-B. An attractive honey-gold Carson City type coin. The strike is sharp save for blending over Liberty's ear. Luster is ample, and marks are individually minor and relatively few for the designated grade.

*From The Bob Williams Collection.* NGC ID# 266U, PCGS# 8720

5184 1891-CC MS61 PCGS Secure. Variety 2-B. The 1891-CC is the most available Carson City ten dollar issue, and nice Mint State examples are always subject to demand from Old West type collectors. This sharply struck sun-gold eagle displays bright mint luster and shows surprisingly few marks.

*From The Bob Williams Collection.* NGC ID# 266U, PCGS# 8720

1891-CC Ten Dollar Liberty, MS62  
Repunched Mintmark, FS-501

5185 1891-CC MS62 PCGS Secure. Variety 3-C, FS-501. The repunched mintmark, with the undertype to the right of the primary CC, identifies the interesting FS-501 variety. This well-detailed MS62 example displays lustrous peach-gold surfaces with some scattered, minor contact marks on both sides. An unusual straight die line is evident through star 12 and an extensive network of peripheral die cracks travels through the reverse legends. NGC ID# 266U, PCGS# 8720

1891-CC Liberty Ten, MS62  
Popular Branch Mint Type Issue

5186 1891-CC MS62 PCGS. Variety 2-B. From a substantial mintage of 103,732 pieces, the 1891-CC Liberty eagle is an available issue in high grade and a popular choice of branch mint type collectors. This attractive MS62 example offers sharply detailed design elements and lustrous orange-gold surfaces with some scattered minor contact marks. NGC ID# 266U, PCGS# 8720

5187 1892-CC Tripled Die Reverse, FS-801 — Cleaned — PCGS Genuine. AU Details. Variety 1-A. A peach-gold example with substantial luster and a crisp strike. The fields are lightly abraded and display delicate hairlines. The 1892-CC has a low mintage of 40,000 pieces. Both varieties (1-A and 2-A) share the same reverse die, which exhibits tripling on IN GOD WE TRUST. Variety 1 shows repunching within the 9 in the date.

5188 1892-CC Tripled Die Reverse, FS-801, AU55 NGC. Variety 1-A. IN GOD WE TRUST is die tripled, most apparent on the O in GOD. All 1892-CC tens were struck from the same reverse die, unsurprising given the small mintage of 40,000 pieces. This original green-gold Carson City type coin has a good strike and substantial luster. Marks are relatively few, though we note a tick on the chin. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

1892-CC Liberty Eagle, AU58  
Tripled Die Reverse, FS-801

5189 1892-CC Tripled Die Reverse, FS-801, AU58 NGC. The FS-801 Cherrypickers variety is a relatively recent discovery, which is surprising since the reverse seems to be tripled on all 1892-CC Liberty eagles. The tripling shows most prominently on the letters in the motto IN GOD WE TRUST. This attractive near-Mint specimen exhibits just a trace of wear on the design elements, and the lightly abraded orange-gold surfaces retain much of their original mint luster. Census: 13 in 58 (1 in 58+), 6 finer (4/18). NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

5190 1892-O MS62 PCGS. Variety 1. The 1892-O has a mintage of just 28,688 pieces, and most survivors are in AU55 to MS62 grades. The issue becomes rare any finer than the present lot, which has a sharp strike and coruscating lemon-gold surfaces. Moderate obverse field marks are commensurate with the grade. NGC ID# 266X, PCGS# 8723

- 5191** 1893 MS64 PCGS. The mintage of more than 1.8 million pieces can only be considered as “massive” in the context of the ten dollar Liberty series. Even at the Choice Uncirculated grade, the 1893 is only moderately scarce, although Full Gem examples are rare. Frosted light-yellow color and cartwheel luster give this near-Gem eagle plentiful eye appeal. Marks are minimal, with only a tiny, tan alloy spot opposite the chin of Liberty. PCGS reports just seven numerically finer coins (5/18). NGC ID# 266Z, PCGS# 8725
- 5192** 1893-O MS62 PCGS. **Variety 1.** A lustrous and nicely struck butter-gold example. Distributed small marks account for the grade. The 1893-O has the lowest mintage of any post-1883 New Orleans ten. Fortunately for today's collectors, a few hundred Mint State survivors are known from the production of 17,000 pieces, though PCGS has certified only a baker's dozen above MS62.  
Ex: Internet Auction #245 (David Lawrence, 5/2008), lot 6215. NGC ID# 2673, PCGS# 8727
- 5193** 1894-O MS62 NGC. **Variety 1.** A conditionally scarce New Orleans issue. The mintage was less than 5% of its 1894 Philadelphia cousin. An apricot-gold example with pleasing luster and a good strike. Marks are moderate aside from a thin line above the bust truncation. Housed in a former generation holder. Census: 58 in 62, 18 finer (4/18).  
Ex: Central States Signature (Heritage, 4/2006), lot 4048; West Palm Beach Signature (Heritage, 7/2009), lot 1855, which realized \$1,610. NGC ID# 2676, PCGS# 8730
- 5194** 1894-S AU58 NGC. The 1894-S is among the many unheralded low-mintage issues within the long-lived Liberty eagle series. The issue is unknown above the MS62 grade, and Uncirculated pieces in general are rare. This is a “slider” AU coin with ample luster and a sharp strike. Moderate abrasions are proportionate to the grade. The base of the 1 is repunched. Census: 39 in 58, 21 finer (4/18).  
Ex: Long Beach Signature (Heritage, 6/2011), lot 4778, which realized \$1,380. NGC ID# 2677, PCGS# 8731
- 5195** 1895-O MS62 NGC. **CAC. Variety 2.** A sharply struck representative with far fewer marks than usually seen at the MS62 grade level. Luster dominates the borders and devices. A scarce issue that is seldom encountered any finer. CAC: 20 in 62, 6 finer (4/18).  
Ex: Long Beach Signature (Heritage, 9/2002), lot 8496, which realized \$1,092.50. NGC ID# 2679, PCGS# 8733
- 5196** 1896-S MS61 NGC. The 1896-S ten is scarce in Mint State. This collectible MS61 coin displays sharp design elements and satiny orange-gold luster with light, scattered abrasions. Higher-grade coins are rare. Census: 32 in 61, 14 finer (4/18). NGC ID# 267C, PCGS# 8736
- 5197** 1897-O MS61 PCGS. **Variety 2.** An attractive and original orange-gold New Orleans eagle with fewer marks than customary for the MS61 level. The borders teem with luster, and the strike is sharp throughout. The mintage was only 42,500 pieces, with most certified survivors in AU55 through MS62 grades. NGC ID# 7LHC, PCGS# 8738
- 5198** 1897-O MS62 PCGS. **Variety 2.** There are remarkably few sizeable abrasions for a branch mint eagle at the present grade level. Warmly colored in olive-gold hues, with an otherwise bold strike that wanes over a few of the obverse star centers. Population: 78 in 62 (2 in 62+), 33 finer (4/18).  
Ex: Long Beach Signature (Heritage, 6/2004), lot 9044; Long Beach Signature (Heritage, 7/2009), lot 1861. NGC ID# 7LHC, PCGS# 8738
- 5199** 1897-O MS62 PCGS. **Variety 1.** Rich sun-yellow and orange-gold shadings embrace each side of this later O-mint ten. Attractively lustrous with only a handful of significant abrasions. Population: 78 in 62 (2 in 62+), 33 finer (4/18).  
Ex: Long Beach Signature (Heritage, 2/2009), lot 2949, where it brought \$1,782.50. NGC ID# 7LHC, PCGS# 8738
- 5200** 1899-O MS61 PCGS. **CAC. Variety 1.** The 1899-O is a low-mintage issue rarely encountered in grades above MS62. This MS61 example is well-struck and displays rich almond-gold toning. Marks are minimal except for a few thin field lines near the first and final stars. NGC ID# 267K, PCGS# 8743
- 5201** 1899-O MS62 PCGS. **Variety 2.** Excellent detail in the centers with lustrous orange-gold surfaces. Wispy abrasions are present on each side, and an abrasion is noted at Liberty's lower jaw. Population: 50 in 62 (2 in 62+), 21 finer (4/18).  
Ex: Long Beach Signature (Heritage, 5/2009), lot 1766, where it brought \$2,760. NGC ID# 267K, PCGS# 8743
- 5202** 1899-S MS63 NGC. A frosty coin that retains ample luster and has a good strike for the issue. The surfaces show some scattered handling marks as expected for the grade. One thin scrape will serve to identify this coin, which is found in the field left of Liberty's forehead. Higher-grade 1899-S eagles are rarely offered. Census: 68 in 63 (2 in 63+), 19 finer (4/18).  
Ex: Central States Signature (Heritage, 4/2006), lot 4059, which realized \$2,472.50. NGC ID# 267L, PCGS# 8744
- 5203** 1901 MS65 NGC. Lovely sun-gold color includes orange accents across the sharply struck, lustrous surfaces of this Gem 1901 eagle. Only insignificant signs of contact exist on either side, while the eye appeal is outstanding. NGC reports 61 numerically finer 1901 eagles (5/18). NGC ID# 7LHF, PCGS# 8747
- 5204** 1901-O MS62 PCGS. **Variety 3.** Blended green-gold and apricot tints enrich this lustrous New Orleans eagle. Refreshingly void of noticeable abrasions. A few stars are softly defined in their centers. Ex: FUN Signature (Heritage, 1/2007), lot 6139, where it realized \$805. NGC ID# 267R, PCGS# 8748

### 1902 Ten Dollar Liberty, MS64+ Sharply Struck, Lustrous Example

- 5205** 1902 MS64+ PCGS Secure. **CAC.** The 1902 Liberty eagle claims a small 20th-century mintage of 82,400 pieces, making examples in MS64 condition quite elusive. This Plus-graded Choice example displays razor-sharp definition on all design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. Eye appeal is terrific. Population: 20 in 64 (4 in 64+), 5 finer. CAC: 5 in 64, 0 finer (4/18). NGC ID# 267T, PCGS# 8750
- 5206** 1902-S MS64+ PCGS Secure. **CAC.** Just over 450,000 pieces were struck at the San Francisco Mint, and many examples survive today in Mint State. The 1902-S becomes somewhat scarce in high-end MS64 condition and, while available in Gem, it is rare in Premium Gem or finer. This is a spectacularly lustrous near-Gem — Plus-graded by PCGS and CAC endorsed. The strike is ever-so-sharp and the eye appeal is irresistible. The few tiny marks are easy to ignore. NGC ID# 267U, PCGS# 8751
- 5207** 1903-O MS62+ PCGS Secure. **CAC. Variety 1.** The high mintmark variant of this New Orleans Motto type issue. Although a somewhat scarcer issue, the 1903-O is collectible in Mint State. Most such pieces are thoroughly bagmarked, but the present apricot-gold example has relatively few marks, with only a reed impression near star 11 worthy of comment. CAC: 44 in 62, 30 finer (5/18). NGC ID# 267W, PCGS# 8753
- 5208** 1903-S MS64+ PCGS Secure. The substantial mintage of 538,000 pieces makes the 1903-S Liberty eagle an available issue and a popular type coin. This Plus-graded Choice example is sharply detailed in most areas, with just a trace of softness on some star centers. The vivid orange-gold surfaces are well-preserved and lustrous. NGC ID# 267X, PCGS# 8754

- 5209 1903-S MS64+ PCGS. CAC. This moderately available issue becomes conditionally scarce in grades finer than the present MS64+ coin. A CAC green label confirms the high quality this coin shows for its grade. Sharp design elements and frosty yellow-gold luster are devoid of obtrusive abrasions. NGC ID# 267X, PCGS# 8754

**1903-S Ten Dollar, MS65  
First Generation Holder**

- 5210 1903-S MS65 PCGS. This radiant Gem is fully struck and displays warm honey-gold luster without any significant abrasions. Eye appeal surpasses that of many other MS65 coins that we have seen. The 1903-S Liberty eagle is a plentiful issue in most grades but becomes scarce in MS65 and is seldom found finer. This example is encapsulated in a first generation "rattler" holder.

*From The Tuxedo Park Collection.* NGC ID# 267X, PCGS# 8754

- 5211 1903-S MS65 NGC. The population reports confirm that the 1903-S is not nearly as available in Gem or finer grades as some references claim. This is a sparkling MS65 coin, with just a few wispy abrasions and a ringing-sharp strike. There are no bothersome alloy spots or other Mint-related defects, and the honey-gold surfaces provide great eye appeal. Census: 70 in 65 (1 in 65+), 46 finer (5/18). NGC ID# 267X, PCGS# 8754

- 5212 1904 MS63 NGC. A pleasing Select Mint State Liberty ten, this example has scattered grade-consistent marks with above average design definition on its straw-gold surfaces. NGC has certified only 43 finer examples (5/18). NGC ID# 267Y, PCGS# 8755

- 5213 1904 MS63 PCGS. The 1904 Liberty eagle has a low 161,900-coin mintage as the Philadelphia Mint concentrated on double eagle production in 1904. This Select Mint State example has lustrous wheat-gold surfaces with scattered, grade-consistent marks. NGC ID# 267Y, PCGS# 8755

- 5214 1904-O MS62 PCGS. **Variety 1.** A lustrous and lovely example of this lower-mintage New Orleans issue. A smattering of minute flan flaws are seen below the wings and in the field near the jaw, but post-strike abrasions are surprisingly few. The strike is bold except on the lowest two stars.

*Ex: New York Bullet (Heritage, 6/2005), lot 890. NGC ID# 7LHK, PCGS# 8756*

- 5215 1905-S MS62 PCGS. The fields have a hint of reflectivity, adding to the appeal of this highly lustrous Mint State 1905-S ten. The strike is sharp and abrasions are minimal for the grade. The 1905-S eagle is scarce in MS62 and rare finer. Population: 51 in 62 (1 in 62+), 15 finer (4/18). NGC ID# 2683, PCGS# 8758

- 5216 1907-D MS63 NGC. The second-year Denver eagle is considerably scarcer in the present grade than the introductory 1906-D issue, despite a slightly higher mintage. The lustrous butter-gold surfaces are well-struck and show surprisingly few marks. *Ex: FUN Signature (Heritage, 1/2010), lot 9355; ANA Signature (Heritage, 8/2010), lot 11009, which realized \$1,150.* NGC ID# 268A, PCGS# 8764

## INDIAN EAGLES

- 5217 1907 No Motto MS62 NGC. The 1907 Saint-Gaudens eagle without Motto or Periods was the first issue of the new Indian Head design to be struck in large quantity (239,400 pieces) and circulate widely. Overall, the issue was well-received and saved in large quantities among the general public, dealers, and collectors alike. This lustrous Mint State example shows only minor abrasions and marks, with satiny and attractive yellow-gold color and a sharp strike for the issue. NGC ID# 28GF, PCGS# 8852

- 5218 1907 No Motto MS63 PCGS. Collectors always like the 1907 No Motto ten dollar, representing the introductory issue in the series and a two-year No Motto type. The centers are almost always incomplete, but this Select piece is well-detailed with frosty honey-gold surfaces. NGC ID# 28GF, PCGS# 8852

- 5219 1907 No Motto MS63 PCGS. The 1907 Indian eagle is a popular 20th century type coin from the first year of the design. This attractive Select example offers well-detailed design elements, bright mint luster, and bright orange-gold surfaces that display occasional flashes of lilac. Only minor contact marks are present. *Ex: FUN Signature (Heritage, 1/2012), lot 6589.* NGC ID# 28GF, PCGS# 8852

- 5220 1907 No Motto MS63 NGC. Strike definition tends to plague the first-year No Motto eagle, designed by acclaimed sculptor Augustus Saint-Gaudens. This Select orange and khaki-gold representative is typically struck. Softly frosted mint luster and small abrasions are apparent on each side. NGC ID# 28GF, PCGS# 8852

- 5221 1907 No Motto MS63+ PCGS. The strike is a trifle weak on the obverse stars but is sharp on the eagle's shoulder. This high-end MS63 coin displays satiny straw-gold luster and relatively few noticeable abrasions, earning it high marks in terms of eye appeal. A popular No Motto issue for type purposes. NGC ID# 28GF, PCGS# 8852

- 5222 1907 No Motto MS63+ PCGS. This is a sharp, Plus-graded Select example with original honey-gold mint luster and well-struck design elements. Sharpness is particularly evident on the eagle's shoulder. A scattering of small abrasions prevents Choice or Gem classification, but this piece remains high-end for the MS63 level. NGC ID# 28GF, PCGS# 8852

- 5223 1907 No Motto MS63+ PCGS. PCGS labels this 1907 No Periods Indian eagle a No Motto coin, although all examples of this date and type lack the motto IN GOD WE TRUST, which was left off of Saint-Gaudens' design at the request of President Roosevelt and not restored to the denomination until mid-1908. The 1907 is a popular No Motto type coin. This Plus-graded Select example is well-struck and minimally abraded with original straw-gold luster. NGC ID# 28GF, PCGS# 8852

**1907 No Motto Eagle, MS64  
Prized Inaugural Issue**

**5224 1907 No Motto MS64 PCGS.** An impressive Choice specimen of this popular two-year design type, with a better-than-average strike that shows just a touch of the usual softness on Liberty's curls. The lightly marked orange-gold surfaces radiate vibrant mint luster and the overall presentation is attractive. From a large first-year mintage of 239,400 pieces, the 1907 ten dollar Indian is popular among date and type collectors alike. NGC ID# 28GF, PCGS# 8852

**1907 Indian Head Ten Dollar, MS64  
Well-Produced No Motto Coin**

**5225 1907 No Motto MS64 PCGS.** Mike Fuljenz writes: "The issue is known for being very well produced with sharp detail seen in the central portions of Liberty's headdress and the peripheral stars." The eagle's feathers are also strong on this yellow-gold near-Gem. Lightly abraded with minor strike doubling on the left stars and the date. NGC ID# 28GF, PCGS# 8852

**5226 1908-D No Motto MS60 PCGS.** The 1908-D No Motto Indian eagle comes from a mintage of 210,000 pieces and is the only No Motto issue struck at a branch mint. This Uncirculated coin shows bold definition and original luster. Heavy abrasions limit the grade, but none individually distract the viewer. NGC ID# 28GH, PCGS# 8854

**5227 1908-D No Motto MS60 PCGS.** A No Motto Denver coin with original honey-gold luster and well-struck design elements. Heavy abrasions on each side determine the grade, although the originality of the surfaces gives the coin some appeal. This is the only mintmarked No Motto issue. NGC ID# 28GH, PCGS# 8854

**5228 1908-D No Motto MS61 PCGS.** A well-struck example with original honey-gold luster. Scattered abrasions and field chatter account for the grade, but no singularly bothersome marks are seen. A popular mintmarked-No Motto type coin. NGC ID# 28GH, PCGS# 8854

**5229 1908-D No Motto MS61 PCGS.** An appealing lower-end Mint State example of this No Motto Denver issue, showing rich orange-gold and apricot luster amid well-struck design elements. Scattered abrasions in the fields determine the MS61 grade from PCGS. NGC ID# 28GH, PCGS# 8854

**5230 1908-D No Motto MS61 PCGS.** The Denver Mint did not strike ten dollar Indians in 1907, but produced more than 1 million coins in 1908. Of these, just 210,000 pieces were struck of the No Motto type. This Mint State coin displays bold detail and warm honey-gold and olive color. Scattered abrasions on each side define the grade. NGC ID# 28GH, PCGS# 8854

**1908-D Indian Eagle, MS62  
Popular No Motto Design**

**5231 1908-D No Motto MS62 NGC.** From a mintage of 210,000 pieces, this 1908-D Indian eagle represents the final year of the short-lived No Motto design. This attractive MS62 specimen exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's hair. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 28GH, PCGS# 8854

**5232 1908-D No Motto MS62 PCGS.** An impressive MS62 specimen from the final year of the short-lived No Motto design, this coin exhibits well-detailed design elements and pleasing orange-gold surfaces with the expected number of minor contact marks for the grade. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 28GH, PCGS# 8854

**5233 1908-D No Motto MS62 PCGS.** The short-lived No Motto design was modified later in the year. This attractive Mint State specimen exhibits well-detailed design elements and slightly subdued mint luster. The vivid orange-gold surfaces are lightly marked for the grade. NGC ID# 28GH, PCGS# 8854

**5234 1908-D No Motto MS62 PCGS.** A lustrous and lightly abraded wheat-gold coin. The reverse has all the pertinent details, though slight softness is visible on the hair below Liberty's headband. Ex: Dallas Signature (Heritage, 10/2006), lot 3042. NGC ID# 28GH, PCGS# 8854

**1908-D Motto Eagle, MS63  
Seldom Available Finer**

**5235 1908-D Motto MS63 PCGS.** A well-struck example of this first-year With Motto Denver issue, showing original honey-gold luster and light, scattered abrasions. This issue is generally available, coming from a mintage of more than 836,000 pieces, although coins grading finer than this Select example are elusive. PCGS lists 49 finer submissions (5/18). NGC ID# 28GK, PCGS# 8860

**5236 1908-S AU55 PCGS Secure.** All 1908-S Indian eagles feature the new With Motto design. The issue is scarce in high grade, due to the low mintage of 59,850 pieces. This lightly worn, lightly abraded Choice AU example retains surprising amounts of original mint luster. NGC ID# 28GL, PCGS# 8861

**5237 1908-S AU58 PCGS Secure.** All Indian eagles struck at San Francisco in 1908 are of the With Motto type. This issue boasts a limited mintage of 59,850 coins. This near-Mint survivor has bold detail and deep orange-gold luster that emerges from the fields and design recesses. Scattered light abrasions appear on each side, but the eye appeal of this coin exceeds expectations for the grade. NGC ID# 28GL, PCGS# 8861

**5238 1908-S AU58 PCGS.** An attractive Near-Mint representative from the second year of the Indian design, this coin exhibits just a trace of high-point wear on the design elements and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 28GL, PCGS# 8861

**5239 1909-D MS62 PCGS.** An attractive MS62 example from a mintage of 121,540 pieces, this coin exhibits well-detailed design elements, with just a touch of softness on the hair at the brow and the eagle's shoulder. The lightly marked orange-gold surfaces are lustrous and appealing. NGC ID# 28GN, PCGS# 8863

#### 1909-D Indian Eagle, MS63 Seldom Seen Finer

**5240 1909-D MS63 PCGS Secure.** The 1909-D Indian eagle is a challenging issue in high grade, from a smallish mintage of 121,540 pieces. The pleasing orange-gold surfaces of this attractive Select specimen show the minimum number of minor contact marks for the grade, with well-detailed design elements and satiny mint luster on both sides. PCGS has graded 45 numerically finer examples (4/18). NGC ID# 28GN, PCGS# 8863

**5241 1909-S MS61 PCGS.** Dark patina appears on the high points of this pinkish-gold Indian eagle. Both sides are highly lustrous with scattered marks that are expected at this grade level. NGC ID# 28GP, PCGS# 8864

**5242 1909-S MS62 PCGS.** The mintmark is lightly repunched, a different variety than Breen-7108. A lustrous green-gold representative. The strike is good, and although minor marks are distributed, none are singularly significant. The 1909-S emerges as a better date in Mint State grades. NGC ID# 28GP, PCGS# 8864

**5243 1910-D MS64 NGC.** Always a candidate for Indian gold type, the 1910-D is one of the more-available branch mint issues of the series even at the near-Gem level. This is a sharply struck example with no significant marks or bothersome abrasions. Satin-smooth, finely textured surfaces radiate attractive, wheat-gold color with rose highlights. NGC ID# 28GS, PCGS# 8866

**5244 1910-D MS64 PCGS.** The 1910-D Indian eagle was produced in large numbers and the issue is a popular choice with branch mint type collectors. This well-detailed Choice example offers lustrous, lightly marked orange-gold surfaces. NGC ID# 28GS, PCGS# 8866

**5245 1910-S MS62 NGC. Breen-7114, Repunched Mintmark.** A premium example of this San Francisco ten for the grade. The strike is reasonably sharp, and the surfaces are exceptionally frosty and appealing. Spectacular orange-gold color and bold cartwheel luster set this Mint State coin apart from its peers. The mintmark is clearly repunched, called "extremely rare" by Walter Breen. Abrasions are few for the assigned grade.

Ex: Long Beach Signature (Heritage, 9/2006), lot 3930. NGC ID# 268D, PCGS# 8867

**5246 1911 MS64 PCGS.** A pleasing Indian eagle, this Choice Mint State example has frosty and fully lustrous yellow-gold surfaces with trivial marks that are expected for the grade. NGC ID# 28GT, PCGS# 8868

**5247 1911-D XF45 NGC.** The mintage of 1911-D eagle is only 30,100 coins, the lowest production total among With Motto dates in the series. This collectible Choice XF coin offers pleasing sharpness for the grade and has hints of luster in the fields. The surfaces are relatively smooth and show pleasing honey-gold color. NGC ID# 28GU, PCGS# 8869

#### 1911-D Indian Eagle, AU50 Elusive, Low-Mintage Issue

**5248 1911-D AU50 PCGS Secure. CAC.** The 1911-D is the leading condition rarity in the Indian eagle series, from a modest mintage of 30,100 pieces. This attractive AU specimen shows only light wear on the strongly impressed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster on both sides. NGC ID# 28GU, PCGS# 8869

#### 1911-D Ten Dollar, AU55 Lowest Mintage in the Series

**5249 1911-D AU55 PCGS Secure.** Although this is not the rarest date in the Saint-Gaudens ten dollar series, it does claim the lowest mintage among all regular issues. Merely 30,100 coins were struck. Satin yellow-gold surfaces have been subjected to a modest degree of circulation, but detail is still good, especially on the portrait. The obverse shows a couple of coppery alloy spots (as made). Tiny marks are peppered over each side. NGC ID# 28GU, PCGS# 8869

**5250 1912 MS64 NGC.** A sharply struck, lustrous, and deeply frosted near-Gem, with vibrant mint luster and virtually no marks of any significance. A couple of tiny grazes are the sole deterrents to an even finer grade, although it would not be surprising to see this rich-gold eagle move up based on sharpness and eye appeal alone. NGC ID# 28GW, PCGS# 8871

**5251** 1913-S AU53 NGC. Partial luster remains on this About Uncirculated 1913-S Indian eagle, complementing original brass-gold coloration that deepens to a coppery-gold hue around the borders. This issue's mintage of 66,000 pieces ranks it among the semikey dates in the series. NGC ID# 28GZ, PCGS# 8874

**5252** 1913-S AU53 PCGS Secure. The 1913-S Indian eagle is a challenging issue in the series, due to its low mintage of 66,000 pieces. This attractive AU53 example exhibits lightly worn, well-detailed design elements and lightly abraded orange-gold surfaces that retain much original mint luster. NGC ID# 28GZ, PCGS# 8874

**5253** 1913-S AU55 NGC. CAC. A scant mintage of 66,000 pieces makes the 1913-S a semikey Indian Head issue. Most survivors are in XF to AU grades. At NGC, only about 15% of the Census is in Mint State. This Choice AU example displays moderate wear on the cheekbone and the eagle's front wing, but cartwheel shimmer persists across minimally marked surfaces. NGC ID# 28GZ, PCGS# 8874

**5254** 1914 MS63 PCGS. This impressive Select specimen exhibits a number of scattered, grade-consistent contact marks on the lustrous orange-gold surfaces. The design elements are well-detailed and overall eye appeal is quite strong. NGC ID# 28H2, PCGS# 8875

**5255** 1914 MS63 PCGS. A sharp strike and vibrant yellow-gold mint luster characterize this Select Uncirculated 1914 eagle. Scattered light abrasions are not out of line for the grade. This is a better date in finer grades. NGC ID# 28H2, PCGS# 8875

**5256** 1914-D MS63 NGC. The 1914-D eagle is a rare date in Gem condition, although this Select example remains accessible for budget-conscious collectors. The strike is sharp and each side displays original yellow-gold mint luster. Scattered light abrasions determine the grade. NGC ID# 28H3, PCGS# 8876

#### 1914-D Ten Dollar Indian, MS64 Well-Preserved, Lustrous Example

**5257** 1914-D MS64 NGC. From a mintage of 343,500 pieces, the 1914-D Indian eagle is not too difficult to locate in grades up to the MS64 level, but finer coins are scarce. This impressive Choice example offers well-detailed design elements, with just a touch of the typical softness expected on the eagle's shoulder, and lustrous orange-gold surfaces that show few signs of contact. NGC has graded 63 numerically finer examples (4/18). NGC ID# 28H3, PCGS# 8876

**5258** 1914-S MS61 NGC. Most Uncirculated 1914-S ten dollar gold pieces survive in MS61 to MS62. This radiant wheat-gold example is softly struck on the highest points, but the overall impression is good. The reverse is noticeably cleaner than the obverse. NGC ID# 28H4, PCGS# 8877

**5259** 1914-S MS62 NGC. The 1914-S Indian eagle claims a mintage of 218,000 pieces, but the issue is more elusive in Mint State grades than that substantial production figure would suggest. This attractive MS62 specimen offers well-detailed design elements, with just a trace of the usual softness on the eagle's shoulder. The lightly marked orange-gold surfaces are lustrous and appealing. NGC ID# 28H4, PCGS# 8877

#### 1914-S Ten Dollar Indian, MS62 Challenging Issue in This Grade or Finer

**5260** 1914-S MS62 NGC. Although 208,000 pieces were struck, few Mint State examples were set aside at the time of issue. This pleasing MS62 coin displays sun-gold patina and glowing mint luster that illuminates well-struck devices. Several small marks are noted on Liberty's forehead, cheek, and neck, consistent with the assigned grade.

Ex: Long Beach Signature (Heritage, 6/2005), lot 8003. NGC ID# 28H4, PCGS# 8877

#### 1915 Ten Dollar Indian, MS64+ Elusive in Finer Condition

**5261** 1915 MS64+ PCGS Secure. Gem examples of the 1915 are surprisingly scarce, which adds to the allure of this high-end near-Gem example. Lemon-yellow surfaces have an attractive greenish tinge, and the strike is sharp throughout both sides. A tiny tick near the ear perhaps accounts for the lack of a full Gem grade, although the lustrous and minimally marked surfaces are of high technical quality. Population: 24 in 64+, 84 finer (4/18). NGC ID# 28H5, PCGS# 8878

#### 1915-S Saint-Gaudens Ten Dollar, AU55 Only 59,000 Coins Struck

**5262** 1915-S AU55 PCGS Secure. The 1915-S is difficult to obtain in most grades thanks to its low mintage of 59,000 coins, but it is especially challenging to acquire in mint condition. This briefly circulated Choice AU offering is a perfect collectible alternative. The strike is clearly strong despite a trace of high-point rub, and partial luster remains. Light straw-gold surfaces are minimally abraded. NGC ID# 28H6, PCGS# 8879

**5263** 1926 MS64+ PCGS Secure. From a mintage of just more than 1 million pieces, the 1926 eagle is an available date and a popular choice of type collectors. This Plus-graded near-Gem exhibits well-detailed design elements and lightly marked, lustrous surfaces. NGC ID# 28H9, PCGS# 8882

**1926 Ten Dollar, MS65+  
Eye-Appealing Type Coin**

**5264** 1926 MS65+ PCGS. The 1926 is one of the favorite type coins in the With Motto Indian eagle series, being readily available through MS65 and reliably frosty, sharp, and exceptionally eye-appealing. This Plus-graded Gem fits all aspects of that reputation, and the vibrant luster is a rich orange-gold hue with wisps of lilac and ice-blue. PCGS lists only 24 finer representatives (5/18). NGC ID# 28H9, PCGS# 8882

**5265** 1932 MS65+ PCGS. A Plus-graded Gem representative of this popular type issue, with well-detailed design elements that show just a trace of the usual softness on the hair and the eagle's shoulder. The lustrous orange-gold surfaces exhibit no mentionable distractions. NGC ID# 28HB, PCGS# 8884

**LIBERTY DOUBLE EAGLES**

**5266** 1850 — Cleaned — PCGS Secure Genuine. AU Details. An introductory-year double eagle with vertical hairlines across both sides. A few thin marks are noted near the date. Substantial luster emerges from sharply struck caramel-gold surfaces.

**1850 Double Eagle, AU53  
First of the Denomination**

**5267** 1850 AU53 NGC. The first double eagles issued for circulation were struck at Philadelphia and New Orleans in 1850. The denomination was created as a direct response to the massive quantities of gold mined in California. This example has scattered marks, none that stand out, and exhibits a trace of luster on the greenish-gold surfaces. NGC ID# 268F, PCGS# 8902

**1850-O Twenty Dollar, XF Details  
A Centered Mintmark Variety**

**5268** 1850-O — Cleaned — PCGS Secure Genuine. XF Details. Variety 1. The mintmark is separated from the eagle's tailfeathers and the 1 in the date is centered over two dentils. The 1850-O double eagle is popular as the first New Orleans issue of this denomination and one of the more collectible dates from this important Southern mint. The present coin is well-detailed and lightly abraded. Bright straw-gold surfaces show evidence of light cleaning.

**1851 Liberty Double Eagle, AU58  
Scarce Issue in High Grade**

**5269** 1851 AU58 PCGS. CAC. Well-struck and still almost fully detailed, this attractive near-Mint example shows only slight scuffiness from brief circulation. The satiny surfaces exhibit light green-gold coloration and occasional pinkish-gold highlights, mainly near the peripheries and the central devices. As noted by Jeff Garrett and Ron Guth, in their *Encyclopedia of U.S. Gold Coins*: "A large number of coins was produced, but the vast majority of 1851 double eagles did not survive. Of the coins seen today, most are heavily worn."

Ex: Los Angeles Signature (Heritage, 8/2009), lot 2667. NGC ID# 268H, PCGS# 8904

**1852 Twenty Dollar, AU58  
Lightly Worn, Lightly Abraded Specimen**

**5270** 1852 AU58 PCGS. CAC. Despite a large mintage of more than 2 million pieces, the 1852 twenty dollar Liberty is a scarce issue in Mint State grades, making nice near-Mint specimens, like the present coin, especially attractive. Only a trace of wear shows on the high points of the design elements and the lustrous orange-gold surfaces are lightly abraded. NGC ID# 268K, PCGS# 8906

**5271** 1855 XF45 NGC. Original orange-gold and olive patina is the hallmark of this Choice XF 1855 double eagle, complementing hints of luster in the peripheral fields. Light wear on each side accompanies a scattering of abrasions, including a mark in front of Liberty's ear. This Philadelphia issue is rare in Mint State but collectible in XF condition. NGC ID# 268V, PCGS# 8914

**5272** 1855 AU53 NGC. Hints of luster remain in the fields of this About Uncirculated 1855 double eagle, and only light wear appears over the design elements. Both sides have scattered abrasions consistent with the grade. This issue is rare in Mint State but collectible in the current grade. NGC ID# 268V, PCGS# 8914

**1855-S Twenty Dollar, AU53  
Rich Color, CAC Endorsement**

**5273** 1855-S AU53 PCGS Secure. CAC. Medium S mintmark. This second-year San Francisco twenty exhibits natural canary-gold surfaces. The coin is lightly abraded given its brief stint in Gold Rush commerce, yet it is evenly struck and attractive with plentiful pockets of original mint luster. CAC endorsement adds to its solid AU credentials. NGC ID# 268X, PCGS# 8916

**1855-S Double Eagle, AU55  
Much Luster Remains**

**5274** 1855-S AU55 NGC. Only light high-point friction is apparent on this piece, and significant luster remains in the fields and the recesses of the design. Scattered abrasions accompany the grade. The 1855-S double eagle is elusive in Mint State but collectible in the upper AU grades. Many of the high-end pieces known today came from the S.S. Central America discovery. NGC ID# 268X, PCGS# 8916

**5275** 1856 XF45 NGC. This Choice XF 1856 double eagle displays sharp devices with a brush of wear. The bright yellow-gold surfaces exhibit only minor, unobtrusive marks save for a few thin pinscratches that are visible around the Liberty portrait with a loupe. A pleasing Type One double eagle in a collectible grade. NGC ID# 268Y, PCGS# 8917

**1856 Double Eagle, AU53  
Natural Coloration**

**5276** 1856 AU53 NGC. CAC. The 1856 "has a lower survival rate than other comparable double eagles struck during this era and it is a very rare (and still under-recognized) issue in high grades," according to Doug Winter (2002). This piece has natural olive-gold coloration and remaining luster around the devices. The radial lines, hair curls, and feathers exhibit bold detail for the No Motto type. NGC ID# 268Y, PCGS# 8917

**1856 Liberty Twenty, AU53  
Lightly Abraded Surfaces**

**5277** 1856 AU53 PCGS. CAC. From a mintage of 329,878 pieces, the 1856 double eagle is more difficult to locate in high grade than most Type One Philadelphia Mint issues. This attractive AU53 example displays pleasing orange-gold surfaces that retain traces of original mint luster and show only minor (almost insignificant) abrasions on both sides. The design elements exhibit just a touch of light wear. Population: 41 in 53, 86 finer. CAC: 17 in 53, 39 finer (4/18). NGC ID# 268Y, PCGS# 8917

**1857 Double Eagle, Well-Detailed AU50**

**5278** 1857 AU50 PCGS Secure. The San Francisco issue of this date is famous for being discovered in quantity on the S.S. Central America shipwreck, but the Philadelphia-struck 1857 double eagle is significantly scarcer in high grade. This About Uncirculated coin displays bold detail and retains hints of field luster. The bright straw-gold surfaces are moderately abraded. NGC ID# 2693, PCGS# 8920

**5279** 1857-S AU55 NGC. Variety 20D. The flag of the 1 is repunched, the 7 has a broad stem, and the mintmark is in lower relief than usual. The "Bold 7, Faint S" variety as assigned by S.S.C.A. curator Robert Evans, though the origins of the present example are unknown to the cataloger. A slight obverse rim knock is seen at 2 o'clock, but the almond-gold surfaces show relatively few marks. NGC ID# 2696, PCGS# 8922

---

**1858 Double Eagle, Choice XF  
Sharp Detail, Bright Surfaces**

**5280 1858 XF45 NGC.** This 1858 double eagle displays uncommonly sharp detail for the XF grade level, and satiny luster remains in the fields. Both sides are bright yellow-gold with scattered abrasions. This is a slightly better date among Philadelphia Type One issues, rarely offered in Mint State but collectible in XF45. NGC ID# 2697, PCGS# 8923

**5281 1858-S AU53 NGC.** Like most Type One Liberty double eagles, the 1858-S is not difficult to locate in circulated grades, but Mint State examples are elusive. This AU53 example is lightly worn and the orange-gold surfaces retain traces of original mint luster, with the expected number of minor abrasions on each side. NGC ID# 2699, PCGS# 8925

---

**1858-S Double Eagle, AU55  
Partially Lustrous Surfaces**

**5282 1858-S AU55 PCGS Secure.** The 1858-S double eagle is a rarity in Mint State, but attractive AU examples such as this one are collectible. Luster remains in the protected portions of the fields, and the strike is sharp with little wear over the high points of the devices. Scattered light abrasions accompany brief circulation. NGC ID# 2699, PCGS# 8925

---

**1858-S Twenty Dollar, AU58  
Original Surfaces**

**5283 1858-S AU58 PCGS.** Abundant original mint luster remains on both sides of this orange-gold survivor. The surfaces are uncommonly well-preserved with little evidence of wear and bold overall definition. Each side is lightly scuffed but no more than one should expect for a minimally circulated double eagle from the early years of production at the San Francisco Mint. Population: 54 in 58 (2 in 58+), 20 finer (5/18). NGC ID# 2699, PCGS# 8925

---

**1858-S Liberty Twenty, AU58  
Highly Lustrous Type Coin**

**5284 1858-S AU58 PCGS Secure.** In their gold coin *Encyclopedia*, Garrett and Guth state that 68 examples of the 1858-S double eagle were recovered from the S.S. Republic shipwreck. The issue remains scarce in AU58 and is genuinely rare in Uncirculated condition. This near-Mint coin displays sharp details and bright orange-gold color. Substantial luster remains in the fields, and scattered abrasions are relatively light and unobtrusive. Population: 53 in 58 (2 in 58+), 19 finer (4/18). NGC ID# 2699, PCGS# 8925

---

**1859-S Liberty Double Eagle, AU55  
Choice Type One Example**

**5285 1859-S AU55 NGC.** Both the 1859 Philadelphia and 1859-O double eagle mintages were low, making the 1859-S the logical selection for date collectors. Remaining mint luster forms a wide band around each individual obverse star, and bathes the recesses of the devices. This is a lightly circulated but problem-free example of this conditionally scarce issue, which saw fewer than 70 recoveries from the S.S. Republic shipwreck.  
Ex: Long Beach Signature (Heritage, 2/2007), lot 4902. NGC ID# 269C, PCGS# 8928

---

**1859-S Liberty Twenty, AU50  
Doubled Die Obverse, FS-101**

**5286 1859-S Doubled Die Obverse, FS-101, AU50 PCGS.** The lightly worn design elements of this attractive AU specimen show doubling on the letters in LIBERTY, the eye, hair curls, and Liberty's profile, identifying the popular FS-101 Cherrypickers variety. The pleasing orange-gold surfaces show the expected number of minor abrasions for the grade, but retain considerable amounts of original mint luster in the sheltered areas. Population (for the variety): 2 in 50, 6 finer (4/18). NGC ID# 269C, PCGS# 145732 Base PCGS# 8928

**5287** 1860 AU55 NGC. The mintage of 577,670 pieces makes the 1860 a popular choice among No Motto twenties. This Choice representative displays plentiful luster and generally smooth, unabraded surfaces. We note a tiny raised area on the rim below TWENTY (a minor rim bump), but there are no other marks of consequence. The strike is sharp as usual for the Philadelphia issue. NGC ID# 269D, PCGS# 8929

**1860 Twenty Dollar, AU58  
Scarce Any Finer**

**5288** 1860 AU58 NGC. This yellow-orange example retains pleasing luster despite minor field chatter and friction from brief circulation over the high points of the devices. The motifs are well-struck with nearly complete detail on the obverse stars and much remaining sharpness at Liberty's top hair strands. Struck before widespread hoarding during the Civil War, the 1860 issue is always popular for Type One representation, yet scarce any finer than the AU58 level. Ex: ANA National Money Show Signature (Heritage, 3/2007), lot 2225. NGC ID# 269D, PCGS# 8929

**5289** 1860-S AU53 NGC. The 1860-S was a workhorse double eagle during its day in West Coast commerce, with precious few Uncirculated examples put aside by either the Mint or collectors. This straw-gold About Uncirculated example is appealing despite a number of light handling marks and abrasions. Both sides are lightly worn yet well-struck, with remnants of soft luster and pleasing orange accents on the raised motifs.  
Ex: Long Beach Signature (Heritage, 2/2007), lot 4910, where it realized \$1,840. NGC ID# 269F, PCGS# 8931

**5290** 1861 AU55 NGC. The 1861 is a popular type-coin issue, boasting a mintage of nearly 3 million coins. Until the discoveries of the S.S. Central America and S.S. Republic, this was the most plentiful Type One Liberty double eagle. The present piece displays a remarkable amount of cartwheel luster despite slight high-point wear. Light surface chatter appears on Liberty's cheek and in the fields, as expected for the grade. NGC ID# 269G, PCGS# 8932

**1861 Twenty, AU58  
High-Mintage Issue Often Used for Type**

**5291** 1861 AU58 PCGS. This wheat-gold near-Mint coin displays sharp detail and highly lustrous fields. A few light abrasions accompany a brush of high-point friction. The 1861 double eagle is plentiful among Type One issues, ideal for type collecting when quality is needed but the budget is limited. This coin is highly appealing for the grade. NGC ID# 269G, PCGS# 8932

**5292** 1861 AU58 NGC. Minted in abundance, the 1861 issue is always a logical selection to represent the Type One design. Mint State pieces are available for a price, but near-Mint coins such as this still-lustrous and minimally marked AU58 present a better option for value-conscious collectors. A quick comparison to many MS60 to MS62 examples will show only marginal differences. NGC ID# 269G, PCGS# 8932

**1861 Twenty Dollar, Unc Details  
Frosty and Radiant**

**5293** 1861 — Cleaned — PCGS Genuine, Unc Details. This Type One Philadelphia coin is sharp and vibrantly lustrous, showing bright yellow-gold surfaces that have a frosty texture. Only a few grazes here and there are apparent. PCGS calls this coin cleaned, and while it is decidedly brighter than most 1861 double eagles that we have seen, close scrutiny with a 10x loupe is needed to find even minor hairlines on either side.

**5294** 1861-S AU50 NGC. Regular Reverse. Double eagle production at the three mints varied widely, from a high of more than 2.9 million pieces in Philadelphia to a low of less than 17,000+ pieces in New Orleans, where the Civil War was an overriding factor. The San Francisco double eagle mintage of 768,000 coins (plus 19,250 Paquet Reverse pieces) circulated on the West Coast unaffected by the war. Mint luster remains throughout this lightly abraded AU example, which displays attractive orange-gold color and numerous, small marks. The coin has sharp eye appeal for the grade. NGC ID# 269K, PCGS# 8935

**1862-S Liberty Double Eagle, AU55  
Seldom Encountered in High Grade**

**5295** 1862-S AU55 NGC. The San Francisco Mint produced more than 854,000 double eagles in 1862. There was little numismatic interest in branch mint issues at the time, and large denomination gold coins were too expensive for the average collector to collect systematically, so few examples were saved by contemporary numismatists. This attractive Choice AU representative is lightly worn and abraded, with still-lustrous orange-gold surfaces. NGC ID# 269N, PCGS# 8938

**5296** 1863-S AU53 NGC. Medium S. The larger mintmark is moderately scarcer than the Small S for the issue. Dusky peach and olive-green toning accompanies this satiny and inoffensively abraded example. The surfaces are original and exhibit ample luster. NGC ID# 269R, PCGS# 8940

**1864-S Twenty Dollar, AU53  
Boldly Rendered Design**

**5297 1864-S AU53 NGC.** Small S. This San Francisco issue was formerly rare in high grades. Today, it is far more accessible than it once was, although well-preserved survivors like this one remain conditionally scarce. The piece is bright yellow-gold with mint frost within the hidden areas of the boldly rendered design elements. Bagmarks are far less of an issue than usual, suggesting this 1864-S No Motto twenty may represent a shipwreck recovery. NGC ID# 269T, PCGS# 8942

**5298 1865-S AU53 PCGS Secure.** Small S. An evenly struck example of this late No Motto issue. Clashed below the hairbun and near Liberty's ear, but the butter-gold surfaces show substantial luster and fewer than the anticipated number of marks. NGC ID# 269V, PCGS# 8944

**1865-S Double Eagle, AU58  
Partially Lustrous CAC Coin**

**5299 1865-S AU58 PCGS Secure. CAC.** Quantities of the 1865-S double eagle were recovered from the S.S. *Brother Jonathan* and S.S. *Republic* shipwrecks, but relatively few coins in any grade are CAC approved. This near-Mint example displays good detail and luminous, frosty fields. Each side has original straw-gold color with light, scattered abrasions. CAC: 12 in 58, 60 finer (5/18). NGC ID# 269V, PCGS# 8944

**5300 1866 Motto — Repaired — PCGS Genuine. AU Details.** The obverse field is repaired near Liberty's shoulder curl. The butter-gold surfaces show surprisingly few marks. The eagle's head and other high points exhibit slight wear. First of the Motto issues, and scarce in better circulated grades, as is generally the case with Type Two twenties.

**1867 Type Two Twenty, Sharply Struck AU58**

**5301 1867 AU58 PCGS.** This well-struck double eagle displays extensive prooflike luster. The reverse is minimally marked and would likely merit an Uncirculated grade on its own. The central arrow shaft is completely absent, "as made" due to a lapped die. The high points of the obverse show scant indications of rub, and a couple of moderate field abrasions and coppery-orange toning streaks are noted for accuracy. The 1867 is a scarce issue in all grades, although most survivors are encountered in AU58 to MS61 grades. Ex: FUN Signature (Heritage, 1/2004), lot 3122; FUN Signature (Heritage, 1/2008), lot 4697. NGC ID# 269Z, PCGS# 8951

**1867-S Liberty Twenty, AU55  
Lustrous Surfaces**

**5302 1867-S AU55 PCGS Secure.** There is some lightness of strike on Liberty's hair curls, but actual wear is barely discernible on this Choice AU 1867-S double eagle. Both sides are lustrous and warmly colored orange-gold with honey and peach accents. Abrasions are apparent, including a vertical scrape in the field near Liberty's neck. This San Francisco issue is scarce in Mint State. NGC ID# 26A2, PCGS# 8952

**1868 Twenty Dollar, AU50  
Better Type Two Philadelphia Issue**

**5303 1868 AU50 PCGS Secure.** The 1868 double eagle is a rarity in Mint State and is elusive in AU grades. The Philadelphia Mint struck only 98,575 examples of this issue, making it a better date among Philadelphia Type Two twenties. This piece displays warm honey-gold color and retains some luster in the fields, with light wear over the well-struck devices. Each side is moderately abraded, but semiprooflike reflectivity in the fields adds to the eye appeal. On the reverse, dentil clash marks are seen in an arc below the eagle's tailfeathers. NGC ID# 26A3, PCGS# 8953

**1868-S Liberty Head Double Eagle, AU58  
Well-Struck and Still Lustrous**

- 5304 1868-S AU58 PCGS.** An average certified grade of AU51 suggests most surviving examples circulated to a moderate extent before being put away in storage or taken out of circulation by collectors. It is almost certain that the vast majority of 1868-S double eagles saw extensive use and were eventually melted. This is a boldly defined and partly frosted near-Mint representative with good eye appeal. Of the numerous small marks, only a couple of reverse pinscratches merit attention. PCGS reports just 38 numerically finer pieces (4/18). NGC ID# 26A4, PCGS# 8954

**1869 Liberty Head Twenty, AU50**

- 5305 1869 AU50 PCGS.** The fields of this AU 1869 double eagle are semiprooflike in the protected peripheral regions, although light wear in the open areas draws the eye away from that characteristic. The design elements are well-detailed, and each side of this coin displays uniform bronze-gold color and good eye appeal. This Philadelphia issue is rare in Mint State but collectible in AU grades. NGC ID# 26A5, PCGS# 8955

- 5306 1870 — Scratch — PCGS Secure Genuine. AU Details.** An unobtrusive straight pinscratch in the left obverse field near the nose is the reason for the PCGS disclaimer. Nonetheless, an attractive apricot-gold example with ample luster and relatively few bagmarks. The *Guide Book* mintage is only 155,150 pieces.

**1870-S Double Eagle, AU58  
Highly Lustrous Fields**

- 5307 1870-S AU58 PCGS Secure.** This near-Mint 1870-S double eagle is about as close to Uncirculated as an AU coin can get. There is a brush of friction across the obverse, but it is so light that some collectors might consider it to just be a part of the abrasions typically seen on low-end Mint State coins. Luster is certainly vibrant on this piece, and the surfaces offer warm orange-gold color. Finer 1870-S twenties are elusive. NGC ID# 26A9, PCGS# 8959

- 5308 1870-S AU58 NGC.** Type Two double eagles are challenging at the near-Mint level, since comparatively few have emerged from shipwrecks. This is a pumpkin-gold example with a good strike and extensive luster. Marks are fewer than expected of the AU58 grade, though we note a mark on the obverse rim at 11 o'clock, and moderate field contact near obverse star 4. NGC ID# 26A9, PCGS# 8959

- 5309 1872-S AU58 PCGS.** Small squat S. Pockets of luster illuminate this well-struck Borderline Uncirculated Type Two twenty. The butter-gold surfaces are less abraded than is customary for the grade. The '72-S was struck prior to the large-scale export of gold coin to Europe, and most survivors are found in XF to AU grades. NGC ID# 26AF, PCGS# 8965

- 5310 1872-S AU58 PCGS.** Small squat S. Like most other Type Two issues, the 1872-S is scarce and comparatively costly in Mint State. Many collectors find greater value in a near-Mint example, such as the present peach-gold piece. The evenly struck surfaces display substantial luster. Minor marks are distributed, though we note a bright area beneath the right (facing) wingtip.  
Ex: Houston Signature (Heritage, 11/2007), lot 61816, which realized \$1,840. NGC ID# 26AF, PCGS# 8965

**1872-S Twenty, Luminous MS61  
Attractive Luster and Color**

- 5311 1872-S MS61 PCGS Secure.** This luminous, frosty 1872-S double eagle is well-struck and remarkably attractive for the grade, despite scattered abrasions. Lovely orange-gold color appears on each side. The 1872-S is scarce in Mint State, and most such coins grade MS60 or MS61. This issue is rare finer. Population: 70 in 61, 9 finer (4/18). NGC ID# 26AF, PCGS# 8965

- 5312 1873 Open 3 MS62 PCGS.** Struck later in the year, the 1873 Liberty double eagle with the Open 3 in the date is more available than its Closed 3 counterpart. This coin exhibits well-detailed design elements and lustrous orange-gold surfaces with an appropriate number of grade-consistent contact marks. NGC ID# 26AL, PCGS# 8967

- 5313 1873 Open 3 MS62 PCGS.** The Open 3 Philadelphia issue is easily the most-available Type Two double eagle, due to its large mintage and generous survival rates, yet it is enduringly popular. This piece offers a bold strike and distraction-free surfaces, with radiant luster and marvelous orange-gold coloration. Certified in a previous generation green-label holder.  
Ex: Central States Signature (Heritage, 4/2008), lot 3791. NGC ID# 26AL, PCGS# 8967

- 5314 1873 Open 3, Doubled Die Obverse, FS-101, MS61 NGC.** LIBERTY is die doubled north, though the spread between hubbings is narrower than the FS-101 1873 Indian cent. The present butter-gold representative has a good strike and a relatively unabraded reverse. We note only a narrow mark east of the date. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

**5315** 1873 Open 3, Doubled Die Obverse, FS-101, MS61 PCGS. LIBERTY is die doubled on the obverse of this Open 3 variety. This Mint State coin is well-struck and lustrous with frosty yellow-gold surfaces. Scattered abrasions define the grade but none are individually bothersome. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

**5316** 1873 Open 3, Doubled Die Obverse, FS-101, MS62 NGC. Frosty, attractive mint luster produces a strong cartwheel effect on each side of this Mint State 1873 Open 3 double eagle. Scattered abrasions are generally unobtrusive. This piece has strong die doubling on LIBERTY, which adds to its appeal. Few finer FS-101 coins have been attributed by the grading services. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

**1873 Open 3 Double Eagle, MS62+  
FS-101, Doubled LIBERTY**

**5317** 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ NGC. LIBERTY shows bold die doubling on this popular *Cherrypickers'* variety. While a moderate number of examples have surfaced in recent years, the 1873 Type Two twenty is scarce in Mint State even without the doubled die. This well-frosted representative features a sharp strike and grade-consistent abrasions primarily located in the left obverse field. Bold mint luster bolsters attractive, straw-gold color. Census: 10 in 62+, 12 finer (4/18). NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

**1873 Open 3 Twenty Dollar, MS62+  
Doubled LIBERTY, FS-101**

**5318** 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ NGC. Die doubling is confined to LIBERTY, which shows narrow doubling north on the present coin. The 3 in the date is of the open variety, as are most 1873 double eagles. *Cherrypickers'* lists the variety as showing doubling on the beads atop the coronet as well as on some of the hair strands, but that additional doubling is not readily apparent on this example. A few luster grazes and light abrasions determine the numeric grade, although the coin's frosty luster, sharp strike, and visual appeal earn NGC's Plus designation. Census: 10 in 62+, 12 finer (4/18). NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

**1873 Doubled Die Obverse Twenty, MS62+  
More Available Type Two Issue**

**5319** 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ NGC. Die doubling is obvious on LIBERTY and it is apparent also on pearls 4-7 at the top of the headband. The surfaces display thick mint frost that is interrupted by the abrasions one would normally associate with this grade. A small, irregularly shaped copper alloy spot is located in the obverse field just to the left of Liberty's chin. Better struck than usually seen on Type Two twenties. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

**5320** 1873-S Closed 3 MS60 PCGS Secure. Small S. Type Two twenties are scarce in Mint State, but this yellow-gold example offers coruscating luster and no more than the anticipated number of small abrasions. Several obverse stars show softness, but the remainder of the strike is good. NGC ID# 26AL, PCGS# 8969

**1873-S Closed 3 Twenty, MS61  
Scarce in Finer Uncirculated Grades**

**5321** 1873-S Closed 3 MS61 PCGS. While the Closed 3 is more common than the Open 3, the issue remains slightly scarce in Mint State. Partially reflective fields establish mild contrast with the devices, most of which benefit from a sharp strike. Peach-gold surfaces are laced with hints of light green, and possess a scattering of minute contact marks. Mint State examples seldom exceed the MS61 level.

Ex: FUN Signature (Heritage, 1/2008), lot 4742. NGC ID# 26AL, PCGS# 8969

**1874 Double Eagle, MS61  
Elusive in Finer Grades**

**5322** 1874 MS61 PCGS Secure. Mint State examples of this Type Two Philadelphia issue are seldom encountered finer than the present. This piece has bold design elements and frosty yellow-gold mint luster. Scattered abrasions limit the grade, but none are individually distracting. Eye appeal is pleasing for the grade. NGC ID# 26AN, PCGS# 8970

**1874 Twenty Dollar, MS61**  
**More Available Type Two Issue**

**5323 1874 MS61 PCGS Secure.** Assembling a collection of twenties by design type is a popular way to collect. It is also a way to collect with the assurance of a significant amount of each coin's value guaranteed by the sheer intrinsic value of gold. In the case of Type Two twenties, there are only a handful of dates that can serve for type purposes, none of which are available in high grades. This 1874 shows rich golden-orange mint luster with a peppering of small abrasions on the obverse. NGC ID# 26AN, PCGS# 8970

**1874 Type Two Double Eagle, MS61**

**5324 1874 MS61 PCGS Secure.** Type Two twenties were only struck between 1866 and 1876, making this a briefly produced design type. This particular coin displays obviously original surfaces that have nicely mellowed deep red surfaces. The usual number of abrasions are scattered about, mostly on the obverse in this particular case. Well-struck. NGC ID# 26AN, PCGS# 8970

**5325 1874-CC — Altered Surfaces — PCGS Secure Genuine. XF Details. Variety 5-A.** One of the more available of the early CC twenties from a mintage of 115,085 pieces. We cannot pin down exactly what is meant by "Altered Surfaces" on this piece. It has been cleaned, but we do not see any other alteration of the surfaces than that. Even, bright orange-gold color, and well-defined for a Type Two.

**5326 1874-S MS60 PCGS Secure.** Block S mintmark. Struck from polished dies, the surfaces are prooflike throughout both sides of this radiant Mint State twenty. Myriad small marks and abrasions exist across the reflective fields and sharply struck devices. One slightly larger mark intersects with the eagle's right (facing) wing. Rich, sun-gold color adds to the vibrant eye appeal. NGC ID# 26AR, PCGS# 8972

**5327 1874-S MS61 NGC.** Small Squat S mintmark. The mintmark is positioned much farther left than seen on most 1874-S twenties. The surfaces are brightly lustrous with sharp eye appeal, and show fewer bagmarks than normally encountered for the grade. Mint State examples of the 1874-S are considerably scarcer than later Type Two issues — the 1875-S or 1876-S — although they are comparably priced. NGC reports just 43 numerically finer 1874-S examples (4/18). NGC ID# 26AR, PCGS# 8972

**5328 1874-S MS61 PCGS Secure.** Block S mintmark. A sharply struck example, with pleasing medium-gold color and relatively few marks for the grade. A scrape near star 3 and a small dig near the 4 in the date influence the assigned grade, although neither mark detracts significantly from the overall eye appeal, which remains strong. NGC reports just 43 numerically finer coins (4/18). NGC ID# 26AR, PCGS# 8972

**1874-S Twenty Dollar, Lustrous MS62**

**5329 1874-S MS62 PCGS Secure.** While the 1874-S has a mintage of 1.2 million pieces, survivorship is surprisingly low. It is comparably priced to more frequently seen Type Two issues, making it an excellent value. This orange-gold example shows the expected number of abrasions on the obverse. On the reverse there is a long arc at the upper half that we assume is some form of an alloy streak. Rich mint frost is seen throughout. NGC ID# 26AR, PCGS# 8972

**5330 1875 MS62 NGC.** Most Uncirculated examples of the 1875 double eagle grade MS62 or lower. This piece is attractive for the grade, showing only light abrasions that are balanced by frosty original mint luster. A well-struck Mint State Type Two double eagle. NGC lists only 32 numerically finer pieces (4/18). NGC ID# 2547, PCGS# 8973

**5331 1875 MS62 PCGS. CAC.** This attractive Type Two double eagle exhibits well-detailed design elements and lustrous peach-gold surfaces that show only minor signs of contact. The double eagle was the only gold denomination produced in collectible quantities at the Philadelphia Mint in 1875, all the other issues are famous rarities. PCGS has graded 89 numerically finer examples (4/18).  
Ex: Long Beach Signature (Heritage, 6/2013), lot 5876, where it brought \$4,259.38. NGC ID# 2547, PCGS# 8973

**1875-CC Double Eagle, Choice XF  
Variety 8-B, 15 Other Varieties Known**

**5332 1875-CC XF45 PCGS Secure. Variety 8-B.** Of the 16 known die pairings for the 1875-CC double eagle, six of them employ this reverse, but this obverse appears on only two. Mintmark placement and some faint diagonal die lines running through the CC identify the reverse, while date placement is the key identifier of the obverse. This Choice XF Carson City double eagle displays satiny yellow-gold surfaces and lightly worn devices. Scattered contact marks are typical of the grade. NGC ID# 26AT, PCGS# 8974

**5333 1875-CC — Cleaning — PCGS Genuine. AU Details. Variety 5-A.** A somewhat bright Carson City type coin with partly lustrous wheat-gold surfaces. The obverse is moderately abraded, with two rim depressions noted between the first two stars. The reverse shows comparatively few marks.

1876 Twenty Dollar, MS62+  
Rare CAC-Approved Mint State Coin

5334 1876 MS62+ PCGS. CAC. Available through MS62, the 1876 double eagle is seldom offered finer. CAC-endorsed coins, however, are scarce even in the current grade. This Plus-graded CAC example displays radiant cartwheel luster and thick original frost. The strike is sharp throughout and abrasions are at a minimum. NGC ID# 26AV, PCGS# 8976

1876-CC Type Two Twenty, XF45  
CC-Mint Type Coin

5335 1876-CC XF45 NGC. Variety 3-A. A collectible Carson City double eagle from a mintage of more than 138,000 coins. Some CC-mint twenties circulated domestically, while others were exported in foreign trade. The amount of wear on this piece suggests that it circulated in the western United States briefly. The surfaces are olive-gold and moderately smooth with grade-consistent wear. Ex: Long Beach Signature (Heritage, 9/2014), lot 8784, which realized \$2,702.50. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU50  
Final Year of the Type Two Design

5336 1876-CC AU50 PCGS. Variety 3-D. The Heritage numismatic staff have identified 10 varieties in various combinations of seven obverse dies and four reverse dies. This reverse die has the mintmark more widely spaced than any of the other three reverse dies, and it was used with a single obverse die. Breen assigned number 7262 in his Encyclopedia to the Wide CC variety, and noted that it is rare. This is the only occurrence of the first C directly above the center of the N in TWENTY. The second C is centered over the left edge of the adjacent T. Traces of mint luster remain in the protected areas of this honey-gold example that exhibits myriad trivial marks. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU50  
Final Type Two CC-Mint Issue

5337 1876-CC AU50 PCGS Secure. Variety 3-A. This About Uncirculated Carson City type coin displays light high-point wear and field rub, but the protected areas of the latter are semiprooflike. Bright yellow-gold surfaces exhibit only light, scattered abrasions. The 1876-CC is the final Type Two issue from this mint and is relatively plentiful in AU grades, so collectors can be selective when it comes to eye appeal. NGC ID# 26AW, PCGS# 8977

5338 1876-S MS61 PCGS Secure. CAC. Block S mintmark, entered far to the right above the upright of the second T in TWENTY. A large mintage of 1.6 million pieces makes the 1876-S an available Type Two issue even in Mint State. Lustrous, orange-gold color displays rose and olive-green highlights across the lightly abraded surfaces, with a few bagmarks but no distracting, heavy contact marks. CAC endorsed for its overall quality and eye appeal. NGC ID# 26AX, PCGS# 8978

5339 1876-S MS62 PCGS. The orange-gold surfaces of this impressive MS62 specimen radiate vibrant mint luster and show the expected number of minor contact marks for the grade. The design elements are sharply rendered and overall eye appeal is strong. NGC ID# 26AX, PCGS# 8978

5340 1877-CC — Cleaned — PCGS Secure Genuine. XF Details. Variety 1-B. Despite a mintage of just 42,565 pieces, five die marriages are confirmed for the '77-CC. From most available to rarest, the varieties are 1-A, 3-D, 3-A, 2-C, and 1-B. Vertical hairlines are noted on both sides, but this scarcer-date Carson City twenty lacks offensive abrasions and exhibits luster in the protected regions.

1877-CC Double Eagle, XF45  
Lustrous Fields

5341 1877-CC XF45 NGC. Variety 1-B. Some luster remains in the fields on this Choice XF 1877-CC double eagle, which is a plus for the XF grade level. Detail on the central devices is largely sharp, although wear is apparent. Scattered light abrasions do not detract. This issue is collectible in circulated grades but becomes scarce in Mint State. NGC ID# 26AZ, PCGS# 8983

5342 1878 MS61 PCGS Secure. The second 8 in the date is clearly repunched, and the reverse is die doubled, most apparent on the stars above IN GOD WE. A lustrous peach-gold Mint State twenty. The reverse is well-preserved, while the obverse displays marks consistent with the grade. NGC ID# 26B3, PCGS# 8985

**5343** 1879-CC — Harshly Cleaned — PCGS Secure Genuine. VF Details. Variety 1-A. An early die state with complete tail feathers. An olive-gold example of this better CC-mint issue, which has a production of just 10,708 pieces. Both sides are extensively hairlined, but luster peers from design elements, especially on the reverse.

**1880 Double Eagle, AU58  
Lower-Mintage Philadelphia Issue**

**5344** 1880 AU58 PCGS. CAC. Only 51,456 double eagles were struck at the Philadelphia Mint in 1880, ushering in an era in which the parent facility largely left the coinage of double eagles to the branch mints and concentrated on silver dollars and the smaller gold denominations. This attractive near-Mint specimen shows just a trace of high-point wear on the design elements and the orange-gold surfaces retain almost all of their original mint luster, despite a number of minor abrasions on both sides. Population: 61 in 58, 50 finer. CAC: 9 in 58, 1 finer (4/18). NGC ID# 26BG, PCGS# 8992

**5345** 1882-CC — Harshly Cleaned — PCGS Secure Genuine. XF Details. Variety 1-A. A better Carson City issue with a mintage of less than 40,000 pieces. This caramel-gold example displays luster about the stars and throughout the legends. Patches of hairlines emerge when the piece is rotated beneath a light, and are most apparent near STATES. We note a thin mark above the G in GOD.

**5346** 1882-CC — Cleaned — PCGS Genuine. AU Details. Variety 1-A. Plentiful pockets of luster outline the design elements. An attractive honey-gold Carson City twenty. Bagmarks are fewer than usual, and the cleaning is unobtrusive. Three die pairs are known from the mintage of 39,140 pieces. The majority of survivors are Variety 1-B, but this is a different reverse variety that places the second C in the mintmark lower than the first C.

**1882-CC Double Eagle, AU53  
Lustrous Original Surfaces**

**5347** 1882-CC AU53 PCGS Secure. Variety 1-B. Although only 39,140 double eagles were struck at Carson City in 1882, this issue is readily collectible for type and date purposes. In their gold Encyclopedia, Garrett and Guth write: "A large number of coins were shipped for international trade, and many have returned in recent decades." This AU example displays original olive-gold patina and partially lustrous fields. The devices are boldly rendered. No major abrasions are seen. NGC ID# 26BF, PCGS# 8997

**1882-S Twenty Dollar, MS62+  
Lovely Original Color**

**5348** 1882-S MS62+ PCGS. The 1882-S double eagle is available in MS62 but scarce in MS63. This Plus-graded coin strikes a balance between the two in both quality and cost. The strike is sharp and luster vibrant. Warm orange-gold centers cede to greenish-gold margins. Grade-limiting abrasions are mainly on Liberty's neck and cheek, and around the eye. PCGS lists 49 finer submissions (4/18). NGC ID# 26BG, PCGS# 8998

**1883-CC Twenty, XF45  
Smooth and Partially Lustrous**

**5349** 1883-CC XF45 PCGS. Variety 2-A, as usual for this plentiful Carson City issue. The Nevada branch mint struck 59,962 double eagles in 1883, many of which were later shipped over seas in the foreign trade. This Choice XF survivor displays relatively smooth honey-gold surfaces and well-detailed motifs. Hints of luster remain in the protected portions of the fields. NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, Choice XF  
Smooth Surfaces**

**5350** 1883-CC XF45 NGC. Variety 2-A. This bronze-gold Carson City double eagle shows smoother surfaces than typical for an XF-level gold piece from the Nevada branch mint. Details are only lightly worn by circulation, and hints of luster remain in the protected peripheral fields. A pleasing Carson City type coin. NGC ID# 26BH, PCGS# 8998

---

**1883-CC Twenty Dollar, XF45  
Popular, Lower-Mintage Issue**

**5351 1883-CC XF45 PCGS Secure. Variety 2-A.** The 1883-CC is a lower-mintage CC twenty with only 59,962 pieces produced. Its popularity is based on the collectibility and popularity of all coins from the Carson City mint. The surfaces are a bit bright with traces of mint luster still apparent surrounding the devices. Yellow-gold color with significant amounts of deep russet color surrounding the margin of the reverse. NGC ID# 26BH, PCGS# 8999

**5352 1883-CC — Damage — PCGS Secure Genuine. AU Details. Variety 2-A.** Liberty's cheek exhibits a grooved depression, perhaps a tooled strike-through. A similar but smaller depression is noted between star 11 and the hairbun, opposite a raised area near the C in AMERICA. Otherwise, abrasions are minimal on this well-struck and partly lustrous almond-gold Carson City type coin.

---

**1884-CC Double Eagle, XF40  
Impressively Smooth Surfaces**

**5353 1884-CC XF40 PCGS Secure. Variety 1-A.** as are all 1884-CC double eagles. This lightly circulated Type Three Carson City coin is well-detailed and impressively smooth with no distracting abrasions. A hint of luminance remains in the peripheral fields, and each side displays lovely olive-gold color that is original and will appeal to Carson City gold specialists. An outstanding coin for the grade. NGC ID# 26BK, PCGS# 9001

---

**1884-CC Twenty, XF45  
Available CC Type Coin**

**5354 1884-CC XF45 PCGS. Variety 1-A.** Lightly circulated examples of the 1884-CC double eagle are always in demand among type collectors, Carson City specialists, and those putting together complete date-mintmark sets. The khaki-gold color is obviously original. The finer design details show moderate blending, but the overall impression is still strong. The faintest traces of luster remain. NGC ID# 26BK, PCGS# 9001

---

**1884-CC Twenty, AU Details**

**5355 1884-CC — Cleaned — NGC Details. AU. Variety 1-A.** Relatively few examples were produced with a mintage of only 81,139 pieces. A number of examples have recently been repatriated from overseas holdings, making the 1884-CC more available within the context of Carson City twenties. Lightly hairlined, there is also a loss of the original mint luster which leaves just a trace of original mint frost surrounding the devices. Sharply defined for the grade. NGC ID# 26BK, PCGS# 9001

---

**1884-CC Twenty Dollar, AU50  
Smooth and Lustrous**

**5356 1884-CC AU50 PCGS. Variety 1-A.** Only one die pair was employed for the 81,139 double eagles struck at Carson City in 1884. On the obverse, a pair of crisscrossing die lines on Liberty's neck adjacent to the lower hair curls are diagnostic, and the reverse shows the mintmark positioned partially over the D in DOLLAR. This AU coin displays excellent detail and smooth, luminous surfaces. Original olive-gold and peach hues are a hallmark of this coin's eye appeal. NGC ID# 26BK, PCGS# 9001

**5357 1884-CC — Cleaned — PCGS Genuine. AU Details. Variety 1-A.** This lustrous and well-struck canary-gold Carson City type coin appears to be a Choice AU example upon cursory inspection, but thorough evaluation yields vertical obverse hairlines. Minor marks are scattered but do not distract.

**5358 1884-S MS62+ PCGS.** Lovely yellow surfaces and bright, frosty gold luster appear on both sides of this lightly marked Mint State example. A relatively plentiful date among Type Three double eagles that is hard to locate in higher grades.  
*Ex: New York Signature (Heritage, 2/2012), lot 4295, where it brought \$2,415.* NGC ID# 26BL, PCGS# 9002

**5359 1887-S MS61 PCGS Secure.** Radiant cartwheel luster illuminates rich orange-gold surfaces on this Mint State 1887-S double eagle. Scattered abrasions account for the grade but none are individually significant. The strike is sharp. NGC ID# 26BS, PCGS# 9007

**5360 1888 MS62 PCGS Secure.** An impressive MS62 representative of this popular Philadelphia issue, with well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is outstanding. PCGS has graded 35 numerically finer examples (4/18). NGC ID# 26BT, PCGS# 9008

**5361** 1888-S MS62 PCGS Secure. Sharply detailed design elements and vibrant mint luster are the calling cards of this impressive MS62 Type Three double eagle. Lightly marked orange gold surfaces add to the strong overall eye appeal. NGC ID# 26BU, PCGS# 9009

**5362** 1888-S MS62 PCGS Secure. This Mint State example is sharp and radiantly lustrous, showing bright orange-gold surfaces with only light, scattered abrasions. The 1888-S double eagle is available in this grade, but the coin stands out with exceptional eye appeal. NGC ID# 26BU, PCGS# 9009

**5363** 1889 AU58 PCGS Secure. Substantial luster remains in the fields of this near-Mint example, while the well-detailed devices show light high-point friction. Original orange-gold patina characterizes each side and abrasions are minimal. We have seen many Mint State coins with eye appeal inferior to that on this piece. NGC ID# 2695, PCGS# 9010

**5364** 1889 MS61 PCGS. The 1889 double eagle is a slightly better date with a mintage of only 44,070 pieces. Mint State examples are moderately elusive, and this MS61 coin is surprisingly attractive for the grade. Light surface chatter appears on each side, but the original prairie-gold luster delivers a pleasing cartwheel effect and frosty luminance. NGC ID# 2695, PCGS# 9010

**5365** 1889 MS61 PCGS. The low mintage of just 44,070 coins makes the 1889 more challenging than many other Type Three double eagles. This lightly abraded example radiates cartwheel luster from well-struck, rich-gold surfaces. Anything finer than MS62 is scarce, so the present MS61 coin is right in the wheelhouse of most collectors.

Ex: Long Beach Signature (Heritage, 9/2011), lot 8927, where it brought \$2,416.15; Central States Signature (Heritage, 4/2013), lot 9417, where it realized \$2,467.50. NGC ID# 2695, PCGS# 9010

**5366** 1889-S MS62 PCGS. A sharply detailed MS62 example of the distinctive Type Three design, this coin exhibits pleasing orange-gold surfaces with radiant mint luster and the expected number of minor contact marks for the assigned grade. NGC ID# 26BW, PCGS# 9012

#### 1890 Twenty Dollar, MS62 Elusive Issue in Finer Grades

**5367** 1890 MS62 PCGS. The 1890 twenty claims a small Philadelphia Mint production total of 75,940 pieces, making the issue scarce in grades above the MS62 level. This attractive MS62 specimen is sharply detailed and the vivid orange-gold surfaces radiate vibrant mint luster, despite a number of minor scrapes and contact marks on both sides. PCGS has graded 57 numerically finer examples (4/18). NGC ID# 26BX, PCGS# 9013

#### 1890-CC Double Eagle, AU50

##### Carson City Type Coin

**5368** 1890-CC AU50 NGC. Variety 1-A. This Carson City type coin shows original caramel-gold surfaces. Only lightly abraded for the denomination and grade. Luster is particularly prevalent on the reverse. The scarce early die state with full tailfeathers. PLURIBUS and TWENTY exhibit minute die doubling. NGC ID# 26BY, PCGS# 9014

**5369** 1890-CC — Cleaned — PCGS Secure Genuine. AU Details. Variety 1-A. The usual late die state with lapped right-side tail feathers. The apricot-gold surfaces are moderately glossy, and the obverse periphery displays many small, deliberate abrasions. The 1890-CC twenty is often selected by Carson City type collectors.

#### 1890-CC Double Eagle, AU Details Ideal Carson City Type Issue

**5370** 1890-CC — Cleaned — PCGS Secure Genuine. AU Details. Variety 1-A. The mintmark is centered between the Y in TWENTY and the D in DOLLAR. Bold design elements display minimal evidence of friction. Each side is bright yellow-gold with scattered wispy lines that explain the Details grade. The Carson City Mint produced 91,209 double eagles in 1890, making this an appropriate issue for type purposes.

#### 1890-CC Liberty Twenty, AU53 Carson City Type Coin

**5371** 1890-CC AU53 NGC. Variety 1-A. This piece is in the usual lapped reverse die state, which shows portions of the eagle's tailfeathers polished away. The coin is otherwise sharp and exhibits little wear. Smooth brass-gold surfaces have hints of luster in the protected areas. The 1890-CC double eagle is relatively plentiful among Carson City issues, ideal for type purposes. NGC ID# 26BY, PCGS# 9014

**5372** 1892-S MS63 PCGS. The older blue-label holder pre-dates the Saddle Ridge Hoard findings (which contained 90 MS63 or finer 1892-S double eagles), so this Select Uncirculated example is definitively not one of the hoard coins. The vibrant orange-gold color and flashy mint luster clearly indicate original surfaces. A pinpoint-sharp strike attends the smooth, frosted fields and motifs that show just a few marks and surface quality suggestive of an even finer grade. NGC ID# 26C7, PCGS# 9021

**5373** 1892-S MS63 PCGS. Rose and lilac highlights appear upon rotating this attractive 1892-S under a light, yet the overall coloration is rich orange-gold. Only a handful of tiny marks exist in the largely unabraded fields, while Liberty's cheek shows just a few light abrasions. The strike is sharp from lapped dies, with some loss of detail at the tailfeathers and arrow shafts. The light-blue label holder pre-dates any Saddle Ridge Hoard coins, thus the noticeable original eye appeal. NGC ID# 26C7, PCGS# 9021

**5374** 1893-CC — Harshly Cleaned — PCGS Genuine Secure. AU Details. Variety 1-A. The rarer of two die marriages from the scant final-year mintage of 18,402 pieces. A middle die state with delicate cracks through the base of the date but no reverse cracks. This well-struck sun-gold Carson City twenty shows only a whisper of circulation wear but both sides display patches of hairlines. There are surprisingly few bagmarks, though a narrow retained vertical lamination crosses obverse star 12.

#### 1895 Double Eagle, MS64+ Just Five Finer Coins at PCGS

**5375** 1895 MS64+ PCGS Secure. The frosty cartwheel luster of this Plus-graded near-Gem produces substantial visual appeal, while razor-sharp devices and minimally abraded fields certainly contribute exceptional eye appeal. The rich orange-gold coloration is original. PCGS has seen only five numerically finer examples of this conditionally challenging Philadelphia issue. Population: 32 in 64+, 5 finer (4/18). NGC ID# 26CD, PCGS# 9027

**5376** 1895 MS62 Prooflike NGC. Lightly repunched above the base of the 1 in the date. The sun-gold surfaces are impressively mirrored, though the fields display distributed small marks. The 1895 is fairly prevalent in Mint State, though prooflike examples are scarce. Census: 25 in 62 (1 in 62+) Prooflike, 5 finer (4/18). NGC ID# 26CD, PCGS# 79027

**5377** 1895-S MS63+ PCGS. CAC. Despite a high certified population at the Select Mint State grade level and in higher grades, few of these have passed their CAC inspection. This example has satiny yellow surfaces with minimal marks for the grade. CAC: 41 in 63, 33 finer (5/18). NGC ID# 26CE, PCGS# 9028

#### 1897-S Twenty Dollar, MS64+ Rarely Offered Finer

**5378** 1897-S MS64+ PCGS Secure. CAC. A sharp strike complements vibrant lemon-gold luster on this high-end Choice example. Only a few luster grazes on Liberty's cheek and in the field prevent a finer grade. The 1897-S double eagle is available in MS64 but rare finer, with only 14 such coins reported by PCGS (4/18). NGC ID# 26CJ, PCGS# 9032

#### 1897-S Twenty Dollar, MS62 Elusive Prooflike Specimen

**5379** 1897-S MS62 Prooflike NGC. The 1897-S twenty dollar Liberty was produced in large numbers, but few survivors have been certified with prooflike surfaces. This impressive MS62 example exhibits well-detailed design elements and deeply reflective prooflike fields on both sides. The yellow-gold surfaces show the expected number of minor contact marks for the grade. Census: 26 in 62 Prooflike, 15 finer (4/18). NGC ID# 26CJ, PCGS# 79032

**5380** 1898-S MS64 PCGS. CAC. Extraordinary mint luster is the hallmark of this popular late-date, S-mint twenty. The strike details are complete throughout and there are subtle gradations of color seen, especially on the obverse. Minimally abraded. NGC ID# 26CL, PCGS# 9034

**5381** 1900 MS64+ PCGS Secure. This high-end Choice 1900 double eagle is razor-sharp and vibrantly lustrous, showing original straw-gold coloration and clean fields. A few light scuffs on Liberty's cheek are all that prevent Gem classification. The 1900 Liberty Head twenty is an available date in this grade, suitable for type purposes. NGC ID# 26CP, PCGS# 9037

**5382** 1900 MS64+ PCGS Secure. This is a heavily frosted 1900 twenty, softly lustrous beneath high-end honey-gold surfaces that are sharply struck and well-preserved. Abrasions are few and far between, with unquestionably original surfaces and excellent eye appeal. Pale rose-gold highlights add visual interest. NGC ID# 26CP, PCGS# 9037

**5383** 1900 MS64+ PCGS Secure. CAC. Although its mintage is less than many Type Three issues, the 1900 twenty is easily among the most available double eagles in Uncirculated grades. It becomes only marginally scarce in Gem condition. This Plus-graded near-Gem example with CAC endorsement is an ideal candidate for high-grade type. A sharp strike joins lustrous, rich-gold surfaces. Marks are minimal for the grade. NGC ID# 26CP, PCGS# 9037

**5384** 1900 MS64+ PCGS Secure. CAC. Bright cartwheel luster flows freely across the frosted surfaces of this Plus-graded, minimally abraded 1900 double eagle. Liberty's hair strands and hair bun are sharply struck, and the overall surface quality suggests an even finer grade. Marks are universally minor and unobtrusive. Housed in a new Gold Shield holder with CAC endorsement. NGC ID# 26CP, PCGS# 9037

**5385** 1900 MS64+ NGC. CAC. A Plus-graded Choice specimen of this turn-of-the-century Liberty double eagle, with well-preserved orange-gold surfaces and sharply detailed design elements throughout. Vibrant mint luster enhances the terrific eye appeal. NGC ID# 26CP, PCGS# 9037

**1903 Double Eagle, MS65  
Beautifully Preserved, Old Holder**

**5386** 1903 MS65 PCGS. A true Gem — sharply struck, free of significant abrasions, and displaying frosty, shimmering mint luster. Shades of peach-gold, honey, and mint-green accent each side. The 1903 double eagle is available in MS65, but this coin is decidedly superior to many examples that we have seen on grounds of eye appeal. Finer coins are great rarities. Housed in an old green label holder. PCGS lists only four Premium Gems finer (4/18).

*From The Tuxedo Park Collection.* NGC ID# 26CW, PCGS# 9043

**5387** 1904 MS65 NGC. Plentiful through the Gem level, 1904 twenties are ideal for type and gold accumulation purposes as the most readily available date of the series. This frosted Gem displays smooth, rich-gold surfaces with excellent eye appeal and nearly mark-free surfaces. The strike is sharp throughout. NGC ID# 26CY, PCGS# 9045

**5388** 1904 MS62 Prooflike NGC. This impressive Liberty double eagle exhibits sharply detailed design elements throughout. The yellow-gold surfaces are uniformly reflective, with the expected number of minor contact marks for the grade. NGC ID# 26CY, PCGS# 79045

**1906 Twenty Dollar, Lustrous MS62  
Low-Mintage 20th Century Issue**

**5389** 1906 MS62 PCGS. The 1906's collectibility is based on its mintage of only 65,596 pieces — an impressively low number by post-1900 standards. Softly frosted mint luster characterizes this attractive example and there is a slight greenish tinge present in the otherwise golden-orange patina. Sharply defined throughout. NGC ID# 26D4, PCGS# 9049

**1906 Liberty Twenty, MS62  
In-Demand, Low-Mintage Issue**

**5390** 1906 MS62 PCGS. Housed in a green-label holder, this lovely MS62 double eagle has frosty yellow luster with a few grade-consistent surface marks. The 1906 double eagle is a low-mintage issue (69,500 pieces) that is always in constant demand, regardless of its grade.  
*Ex: Dallas Signature, (Heritage, 10/2008), lot 2411.* NGC ID# 26D4, PCGS# 9049

**1906-S Twenty Dollar, MS64  
Rare CAC-Approved Example  
Few Finer Pieces Known**

**5391** 1906-S MS64 PCGS. CAC. The 1906-S double eagle is available overall, but it is a major rarity above MS64. In Choice condition, only a few dozen pieces carry a CAC green label. This example is sharp and vibrantly lustrous, showing original honey-gold and peach color. Under a loupe, only light surface abrasions are visible, preventing Gem classification. PCGS lists just five finer coins (5/18). NGC ID# 26F6, PCGS# 9051

**5392** 1907 MS64 PCGS. An attractive Choice specimen from the last year of the long-running Liberty design, this coin exhibits sharply detailed design elements and vivid orange-gold surfaces with vibrant mint luster and few signs of contact. PCGS has graded 23 numerically finer examples (4/18). NGC ID# 26D7, PCGS# 9052

**1907-D Twenty Dollar Liberty, MS63  
Final Year of the Design**

**5393** 1907-D MS63 PCGS. Since the Denver Mint opened in 1906 and the Liberty design for the double eagle was discontinued after 1907, the D-mint series of Liberty double eagles consists of only two issues. The 1907-D is slightly more available than its 1906 counterpart, perhaps because of its slightly larger mintage of 842,250 pieces. This sharply detailed Select specimen exhibits lightly marked orange-gold surfaces with vibrant mint luster and strong eye appeal. NGC ID# 26D8, PCGS# 9053

## HIGH RELIEF DOUBLE EAGLE

### 1907 Wire Rim High Relief Twenty

5394 **1907 High Relief, Wire Rim — Devices Engraved — PCGS Genuine.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that is Ex-Jewelry and has been Toolled / Repaired. In spite of the numerous qualifiers, this is still an attractive example of the High Relief twenty. The surfaces are bright, undoubtedly from time spent in jewelry, but overall it still presents well.

## SAINT-GAUDENS DOUBLE EAGLES

5395 **1907 Arabic Numerals MS64 PCGS Secure.** This Choice example has an average strike but is luminous and appealing for the grade with minimal abrasions. For date collectors the low-relief Arabic numerals 1907 Saint-Gaudens double eagle is ideal, as it was produced in far greater numbers than the High Relief issue and is more affordable in pleasing Mint condition. NGC ID# 26F5, PCGS# 9141

5396 **1907 Arabic Numerals MS64+ PCGS Secure.** This is the first issue of the low relief Saint-Gaudens double eagle design type, which also features Arabic date numerals instead of Roman. The present coin is well-struck and vibrantly lustrous with only minimal signs of contact. A pleasing type coin. NGC ID# 26F5, PCGS# 9141

5397 **1907 Arabic Numerals MS64 PCGS. CAC.** Among No Motto twenty dollar issues, the 1908 is best known for its high-grade availability, but the present 1907 near-Gem displays bright mint luster, attractive green-gold toning, a good strike, and an exceptionally clean obverse. Certified in a green-label holder. NGC ID# 26F5, PCGS# 9141

5398 **1908 No Motto MS65 PCGS.** Long Rays Obverse. A lovely orange-gold Gem. Dynamic luster, a good strike, and an absence of mentionable marks combine to confirm the quality of this two-year type representative. Not from the Wells Fargo Hoard, which contained only Short Rays Obverse examples. NGC ID# 26F6, PCGS# 9142

5399 **1908 No Motto MS66 PCGS.** Long Rays Obverse. Blended lime-green and pumpkin-gold toning encompass this lustrous and crisply struck two-year type coin. The fields are exceptionally free from marks, even for the lofty MS66 level.  
*Ex: Houston Signature (Heritage, 12/2009), lot 2142, which realized \$3,335. NGC ID# 26F6, PCGS# 9142*

5400 **1908 No Motto MS66 PCGS.** Short Rays Obverse. Orange-gold overall with hints of sea-green near the rims. The strike is generally sharp, although Liberty's raised knee and the breast feathers are incompletely brought up. The lustrous surfaces display minimal marks.

*Ex: FUN Signature (Heritage, 7/2011), lot 5198, which realized \$2,990. NGC ID# 26F6, PCGS# 9142*

### 1908 No Motto Saint-Gaudens Twenty

#### Frosty MS66+

5401 **1908 No Motto MS66+ PCGS.** The 1908 is the most readily available No Motto Saint-Gaudens double eagle and a popular choice among type collectors. The population of this issue in high grade benefits from the discovery of the famous Wells Fargo Hoard. This high-end Premium Gem displays good strike sharpness and luminous, frosty wheat-gold surfaces. The fields are especially well-preserved. NGC ID# 26F6, PCGS# 9142

5402 **1908 No Motto MS66 NGC. CAC.** Short Rays Obverse. The lime-green borders and orange-gold centers proclaim the originality of this lustrous No Motto double eagle. The strike is bold except on the leg feathers, and marks are nearly absent save for two thin lines west of Liberty's torch. NGC ID# 26F6, PCGS# 9142

5403 **1908 No Motto, Wells Fargo Nevada, MS66 PCGS.** A splendid orange-gold example with glimpses of apple-green near the rims. The lustrous surfaces are nicely struck and show only incidental contact. The "Wells Fargo" hoard was distributed circa-2000, and its quality amazed the numismatic community. Certified in a green-label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

### 1908 Double Eagle, MS64 First With Motto Issue

5404 **1908 Motto MS64 PCGS.** The Philadelphia mintage was small for the inaugural 1908 Motto twenties — just 156,258 pieces — struck late in the year, with the Long Rays obverse and a slimmed-down sun to accommodate the Motto at the lower reverse. Near-Gem examples are scarce, although Gem or finer coins are considerably rarer. This Choice Uncirculated representative is sharply struck with excellent frosted luster. A small luster graze in the left obverse field and a single contact mark on the eagle's wing are the sole abrasions worthy of mention. NGC ID# BNAK, PCGS# 9147

**1908 With Motto Twenty, MS64  
Elusive in Finer Grades**

**5405 1908 Motto MS64 PCGS.** The 1908 With Motto double eagle is significantly more elusive than its No Motto counterpart, especially in high grades. Above MS64, this issue is genuinely scarce. This Choice example offers well-struck design elements and rich orange-gold luster. Only a few light abrasions are visible, leaving this coin with pleasing eye appeal. NGC ID# BNAK, PCGS# 9147

**5406 1909-S MS64 PCGS.** This issue is available in MS64, but the population begins to thin just one grade point finer. The present example is well-struck and softly frosted, showing original prairie-gold luster with only light, scattered abrasions. NGC ID# 26FE, PCGS# 9153

**5407 1910-D MS65 PCGS.** The 1910-D twenty dollar is plentiful in MS65 but elusive finer. This collector-grade Gem displays sharp detail and vibrant orange-gold luster. Only a few trivial marks are present throughout the satiny surfaces. An eye-appealing example of this Denver issue. NGC ID# 26FG, PCGS# 9155

**5408 1911-D MS65 PCGS.** Gem examples of this Denver issue are available, so collectors can be picky about eye appeal. This coin displays bold design elements and vibrant, satiny luster with honey-gold color. A small mark below Liberty's outstretched arm is the only discernible field abrasion. NGC ID# 26FK, PCGS# 9158

**1911-D Saint-Gaudens Twenty, MS66  
Conditionally Challenging in Finer Grades**

**5409 1911-D MS66 PCGS.** The obverse of this lustrous sun-gold twenty is remarkably free from contact. The reverse is also clean despite concealed marks on the eagle's breast. Liberty's face and torch fingers are well brought up, as are the panes of the Capitol building. Nearly unobtainable any finer. PCGS has graded 10 numerically finer examples (4/18).

Ex: Houston Signature (Heritage, 12/2008), lot 2617. NGC ID# 26FK, PCGS# 9158

**5410 1911-D/D Repunched Mintmark, FS-501, MS64 PCGS. CAC.** The undertype D shows to the right of the primary mintmark, identifying this popular *Cherrypickers'* variety. The design elements are sharply rendered and the well-preserved orange-gold surfaces radiate vibrant mint luster. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

**5411 1911-S MS64+ PCGS. CAC.** A pleasing Choice Mint State example, this 1911-S double eagle is fully lustrous with lovely honey-gold surfaces and excellent eye appeal. NGC ID# 26FL, PCGS# 9159

**1913-S Double Eagle, MS63  
Low-Mintage Issue**

**5412 1913-S MS63 PCGS Secure.** Only 34,000 double eagles were struck at San Francisco in 1913, creating a date that is highly sought-after in all grades, even if usually available. This Select example is in a good collector grade, balancing quality and price. Sharp motifs and vibrant orange-gold luster is appreciable on each side, and grade-limiting abrasions are not overly distracting. NGC ID# 26FR, PCGS# 9163

**1914 Double Eagle, MS64  
Solid Strike, Robust Eye Appeal**

**5413 1914 MS64 PCGS.** The Philadelphia Mint improved its quality when striking the 1914 twenties, making it one of the go-to issues for type collectors and gold specialists. This example offers a strong strike and outstanding eye appeal. Rich orange-gold toning covers both sides of the coin, while swirling mint luster reveals reddish-orange and lilac highlights. Scarce when finer, only a few tiny abrasions keep this near-Gem twenty from an even higher grade. PCGS has certified just 44 examples in finer numeric grades (5/18). Ex: Summer FUN Signature (Heritage, 7/2014), lot 4056. NGC ID# 26FS, PCGS# 9164

**1914 Twenty Dollar, MS64  
Low-Mintage Philadelphia Issue**

**5414 1914 MS64 PCGS.** A sharp Choice example, showing frosty wheat-gold luster that is original and free of major abrasions. The fields are especially luminous. The 1914 Saint-Gaudens double eagle is available in MS64, but PCGS has seen only 44 Gem or finer coins (5/18). Only 95,250 examples of this issue were struck. NGC ID# 26FS, PCGS# 9164

**5415 1914-D MS65 PCGS Secure.** This Gem-graded 1914-D Saint-Gaudens twenty is well-struck and lustrous with rich orange-gold coloration. The 1914-D is available in this grade, but finer coins are infrequently offered and may be out of reach for many collectors. NGC ID# 26FT, PCGS# 9165

**5416 1914-D MS65 PCGS.** This is a beautifully preserved Gem with sharp devices and radiant straw-gold mint luster. The fields are clean, and even the high points of Liberty's figure lack any distracting abrasions. The 1914-D double eagle is available in this grade but scarce finer. Housed in a first generation holder. *From The Tuxedo Park Collection.* NGC ID# 26FT, PCGS# 9165

**5417 1914-S MS65 PCGS.** The 1914-S double eagle is available in Gem condition but elusive finer. This piece is well-struck on the devices but a little weak along the top of UNITED and on the border stars. Frosty original luster delivers a greenish-gold hue, with few abrasions noticed. NGC ID# 82KA, PCGS# 9166

**5418 1915 MS63+ PCGS. CAC.** The Plus designation and CAC green label awarded this Select 1915 double eagle complement strong eye appeal and original yellow-gold mint luster. Grade-limiting abrasions are in the form of light, scattered surface chatter, which is not bothersome. NGC ID# 26FV, PCGS# 9167

**5419 1915-S MS65 PCGS.** Softly frosted honey-gold luster on this Gem 1915-S double eagle is original and shows only a few light, unobtrusive marks. The devices are well-defined, as are most of the border stars. This San Francisco issue is available in MS65 but becomes increasingly scarce in finer grades. NGC ID# 26FW, PCGS# 9168

#### 1915-S Twenty Dollar, MS66 None Finer at PCGS

**5420 1915-S MS66 PCGS.** A beautiful, green-gold Premium Gem that boasts virtually unmarked surfaces and dazzling cartwheel sheen. The strike is exemplary. Although many 1915-S twenties escaped the Treasury melts while sequestered in foreign bank vaults, most were indifferently stored and lack the eye appeal of the present piece. It is essentially unimprovable at the Premium Gem level, with none numerically finer at PCGS, although two NGC examples have been graded MS67 (5/18).

*Ex: Long Beach Signature (Heritage, 6/2006), lot 4099; Long Beach Signature (Heritage, 9/2009), lot 1947.* NGC ID# 26FW, PCGS# 9168

**5421 1916-S MS64 PCGS.** From a mintage of 796,000 pieces, the 1916-S Saint-Gaudens double eagle is an available issue in high grade. This attractive Choice example displays well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster throughout. NGC ID# 34NJ, PCGS# 9169

**5422 1920 MS63 PCGS. CAC.** The CAC endorsement is hard to come by on Mint State 1920 double eagles, even though this date as a whole is relatively plentiful. This Select example is well-struck and frosty with beautiful orange-gold luster. The eye appeal fully warrants the CAC green label. NGC ID# 26FY, PCGS# 9170

#### 1922 Saint-Gaudens Twenty, MS65 Rich Original Luster

**5423 1922 MS65 PCGS.** A frosty Gem, this 1922 Saint-Gaudens double eagle displays warm rose-gold luster and well-struck design elements without bothersome abrasions. Under a loupe, only a few small grazes are seen on the high points of Liberty's figure and in the fields. This Philadelphia issue is plentiful in MS65, but PCGS lists only eight finer submissions (4/18). NGC ID# 26G3, PCGS# 9173

#### 1922-S Twenty, MS63+ Slightly Scarcer Mintmarked Issue

**5424 1922-S MS63+ PCGS. CAC.** The Saint-Gaudens double eagles from 1922 through 1928 are all plentiful if they were struck in Philadelphia, and rare if they were struck in Denver or San Francisco. The only exception to that rule is the scarce 1922-S and the 1923-D. This is a lovely Select Mint State representative with frosty yellow-gold luster and considerable eye appeal. The reverse is rotated a few degrees clockwise. NGC ID# 26G4, PCGS# 9174

**5425 1923 MS64+ PCGS Secure. CAC.** The 1923 is scarcer in Gem condition than expected, given the thousands upon thousands of certified Uncirculated examples. This high-end near-Gem easily approaches the next-finest grade, with sharply struck motifs and radiant straw-gold color. Marks are minimal and eye appeal is high. NGC ID# 26G5, PCGS# 9175

**1923 Saint-Gaudens Twenty, MS65  
Rare Any Finer**

- 5426 1923 MS65 PCGS.** The 1922 to 1928 Philadelphia issues are often deemed "common," but at the MS65 level, the 1923 is easily the rarest date within that range. This is a deep-orange representative that boasts vibrant mint luster and an exemplary strike. The surfaces are smooth save for a graze on the eagle's breast and a few wispy marks in the upper-left obverse field. PCGS reports just four numerically finer certifications (5/18).  
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 5262. NGC ID# 26G5, PCGS# 9175

- 5427 1923-D MS65 PCGS.** This satiny Gem displays sharp motifs and well-preserved fields. Greenish-gold hues appear around the margins, contrasting with warmer rose-gold interiors. Eye appeal is pleasing, one of the hallmarks of the 1923-D Saint-Gaudens twenty that makes this issue popular among type collectors. NGC ID# 26G6, PCGS# 9176

**1923-D Saint-Gaudens Twenty, MS66  
Popular Branch Mint Type Issue**

- 5428 1923-D MS66 PCGS.** The 1923-D Saint-Gaudens double eagle is an available issue in grades up to the MS66 level, making it one of the most popular type issues in the series. The 1923-D becomes elusive in higher grades, however. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster on both sides. PCGS has graded 76 numerically finer examples (4/18). NGC ID# 26G6, PCGS# 9176

- 5429 1923-D MS66 PCGS.** Deep orange-gold color imbues this Premium Gem with excellent visual appeal. Radiant luster flows over the well-struck devices, with faint die cracks visible through LIBERTY. Magnification reveals no marks worthy of mention, although some strike weakness is visible on the lower peripheral stars.  
Ex: Summer FUN Signature (Heritage, 7/2014), lot 4917, which realized \$3,525. NGC ID# 26G6, PCGS# 9176

- 5430 1924 MS65+ PCGS. CAC.** This high-end Gem exhibits sharply defined design elements and vivid yellow-gold surfaces, with vibrant mint luster and hints of green and red patina. The eye appeal is extraordinary, as the Plus designation and CAC green label suggest. Perfect for type purposes. NGC ID# 26G7, PCGS# 9177

- 5431 1924 MS66 PCGS.** This outstanding Premium Gem has creamy luster and lovely, deep orange toning. The strike is full aside from minor softness on the Capitol building. Far nicer than the usually encountered 1924 twenty.  
Ex: Long Beach Signature (Heritage, 2/2006), lot 3694, where it brought \$2,530; Long Beach Signature (Heritage, 9/2009), lot 1964, where it realized \$3,450. NGC ID# 26G7, PCGS# 9177

- 5432 1924 MS66 PCGS.** A splendid green-gold Saint-Gaudens type coin. The obverse exhibits minor field grazes, along with a narrow and trivial retained lamination across Liberty's waist. Housed in a green label holder.

Ex: E.J. Mutton Collection of U.S. Gold, Part Two (Heritage, 12/2009), lot 2215, which realized \$3,737.50. NGC ID# 26G7, PCGS# 9177

- 5433 1924 MS66 NGC.** The 1924 Saint-Gaudens double eagle is always popular with type collectors because of its availability in high grades. This sharply detailed Premium Gem exhibits virtually flawless orange-gold surfaces with vibrant mint luster throughout. From a mintage of 4.3 million pieces. NGC ID# 26G7, PCGS# 9177

- 5434 1924 MS66 NGC.** From a large mintage of 4.3 million pieces, the 1924 Saint-Gaudens double eagle is always popular with type collectors. This sharply detailed Premium Gem offers well-preserved orange-gold surfaces with vibrant frosty mint luster. NGC ID# 26G7, PCGS# 9177

- 5435 1924 MS66+ PCGS Secure.** This available date is popular for type collections. Plus-graded and high-end, this Premium Gem is well-struck and frosty with vibrant cartwheel luster. Remarkably, both the fields and the high points of Liberty's figure are free of abrasions. NGC ID# 26G7, PCGS# 9177

- 5436 1924 MS66 PCGS. CAC.** A plentiful type coin issue, the 1924 is conditionally elusive in grades finer than MS66. This CAC-approved Premium Gem is high-end for the grade. The strike is sharp, and frosty original mint luster delivers greenish-gold margins and warmer peach-gold centers. No distracting abrasions are visible. NGC ID# 26G7, PCGS# 9177

- 5437 1924-S — Rim Damage — PCGS Genuine. Unc. Details.** The mintage of the 1924-S approaches 3 million pieces, but a supermajority of the production was transformed by the Treasury into Fort Knox gold bricks. The present lustrous example is among the thousand or so coins that escaped Federal holdings prior to the 1933 gold recall. The sun-gold surfaces show few marks, but the reverse rim has a flattened appearance, possibly as made despite the PCGS disclaimer.

- 5438 1925 MS66 PCGS.** An exceptional gold type coin. Each side displays bright cartwheel luster, and the slightly variegated yellow-gold and orange-gold surfaces appear virtually unabraded to the unaided eye. Liberty's face and the Capitol building offer outstanding detail. Only seven pieces have been certified numerically finer by PCGS (4/18).  
Ex: Houston Signature (Heritage, 12/2008), lot 2650, where it brought \$3,593.75. NGC ID# 26GA, PCGS# 9180

**1925 Saint-Gaudens Twenty, MS66+  
Vivid Color, Vibrant Luster**

- 5439 1925 MS66+ PCGS Secure.** From a substantial mintage of 2.8 million pieces, the 1925 Saint-Gaudens double eagle is easily located in MS66 condition, but finer examples are rare, making this Plus-graded Premium Gem an excellent balance of quality and value. The design elements are sharply detailed and the virtually flawless orange-gold surfaces radiate vibrant mint luster. PCGS has graded seven numerically finer examples (4/18). NGC ID# 26GA, PCGS# 9180

**1925-D Double Eagle, Unc Details  
Scarce Branch Mint Product**

**5440 1925-D — Cleaned — PCGS Secure Genuine. Unc.** The estimated survival rate for this mid-1920s branch mint double eagle issue is just 1,000 coins. About 90% of those twenty dollar gold pieces were repatriated from foreign holdings, explaining why most are known in lower Mint State grades. The noted cleaning on this lightly abraded Uncirculated representative is not overly distracting. Well-struck throughout.

**5441 1925-S — Filed Rims — PCGS Secure Genuine. AU Details.** The obverse rim is altered and exhibits concentric grooves. The reverse rim is normal. The 1925-S has a high mintage, but most pieces never left Treasury vaults and were eventually melted. This minimally marked yellow-gold survivor displays cartwheel luster with little indication of high-point friction.

**1926 Saint-Gaudens Double Eagle, MS66  
Vivid Color, Vibrant Mint Luster**

**5442 1926 MS66 PCGS.** Intense cartwheel luster and exceptionally clean surfaces allow this piece to easily qualify for the Premium Gem grade. The strike is unusually sharp, and some minor shelf doubling is detected on the digits of the date under close examination. An especially attractive specimen. PCGS has graded five numerically finer examples (4/18).

Ex: Dallas Signature (Heritage, 11/2005), lot 6684; FUN Signature (Heritage, 1/2008), lot 5117. NGC ID# 26GD, PCGS# 9183

**1926 Double Eagle, MS66  
Exemplary Surface Quality**

**5443 1926 MS66 NGC. CAC.** The 1926 Saint-Gaudens double eagle is available in MS66, but only a small number of coins in this grade are CAC approved. This piece is remarkably sharp and frosty with rich orange-gold color. The fields are clean, and only the most insignificant marks are visible on the high points of Liberty's figure. NGC lists eight finer examples, but there are none finer at CAC (5/18). NGC ID# 26GD, PCGS# 9183

**5444 1926-S AU55 PCGS Secure.** A lightly circulated example of a challenging mass-melted issue. The lustrous peach-gold surfaces lack bagmarks and possess the eye appeal of a much higher grade. The dies are slightly rotated. The obverse is lightly die doubled, most apparent on the ray beneath the 6 in the date, similar to the FS-101 1926. It is possible that the obverse dies for both varieties were made from the same working hub, where the doubling likely originated. NGC ID# 26GF, PCGS# 9185

**5445 1927 MS65 ★ NGC.** A delightful Gem representative of this popular type issue, with well-detailed design elements and lustrous orange-gold surfaces that show no mentionable distractions. The outstanding eye appeal is attested by the Star designation. NGC ID# 26GG, PCGS# 9186

**5446 1927 MS66 NGC.** Thick, frosty luster covers this Premium Gem type coin in greenish-gold luminance, revealing few surface grazes. The strike is sharp on this coin, and eye appeal is pleasing. The 1927 Saint-Gaudens double eagle is plentiful in MS66, but NGC lists only 60 finer submissions (4/18). NGC ID# 26GG, PCGS# 9186

**5447 1927 MS66 PCGS.** This satiny type coin is sharp and luminous, showing radiant orange-gold and tangerine luster with clean fields. Under a loupe, only a few trivial grazes are visible on the high points of Liberty's figure. Two dozen finer pieces are listed at PCGS (4/18). NGC ID# 26GG, PCGS# 9186

**5448 1927 MS66 PCGS.** Vibrant satin luster illuminates clean fields and sharp devices on this Premium Gem type coin, with only a few light marks visible on the high points of Liberty's figure. PCGS lists two dozen Superb Gems finer, which are out of reach for most collectors (4/18). NGC ID# 26GG, PCGS# 9186

**5449 1927 MS66 PCGS.** Lustrous butter-gold fields and devices display a sharp strike and a near-absence of consequential contact. Only a hair-thin diagonal line on the eagle requires mention. The 1927 twenty dollar is available in this grade but elusive finer.  
Ex: Summer FUN Signature (Heritage, 7/2011), lot 5288, which realized \$2,530. NGC ID# 26GG, PCGS# 9186

**1927 Saint-Gaudens Twenty, MS66+  
Excellent Type Coin**

**5450 1927 MS66+ NGC.** The Philadelphia Mint struck nearly 3 million Saint-Gaudens double eagles in 1927, making the issue readily available in grades up to the MS66 level. The population drops dramatically in finer grades, however, making this Plus-graded Premium Gem an excellent compromise between high grade and cost. This coin offers well-detailed design elements and impeccably preserved yellow and rose-gold surfaces, with vibrant mint luster throughout. NGC ID# 26GG, PCGS# 9186

**1927 Saint-Gaudens Twenty, MS66+  
Beautiful Color and Luster  
A Magnificent Type Coin**

**5451 1927 MS66+ NGC.** The 1927 is a common date in the Saint-Gaudens series, and many collectors seek high-grade examples for type representation. This Plus-designated Premium Gem is especially pleasing for that purpose, showing beautifully luminous cartwheel luster over frosty orange-gold surfaces. The strike is sharp, and only a few light grazes appear on the highest points of Liberty's figure, namely the knee and bust. The fields are clean. NGC lists 60 finer submissions (4/18). NGC ID# 26GG, PCGS# 9186

**1928 Canvas Philadelphia Mint Bag  
Held 250 Saint-Gaudens Twenties  
From Delivery Number 46**

**5452 Mint Bag for 1928 Double Eagles.** This official Philadelphia Mint bag originally held 250 1928 Saint-Gaudens double eagles with a face value of \$5,000. The imprint on the top side reads: No. 46 / \$5,000 / Double Eagles / U.S. MINT / PHILADELPHIA / 1928. The delivery number 46 indicates the coins were part of the 75,000 double eagles delivered from the Coiner on February 28, 1928. The delivery number was included in case the Special Assay found problems with the coins tested from that delivery, making it easy to identify and hold the questionable coins for more testing. This specimen is slightly soiled, but no holes are evident in the fabric. It measures approximately 6.125 x 13.5 inches. Double eagle Mint bags are seldom offered and collectors prize the few examples that surface sporadically over the years. The example in lot 4647 of the Dr. and Mrs. Steven Duckor Collection (Heritage, 1/2012) realized \$3,737.50.

**1928 Saint-Gaudens Twenty, MS66+  
Exceptional Type Coin**

**5453 1928 MS66+ PCGS Secure.** The 1928 Saint-Gaudens double eagle claims the largest mintage of the series, at 8.8 million pieces. The issue is easily located in high grade, making it a popular choice for type collectors. This Plus-graded Premium Gem exhibits sharply detailed design elements and virtually flawless orange-gold surfaces, with vibrant mint luster and terrific eye appeal. NGC ID# 34VK, PCGS# 9189

**1928 Double Eagle, Impressive MS66+  
High-End Surface Quality and Eye Appeal**

**5454 1928 MS66+ PCGS Secure.** More than 8.8 million double eagles were struck in 1928 and thousands survive in certified grades, yet the issue becomes more challenging in Plus-graded Premium Gem condition or finer. This example is well-defined with bold yellow-orange luster and rose-gold highlights. The sharply struck surfaces show two or three small marks and virtually no other abrasions of any kind. NGC ID# 34VK, PCGS# 9189

**5455 1928 MS66 PCGS. CAC.** Rich orange toning endows this lustrous and crisply struck Saint-Gaudens type coin. The obverse is remarkably free from marks, and the reverse exhibits only incidental contact. Certified in a green-label holder.  
*Ex: Long Beach Signature (Heritage, 9/2009), lot 1982, which realized \$5,318.75.* NGC ID# 34VK, PCGS# 9189

**COMMEMORATIVE SILVER**

**5456 1893 Isabella Quarter MS65 PCGS.** This intricately detailed Gem displays satiny cartwheel luster and original toning. The obverse is mainly russet with delicate lilac undertones, while the reverse displays lovely multicolor hues in moderately concentric bands. NGC ID# BYJ9, PCGS# 9220

**5457 1893 Isabella Quarter MS66 NGC.** Satiny luster forms a vibrant cartwheel effect on each side of this Premium Gem, which is mostly brilliant in the central reverse but tinted golden around the reverse border and across the obverse. The strike is sharp and eye appeal is outstanding. The Isabella quarter is marginally scarce in this grade and elusive finer. NGC ID# BYJ9, PCGS# 9220

- 5458** 1893 Isabella Quarter MS66 PCGS. The 1893 Isabella quarter comes from a distribution of only 24,214 pieces, but many examples were well-preserved by their initial owners. This Premium Gem is a collectible example of the issue, but finer pieces will be difficult to locate. The strike is sharp and the vibrantly lustrous surfaces are nearly perfect, showing warm lavender-gold toning on each side. Housed in an old green label holder.  
*From The Tuxedo Park Collection.* NGC ID# BYJ9, PCGS# 9220
- 5459** 1893 Isabella Quarter MS66 PCGS Secure. CAC. This luminous Gem type coin displays sharp motifs and unabraded surfaces. Original olive, amber-gold, and russet toning embraces softly frosted fields and devices, promoting excellent visual merit. The distribution of the Isabella quarter amounted to only 24,214 coins, and Gem survivors are in high demand today. NGC ID# BYJ9, PCGS# 9220
- 5460** 1921 Alabama MS66 PCGS Secure. The Alabama Centennial half dollar was issued two years after the actual centennial celebration, after its authorization in 1920. The first day of issue was October 26, 1921, when President Warren Harding visited Birmingham. This Premium Gem has frosty silver luster with splashes of gold and iridescent toning. PCGS has certified five finer (5/18). NGC ID# BYF2, PCGS# 9224
- 5461** 1921 Alabama 2x2 MS66 PCGS Secure. CAC. An important variant in the classic commemorative series, this Premium Gem has frosty silver luster beneath light gold toning. A lovely representative. PCGS has only certified eight numerically finer (5/18). NGC ID# BYEZ, PCGS# 9225
- 5462** 1936 Albany MS67 PCGS Secure. CAC. This highly lustrous Superb Gem exhibits pristine satin surfaces with delicate lemon-yellow, pale green, and purple toning on the obverse, and wispy gold tab toning on the reverse. PCGS has graded just three numerically finer examples. CAC: 83 in 67, 1 finer (5/18). NGC ID# 23WZ, PCGS# 9227
- 5463** 1937 Antietam MS67 PCGS. CAC. This spectacular Superb Gem exhibits sharp design elements and impeccably preserved surfaces with vibrant mint luster. A few specks of amber are evident on the obverse and subtle hints of pale gold toning show at selected angles. PCGS has graded 22 numerically finer examples (5/18). NGC ID# BYF4, PCGS# 9229
- 
- 1937 Antietam Half Dollar, MS67  
Exceptional Color, Satiny Luster**
- 

- 5464** 1937 Antietam MS67 PCGS. CAC. High-grade examples of the Antietam half dollar are usually available, but few will have the beautiful multicolor toning that the present coin displays. An array of colors forms on each side, but dominant hues include pine-green and violet. This CAC-approved coin is sharp and well-preserved with satiny mint luster. PCGS lists 22 finer representatives (5/18). NGC ID# BYF4, PCGS# 9229
- 5465** 1936-S Bay Bridge MS67 PCGS. This frosty Superb Gem is highly lustrous with strong design definition. Both sides are brilliant in the centers with variable-intensity peripheral iridescence. PCGS has certified only 12 numerically finer examples of this issue (5/18). NGC ID# BYFM, PCGS# 9254
- 5466** 1935-D Boone MS67 NGC. CAC. This spectacular Superb Gem exhibits sharply detailed design elements and virtually flawless surfaces, with satiny mint luster on both sides. From a distribution of 5,005 pieces. Census: 7 in 67, 0 finer. CAC: 7 in 67, 0 finer (4/18). NGC ID# BYFR, PCGS# 9259
- 5467** 1935/34-D Boone MS67 PCGS Secure. This luminous Superb Gem displays mattelike luster that accents the sharpness of the design and complements the outstanding preservation. A blush of olive-gold and blue-gray toning appears on each side, adding to the eye appeal. Population: 71 in 67 (5 in 67+), 9 finer (4/18). NGC ID# BYFU, PCGS# 9263
- 5468** 1937-S Boone MS67 PCGS. A spectacular Superb Gem, from a small distribution of 2,506 pieces, this coin exhibits well-detailed design elements and impeccably preserved surfaces, under attractive shades of golden-brown and lavender-gray toning. Population: 50 in 67 (5 in 67+), 3 finer (5/18). NGC ID# BYG5, PCGS# 9272
- 5469** 1936-D Cincinnati MS67 PCGS. The Cincinnati half dollar issues sold mostly to speculators, who saved the pieces, but few examples have come through the years as well as this Superb Gem. Light blue-green, peach, and silver-gray toning elements drape beautifully lustrous and carefully preserved surfaces. Population: 59 in 67 (13 in 67+), 2 finer (5/18).  
*Ex: Houston Signature (Heritage, 12/2009), lot 1222, which realized \$2,760.* NGC ID# BYCK, PCGS# 9284
- 
- 1936-D Cincinnati Half Dollar, MS67+  
Beautifully Toned**
- 

- 5470** 1936-D Cincinnati MS67+ PCGS. CAC. A conditionally scarce Superb Gem example, featuring both a Plus designation and a CAC green label. This high-end Cincinnati half dollar displays a sharp strike and exceptionally clean, luminous surfaces. Vivid multicolor border toning surrounds ice-blue and lavender interiors. Eye appeal excels. Population: 59 in 67 (13 in 67+), 2 finer. CAC: 29 in 67, 1 finer (5/18). NGC ID# BYCK, PCGS# 9284
- 5471** 1935 Connecticut MS67 PCGS. CAC. A satiny Superb Gem, this Connecticut half dollar exhibits brilliant silver surfaces and delicate gold, blue, and lilac toning about the obverse periphery. Just one numerically finer example has visited the PCGS grading room (5/18). NGC ID# BYGH, PCGS# 9299
- 5472** 1936 Delaware MS67 PCGS. CAC. A stunning Superb Gem, this Delaware half dollar displays deep champagne toning over frosted mint luster on both sides, with peripheral gold and iridescent toning. Only three numerically finer examples reside in PCGS holders. CAC: 62 in 67, 1 finer (5/18). NGC ID# BYGJ, PCGS# 9301
- 5473** 1936 Elgin MS67+ PCGS. CAC. The Elgin is undoubtedly one of the most profoundly lustrous commemorative half dollars created. On top of this thick mint frost are thin layers of pale multicolored toning that add incredible visual appeal. As expected, there are no overt abrasions on either side of this superior Elgin. Among the finest known. PCGS has only certified eight finer examples. CAC: 83 in 67, 4 finer (5/18). NGC ID# BYGL, PCGS# 9303

**5474** 1936 Gettysburg MS66+ PCGS. CAC. Both sides of this Premium Gem exhibit frosty and brilliant silver luster with splashes of magenta toning, adding emerald and violet on the reverse. NGC ID# BYGM, PCGS# 9305

**5475** 1936 Gettysburg MS67 NGC. CAC. This 1936 Gettysburg commemorative half dollar is particularly well-struck. Satiny silver surfaces display golden-gray toning punctuated by daubs of deep-russet patina. Remarkably few signs of contact appear on this well-preserved Superb Gem. Census: 71 in 67 (6 in 67+, 6 in 67★, 1 in 67+★), 4 finer. CAC: 48 in 67, 1 finer (5/18). NGC ID# BYGM, PCGS# 9305

**5476** 1922 Grant No Star MS66+ PCGS. CAC. Light toning at the margins yields to silver centers of this Plus-graded, CAC-endorsed Premium Gem Grant No Star half dollar. Mint luster coruscates over both sides and illuminates the sharply struck, nearly mark-free surfaces. PCGS reports just 67 numerically finer pieces (4/18). NGC ID# BYGP, PCGS# 9306

**1922 Grant No Star Half Dollar, MS66+  
Beautiful Multicolor Toning**

**5477** 1922 Grant No Star MS66+ PCGS. CAC. The No Star Grant Memorial half dollar is slightly more plentiful in high grade than the With Star variety, being ideal for type collectors. Nonetheless, examples are scarce finer than MS66. This Plus-graded Premium Gem displays vivid multicolor toning over each side and well-preserved, satiny luster. Minor strike softness is visible on Grant's hair, although the colorful toning makes this hardly noticed. NGC ID# BYGP, PCGS# 9306

**5478** 1922 Grant With Star MS62 NGC. The With Star Grant Memorial half dollar is significantly scarcer than its No Star counterpart. This toned MS62 example displays satiny luster without major abrasions. Russet, olive, and gold toning blankets each side. NGC ID# BYPP, PCGS# 9307

**1928 Hawaiian Half Dollar, MS65  
Attractive Toning**

**5479** 1928 Hawaiian MS65 PCGS. Small tinges of forest-green, ruby-red, and gold toning appear around the borders on this Gem, leaving the interiors with a uniform light golden hue. The strike is sharp and no abrasions distract from the eye appeal. The Hawaiian Sesquicentennial half dollar is considered a key among the classic commemoratives, coming from a mintage of only 10,008 coins (including assay pieces and a small number of proofs). Examples are elusive finer than the present. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, Toned Gem**

Early PCGS Slab

**5480** 1928 Hawaiian MS65 PCGS. This toned Gem displays luminous satin luster and a level of preservation that is superior to that of most MS65 coins that we have seen. The strike is sharp and abrasions are few and far between. Lilac, olive-green, amber, and gold toning blankets each side, appearing a little more mottled on the reverse. Housed in an old green label holder.  
*From The Tuxedo Park Collection.* NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half, MS65  
Appealing, Lightly Toned Surfaces**

**5481** 1928 Hawaiian MS65 PCGS. Most Hawaiian halves were sold to an appreciative island populace from a conservative mintage of 10,000 pieces (not counting assay coins). Relatively few Gem or finer coins survive, and lightly toned, sharply struck examples such as the present are always in demand. Golden overtones float over the faintly iridescent silver surfaces amid satiny mint luster. The MS65 grade is optimal for most series specialists. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, Untoned MS65**

**5482** 1928 Hawaiian MS65 PCGS. CAC. An all-brilliant Gem example of this scarce and popular key commemorative issue. Many Hawaiian halves display unusual (but not unattractive) greenish patina, but this piece seems to have escaped such toning. The surfaces are bright and satiny and show no obvious abrasions.  
*Ex: Summer FUN Signature (Heritage, 7/2010), lot 4354, where it realized \$5,175. NGC ID# BYGR, PCGS# 9309*

**1935 Hudson Half Dollar, MS66+  
Sesquicentennial Commemorative**

**5483 1935 Hudson MS66+ PCGS. CAC.** Multicolor toning appears over each side of this high-end Premium Gem, complementing frosty luster and well-struck design elements. The Hudson, New York, Sesquicentennial half dollar is available through MS66 but is scarce finer, with only 23 Superb Gems reported at PCGS (5/18). This Plus-graded coin survives from a distribution of only 10,000 coins. NGC ID# BYGS, PCGS# 9312

**1924 Huguenot-Walloon Half, Beautiful MS67+  
George T. Morgan Design**

**5484 1924 Huguenot MS67+ PCGS. CAC.** Ex: Bruce Scher. The settlement of New Netherland (modern-day New York) in 1624 by Huguenots (Calvinist Protestants), was commemorated in 1924 with the issuance of the Huguenot-Walloon Tercentenary half dollar. The issue had a fairly large distribution of more than 140,000 coins, but few survive in Superb Gem condition. This piece is superbly struck and vibrantly lustrous. Both sides display blended sun-gold, olive-green, and lilac-blue toning, and close inspection of the surfaces fails to reveal any distractions. Population: 77 in 67 (16 in 67+), 3 finer. CAC: 22 in 67, 1 finer (5/18). Ex: Long Beach Signature (Heritage, 9/2015), lot 4277, which realized \$6,756.25. NGC ID# BYGT, PCGS# 9314

**5485 1946 Iowa MS68 NGC.** Pale lavender in the centers yields to silver margins and glints of gold around the borders. Sharply struck and immaculately preserved, this outstanding Iowa commemorative ranks near the top of all survivors. Just four pieces are certified numerically finer at NGC, and none are finer at PCGS (5/18). NGC ID# BYGV, PCGS# 9316

**5486 1925 Lexington MS66+ PCGS. CAC.** A sensational Lexington half dollar with brilliant silver surfaces and satin luster, exhibiting wisps of gold, violet, and blue toning on each side. PCGS has certified only 28 finer examples of this conditionally scarce issue, while CAC has endorsed just six finer pieces (5/18). NGC ID# BYGW, PCGS# 9318

**1925 Lexington-Concord Half Dollar  
Rare, Toned MS67**

**5487 1925 Lexington MS67 NGC.** The Lexington-Concord Sesquicentennial half dollar is available through MS66, but it suddenly becomes rare in MS67 and is almost unknown finer. This Superb Gem displays sharp detail and unabraded satin surfaces. Deep olive-gold toning on each side reveals tinges of forest-green and crimson throughout. Census: 16 in 67 (1 in 67+★), 0 finer (5/18). NGC ID# BYGW, PCGS# 9318

**1918 Illinois Centennial Half Dollar, MS66+  
Beautifully Toned and Sharp**

**5488 1918 Lincoln MS66+ PCGS. CAC.** Although frequently referred to as the Lincoln half dollar because of the obverse portrait, this 1918 commemorative is actually a centennial coin for the admission of Illinois into the Union. The present example is sharp and beautifully toned. Vivid multicolor toning in the margins is surrounded by deep russet peripheries and leaves the centers with light golden color. Only a few small marks are visible beneath a loupe. NGC ID# BYGU, PCGS# 9320

**1920 Maine Centennial Half Dollar  
Colorful MS67**

**5489 1920 Maine MS67 PCGS Secure. CAC.** Ex: Bruce Scher. The Maine Centennial half dollar is an available issue in the classic commemorative series, although Superb Gems are conditionally scarce. This piece is among the finest at PCGS and CAC. Sharp design elements and pristine satin luster deliver beautiful multicolor toning in the margins around lovely lavender-gold interiors. Population: 52 in 67 (7 in 67+), 0 finer. CAC: 28 in 67, 0 finer (5/18). NGC ID# BYGY, PCGS# 9326

**1934 Maryland Half Dollar, MS67+  
Exceptional Coloration**

**5490 1934 Maryland MS67+ PCGS.** A sharp, beautifully toned Maryland Tercentenary half dollar and tied for the finest at PCGS. This Plus-graded Superb Gem is softly frosted and luminous, showing beautiful multicolor toning in concentric shades on each side. No bothersome abrasions are visible. Population: 80 in 67 (10 in 67+), 0 finer (5/18). NGC ID# BYGZ, PCGS# 9328

**5491 1921 Missouri MS65 NGC.** The design elements exhibit razor-sharp definition on this attractive Gem, and the surfaces are brilliant, with vibrant, satiny mint luster. Only 42 coins have been certified in higher numeric grades by NGC (4/18).  
Ex: FUN Signature (Heritage, 1/2011), lot 6330. NGC ID# BYH2, PCGS# 9330

**5492 1921 Missouri 2x4 MS65 PCGS. CAC.** Ex: AGW Collection. Elusive in strictly Gem condition and rarely seen finer, this lovely example has lustrous champagne surfaces with intense peripheral gold toning on each side. PCGS has only certified 44 finer examples (5/18). CAC: 50 in 65, 10 finer (5/18). NGC ID# 2FE9, PCGS# 9331

**1938 New Rochelle Half Dollar, MS67+  
Vivid Tab Toning, Rarely Offered Finer**

**5493 1938 New Rochelle MS67+ PCGS. CAC.** Vivid tab toning includes deep crimson, gold, russet, and forest-green hues, which encompass the reverse but leave the obverse center silver-white. This sharp New Rochelle half dollar is beautifully preserved and vibrantly lustrous. Examples are often available in MS67 but rarely with this degree of color. PCGS lists only seven finer coins (5/18). NGC ID# BYDX, PCGS# 9335

**5494 1936 Norfolk MS68 PCGS. CAC.** Splashes of light green, lavender, and yellow-gold gravitate to the peripheries of this lustrous Norfolk commemorative, leaving the centers pastel golden-gray. The design elements are fully struck, and the surfaces are immaculately preserved. PCGS has graded just two numerically finer examples of this issue. CAC: 84 in 68, 0 finer (5/18). NGC ID# BYH5, PCGS# 9337

**5495 1937-D Oregon MS68 NGC.** The 1937-D Oregon Trail half dollar is scarce in MS68. This NGC coin displays a remarkably sharp strike and luminous luster. The surfaces are nearly flawless and show tinges of deep russet-amber toning near the borders. The interiors have warm champagne tinting. Census: 80 in 68 (3 in 68+, 6 in 68 ★, 1 in 68+★), 1 finer (5/18). NGC ID# BYHG, PCGS# 9347

**5496 1937-D Oregon MS68 NGC.** This spectacular silver commemorative exhibits sharply detailed design elements and virtually pristine, lustrous surfaces, with highlights of lavender-gray, sea-green, and amber toning. Census: 79 in 68 (2 in 68+, 6 in 68★, 1 in 68+★), 1 finer (4/18). NGC ID# BYHG, PCGS# 9347

**5497 1915-S Panama-Pacific MS65 PCGS.** This untoned, satiny Gem displays a sharp strike and well-preserved surfaces. The design of the Panama-Pacific half dollar was a collaboration between Chief Engraver Charles Barber and George T. Morgan. This is the only Pan-Pac issue struck in silver. NGC ID# BYHP, PCGS# 9357

**5498 1915-S Panama-Pacific MS66+ PCGS Secure.** This high-end Pan-Pac half dollar displays a sharp strike and satiny, luminous mint luster. A hint of champagne toning graces each side, but the overall lack of color allows the well-preserved surfaces to be easily enjoyed even without a loupe. NGC ID# BYHP, PCGS# 9357

**5499 1915-S/S Panama-Pacific, FS-502, MS65+ PCGS Secure. CAC.** The mintmark is lightly repunched north. A coruscating golden-brown, apple-green, and steel-gray Gem. A lens reveals unabraded fields and only minor contact near Columbia's waist. A scarcer type than its mintage suggests. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

**5500 1915-S/S Panama-Pacific, FS-502, MS66 PCGS.** This stone-white silver commemorative has a full strike and booming mint luster. Only a few faint grazes emerge when the piece is rotated beneath a light. The mintmark is lightly repunched north. An early commemorative issue, the Panama-Pacific half is scarcer than its mintage suggests.

Ex: Dallas Signature (Heritage, 11/2007), lot 1624; FUN Signature (Heritage, 1/2009), lot 6126, which realized \$3,220. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

**5501 1936-S Rhode Island MS67 NGC.** From a distribution of 15,000 pieces, this Superb Gem Rhode Island half dollar exhibits sharply detailed design elements and impeccably preserved surfaces with unbroken satiny mint luster on both sides. Census: 28 in 67 (1 in 67+, 6 in 67★), 0 finer (4/18). NGC ID# BYHV, PCGS# 9365

**5502 1936-D San Diego MS67 PCGS Secure. CAC.** This gorgeous Superb Gem exhibits brilliant silver in the centers within a frame of rich gold and iridescent toning around the borders. Both sides are frosty and lustrous. PCGS has only certified one numerically finer example. CAC: 59 in 67, 0 finer (5/18). NGC ID# BYJ2, PCGS# 9372

**5503 1926 Sesquicentennial MS65 PCGS.** This Gem is remarkably luminous and frosty, showing beautifully preserved surfaces that are cast in blended lavender, lilac, champagne, and mint-green hues. The 1926 Sesquicentennial half dollar is available in this grade, but PCGS reports only 12 numerically finer representatives, all MS66 (4/18). NGC ID# BYJ4, PCGS# 9374

**5504 1926 Sesquicentennial MS65 PCGS Secure.** A speckling of olive-gray toning overlays rainbow iridescent surfaces of this comprehensively toned 1926 Sesquicentennial half. The strike, while sharp, is secondary to the memorable eye appeal of this Gem example, which must have been carefully preserved in its original packaging to acquire such a distinctive patina. Just 12 pieces are certified numerically finer by PCGS (4/18). NGC ID# BYJ4, PCGS# 9374

## COMMEMORATIVE GOLD

**5505 1925 Stone Mountain — N. CAR. Counterstamp — MS62 NGC.** These halves were probably counterstamped by the Stone Mountain Confederate Monument Association and were distributed with various state abbreviations. The biggest collector and researcher of this series was former ANA president, Adna Wilde. He published an article in *The Numismatist* in August 1987, listing all the known pieces at that time, including those in his collection. This piece was not known then. The consignor wrote Adna Wilde in 1999 to let him know of the addition of two pieces he had acquired with the North Carolina counterstamp. At that time, those two pieces brought the number of NC coins to 33 coins, with a total of 282 from all states combined. The surfaces are light golden-brown with deeper peripheral color. In addition to the N. CAR counterstamp, the number 109 is also stamped onto the eagle's perch. PCGS# 525162 Base PCGS# 9378

**5506 1936 Texas MS67+ PCGS. CAC.** The pale blue overtones on the silver obverse are more prominent on the reverse. Excellent detail with more cartwheel-oriented luster than this design's typical "halo" effect. PCGS has graded only nine coins as MS68 or better (4/18).  
Ex: Rosemont Signature (*Heritage*, 8/2013), lot 4730. NGC ID# BYJE, PCGS# 9386

**5507 1937 Texas MS67+ PCGS. CAC.** Light blue toning with tinges of lavender and an apricot counterpoint that is most significant at the right reverse margin. Additional dots of deeper color appear over the crowded design tableau on that side. PCGS has graded five pieces as MS68 or finer (4/18).

Ex: Rosemont Signature (*Heritage*, 8/2013), lot 4732. NGC ID# BYJH, PCGS# 9390

**5508 1938 Texas MS67 PCGS. CAC.** Light wheat-gold toning visits this lustrous and crisply struck Superb Gem. A loupe confirms virtually pristine preservation. An old Stack's envelope accompanies the lot, bearing collector notes that indicate the coin was once part of lot 805 from the firm's February 1949 auction. CAC: 38 in 67, 1 finer (5/18). NGC ID# BYJL, PCGS# 9394

**5509 1925 Vancouver MS67 NGC.** An impressive Superb Gem Vancouver half dollar, this piece ranks high in the Condition Census of the issue, with only four numerically finer examples certified at NGC and PCGS. This piece has brilliant satin mint luster with splashes of gold and iridescent toning. Census: 62 in 67 (4 in 67+, 11 in 67★), 1 finer (5/18). NGC ID# BYJP, PCGS# 9399

**5510 1946-S Booker T. Washington MS67+ PCGS.** A bold strike and minimal marks are evident on the frosty and highly lustrous surfaces of this Superb Gem that exhibits deep gold toning and intense peripheral iridescence on both sides. PCGS has only assigned the Plus designation to 12 examples at this grade level, with only four graded finer (5/18). NGC ID# BYJU, PCGS# 9406

**5511 1949-D Booker T. Washington MS67 PCGS. CAC.** Each of the three mints coined 6,004 examples of the Booker T. Washington commemorative half dollar in 1949, and high grade survivors are elusive. This Denver Mint example is brilliant aside from a trivial splash of toning on each side. Sharply struck and attractive with satin luster. Population: 40 in 67 (3 in 67+), 0 finer. CAC: 29 in 67, 0 finer (5/18). NGC ID# BYK4, PCGS# 9417

**5512 1951-D Washington-Carver MS67 NGC.** From a limited distribution of 10,004 pieces, this delightful Superb Gem exhibits well-detailed design elements and impeccably preserved brilliant surfaces. Vibrant mint luster radiates from both sides and overall eye appeal is outstanding. This coin should find a home in the finest collection or Registry Set. Census: 7 in 67, 1 finer (5/18). NGC ID# BYKZ, PCGS# 9431

**5513 1952-S Washington-Carver MS67 NGC.** A few hints of amber and pale gold toning visit the virtually flawless surfaces of this spectacular Superb Gem. The design elements exhibit only a trace of the usual softness on the centers, and both sides have radiant mint luster. Census: 24 in 67 (3 in 67+, 3 in 67★), 1 finer (5/18). NGC ID# BYL5, PCGS# 9436

**5514 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 PCGS.** A sharp Premium Gem, showing bright yellow-gold luster and frosty surfaces. No distracting abrasions are visible. This early classic commemorative issue is elusive in finer grades. NGC ID# BYLD, PCGS# 7443

**5515 1903 Louisiana Purchase, McKinley Gold Dollar MS65 PCGS. CAC.** Delightful butter-yellow patina covers both sides of this radiant Gem. The strike is nearly full, and there are only a few insignificant abrasions. An appealing example of this early gold commemorative.  
Ex: Long Beach Signature (*Heritage*, 9/2009), lot 1277, which realized \$1,696.25. NGC ID# BYLE, PCGS# 7444

### 1904 Lewis and Clark Gold Dollar Early Die State Gem Old Green Label Holder

**5516 1904 Lewis and Clark Gold Dollar MS65 PCGS.** The 1904 Lewis and Clark gold dollar is slightly more plentiful in high grade than the 1905, making the earlier issue ideal for type purposes. This Gem is sharp and well-preserved with semiprooflike fields that lack any metal flowlines. Lovely peach and straw-gold hues adorn each side. Housed in an old green label holder.

*From The Tuxedo Park Collection.* NGC ID# BYLF, PCGS# 7447

### 1904 Lewis & Clark Gold Dollar, MS64 Prooflike Rare Contrasted Example

**5517 1904 Lewis & Clark Gold Dollar, MS64 Prooflike NGC.** The 1904 Lewis and Clark gold dollar is rare with Prooflike surfaces. NGC reports 20 such submissions in all, most in MS63 and MS64. This is a rich orange-gold near-Gem with reflective, jet-black fields and a bold impression on the devices. A few stray wisps define the grade, these visible mainly because of the reflective nature of the fields. Census: 7 in 64 Prooflike, 1 finer (4/18). NGC ID# BYLF, PCGS# 77447

**5518 1905 Lewis and Clark Gold Dollar MS64 ★ NGC.** The lemon-gold fields are semiprooflike, likely the reason for the seldom-assigned Star designation. Well-struck except for the dentils. Surface detractions are limited to a thin diagonal line in the right obverse field. NGC has certified 14 pieces as MS64★, and only three finer with a Star designation. NGC ID# BYLG, PCGS# 7448

**1915-S Pan-Pac Gold Dollar, MS67**

Among the Finest Certified

**5519 1915-S Panama-Pacific Gold Dollar MS67 PCGS Secure.** A top-grade example of this popular gold dollar commemorative, showing luminous, frosty mint luster and original yellow-gold color. A loupe examines almost flawless surfaces that produce ample eye appeal. The 1915-S Pan-Pac gold dollar is available in grades below MS67 but is scarce in this condition and unknown finer (4/18). NGC ID# BYLH, PCGS# 7449

**5520 1915-S Panama-Pacific Quarter Eagle AU55 PCGS Secure.** This caramel-gold representative may have been briefly carried as a pocket piece at the Panama-Pacific Exposition, held in San Francisco in 1915. We note only a cluster of unobtrusive field marks beneath the eagle's beak. NGC ID# BYLP, PCGS# 7450

**5521 1922 Grant Gold Dollar, With Star, MS66 PCGS Secure.** An outstanding Premium Gem that shares its design with the Grant half dollar, this piece has a bold strike and frosty yellow-gold luster with excellent eye appeal. NGC ID# BYPS, PCGS# 7459

**5522 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** This lovely Gem shimmers when rotated under a light and shows about as sharp a strike as the Sesquicentennial quarter eagle ever does. A loupe reveals a few minor surface grazes, but the overall eye appeal is outstanding, as one expects for the MS65 grade level. NGC ID# 2FE9, PCGS# 7466

**5523 1926 Sesquicentennial Quarter Eagle MS65 NGC.** This is a beautifully preserved, frosty Gem example of the final classic commemorative gold issue, showing remarkably few surface marks under a loupe. The strike is sharp, and the wheat-gold coloration is original. Finer Sesquicentennial quarter eagles are elusive. NGC ID# 2FE9, PCGS# 7466

**5524 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** Just over 46,000 pieces were distributed, although in general the Sesquicentennial quarter eagle was not one of the Mint's proudest efforts. A relatively small number of Gem coins survive, and few examples are finer. This gleaming Gem survivor bucks the trend, with only a few tiny marks and a sharper-than-usual strike. Satiny sun-gold surfaces display especially vibrant mint luster for great eye appeal. NGC ID# 2FE9, PCGS# 7466

## TERRITORIAL GOLD

**(1842-52) A. Bechtler Gold Dollar, Unc Details K-24, 27G., 21C.**

**5525 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Cleaned — NGC Details. Unc. K-24, R.3.** A plain edge separates this collectible A. Bechtler gold dollar variety from the rare reeded edge counterpart, K-25. Faint hairlines in the fields reveal an old, light cleaning, but this unworn example has since acquired warm orange-gold and olive coloration that is similar to problem-free Bechtler gold pieces. The strike is sharp and even with few distinguishable abrasions. Listed on page 394 of the 2019 Guide Book.

## CALIFORNIA FRACTIONAL GOLD

**5526 1853 Liberty Octagonal 25 Cents, BG-101, Low R.5, MS62 PCGS Secure.** A sharply struck and satiny example with hints of rose-red toning over smooth straw-gold surfaces. BG-101 is the only octagonal quarter variety credited to the Joseph Brothers. The watchmaking and jewelry firm also issued reeded edge copper tokens, catalogued as Miller-Calif-6 through Miller-Calif-6B. Population: 27 in 62, 14 finer (4/18). NGC ID# 2BGK, PCGS# 10370

**5527 1856 Liberty Octagonal 25 Cents, BG-107, Low R.4, MS65 NGC.** Die State II; portrait partially lapped, and both dies prominently clashed. A charming canary-gold Gem with unabraded surfaces and minor carbon beneath the date. The legends are indistinct, as always for this crudely designed variety. Census: 4 in 65, 2 finer (4/18). NGC ID# 2BGS, PCGS# 10376

**5528 1855 Liberty Octagonal 25 Cents, BG-110, High R.4, MS64 PCGS.** Die State IV. A charming green-gold near-Gem. The semiprooflike fields are unabraded, though the portrait displays a couple of small depressions, likely as made. Population: 17 in 64, 1 finer (4/18).

*Ex: Central States Signature (Heritage, 4/2014), lot 12012, which realized \$2,232.50. NGC ID# 2BGV, PCGS# 10379*

**5529 Undated Liberty Round 25 Cents, BG-206, High R.4, MS64 PCGS.** A beautiful olive-gold example that boasts a full struck and smooth, satiny surfaces. PCGS has certified 10 pieces in circulated grades, which suggests this Period One variety sometimes participated in Gold Rush commerce. Population: 12 in 64, 0 finer (4/18).

*Ex: Long Beach Signature (Heritage, 2/2013), lot 5011, which realized \$1,292.50. NGC ID# 2BH7, PCGS# 10391*

**1854 Round Liberty Quarter  
BG-216, MS64**

- 5530 1854 Liberty Round 25 Cents, BG-216, R.6, MS64 NGC. Die State II. In this advanced state, die rust is seen over the devices and also in the fields. This rare Period One variety is credited to Frontier, Deviery & Co. The semiprooflike pumpkin-orange surfaces appear essentially as made.  
Ex: Houston Money Show Signature (Heritage, 12/2014), lot 4893, where it realized \$3,055. NGC ID# 2BHK, PCGS# 10401

- 5531 1855 Liberty Round 25 Cents, BG-226A, R.5, MS64 NGC. Breen-Gillio Die State II, without the usually seen reverse die cracks. A well-struck butter-gold near-Gem. The fields display myriad die lines but there are no spots or abrasions. A small depression on the cheek is of mint origin. Census: 3 in 64, 0 finer (4/18).  
Ex: Long Beach Signature (Heritage, 6/2014), lot 10368, which realized \$2,350. NGC ID# 2BHZ, PCGS# 10417

- 5532 1854 Liberty Round 50 Cents, BG-423, High R.6, MS61 PCGS. This Period One round half dollar is a product of M. Deriberpie, as seen by the D below the bust of Liberty. The surfaces are clean overall on this piece, but show a couple of interesting features on the obverse. There is a circular strike-through (probably struck through a piece of wire) on the lower-right of the obverse, and significant rim crumbling is noted on the obverse rim from 6 to 7 o'clock. Medium orange-gold color. NGC ID# 2BKE, PCGS# 10459

**1854 Octagonal Liberty Dollar, AU55  
Eagle, BG-504 Variety**

- 5533 1854 Liberty Octagonal Dollar, Eagle, BG-504, Low R.5, AU55 PCGS Secure. A Choice AU specimen of this Octagonal dollar produced by Frontier, Deviery & Co., with well-detailed design elements that show just a trace of actual wear. From a late state of the dies, this example shows the reverse die crack from the rim, through the left star, to the scroll. All examples show incomplete detail on the reverse, due to die polishing. Population: 6 in 55, 34 finer (4/18). NGC ID# 2BKZ, PCGS# 10481

- 5534 1854 Liberty Octagonal 1 Dollar, BG-508, High R.4, MS62 Prooflike NGC. Reverse stars at 1 and 5 o'clock identify this scarce Frontier, Deviery & Co. variety. The canary-gold fields are nicely mirrored. The strike is good save for softness on the 85 in the date. Delicate reverse hairlines correspond to the grade. Census: 4 in 62 Prooflike, 8 finer (5/18). NGC ID# 2BL5, PCGS# 710485

- 5535 1859 Liberty Octagonal 25 Cents, BG-702, R.3, MS66 Prooflike NGC. Die State I. An undisturbed sun-gold octagonal quarter with mirrored fields and a good strike. The central reverse displays remnants of the planchet texture. As of (4/18), NGC has certified only four pieces as Prooflike, with the present lot as the single finest.

Ex: Fred Neggen Estate (Superior, 2/1976), lot 1008.; Ole Miner's Collection (Heritage, 12/2013), lot 5304, which realized \$2,467.50. NGC ID# 2BMB, PCGS# 710529

- 5536 1867 Liberty Octagonal 25 Cents, BG-709, R.4, MS66 NGC. Pumpkin-gold and lime-green toning visits this coruscating high-grade octagonal quarter. Problem-free and pleasing. An unlisted hair-thin die crack extends from the right ribbon loop to the wreath above the R in DOLLAR. Census: 5 in 66, 6 finer (4/18).  
Ex: FUN Signature (Heritage, 7/2014), lot 9594, which realized \$1,057.50. NGC ID# 2BMK, PCGS# 10536

**1868 Frontier & Co. Octagonal Liberty Quarter  
BG-710, MS67**

- 5537 1868 Liberty Octagonal 25 Cents, BG-710, R.6, MS67 NGC. This is a Frontier & Co. issue. A line in the BG reference states, "Frosty Uncirculated, not Prooflike, finish." We are unclear whether that is a rule for this issue or a specific reference to the Saltus-ANS coin mentioned in the line above. If it is a generalized rule, it does not hold with this particular piece with its distinctly prooflike fields on each side. This is an apricot-gold Superb Gem that has an even strike and immaculate fields. Pristine aside from a unobtrusive slender vertical graze on the neck. Census: 3 in 67, 0 finer (4/18). NGC ID# 2BML, PCGS# 10537

**1868 Octagonal Liberty Quarter  
BG-711, Richly Toned MS67**

- 5538 1868 Liberty Octagonal 25 Cents, BG-711, R.4, MS67 NGC. This variety is one of the many made by Frontier, Deviery & Co. during Period Two. The pristine surfaces are attractively toned in lemon-gold and olive-green shades. The strike is good though the reverse legends show minor softness where opposite the high relief portrait. NGC ID# 2BMM, PCGS# 10538

- 5539 1869 Liberty Octagonal 25 Cents, BG-712, High R.4, MS66 PCGS. A pristine tan-gold representative of this fairly crude Period Three variety, attributed to Frontier & Co. Liberty has a flat profile and a thick neck. She is surrounded by an undercount of nine stars. The reverse legend has several double-punched letters and the A punch is defective. Population: 10 in 66, 2 finer (4/18).  
Ex: New York Signature (Heritage, 2/2014), lot 4983, which realized \$881.25. NGC ID# 2BMIN, PCGS# 10539

- 5540** 1869 Liberty Octagonal 25 Cents, BG-712, High R.4, MS66 NGC. An exceptional Frontier & Co. example that boasts satiny and undisturbed green-gold surfaces. There are no flan detractions, and the strike is bold save for minor softness on the lower half of the date. Census: 8 in 66 (1 in 66+), 1 finer (4/18).  
Ex: Beverly Hills Signature (Heritage, 11/2014), lot 9321, which realized \$1,057.50. NGC ID# 2BMN, PCGS# 10539
- 5541** 1870 Liberty Octagonal 25 Cents, BG-713, R.4, MS66 PCGS. BG-713 is the sole 1870 Frontier & Co. octagonal quarter variety. An unmarked and impressive green-gold example. Despite the low relief of the legends and their placement opposite the portrait, the date and denomination are well-defined. The central reverse displays a "ghost" of the portrait, as made. Population: 10 in 66, 3 finer (4/18).  
Ex: PNG New York Invitational Signature (Heritage, 10/2014), lot 4560, which realized \$1,175. NGC ID# 2BMP, PCGS# 10540
- 5542** 1871 Liberty Octagonal 25 Cents, BG-714, R.3, MS67 PCGS. A pristine canary-gold Superb Gem. The strike is sharp and the lustrous fields are unperturbed. A Frontier & Co. die variety available in Uncirculated grades but seldom located in the present extraordinary quality. Population: 7 in 67 (1 in 67+), 1 finer (4/18).  
Ex: Long Beach Signature (Heritage, 1/2015), lot 4458, which realized \$2,350. NGC ID# 2BMR, PCGS# 10541
- 5543** 1871 Liberty Octagonal 25 Cents, BG-716, R.6, MS66 PCGS. Die State II. A rare variety similar to the much more plentiful BG-714 and BG-717. The AR in DOLLAR is recut. An outstanding sun-gold example. Flashy and close to pristine with partial lapping of design elements. Population: 5 in 66, 3 finer (4/18).  
Ex: Central States Signature (Heritage, 4/2013), lot 6184, which realized \$1,292.50. NGC ID# 2BMT, PCGS# 10543
- 5544** 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS67 Prooflike NGC. Die State III. Mirror-like fields, an intricate strike, and an absence of contact or flan deficiencies confirm the outstanding quality of this honey-gold Period Two Frontier & Co. type coin. Census: 7 in 67 Prooflike, 0 finer (4/18).  
Ex: Houston Signature (Heritage, 11/2012), lot 5318, which realized \$2,820. NGC ID# 26MT, PCGS# 710544
- 1871 Liberty Octagonal Quarter  
BG-720, MS65**
- 
- 5545** 1871 Liberty Octagonal 25 Cents, BG-720, R.7, MS65 NGC. A "Scarface" variety with three intersecting die cracks on the portrait. A splendid apricot-gold Gem whose smooth, flashy fields and even strike ensure excellent eye appeal. Frontier & Co. struck nine different 1871-date varieties but only BG-714 and BG-717 are close to common. NGC has yet to certify any examples of BG-720 as Prooflike or Deep Prooflike. NGC ID# 2BMZ, PCGS# 10547
- 
- 1872 Washington Quarter, MS66, BG-722  
Scarce Guide Book Subtype**
- 
- 5546** 1872 Washington Octagonal 25 Cents, BG-722, Low R.4, MS66 NGC. Baker-503, Musante GW-818. Apple-green and apricot-gold toning adorn this satiny and fully struck Premium Gem. The Washington subset of the California small denomination gold series carries strong premiums relative to the comparatively plentiful Liberty and Indian head designs. Listed on page 412 of the 2019 Guide Book. Census: 7 in 66, 0 finer (4/18).  
Ex: Dallas Signature (Heritage, 10/2012), lot 6455, which realized \$3,055. NGC ID# 2BN4, PCGS# 10549
- 5547** 1872 Washington Octagonal 25 Cents, BG-722, Low R.4, MS66 PCGS. Baker-503, Musante GW-818. A high-grade representative of the distinctive and popular fractional gold type. Sharply struck and unmarked with a minor flan imperfection beneath the R in DOLLAR. Frontier & Bellemere were the makers. Listed on page 412 of the 2019 Guide Book. Population: 34 in 66 (2 in 66+), 2 finer (4/18). NGC ID# 2BN4, PCGS# 10549
- 
- 1872 Washington Octagonal Quarter  
Rare BG-723 Variety, MS63**
- 
- 5548** 1872 Washington Octagonal 25 Cents, BG-723, Low R.6, MS63 NGC. BG-722 is the "common" Washington Head octagonal quarter variety. BG-723 is much scarcer, and is distinguished by the presence of berries on the wreath. This satiny straw-gold example is essentially unabraded and shows minor granularity on the upper-left portion of the wreath. Census: 2 in 63, 0 finer (4/18).  
Ex: FUN Signature (Heritage, 1/2014), lot 7442, where it realized \$3,965.63. NGC ID# 2BN5, PCGS# 10550
- 5549** 1872 Liberty Octagonal 25 Cents, BG-725, High R.5, MS65 Prooflike NGC. A flashy and essentially pristine canary-gold Gem. Well-struck at the borders with a lighter impression in the centers. A very scarce die variety, BG-725 has been certified on 12 occasions by NGC, with the present piece tied with two others for the honor of finest graded (4/18).  
Ex: Long Beach Signature (Heritage, 9/2014), lot 4629, which realized \$1,410. NGC ID# 2U2H, PCGS# 710552
- 5550** 1872 Liberty Octagonal 25 Cents, BG-726, High R.5, MS64 Prooflike NGC. A flashy and undisturbed butter-gold near-Gem. As usual for BG-726, the central reverse lacks a full strike, but all letters are evident. NGC has certified only three BG-726 octagonal quarters; one as MS62 Prooflike, one as MS63, and the present single finest example as MS64 Prooflike (4/18). NGC ID# 2BN8, PCGS# 710553 Base PCGS# 10553

**1873 Liberty Octagonal Quarter  
BG-728, MS67 ★**

**5551** 1873 Liberty Head Octagonal 25 Cents, BG-728, R.3, MS67 ★ NGC. Die State I, showing no reverse die cracks. This Period Two quarter was produced by Frontier & Bellemere. Curiously, while it is scarce but certainly not rare, it was only discovered in 1884 when David Proskey first published it in *The Coin Collector's Journal* in March of that year. NGC has certified four examples of BG-728 as MS67 with none finer (4/18). However, among that quartet, only the present lot possesses the Star designation. Thus, it qualifies as the finest NGC-certified piece. Highly reflective fields and completely struck throughout with a single vertical hairline above the O in DOLLAR.

Ex: Central States Signature (Heritage, 4/2013), lot 6187, where it brought \$3,671.88. NGC ID# 2BNA, PCGS# 10555

**5552** 1864 Liberty Head Octagonal 25 Cents, BG-735, R.4, MS65 NGC. Die State II, obverse die lapped. One of numerous "Fraction in Shield" varieties produced by Robert B. Gray & Co., but the only such variety dated 1864. This honey-gold Gem shows few imperfections and ranks among the finest survivors. Census: 2 in 65, 0 finer (4/18). NGC ID# 2BNH, PCGS# 10562

**5553** 1865/4 Liberty Octagonal 25 Cents, BG-736, Low R.6, MS64 Prooflike NGC. A rare, crude die variety credited to Robert B. Gray & Co. of San Francisco. This yellow-gold representative exhibits dazzling reflectivity and shows substantial lapping (as made) on the portrait. No marks or spots are evident. Census: 2 in 64 Prooflike, 0 finer (4/18).

Ex: Beverly Hills Signature (Heritage, 11/2014), lot 5380, which realized \$2,115. NGC ID# 2BNJ, PCGS# 710563

**5554** 1866 Liberty Octagonal 25 Cents, BG-737, R.5, MS64 NGC. A very scarce Robert B. Gray & Co. variety with a distinctive smaller Liberty bust, perhaps made by a different engraver than the majority of the firm's output. This semiprooflike honey-gold near-Gem has unblemished surfaces and only unimportant incompleteness of strike on the reverse legend. Census: 2 in 64, 1 finer as 65 Prooflike (4/18). NGC ID# 2BNK, PCGS# 10564

**5555** 1866 Liberty Head Octagonal 25 Cents, BG-740, R.6, MS64 NGC. Die State II. The reflective honey-gold surfaces are overlaid with blushes of golden-brown and cobalt-blue. A well-struck and unmarked example of this rare variety. The G initial beneath the portrait represents the maker, San Francisco jeweler Robert B. Gray. Census: 1 in 64, 2 in 65 Prooflike (4/18).

Ex: Chicago ANA Signature (Heritage, 8/2015), lot 6592, which realized \$1,880. NGC ID# 2BNN, PCGS# 10567

**5556** No Lot.

**5557** No Lot.

**5558** 1870 Liberty Head Octagonal 25 Cents, BG-755, High R.4, MS64 PCGS. A flashy and well-preserved lemon-gold near-Gem. The wreath is fragmented due to die polishing, as made and customary for the variety. Although BG-755 is not especially rare by the standards of the series, an inordinate number are certified in AU grades, and the present piece is tied for finest at PCGS. Population: 2 in 64, 0 finer (4/18). NGC ID# 2BP6, PCGS# 10582

**1870 Octagonal Liberty Quarter  
Very Rare BG-758, MS61 Prooflike**

**5559** 1870 Liberty Octagonal 25 Cents, BG-758, R.8, MS61 Prooflike NGC. BG-758 is a very rare die marriage. The April 2018 NGC Census does not show any examples. PCGS has certified five examples, one each in the XF45, AU55, AU58, MS63, and MS64 grades. The obverse die is shared with the very scarce BG-757 and the common BG-759, but the reverse die only struck BG-758. It has a horizontal fraction bar and CAL beneath DOLLAR. The strike is sharp on the portrait. The apricot-gold surfaces are flashy and exhibit minor hairlines. PCGS# 710585

**5560** 1870 Liberty Octagonal 25 Cents, BG-762, Low R.4, MS64 Prooflike NGC. Die State I with a complete G initial. A nicely struck and prominently mirrored representative. The apricot-gold surfaces appear unabraded, though a narrow "ghost" from the hair bun separates the AR in DOLLAR. Census: 3 in 64 Prooflike, 0 finer (4/18).

Ex: Long Beach Signature (Heritage, 9/2014), lot 9165, which realized \$1,410. NGC ID# 2BPD, PCGS# 710589

**5561** 1871 Liberty Head Octagonal 25 Cents, BG-764, Low R.6, MS63 NGC. A yellow-gold Select example with an above-average strike on DOLLAR. Exceptionally nice for the variety. A network of slender die cracks converges on the second L in DOLLAR. Breen-Gillio states: "reverse shattered, explaining prompt discard and rarity." Census: 2 in 63, 0 finer (4/18).

Ex: PNG New York Invitational Signature (Heritage, 10/2014), lot 9674, which realized \$1,880. NGC ID# 2BPF, PCGS# 10591

**5562** 1871 Liberty Octagonal 25 Cents, BG-765, R.3, MS66 Prooflike NGC. A high-grade octagonal quarter type coin. The mirrored sun-gold fields appear as made, and display obverse "ghost" traces from the wreath. The strike shows occasional minor incompleteness. Census: 2 in 66 Prooflike, 0 finer (4/18).

Ex: FUN Signature (Heritage, 1/2015), lot 12394, which realized \$1,527.50. NGC ID# 2BPG, PCGS# 710592

1871 Liberty Octagonal Quarter  
BG-767, MS66 Deep Prooflike

5563 1871 Liberty Octagonal 25 Cents, BG-767, R.3, MS66 Deep Prooflike NGC. The 1871 California octagonal gold quarter with the Liberty Head design was struck by Robert L. Gray & Co., successors to the earlier firm of Antoine Louis Nouillet. This delightful Premium Gem is sharply detailed and shows a number of die cracks on both sides. The deeply reflective yellow-gold surfaces show few signs of contact.  
Ex: FUN Signature (Heritage, 1/2014), lot 7443, where it realized \$2,585. NGC ID# 2BPJ, PCGS# 910594

1871 Liberty Octagonal Quarter  
BG-770, MS65

5564 1871 Liberty Head Octagonal 25 Cents, BG-770, High R.4, MS65 NGC. California Jewelry Co. (Levison Bros.), successors to Robert B. Gray & Co., produced this lovely Gem. This piece displays the brilliant prooflike finish these examples are known for. Numerous shades of gold add to the visual appeal. NGC and PCGS have each awarded a single MS65 grade, with none finer (4/18).  
Ex: New York Signature (Heritage, 11/2013), lot 4801, where it brought \$3,055. NGC ID# 2BPM, PCGS# 10597

1874/7874 Octagonal Liberty 25 Cents  
BG-776, MS65

5565 1874/7874 Liberty Octagonal 25 Cents, BG-776, Low R.5, MS65 PCGS. A beautiful butter-gold Gem of this better octagonal Liberty variety. The first 1 in the date is crudely punched over a 7, and the second L in DOLLAR resembles an I due to die lapping. Well-struck and prominently mirrored. Population: 2 in 65, 0 finer (4/18).  
Ex: Central States Signature (Heritage, 4/2013), lot 6189, where it brought \$3,055. NGC ID# 2BPU, PCGS# 10603

1876 Indian Octagonal Quarter, MS66  
BG-786, Finest Known at Either Service

5566 1876 Indian Octagonal 25 Cents, BG-786, Low R.6, MS66 NGC. NGC's Census reveals they have graded six examples of the BG-786 variety, with this example the highest-graded of the group by two points. In addition, PCGS has graded numerous lower-grade examples, but only one piece at the MS65 level with none finer (4/18). Both sides exhibit the prooflike surfaces these are known for, and they are virtually pristine. The obverse displays bold design definition, especially the Indian's headdress. The reverse exhibits a softer strike.  
Ex: FUN Signature (Heritage, 1/2013), lot 7702, where it brought \$2,975.01. NGC ID# 2BR6, PCGS# 10613

5567 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS66 Deep Prooflike NGC. NGC has certified three BG-790 quarters as Deep Prooflike, two at the MS64 level and the present MS66 example (4/18). The prominently mirrored sun-gold fields exhibit exemplary contrast with a nicely struck Indian and wreath. A couple of letters in the reverse legend are lightly brought up.

Ex: Long Beach Signature (Heritage, 6/2012), lot 5420; FUN Signature (Heritage, 1/2013), which realized \$1,586.25. NGC ID# 2BRA, PCGS# 910617 Base PCGS# 10617

1872 Octagonal Indian Quarter  
BG-791, MS67

5568 1872 Indian Octagonal 25 Cents, BG-791, R.3, MS67 NGC. Die State I. A Christoph Mohrig Large Head issue with thin numerals. The design elements of this spectacular Superb Gem are unusually sharp, even on the central reverse. The well-preserved surfaces exhibit prooflike reflectivity throughout, with bright yellow-gold color and no visible surface flaws. Census: 2 in 67, 0 finer (4/18).  
Ex: Long Beach Signature (Heritage, 9/2013), lot 5496, where it realized \$3,818.75. NGC ID# 2BRB, PCGS# 10618

**1873/2 Octagonal Indian Quarter  
BG-792, MS64**

**5569** 1873/2 Indian Octagonal 25 Cents, BG-792, Low R.7, MS64 PCGS. A Period Two quarter produced by Christopher Mohrig. Cuds at 3 o'clock and beneath the 73 in the date explain the rarity of BG-792. The obverse die is also failing near the first four stars. A boldly struck and unabraded peach-gold and lime-green near-Gem. Ex: Central States Signature (Heritage, 4/2014), lot 7176, where it brought \$3,818.75. NGC ID# 2BRC, PCGS# 10619

**5570** 1873 Indian Octagonal 25 Cents, BG-794, High R.5, MS64+ PCGS. A flashy canary-gold near-Gem of this scarce Indian octagonal variety. Well-struck and attractive with only a few faint field hairlines. Population: 16 in 64 (in 64+), 4 finer (4/18). Ex: Orlando Signature (Heritage, 7/2013), lot 3793, which realized \$1,527.50. NGC ID# 2BRE, PCGS# 10621

**5571** 1874 Indian Octagonal 25 Cents, BG-795, R.3, MS66 NGC. A splendid sun-gold Premium Gem. Traces of "ghosts" (as made) are noted east of the fraction bar and beneath the first L in DOLLAR. Frost breaks on the cheek and hair are as seen on all examples of the die variety. NGC ID# 2BRF, PCGS# 10622

**1875 Indian Octagonal Quarter  
BG-796, MS66**

**5572** 1875 Indian Octagonal 25 Cents, BG-796, R.3, MS66 PCGS. This Christopher Mohrig features a hand-engraved date. Doering notes that strike details are always uneven. They are also characteristically prooflike, as seen here. The surfaces are immaculate and highly attractive. An immaculate octagonal quarter that boasts mirrored fields and an even strike. The finest known is an MS67, certified by NGC. Heritage also auctioned the other PCGS MS66 in our 1994 East Coast Expo Bullet Sale. Ex: Houston Signature (Heritage, 12/2013), lot 5307, where it brought \$4,112.50. NGC ID# 2BRG, PCGS# 10623

**5573** 1875 Indian Octagonal 25 Cents, BG-797, Low R.4, MS66 PCGS. A prooflike sun-gold Premium Gem. The strike is consistent and the preservation is exemplary. The reverse has a concave appearance, as delivered from the dies. Population: 5 in 66, 0 finer (5/18). NGC ID# 2BRH, PCGS# 10624

**1875 Indian Octagonal Quarter  
Single Finest Certified BG-798  
MS66 Deep Prooflike**

**5574** 1875 Indian Octagonal 25 Cents, BG-798, Low R.5, MS66 Deep Prooflike NGC. As of (4/18), the present lot is the single-finest NGC-certified example of BG-798. PCGS has yet to certify any pieces in grades above MS65. The mirrored sun-gold surfaces are virtually as made, and the strike is full except on the fraction denominator. Among the many varieties issued by San Francisco merchant Christopher Ferdinand Mohrig. Census: 1 in 66 Deep Prooflike, 0 finer (4/18). Ex: FUN Signature (Heritage, 1/2016), lot 6854, which realized \$2,350. NGC ID# 2BRJ, PCGS# 910625

**5575** 1876 Indian Octagonal 25 Cents, BG-799C, High R.4, MS66 PCGS Secure. Pedigreed to the Garrett Family holdings, this is the single finest PCGS-certified BG-799C octagonal quarter (4/18). The lemon-gold fields are reflective and unblemished. The Indian and wreath are well-struck and radiant. BG-799C is a No CAL variety from the productive workshop of Christopher Ferdinand Mohrig. Ex: Garrett Collection, Part IV (Bowers and Ruddy, 3/1981), lot 2147; Texas Collection of Small Denomination California Gold Pieces (Bowers and Merena, 1/1992), lot 4106. NGC ID# 2BRN, PCGS# 10629

**5576** 1878/6 Indian Octagonal 25 Cents, BG-799G, R.5, MS65 PCGS. The same die pair as BG-799F, but the obverse die was crudely overdated by the maker via a pellet closing the loop of the 6. The dies are rotated more than 90 degrees from coin turn, but the strike is sharp and the mirrored honey-gold surfaces are exemplary. Population: 9 in 65, 0 finer (4/18). NGC ID# 2BRT, PCGS# 10633

**5577** 1880 Indian Octagonal 25 Cents, BG-799K, R.6, MS66 PCGS. A well-struck sun-gold Premium Gem. The glassy fields are void of detractions. A rare variety from the prolific firm of Christopher Ferdinand Mohrig. As of (4/18), PCGS has certified 20 examples of BG-799K, with the present piece as the single finest. NGC has yet to certify any in grades above MS65. NGC ID# 2BRX, PCGS# 10637

**5578** 1881 Indian Octagonal 25 Cents, BG-799O, Low R.4, MS66 Deep Prooflike NGC. A magnificent representative that boasts blatantly reflective fields and sharply struck motifs. The honey-gold surfaces are uncommonly unabraded. The central reverse displays faint diagonal roller marks, as made. Census: 6 in 66 Deep Prooflike, 4 finer (4/18). Ex: FUN Signature (Heritage, 1/2016), lot 9473, which realized \$1,292.50. NGC ID# 2BS3, PCGS# 910641 Base PCGS# 10641

**5579** 1874 Indian Octagonal 25 Cents, BG-799Q, High R.5, MS66 Prooflike NGC. Splendid field reflectivity and a bold strike confirm the quality of this undisturbed sun-gold Premium Gem. Minute strike-throughs below DOLLAR are as coined. A better Indian Head die variety. Census: 3 in 66 Prooflike, 1 finer as 67 Prooflike, 1 finer as 67 Deep Prooflike (4/18). Ex: Central States Signature (Heritage, 4/2014), lot 7178, which realized \$1,645. NGC ID# 2BS6, PCGS# 710643

- 5580** 1852 Indian Octagonal 25 Cents, BG-799U, High R.5, MS65 PCGS. A canary-gold prooflike Gem that boasts a crisp strike and a pristine appearance. Outstanding quality for this elusive Period Two variety. Population: 8 in 65, 1 finer (4/18).  
Ex: Dallas ANA Signature (Heritage, 10/2012), lot 6457, which realized \$1,762.50. NGC ID# 2BSA, PCGS# 10647
- 5581** 1881 Indian Octagonal 25 Cents, BG-799BB, High R.6, MS64 PCGS. A satiny and smooth sea-green and orange-gold near-Gem. The maker of BG-799BB is unknown, but is the same as BG-935 and BG-935A. As usual for this challenging and distinctive variety, the reverse field is clashed and exhibits an inverted, incused, and reversed impression of the obverse Indian. Population: 4 in 64, 0 finer (4/18). NGC ID# 2BSH, PCGS# 10654
- 5582** 1859 Liberty Round 25 Cents, BG-801, R.3, MS66 PCGS. The single-finest example in a PCGS holder, the present Premium Gem is evenly struck and has mark-free prooflike almond-gold fields. A lint mark (as made) above the A in DOLLAR provides an identifier. Population: 1 in 66, 0 finer (4/18).  
Ex: Houston Signature (Heritage, 12/2012), lot 5322, which realized \$2,173.75. NGC ID# 2BSN, PCGS# 10662
- 5583** 1865 Liberty Round 25 Cents, BG-802, Low R.5, MS66 NGC. A smooth and moderately prooflike wheat-gold example. The reverse die was lapped prior to the strike, transforming DOLLAR into LOLA. BG-802 is very scarce. As of (4/18), NGC has certified only six examples, three as MS62 and one each as MS64, MS64 Prooflike, and MS66. Since the four finest at PCGS are graded MS65, the present example is the single finest certified.  
Ex: Long Beach Signature (Heritage, 2/2013), lot 5020, which realized \$2,115. NGC ID# 2BSP, PCGS# 10663
- 5584** 1866 Liberty Round 25 Cents, BG-804, R.4, MS66 PCGS. An unabraded and nicely mirrored Premium Gem that boasts exceptional eye appeal. Better struck on the central reverse than usually seen on this variety. Population: 10 in 66 (1 in 66+), 1 finer (4/18).  
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 5313, which realized \$1,265. NGC ID# 2BSS, PCGS# 10665
- 1866 Round Liberty Quarter, MS67  
BG-804, Among the Finest Certified**
- 
- 5585** 1866 Liberty Round 25 Cents, BG-804, R.4, MS67 NGC. A lustrous and pristine honey-gold Superb Gem. The surfaces are flawless save for a tiny flan flake east of the fraction numerator. Both fields exhibit myriad delicate concentric lathe lines, as made. A better central strike than usual for the variety, since the first L in DOLLAR is sharp. The 86 in the date has low relief, due to a convex reverse die and the opposite relief of the portrait. Census: 3 in 67, 0 finer (5/18). NGC ID# 2BSS, PCGS# 10665
- 5586** 1867 Liberty Round 25 Cents, BG-805, Low R.5, MS66 PCGS. Produced by Frontier & Co., this Premium Gem BG-805 representative displays satiny yellow-gold luster, with impeccably well-preserved surfaces that yield subtle semiprooflike mirroring when tilted beneath a light. This variety is often encountered poorly struck, and this is evident on the present piece to a certain degree in the centers, but the major elements remain clear. The R in DOLLAR is boldly recut, as is the 7 in the date. Population: 5 in 66, 0 finer (4/18). NGC ID# 2BST, PCGS# 10666
- 5587** 1868 Liberty Round 25 Cents, BG-806, R.3, MS67 NGC. Die State I. An evenly struck and satiny caramel-gold Superb Gem. The wreath and the high points of the hair lack fine detail, as always for the variety. Frontier & Co. was the maker for a lengthy series of Liberty round quarters, though only BG-806 is dated 1868. Census: 6 in 67, 0 finer (4/18). NGC ID# 2BSU, PCGS# 10667
- 1870 Liberty Round Quarter, MS67  
BG-808, None Certified Finer**
- 
- 5588** 1870 Liberty Round 25 Cents, BG-808, R.3, MS67 PCGS. Die State I. The virtually pristine fields of this spectacular Superb Gem show prooflike reflectivity throughout. The design elements are sharply detailed and the smooth yellow-gold surfaces show a few hints of rose. The overall eye appeal is excellent. Population: 7 in 67 (2 in 67+), 0 finer (4/18).  
Ex: Dallas ANA Signature (Heritage, 10/2012), lot 6458, which realized \$3,818.75. NGC ID# 2BSW, PCGS# 10669
- 5589** 1871 Liberty Round 25 Cents, BG-809, Low R.4, MS67 NGC. The moderately mirrored sun-gold fields are unabraded and provide outstanding eye appeal. The strike is full except on the fraction denominator. One mint-made retained lamination is seen inside the D in DOLLAR. Tied with two other examples for the honor as finest certified at NGC (4/18).  
Ex: Long Beach Signature (Heritage, 6/2013), lot 5971, which realized \$2,350. NGC ID# 2BSY, PCGS# 10670
- 1871 Round Liberty Quarter  
BG-813, MS67 ★ Prooflike**
- 
- 5590** 1871 Liberty Round 25 Cents, BG-813, R.3, MS67 ★ Prooflike NGC. Breen-Gillio Die State II with die rust on the portrait and a die break on the reverse near 3 o'clock. This piece is tied with one other piece as the finest certified BG-813 quarter or it has been resubmitted and not removed from the census (4/18). An immaculate and flashy sun-gold Superb Gem.  
Ex: Central States Signature (Heritage, 4/2013), lot 6191, where it brought \$4,119.55. NGC ID# 2BT4, PCGS# 710674

**1872 Round Liberty Head Quarter**

**BG-814, MS66 Prooflike**

**Finest Certified**

- 5591 1872 Liberty Round 25 Cents, BG-814, High R.5, MS66 Prooflike NGC.** This Frontier & Bellemere quarter was retired early because a reverse die crack advanced quickly. This is an impressive Premium Gem. This diminutive gold piece has extraordinary contrast between the lustrous devices and fully mirrored fields. Heavy circular lathe lines on both sides remain from the die manufacturing process.  
Ex: Long Beach Signature (Heritage, 9/2013), lot 5498, where it brought \$2,820. NGC ID# 2BT5, PCGS# 710675

**1872 Round Liberty Head Quarter**

**BG-816, MS65**

- 5592 1872 Liberty Round 25 Cents, BG-816, R.6, MS65 NGC.** A semiprooflike sun-gold Gem. Unabraded, although the relief of the portrait causes incompleteness of strike on DOLLAR and CAL. The homely portrayal of Liberty is characteristic of the Frontier & Bellemere emissions. A scarce variety that has a total of only six examples certified by NGC (4/18). NGC ID# 2BT7, PCGS# 10677

**1873 Round Liberty Quarter**

**BG-817, MS67 ★**

- 5593 1873 Liberty Round 25 Cents, BG-817, R.3, MS67 ★ NGC.** The single finest graded example of the variety, the sole MS67 at either service. The present lot is also the only BG-817 quarter to receive a Star designation from NGC, presumably because the obverse is clearly prooflike while the reverse reflectivity is muted slightly by a soft central strike. However, all examples of BG-817 have indistinct centers due to the high relief bust and the convex nature of the reverse die. Curiously, for such an important coin the Breen-Gillio number is missing from the NGC insert.  
Ex: Central States Signature (Heritage, 4/2013), lot 6192, where it realized \$4,119.55. NGC ID# 2BT8, PCGS# 10678

- 5594 1872 Washington Round 25 Cents, BG-818, Low R.4, MS62 PCGS Secure. Baker-A504, Musante GW-821.** The California small denomination gold series is dominated by Liberty and Indian designs, which makes the few Washington Head varieties all the more distinctive. They command a significant premium above the typical Period Two piece. The present Washington quarter shows smooth olive-gold and stone-gray surfaces. Portions of the reverse legends are incompletely brought up. NGC ID# 2BT9, PCGS# 10679

- 5595 1869 Liberty Round 25 Cents, BG-826, R.4, MS65 Prooflike NGC.** As of (4/18), the single finest certified by NGC. This butter-gold Gem exhibits flashy fields and a bold strike. Only delicate hairlines in the reverse field deny an even higher grade. Robert B. Gray & Co. of San Francisco is credited by Breen-Gillio as the maker.  
Ex: Long Beach Signature (Heritage, 6/2018), lot 6072, which realizeded \$1,527.50. PCGS# 710687

- 5596 1870 Liberty Round 25 Cents, BG-835, R.3, MS65 NGC.** Die State II. A flashy apricot and olive-gold Gem. Evenly struck and free from detractions. An ideal candidate to represent the Robert B. Gray & Co. maker. Census: 1 in 65, 1 in 65 Deep Prooflike (4/18). Ex: PNG New York Invitational Signature (Heritage, 10/2014), lot 4562, which realized \$1,527.50. NGC ID# 2BT9, PCGS# 10696

**1875 Round Indian Quarter, MS66**

**BG-847, Tied for Finest Certified**

**Large Letters Variant**

- 5597 1875 Indian Round 25 Cents, BG-847, R.4, MS66 NGC.** This is one of only two examples of BG-847 to attain an MS66 grade at either NGC or PCGS. It is sharply struck with smooth, flashy apricot-gold surfaces and a minor strike-through on the reverse border near 9 o'clock. BG-847 has two important die states. The early die state (as depicted in the Breen-Gillio / Jay Roe plate coin) has small lapped letters in the reverse legend. The late die state (as seen on the present coin) has a large letters reverse (compare, for example, the A in CAL) and a crack from the rim at 2:30 through the wreath. It is the cataloger's opinion that the large letters variety merits a separate Breen-Gillio listing, i.e. BG-847A.  
Ex: Chicago ANA Signature (Heritage, 8/2015), lot 6598, which realized \$2,115. NGC ID# 2BUA, PCGS# 10708

---

**1875 Round Indian Quarter Dollar, MS65**

Rare BG-848 Variety

The Sole Finest Known

- 5598 1875 Indian Round 25 Cents, BG-848, Low R.7, MS65 NGC.** A rare round quarter dollar made by Herman J. Brand of San Francisco in 1875. The Breen-Gillio second edition cites just 12 different coins with the notation that a couple of duplications may exist therein, a survival estimate that still stands unchallenged. This Gem example is the sole finest by two full grade points of just six pieces certified by NGC, while the finest at PCGS are five MS64 examples (4/18). Prooflike fields highlight consistent straw-gold patina, while the design elements show pleasing definition. A small planchet clip is present at 3 o'clock on the obverse.  
Ex: Long Beach Signature (Heritage, 6/2015), lot 5510, which realized \$2,232.50. NGC ID# 2BUB, PCGS# 10709

---

**1876 BG-850 Indian Round Quarter  
MS65 Prooflike, Finest at NGC**

- 5599 1876 Indian Round 25 Cents, BG-850, Low R.6, MS65 Prooflike NGC.** The single highest NGC-graded example (4/18) of this rare round Indian variety. The canary-gold fields are reflective, and the strike is good except on the letters opposite the relatively high relief portrait. A lens reveals a few minuscule strike-throughs, as issued.  
Ex: Central States Signature (Heritage, 4/2014), lot 7182, which realized \$4,112.50. NGC ID# 28YD, PCGS# 710711

- 5600 1876 Indian Round 25 Cents, BG-852, High R.5, MS64+ PCGS.** Although just missing the Gem level, this sun-gold Choice Mint State piece has extraordinary eye appeal with prooflike fields and excellent contrast. Population: 12 in 64 (1 in 64+), 0 finer (4/18).  
Ex: Long Beach Signature (Heritage, 9/2013), lot 5499, which realized \$1,292.50. NGC ID# 2BUF, PCGS# 10713

---

**1876 Round Indian Quarter Dollar**

BG-853, MS66

- 5601 1876 Indian Round 25 Cents, BG-853, Low R.5, MS66 NGC.** This Premium Gem is tied with one other NGC submission for the finest certified, since PCGS has not certified an example finer than MS65 (4/18). This almond-gold Indian round quarter appears as made. The dies were slightly out of parallel, which caused a sharp strike except along the obverse border between 3 and 6 o'clock, and opposite on the reverse border between 6 and 9 o'clock. The incomplete strike in those select areas retains the granular planchet surface.  
Ex: Atlanta ANA Money Show Signature (Heritage, 2/2014), lot 5644, which realized \$1,997.50. NGC ID# 2BUG, PCGS# 10714

---

**1876 Round Liberty Quarter, MS66  
BG-854, 'Baby Head' Design  
Finest Certified**

- 5602 1876 Liberty Round 25 Cents, BG-854, Low R.5, MS66 NGC.** This is the single finest certified example of this scarce "Baby Head" variety. Liberty has a large eye and an open mouth. The stars have hollow centers, a further idiosyncrasy. The apricot-gold fields are flashy, although the coin lacks a Prooflike designation. The usual die state with several delicate die cracks through the reverse legends. NGC ID# 2BUJ, PCGS# 10715

- 5603 1871 Liberty Round 25 Cents, BG-861, Low R.5, MS65 Deep Prooflike NGC.** Overt contrast between the frosted devices and the mirrorlike fields is apparent at arm's length. The top loop of the 8 in the date is characteristically filled, and diagnostic rusting at DO in DOLLAR appears on the reverse. The sun-gold surfaces are extremely sharp and problem-free. Census: 1 in 65 Deep Prooflike, 1 finer (4/18). NGC ID# 2BUS, PCGS# 910722 Base PCGS# 10722

- 5604 1870 Goofy Head Round 25 Cents, BG-867, R.4, MS66 Prooflike NGC.** The single finest certified, as of (4/18). The crude and anonymous "Goofy Head" type. A late die state with a heavy reverse crack on the wreath between 7 and 9 o'clock. This piece displays bright yellow-gold color with deep mirroring in the fields. The central devices are sharp, though the reverse borders are weakly defined. Several prominent die cracks are seen on the reverse, and there is a small planchet lamination between stars 4 and 5.  
Ex: PNG New York Invitational Signature (Heritage, 10/2014), lot 4563, which realized \$2,232.50. NGC ID# 2BUY, PCGS# 710728

**1872/1 Round Indian Quarter, MS66  
BG-868, Tied for Finest Certified**

- 5605 1872/1 Indian Round 25 Cents, BG-868, High R.4, MS66 PCGS.** This magnificent California Indian quarter is sharply detailed in most areas, but shows the usual incompleteness on the central reverse. The reflective fields contrast with the frosty devices, and no signs of contact are evident. Population: 3 in 66, 0 finer (4/18).  
Ex: Dallas ANA Signature (Heritage, 10/2012), lot 6459, which realized \$3,055. NGC ID# 2BZU, PCGS# 10729

- 5606 1872/1 Indian Round 25 Cents, BG-869, Low R.4, MS66 Prooflike NGC.** A prominently mirrored lemon-gold, high-grade example. The motifs are well-struck and there are no detractions. The vertical die crack through the reverse center is usual for the variety. Census: 4 in 66 Prooflike, 1 in 67 Prooflike, 5 in 66 Deep Prooflike (4/18).  
Ex: Fred Neggen Estate (Superior, 2/1976), lot 1013; Ole Miner's Collection (Heritage, 12/2013), lot 5311, which realized \$1,057.50. NGC ID# 2BV2, PCGS# 710730

**1873 Round Indian Quarter  
BG-872, MS66 Deep Prooflike**

- 5607 1873 Indian Round 25 Cents, BG-872, R.5, MS66 Deep Prooflike NGC.** Dazzling field reflectivity and a bold, even strike ensure the eye appeal of the present Premium Gem. The fields near the profile and wreath display faint "ghosts," as made. As of (4/18) among NGC examples, only the present piece attains the MS66 DPL level with none finer and there is one MS66 Prooflike example certified. None are certified above the MS65 grade at PCGS. NGC ID# 2BV5, PCGS# 910733 Base PCGS# 10733

- 5608 1874 Indian Round 25 Cents, BG-875, High R.4, MS66 Prooflike NGC.** Period Two issue, made by Christopher Ferdinand Mohrig of San Francisco. A scarce variety, seldom seen this fine. NGC lists 13 Prooflike examples, with this piece as the finest. No MS67 examples are known in any contrast category. The finest at PCGS is a single MS66 (4/18). This Premium Gem is fully prooflike and well-struck, save for "ghosts" of the obverse stars seen around the reverse periphery as shallow planchet depressions. Well-preserved, with rich yellow color. NGC ID# 26NR, PCGS# 710736

- 5609 1874 Indian Round 25 Cents, BG-875, High R.4, MS66 Deep Prooflike NGC.** This well-made, high-grade Indian quarter is sharply struck and exhibits glassy lemon-gold fields. The 7 in the date is entered somewhat low on this elusive Christopher Ferdinand Mohrig variety. Census: 2 in 66 Deep Prooflike, 0 finer (4/18). Ex: Central States Signature (Heritage, 4/2015), lot 6588, which realized \$2,115. NGC ID# 2BV8, PCGS# 910736

- 5610 1875 Indian Round 25 Cents, BG-877, High R.5, MS65 PCGS.** Die State III, as usual, with radial crack from the rim to star 5. The present BG-877 round quarter is tied for the finest certified, with three in MS65 at PCGS and one in MS65 at NGC (4/18). A sun-gold Gem with glimpses of cherry-red along the obverse margin. The OLLA in DOLLAR shows minor weakness but all letters are nonetheless distinct. NGC ID# 2BVC, PCGS# 10738

- 5611 1875 Indian Round 25 Cents, BG-878, R.3, MS66 PCGS.** Die State II with a "Scarface" diagonal crack across the Indian's cheek and neck. Also known in Die State III with stars and legends attenuated from lapping, described in the Breen-Gillio second edition merely as "rusted dies." Tied for the finest at PCGS with two others (4/14). The lemon-gold surfaces are essentially as made, with a lint mark above the D in DOLLAR and a narrow horizontal "ghost" above the R. NGC ID# 2BVD, PCGS# 10739

**1876 Indian Round Quarter, BG-881, MS66  
Reflective Yellow-Gold Piece**

- 5612 1876 Indian Round 25 Cents, BG-881, R.5, MS66 PCGS.** This Period Two round Indian Head quarter shows the Reverse G with high fraction and berries on each side of the 1. The reverse is rotated nearly 90 degrees counterclockwise with respect to the obverse on this reflective yellow-gold piece, which shows no mentionable marks.  
Ex: Central States Signature (Heritage, 4/2014), lot 7184, where it realized \$4,112.50. NGC ID# 2BVG, PCGS# 10742

- 5613 1876 Indian Round 25 Cents, BG-882, R.7, MS65 NGC.** A rare variety from the productive workshop of Christopher Ferdinand Mohrig. Apparently, few were struck before Mohrig crudely modified the 6 in the date of the obverse die to somewhat resemble an 8. The Breen-Gillio reference lists 10 survivors and notes "probably includes some duplication." As of (4/18), NGC has certified only three examples, one as MS65 and two as MS65 Prooflike. A well-struck green-gold Gem whose sole deficiency is a slender horizontal line on the Indian above the ear. NGC ID# 2BVH, PCGS# 10743

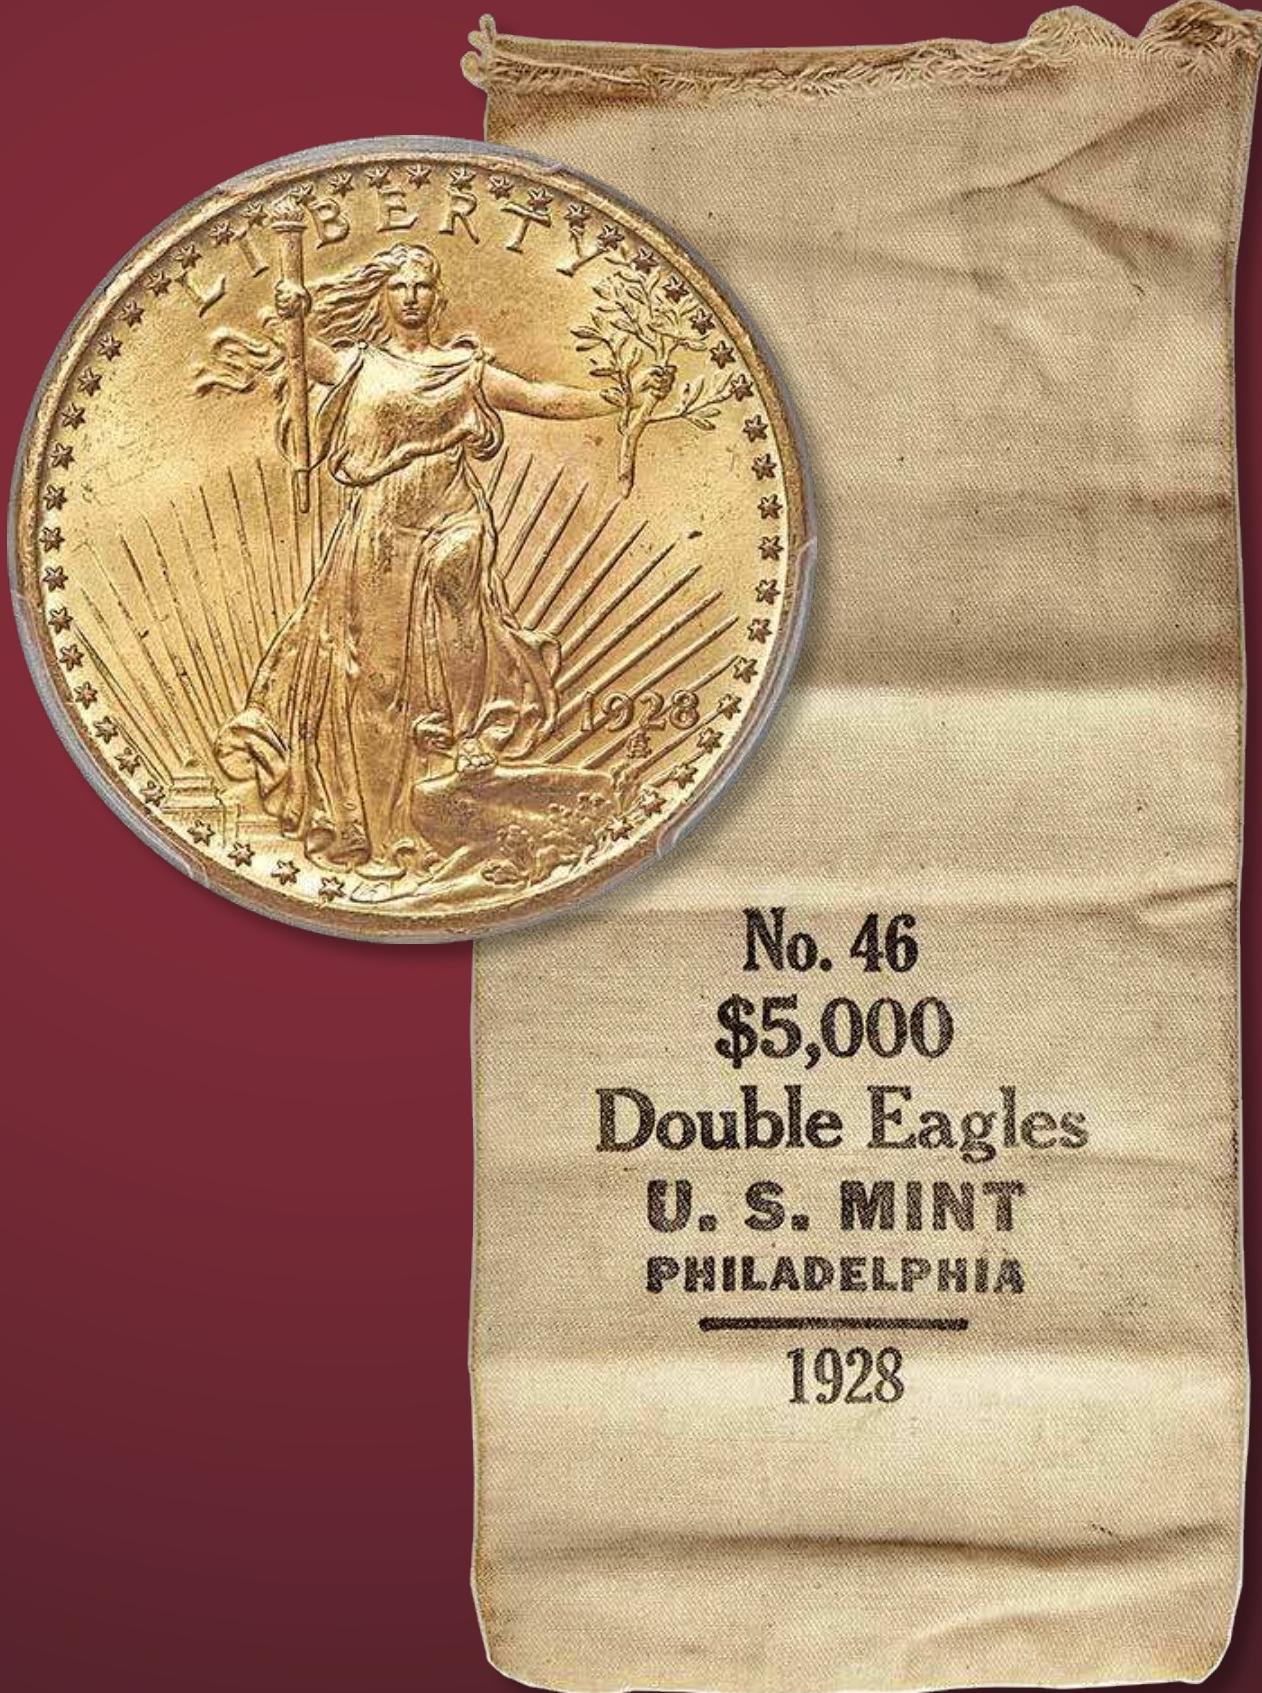

**1878/6 Round Indian Quarter  
BG-883, MS66 ★ Deep Prooflike**

- 5614 1878/6 Indian Round 25 Cents, BG-883, High R.4, MS66 ★ Deep Prooflike NGC.** This Premium Gem has exceptional eye appeal with excellent field-to-device contrast. The fields are unusually deeply mirrored around lustrous devices with brilliant yellow-gold surfaces. This is the finest Deep Prooflike certified at NGC and it is tied with one Prooflike (4/18).  
Ex: Atlanta ANA Signature (Heritage, 2/2014), lot 5645, which realized \$3,055. PCGS# 910744 Base PCGS# 10744

- 5615** 1881 Indian Round 25 Cents, BG-886, High R.5, MS65 Deep Prooflike NGC. A lovely lemon-gold Gem. The central strike is incomplete, but peripheral elements are sharp. The mirrored fields are free from apparent imperfections. Census: 2 in 65 Deep Prooflike, 5 in 66 Prooflike, 1 in 67 Prooflike (4/18).  
Ex: FUN Signature (Heritage, 1/2013), lot 14552, which realized \$1,645. NGC ID# 2BVM, PCGS# 910747 Base PCGS# 10747
- 5616** 1881 Indian Round 25 Cents, BG-887, R.3, MS67 Prooflike NGC. Dazzling field reflectivity and radiant canary-gold color combine with immaculate preservation and a good strike. The reverse die also coined several other Breen-Gillio varieties of various dates, but the obverse die struck only BG-887.  
Ex: Long Beach Signature (Heritage, 9/2012), lot 5132, which realized \$2,585. NGC ID# 2BVN, PCGS# 710748 Base PCGS# 10748
- 5617** 1874 Indian Round 25 Cents, BG-888, High R.5, MS66 PCGS. BG-888 is the only No Cal 1874 Indian round quarter variety. This scarce Christopher Ferdinand Mohrig marriage was struck circa-1882 but backdated. The present Premium Gem exhibits beautiful orange-gold mirrored fields. The strike is sharp except on the second L in DOLLAR. Population: 4 in 66, 0 finer (4/18). NGC ID# 2BVP, PCGS# 10749
- 5618** 1876 Indian Octagonal 50 Cents, BG-951, High R.5, MS65 PCGS Secure. A nicely struck Gem with radiant motifs and glassy sun-gold fields. The reverse exhibits a few faint horizontal flan lines, as made. Outstanding quality for this scarce Mohrig variety. Struck from moderately rotated dies. Population: 7 in 65, none finer (4/18). NGC ID# 2BXK, PCGS# 10809
- 5619** 1871 Liberty Round 50 Cents, BG-1011, R.2, MS67 NGC. BG-1011 is the only 1871 round half variety without an initial below the bust. This remarkable butter-gold Superb Gem exhibits a full strike and nearly flawless surfaces. Exceptional quality for this later Frontier & Co. variety. Census: 5 in 67, 1 in 67 Prooflike, 0 finer (4/18).  
Ex: Dallas Signature (Heritage, 10/2012), lot 6462, which realized \$3,290. NGC ID# 2BYL, PCGS# 10840
- 5620** 1868 Liberty Round 50 Cents, BG-1019, R.5, MS64 Prooflike NGC. A flashy pumpkin-gold near-Gem. A good strike with distinct date digits. Marks are limited to a brief line on the coronet. The reverse is bisected by a delicate die crack between 1 and 6 o'clock, undescribed in the Breen-Gillio reference. Census: 2 in 64 Prooflike, 1 in 64 Deep Prooflike (4/18).  
Ex: Elbert Henry Gary Collection (Heritage, 1/2016), lot 6867, which realized \$1,057.50. NGC ID# BNLN, PCGS# 710848
- 5621** 1869 Liberty Round 50 Cents, BG-1021, High R.6, MS63 Prooflike NGC. Orange-gold toning adorns the borders, while the centers are lemon-gold. Nicely struck with pleasing reflectivity and an unmarked appearance. The G initial below the bust indicates the rare variety was issued by Robert B. Gray. NGC has certified a mere four examples of BG-1021, with the present lot as the single finest graded (4/18).  
Ex: Elbert Henry Gary Collection (Heritage, 1/2016), lot 6868, which realized \$1,233.75. NGC ID# 2BZ2, PCGS# 710850
- 5622** 1871 Liberty Round 50 Cents, BG-1043, Low R.7, AU55 PCGS. A rare die variety identified by a spur from the F in HALF. On the obverse, three radial die cracks reach the bust. The H initial represents Hershfield & Mitchell of Leavenworth, Kansas. This olive-gold example displays substantial field flash and lacks apparent abrasions. Population: 3 in 55, 7 finer (4/18).  
Ex: Houston Signature (Heritage, 12/2013), lot 10021, which realized \$1,527.50. NGC ID# 2BZS, PCGS# 10872
- 5623** 1876 Indian Round 50 Cents, BG-1060, High R.5, MS65 PCGS. Ex: Jay Roe. A sharply struck and brightly mirrored Gem. The rich lemon-gold toning contributes further to the outstanding eye appeal. A remarkable example from the active Mohrig workshop. Tied for the finest PCGS-graded (4/18).  
Ex: Jay Roe Collection (Bowers and Merena, 9/2003), lot 524; FUN Signature (Heritage, 1/2016), lot 6874, which realized \$1,292.50. NGC ID# 2C2B, PCGS# 10889
- 5624** 1876 Indian Round 50 Cents, BG-1064, R.6, MS64 Prooflike NGC. A prominently mirrored honey-gold near-Gem. The reverse exhibits "ghosts" from the stars, customary for BG-1064. The first of Mohrig's "No CAL" round half varieties. The single finest certified among only six pieces encapsulated by NGC as BG-1064 (4/18).  
Ex: Elbert Henry Gary Collection / FUN Signature (Heritage, 1/2016), lot 6875, which realized \$1,410. NGC ID# 2C2F, PCGS# 710893
- 5625** 1860 Liberty Octagonal 1 Dollar, BG-1102, R.4, MS64 PCGS Secure. Only nine varieties of Period Two octagonal dollars are listed in Breen-Gillio, and near-Gems are under strong demand. The nicely mirrored surfaces are predominantly lemon-gold but exhibit splashes of cherry-red and powder-blue. Crisply struck and blemish-free. Population: 9 in 64, 7 finer (5/18). NGC ID# 2C2Z, PCGS# 10913
- 5626** 1875 Indian Octagonal 1 Dollar, BG-1112, High R.5, MS64 Prooflike NGC. A lovely apricot-gold Choice octagonal dollar. The strike shows the usual, occasional incompleteness. Hair-thin contact is noted near the second L in DOLLAR and the upper-left portion of the wreath. None have been certified as Gem or finer. Census: 2 in 64 Prooflike, 1 in 64 Deep Prooflike (4/18). PCGS# 710923
- 5627** 1875 Indian Octagonal 1 Dollar, BG-1126, R.5, MS63 Prooflike NGC. The reverse die was only used to strike BG-1126, yet it did not hold up long, given the several lengthy cracks near DOLLAR. This Mohrig-made example is evenly struck and displays attractive caramel-gold surfaces. A few pinpoint flecks are noted on the left obverse field. NGC ID# 2C3U, PCGS# 710937

## PATTERN

9171 (1976-1978) Gould Inc. Private Pattern, Titanium, RB-1005, Pollock-5430, MS66 PCGS. Obverse 1 / Reverse A. Uniform surfaces with noticeable granularity, as seen on all titanium examples. Some pieces have brighter, more reflective fields than others but none approach the detail and clarity of the same designs struck in nickel or copper. Dies of Pollock-5430, but the alloy is designated as aluminum on the PCGS insert. Incorrectly designated by PCGS as Pollock-5435.

## ERRORS

9172 1978 Lincoln Cent — Double Denomination on Struck Dime — MS65 PCGS.

9173 1986 Lincoln Cent — Double Denomination on Struck Dime — MS63 PCGS.

9174 2000 Lincoln Cent — Struck on a (2000)-P Dime — MS67 NGC.

**9175** 1888 Three Cent Nickel — Struck 10% Off Center — AU53 PCGS.  
*From The Emily A. Blake Collection.*

**9176** Undated Liberty Nickel—Struck Fragment—MS63 ANACS. A planchet split prior to the strike, and a portion representing 25% of the original planchet was struck. Stars 1 through 5 are visible, as is a portion of Liberty's profile. The reverse includes UNITED ST and a few elements from the left border of the wreath. Believed to be the only struck fragment in the Liberty nickel series. Lustrous, and toned light golden-brown. The plate coin for the struck fragment error category at MintErrorNews.com.  
Ex: Long Beach Signature (Heritage, 9/2008), lot 1465, which realized \$977.50.  
*From The Ostrow Error Collection.*

**9177** 1936 Buffalo Nickel — Struck 15% Off Center — MS64 PCGS.

**9178** (1954) Jefferson Nickel — Struck 75% Off Center on a Cent Blank — MS64 Brown NGC. 3 gm.

**9179** (1921) Mercury Dime — Struck 15% Off Center — MS64 Full Bands NGC.

**9180** 2000-D Roosevelt Dime — Reverse Mirror Brockage, Obverse Damage — NGC Details. Unc.

**9181** 1971-D Kennedy Half Dollar — Struck on a Clad Quarter Blank — MS66 PCGS Secure.

**9272** 1918 Illinois International Livestock Exposition, Award Medal, Uncertified. Awarded to champion sheep carcass. Bronze, triangular, plain edge, 68 mm. Accompanied by the original presentation holder, Very Good.

**9273** 1918 Illinois State Fair and Industrial Exposition Award Medal Uncertified. The medal is awarded to the "oldest Illinois born woman attending the fair." Bronze, triangular, 68 mm. Included with the lot is the original presentation box, fair condition.

## EARLY AMERICAN TOKEN

**9274** 1799 New York Associate Church XF40 NGC. Rulau-E-NY-622, R.7. White metal, oval, 23 x 17.5 mm, plain edge.

## CIVIL WAR MERCHANTS

**9275** 1863 F.P. Rogers, Philadelphia, PA, MS65 NGC. Fulda-PA750P-3c. Attribution is per NGC. Unlisted in Fulda 3rd Edition in nickel, but listed as R.5 in German silver.

## CONFEDERATE STATES OF AMERICA

**9276** Three "1861" Confederate Cents, Smithsonian "Restrike" Gem Proof NGC. Private issue struck 2011, 150th Anniversary. The lot includes: .999 Fine Gold; .999 Fine Silver; Copper. No presentation box included. (Total: 3 tokens)

## 20TH CENTURY TOKENS AND MEDALS

**9277** 1925 Battle of Lexington Centennial Medal Uncertified. Bronze, 75 mm. Edge is plain except for Whitehead Hoag stamp.

**End of Auction**

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction presented by Heritage Auctions, a d/b/a of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperativ U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
  - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
  - Nineteen and one-half percent (19.5%) on Movie Poster Auction lots;
  - Twenty percent (20%) on Comic, Currency, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots;
  - Twenty-three percent (23%) on Wine Auction lots;
  - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.
  - Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.

9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.

10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.

11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments  
(see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid .....	Bid Increment .....
< \$10.....	\$1
\$10 - \$49 .....	\$2
\$50 - \$99 .....	\$5
\$100 - \$199 .....	\$10
\$200 - \$499 .....	\$20
\$500 - \$999 .....	\$50
\$1,000 - \$1,999 .....	\$100
\$2,000 - \$4,999 .....	\$200
\$5,000 - \$9,999 .....	\$500
Current Bid .....	Bid Increment .....
\$10,000 - \$19,999.....	\$1,000
\$20,000 - \$49,999.....	\$2,000
\$50,000 - \$99,999.....	\$5,000
\$100,000 - \$199,999 .....	\$10,000
\$200,000 - \$499,999 .....	\$20,000
\$500,000 - \$999,999 .....	\$25,000
\$1,000,000 - \$1,999,999 .....	\$50,000
\$2,000,000 - \$9,999,999 .....	\$100,000
>= \$10,000,000.....	\$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed

by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless of whether bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.

15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.

16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.

17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.

18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw prior to the close, any lots from the Auction.

19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.

20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).

21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.

22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.

24. Payment is due upon closing of the Auction session, or upon presentation of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.

25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.

26. In the event that a Bidder's payment is dishonored upon presentation(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.

27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.

28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.

29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise. 30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

# Terms and Conditions of Auction

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.
- Delivery, Shipping, and Handling Charges:**
32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier; accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
- Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. **NOTICE: Auctioneer is neither an insurance company nor a common carrier of any type.**
  - Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
  - Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.
- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:
- Seizure or destruction under quarantining or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
  - Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.
- Cataloging, Warranties and Disclaimers:**
38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.
- Release:**
43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.
- Dispute Resolution and Arbitration Provision:**
45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.
- Miscellaneous:**
52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.
- State Notices:**
- Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.
- Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.
- Notice as to an Auction in Texas. In compliance with TDRL rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

**COINS AND CURRENCY TERM A:** Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale; such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

**COINS AND CURRENCY TERM B:** Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

**COINS AND CURRENCY TERM C:** Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

**COINS AND CURRENCY TERM D:** Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgs.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

**COINS AND CURRENCY TERM E:** Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

**COINS AND CURRENCY TERM F:** Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

**COINS AND CURRENCY TERM G:** Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

**COINS AND CURRENCY TERM H:** Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

**COINS AND CURRENCY TERM I:** Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

**COINS AND CURRENCY TERM J:** All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

**COINS AND CURRENCY TERM K:** Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

**COINS AND CURRENCY TERM L:** NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

**COINS AND CURRENCY TERM M:** For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

**COINS AND CURRENCY TERM N:** Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

**COINS AND CURRENCY TERM O:** Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

## Notice as to an Auction in New York City

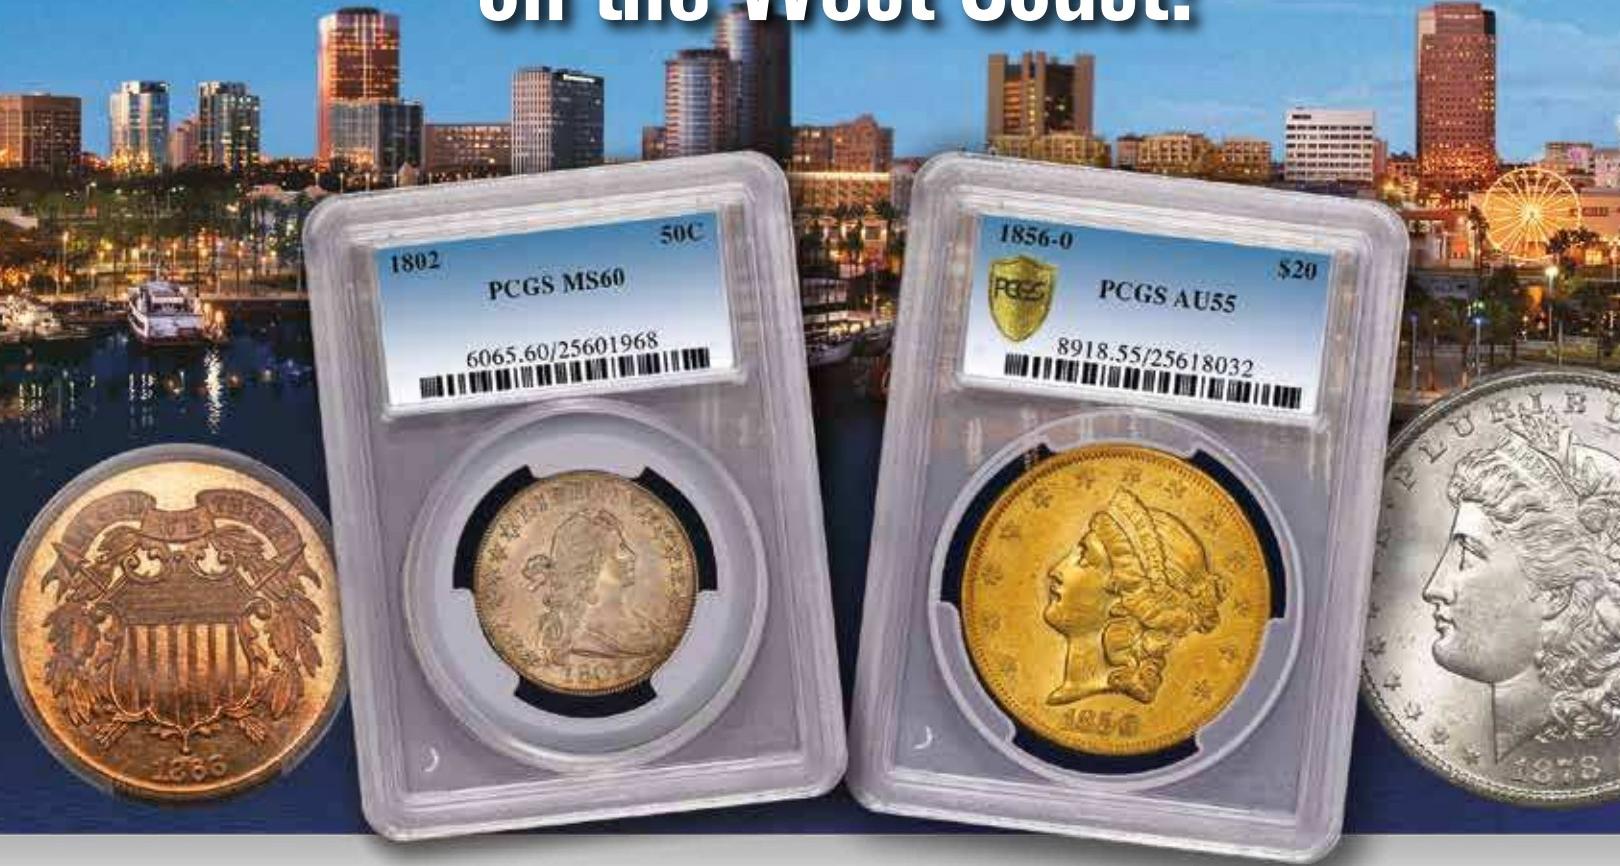

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale on behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016

# The Largest Coin Show on the West Coast!

June 14  
June 15  
June 16

**The June 2018 LB Show offers a complete collectibles experience including:**
